Committee amendment offered by Mr. ARENTZ: Page 6, line 6, insert a new paragraph, as follows:

"If, during the period of amortization, the Secretary of the Interior shall receive revenue in excess of the amount necessary to meet the periodical and/or accrued payments to the United States as provided in the contract or contracts executed under this act, then, immediately after the settlement of such periodical and/or accrued payments, he shall pay to the State of Arizona 18¾ per cent of such excess revenues, and to the State of Nevada 18¾ per cent of such excess revenues."

Mr. ARENTZ. Mr. Chairman, one of the safeguards in this bill provides that work shall not commence until contracts shall be entered into for the sale of power and stored water sufficient in amount to return to the Treasury of the United States all costs of the construction of the works herein provided. This amendment follows another important matter with respect to equitable and fair treatment to the States of Arizona and Nevada after yearly amortization payments have been made from the revenue derived from such contracts, for the sale of power and water, in line with the policy adopted in the enactment of the Federal water power act. Section 17 of this act reads as follows:

SEC. 17. That all proceeds from any Indian reservation shall be placed to the credit of the Indians of such reservation. All other charges arising from licenses hereunder shall be paid into the Treasury of the United States, subject to the following distribution: Twelve and one-half per cent thereof is hereby appropriated to be paid into the Treasury of the United States and credited to "Miscellaneous receipts"; 50 per cent of the charges arising from licenses hereunder for the occupancy and use of public lands, national monuments, national forests, and national parks shall be paid into, reserved, and appropriated as a part of the reclamation fund created by the act of Congress known as the reclamation act, approved June 17, 1902; and 37½ per cent of the charges arising from licenses hereunder for the occupancy and use of national forests, national parks, public lands, and national monuments, from development within the boundaries of any State shall be paid by the Secretary of the Treasury to such State; and 50 per cent of the charges arising from all other licenses hereunder is hereby reserved and appropriated as a special fund in the Treasury to be expended under the direction of the Secretary of War in the maintenance and operation of dams and other navigation structures owned by the United States or in the construction, maintenance, or operation of headwater or other improvements of navigable waters of the United States.

I offered this amendment to my Committee on Irrigation and Reclamation while this bill was being considered, and same was adopted by the committee. An amendment identical to this was offered to the Johnson bill in the Senate by the senior Senator from Nevada and adopted. I sincerely trust that my colleagues will accept same—providing for revenue to my State of Nevada and to Arizona from any surplus revenue to the amount of 18¾ per cent of such surplus.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Nevada.

Mr. SPROUL of Kansas. Mr. Chairman, I make the point of order that the amendment is not germane.

The CHAIRMAN. The point of order comes too late.

Mr. DOUGLAS of Arizona. Mr. Chairman, I desire to be heard, briefly, upon the amendment. The amendment means nothing. It provides for payment in excess of periodical payments to the United States, made under contract. There is no reference in the bill anywhere to any periodical payments which must be made to the United States. I submit this thought: Who is going to pay anything in excess of what he has to pay?

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Nevada.

The amendment was agreed to.

Mr. DOUGLAS of Arizona. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment by Mr. DOUGLAS of Arizona: Page 5, lines 6 to 21, inclusive, strike out section 4 (a) and insert in lieu thereof the following:

"SEC. 4. (a) No work shall be begun and no moneys expended on or in connection with the work or structure provided for in this act, and no water rights shall be claimed or initiated hereunder, and no steps shall be taken by the United States or by others to initiate or perfect any claims to the use of water pertinent to such works or structures until the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming shall have approved, without condition, the Colorado River compact mentioned in section 12 hereof."

Mr. DOUGLAS of Arizona. Mr. Chairman, the purpose of this amendment is to make the bill effective when the seven-State compact which was authorized by the Congress in 1921 shall have been approved by the legislatures of the seven States.

The bill now provides that the act shall become effective when six of the seven States, through their legislatures, shall have approved the compact. I submit that to adopt the amendment is the only course which the House can pursue.

Let us see if there is in fact a six-State compact. The so-called six-State compact is nothing but a compact of exactly the same terms, saving article 11, as those contained in the seven-State compact. Now, let us see how many States are made parties to the seven-State compact. Article 2 of that compact defines the terms. It says:

The term "Colorado River Basin" shall mean the drainage area of the Colorado River system—

And so forth. It says:

The upper division means the States of Colorado, New Mexico, Arizona, and Wyoming—

And so forth. Bear in mind that those four States are named specifically. It says:

The term "lower division" means the States of Arizona, California, and Nevada.

I point out to members of the committee that by the very terms used in article 2 of the compact Arizona is made a party to it and named as a party specifically. Arizona is further named as a party to the compact in the definition of the lower basin. The next article allocates waters between divisions and between basins. The effect of the compact is this, to divide the seven States into an upper basin and a lower basin.

Four States are specifically named as included in the upper basin, and three States are just as specifically named as within the lower basin, and Arizona is one of them in the lower basin. The compact therefore allocates waters between these two groups of the seven States.

How, by simply waiving the provisions of article 11 of the compact, which makes the compact effective when ratified by all the legislatures of the States and this Congress or any State legislature, can you eliminate the State of Arizona from the terms of the compact? If the Congress attempts to do so, or if other State legislatures attempt to do so, they would be following a course which would be very similar to this example. Let us assume that there are seven men who have an undivided interest in a piece of real estate. Four of those men get together, and three of those men get together. All seven of them are named specifically in a contract to divide the undivided interest and to divide the undivided interest between two groups, one of which shall be defined as consisting of four men named by name, and the other group being defined as consisting of three men named by name.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. DOUGLAS of Arizona. I ask unanimous consent, Mr. Chairman, to proceed for two additional minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. DOUGLAS of Arizona. Under what theory of law can six of those seven men wipe out the seventh, who has an undivided interest, and divide his interest? That case is absolutely similar to the one which is now before you, and I submit to this Congress that Congress has no right whatsoever to attempt to strike Arizona from the terms of the compact.

Not only that, but the Congress can not strike Arizona from the terms of the compact, and therefore there is no six-State compact, and the only action that this Congress can take is to ratify the only compact which exists, namely, the seven-State compact.

Mr. WHITE of Colorado. Mr. Chairman, I desire to offer an amendment to the amendment.

The CHAIRMAN. The gentleman from Colorado offers an amendment, which the Clerk will report.

Mr. WHITE of Colorado. I propose to amend the amendment by adding thereto the following.

The Clerk read as follows:

Mr. WHITE of Colorado offers the following amendment to the amendment offered by Mr. DOUGLAS of Arizona: At the end of the Douglas amendment insert: "Or if, after one year from the passage of this act, said States shall fail to ratify the said compact, then if six of said States shall ratify said compact, including the State of California, and shall consent to waive the provisions of the first paragraph of article 11 of said compact, which makes the same binding and obligatory only when approved by each of the seven States mentioned in said section 12, and shall have approved said compact without conditions save that of said six States' approval, and the President by public proclamation shall have so declared."

Mr. HASTINGS. Mr. Chairman, may we have the other amendment rereported?

Mr. WHITE of Colorado. I would like to have my own amendment read in connection with the Douglas amendment, showing how the Douglas amendment would read when amended.

The CHAIRMAN. The Clerk will again report the Douglas amendment as it would read when amended by the White amendment.

The Clerk read as follows:

Amendment offered by Mr. DOUGLAS of Arizona as proposed to be amended by Mr. WHITE of Colorado: Page 5, lines 6 to 21, inclusive, strike out section 4 (a) and insert in lieu thereof the following:

"SEC. 4 (a). No work shall be begun and no moneys expended on or in connection with the work or structure provided for in this act, and no water rights shall be claimed or initiated hereunder and no steps shall be taken by the United States or by others to initiate or perfect any claims to the use of water pertinent to such works or structures until the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming shall have approved, without condition, the Colorado River compact, mentioned in section 12 hereof, or if, after one year from the passage of this act, the said States shall fail to ratify the said compact, then if six of said States shall ratify said compact, including the State of California, and shall consent to waive the provisions of the first paragraph of Article II of said compact, which makes the same binding and obligatory only when approved by each of the seven States mentioned in said section 12, and shall have approved said compact without conditions, save that of said six States' approval, and the President by public proclamation shall have so declared."

Mr. WHITE of Colorado. Mr. Chairman, I would like to be recognized.

The CHAIRMAN. The gentleman from Colorado is recognized for five minutes.

Mr. WHITE of Colorado. There is no question but that all of the States which constitute the Colorado River Basin earnestly desire Arizona to be a party to this compact. However, at least three of the upper States and one of the lower States, to wit, Nevada, feel it would be a grave injustice, should it be possible, as we believe it is, for Arizona to block this great constructive piece of legislation which is of such vital importance to the entire arid region.

If the amendment proposed by the gentleman from Arizona [Mr. DOUGLAS] should be adopted we have not advanced one step. The attitude of Arizona is unequivocally against this project, at least that is the attitude of the gentleman from Arizona [Mr. DOUGLAS] and I believe my colleague, the gentleman from Utah [Mr. LEATHERWOOD]. But be that as it may, efforts have been put forth earnestly for months and years to effect this Colorado River compact by the signatures and approval of the seven States. The truth is they are not as near together now as they were some weeks and months ago, for then there seemed to be a disposition to negotiate while now there is none.

When the Reclamation Committee, of which I am a member, agreed to defer the reporting of this bill to this House until the 15th of March, the several governors of the States that comprise this river basin were advised of that fact; and were earnestly requested by the committee, through its chairman, to negotiate and effect an agreement, to the end that there might be favorable legislation at this session, calling attention to the fact that a measure which passed some time ago that prohibits the Federal Power Commission from granting any permits for the construction of power plants upon the Colorado River expires March 4, 1929. Thereupon the Governor of Utah, who was the chairman of the governors' conference, took steps to call a meeting at Salt Lake City.

Governor Adams, of Colorado, wired he could not attend because of the strike situation that then existed in his State. Thereupon the Governor of Wyoming and the Governor of New Mexico suggested that Denver would be more convenient, and it was agreed, Governor Dern consenting, that the meeting for further negotiations should be held at Denver. Governor Adams consented to it and a day was appointed for that purpose, but one or two days, two I think, before the reconvening of the governors was to take place the meeting was called off.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. WHITE of Colorado. Mr. Chairman, I ask unanimous consent to proceed for two additional minutes.

The CHAIRMAN. Without objection it is so ordered.

There was no objection.

Mr. WHITE of Colorado. The Governor of Utah, Governor Dern, wired the other governors, including Governor Adams of my State, to the effect that there would be no meeting, as he had received word from the Governor of Arizona which indicated that there was no further probability at that time of effecting the compact or agreement.

Now, what is the situation as far as the upper basin and lower basin are concerned, and that is the dispute here? All parties, when they were negotiating, readily agreed that the upper basin of four States should be allotted a portion of this water and that the lower States should be allotted another portion. When that was done there should have been, in my judgment, a signing of this river compact. But not so, because Arizona took the position that she would not sign until there was an agreement between herself and California as to the quantity of water she would receive. What concern have the upper States with that? None whatever. The upper States are willing to negotiate among themselves and they alone are interested on that point. We contend that the lower States should agree among themselves and we are not concerned with that. [Applause.]

The CHAIRMAN. The time of the gentleman from Colorado has again expired.

Mr. SWING. Mr. Chairman, no one would be more pleased than myself to have Arizona come into this friendly family of States and ratify the Colorado River compact. It would be an object ardently to be desired, and would bring happiness, peace, and contentment from one end of the Colorado River Basin to the other. But such is not the intention of the State of Arizona, and it is not the desire of the gentleman who offers the amendment for a seven-State compact to bring about that condition. He himself while in the State legislature cast the deciding vote which kept Arizona out of the friendly family of States. We have given Arizona six years to decide whether she would come in or not. We have all done everything that was humanly possible to do to get her to ratify the compact and come into this friendly family of States.

Mr. WAINWRIGHT. Will the gentleman permit a question?

Mr. SWING. Yes.

Mr. WAINWRIGHT. The question which rather disturbs me, as a Representative from one of the States that is not involved in this compact, one of the sister States that is not directly interested, as to the ethics, we might say, or as to the propriety of the other sister States attempting to coerce Arizona into giving up any right she has.

Mr. SWING. We are not coercing her. If she stays out of the compact, she is not bound by the terms of the compact, and she retains all the rights she now possesses.

Mr. WAINWRIGHT. That is a different matter.

Mr. SWING. And she still has the benefit of the law of prior appropriation, and she still has the right to the beneficial use of any of the water she is able to put to use.

Mr. WAINWRIGHT. I am sure my friend from California will see the propriety of that question from the standpoint of the States that are outside of the seven States.

Mr. SWING. Yes, indeed.

As to the amendment to the amendment offered by my friend, the gentleman from Colorado [Mr. WHITE], Arizona has announced here openly and publicly that not only is she going to fight this bill on the floor of the House and in the Senate, but that as soon as it becomes a law she is going to take it to the Supreme Court. I want to call the attention of my good friend from Colorado to the fact that his amendment merely gives Arizona another year's delay before she must go to the Supreme Court. If she is determined to go to the Supreme Court let us have her go as soon as possible.

Mr. WHITE of Colorado. Will the gentleman yield for a question?

Mr. SWING. Yes.

Mr. WHITE of Colorado. Your bill as it stands provides that it shall not become effective until the six States ratify and confirm it. Now, no State can do that except through its legislative authority, and inasmuch as the legislature of none of these States, so far as I know, meets until next January, or rather, in December, a year will practically elapse. I am perfectly willing to make it shorter, but I would suggest that we should have embodied in the bill a length of time that will permit the States to ratify.

Mr. SWING. The legislatures meet next January. Every one of these six States named in our bill has ratified a six-State compact. True, subsequently Utah withdrew, but we have information which leads us to believe that there is a growing sentiment in the State of Utah to go back into the six-State compact, and if this bill is passed in its present form, this will save to these six States the benefits of the compact and also the work can go ahead promptly.

Either this work is an urgent need for flood control, on account of the grave menace in the lower Colorado River, or else we are out of court. If there is the menace we have said there is and that we believe there is and the danger the engineers declare there is, then why in the name of goodness should we tie up the works, after we have passed a law for the purpose of relieving the menace, for a full year before any action whatever can be taken?

Mr. LEATHERWOOD. Will the gentleman yield for a question?

Mr. SWING. I yield the floor.

Mr. LEATHERWOOD. I am just wondering about the source of the gentleman's information.

Mr. DOUGLAS of Arizona. Mr. Chairman, I rise to speak in opposition to the amendment to the amendment.

The gentleman apparently has assumed unto himself mind-reading qualities very few others have ever assumed. He can tell the House my motives, he can tell the House what my State wants, and I have no doubt, in fact I know, that his statement as to my motives and his statement as to the motives of my State are just as untrue as a good many of the other contentions he has made.

The gentleman has said that there is a six-State compact. There is not. The Congress and six States can not eliminate as a party who has any undivided interest in the waters of the Colorado that party from a contract which divides that undivided interest.

The gentleman has said I voted against the Colorado River compact. I did. And I submit this to the House. I did so in 1923 because no one knew anything about the compact and I said "it is unsound to sign a contract unless you know what you are signing."

The State of Arizona since then has been attempting to negotiate with California. It wants a compact with California before it signs the seven-State compact for this reason. It is in the same position with respect to California that the upper basin States are with respect to the lower-basin States. California can apply to beneficial use the waters of the Colorado infinitely faster than can Arizona. California's ratification of the compact was conditional upon the construction of a storage dam on the Colorado, the construction of which, by the nature of the topography of the country and of the appropriations in the act and the works to be constructed would give the waters of the Colorado, to California, and Arizona simply said to California, "You make an equitable agreement with us relative to an allocation of water between us and also give us a right to tax power which is to be developed by the use of the fall within our State, and of our undivided interest in the Colorado, which power you are going to use in your State to increase the industries of your State, to increase the taxable wealth of your State, and then we will sign the Colorado River compact."

California refused to accept the terms of the arbitration of the governors in Denver. Arizona accepted them; and I submit to the House that the imputations as to the motives of Arizona are unfair and unjustifiable.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. ARENTZ. Mr. Chairman, I move to strike out the last two words.

I have here in my hand an editorial from the Reno (Nev.) Evening Gazette of Thursday, April 26, which states as follows:

From the time that Arizona refused to ratify the Santa Fe seven-State compact its representatives have adhered in general to the principle that any dam and reservoir built upon the Colorado River should be located wholly within Arizona. Nevada refused to join with Arizona in this demand.

The State of Arizona also has vigorously opposed development by the Government. On the other hand, it has insisted that such development should be made by private capital wholly within its borders in order that it, exclusively, might tax the new property values so created. However, it agreed to accept Government development upon condition that it is given a large share of the power revenues, and to the latter the Nevada commission agreed, provided Nevada is given as large a share of such revenues as Arizona. To this extent Nevada joined hands with the Arizona commissioners. The Nevada commissioners, however, considered the revenues demanded by Arizona as being unreasonable and gave their approval to payments to each of the two States of 18¾ per cent annually of the net profits earned during the amortization period.

Arizona also demanded that the Swing-Johnson bill place a definite limit upon the amount of the river's waters that could be used in the future by California. Nevada agreed to this proposal, and after California scaled down her water demands to a reasonable amount Nevada accepted them as being the best compromise obtainable. Arizona refused to agree upon the amount specified.

Both Nevada and Arizona agreed that each of the lower basin States and their municipalities should be given the right to purchase the power developed at the switchboard.

Finally the pending bill was amended to meet every substantial demand made by this State, and the California delegation agreed to support it in its amended form. Arizona, however, insisted upon still greater concessions, and then Nevada refused to travel further with its commission and its congressional delegation.

Arizona is now fighting the Swing-Johnson bill. Nevada is supporting it.

Mr. LEA. To withhold action until Arizona signs the seven-State compact would give her the power to impose any condition she saw fit on California as a condition of her compliance. It would give her the power to impose whatever charges she might see fit as taxes on California for a Federal improvement.

I call the attention of the House to the fact that Arizona has received over $21,000,000 more than she has contributed to the reclamation fund of the United States for building power dams and reclamation projects on which she is required to pay no interest and no taxes. The Government has so built three or four dams in Arizona. California has contributed over $8,500,000 to the reclamation fund in excess of what she has used. That is part of the tax-free money that the Government has loaned Arizona interest free.

The Coolidge Dam is now being constructed in Arizona tax free and interest free at a cost of over $11,000,000. That will make over $32,000,000 that Arizona has received tax free. Now, when a similar development is proposed that may be of some advantage to her sister State she loudly proclaims a violation of State rights. California is not asking for free money. She offers contracts to pay principal and interest. Arizona, enjoying her tax-free and interest-free money, demands a tax on this Federal development because, perhaps, her sister States may enjoy some benefit from it. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado [Mr. WHITE] to the amendment of the gentleman from Arizona.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now recurs on the amendment offered by the gentleman from Arizona [Mr. DOUGLAS].

The question was taken; and on a division (demanded by Mr. DOUGLAS of Arizona) there were 21 ayes and 50 noes.

So the amendment was rejected.

Mr. MOORE of Virginia. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. MOORE of Virginia: At the end of the committee amendment offered by the gentleman from Nevada [Mr. ARENTZ] insert: "The conclusion and determination of the Secretary of the Interior shall be subject to the President's sanction and approval."

Mr. SWING. Mr. Chairman, I move that all debate on this section and all amendments thereto close in five minutes.

Mr. DOUGLAS of Arizona. Mr. Chairman, for the last 15 minutes the gentleman from Utah [Mr. LEATHERWOOD] has been

trying to offer an amendment. It is a very sound amendment, and I believe he is entitled to have it considered.

Mr. SWING. I will withdraw my motion, Mr. Chairman.

Mr. MOORE of Virginia. I will withhold my amendment, Mr. Chairman.

Mr. LEATHERWOOD. At last Mr. Chairman, I desire to offer an amendment which has been at the Clerk's desk for 15 minutes.

The Clerk read as follows:

Page 5, in line 24, after the word "contract," strike out the words "or otherwise."

Mr. SWING. Mr. Chairman, I am willing to accept that amendment.

Mr. LEATHERWOOD. I understood the gentleman to say yesterday that he would accept the amendment.

The question was taken, and the amendment was agreed to.

Mr. SWING. Now, Mr. Chairman, I renew my motion that all debate on the section and all amendments thereto close in five minutes.

The CHAIRMAN. The question is on the motion of the gentleman from California.

The question was taken, and the motion was agreed to.

Mr. WINTER. Mr. Chairman, may be have the amendment offered by the gentleman from Virginia reported again?

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

The Clerk reported the Moore amendment.

Mr. MOORE of Virginia. Mr. Chairman, just a word or two on this amendment. We are dealing with subsection (b) of section 4 of the bill. That subsection is extremely important. It provides that the Secretary of the Interior, in advance of going forward, shall feel assured that he has contracts which will produce sufficient revenue to protect the Government in the payment of interest and in the payment within 50 years of the principal. The importance of that requirement can not be exaggerated. As the section now reads the conclusion and determination of the Secretary of the Interior about the sufficiency of the contracts is to be final. I am convinced we should adopt the amendment which I have offered, which will place the final responsibility and leave the final word with the President, and that is simply in line with the amendment which I offered a while ago and which was adopted.

I do not believe—and, of course, I am not casting reflection upon any official—that it is a safe thing to intrust to a single official such very extensive authority as is given the Secretary of the Interior here without any check upon him whatever. Ours is a government of checks, and what I propose is that the Secretary shall be checked by the supervision of the President himself.

Mr. SWING. Of course, there is a check by the Committee on Appropriations of the House, and the Committee on Appropriations, I think the gentleman may rest assured, will not appropriate any money unless they are satisfied it should be appropriated. I think they will be much more vigorous in their supervision of the Secretary in the matter of his contracts than the President would be.

Mr. MOORE of Virginia. But even so, the Secretary has to determine that he has found a satisfactory basis with reference to this extremely important financial feature of the entire transaction. I think his opinion ought to be subject to the sanction of the President.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Virginia. Yes.

Mr. CRAMTON. I take it that the gentleman's amendment heretofore adopted, and the one pending giving the last word to the President, is in part based upon the probability that when this comes up for consideration there will be in the White House a very eminent engineer and successful business man?

Mr. MOORE of Virginia. I would not make any such violent assumption as that, but whoever may be in the White House I may remind you that we have had some experiences, and I am not going to talk about them now, which should persuade us that it is unsafe to leave to any officer, even though occupying a Cabinet position, discretion to do what he pleases without reference at all to his chief. The bill as it stands is drawn in that way and should be amended.

Mr. ADKINS. Does the gentleman not believe as a matter of practical administration that the President would be apt to O. K. what one of his Cabinet officers presented to him?

Mr. MOORE of Virginia. I think we ought to express his obligation as final authority in the legislation. That will make for safety at every stage of the business.

Mr. SMITH. Mr. Chairman, the committee will accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia.

The question was taken; and on a division (demanded by Mr. LAGUARDIA) there were—ayes 57, noes 5.

So the amendment was agreed to.

Mr. MORTON D. HULL. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. MORTON D. HULL: At the end of section 4, as amended, insert the following: "Such contract or contracts shall provide that in case the total cost of the project provided for by this act exceeds $125,000,000, the rates to be charged for power generated at said dam shall be correspondingly increased."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. DOUGLAS of Arizona) there were—ayes 13, noes 47.

So the amendment was rejected.

The Clerk read as follows:

SEC. 5. That the Secretary of the Interior is hereby authorized, under such general regulations as he may prescribe, to contract for the storage of water in said reservoir and for the delivery thereof at such points on the river and on said canal as may be agreed upon, for irrigation and domestic uses, and delivery at the switchboard to municipal corporations, political subdivisions, and private corporations of electrical energy generated at said dam, upon charges that will provide revenue which, in addition to other revenue accruing under the reclamation law and under this act, will in his judgment cover all expenses of operation and maintenance incurred by the United States on account of works constructed under this act and the payments to the United States under subdivision (b) of section 4. Contracts respecting water for irrigation and domestic uses shall be for permanent service. No person shall have or be entitled to have the use for any purpose of the water stored as aforesaid except by contract made as herein stated.

After the repayments to the United States of all money advanced with interest, charges shall be on such basis and the revenues derived therefrom shall be disposed of as may hereafter be prescribed by the Congress.

General and uniform regulations shall be prescribed by the said Secretary for the awarding of contracts for the sale and delivery of electrical energy, and for renewals under subdivision (b) of this section, and in making such contracts the following shall govern:

(a) No contract for electrical energy shall be of longer duration than 50 years from the date at which such energy is ready for delivery.

(b) The holder of any contract for electrical energy, not in default thereunder, shall be entitled to a renewal thereof upon such terms and conditions as may be authorized or required under the then existing laws and regulations, unless the property of such holder dependent for its usefulness on a continuation of the contract be purchased or acquired and such holder be compensated for damages to its property, used and useful in the transmission and distribution of such electrical energy and not taken, resulting from the termination of the supply.

(c) Contracts for the sale and delivery of electrical energy shall be made with responsible applicants therefor who will pay the price fixed by the said Secretary with a view to meeting the revenue requirements of the project as herein provided for. In case of conflicting applications, if any, such conflicts shall be resolved by the said Secretary, after hearing, with due regard to the public interest, and in conformity with the policy expressed in the Federal water power act as to conflicting applications for permits and license: *Provided, however,* That no application of a political subdivision for an allocation of electrical energy shall be denied or another application in conflict therewith be granted on the ground that the bond issue of such political subdivision, necessary to enable the applicant to utilize the electrical energy applied for, has not been authorized or marketed, until after a reasonable time, to be determined by the said Secretary, has been given to such applicant to have such bond issue authorized and marketed.

(d) Any agency receiving a contract for electrical energy equivalent to 100,000 firm horsepower, or more, may, when deemed feasible by the said Secretary, from engineering and economic considerations and under general regulations prescribed by him, be required to permit other similar agency having contracts hereunder for less than the equivalent of 25,000 firm horsepower to participate in the benefits and use of any main transmission line constructed by the former for carrying such energy (not exceeding, however, one-fourth the capacity of such line), upon payment by such other agencies of a reasonable share of the cost of construction, operation, and maintenance thereof.

The use is hereby authorized of such public and reserved lands of the United States as the said Secretary shall determine to be necessary or convenient for the construction, operation, and maintenance of main transmission lines to transmit said electrical energy.

With the following committee amendment:

Page 6, in line 13, strike out the word "and"; and after the word "corporations" insert "and persons."

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. ARENTZ. Mr. Chairman, I offer the following committee amendment, which I send to the desk.

The Clerk read as follows:

Committee amendment offered by Mr. ARENTZ: On page 8, line 7, after the word "license," insert "except that preference to applicants for the use of water and appurtenant works and privileges necessary for the generation and distribution of hydroelectric energy, or for delivery at the switchboard of the hydroelectric plant, shall be given, first, to a State for the generation and purchase of electric energy for use in the State, and the States of Arizona, California, and Nevada shall be given equal opportunity as applicants: *Provided, however.*"

Mr. ARENTZ. Mr. Chairman, this is merely giving a right to the States of Arizona, California, and Nevada that they are entitled to. It is not necessary to explain the amendment, because it is perfectly clear.

Mr. LAGUARDIA. Mr. Chairman, I have an amendment to the amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA to the committee amendment offered by Mr. ARENTZ: After the word "State" in the committee amendment insert "or any legal subdivision thereof."

The CHAIRMAN. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The CHAIRMAN. The question now recurs on the amendment as amended.

The amendment was agreed to.

Mr. HOCH. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. HOCH: Page 9, line 3, insert a new paragraph, as follows:

"(e) Every contract for electrical energy shall provide that the holder of such contract shall guarantee that in any resale of such energy to the consumers thereof the rates shall not exceed what is fair, just, and reasonable, as determined by the Federal Power Commission."

Mr. HOCH. The purpose of the amendment is to provide that the consumers shall not be charged an unfair rate. The bill as it is written provides for no regulation of rates, and the amendment is simply to require that the contractors for this electrical energy shall guarantee in their contracts that in any resale of power to the consumer the electrical energy shall be furnished at a reasonable rate such as may be decided upon by the Federal Power Commission.

Mr. SWING. Is that the same amendment as was mentioned by the gentleman?

Mr. HOCH. It is the same.

Mr. LEATHERWOOD. Mr. Chairman, will the gentleman yield?

Mr. HOCH. Yes.

Mr. LEATHERWOOD. Does it in any way interfere with the rights of the public utilities commissions of the States to take care of this matter?

Mr. HOCH. It provides that in the sale of power the ultimate consumer shall secure the benefit of cheap power.

Mr. LEATHERWOOD. Does my friend from Kansas propose that the Congress shall go into the States and by such legislation regulate the powers of the State utility commissions?

Mr. HOCH. It provides that the power shall be sold for the benefit of the ultimate consumer and not for the benefit of the concerns exploiting it.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Kansas.

The amendment was agreed to.

Mr. TABER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. TABER: Page 6, line 24, after the word "stated," insert "*Provided, however,* That no water shall be sold or furnished for irrigation purposes to any land not now being irrigated, unless Congress by future action shall so provide."

The CHAIRMAN. The gentleman from New York is recognized.

Mr. TABER. Mr. Chairman and members of the committee, the only lobby I have seen on this bill has been the lobby in favor of it. It has been persistent and irritating right straight through from the beginning. [Applause.]

This bill proposes to irrigate 500,000 additional acres of land that is not now being irrigated, and the land is so highly productive that it will very materially work to the injury of agriculture through the competition it will involve.

They talk about bills to improve the agricultural situation, and then they bring in here bills which are designed to hurt the agricultural situation; bills which will make the situation a great deal worse than it is now.

Is it not about time that those Members representing agricultural interests and who have the interests of agriculture at heart shall put a brake on this type of legislation and decide that the Government shall not, by the expenditure of the taxpayer's money, try to make worse and worse the agricultural situation? [Applause.]

The object of my amendment is to put a stop to that. There are other matters in this bill concerning which I have an opinion, but it seems to me that as to this particular amendment, unless we are opposed to the welfare of agriculture, we should adopt this amendment. [Applause.]

Mr. SMITH. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from New York [Mr. TABER]. There is absolutely nothing in this bill providing for the irrigation of additional land. The gentleman from New York is entirely mistaken when he makes that assertion. It is proposed to store water which at some time will be available for the irrigation of additional land, but Congress will have to authorize the appropriations for the construction of works to irrigate those lands. The amendment proposed by the gentleman does not avail anything nor change existing law.

Mr. TABER. Does the gentleman mean to say that this bill does not authorize contracts to be made for the supply of water for irrigation and the control of water for irrigating purposes?

Mr. SMITH. The bill authorizes the construction of an all-American canal to carry water to Imperial Valley lands already under cultivation in place of the canal in Mexico, but it does not authorize any appropriation for putting water on new land.

Mr. DOUGLAS of Arizona. How many acres are under cultivation in the Imperial Valley irrigation district?

Mr. SMITH. About 400,000 acres.

Mr. DOUGLAS of Arizona. I understand it is 390,000 acres.

Mr. SMITH. It is about 400,000 acres, I am advised.

Mr. DOUGLAS of Arizona. How many acres all together are included in the irrigation district?

Mr. SMITH. Probably 600,000 acres.

Mr. DOUGLAS of Arizona. The water is to be delivered to privately owned land, to which distributing systems are already constructed to 200,000 acres of privately owned land, and there are further irrigation projects in contemplation now.

Mr. TABER. If the construction of the gentleman from Idaho concerning the meaning of the bill in that particular is correct, he will support my amendment.

Mr. SMITH. You can not appropriate money for additional irrigation works without express authority from Congress.

Mr. LEATHERWOOD. Then what is the all-American canal in here for—a plaything?

Mr. SMITH. No. It is to provide water for land in the Imperial Valley, now supplied by the canal in Mexico, and for new land which may eventually be brought under irrigation.

Mr. MONTAGUE. But it will open the way for future appropriations, will it not? Further plans can not be carried out without subsequent appropriations?

Mr. SMITH. No.

Mr. WOODRUFF. Mr. Chairman, will the gentleman yield?

Mr. SMITH. Yes.

Mr. WOODRUFF. Is not the all-American canal put through for the purpose of supplying water to farms now existing, and to give those people a means whereby they can get the water without going to Mexico for it?

Mr. SMITH. Exactly so.

Mr. TABER. There is no such provision in the bill.

Mr. DOUGLAS of Arizona. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Arizona is recognized.

Mr. DOUGLAS of Arizona. Mr. Chairman, I do not like to take the time of the House, but I think the House should be told exactly what the facts are.

It is true there is no specific appropriation in the act to bring under irrigation any public land. There are in the Imperial irrigation district 515,000 acres of land privately owned; of that, 390,000 acres are under cultivation. Distributing systems have already been constructed to the entire 515,000 acres. The construction of the all-American canal or the stabilization

of the flow of the Colorado River and the diversion of its flow through either the existing canal from the Colorado River to the Imperial irrigation district or through the all-American canal, will permit the application of water to that additional 125,000 acres of land, so that under the terms of this act there will be brought under cultivation approximately 125,000 acres of land in the United States and at least 600,000 acres of land in Mexico.

Mr. SMITH. But the gentleman will admit that before action can be taken in that regard authority must be obtained from Congress and appropriations made.

Mr. DOUGLAS of Arizona. No; distribution works have already been constructed by the district itself.

Mr. SCHAFER. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. SCHAFER. Irrigation has made Arizona, and since Arizona has been made by irrigation the gentleman does not want to extend any more irrigation projects.

Mr. DOUGLAS of Arizona. That is not true, sir. I am merely stating to the House that there will be additional lands brought under cultivation as the result of this legislation. I will say to the gentleman, with reference to irrigation and any extension of irrigation, that I am opposed to it, because I think the irrigation policy has gone far enough until agricultural conditions warrant the bringing in of additional land. [Applause.]

Mr. SCHAFER. Is the gentleman oposed to the extension of irrigation in Arizona?

Mr. DOUGLAS of Arizona. I am.

Mr. CRAMTON. If the gentleman will permit, he is familiar with the conditions of agriculture in Arizona and Southern California and, I take it, also familiar with the conditions of agriculture in New York and Michigan, and he will admit that the bringing of land under cultivation in Arizona and Southern California means the very minimum of competition with the products of Michigan and New York, because what they produce will be at a time of the year and of a kind that would mean very little of competition with the North and East.

Mr. DOUGLAS of Arizona. To a certain extent it is true that a great many of the crops that are grown in Arizona and Southern California are not competitive with the crops in Michigan and New York, but——

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. SWING. Mr. Chairman, I move that all debate on this section, and all amendments thereto, do now close.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The question was taken; and on a division (demanded by Mr. TABER) there were—ayes 26, noes 44.

So the amendment was rejected.

Mr. ARENTZ. Mr. Chairman, I offer a committee amendment.

The CHAIRMAN. The gentleman from Nevada offers a committee amendment, which the Clerk will report.

The Clerk read as follows:

Committee amendment offered by Mr. ARENTZ: On page 8, in line 8, after the word "a," insert "State or a."

The committee amendment was agreed to.

The Clerk read as follows:

SEC. 6. That the dam and reservoir provided for by section 1 hereof shall be used: First, for river regulation and flood control; second, for irrigation and domestic uses and satisfaction of present perfected rights in pursuance of Article VIII of said Colorado River compact; and third, for power. The title to said dam, reservoir, plant, and incidental works shall forever remain in the United States, and the United States shall always control, manage, and operate the same: *Provided, however,* That the Secretary of the Interior may, in his discretion, enter into contracts of lease of a unit or units of said plant, with right to generate electrical energy, or, alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy, within a State which has approved said Colorado River compact, in either of which events the provisions of section 5 of this act relating to revenue, term, renewals, determination of conflicting applications, and joint use of transmission lines under contracts for the sale of electrical energy, shall apply.

The Secretary of the Interior shall prescribe and enforce rules and regulations conforming with the requirements of the Federal water power act, so far as applicable, respecting maintenance of works in condition of repair adequate for their efficient operation, maintenance of a system of accounting, control of rates and service in the absence of State regulation or interstate agreement, valuation for rate-making purposes, transfers of contracts, contracts extending beyond the lease period, expropriation of excessive profits, emergency use by the United States of property of lessees, and penalties for enforcing regulations made under this act or penalizing failures to comply with such regulations or with the provisions of this act.

With the following committee amendments:

On page 9, line 10, after the word "regulation," insert "improvement of navigation."

Page 9, line 16, strike out the word "always" and insert in lieu thereof the words "until otherwise provided by Congress."

Page 10, line 6, after the word "act," strike out the words "so far as applicable" and insert in lieu thereof the words "together with the rules and regulations of the Federal Power Commission thereunder."

Page 10, line 18, after the word "act," insert "He shall also conform with other provisions of the Federal water power act and of the rules and regulations of the Federal Power Commission which have been devised or which may be hereafter devised for the protection of the investor and consumer.

The committee amendments were agreed to.

Mr. LEATHERWOOD. Mr. Chairman, I move to strike out the last word.

Mr. SMITH. Mr. Chairman, I move that the committee do now rise.

Mr. DAVENPORT. Mr. Chairman, I have several amendments which I desire to offer to this section of the bill.

Mr. LEATHERWOOD. Mr. Chairman, I am informed by the gentlemen in charge of the bill that they want to move that the committee rise. Without losing my right to speak on this paragraph when we go into the committee again, I yield.

The CHAIRMAN. The gentleman is entitled to recognition when the committee again considers this bill.

Mr. DAVENPORT. Mr. Chairman, I ask unanimous consent that the amendments I desire to offer be printed in the RECORD for the information of the Members of the House.

The CHAIRMAN. The gentleman from New York asks unanimous consent that the amendments which he desires to offer be printed in the RECORD for the information of the House. Without objection, it is so ordered.

There was no objection.

The amendments referred to are as follows:

Mr. DAVENPORT offers the following amendment (to H. R. 5773): Page 9, section 6, line 21, strike out the words "or alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy."

Mr. DAVENPORT offers the following amendment (to H. R. 5773): Page 9, section 6, line 24, after the word "compact," insert the words "on condition that if two or more such contracts be entered into, provision shall be made for operation of the plant under a joint agreement upon terms approved by the Secretary of the Interior for the purpose of providing for the most economical utilization of the available energy."

Mr. DAVENPORT offers the following amendment (to H. R. 5773): Page 9, section 6, line 23, strike out the words "in either of which events" and insert in lieu thereof the following: "in case of the execution of such contracts."

Mr. DAVENPORT offers the following amendment (to H. R. 5773): Page 10, section 6, line 3, after the words "shall apply," insert new paragraphs as follows:

"As a condition to the lease of the said plant or any unit or units thereof, and as a condition to the sale of electrical energy therefrom, every lessee and every purchaser, if the United States operates the plant, shall agree that the property of such lessee or purchaser, used and useful in connection therewith, shall be valued, whether by the agencies of the States or of the United States, and whether for regulation of rates or for taxation or for State or municipal acquisition and use, at its fair value, not to exceed the net investment of the said lessee or purchaser, and said net investment shall be ascertained in accordance with the provisions of the Federal water power act and the regulations of the Federal Power Commission.

"Every lease and every contract for the sale of power shall provide that the resale price thereof, with the transformation, transmission, and distribution of such energy, extending to sale to the ultimate consumer, shall be subject to the regulation and control of said Federal Power Commission or of the appropriate authorities of any State or States in which such power is transmitted, distributed, sold, or used, according to the respective jurisdictions of the said Federal Power Commission or said State authority, as provided in sections 19 and/or 20 of the Federal water power act."

Mr. SMITH. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LEHLBACH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 5773) to provide for the construction of works for the

protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, and had come to no resolution thereon.

SENATE BILLS AND JOINT RESOLUTION REFERRED

Bills of the following titles were taken from the Speaker's table and, under the rule, referred to the appropriate committees, as follows:

S. 1965. An act to authorize the appointment of a district judge for the northern district of Mississippi; to the Committee on the Judiciary.

S. 2372. An act to amend section 201, subdivision (1), of the World War veterans' act, 1924, as amended; to the Committee on World War Veterans' Legislation.

S. 2751. An act to amend section 213, act of March 4, 1909 (Criminal Code, title 18, sec. 336, U. S. C.), affixing penalties for use of mails in connection with fraudulent devices and lottery paraphernalia; to the Committee on the Judiciary.

S. 4148. An act authorizing and directing the Secretary of War to grant certain land to the city of St. Paul, State of Minnesota; to the Committee on Military Affairs.

S. 4465. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across White River at or near Clarendon, Ark., to the Committee on Interstate and Foreign Commerce.

S. 4503. An act authorizing the Secretary of War to convey the Fort Griswald tract to the State of Connecticut; to the Committee on Military Affairs.

S. J. Res. 142. Joint resolution authorizing the erection of a Federal reserve-bank building in the city of Los Angeles, Calif.; to the Committee on Banking and Currency.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, announced that they had examined and found truly enrolled bills and joint resolutions of the following titles, when the Speaker signed the same:

H. R. 1406. An act granting six months' pay to Lucy B. Knox;

H. R. 1616. An act for the relief of Carl C. Back;

H. R. 1931. An act for the relief of Daniel Mangan;

H. R. 1951. An act granting six months' pay to Frank A. Grab;

H. R. 2272. An act for the relief of William Morin;

H. R. 2472. An act for the relief of Emile Genireux;

H. R. 2477. An act for the relief of Joseph S. Carroll;

H. R. 2494. An act granting six months' pay to Vincentia V. Irwin;

H. R. 2657. An act for the relief of Thomas Huggins;

H. R. 3971. An act for the relief of the owners of the schooner *William Melbourne;*

H. R. 4652. An act for the relief of Charlie R. Pate;

H. R. 4926. An act for the relief of the Pocahontas Fuel Co. (Inc.);

H. R. 4954. An act for the relief of Thomas Purdell;

H. R. 5897. An act for the relief of Mary McCormick;

H. R. 5910. An act for the relief of Ralph Ole Wright and Varina Belle Wright;

H. R. 6049. An act to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective departments;

H. R. 6908. An act for the relief of Michael Ilitz;

H. R. 7268. An act for the relief of John Hervey;

H. R. 7708. An act for the relief of John M. Brown;

H. R. 8742. An act to authorize the Secretary of War to convey to the city of Baton Rouge, La., a portion of the Baton Rouge National Cemetery for use as a public Street;

H. R. 9380. An act for the relief of Frank E. Shults;

H. R. 10649. An act providing for the transfer of a portion of the military reservation known as Camp Sherman, Ohio, to the Department of Justice;

H. R. 10702. An act for the relief of Elbert L. Cox;

H. R. 11471. An act extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas;

H. R. 11917. An act granting the consent of Congress to the county of Cook, State of Illinois, to widen, maintain, and operate the existing bridge across the Little Calumet River in Cook County, State of Illinois;

H. R. 11950. An act to legalize a pier and wharf in Deer Island thoroughfare on the northerly side at the southeast end of Buckmaster Neck at the town of Stonington, Me.;

H. R. 11978. An act granting six months' pay to Alexander Gingras, father of Louis W. Gingras, deceased private, United States Marine Corps, in active service;

H. R. 11980. An act granting the consent of Congress to the Fisher Lumber Corporation to construct, maintain, and operate a railroad bridge across the Tensas River in Louisiana;

H. R. 12031. An act to extend the times for commencing and completing the construction of a bridge across the Rio Grande River at or near a point 2 miles south of the town of Tornillo, Tex.;

H. R. 12038. An act to authorize the acquisition of certain patented land adjoining the Yosemite National Park boundary by exchange, and for other purposes;

H. R. 12063. An act for the relief of the widow of Surg. Mervin W. Glover, United States Public Health Service, deceased;

H. R. 12100. An act to amend the act entitled "An act granting the consent of Congress to the Gateway Bridge Co. for construction of a bridge across the Rio Grande between Brownsville, Tex., and Matamoros, Mexico," approved February 26, 1926;

H. R. 12235. An act authorizing B. F. Peek, G. A. Shallberg, and C. I. Josephson, of Moline, Ill.; J. W. Bettendorf, A. J. Russell, and J. L. Hecht, of Bettendorf and Davenport, Iowa, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Tenth Street in Bettendorf, State of Iowa;

H. R. 12571. An act granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a toll bridge across the Cumberland River at or near Iuka, Ky.;

H. R. 12623. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Sabine River at or near Starks, La.;

H. R. 12624. An act to amend section 17 of the act of June 10, 1922, entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended;

H. R. 12694. An act authorizing the Secretary of the Navy to provide an escort for the bodies of deceased officers, enlisted men, and nurses;

H. R. 12706. An act for the relief of the town of Springdale, Utah;

H. R. 12806. An act authorizing J. H. Harvel, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across New River at or near McCreery, Raleigh County, W. Va.;

H. R. 12894. An act granting the consent of Congress to the board of county commissioners of Trumbull County, Ohio, to construct a free overhead viaduct across the Mahoning River at Niles, Trumbull County, Ohio;

H. R. 12913. An act to extend the times for commencing and completing the construction of a bridge across the Allegheny River at or near the Borough of Eldred, McKean County, Pa.;

H. R. 12953. An act to authorize the Board of Managers of the National Home for Disabled Volunteer Soldiers to accept title to the State camp for veterans at Bath, N. Y.;

H. R. 13069. An act granting the consent of Congress to the State of Minnesota, to construct, maintain, and operate a free highway bridge across the Mississippi River at or near Aitkin, Minn.;

H. R. 13141. An act authorizing T. S. Hassell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Clifton, Wayne County, Tenn.;

H. R. 13143. An act to adjust the compensation of certain employees in the Customs Service;

H. R. 13380. An act authorizing D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Helena, Ark.;

H. R. 13481. An act granting the consent of Congress to the Alabama State Bridge Corporation to construct, maintain, and operate bridges across the Tennessee, Tombigbee, Warrior, Alabama, and Coosa Rivers, within the State of Alabama;

H. J. Res. 47. An act for the relief of Mary M. Tilghman, former widow of Sergt. Frederick Coleman, deceased, United States Marine Corps;

H. J. Res. 77. An act concerning lands and property devised to the Government of the United States of America by Wesley Jordan, deceased, late of the township of Richland, county of Fairfield and State of Ohio; and

H. J. Res. 292. An act authorizing the President to invite the States of the Union and foreign countries to participate in the International Petroleum Exposition at Tulsa, Okla., to begin October 20, 1928.

The Speaker announced his signature to an enrolled bill of the Senate of the following title:

S. 3752. An act to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval bills of the following titles:

H. R. 2808. An act for the relief of Ella G. Richter, daughter of Henry W. Richter;

H. R. 5475. An act authorizing the New Cumberland Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River, at or near New Cumberland, W. Va.;

H. R. 5898. An act to authorize certain officers of the United States Army, Navy, and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered;

H. R. 6569. An act for the relief of Frank Hartman.

H. R. 8926. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across Red River at or near Garland City, Ark.;

H. R. 10014. An act for the relief of A. F. Gallagher;

H. R. 12479. An act authorizing the sale of all of the interest and rights of the United States of America in the Columbia Arsenal property, situated in the ninth civil district of Maury County, Tenn., and providing that the net fund be deposited in the military post construction fund;

H. R. 12676. An act to amend section 2 of the act approved February 14, 1926, granting the consent of Congress for the construction of a bridge across Red River at or near Fulton, Ark.;

H. R. 12677. An act to amend section 2 of an act approved March 12, 1928, granting the consent of Congress for the construction of a bridge across the Ouachita River at or near Calion, Ark.; and

H. R. 13342. An act to authorize a per capita payment to the Pine Ridge Sioux Indians of South Dakota.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

A message from the President of the United States was presented to the House of Representatives by Mr. Latta, one of his secretaries, who also announced that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On May 18, 1928:

H. R. 15. An act authorizing an appropriation to enable the Secretary of the Interior to carry out the provisions of the act of May 26, 1926 (44 Stat. L. 655), to make additions to the Absaroka and Gallatin National Forests, and to improve and extend the winter-feed facilities of the elk, antelope, and other game animals of Yellowstone National Park and adjacent land;

On May 21, 1928:

H. R. 4660. An act to correct the military record of Charles E. Lowe;

H. R. 4687. An act to correct the military record of Albert Campbell;

H. R. 5644. An act to enable an enlisted man in the naval service to make good time lost in excess of one day under certain conditions;

H. R. 5695. An act authorizing the Secretary of the Interior to equitably adjust disputes and claims of settlers and others against the United States and between each other arising from incomplete or faulty surveys in township 19 south, range 26 east, Tallahassee meridian, Lake County, in the State of Florida;

H. R. 5826. An act authorizing the Secretary of the Navy, in his discretion, to deliver to the custody of the Louisiana State Museum, of the city of New Orleans, La., the silver bell in use on the cruiser *New Orleans;*

H. R. 6152. An act for the relief of Cromwell L. Barsley;

H. R. 7142. An act for the relief of Frank E. Ridgely, deceased;

H. R. 7946. An act to repeal an act entitled "An act to extend the provisions of the homestead laws to certain lands in the Yellowstone forest reserve," approved March 15, 1906;

H. R. 8001. An act conferring jurisdiction upon certain courts of the United States to hear and determine the claim by the owner of the steamship *City of Beaumont* against the United States, and for other purposes;

H. R. 8110. An act withdrawing from entry the northwest quarter section 12, township 30 north, range 19 east, Montana meridian;

H. R. 8126. An act to repeal the sixty-first proviso of section 6 and the last proviso of section 7 of "An act to establish the Mount McKinley National Park, in the Territory of Alaska," approved February 26, 1917;

H. R. 9046. An act to continue the allowance of Sioux benefits;

H. R. 9112. An act for the relief of William Roderick Dorsey and other officers of the Foreign Service of the United States, who, while serving abroad, suffered by theft, robbery, fire, embezzlement, or bank failures losses of official funds;

H. R. 9355. An act to provide for the acquisition of certain property in the District of Columbia for the Library of Congress, and for other purposes;

H. R. 9411. An act for the relief of Maurice P. Dunlap;

H. R. 9568. An act to authorize the purchase at private sale of a tract of land in Louisiana, and for other purposes;

H. R. 11133. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1929, and for other purposes;

H. R. 11405. An act to acquire an area of State land situate in Lassen Volcanic National Park, State of California, by exchange;

H. R. 12067. An act to set aside certain lands for the Chippewa Indians in the State of Minnesota;

H. R. 12192. An act authorizing the Secretary of the Interior to accept a deed to certain land and issue patent therefor to the city of Buhl, Twin Falls County, Idaho;

H. R. 12286. An act making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1929, and for other purposes; and

H. J. Res. 263. Joint resolution authorizing the president and fellows of Harvard College to erect on public grounds in the District of Columbia a monument to Maj. Gen. Artemas Ward.

On May 22, 1928:

H. R. 457. An act to create a board of local inspectors, Steamboat Inspection Service, at Hoquiam, Wash.;

H. R. 2473. An act for the relief of Louie June;

H. R. 3470. An act granting relief to Havert S. Sealy and Porteus R. Burke;

H. R. 4012. An act for the relief of Charles R. Sies;

H. R. 4839. An act for the relief of the Press Publishing Co., Marianna, Ark.;

H. R. 5322. An act for the relief of John P. Stafford;

H. R. 5548. An act to authorize payment of six months' death gratuity to dependent relatives of officers, enlisted men, or nurses whose death results from wounds or disease not resulting from their own misconduct;

H. R. 5930. An act for the relief of Jesse W. Boisseau;

H. R. 6195. An act granting six months' pay to Constance D. Lathrop;

H. R. 6842. An act for the relief of Joseph F. Friend;

H. R. 6854. An act to add certain lands to the Montezuma National Forest, Colo., and for other purposes;

H. R. 7897. An act to ratify the action of a local board of sales control in respect of contracts between the United States and the West Point Wholesale Grocery Co., of West Point, Ga.;

H. R. 7898. An act to ratify the action of a local board of sales control in respect of contracts between the United States and the Lagrange Grocery Co., of Lagrange, Ga.;

H. R. 8440. An act for the relief of F. C. Wallace;

H. R. 9495. An act to provide for the further development of agricultural extension work between the agricultural colleges in the several States receiving the benefits of the act entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture;

H. R. 10503. An act for the relief of R. P. Washam, F. A. Slate, W. H. Sanders, W. A. McGinnis, J. E. Lindsay, and J. T. Pearson;

H. R. 11621. An act to authorize the Secretary of the Navy to advance public funds to naval personnel under certain conditions;

H. R. 11724. An act to provide for the paving of the Government road, known as the Ringgold Road, extending from Chickamauga and Chattanooga National Military Park, in the State of Georgia, to the town of Ringgold, Ga., constituting an approach road to the Chickamauga and Chattanooga National Military Park; and

H. R. 12446. An act to approve a deed of conveyance of certain land in the Seneca Oil Spring Reservation, N. Y.

On May 23, 1928:

H. R. 5718. An act to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service";

H. R. 6104. An act to amend sections 57 and 61 of the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909.

H. R. 7895. An act for the relief of the Lagrange Grocery Co.;

H. R. 7903. An act to authorize the erection at Clinton, Sampson County, N. C., of a monument in commemoration of William Rufus King, former Vice President of the United States;

H. R. 8314. An act to amend an act of Congress approved March 4, 1927 (Public, No. 795, 69th Cong.), to provide for appointment as warrant officers of the Regular Army of such persons as would have been eligible therefor but for the interruption of their status, caused by military service rendered by them as commissioned officers during the World War;

H. R. 8546. An act authorizing an appropriation of $2,500 for the erection of a tablet or marker at Lititz, Pa., to commemorate the burial place of 110 American soldiers who were wounded in the Battle of Brandywine and died in the military hospital at Lititz;

H. R. 9965. An act to erect a tablet or marker to mark the site of the Battle of Kettle Creek, in Wilkes County, Ga., where, on February 14, 1779, Elijah Clarke, of Georgia, and Colonel Pickens, of South Carolina, overtook the Tories under Colonel Boyd, killing him and many of his followers, thus ending British dominion in Georgia;

H. R. 10159. An act granting pensions and increase of pensions to widows and former widows of certain soldiers, sailors, and marines of the Civil War, and for other purposes;

H. R. 10363. An act to provide for the construction or purchase of two L boats for the War Department;

H. R. 10364. An act to provide for the construction or purchase of two motor mine yawls for the War Department;

H. R. 10365. An act to provide for the construction or purchase of one heavy seagoing Air Corps retriever for the War Department;

H. R. 11479. An act to reserve certain lands on the public domain in Valencia County, N. Mex., for the use and benefit of the Acoma Pueblo Indians; and

H. R. 12821. An act to authorize an appropriation to provide additional hospital, domiciliary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes.

On May 24, 1928:

H. J. Res. 39. Joint Resolution authorizing the Secretary of War to receive, for instruction at the United States Military Academy at West Point, two Chinese subjects, to be designated hereafter by the Government of China;

H. J. Res. 40. Joint Resolution authorizing the Secretary of War to receive, for instruction at the United States Military Academy at West Point, two Siamese subjects, to be designated hereafter by the Government of Siam;

H. R. 971. An act for the relief of James K. P. Welch;

H. R. 9620. An act for the relief of E. H. Jennings, F. L. Johanns, and Henry Blank, officers and employees of the post office at Charleston, S. C.

H. R. 11338. An act authorizing the Kansas City Southern Railway Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River near Randolph, Mo.;

H. R. 11990. An act to authorize the leasing of public lands for use as public aviation fields; and

H. R. 13511. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

PERMISSION TO ADDRESS THE HOUSE

Mr. WHITE of Colorado. Mr. Speaker, I ask unanimous consent that I may be permitted to address the House for 15 minutes to-morrow morning after the reading of the Journal and the disposition of matters on the Speaker's desk.

Mr. SWING. At what time?

The SPEAKER. The gentleman from Colorado asks unanimous consent that to-morrow morning after the reading of the Journal and the disposition of matters on the Speaker's table, he may be permitted to address the House for 15 minutes. Is there objection?

Mr. SWING. May I ask the gentleman to defer his request until the conclusion of the consideration of the Boulder Dam bill?

Mr. RANKIN. Perhaps that is what the gentleman wants to speak on.

Mr. WHITE of Colorado. No.

Mr. SWING. Reserving the right to object, I will ask the gentleman if he will not delay it until a little later.

Mr. WHITE of Colorado. Why, of course I will, if that is the wish of the gentleman.

The SPEAKER. The gentleman withdraws his request.

DISABLED EMERGENCY OFFICERS' BILL

Mr. WOODRUFF. Mr. Speaker, I wish to announce that this afternoon during consideration of the presidential veto of the Tyson-Fitzgerald bill, I was unavoidably absent from the House. I wish to say that if I had been here I would have voted to sustain the President. [Applause.]

Mr. RAMSEYER. Mr. Speaker, I ask unanimous consent to proceed for two minutes.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. RAMSEYER. Mr. Speaker, this afternoon from 1 o'clock until 3 o'clock, I was in conference on the postal rates bill in the Post Office Committee room of the Senate at the other end of the Capitol. When I left here at 1 o'clock, after talking with the leaders of the House, I had no reason to suppose that anything would be considered in the House during the afternoon except the Boulder Dam bill. While we were in session there considering the postal rates bill, the House suddenly decided, and without previous notice, to consider the President's veto on the Tyson-Fitzgerald bill and, as the Constitution provides, there was a roll call to override the President's veto. I had previously expressed my views in the Rules Committee and to my colleagues and to some of my constituents in opposition to this bill.

The day the bill was up for consideration in the House I received a telegram from the adjutant of the American Legion of Iowa urging me to support this bill, and on the next day, May 12, I wrote him a letter as follows:

> Your wire to hand urging support of the Tyson-Fitzgerald bill. So far as compensation or pension is concerned, the bill, in my judgment, is contrary to the well-established national policy of preserving equality among officers and enlisted men who were called to the colors to serve during a war emergency. Therefore, I did not support this bill. I am always glad to have your views on any pending legislation.
>
> With best wishes,

And so forth, signed by myself.

That letter still expresses my attitude on this bill.

While the House conferees, including myself, were in conference on the postal rates bill with three Senate conferees, we received no notice that this bill was up for consideration, and the first information I had that this matter had been considered was after I returned to this end of the Capitol after the conference had adjourned, when the roll call was over and the House was again in Committee of the Whole considering the Boulder Dam bill.

On an issue of this importance I think I owe it to my constituents and to my colleagues in this House to state that if I had been present I would have voted against overriding the President's veto; in other words, I would have voted "nay" on the question. [Applause.]

PERMISSION TO ADDRESS THE HOUSE

Mr. WHITE of Colorado. Mr. Speaker, I have talked with the gentleman from California [Mr. SWING] and I now desire to renew my request to address the House for 15 minutes to-morrow morning.

The SPEAKER. The gentleman from Colorado renews his request that he be permitted to address the House for 15 minutes to-morrow morning after the reading of the Journal and the disposition of matters on the Speaker's table. Is there objection?

Mr. LEATHERWOOD. Reserving the right to object, on what subject?

The SPEAKER. Objection is heard.

FEDERAL PROBATION OFFICERS

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent to extend my remarks on the probation bill which was first reported favorably by the Committee on the Judiciary and then withdrawn, and to include certain letters from the Civil Service Commission and other communications I have received on the subject.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LAGUARDIA. Mr. Speaker, under leave granted, I desire to file a statement concerning the parliamentary history and the purpose of H. R. 11801, a bill to amend the United States Code with reference to Federal probation officers. The purpose of this bill is to extend the probationary system in the Federal courts, to provide professional probation officers—that is, salaried probation officers—and also to create a probation bureau, or rather a probation director in the office of the attorney general. The bill was introduced on March 6, 1928, and referred to the Committee on the Judiciary of the House. It was then referred to a Subcommittee of the Judiciary Committee and hearings held on April 13, 1928. These hearings have been printed and are available in the House Committee on the Judiciary (serial 24). The subcommittee reported the bill to the full committee and the full committee agreed on a favorable report to the House recommending the passage of the bill with certain amendments. The amendments suggested by the committee prompt me at this time to make this statement and present all of the facts. The committee recommended the elimination of the civil-service requirement provided in the existing law as well as in this particular bill. I thereupon served notice on the committee that I was opposed to the committee's amendment and would file a minority report. In fact, I prepared a minority report and presented it to the committee for filing with the committee's report. The committee later rescinded its previous action and held the bill in committee for further action at the next session.

The action of the committee in withdrawing favorable report recommending elimination of the civil-serviee requirements, of course, is far better than the original action of the committee recommending the bill with that change. It seems strange to me, and I say so frankly, that this meritorious measure should be held in committee rather than being reported favorably in its original form.

The committee amended the bill by striking out the competitive and civil-service requirements under which probation officers shall be appointed. The action of the committee would change the civil-service policy of the Government not only of the present but of past administrations for over 30 years. No one dares publicly proclaim the desire of returning to the spoils system, yet the constant attempts to exempt grades and classes of employees from civil-service requirements indicates a tendency on the part of some to destroy and abolish entirely the civil-service system.

Probation work is by no means in the experimental stage. A reading of the hearings on this bill will show the progress and success of probation in many of the States. The probation system was applied to the Federal courts only a few years ago. The original law then provided that "probation officers who are to receive salaries shall be appointed after competitive examination held in accordance with the laws and regulations of the civil service of the United States (March 4, 1925)." An elimination striking out the civil-service provisions from this bill destroys the protective features of civil service and takes these highly technical and professional appointees away from the requirements of proper tests and standards of qualification and throws them into the pot of political patronage.

The United States Civil Service Commission has heretofore held examinations and established the standard and qualifications of Federal probation officers. There is now in existence a list of duly qualified and eligible candidates for appointment. The United States Civil Service Commission approved of the bill as originally introduced. It had no notice that the committee intended eliminating the civil-service requirements of the existing law. The United States Civil Service Commission had no opportunity to appear before the committee in opposition to the proposed committee amendment. The first knowledge the Civil Service Commission had was when the committee's action was called to their attention. The following letter from the commission speaks for itself:

UNITED STATES CIVIL SERVICE COMMISSION,
Washington, D. C., May 19, 1928.

Hon. FIORELLO H. LAGUARDIA,
House of Representatives.

MY DEAR MR. LAGUARDIA: The act of March 4, 1925, establishing a probation system in the United States court, except in the District of Columbia, provides that—

"Probation officers who are to receive salaries shall be appointed after competitive examination held in accordance with the laws and regulations of the civil service of the United States."

It is understood that there is now before the Judiciary Committee of the House a proposal to amend the law respecting probation by removing therefrom the provision quoted above.

Probation presents a serious responsibility and calls for a high degree of intelligence if it is to be made to function properly and usefully. While it is true that the probation system as such is no longer an experiment as applied to the Federal service, it is in the formative stage and for proper development needs to be placed in the hands and under the supervision and direction of persons whose training will insure intelligent and efficient service. To make the system a useful instrument in the administration of criminal justice in the Federal courts, definite qualifications as to ability and training, as well as character, must be required of those who seek to become probation officers.

The experience of this commission, extending over a period of nearly a half century, has demonstrated fully that the merit system of appointments, based upon open competitive examinations, affords a far more satisfactory method of appointment and insures a better and more efficient class of employees than where no system of personnel control is employed and appointments are subject to personal and political influence.

Aside from the objections raised by those who desire to effect the appointments of individuals because of personal or political reasons, the main opposition to the application of the civil-service examinations to the employment of probation officers is based on the requirement of personal qualifications which, it is said, can not be tested adequately by examination. Such belief is unfounded and contrary to facts.

The problem of testing personal characteristics was solved some time ago by the commission, and there has been incorporated in the examination for probation officers, and made an essential part thereof, an oral test which has for its purpose the determination of the applicant's personal characteristics and address, adaptability, keenness and quickness of understanding, observation, judgment, and discretion; in general, his personal fitness for the performance of the duties of the position.

No claim has been made that the persons certified by the commission lack the necessary qualifications to perform properly the duties of probation officers. One Federal judge has referred to a probation officer who was appointed from the commission's examination as "the bright jewel in our court." Such praise reflects truly the efficacy of the system which made his appointment possible. Other eligibles appointed through the commission's examinations were men of experience and doubtless their knowledge of the technique of the work will aid materially in making the Federal probation system an effective means for dealing with criminals, especially first offenders.

No substitute has been found for the examination system of testing applicants for appointment as probation officers, as evidenced by requirement of examination in States in which probation is used extensively, such as New York, New Jersey, Ohio, Wisconsin, and California. The practical application of the merit system in appointments of probation officers has been demonstrated in these States, and there appears to be no reason why the system should not be applied with equal success to the Federal service.

In this connection it may be stated that two examinations for probation officer have been held, the commission's register containing the following number of eligibles:

Arkansas	2
California	2
Connecticut	1
District of Columbia	1
Florida	1
Illinois	12
Indiana	2
Iowa	1
Massachusetts	1
Michigan	5
Minnesota	4
Mississippi	1
Missouri	6
New York	13
New Jersey	3
Ohio	2
Oregon	1
Pennsylvania	14
South Dakota	1
Tennessee	1
Virginia	2
Washington	3
Wisconsin	3
Georgia	4
Kentucy	4

Attention is invited to the copy of letter from the Hon. Herbert C. Parsons, commissioner of probation of the State of Massachusetts, in which the opinion is expressed that probation officers might well be appointed under civil-service rules, provided the examinations are broad enough to take into account those personal qualifications which are peculiarly essential in such officer. As noted above, the commission's examination meets these requirements.

The commission regards it as vital to the success of the probation system that there shall be adequate tests of fitness for probation officers, embracing personal characteristics.

By direction of the commission:

Very respectfully,

JOHN T. DOYLE, *Secretary.*

The National Probation Association, an organization made up of nationally known men and women throughout the United

States who took up the study of probation work years ago, developed it to its present use in many of the States of the Union. This association has made a study of probationary work and from a sentimental idea has perfected it to a sociological science.

The National Probation Association approved of this bill in its original form. Like the Civil Service Commission, it had no idea that this model measure would be changed in committee. The National Probation Association says:

NATIONAL PROBATION ASSOCIATION (INC.),
New York City, May 18, 1928.

Re: H. R. 11801, concerning probatiton.
Hon. FIORELLO LAGUARDIA,
Member of Congress, Washington, D. C.

DEAR CONGRESSMAN: The United States Civil Service Commission advises me that you would like to have certain information regarding the use of civil-service examinations for probation officers in various States and the results of the same.

The following States have placed probation officers under the classified civil service: New York, New Jersey, Ohio, California, and Wisconsin (Milwaukee County). The National Probation Association has approved putting probation officers under civil service because, as we have observed it, this has resulted in improving the personnel of the service in removing these important positions from political control to a considerable extent, in enforcing higher standards of education and training, and in securing better people all around for the work.

The New York State Probation Commission, years ago, led the fight to classify probation officers throughout New York State under the civil service. It has certainly worked well in New York State and now there are very few judges or others who have the interests of the service at heart who would go back to the old method of giving judges a free hand in selecting probation officers. It was argued that probation officers were peculiarly personal and confidential appointees of judges and therefore the judges should not be hampered in selecting them. It is now seen that this conception of the probation officer was entirely erroneous. The probation officer is an official of the court who has his own distinct work, that of making social investigations and supervising persons on probation.

In this work he should not be hampered by personal or political considerations. He should be required to come up to certain standards of education and training. We have found that many judges, especially when the service is just being established, as is the case in the Federal courts, do not fully appreciate the type of training and experience probation officers should have. Therefore they make bad selections. We believe that placing these positions under civil service has been of great benefit both in the States where it has been adopted and in the Federal service.

Six paid probation officers have been appointed in as many districts, all qualifying as a result of the civil-service examination. These officers are of good quality, and I believe that the judges in each district are well satisfied with the officers secured. The two examinations which have been held have been very practical and have resulted in securing good candidates. There is opposition on the part of certain judges to the civil service, which is due in part to the fact that they would like to make personal appointments and take into consideration political indorsements, which would result in very poor appointments being made. We believe that the civil service has been very beneficial in maintaining the quality of appointments so far, and we believe that it will be increasingly so in the future when larger appropriations are secured for appointing probation officers in the United States district courts. We therefore believe that the provision in the present probation law placing the probation officers under civil service should be maintained.

The bill as introduced contains important provisions for strengthening the probation law which are badly needed at the present time. The most important provision is that authorizing the appointment of a probation director to supervise the extension of the work in the Department of Justice. We hope very much that the bill will have your support and that you will assist in having the bill reported from the Judiciary Committee immediately with the civil-service provision reinstated.

Very sincerely yours,

CHARLES L. CHUTE,
General Secretary.

Probation work has been a success in the State of New York. In New York City official and salaried probation officers are assigned to the magistrates' courts, city courts, court of special sessions, and the court of general sessions. The probation work of the court of general sessions is under the direction of Prof. Edwin J. Cooley, who holds a chair at Fordham University. He is a recognized authority on the probation system, and his views of the necessity of the civil-service requirements in this work are authoritative:

COURT OF GENERAL SESSIONS,
PROBATION DEPARTMENT, COUNTY OF NEW YORK,
32 Franklin Street, New York, May 16, 1928.

DEAR CONGRESSMAN LAGUARDIA: The success or failure of the probation system depends fundamentally upon the wise and careful selection of probation officers. It is now generally recognized that the duties of probation officers can only be intrusted to persons qualified for the work by reason of their character, temperament, special training, ability, and interest.

Probation officers ought to be selected without regard to politics. Their appointment should be based solely upon their particular fitness for their work. The process of selecting probation officers is, therefore, a matter of primary importance.

In the State of New York practical experience for approximately two decades has proven that individuals with the qualities essential in probation officers can be selected through the right kind of civil-service examinations.

In New York State civil-service examinations for probation officers include a written examination on powers and duties, a consideration of educational qualifications, experience, character, and personal fitness.

As all civil-service examinations must be practical in their character and relate to such matters as will fairly test the relative capacity and fitness of the person examined to discharge the duties of the position sought, the written examination given the candidates for probation officer is made up of practical questions regarding the laws relating to probation work, the duties and functions of probation officers, and the questions pertaining to the technique of probation work.

In the oral interview, which is part of every examination, the training, personality, experience, and education of the candidate are evaluated.

Civil-service examinations can insure that the probation officers shall be well-trained social workers of good personality. The fact that entirely disqualified persons have served as probation officers in jurisdictions which do not have civil-service examinations is the chief cause when probation fails to reduce delinquency.

I am sending you herewith a copy of the civil-service announcements for the examination of probation officer of the court of general sessions, to be held in July.

With assurances of my desire to cooperate with you in every way possible, and my cordial good wishes always, I am

Yours faithfully,

EDWIN J. COOLEY,
Chief Probation Officer, Court of General Sessions.

Probation officer, court of general sessions, New York County: Rule I of the court of general sessions provides that probationers be assigned to the probation custody of a probation officer of the same sex, and whenever practicable of the same religious faith, as the probationer. The eligible list established as the result of the examination held December 4, 1926, having been exhausted for male certification, this examination is being held to supply the need of men to handle the cases of male offenders which at present constitute over 90 per cent of the offenders before the court of general sessions. Several immediate appointments expected at $3,000. Minimum age, 21 years. The duties include performing all of the probation work of the court and, when called upon to do so, performing the probation work of the criminal part of the supreme court of the first judicial district of New York County. Candidates must have had a high-school education or equivalent education and must have had in addition one of the following: (a) Either one year of acceptable experience (whole-time basis) in social-case work with a social agency of good standing, or (b) have had a college education, or (c) must have had at least one year of satisfactory training in a recognized school of social service or in lieu thereof acceptable courses of study, reading, or training in the social sciences. Candidates will be required to submit evidence or they may be required to show evidence through special examination. Subjects of examination: Written examination including questions on the work of probation officers, duties of the position, and methods of work—relative weight, 5; training, experience, and general qualifications—relative weight, 5. An interview may be required.

It is but natural that the National Civil Service Reform League, which is constantly fighting attempts to return to the spoils system, does not desire to see the Federal courts made a dumping ground for political hacks, protests against the committee's amendment in no uncertain terms:

NATIONAL CIVIL SERVICE REFORM LEAGUE,
New York, May 18, 1928.

Hon. FIORELLO H. LAGUARDIA,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN LAGUARDIA: It has come to my attention that the Judiciary Committee of the House has agreed to strike out of H. R. 11801 the provision for the appointment of probation officers in the Federal courts after competitive examination.

The advisability of appointing probation officers only after competitive examination has been demonstrated in many jurisdictions, particularly in New York State, where, as you probably know, all probation officers are under the merit system. In connection with the reorganization of the probation system in both the New York State service and in connection with the criminal courts of New York City, the legislature specifically provided for the appointment of not only probation officers but even the director of the State probation division after competitive examinations. So that there is not a single position either in the State probation bureau or in the bureaus attached to the criminal courts of New York City that is not under the merit system.

The application of the merit system to these positions by the legislature was made after mature consideration of the practicability of competitive civil-service examinations for such places. Experience has shown that where probation officers are appointed without examination it invariably results in the appointment and retention of mediocre and incompetent officers. The position of probation officer requires the services of a trained technical expert. Only after an intensive investigation of the education, training, and experience of candidates for such positions, based on examinations conducted by the Civil Service Commission, can we be assured of the appointment of qualified persons.

To permit their appointment without the aid of the Civil Service Commission inevitably invites political or personal considerations to dictate appointments; at least, it subjects the appointing authority to certain pressure from which he ought to be relieved as a matter of fairness to him.

I hope that you may be successful in urging the Judiciary Committee to reconsider its decision to eliminate from the bill the provision for the appointment of probation officers after competitive examination. I shall write to the other members of the committee conveying our views.

If there is any other information you may desire, will you please call on me?

Very truly yours,

H. ELIOT KAPLAN, *Secretary.*

One of the best-informed witnesses who appeared before the committee was Mr. Herbert C. Parsons, commissioner of probation of the State of Massachusetts. His testimony before the committee is not only interesting but most instructive. Every member of the subcommittee will admit that Mr. Parsons' statement was very impressive. He appeared before the committee in favor of the bill, but when he approved of the bill the civil-service requirement had not been eliminated. Mr. Parsons speaks for himself in the following telegram:

BOSTON, MASS., *May 22, 1928.*

Hon. F. H. LAGUARDIA,
House of Representatives, Washington, D. C.:

Your wire was first intimation of removal from civil service being feature of probation bill not mentioned in hearing. Massachusetts experience is with unrestricted appointment by judges; it is clearly debatable ground in any new field. I hope it will be considered all by itself.

HERBERT C. PARSONS.

As far back as 1919, when the United States Civil Service was first considering the placing of Federal prohibition officers under civil service, it consulted with the best men in the country on the subject. Even then Mr. Parsons approved of the civil-service system and stated:

The commission on probation [in Massachusetts] has recorded itself in favor of the placing of appointments under civil service * * *.

Mr. Herbert C. Parsons' letter of 1919 is most timely now:

MAY 22, 1919.

MR. HAROLD N. SAXTON,
Chief Examiner, State of New York Civil Service Commission, Albany, N. Y.

DEAR SIR: Replying to your inquiry under date of May 17, I am glad to give you the opinion which is held by those who are directly connected with the probation service of this State, so far as it has ever found expression. It is that the appointments to the probation service might well be under civil-service rules, provided that the examinations be broad enough to take into account those personal qualifications which are peculiarly essential in such an officer.

Appointments in this State are not made under civil-service regulations. The theory which has been followed in our statutes is that the probation officer is the personal representative of the judge of the court, an extension, so to speak, of the court out into the community for the double purpose of: (1) inquiry as to the social bearings of the case, and the conditions of the accused person's life and employment, health, and mentality; and (2) the supervision of such persons when found guilty of the offense charged, with a view to holding them to a right line of conduct, and, more emphatically, to bring about a rehabilitation and an improved attitude toward society in general. That being the purpose, the appointment has been left entirely in the hands of the court.

In the police, district, juvenile, and municipal courts, which constitute our system of courts with primary jurisdiction, the justice of the court appoints the probation officer and may remove him at pleasure. The law provides no check upon the appointment. In the superior court, which is our court of appeals for the rehearing of a case on its merits, and the court where jury trials are provided, the appointments are practically made by a committee of three justices, called the committee on probation of the superior court, selected by the chief justice of the superior court. They are formally made by a justice sitting in the county in which the officer is appointed. As in the other courts, the appointment by the court is final.

The commission on probation has recorded itself in favor of the placing of appointments under the civil service, providing it could be done with broad regulations, including an oral examination. The chief justice of the Boston municipal court, our largest court of its kind, and the writer some time ago presented to the Civil Service Commission an opinion that the probation service in this State would be improved by this change in the method of appointment. We have studied the New York system, both in the reports of the probation commission of your State and in the less formal information given by its secretary, Mr. Chute, and we have held this up as the model which we believe Massachusetts should adopt.

The alternative frequently suggested here is to make the appointments by the justices subject to the approval of the commission on probation, or to have them made from lists prepared by the commission. But this alternative is not especially attractive, for the reason that it undertakes practically a civil-service form while simply changing to another board than the State Civil Service Commission the application of the same principle as controls civil-service appointments.

Practically the substitute, which in a measure has come to be adopted in this State, is an active seeking by the commission on probation of a share in the consideration of candidates for probation positions. In the superior court, all appointments are made after careful investigation by this office of the merits of the candidates. In the lower courts the justices frequently consult the commission as to the appointments. But you will appreciate the fact that no such rule has any legal force, as its observance depends upon the inclination of the judges. In this way, some appointments are made without resort to the commission's advice, and appointments which are not up to a recent standard. It works advantageously when it works at all, and it generally is ample, but it can not be relied upon or advocated as a sufficient substitute for the use of civil-service examinations.

I realize that I am giving you only opinions, without the basis of experience in the work of civil-service regulations as applied to the Massachusetts probation service. But they are opinions which are intelligently formed and stoutly held on the part of those who most strongly desire that the probation service should come to a high standard in a State where it is so largely used as here.

Yours very truly,

HERBERT C. PARSONS,
Deputy Commissioner.

There can be no sound argument presented in favor of the committee's amendment making these important court employees the subject of political or personal appointments. There are, perhaps, some personal and selfish reasons here and there with apparent sufficient influence to destroy the civil-service policy of the country, to ignore experience of the past, and to depart from the best practice in probationary work. It must be these personal desires and not the best interest of the work that suggested the proposed committee amendment.

One case that has come to the attention of the Civil Service Commission is that of a Federal judge, who, when the law went into effect, sought to appoint a probationary officer under salary. He selected the appointee, a young lady of his judicial district, and proceeded to make the appointment. When he was confronted with the civil-service requirement of the existing law, his honor, the judge, protested. Not only did his honor, the judge, protest, but he sought first to evade the law by making the appointment and then refused to make the appointment unless he could appoint the particular young lady he had in mind. Splendid example of law obedience and restraint on the part of a Federal judge.

Here is another reason for exempting these positions, taken right from the hearings, page 67. One of the gentlemen on the subcommittee frankly stated:

In my district we have a man who has been serving ever since this law went into effect. He is a volunteer, and he has passed the age when he could take the examination. And there is no better man in the country. He is devoted to that work, but he could not take the civil-service examination. The judge does not want anybody else, and he says he will not have anybody else.

Again his honor, the judge, brazenly and openly states that he refuses to obey the law.

Is it not still fresh in the memory of every member of the Committee on the Judiciary that in a very recent case requiring the attention of the committee there was the uncontradicted and uncontroverted proof of a Federal judge appointing to a confidential position first his daughter, then his wife, and then another daughter? Is this judge to be intrusted with the selection and appointment of probation officers charged with most important work?

In the consideration of this bill the past experience of this important work, the present practice in most of the States, and the views of recognized authorities on the subject must be taken into consideration, rather than the desire of an individual here and there for the appointment of any particular person. Rather than permit the passage of the bill, weakened and distorted by the elimination of a necessary protective feature, it should be defeated. The bill in its original form, carrying the civil-service provisions of existing law, is an excellent piece of necessary legislation and in its original form should be passed by Congress.

RECOGNITION BY THE SPEAKER

The SPEAKER. May the Chair suggest, inasmuch as he sees a number of gentlemen on their feet, that owing to the lateness of the hour the Chair prefers not to recognize gentlemen whose requests will take any great length of time.

EVENING SESSION ON FRIDAY

Mr. TILSON. Mr. Speaker, I ask unanimous consent that to-morrow at any time before 6 o'clock it may be in order to move to take a recess until 8 o'clock in the evening, and that between the hours of 8 and 11 it may be in order only to consider bills on the Private Calendar unobjected to, beginning at the double star.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that it may be in order at any time before 6 o'clock to-morrow to move to take a recess until 8 o'clock in the evening, and that between 8 and 11 o'clock it may be in order to consider bills on the Private Calendar unobjected to. Is there objection?

Mr. LAGUARDIA. Reserving the right to object, that is after the disposition of the present Boulder Dam bill?

Mr. TILSON. If this bill is not completed we can go on with its consideration after 6 o'clock, thus annulling my request for an evening session.

Mr. TAYLOR of Colorado. Reserving the right to object, can the gentleman give us any idea when we will take up the Consent Calendar?

Mr. TILSON. I shall urge that the Consent Calendar be taken up not later than Monday if the resolution to adjourn on Tuesday is agreed to in the Senate. I shall make every effort to have unobjected bills on these two calendars considered.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

PERMISSION TO ADDRESS THE HOUSE

Mr. LEATHERWOOD. Mr. Speaker, the gentleman from Colorado [Mr. WHITE] was under the impression that I objected to his request. I reserved the right to object and asked what subject he was going to speak on. He has informed me, and I have no objection.

The SPEAKER. Is there objection to the request of the gentleman from Colorado [Mr. WHITE]?

There was no objection.

Mr. WELCH of California. Mr. Speaker, I ask unanimous consent that I may address the House for 35 minutes on Saturday after the reading of the Journal and disposition of papers on the Speaker's table.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to proceed for 10 minutes at the completion of the address of the gentleman from California.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. RANKIN. Reserving the right to object, on what subject?

Mr. WELCH of California. In answer to a charge made by the gentleman from Michigan [Mr. CRAMTON] that the city and county of San Francisco has failed to carry out its obligation under what is known as the Raker Act, passed in 1913, granting the city and county of San Francisco certain rights for water storage in the Yosemite National Park.

Mr. RANKIN. I hope the gentleman will not occupy that time——

Mr. WELCH of California. I will reduce it to 30 minutes.

Mr. RANKIN. If the gentleman is going to make it 30 minutes I will not object to 35. [Laughter.]

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. CRAMTON] that he may have 10 minutes to address the House at the conclusion of the remarks of the gentleman from California [Mr. WELCH]?

Mr. SCHAFER. Reserving the right to object, on what subject—the same subject?

Mr. CRAMTON. Yes.

Mr. RAMSEYER. Mr. Speaker, reserving the right to object—and I am not going to object—as we approach the end of the session many Members are inclined to rush into the pit to get recognition from the Speaker. It tends to disorder in the House, and I think I shall hereafter, when I am present, object to unanimous consent preferred from the pit. The rules require that Members shall rise in their places and address the Speaker.

The SPEAKER. The Chair sustains the point of order. [Laughter.] Is there objection to the request of the gentleman from Michigan?

There was no objection.

REPORT OF GOVERNOR GENERAL OF THE PHILIPPINE ISLANDS
(H. DOC. NO. 325)

The SPEAKER laid before the House the following message from the President of the United States, which was read, and with the accompanying papers referred to the Committee on Insular Affairs and ordered printed:

To the Congress of the United States:

As required by section 21 of the act of Congress approved August 29, 1916 (39 Stat. 545), entitled "An act to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for those islands," I transmit herewith for the information of the Congress the report of the Governor General of the Philippine Islands, including the reports of the heads of the departments of the Philippine government, for the fiscal year ended December 31, 1927.

I concur in the recommendation of the Secretary of War that this report be printed as a congressional document.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 24, 1928.*

FORT DEFIANCE, OHIO

Mr. LUCE. Mr. Speaker, I ask unanimous consent that I may have until midnight to-night to file a conference report on Senate Joint Resolution 82, relating to Fort Defiance, Ohio.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

LEAVE OF ABSENCE

The following leave of absence was granted:

To Mr. WINGO (at the request of Mr. RAGON), on account of illness in his family.

To Mr. W. T. FITZGERALD (at the request of Mr. KEARNS), indefinitely, on account of sickness in his family.

ADJOURNMENT

And then, on motion of Mr. SMITH (at 6 o'clock and 5 minutes p. m.), the House adjourned until to-morrow, Friday, May 25, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Friday, May 25, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON AGRICULTURE

(10 a. m.)

A bill to amend the grain futures act (H. R. 11952).

COMMITTEE ON BANKING AND CURRENCY

(10.30 a. m.)

To amend the act approved December 23, 1913, known as the Federal reserve act; to define certain policies toward which the powers of the Federal reserve system shall be directed; to further promote the maintenance of a stable gold standard; to promote the stability of commerce, industry, agriculture, and employment; to assist in realizing a more stable purchasing power of the dollar (H. R. 11806).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To regulate the distribution and promotion of commissioned officers of the line of the Navy (H. R. 13683).

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. RAYBURN: Committee on Interstate and Foreign Commerce. H. R. 13778. A bill authorizing Alex Gonzales, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Rio Grande near the town of Ysleta, Tex.; with amendment (Rept. No. 1846). Referred to the House Calendar.

Mr. LEA: Committee on Interstate and Foreign Commerce. H. R. 13824. A bill authorizing L. L. Montague, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Columbia River at or near Arlington, Oreg.; with amendment (Rept. No. 1847). Referred to the House Calendar.

Mr. SHALLENBERGER: Committee on Interstate and Foreign Commerce. H. R. 13826. A bill authorizing the Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Union, Nebr.; with amendment (Rept. No. 1848). Referred to the House Calendar.

Mr. HUDDLESTON: Committee on Interstate and Foreign Commerce. H. R. 13856. A bill authorizing H. G. Martin, W. P. Calhoun, J. H. Kaplin, R. L. O'Neal, O. J. Whipple, H. G. McBride, J. B. Brown, and Idus Jones, their heirs, legal representatives, or assigns, to construct, maintain, and operate a bridge across the Altamaha River, at or near Towns Bluff Ferry, in Jeff Davis and Montgomery Counties, Ga.; with amendment (Rept. No. 1849). Referred to the House Calendar.

Mr. SINNOTT: Committee on the Public Lands. H. J. Res. 318. A joint resolution amending the joint resolution entitled "Joint resolution directing the Secretary of the Interior to withhold his approval of the adjustment of the Northern Pacific land grants, and for other purposes," approved June 5, 1924 (43 Stat. 461), as amended by the joint resolution approved March 3, 1927 (44 Stat. 1405); without amendment (Rept. No. 1850). Referred to the Committee of the Whole House on the state of the Union.

Mr. LETTS: Committee on Indian Affairs. H. R. 12414. A bill authorizing the classification of the Chippewa Indians of Minnesota, and for other purposes; with amendment (Rept. No. 1851). Referred to the House Calendar.

Mr. LETTS: Committee on Indian Affairs. S. 2792. An act reinvesting title to certain lands in the Yankton Sioux Tribe of Indians; without amendment (Rept. No. 1852). Referred to the House Calendar.

Mr. LEAVITT: Committee on Indian Affairs. S. 4346. An act to authorize an appropriation for the purchase of certain privately owned lands within the Fort Apache Indian Reservation, Ariz.; without amendment (Rept. No. 1853). Referred to the House Calendar.

Mr. McSWAIN: Committee on Military Affairs. H. R. 13406. A bill to authorize the city of Fort Thomas Ky., to widen, improve, reconstruct, and resurface Fort Thomas Avenue and to assess the cost thereof against the United States according to front feet of military reservation abutting thereon, and authorizing an appropriation therefor; with amendment (Rept. No. 1854). Referred to the Committee of the Whole House on the state of the Union.

Mr. LUCE: Committee on the Library. S. 3171. An act providing for a Presidents' plaza and memorial in the city of Nashville, State of Tennessee, to Andrew Jackson, James K. Polk, and Andrew Johnson, former Presidents of the United States; with amendment (Rept. No. 1855). Referred to the Committee of the Whole House on the state of the Union.

Mr. GRAHAM: Committee on the Judiciary. H. R. 12526. A bill to amend section 126 of title 28 of the United States Code (Judicial Code, sec. 67, amended); with amendment (Rept. No. 1857). Referred to the House Calendar.

Mr. WOLVERTON: Committee on Naval Affairs. H. R. 13414. A bill to amend section 1396 of the Revised Statutes of the United States relative to the appointment of chaplains in the Navy; without amendment (Rept. No. 1858). Referred to the House Calendar.

Mr. GRAHAM: Committee on the Judiciary. S. 1275. An act to create an additional judge for the southern district of Florida; without amendment (Rept. No. 1859). Referred to the Committee of the Whole House on the state of the Union.

Mr. GRAHAM: Committee on the Judiciary. S. 1976. An act for the appointment of an additional circuit judge for the second judicial circuit; without amendment (Rept. No. 1860). Referred to the Committee of the Whole House on the state of the Union.

Mr. WASON: Joint Committee on Disposal of Useless Papers. A report on the disposition of useless papers in the War Department (Rept. No. 1861). Ordered to be printed.

Mr. GRAHAM: Committee on the Judiciary. H. R. 13978. A bill to amend section 5 of the act of March 2, 1895, relating to official bonds; without amendment (Rept. No. 1862). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. DREWRY: Committee on Naval Affairs. H. R. 12666. A bill for the relief of William S. Shacklette; without amendment (Rept. No. 1856). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 8456) granting an increase of pension to Mary Spence, and the same was referred to the Committee on Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CELLER: A bill (H. R. 13995) to amend the tariff act of 1922, approved September 21, 1922; to the Committee on Ways and Means.

By Mr. COLLINS: A bill (H. R. 13996) granting the consent of Congress to the board of supervisors of Leake County, Miss., to construct a bridge across the Pearl River, in the State of Mississippi; to the Committee on Interstate and Foreign Commerce.

By Mr. VINSON of Georgia: A bill (H. R. 13997) to provide for the delivery at designated spot-cotton markets of cotton tendered on future contracts under the United States cotton futures act of August 11, 1916, as amended; to the Committee on Agriculture.

By Mr. WELCH of California: A bill (H. R. 13998) to place assayers in the classified civil service, to provide for the salaries of assayers, and for other purposes; to the Committee on the Civil Service.

By Mr. VINSON of Georgia: A bill (H. R. 13999) for the relief of the leaders of the United States Navy Band and the United States Marine Corps Band, and for other purposes; to the Committee on Naval Affairs.

By Mr. McFADDEN: A bill (H. R. 14000) to amend section 29 of the Federal farm loan act, and for other purposes; to the Committee on Banking and Currency.

By Mr. GOODWIN: A bill (H. R. 14001) to amend section 5219 of the United States Revised Statutes as amended; to the Committee on Banking and Currency.

By Mr. JOHNSON of Washington: A bill (H. R. 14002) to amend the fourth proviso of the act of February 27, 1925, an act making appropriations for the Bureau of Immigration of the Department of Labor, relating to the coast and land border patrol; to the Committee on Immigration and Naturalization.

By Mr. MENGES: Resolution (H. Con. Res. 42) to print the proceedings in connection with the celebration of the one hundred and fiftieth anniversary of the meeting of the Continental Congress at York, Pa., October, 1927; to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRAND of Ohio: A bill (H. R. 14003) granting an increase of pension to Nancy M. Hurst; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14004) granting an increase of pension to Emma Purnell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14005) granting an increase of pension to Dora Keaton; to the Committee on Pensions.

By Mr. COHEN: A bill (H. R. 14006) authorizing the President to present in the name of Congress gold medals of appropriate design to Clarence D. Chamberlin and Charles A. Levine; to the Committee on Coinage, Weights, and Measures.

By Mr. CROSSER: A bill (H. R. 14007) granting an increase of pension to Mary Jane Tait; to the Committee on Pensions.

By Mr. DARROW: A bill (H. R. 14008) granting a pension to Rebecca Parris; to the Committee on Invalid Pensions.

By Mr. DAVENPORT: A bill (H. R. 14009) granting an increase of pension to Mary Evans; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14010) granting an increase of pension to Julia Spencer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14011) granting an increase of pension to Louise Greene; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 14012) granting a pension to Amy Wilson; to the Committee on Pensions.

By Mr. EVANS of California: A bill (H. R. 14013) for the relief of Edgar C. Campbell; to the Committee on Military Affairs.

By Mr. JACOBSTEIN: A bill (H. R. 14014) granting a pension to Cecelia J. Swift; to the Committee on Pensions.

By Mrs. KAHN: A bill (H. R. 14015) granting a pension to David Jacobi; to the Committee on Pensions.

By Mr. McFADDEN: A bill (H. R. 14016) to erect a monument to the memory of David Wilmot; to the Committee on the Library.

Also, a bill (H. R. 14017) granting an increase of pension to Anna E. Washburn, now known as Anna E. Kitchen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14018) granting an increase of pension to Margaret A. Rockwell; to the Committee on Invalid Pensions.

By Mr. McKEOWN: A bill (H. R. 14019) for the relief of Sard S. Reed; to the Committee on Claims.

By Mr. MURPHY: A bill (H. R. 14020) granting a pension to Naomi E. Glover; to the Committee on Invalid Pensions.

By Mr. NEWTON: A bill (H. R. 14021) for the relief of Edwin Lockwood MacLean; to the Committee on Military Affairs.

By Mr. PORTER: A bill (H. R. 14022) for the relief of Felix Cole for losses incurred by him arising out of the performance of his duties in the American Consular Service; to the Committee on Foreign Affairs.

By Mrs. ROGERS: A bill (H. R. 14023) granting a pension to Benjamin P. Tomlin; to the Committee on Pensions.

By Mr. ROWBOTTOM: A bill (H. R. 14024) granting an increase of pension to Elizabeth Jarvis; to the Committee on Invalid Pensions.

By Mr. RUBEY: A bill (H. R. 14025) granting a pension to Lizzie Simpson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14026) granting a pension to Frank Simpson; to the Committee on Invalid Pensions.

By Mr. TEMPLE: A bill (H. R. 14027) granting an increase of pension to Pamelia Chaney; to the Committee on Invalid Pensions.

By Mr. THATCHER: A bill (H. R. 14028) granting an increase of pension to Sarah Hayden; to the Committee on Invalid Pensions.

By Mr. VINCENT of Michigan: A bill (H. R. 14029) granting a pension to Olive Kimmel; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7763. By Mr. BARBOUR: Resolution adopted by the Chinese Consolidated Benevolent Association, Bakersfield, Calif., branch, protesting against Japanese troops in China; to the Committee on Foreign Affairs.

7764. By Mr. BOYLAN: Petition of National Constitutional Liberty League of America, for the repeal or modification of the eighteenth amendment; to the Committee on the Judiciary.

7765. Also, petition of citizens of New York City, urging the passage of House Resolution 27, providing for the celebration of the one hundred and fiftieth anniversary of the death of Gen. Casimir Pulaski, and for the establishment of a Pulaski sesquicentennial commission; to the Committee on the Library.

7766. By Mr. FENN: Resolution adopted by "Frihed" Lodge, No. 153, Danish Sisterhood of America, at Hartford, Conn., May 16, 1928, protesting against any change in immigration laws whereby the Danish quota would be still further reduced; to the Committee on Immigration and Naturalization.

7767. By Mr. GRAHAM: Petition of Philadelphia Chamber of Commerce, asking Congress to recommit to conference the Muscle Shoals bill; to the Committee on Military Affairs.

7768. By Mr. HAUGEN: Petition of 48 citizens of Elma, Iowa, and vicinity, protesting against the enactment of the education bill; to the Committee on Education.

7769. By Mr. LINDSAY: Petition of 15 officials of Polish organizations and pastors of churches, urging cooperation and support of House Joint Resolution 27, providing for the celebration of the one hundred and fiftieth anniversary of the death of Gen. Casimir Pulaski and for the establishment of a Pulaski sesquicentennial commission; to the Committee on the Library.

7770. By Mr. LINTHICUM: Petition of Dr. J. Ralph John, of the International Congress of Chiropractic Examining Boards, Baltimore, Md., registering opposition to House bill 12947 unless same amendments as offered in the Senate be made part of this legislation; to the Committee on the District of Columbia.

7771. By Mr. MEAD: Petition of Ancient Order of Hibernians, of Niagara Falls, N. Y., relative to House Resolution 202; to the Committee on Rules.

7772. By Mr. O'CONNELL: Petition of Polish citizens of Rochester, N. Y., favoring the passage of House Joint Resolution 27, providing for the celebration of the one hundred and fiftieth anniversary of the death of Gen. Casimir Pulaski; to the Committee on the Library.

7773. Also, petition of Gustave E. Swahn, New York City, opposing the conference report on Muscle Shoals; to the Committee on Military Affairs.

7774. Also, petition of George L. Darte, adjutant general, Military Order World War, favoring the overriding of the President's veto on the Tyson-Fitzgerald bill; to the Committee on World War Veterans' Legislation.

SENATE

FRIDAY, *May 25, 1928*

Continuation of proceedings from 10.30 p. m. of Thursday, May 24 (legislative day of Thursday, May 3) 1928

MUSCLE SHOALS—CONFERENCE REPORT

The Senate had under consideration the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. TYDINGS. Mr. President, almost 150 years ago a constitution was devised for the government of this country. It is not my purpose to pose as a constitutional lawyer nor to go into any dry legal discussion of the points involved in the question now before us. I hope, however, I may be permitted to speak briefly in regard to the particular philosophy which came into being with the adoption of the Constitution of the United States.

The men who assembled for months behind closed doors at Philadelphia were scholars and students of all the governments of the world that had preceded ours. They sought to set up in the United States of America, as it was called, a government which would endure not for decades or centuries but for all time. They looked into the operations and history of the governments of the Old World; they saw where those governments had failed and been bad; they saw where power had been abused; and they sought here to erect a form of government, with power checks and balances, so that the evils which had been made apparent in other governments would not be present in ours.

From their long discussion it is apparent that one particular philosophy was ever in their minds. This being a country 3,000 miles in one direction and more than 2,000 miles in the other, it was inevitable that it would be impossible to have one central Government which could operate for all of the States that would eventually become a part of the Union. So they fixed this idea in the Constitution and because it was fixed there our Government has endured to the present moment. That idea was that there should be given to the National Government the power to deal with all things national, which no individual, no community, no State could do for the whole country, and yet which must be done for the whole country if the Nation was to live. It is significant that of all the things it was suggested should be put in the Constitution, there were 18 powers granted to Congress, and every one of those 18 powers deals with a subject which is essentially national and with which no State legislature or group of State legislatures could deal in the interest of the entire country.

I hope to develop this point for those who may do me the honor to listen to me in order to show that the philosophy of the pending joint resolution is contrary to that underlying this Government during the 150 years of its history, and that in effect we are going back to the very thing which the forefathers who founded this Nation hoped to escape.

What were those 18 powers? The first power granted to Congress is—

The Congress shall have the power to lay and collect taxes, duties, imposts, and excises.

That is an essential power to be possessed by the National Government. It has got to have the money with which to run and operate.

The next power granted to Congress was—

To borrow money on the credit of the United States; to regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

Again—

To regulate commerce among the States—

Not to engage in commerce, as the pending joint resolution puts the Government into the business of commerce.

Again—

To establish an uniform rule of naturalization, and uniform laws on the subject of bankruptcies throughout the United States.

To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

We could not have a different standard of money in each of the 48 States of the Union. We had to have one standard of money, in order that commerce might flow with ease from one State to another.

Other powers given Congress were:

To provide for the punishment of counterfeiting the securities and current coin of the United States;

To establish post offices and post roads;

To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive right to their respective writing and discoveries;

To constitute tribunals inferior to the Supreme Court;

To define and punish piracies and felonies committed on the high seas, and offenses against the law of nations;

To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water;

To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years;

To provide and maintain a navy;

To make rules for the government and regulation of the land and naval forces;

To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions;

To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States, respectively, the appointment of the officers and the authority of training the militia according to the discipline prescribed by Congress;

To exercise exclusive legislation in all cases whatsoever over such District (not exceeding 10 miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of the Government of the United States, and to exercise like authority over all places purchased by the consent of the legislature of the State in which the same shall be for the erection of forts, magazines, arsenals, dockyards, and other needful buildings; and

To make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this Constitution in the Government of the United States or in any department or officer thereof.

And then what does the Constitution say?—

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people.

If any man of good, sound mind, with real ordinary common horse sense, can show me in this document—which has brought us from a little, struggling nation of 13 small Colonies to the most powerful, the most blest, and the most prosperous Nation in the world—a single provision under which the Government can go into the business of making fertilizer and selling power throughout the United States, I should indeed be obliged to him if he would point it out. It is not there. It can not be done; and the Supreme Court has held time and time again that the 18 powers given to Congress mean exactly what they say, and that Congress can not usurp and delegate to itself powers which the Constitution in effect does not confer upon it.

But why talk about the Constitution? It is a mere scrap of paper. We have lost all the philosophy of government which made the Nation great. No one cares about the ultimate result. No one throws his gaze down the corridors of time to find where he will ultimately land. We take each proposition and look at it as if it were enough for five minutes alone; but those who brought this country into being looked down the centuries to come. They preserved the Nation for us. Shall we preserve it for those who come after? If so, shall we do it by the adoption of the policy outlined in this joint resolution?

There is no philosophy of government in it, unless it is the philosophy of the government of communistic Russia, because Russia to-day has the same form of government that is incorporated in this joint resolution.

Over there the Government owns everything—the stores, the hotels, the factories, the mines, the railroads. They are all operated and controlled by the Government. Under the Norris joint resolution, as I see it, we have put our foot on the first step which eventually will lead us to the point where the Government will dominate and control all of the electric business in the United States of America.

Talk about Government ownership! Good Lord, look at the Shipping Board! Read the statement of one of the head men down there at the hearing held in the Senate committee to the effect that it was honeycombed with politics; and it was only the other day that the Senator from Alabama [Mr. BLACK]—who, I believe, is going to support the conference report on this joint resolution—was up here protesting about the amount of money paid the attorneys of that board, and he offered an amendment and went on at a great rate to say how the people's money was being squandered, and protested, and made an eloquent speech upon this floor; but he was defeated. Now, I ask him, if the Government could not operate the shipping business—something that might be looked upon as a defense proposition of more importance than the proposition outlined in the pending joint resolution—I ask him how in the world it can engage in an undertaking of such magnitude as that which we have before us?

Every year we appropriate tremendous sums of money, millions of dollars, not of your money or of my money, but of the money of the people who are earning money in this country, who are bringing it wealth, developing its industries, digging in the soil, bringing up ore, studying at nighttime to devise great business enterprises to employ the people and make them happy; but we are going to take it all away. If a man makes any money, the philosophy of this joint resolution is, after he becomes strong, to destroy him and let his bones fall where they may, confiscate his property, rob him. I call it legal robbery, because we encourage him to go out and develop this great Nation of ours, and then, when he gives us his best efforts, when he erects a monument, after he has erected it we turn on him like cowards and kick him down the stairs.

Oh, I see the movement. You can see it in any town. You had it all through the West. When the West was thinly settled and you had no railroads, you were wild to get railroads. Legislators granted them rights of way miles wide. They begged the railroads to come in; and pioneer builders, often doubting the wisdom of their course, risking their money, risking their credit, risking their reputation, went out and conquered the West, sparsely settled though it was, and built great continental lines across our country, developing all its riches, and making prosperity and riches for it. But as soon as they had done it, what did we do? We then came here to Washington to hamstring in every possible way that we could the very institutions that have made America great.

Government operation! Oh, yes; I am in favor of Government operation. I have actually voted for it in a small municipality; but what a difference there is between this proposition and a municipality running its own public utilities, a business which is close to the people, where they know everybody in the town, where they can select the men who are to operate those utilities, where they can see what the lower right-hand corner of the tax bill says every year, where they can pay direct taxes and can keep an eye on the business management. That is one thing; but what will people know in Maryland or in Nebraska or in Arizona of the operation of this plant down at Muscle Shoals?

It is no criterion to say that in Omaha, Nebr., where the people perhaps owned the utility, because it worked in that comparatively small area, constantly under the gaze of the people living there, because public ownership of a utility there is a success, that it will be a success if applied on a nation-wide scale. This Government was devised to govern, not to go into business. It was made here to protect the liberties and the properties of the people. It was never conceived to operate any business beneath the sun; and what a bit of hypocrisy it is, what a paradox it is, that as I stand here on this floor to-night the marines are in China to protect the lives and property of American citizens who do not even live in our country, while the Senate of the great United States is considering

a joint resolution to confiscate the property of those citizens in the United States of America!

I defy anyone to gainsay that remark.

We will send our Army, we will send our marines to any place beneath the sun if we believe that one of our nationals is in great danger, or his property is threatened; but we, the Senate of the United States, come to the people who pay the taxes, the people who must bear arms in time of war, who must produce the taxes in time of war, and say, "We are going to put the Government into business in competition with you, and drive you out of business, because we will run our business at a loss, if necessary. We can always come in here with a deficiency bill and get enough to tide Government ownership over for another year."

Why confine it to the power business? I should like to offer an amendment. Let us take in the hard-coal industry; let us take over the railroads; let us take over the hotels; let us take over the shops, the automobile works. Why not? It is just as logical to operate one business, it seems to me, as it is to operate another; and God knows, more people are dependent upon the railroads for the transmission of commerce and passengers than are dependent upon the electric companies for light and power. If we want to tackle a proposition of this kind, let us be honest about it, and come in here before the American people and stand up and be counted, and see who is on one side and who is on the other. Do not let us go in the back door. Let us go in the front door like men.

Oh, somebody may say, "You come from the industrial East." I come from a very small State, it is true; but it so happens that half of its people are engaged in agriculture. We have only one city of considerable size—Baltimore. The other half of the people are urban dwellers; so I shall have my troubles five years from now, when I am a candidate for reelection, and some demagogue will get up on the stump and say I fought against giving the farmers a square deal. But I would rather go down in political oblivion, and never hold another office as long as I live, than to sacrifice my honest convictions, or go back on a philosophy of Government which for 150 years has brought the Nation all the blessings that we to-day enjoy.

You send men forward in time of battle underneath the emblem of their country to die for all its glorious history; and when that war is over you revolutionize the Government from a democracy into a socialistic republic by a mere joint resolution!

Now, let us take up some of the features of the joint resolution. Just conceive of this one proposition:

Under this joint resolution, all of the rates for any electricity generated at Muscle Shoals, sold in Alabama, Tennessee, Maryland, Arizona, or any other State, are fixed how? They are fixed, and exclusively fixed, by the Federal Power Commission.

For example, if the little town of Dresden, Tenn., wishes to buy its electricity from this company, its rates are fixed by the Federal Power Commission in Washington; and if I had a competing plant in that town, selling that town electricity, I should have to have my rate fixed by the Public Utilities Commission of the State of Tennessee. There would be two competing concerns, one with its rates fixed by the Federal Government, and the other with its rates fixed how? By the local government. Is there anyone who can believe that with two judges sitting in the same case who will render individual opinions on different sets of facts, the verdict rendered will be a fair or a just or a competitive one?

Here we are going to have one-half, we will say for the sake of illustration, of the companies that sell electricity to communities or to factories or to individuals regulated by the State regulatory body, and the other half of them regulated by the Federal Government.

If there is any justice in that, if that is good business, if that is sound business, I can not reconcile it with any business idea I have ever heard from the lips of anyone who has amounted to anything in all the world. Think of going into a State or into a little town, we will say Dresden, Tenn., and denying the people of that place the right to petition their own State government, because they will have to come all the way to Washington to file a petition for a reduction of the rates. Normally they can go to their own public-utilities commission, located in their own State, appointed by their own governor, whom they can defeat if they do not think he or they are acting in an altogether proper way. They can go there and have the rates readjusted. If there is crookedness, if there is graft, if there is dishonesty, they can defeat the governor and put in one who will give them a square deal. But they can not do it any more. Their hands are tied and lashed to the mast. I do not care how the rates may be, if they think they are unfair, they have to come all the way to the Federal Power Commission at Washington, although they may live in California, to get a redress of their grievances. No one will deny that, no one can deny it, because the language of the bill is too clear for a 6-year-old child to misunderstand. But for fear some one may think that perhaps I have not stated the situation correctly, let me read the language itself:

> It shall require said person or corporation to agree that any resale of such electric power by said person or corporation shall be sold to the ultimate consumer of such electric power at a price that shall not exceed an amount fixed as reasonable, just, and fair by the Federal Power Commission.

Are there Senators in this body who think so little of the constituents of their States that they will deny those citizens a hearing before their own regulatory board and force them to come all the way to Washington to get a hearing on a power rate?

What redress will you have if your commission is not fair? Only in this very session you had a man up for confirmation on the Interstate Commerce Commission, Chairman Esch. You said he was not treating you right. The Senator from Michigan [Mr. COUZENS] made a speech, the Senator from Missouri [Mr. REED] made a speech, the Senator from West Virginia [Mr. NEELY] made a speech. They all said this commission was honeycombed with politics, and your way of remedying the situation is to create another exactly like it.

Mr. WHEELER. Mr. President, will the Senator yield?

Mr. TYDINGS. Yes; I yield, but only for a question.

Mr. WHEELER. Would the Senator like to repeal the law creating the Interstate Commerce Commission?

Mr. TYDINGS. No; I would not, and the situation is not the same. The Interstate Commerce Commission regulates interstate commerce. The Federal Power Commission would regulate intrastate commerce.

Mr. WHEELER. What about the people of California who have to pay high freight rates, and when they want to make a complaint, have to come to the Interstate Commerce Commission?

Mr. TYDINGS. That is true, but I will say to the Senator in answer to his question that we created the Interstate Commerce Commission when there were practically no regulatory bodies over railroads in any State in this Union; but to-day we have regulatory bodies for public utilities in every State in the Union, and none in the United States Government proper except the Federal Power Commission, which is more or less of an advisory body, and has very limited power under the act.

How many of the Senators—oh, I wish I had thought to get the roll call—rose here and denounced Commissioner Esch, a man who had served many years in the Congress and long upon that commission, as unfit to be appointed?

Mr. COUZENS. Mr. President, will the Senator yield?

Mr. TYDINGS. For a question.

Mr. COUZENS. Did the Senator say that the Senator from Michigan got up and denounced Mr. Esch?

Mr. TYDINGS. No; I said the Senator voted against him.

Mr. COUZENS. The Senator is in error, although it was in executive session. I confess I voted for his confirmation.

Mr. TYDINGS. I am glad to have the correction.

Mr. NORRIS. Mr. President, I rise to a point of order.

The PRESIDING OFFICER (Mr. SACKETT in the chair). The Senator will state his point of order.

Mr. NORRIS. The Senator from Maryland is discussing what took place in an executive session of the Senate, and I call him to order.

Mr. TYDINGS. I am not a bit scared about the point of order, because it was published in all the newspapers.

Mr. NORRIS. I ask the Chair for a ruling.

The PRESIDING OFFICER. The Senator from Maryland is not in order in discussing executive business.

Mr. TYDINGS. Mr. President, it was published in the newspapers, and it certainly was published in the RECORD that the Senate rejected Commissioner Esch. There can be no dispute on that question. It was also published in the newspapers that Senators did not think Commissioner Esch was a fit man to sit on that commission; and the result of the executive session, as published in the newspapers, was that here was a Federal commission, the oldest regulatory Federal commission in the history of the Government, that the Senate said had men on it who did not honestly and fairly fix the rates. Still, in spite of all that, we are going to create another commission so that we can come in and throw out some of the other commissioners when our people come here and protest and say they are playing red against white or yellow against brown. You can not get away from that. You all did that. No one

denies it, and yet you are going to do it over again and give the people another chance to protest.

Mr. NORRIS. Mr. President, I again rise to a point of order, and I ask the Chair to enforce the rule.

The PRESIDING OFFICER. The Senator will state the point of order.

Mr. NORRIS. The point of order is that the Senator is discussing what took place in an executive session.

Mr. TYDINGS. I am not; I am discussing the result of the executive session, which was that Commissioner Esch was not confirmed; and I intend to discuss that.

The PRESIDING OFFICER. The Senator is out of order in discussing what took place in an executive session.

Mr. TYDINGS. Can I tell the result of the executive session as discussed in the newspapers?

Mr. NORRIS. The Senator was doing more than that.

Mr. TYDINGS. That is what I intend to do.

Mr. BLEASE. I voted against Mr. Esch, and I do not care who knows it, in the session or outside. I have a right to tell how I voted.

Mr. TYDINGS. I voted for him, because I do not believe in bringing politics into presidential appointments, where the nominee is a man of integrity.

Mr. BLEASE. I voted against him because I did not think he was fit for the job.

Mr. TYDINGS. I am not yielding to the Senator from South Carolina.

I wonder how many men in executive session would vote to recognize Russia, and if they would not vote to recognize Russia, why would they not vote to recognize Russia? Is it because of communism? Great God! Can there be anything with more communism in it than is embodied in this resolution? The Government with a $156,000,000 investment to start with, sixty more millions outlined in the plan under discussion, and a paragraph providing that transmission lines shall be built by the Government to every nook and corner of the country where it is feasible to sell electricity. Russia itself could not do any better than that.

Then it was said we were going to make all the fertilizer for the poor farmer; but no one arose and said in that discussion, "But we want to tell you farmers that you are going to pay the bill." That is the part they left out, and that is the part the demagogues always leave out. They do not tell the people it is to cost them more in taxes. You can not get something for nothing out of any government or person in the world. You pay for it, and the farmers will pay for the fertilizer.

If I wanted to take the popular side of the measure I would go back among the poor burdened farmers of my State and say, "I labored over there in the Senate; I did my best to give you cheap power and fertilizer. I wanted to put the Government into business, and distribute carloads of fertilizer free." But I would forget to say, "You will pay in taxes for every dollar's worth of it you get." That is the big point. That is the hump you can not get over. If the Government goes into the business of making fertilizer, it has to pay labor, and pay for depreciation of its machinery, and pay its freight, just the same as the individual does, and the taxpayer is going to foot the bill, and nobody can get away from that statement.

But we lead the people to believe we are going to give them all this free. Nine-tenths of the farmers have been told to think they will back up the spring wagon down at the old railroad siding and load it up with free fertilizer, and that nobody in God's world will pay a dollar for it.

I am going to sound a solemn warning as a young man in this body. You may laugh at it, but I expect to see it happen in my lifetime if this resolution is adopted. You are only opening the door to Government ownership and operation. If you believe in it, all well and good; but if you do not believe in it, you are only opening the floodgates wide to other measures that are coming here to plague your footsteps in the next 10 or 20 years. Further than that—and I believe there are some men who will be glad when that day comes—I want to say this: That within 50 years the thinking men and women, if it is done peacefully, will be congregated in this Capitol to write a new Constitution for the Government of these United States, because enough has been seen in the offing to show that the day of failure is at hand. In spite of the fact that we are prosperous, in spite of the fact that we are great, in spite of the fact that we are powerful, in spite of the fact that we are the most blessed of any nation beneath God's sun, there are some people who still want to experiment with the carburetor when it is working all right.

Untested, untried, we are going to imitate Russia. I would not be afraid to debate this question in Nebraska, in Wisconsin, in Maryland, or in any other State, before any farm audience in God's world, if we could get the truth from both parties, because if the farmers get fertilizer from the Government they are going to pay for it, and if they get fertilizer from an individual they are going to pay for it.

Over in Maryland—and I did not know it until my colleague from Maryland pointed it out—we have, according to my colleague, $25,000,000 invested in fertilizer factories. I would not care if we did not have a cent invested in Maryland, I would not care if there were $25,000,000 invested in fertilizer factories in Nebraska, my voice would be raised in the defense of property where it was sought to be confiscated by legal edict.

Oh, the hypocrisy of it, the sophistry of it, to have our marines at this good hour shedding their blood in Nicaragua in defense of property, while in the Senate of the United States—God save the mark—a resolution is about to be passed that will result in the confiscation of the property of good citizens, whose only crime is that they put their money in the wrong thing and live in the United States.

I want to take this opportunity to pay my respects to the Senator from Nebraska in regard to one matter, because the other night he had the floor, and I had to be very timid in answering him for fear he would cut me off. He said it was evident that the Senator, meaning me, had been reading word for word the pages of the power propaganda put out here. Indeed, he said, with great laughter from the galleries, the Senator from Maryland must have memorized it. I want to say to the Senator from Nebraska that I never read a single syllable of any report that came from the Federal Trade Commission, or from any other source. I do not have to read that kind of stuff to know, because good ordinary child sense would tell me that if the Government goes into the power business in competition with private industry, private industry must fail, because it can not tax the people and get more revenue to continue the business. So I have not read any of that propaganda, and while the galleries rocked in great laughter, the Senator was drawing a conclusion and was casting an aspersion upon me that he had not the slightest justification to draw. I hope the next time he will get his facts a little more firmly in his mind before he offers the insult.

Further than that I have never represented a power company but twice in my whole life. It just so happens that, poor though I am, I had a chance to get into a suit recently, on either side of it, where the amount involved was approximately $100,000,000, but because I happened to be a Member of the United States Senate and not because I did not need the money, I refused the retainer from both sides. So if the Senator thinks I am in the pay of the Power Trust, let him consider that remark.

Of course, the President is going to veto the measure. Some of the Democrats on this side of the Chamber—I say this in all good feeling without meaning in the slightest way to reflect on them—are so thick headed that they are going to join with the President and put the proposition up to Mr. Coolidge and help kick him upstairs and maybe renominate him for a third term. The more Coolidge vetoes these bills the more I fear him as a presidential nominee.

Mr. BRUCE. Will the Senator yield?

Mr. TYDINGS. I can only yield for a question. If the Senator wants to ask me a question, I yield.

Mr. BRUCE. I will only ask a question. The Senator recollects, does he not, that that was the effect of the vetoes which the President sent to Congress on the eve of his nomination the last time, nothing being more popular than those vetoes?

Mr. TYDINGS. In answer to the Senator's question, I believe the statement is correct. [Laughter.]

Mr. REED of Pennsylvania. Mr. President, will the Senator yield for a question

Mr. TYDINGS. Yes; I will yield for a question.

Mr. REED of Pennsylvania. If the President is going to veto this, what is the good of filibustering against it?

Mr. TYDINGS. I am glad the Senator asked me that question. It is simply that I do not want another man to carry my part of the load. The President of the United States has his job and I have mine. I am here to-night protesting verbally, just as I would protest if I were a soldier in the Army and had a sector there to guard. I am only doing my bit. I am sure the President will veto it; but still he might not, and I am not even going to take the chance.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit another question?

Mr. TYDINGS. Yes; I will.

Mr. REED of Pennsylvania. Does the Senator think that a filibuster has the slightest chance of success where an adjournment date has not yet been agreed upon?

Mr. TYDINGS. I will say in all good feeling that the Senator's own experience ought to answer that question better than I can. [Laughter.]

Mr. REED of Pennsylvania. Mr. President, will the Senator permit another question?

Mr. TYDINGS. I am delighted.

Mr. REED of Pennsylvania. The Senator doubtless will remember that the filibuster conducted by the Senator from Missouri [Mr. REED] was conducted with the definite date of adjournment in sight.

Mr. TYDINGS. Yes.

Mr. REED of Pennsylvania. Does not the Senator think, in all seriousness—and I might say, still asking a question, that I am going to vote against the conference report because I agree fully with the Senator's position regarding putting the Government in business, and if the President vetoes it, assuming that it goes to him, I am going to vote to sustain the veto. So, still asking a question, the Senator will realize that we are not different in our views on this measure?

Mr TYDINGS. That is right.

Mr. REED of Pennsylvania. But does not the Senator agree that in this filibuster there is a possibility of endangering other things of the highest importance to the country——

Mr. TYDINGS. I do.

Mr. REED of Pennsylvania. Such as the tax bill, the two veterans' bills, the Army promotion bill, and the deficiency bill——

Mr. TYDINGS. This is all a question?

Mr. REED of Pennsylvania. Oh, yes; this is all a question. [Laughter.] I beg the Senator, then, to answer the question whether, if the veto is as sure as he thinks, it is not wise to let the Senate go along about its business?

Mr. TYDINGS. I will answer the Senator. If I were sure at this moment that the President would live until he got the joint resolution, and would veto it then, yes; but he may die even between this date and the time the joint resolution reaches the White House.

Mr. REED of Pennsylvania. Has the Senator no confidence in the Vice President? [Laughter.]

Mr. TYDINGS. I have great confidence in him, but he might die also. I will say this to the Senator: That if I were sure the President would veto the bill I would surrender the floor immediately. But I can not be sure that he will. I say to the Senator it is not my present desire to filibuster, although I may appear to be doing that. I do not think we ought to force a vote on this question immediately. I believe we ought to hear from home for a day or two first. We ought to see what the situation is. We ought to look at it more calmly.

I do not believe there is a proposition that has come before the Senate in years and years—and I believe the Senator will agree with me—that is as far-reaching in its departure from the form of government we have had for almost 150 years as is this, and I am simply doing my humble bit in my small way, poor though it is, to try to present the other side of the argument as I see it.

I thank the Senator for asking me these questions, and I have answered them as best I could.

Mr. REED of Pennsylvania. I thank the Senator.

Mr. TYDINGS. I went over to Russia last summer and went through that country. I spent quite some little time over there. It is not quite as bad as those who dislike it say it is, and it is not quite as good as those who boost it say it is. There probably were reasons for the Russian movement. I have no hesitancy in saying, from what I could see and learn over there from sources which I believed to be accurate, that I, too, if I had been a peasant, would perhaps have been somewhat of a revolutionary. Certainly the old régime was not all that was to be desired, and neither is the present government anything like a decent one or fit as lately governed for a place in the society of nations. But even so, I know that in this country of ours 90 per cent of the opposition to Russia and Russian recognition is nothing more nor less than because they have confiscated the property of private individuals in Russia.

I leave it to Senators—and I believe that no man in his innermost consciousness will dispute the fact—that if the American Government, with all its wealth in back of it, generates from this great dam at Muscle Shoals a great volume of electric power and has the authority to build transmission lines and send out that power into all the surrounding States, many a poor devil who only has $5,000 or $10,000 or $25,000 or maybe $100,000 invested in some small plant, and maybe having a mighty hard time to make ends meet, will believe that the Government in effect has come in and confiscated that property through unfair competition. Let me state why.

On the one hand, as I have said to the Senator from Nebraska, we have a concern that is taxed by States and taxed by a nation, and, perhaps, taxed by county and taxed by municipality. We have it regulated by the State. On the other hand, we have a concern with no taxes whatsoever to pay to any source, municipal, county, State, or Nation—no tax burden whatsoever upon it. Furthermore, it is uncontrolled by every State in which it is competing with another company that is controlled by the public utilities commission of that State. Who would like to go into business with that kind of a situation presented to him? Who would like to go out and build a power line knowing that the Federal Government was coming along with all the vast wealth of the Nation back of it, with a Treasury with $400,000,000 surplus in it this year, with the power to fix rates regardless of what the existing or prevailing rate was in that community? Why, there would not be a man in this body who would put a red cent into an enterprise of that kind. He would not do it himself, and if he had his own money in this community plant he would say, "Here I have paid taxes to support this great Government all these years and now the very Government I paid taxes to and for which I have worked and served to develop, and the pioneer business that I went into to bring this great invention to the people that it might serve them in all its usefulness—that very Government is now about to take away from me everything for which I have struggled and kept awake nights and plotted and planned for years and years and years."

I can not conceive that the Senate would have so little fairness. I can not conceive that the Senate would have so little regard for fair play. I can not conceive that the Senate would ever have so little business philosophy as to expect the people to have confidence, to have self-initiative, to have self-reliance, to do things for themselves and master the problems in each community or State, if the Federal Government is coming along at almost any hour of the day and take it all away from them through unfair competition.

What is the philosophy back of the Norris resolution? Here it is. "Power companies in many cases have grown into a big trust. That trust has done things that no trust should do." That is true. "There have been great evils permeating the whole electric company structure." That is true. All right; what is the remedy? There have been great evils, therefore, we will to destroy it. We do not seek a remedy. We do not come here to regulate it. It is not attempted to correct those evils. We simply say we will cut the whole thing down. In other words, if we are running a bank and we find the cashier is dishonest, instead of discharging the cashier and getting a new one we discharge the whole force, throw our money out in the street, lock up the building, and set fire to it. It is just about analogous to the proposition which we are considering at this moment.

Oh, no; the Senate of the United States declined to confirm the nomination of Commissioner Esch. He said here is the President packing a Federal commission. If I had all the speeches that were made upon the packing of Federal boards in this body in the five years I have been here and on the other side of the Capitol, it would take two or three volumes of the CONGRESSIONAL RECORD to hold them all. And yet it is proposed in this bill to create another board that another President can pack, and then if some one in Utah or another State has a grievance because the power rate in that State is too high, they have to come all the way to Washington and hire expensive attorneys to get a little hearing on the case. We might as well wipe out all the State lines. There will be no States left. It will only be a proposition of a name. Maryland will be an indefinite realm over near the Chesapeake Bay. Pennsylvania will go as far west as Illinois, and perhaps has gone in some ways long before this.

"All powers not granted to the Federal Congress are reserved to the States and to the people thereof." I wonder if the men who put that in our Constitution understood what they were doing when they did that and said, "There, we have put a bulwark to save this Government from the very things that have brought down all other governments before it. We will not have the Government the master of the people. We will make it the servant of the people. We will not let it interfere with their liberties. We will not let it confiscate their property. We will not have the National Government doing anything except govern." Heaven knows there is a big enough field to plow there and fertilize without going into the power business.

Compare public ownership of utilities in France or in England or in Germany with America. It is a foolish comparison. Why is it foolish? England or France or Germany or Spain or Italy are only about twice as big as the State of Pennsylvania.

They are old civilizations; they have been settled, developed, and built for centuries; they are subject to a very slow and very gradual change. In America we build cities overnight. Look at Detroit; look at Chicago; look at St. Louis—cities that have expanded so that one's imagination can hardly keep abreast of them.

Again, in France there are Frenchmen; in Germany there are Germans; in Italy there are Italians; but in America we have every nationality, every viewpoint in the world. We are not a nationalist Nation; we are a Nation of hundreds of nationalists. Therefore the philosophy of one State is very apt to be different from the philosophy of another State. To attempt to husband and to house and to melt all the people of this Government under one centralized board or commission or Congress in matters of local interest is to sow the seeds of hatred of one community for another, and gradually to bring disrespect for our Government from top to bottom.

It would be much better if we were to-night devoting our thoughts to prevent a waste of money, and incidentally a waste of life, than to have this measure before us, which, in my judgment, at least, is simply a waste of money and injurious to the best interests of the Nation.

It appears that foreign governments—60 of them—have borrowed from the United States $28,000,000,000, including the war debts as agreed upon by the War Debt Commission of our own Government and the war debt commissions of the other governments. Last January, in one month, we made loans abroad of $500,000,000. It will only be a short while before the world will owe us from $50,000,000,000 to $100,000,000,000 if we continue to pursue the same policy which is now being pursued.

It so happens that those countries that are borrowing tremendous sums from us have war-size standing armies. For example, take France. France is a little country with a population of only 40,000,000, but it has a standing army of 765,000 men. One out of every 55 men, women, and children in France is in the active standing army—1 out of every 11 families. Again, France has a reserve of 4,000,000 men; so that considering the reserve force, which is equipped and organized, plus the active army of 765,000 men, 1 out of every 8 people in all of France—and I only use France as an illustration, because the same thing applies to them all, as I shall shortly show—1 out of every 8 men, women, and children in France is either in the active army or in the organized reserves.

Let us take Poland. Poland has a population of 29,000,000, and it has a standing army of 242,373 men. There is no war on, nor is France involved in war. Poland has no war; Italy has no war; Rumania has no war; and yet all of them have standing armies equivalent to war strength. Poland has an organized reserve of 500,000 men; it has an unorganized reserve of 2,000,000 men; so that 1 out of every 30 men, women, and children in all of Poland is in the active army or in the reserve, organized and unorganized, and all are equipped.

How much money does Poland owe us? Poland has floated in government loans in this country $122,076,000. It has floated in corporate loans in this country $20,250,000. Altogether Poland owes us, in Government and corporate loans, $142,326,000; and while she owes us so much money she has a standing army of war-size strength—that is, organized and unorganized, but equipped—of 2,500,000 men.

Without the loans which we have made to that country it could not maintain its standing army; without the loans that we are making to other European nations they would have to scale down their military establishments, because they would not have the money with which to keep their vast war-time armies; yet we sit idly by, and at this very session of Congress we are going to appropriate almost a billion dollars for defense purposes. Why? Simply because with our money which we have loaned to those foreign nations they have sufficient to maintain standing armies of such large size.

I think the day will eventually come when we will need a foreign policy which will say that, while we are not opposed to lending money to any country, if it will put such loans into productive enterprises, such as railroads or mines or machinery or factories, we are opposed to lending money on the present scale to governments which in time of peace maintain war-size standing armies.

Let us take Yugoslavia. That country has a population of 12,000,000 people and a standing army of 140,000 men and an organized reserve of 2,050,000 men. In other words, one out of every seven people in Yugoslavia is either in the active army or in the organized reserve.

Let us take Czechoslovakia. It has a population of 13,000,000; there are 140,000 men in its standing army and it has an organized reserve of 1,489,000 men. In other words, 1 out of every 10 men, women, and children in that country is either in the active army or the organized reserve. To that country we have made tremendous loans in the form of Government or corporate loans.

Altogether the world owes us, as I have said, $28,000,000,000. Now, it has occurred to me that we might by resolution in this body—I have not prepared one but simply present the idea at this time—say something like this: The United States of America is opposed to loans to foreign governments which in time of peace maintain standing armies in excess of the following: For a country with a population of 5,000,000 or less, one man out of every hundred of population in its standing army; for a country of 10,000,000 or less, one man out of every 150; for a population of 20,000,000 or less, one man out of every 200; until finally we would get up to the figure of our own country, and we only have one soldier for every 833 people in our Nation. If we continue to make these loans abroad with no check on them, we are going to go through the same thing that France and Germany went through in the last war. Those two countries had $9,000,000,000 of foreign loans wiped out and lost forever as a result of the war. Suppose Europe should have another big war, what would become of our foreign loans? Is anyone gullible enough to believe that we would get any proportionate amount of them back, when the nations of Europe can not even pay back the war debts they owe us?

I do not mean to say that I am opposed to lending foreign nations money; I am not opposed to it. Our own country was a borrowing nation until the day of the armistice. European capital helped America greatly to develop, and we should not forget that we were once the borrower and they were the lenders. We should be willing now in the day of our prosperity to extend the hand of friendship to Europe; but I submit that when we were borrowing money we had a very small Army of only 100,000 men. We did not go to Europe and ask the countries there to lend us money while we were maintaining a standing Army of a million men or 700,000 men. If we had, Europe probably would very quickly have told us, "We will let you have the money but you must scale down your Military Establishment first."

I think if the Secretary of State really wanted to render some service toward the end of eliminating war, or at least lessening its possibility, instead of antiwar pacts it would be a good idea for him to adopt in some form my suggestion, for what difference does it make if every nation in the world signs a pact that it will never go to war if it maintains a standing army of war strength at the same time it is signing a peace pact?

Mr. President, at the conclusion of my remarks to-night—and I have not nearly concluded as yet; I am really just commencing on this subject, and I think it should be discussed fully before Congress adjourns—at the conclusion of my remarks I should like now, without relinquishing the floor, to ask unanimous consent to have this table [indicating] inserted in the RECORD. I do not make the request now, because I wish to keep it on my desk so that I can refer to it again, and I do not want the Chair to put the request until after I have finished. At the conclusion of my remarks I wish the Chair would put the request.

Mr. HEFLIN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Alabama?

Mr. TYDINGS. I do not yield to anyone.

Mr. HEFLIN. I merely wish to make an inquiry.

Mr. TYDINGS. I yield for a question, but only for a question.

Mr. HEFLIN. I have no desire to ask the question now, since the Senator has withdrawn his request to print the table in the RECORD. That is what I was going to ask about.

Mr. TYDINGS. Mr. President, it would be better if, instead of destroying the property of the people of this country, we would devote some attention to the $28,000,000,000 which we have now invested abroad and consider what is going on over there, in view of all of these tremendous military establishments. All of them, perhaps, are signing or will sign antiwar pacts; but what, in the name of common sense, is the good of a nation signing an antiwar pact if it then arms itself to the teeth and supports an army of such size that it almost breaks the backs of its taxpayers? But instead of safeguarding the money of our people which we have invested abroad, I say to the Senator from South Carolina, we are at this good hour—half-past 11 at night—standing here discussing a proposition not to save the money we have invested abroad but to destroy the wealth that we have created at home!

It is a good thing that this is not President Coolidge's first term. It is a mighty good thing for the Democrats, if this measure passes, that the President did not "choose to run," because, in my judgment, when he vetoes this measure—as I hope he will do, and I think he will do—he will simply be kicking himself upstairs so fast that if the convention can get hold of his coat tails they will pull him back and make him run and break the tradition anyhow.

We could not do a more foolish thing than to stand here in the closing days of the session and advocate this proposition—Democrats, believing in State rights, who lost hun-

dreds of thousands of men all through four years of one of the bloodiest wars of all time to preserve the principle of State rights, to fight for local self-government.

Somebody has said we fought the Revolutionary War because of taxation without representation. Rot! We never fought the Revolutionary War for any such reason. The villages were scattered out in the wilderness, where they never saw a tax collector, where taxes bothered them not a bit. They had wooden shacks, and no roads, and homespun clothes, and they lived on the ground and the game of the field. The tax collector did not worry them. They fought for local self-government, the most priceless heritage that a human being can own; but you would take it away from us now. You would take away from Tennessee her natural resource down on Cove Creek. You would take it away from her. You have the right to confiscate it in this joint resolution, to deny that sovereign State what is hers.

I will say to my colleague, the senior Senator from Maryland [Mr. BRUCE], who referred to the building of a big dam up in Maryland—the Conowingo Dam, costing $60,000,000, built 8 miles from where I live—that that dam pays in county and State taxes almost $1,000,000 a year; and you come up and try to take it away from us! The people of Maryland want the results of the taxation of their own natural resources. There may be some wealthy men in this body; there may be some poor men in this body; but whatever they have is theirs, and as long as they handle it decently they are entitled to keep it; but, if this joint resolution is passed, no man's property will be safe hereafter.

Mr. STEPHENS. Mr. President——

The PRESIDING OFFICER (Mr. ODDIE in the chair). Does the Senator from Maryland yield to the Senator from Mississippi?

Mr. TYDINGS. I yield for a question.

Mr. STEPHENS. From what the Senator has just said——

Mr. TYDINGS. Just a question.

Mr. STEPHENS. From the argument he has just been making——

Mr. TYDINGS. I ask the Senator, is this a question?

Mr. STEPHENS. It is a question.

Mr. TYDINGS. All right; it is my understanding that it is.

Mr STEPHENS. From what the Senator just said, it seems as if his argument relates simply to the Cove Creek Dam proposition. I want to ask the Senator this question: If the Cove Creek Dam proposition is eliminated from the joint resolution, is he prepared to vote for the proposition?

Mr. TYDINGS. In answer to the Senator's question I will say that I would not vote for it. I have attempted to show here to-night not only that objection, but the confiscatory objection; the fact that the Government was going into business; that we were changing our whole philosophy of government; that we were regulating intrastate commerce by a Federal commission and not by a local commission.

Mr. STEPHENS. But so far as the question of State rights is concerned, the only matter involved in this proposition is the Cove Creek Dam proposition?

Mr. TYDINGS. Oh, no! I say to the Senator, in answer to his question, that that can not be so, because the joint resolution says that all of the rates fixed here must be determined to be reasonable, just, and fair by the Federal Power Commission.

Mr. STEPHENS. I understand.

Mr. TYDINGS. That has not anything to do with Cove Creek.

Mr. STEPHENS. I understand, of course, that the Senator is interested in the proposition of having these rates controlled by the States instead of by the Federal commission.

Mr. TYDINGS. That is right. The Senator asks the question. That is right.

Mr. STEPHENS. But what I am getting at is this: The argument the Senator has just made is with reference to the Cove Creek Dam proposition in the main?

Mr. TYDINGS. That is right. That is the argument I just made, I will say in answer to the Senator's question.

Mr. STEPHENS. And the main idea the Senator is arguing, the proposition to which he is opposed, is with reference to the Cove Creek Dam proposition?

Mr. TYDINGS In answer to the Senator's question——

Mr. STEPHENS. Let me say this——

Mr. TYDINGS. I can not yield to the Senator except for a question.

Mr. STEPHENS. I understand. If that proposition is eliminated, then the main objection which the Senator has in regard to this whole matter will be eliminated?

Mr. TYDINGS. I will say to the Senator that if that is eliminated, it is my belief that the main objection I have would be eliminated.

Mr. STEPHENS. That is what I wanted to know, because I have been making an effort to have that proposition eliminated.

Mr. TYDINGS. I doubt if I would support the joint resolution, but I should be less inclined to oppose it as I am doing now if Tennessee were protected in her rights.

Mr. STEPHENS. That is my understanding.

Mr. TYDINGS. I will say to the Senator from Alabama that when he offered his various amendments the last time this proposition was up, I voted for every one of those amendments that would protect his State in its integrity. I will say to the Senator from Florida that when his proposition was up in reference to the inheritance tax I voted every time to protect that State in its right to fix such taxes on inheritances as it desired, without the coercion of the Federal Government. I will say to the Senator from Georgia that when the investigation was up here the other day—I have forgotten what the bill was now—and he made a very able address on this floor, and pointed out some invasion of State rights, I supported his contention within the last three or four days. I have forgotten what the subject matter was. In fact, I never expect to vote, as long as I am a member of any legislative body, for the curtailment of human liberty as expressed by local self-government or for the confiscation of honestly gotten wealth.

Mr STEPHENS. Mr. President, will the Senator yield for another question?

The PRESIDING OFFICER. Does the Senator from Maryland further yield to the Senator from Mississippi?

Mr. TYDINGS. I yield for a question.

Mr. STEPHENS. Does not the Senator believe that if the proposition with reference to Cove Creek Dam should be eliminated from this joint resolution very much of the opposition to the measure would be eliminated?

Mr. TYDINGS. I will say to the Senator that it would be.

It was only a few days ago that that fine old gentleman the Senator from Florida [Mr. FLETCHER] rose here on this floor and made a plea for his own State to be allowed to do what his people wanted to do, and begged the Congress, "Do not coerce us." But no; we knew how to govern Florida much better than the Floridians did. We knew what they ought to have. We were the masters. We could tell them what form of government they ought to live under. They can not do as they wish. We—supermen, all-wise gods, almost—can lay down a code of conduct for them.

Then the Senator from Alabama comes along. He has already had one of the fine resources of his State taken in time of war. The people did not protest. They perhaps realized that they would have to make sacrifices; but he comes along and asks, now that the war is over, that his State be put back on a parity with the other States of the Union. No; we voted down his proposition.

I used to think—and I say this with real tears in my voice—that the Democratic Party, if it had no other good point, was the champion of local self-government, and would not truckle or stoop, no matter what the issue was, to throw away that priceless heritage which patriots had won on the battle fields. But I am sorry to say it seems that neither party cares any more about the individual, anything about the community, anything about self-reliance. I can see "The Covered Wagon," that fine moving picture, and visualize the sturdy pioneers going forth from the Alleghenies across the Western plains; and when they got to rivers they could not write to Congress and say, "Send out a bridge." No; they unhooked the horses, they cut down a few cottonwoods, they put them under the old wagon, and swam across the stream, and pressed onward.

Ah, it was a strong race of men from which we sprang! It was a race of sweet women, imbued with the finest characteristics known by the human race. But we have grown soft. We have lost our manhood. We have forgotten the struggles and the party battles back and forth across the pages of time. We are socialists. We are communists. We know, better than the successful men who made this Nation the great commercial giant that it is, how they should run their business; and if forsooth there are some crooks among them, if forsooth there are some dishonest methods employed, the thing to do is not to correct by punishing the individuals or trying to check the methods.

The thing to do is to put the Government into the business, and then go through what we went through with Miller in the Alien Property Custodian's office, with Fall in the Department of the Interior, with the Shipping Board and its deficit. I say it with no pride; and in the face of all that graft and corruption and incompetence and expense, the way to get rid of that is to contract another disease. So the way to cure typhoid fever is to give the patient diphtheria as well.

No; my voice will be futile. I will amuse some Senators; and others may perchance see some little spark of reason in something I have said. Others will prefer not to listen, because their minds are already made up. But, oh, how unworthy we are—how unworthy we are, because in effect we are really adding an amendment to our Constitution by the adoption of this joint resolution. We are changing the whole philosophy of our Government. We are going back on all of its glorious past, forgetting Gettysburg and Antietam and the Battle of the Wilderness, forgetting Andrew Jackson at New Orleans, forgetting George Washington.

I wonder, if George Washington could be brought back here to-day and given 25 or 50 years' experience of living in this day and age, if that great patriot would stand on this floor and vote to destroy local self-government, when he led the American hosts for no other reason in the world than safeguarding and giving to the people of this country the right to govern themselves. George Washington, if he lived to-day, would be for local self-government, for which he fought in the Revolution.

I wonder what John Marshall would do—that great Chief Justice of the United States, who, when the Federal Constitution was under attack, in case after case, stabilized and strengthened every timber and fiber of that covenant.

I believe that if he were living to-day, instead of fighting against the wishes of this State and that, as he did in the early formative stage of our country's history, he would be demanding that the rights of the States be not invaded by the Federal Government, just as, almost a century ago, he was demanding that the States not invade the domain of the Federal Constitution. The time has come for a strong man to now defend the States against the aggressor, just as the time was then for a strong man to defend the Federal Government against the aggressor. State rights no longer amount to anything. I do not like the term "State rights." I prefer to call it local self-government, the right of free men to a place in the sun, and to dictate the kind of government under which they shall live, without the coercion of any National Government, except in matters that are essentially national, and which must concern a whole people, and which no State or individual can do for themselves.

What will happen if, under the terms of this measure, the Federal Government goes down into Tennessee and selects Cove Creek on which to build a power site? What will happen? In the first place, Tennessee will lose any amount of taxes which she now derives from that land. Whether those taxes are large or small, as at present constituted, Tennessee has that lopped off over the protest of her two representatives in the United States Senate, over the protest of her legislature, and over the protest of her governor. She has the strong arm of the American Government reaching out into that State and closing down on a part of her resources, against the wish of every person in that State as expressed by their representatives.

What is the second thing? If the Federal Government can do that, if it can go in and take 2 counties, it can take 10 counties, it can destroy the State. Precedents are not made along a large scale.

Mr. ASHURST. Look at what they tried to do to my State.

Mr. TYDINGS. That is right. Precedents are made by the slow-weaving force of little events, as rivulets gather into the strength of a brook, and finally we rush out on the bosom of a giant stream that we can not control. So if we adopt this resolution we are making a precedent that the Federal Government can go into a State, take the property of that State, destroy its source of tax receipts, exercise control over it, and in effect destroy it.

Suppose that where this dam is to be located there were a rich industrial city. I do not think it would be done, but theoretically the whole city could be wiped out if the Federal Government wanted it in time of war; if it became necessary, the whole city could be wiped out. Probably Tennessee would submit to it, even though it were a great hardship. But in time of peace to go into a Commonwealth against the wishes of its two representatives here, against the wishes of its governor and its legislature, and take that land, when there is really no need for it—well, if there ever was any self-government in this country this measure cuts the strings of the last rope which holds it to our shores.

I do not know what should be the right title for this measure. I would call it a communistic bill, or a better name for it would be the "job holders' bill," because any number of job holders can be appointed under this measure. In fact, they could be put head-on from the Atlantic to the Pacific, and still they could employ more of them under the terms of the measure, because the language is just that broad.

It says the board—

May appoint such officers, employees, attorneys, and agents as are necessary for the transaction of its business, fix their compensation, define generally their duties, require bonds of them and fix the penalties thereof, and dismiss at pleasure any such officer, employee, attorney, or agent, and provide a system of organization to fix responsibility and promote efficiency.

I say to the Senator from South Carolina that if the board wanted to, it could employ every man, woman, and child in his State under this provision. There is absolutely no limit to it. You could put enough politicians on this thing, and send them into every county in the United States, to go around and take propaganda to the farmers and county demonstration agents, to almost carry a presidential election. I would like to be in command of this if it goes into existence between now and next November, because I think I know where the balance of power in the next election would be.

I have no doubt that those who designed this measure had in mind the elimination of the Government from the fertilizer business, at least except for nitrogen, but a close reading of it will leave that question very much in doubt. Here is what the measure provides:

The board is hereby authorized and directed—

Not only authorized, but commanded, to do what?—

to operate existing plants for experimental purposes, to construct, maintain, and operate experimental plants at or near Muscle Shoals for the manufacture of fertilizer.

Not nitrogenous fertilizer, not fertilizer with a nitrogen content but fertilizer, and "fertilizer" must mean fertilizer, and therefore it must mean any kind of fertilizer which is now manufactured.

For the manufacture of fertilizer or any of the ingredients comprising fertilizer—

And so forth. This is what else it can do.

(b) To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants.

In other words, if it means what it says—and I think everybody admits it does—it simply means this, that this corporation can deal with any manufacturer of fertilizer, for any quantity of fertilizer, for any kind of fertilizer, at any time that it wants to do so, because it says, "To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development." Not experimental program but "program of development and introduction in excess of that produced by Government plants. Such contracts may provide either for outright purchase by the Government or only for the payment of carrying charges on special materials manufactured at the Government's request for its program."

If there were any doubt about the scope of this thing, if anybody thinks there is just going to be a little experimental station down there, let him lend ear to this:

To arrange for farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce.

On a large scale, probably sending down to Tennessee 10 carloads, maybe there will be a little charge to it, but Mr. Farmer will find out he is paying for it in the end.

The next paragraph does deal with fixed nitrogen, but that is the only place I happen to see it in this whole fertilizer proposition. It says:

The board shall manufacture fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen. The fixed nitrogen provided for in this act shall be in such form and in combination with such other ingredients.

They can put one-half of 1 per cent in it. "One-half of 1 per cent." It seems to me I have heard that fraction before somewhere.

With such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops.

You could take a standard fertilizer now and, under this act, take a cologne bottle, and sprinkle a little of this fixed nitrogen over it and sell it as nitrogenous fertilizer. There is no limit fixed in it. You could put one-half of 1 per cent, you could put

half of it if you wanted to, but as far as the law is concerned they could buy pure fertilizer from a fertilizer concern and send it down to Muscle Shoals and, without doing a thing with it, resell it again to the farmer.

We have been humbugged, I hear some one observe, and I would say that if we embrace this iniquity it will be a long while before we stop being humbugged. Listen to this:

The board is authorized to make alterations, modifications, or improvements in existing plants and facilities.

To establish, maintain, and operate laboratories and experimental plants.

This board will have more power, more scope, more authority, than all the other departments of the Government put together, because they will deal with the big agricultural interests of this Nation, comprising about 30,000,000 people.

Senators, have we gone mad? We are not only satisfied to destroy State rights, we are going back on the philosophy of our Government, demonstrated to be successful through 150 years of trial, we are going to take from the State the regulation of the utilities of the State, we are going to confiscate the property of the people of the Nation, who now have invested in fertilizer production or electricity, we are going to compete with them, and saddle the burden of taxation for the deficit on to the backs of the taxpayers. We are going to create another commission just exactly like the one that Commissioner Esch was kicked out of not long ago. We say that the thing was run badly. I did not say it, but some of the Senators, I believe, perhaps thought that way. At any rate, the papers stated that he was not confirmed in executive session of the Senate. Yet, knowing all of that, it being charged by the Senator from Nebraska on this floor at this session that the Federal Trade Commission and these other commissions were not responsive to the purposes for which they had been created, that they had been packed by men who were out of sympathy with the purposes for which they were created, yet he would establish another commission, when he himself has said he felt like introducing a bill to repeal the whole thing; and I believe perhaps the Senator from Arizona remembers that statement.

Yet every time we have gone out into the realm of private business we have made a mess of it. We have not run one business right, including the business of the Government. We have had grafters and corruption. We have not been able to convict many of them. Here is Forbes, just back from Atlanta to-day, who was put in charge of the expenditure of $500,000,000 to rehabilitate the wounded and disabled veterans of the World War, and this great Congress, which can do everything so well, found that millions upon millions of dollars had been squandered in a proper sphere of Government activity; and now we are going into something even bigger and broader and more far-reaching than that enterprise was, with the expectation that it will never occur again. It is like going to a certain house and catching the smallpox, then waiting a few months and going back to the same house with the expectation that we will not catch it again.

There is just as much analogy and just about as much argument in it as to have all these commissions and have statements made here day after day that they are not responsive to the purposes for which they are created, that they are out of sympathy with our institutions of Government, and yet, in spite of all that, I heard the Senator from Nebraska [Mr. NORRIS] stand here—and there are many things about him which I admire—and ask about the Federal Trade Commission, "What is the use of sending the power investigation to the Federal Trade Commission?" I think even the Senator from Virginia [Mr. GLASS] voted not to send the investigation of the power industry to that commission. The Senator from Virginia said they would not investigate it properly, that they were not responsive to the people's wishes, and yet I shall not be surprised, from what I have heard, if perhaps the Senator from Virginia shall vote to create another commission further to hamstring the people.

I heard the Senator from Wisconsin [Mr. BLAINE]—and I admire him very much because, though I differ with him, I always know he is sincere—stand here, and what has he been doing? Battling, as he thought, to bring the people of Nicaragua local self-government; and yet he is going to take it away from the people of Tennessee if he votes for this joint resolution, over the protests of its two Senators, its legislature, and its governor.

I heard the Senator from Georgia [Mr. GEORGE] here the other day make a protest about the 80 per cent provision in the Federal income tax law. The Senator from Georgia said:

Mr. President, while I am in favor of a Federal inheritance tax, yet I am not in favor of it; and I would rather see no Federal inheritance tax if the State of Georgia or any other State is to be coerced into doing something against its wishes.

I hope the Senator from Georgia will be consistent and will now not force Tennessee to submit to the confiscation of its resources by the Federal Government over the protest of its two Senators here.

Oh, yes; everybody says, "All these commissions are rotten, they do not function right, they are wrong, they are out of harmony with our institutions, they are packed with men who will not do what they are supposed to do." Senators get up here and make speeches like that, and then create more of them to do exactly the same thing over again. What we want, as one Republican President has so aptly said, though it has been said many times before he said it, is "less Government in business and more business in government." Let the Congress of the United States deal with government. The people of the Nation have the enterprise and the vision and the experience to deal with business in a much better way than any of us, most of whose training is as lawyers or as legislators, and who never ran an electric line five minutes in our lives. Yet we stand here without any experts except what the committee had before it, and 90 per cent of the Senators are going to commit this Government to a business enterprise without an expert to advise us as to whether or not it is feasible. The committee had some experts, but how many Senators have read the expert testimony? None at all. They have not read it at all, I venture to say, but they would throw away $150,000,000 of money, part of which came from the poor farmers who have just had the McNary-Haugen bill taken from out their inside pocket when they thought it was tucked very carefully in there, and they had almost bought a railroad ticket home. That $150,000,000 and the $60,000,000 more we are going to spend came from the farmers, because most of the taxes are passed on to the man furthest down the line, and when they are not passed on the only reason they are not passed on is because there is no means of communication.

Senators, I expect to be going for three or four hours more, so if any one wants to take a little nap in the meantime, I advise him to proceed. I do not mind going on for a little while and losing a little sleep and using up a little energy in defense of a man's honest property.

What if there are big interests in the fertilizer business? That does not scare me. Neither does the mere charge that there are trusts amount to a row of pins. I know this much, that it does not take much study to convince anyone that the fertilizer business is about the most precarious business anyone can engage in.

In the first place, we get the raw materials from many countries. We get some from Chile and some from Morocco. Some of it we find in our own country. We are always subject to new duties that might be levied in any of the countries in which the ingredients originate. Freight charges may change. Shipping conditions are a hazard. In fact, I can not conceive of a business that has as many unforeseen ramifications as the fertilizer business has. It is a mighty difficult business to operate, I imagine. Nevertheless, we know more about the fertilizer business than men who have spent all their lives in it. We will make cheap fertilizer. All we will do is to pass a bill and put three men at $50,000 a year, as the bill provides, in charge of it, and then the farmers will come up, their bent backs will straighten, poverty and sickness will be abandoned, and there will be Fourth of July picnics in every county seat five days out of every week just simply by enacting a law. It is no trouble at all. We should amend the Constitution and legislate out of existence poverty and sickness. It is very simple. Then when we have eliminated poverty and sickness we would not have to fool with such things as Muscle Shoals and some of these other projects.

I have marked a number of provisions in the report which I have not yet had the time to read. I want to come to the powers which are conferred on this commission, but let me read something else before I take that up:

SEC. 15. The Secretary of War is hereby authorized, with appropriations hereafter to be made available by the Congress, to construct, either directly or by contract to the lowest responsible bidder, after due advertisement, a dam in and across Clinch River, in the State of Tennessee, which has by long usage become known and designated as the Cove Creek Dam, according to the latest and most approved designs of the Chief of Engineers, including its power house and hydroelectric installations and equipment for the generation of at least 200,000 horsepower, in order that the waters of the said Clinch River may be impounded and stored above said dam for the purpose of increasing and regulating the flow of the Clinch River and the Tennessee River below, so that the maximum amount of primary power may be developed at Dam No. 2 and at any and all other dams below the said Cove Creek Dam.

What does all that mean? It means that the Secretary of War is going down into Tennessee with $2,000,000 as a mere starter, and is going to commence the building of a dam. The whole project, I believe, is to cost about $37,000,000 at least when completed—for what purpose? To augment the power at Muscle Shoals? Will there not be enough power there? No. It is not for that purpose particularly, because it has already been said here that all we are going to do is to make experimental fertilizer. We are not going into it on a big scale and, therefore, we will need very little power with which to operate a fertilizer concern. Therefore, we are really going to build another dam not because we have already got it like we have at Muscle Shoals. We have that now. One can reason that a man might to some extent vote for something that he did not altogether like in order to get rid of it in some way.

But here we have nothing. Tennessee has a site, and there is not a thing there that the Government ever thought about. But here by a bill, in time of peace, without any need in God's world for it, we authorize the Secretary of War to go down into that State, against the wishes of its people, and take a great resource from them and waste from $37,000,000 to $60,000,000, which I understand it will cost. What does the Senator from New Hampshire [Mr. KEYES] think of that? That is what the provision means, if it means what it says, and I think it says what it means.

It means that although we do not at this moment own a foot of ground at Cove Creek, although Cove Creek has never been used for war purposes, although Cove Creek has no place, and although it has no part whatsoever in the Muscle Shoals project—think of that, Senators—yet the Government is going down into Tennessee in time of peace, when the people want to get tax reduction, when they want to get rid of the tax burden, when they want the Government to get away from war and get back to peace, when they want the Government to leave them alone and tax them as little as possible, so they can readjust themselves—despite all this we are going down into Tennessee, with no war in sight, and build a great big dam costing from $37,000,000 to $60,000,000. I say it is an outrage and a grotesque waste of the people's money and ought not to be permitted.

Now, let us go to the next section, which is a very different section and rather a long one. It will take a little while to read it, but with forebearance and attention of the Senators who are now in their seats—I am sure there is a quorum now present and in attendance—I will take up section 16 of the joint resolution, which reads as follows:

SEC. 16. In order to enable and empower the Secretary of War to carry out the authority hereby conferred, in the most economical and efficient manner, he is hereby authorized and empowered in the exercise of the powers of national defense in aid of navigation, and in the control of the flood waters of the Tennessee and Mississippi Rivers, constituting channels of interstate commerce—

To do what?—

to exercise the right of eminent domain.

What is eminent domain? The right to condemn for a particular use. The Federal Government in time of peace, with no necessity, with no need for so doing in conjunction with Muscle Shoals, is to go into the otherwise peaceful State of Tennessee and exercise the right of eminent domain and take from Tennessee that which is hers. It might just as well go out to a corncrib and take a man's corn, or take his horse. The same principle is involved. It is merely legalized larceny, as I see it.

Mr. McKELLAR. Mr. President——

Mr. TYDINGS. I yield for a question.

Mr. McKELLAR. If the Government can go there and take one county—and the area proposed to be taken is equal to a small-sized county—why would it not have a like right, if it saw fit, to take all of the 94 other counties in the State and in that way obliterate the State of Tennessee from the map entirely?

Mr. TYDINGS. The Senator's question is pertinent, and in answer to it—perhaps he wants to ask me another, but before he does I should like to make this observation, that if the Federal Government can take one State it might take two States and finally it might get as far as Arizona and take that State, and perhaps California, so that the United States would be a nation of States up to the Mississippi River, and it would only be one State from there on to the Pacific Ocean. That is ridiculous, but it is possible if we follow this theory.

Mr. McKELLAR. The Senator does not think that the State of Nebraska would be included, does he?

Mr. TYDINGS. I venture to say that if Cove Creek were in Nebraska and it belonged to the State of Nebraska, and the two Senators from Nebraska should arise in this body and protest, and the governor of that State and the legislature of that State would send in their protest to the Senate of the United States against the taking of Cove Creek, assuming it to be in Nebraska, and the Senator from Nebraska [Mr. NORRIS] were not in the Senate but was a citizen of Nebraska, he would think his little Commonwealth was being treated mighty mean indeed. But Cove Creek is not in Nebraska. There is no more fairness left. When you depart from local self-government you throw justice to the winds, and then you are willing to coerce a community in which you do not live.

Mr. McKELLAR. Mr. President, I think, if the Senator will permit me, I will ask another question.

Mr. TYDINGS. I yield for a question.

Mr. McKELLAR. Can the Senator see any reason why the committee of which the Senator from Nebraska is a member and of which for a long time he was chairman should adopt the course of taking from the State of Tennessee its property and in another bill, namely, the Boulder Dam bill, provide as follows?—

If during the period of amortization the Secretary of the Interior shall receive revenues in excess of the amount necessary to meet the periodical payments to the United States as provided in the contract, or contracts, executed under this act, then, immediately after the settlement of such periodical payments, he shall pay to the State of Arizona 18¾ per cent of such excess revenues and to the State of Nevada 18¾ per cent of such excess revenues.

Does the Senator see any fairness in thus treating the States of Nevada and Arizona by this very same committee and then taking the property of Tennessee?

Mr. TYDINGS. In answer to that question——

Mr. NORRIS. Mr. President, I rise to a point of order.

The PRESIDING OFFICER (Mr. ODDIE in the chair). The Senator from Nebraska rises to a point of order, which he will state.

Mr. NORRIS. The point of order is that under the guise of a pretended question the Senator from Maryland permitted to be read a long extract and a speech to be made by the Senator from Tennessee. He has, therefore, lost the floor. He can not hold the floor and permit a speech to be made under the guise and pretense that he is being asked a question.

Mr. TYDINGS. Mr. President, the ridiculous position of the Senator from Nebraska is apparent. How should I know before utterance was made whether it was going to be a question or a statement?

Mr. NORRIS. I call the Senator to order. The point of order is not debatable, unless the Chair asks that debate be had.

Mr. TYDINGS. May I be heard——

Mr. NORRIS. The Senator has no right to debate the point.

Mr. TYDINGS. May I be heard, Mr. President?

The PRESIDING OFFICER. The Senator from Maryland may be heard on the question.

Mr. TYDINGS. Mr. President, how can anyone who yields for a question, having made that as a condition precedent to yielding, tell whether it is going to be a question or a statement until after it is uttered? I can not read another man's mind.

Mr. McKELLAR. It was absolutely in the form of a question, and the RECORD will so show.

Mr. TYDINGS. I am very sorry the Senator from Nebraska is so intolerant on this as he is on the State rights question.

Mr. NORRIS. Mr. President, does the Chair think he has been enlightened by that statement, which was made for the purpose of making another speech instead of talking to the point of order?

Mr. TYDINGS. I ask the Chair to rule. If the Chair wishes to rule with the Senator from Nebraska I shall be satisfied, although I shall think I have not received a parliamentary or a square deal, and I shall protest most vigorously.

The PRESIDING OFFICER. The Chair is of the opinion that the Senator from Tennessee was asking a question.

Mr. TYDINGS. I thank the Chair for the fairness with which he has just ruled, although the Chair was in a very embarrassing position.

Coming back to the point where I was when interrupted, the right of eminent domain——

Mr. NORRIS. I desire to make a parliamentary inquiry.

Mr. TYDINGS. Mr. President, I refuse to yield. I am in order and I have the floor.

Mr. NORRIS. Mr. President, I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his parliamentary inquiry.

Mr. NORRIS. The parliamentary inquiry is this: Does the Chair's ruling mean that under the pretense of a question an hour's speech could be included in the question and that the

Senator of whom the question was asked would not lose the floor?

The PRESIDING OFFICER. No; the Chair does not rule that way. The Chair ruled that when the Senator from Tennessee rose he asked a question of the Senator from Maryland, and the Senator from Maryland had a right to answer the question.

Mr. NORRIS. But that does not answer the inquiry which I have made.

Mr. TYDINGS. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator from Nebraska has raised a parliamentary inquiry.

Mr. TYDINGS. A point of order takes precedence over a parliamentary inquiry. The Chair has ruled that I have the floor, and I insist on my right to proceed.

Mr. NORRIS. I ask a parliamentary inquiry of the Chair.

Mr. TYDINGS. If it is the same one the Senator just made, I ask that it be overruled immediately.

Mr. NORRIS. The Senator will find out if it is the same one if he will listen.

The PRESIDING OFFICER. The Senator from Nebraska will state his parlimentary inquiry.

Mr. NORRIS. Does the Chair mean, I ask again, that under the guise of saying "I want to ask a question," and the Senator occupying the floor saying "I yield for a question," that he is going to permit the Senator occupying the floor to be interrupted without regard to the length of the interruption or whether it is in reality a question or a speech?

Mr. KING. Mr. President, I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Utah will state it.

Mr. KING. I submit that the distinguished Senator from Nebraska may not under the guise of a parliamentary inquiry propound a moot question when the Chair has finally decided it.

Mr. NORRIS. That is what a parliamentary inquiry is.

Mr. TYDINGS. Mr. President, I thank the Senator from Utah for being a champion of fairness. Have I the floor, Mr. President?

The PRESIDING OFFICER. The Senator from Maryland has the floor.

Mr. TYDINGS. I want again to thank the Senator from Utah for his fairness.

Mr. BLEASE. Mr. President, I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BLEASE. Is a quorum present?

The PRESIDING OFFICER. A quorum is presumed to be present.

Mr. TYDINGS. I will not yield the floor for a parliamentary inquiry of that kind. No point has been made, and I insist upon going ahead. I still have the floor.

The PRESIDING OFFICER. The Senator from Maryland will proceed.

Mr. TYDINGS. Mr. President, at this point I wish to say that I am not going to yield to any Senator; so if any Senator desires to ask me any question he may save his energy, because I refuse to yield for any purpose whatsoever.

Now, Mr. President, let us get back to the question of eminent domain. We seem to have a great deal of difficulty in getting to that. It is very evident that the domain that is to be condemned is not in some other State but in the State of Tennessee.

The Secretary of War is given the power to condemn, what?—

to condemn all lands, easements, rights of way, and other area necessary in order to obtain a site for said Cove Creek Dam, and the flowage rights for the reservoir of water above said dam and to negotiate and conclude contracts with States, counties, municipalities, and all State agencies and with railroads, railroad corporations, common carriers, and all public utility commissions and any other person, firm, or corporation, for the relocation of railroad tracks, highways, highway bridges, mills, ferries, electric-light plants, and any and all other properties, enterprises, and projects whose removal may be necessary in order to carry out the provisions of this act.

If there is anything that exists beneath the blue sky of heaven that is not included in that language, then the words are not in the dictionary of the English language as spoken. However, it does not stop there; that is only the beginning.

When said Cove Creek Dam and transportation facilities and power house shall have been completed, the possession, use, and control thereof shall be entrusted to the corporation for use and operation in connection with the general Muscle Shoals project and to promote flood control and navigation in the Tennessee River, and in the Clinch River.

I think Clinch River is not navigable at that point. Certainly, the Government only has jurisdiction over the rivers of America provided they are navigable. But even though Clinch River is not navigable, and for no purpose whatsoever in connection with Tennessee, without any part in the scheme of Muscle Shoals proper, we are going to invest the Government with the power to go into a sovereign State, destroy its resources even though the Legislature of Tennessee, the Governor of Tennessee, and both Senators from Tennessee in this body have uttered their protests—so little do we regard in this day and age the rights of a State, the rights of local self-government, the rights that go back to the time the State came into existence.

In my own State of Maryland, small though it is, the boundary lines are all defined in the charter given by the King of England to Lord Baltimore. Through dispute and controversy, those lines were changed; but our boundary lines and our sovereignty as a State go back away before this Union was created; in fact, they go back 150 years before our Constitution was adopted; yet all these boundary lines are to be as a snap of the finger.

People settle in a State for one reason or another. It offers some possibilities. Some people go to California because they like the climate. Some people go to Michigan because they realize that Detroit is a great commercial center, and they go there and take their money and invest in some business. What surety, what safety is there left if, after people settle without molestation from the Government, the Government comes along wherever it wishes, in time of peace, and takes from a sovereign State what is that sovereign State's, over its own protest?

It seems to me that the proponents of this bill are very short-sighted. In the first place, they can win support where now they have opposition, although I would not, with one amendment only, be willing to vote for the measure; but it does seem to me to-day that if this matter had been resubmitted again, and the Cove Creek proposition had been taken out of it, and it had been brought back in the Senate again, much of the protest that is now being humbly made would have long since ceased to be uttered.

Now let us go on to section 17, which is another interesting section of this joint resolution.

For the first time in the history of this Republic, Congress is delegating the constitutional powers of the United States to a commission. That is a new wrinkle in law. I do not know the genius who conceived it; but, if I interpret it correctly, it is a rather large departure from anything we have had up to date. Mind you, the corporation, the Muscle Shoals Corporation, the three men, the three commissioners who form the corporation, who govern it, who are its heads, are what? The "instrumentality and agency of the Government of the United States."

I ask the Senator from Arizona [Mr. ASHURST] to listen to this: This corporation, these three men, are the "instrumentality and agency of the Government of the United States for the purpose of executing its constitutional powers."

Mr. REED of Pennsylvania. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Pennsylvania?

Mr. TYDINGS. I can not yield; I am sorry.

Mr. REED of Pennsylvania. Has not the Senator finished?

Mr. TYDINGS. I refuse to yield, Mr. President, much as I should like to. I ask the Senator from Pennsylvania, however, if he has not left the Chamber, if he will not give his attention just to these few lines:

The corporation—

The three men who form the Muscle Shoals corporation—

is hereby created as an instrumentality and agency of the Government of the United States for the purpose of executing its constitutional powers—

Does that mean the constitutional powers of our Government?

I can not let the Senator answer that question. He will have to answer it in his own mind; but I will say that the language at least is ambiguous and very difficult to interpret, particularly at this early hour in the morning.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield for a question?

Mr. TYDINGS. I am sorry I can not yield. I am afraid I will get into trouble.

Mr. REED of Pennsylvania. No, Mr. President; I only want to ask a question, not to take the Senator off the floor.

Mr. TYDINGS. I can not yield. I am awfully sorry, but I can not yield.

Mr. REED of Pennsylvania. Will not the Senator permit a single question?

Mr. TYDINGS. I can not yield, Mr. President. If any Senator cares to walk over here I can look at him more closely than I can at that great distance.

The Commissioner of Patents shall furnish to the corporation, at its request and without payment of fees, copies of documents—

To the corporation down here, right from the Patent Office—copies of documents on file in his office.

I do not suppose there is a single, solitary patent that this corporation under this law could not ask for, and the commissioner would be in duty bound to send it to them.

Russia! Well, if this joint resolution passes I advise anyone who wants Russia recognized to introduce a joint resolution for that purpose right away, because in my humble judgment we will have put the O. K. on her form of government, and there is no longer any reason why we should not have diplomatic relations. The votes are here if this joint resolution passes. If I were in the Russian foreign office I would say, "There you are! I knew those fellows over in the United States would come to communism. We run all of our public utilities. We own the railroads and the electric-light plants. Why, we have got Colonel Cooper, their own engineer, who built Muscle Shoals, over here. He is over in our country now building one of the biggest dams in the world."

Instead of democracy succeeding, we can tell our good people that the United States, in the Senate of that body and the House of Representatives, have finally adopted the Russian system of government. They are going to confiscate property by unfair competition and drive out all private capital.

Let us hoist the red flag on top of the Capitol. There is no use having the red, white, and blue up there any more. Let us all be communists. Let us include railroads and factories. Let everybody work for the Government. Let us include farm lands, and pay every farmer a salary to work by the day, and have commissions to direct all farm operations. There is no reason why we should not—not a bit in the world. We might as well include it all in the particular proposition before us.

There is an investment of $25,000,000 in the fertilizer business in my State. They are not going to have their property confiscated while there is a spark of energy in my body. I am here to protect their property, if no one else will, until the last ditch. Then I will have done my part; and five years from now, whoever my opponent may be, he can go out with his demagoguery and make appeals to the farmers that I would not let them have free fertilizer, without telling them that they are going to pay the bill for every dollar's worth of fertilizer furnished to them, and they are going to pay it well. I am ready to meet them on that issue; and I am not apologizing for this filibuster, because there is no government left when property is not safe.

Do we not have our marines down in Nicaragua to-day to protect property? So I have heard. Are they not out in China? And here, in the dead of night, we are doing very little for property in the Senate. We are committing the Government to a policy of confiscation.

I saw the hand disclosed in the original conference report brought here. It put the Government in the fertilizer business up to the hilt. I know, if they get an opening wedge in this second conference report, we will go in up to the hilt again. I know that there are hundreds of men depending on the living they get over in those fertilizer plants, because they are big ones. They are employed there every day. They probably have their little homes in the building association. I do not want to make anybody cry, but that is a positive fact. They are depending on their week's salary to take care of their wives and children. They are buying their little homes. They have worked up, perhaps, from laborer to foreman. We are going to take it all away from them. We are going to compete; that is what we are going to do.

Well, maybe we are, and maybe we are not. At any rate I am surprised that when we create anything that makes wealth after it has demonstrated its ability to make money and has erected a great commercial enterprise, our way of rewarding it is by setting fire to the building. We encourage people to go out and build up great enterprises; we strike our bosoms and tell what a great country America is; and then somebody hollers "Wolf!" because some electrical people have been foolish, illadvised, and perhaps corrupt, and we lose all balance, all self-regard, and we say, "This Electric Trust ought to be torn down and the life stamped out of it." And yet we are claiming to be the greatest deliberative body in the world—a body now on the threshold of passing one of the most iniquitous measures that ever found its way into any legislative body!

It is useless to read those provisions that made this country the pattern which was adopted by other governments. It was the little spark of flame lit here on this side of the Atlantic that made the Republic of France an enduring democracy. It was that little fire of local self-government that caused our President during the war to go abroad and, over the council table and over the opposition of some of the most powerful leaders of the world say, "One thing must be brought out of this conference, and that is the right of self-determination." Yet I say to the Senator from Tennessee, we are going to deny to your State the right of self-determination, although millions of men shed their blood in four years of war on the fields of Europe in order that the little countries, the little peoples should not be oppressed and ground down by those who would be their masters.

Go to Austria to-day—a pathetic little country, and one that I think has not been treated fairly. It used to be Austria-Hungary; but Austria to-day is only about one-fourth as large as it was before the war. Hungary is only one-fifth as large as it was before the war. Part of its lands have been given away to Jugoslavia and Czechoslovakia. Part of its lands have been given to Italy. Why? Because in Austria, for example, there were eight different languages spoken. There were many different races of people. Asia and Europe were blended together. There was the Czech and the Serb and the Slav.

The nation and the faction that got in control would coerce the other races. They exploited them. They never paid them any wages. They gave them only clothing and food. They kept them in ignorance. Finally, the result was that they got local self-government; and while injustices were done many of those countries in this redivision, for the first time, after being for centuries under the yoke of oppression, they at last had the golden opportunity, at least, to make the laws under which they should live.

Why, the American Legion would be opposed to this bill—men who went forth into the fire of battle for what purpose? To preserve the institutions of local self-government. Nevertheless we are now seriously debating taking from the sovereign State of Tennessee in time of peace not only its resources but the control over any electricity which is sold in that State by the Federal Government.

If a man's property, be it an electric plant, is not safe, then I say, by analogy, his home is not safe. If you can confiscate property by Government competition for one thing it is inevitable that you can confiscate another kind of property by Government competition for another thing.

We have gotten cold-blooded. Just think, there was a day in this country when the Government was just coming into existence, when men were so stupid that they said, "Before we will ratify that Federal Constitution we insist on an amendment like this being adopted, the first amendment:

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

I tell you, Senators, the men who lived when this Government was first founded did not take things for granted. They had vision. They did not take laws because somebody said they stated so and so. They read them to see what they meant. They tried to find ways and means to prevent any abuse of power, whether this Government would be operated by a president, a king, or a general.

They knew that power in any man's hands was liable to be abused, and they sought for ways and means to protect the State from the Nation and the Nation from the State, so that the perils and the lessons of the Old World would not be repeated on this side of the water.

Oh, some Senators, perhaps, get scared because somebody rises in the Senate from time to time because they vote a certain way and yells "Power Trust" or "Fertilizer Trust." I am not scared. They may call "Fertilizer Trust" and "Power Trust" all they want to. I would just as soon fight for the Power Trust if its property were to be taken from it as I would to fight for some darkey who had only $5 to his name. It is not the quality of the goods, it is the principle of the thing involved.

I have been opposed at times by organized labor, an organization that I really like and wish well, and would rather have their friendship than their opposition; but if I have to win their support by voting for their sole interests to the detriment of all other classes, then I fear I shall never earn it. If I would have to buy the farmer's support by voting for every monstrosity offered in this body, I am sure I shall never be so rewarded. I think some one must have read the propaganda of Carl Marx, or the philosophy of communism, because there is more of that present in this measure than in anything I have seen lately.

They were fools who lived in this country when our Constitution was adopted. The idea of a man putting an amendment like this into the Constitution of his country:

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated.

They thought so much of the home that they actually insisted that there should be incorporated in the Constitution of our country a provision that no house should be searched without a warrant, under oath. They were not going to have people running in on other people's property.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield for a question?

Mr. TYDINGS. I will yield only for a question, with the assurance of the Chair that I will not lose the floor if I yield for that purpose. If the Chair wishes to rule in advance on it, I will yield for that purpose.

The PRESIDING OFFICER. The Senator may yield for a question.

Mr. TYDINGS. Without losing the floor?

The PRESIDING OFFICER. Without losing the floor, providing it is a fair question.

Mr. TYDINGS. I will say that I have no way of knowing what the Senator from Pennsylvania is going to say, obviously, until he utters it, and if it is not a question I have not yielded. With that understanding——

The PRESIDING OFFICER. The Chair must assume that the Senator will ask a fair question.

Mr. REED of Pennsylvania. Does the Senator yield?

Mr. TYDINGS. For a question only.

Mr. REED of Pennsylvania. When will the Senator finish?

Mr. TYDINGS. I am really unable to answer the question. Just think of it—

and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized.

Oh, my, what sturdy fellows they were in those days. Liberty meant something. A man's home meant something, and you could not come in through a resolution or through Government competition to rob him of the rewards of his honest efforts.

I see no difference, except one of degree, between the thief who holds a man up at the point of a pistol and a legislative proposal which takes away from a man his property by the sheer brutality of the force of law.

They then thought they would put this in the old Bill of Rights, as we call it, the first 10 amendments to the Constitution:

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

Of course that was self-evident, but they said: "We are not going to take things for granted. We are going to put in the Constitution, as far as we can foresee, all the provisions which will safeguard humanity from a repetition of the wrongs and oppressions of the Old World."

Here is another amendment:

ARTICLE X

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people.

Mr. President, I really feel that I must apologize to you and to the Senators who have so kindly remained here, but I must detain them for quite some while longer, because the matter involved, as I have stated, is one of principle, and principle can not be compromised with and still be principle. The Senator from Alabama on another subject has uttered that sentiment, and has on many occasions held forth on the floor of the Senate. On this subject I myself feel somewhat inspired, perhaps, as was the Senator from Alabama in furtherance and in the espousal of the subject upon which he has so eloquently embarked from day to day. Therefore, if I detain the Senate, it is not because I would be unkind but rather because there is nothing else for me to do in the present circumstances.

The right of the people to be secure in their persons, houses, papers, and effects.

They will not be very secure after this passes; not at all; not at all. If this becomes the law, what does it mean? It means that we put the Government into an internal business within our country. We have the merchant marine operated as an external proposition, but we are actually going into the ownership of all the transmission lines for all the States, from Alabama on northward as far as you can send electricity, and I am told you can send it for over 1,000 miles with the high voltage that is in force at Muscle Shoals.

We go into the transmission business, the buying and selling of electricity, because that is what it means; we start to sell that. Then somebody comes along and says, "Why not take over the railroads?" That is all right. Then somebody else comes along and says, "Why not take over the coal fields?" That is all right. Then I suppose we will take over the farms, and pay all the farmers day wages. We would then out-Russianize Russia. As I said before, and with the approval and permission of this body will say again, the only difference between this country and Russia, after this resolution is passed, will be that Russia swallowed the whole dose, and we have taken only the first teaspoonful. But I know that the inevitable result will be that in a year or two, when a few more Senators who believe in the philosophy of this particular measure return, other things will be incorporated, where now there is practically nothing at all except the fertilizer and the power business.

The more I reread this proposition, the more damaging it seems to grow. Just think of the horde of job holders who would be appointed under this measure. There would be more people working for Muscle Shoals than would be in the standing Army of the United States under its provisions, because the board—

May appoint such officers, employees, attorneys, and agents as are necessary for the transaction of its business, fix their compensation, define generally their duties, require bonds of them and fix the penalties thereof, and dismiss at pleasure any such officer, employee, attorney, or agent, and provide a system of organization to fix responsibility and promote efficiency.

I say, Mr. President, without yielding the floor, it may occur to some Senators that it might be a good idea to go home and go to bed, to which I would not have the slightest objection provided the Senate met, at, say, 11 o'clock to-morrow, and I were given the floor again when it reconvened. The board—

Shall have all such powers as may be necessary or appropriate for the exercise of the powers herein specifically conferred * * * including the right to exercise the power of eminent domain.

What do you think of that? That is a pretty vicious proposition. If there is any doubt in anybody's mind as to whether this is going to be a mild experimental proposition, or is going to be enlarged as fully as it may be, listen to this:

To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce.

As I see this thing, it means that they are to spread it as far as they can, to make all the fertilizers they can possibly make, and to cooperate with farm organizations—at least, that is what the measure says—to the fullest extent, and of course do not forget all the time that Mr. John Smith, taxpayer, is paying the bill, and he will find out who is paying it by looking at the lower right-hand corner of his tax bill about one year after this plan is in operation, and it will grow each year after that.

Not only that which I have just read, but they are to cooperate with National, State, district, or county experimental stations or demonstration farms for the use of new forms of fertilizer or fertilizer practices during the initial or experimental period of their introduction.

Heaven only knows how long that will be, because there is no time limit on when the experimental part of it will begin and end. It does not say for 2 years, it does not say for 10 years, but it says "during the experimental period of their introduction."

That could be from now to doomsday, and probably is.

The old seed provision has been revised. We used to have it so we got garden seed that we could sprinkle around at the taxpayers' expense. They used to think that they got it for nothing, but we knew all the time they were paying for it. We are going to revise that now and provide that the board may donate not to exceed 1 per cent of the total output of the plant, so that each Member of the Senate and each Member of the House will get his allotment of fertilizer, and the office buildings will be sending it out in half-bushel sacks to the favored few, and John Smith, taxpayer, will always pay the bill.

The board is also authorized—what do you think of this, Senator from South Carolina?—"to make alterations, modifications, or improvements in existing plants and facilities." What existing plants and facilities? What existing fertilizer plants and facilities? Does it mean the private concerns they were authorized to contract with in the third paragraph, which I read before?

Another thing that they are authorized to do is to establish, maintain, and operate laboratories and experimental plants and to undertake experiments for the purpose of enabling the corporation to furnish nitrogen products for military and agricultural purposes in the most economical manner and at the highest standard of efficiency.

I am very much flattered that the entire Senate is at attention now, with every seat occupied and that I have had hardly any interruptions whatsoever.

Senators, it is a real compliment that at this late hour every seat in the Chamber is filled and that you should be giving me your undivided and complete attention. I trust Senators will not keep up their applause, because I am afraid I will be called to order. [Laughter.]

Those are just a few of the powers the board will have. I believe I neglected to state—probably all of us will remember, but it should be reiterated to impress it on us—that the three men who are to operate the corporation are to be paid $50,000 per year; that is about $17,000 apiece in round numbers that the three men are to get to operate it. Of course, we are only going into it as an experiment. Aside from the agents without number and without limit the suggestion is here made that one of them shall be placed in each and every county as county agent all over the United States. With that scope I think John Smith, taxpayer, will be saying, "I thought you were the farmer's friend, but I have found that you are the farmer's enemy, and I am going to take one of those fellows that has been talking the other way and put him into office and see if my taxes do not come down a little hereafter." That is what he will be saying 5 or 10 years from now if this joint resolution is enacted into law.

Of course, no one can deny, and I certainly shall not, that the resolution is a much better one than we had last night. I heard the Senator from Nebraska [Mr. NORRIS], some time ago when this was first before the Senate, say that he did not believe this plant should be used for fertilizer, that it was not a feasible proposition, but that it ought to be used for power. Then he came back a few weeks after with another proposition, to put the Government into the power business up to the hilt. He went back on everything he had said before. Then, when he could not get the bill through in that shape, what happened? He cut out fertilizer again, so that this is the third proposition we have had before the Senate in relation to the matter. It is just like dealing cards. They come to you and you look them over, and if you do not get two jacks you throw them all away and ask for a new deal.

But of all the propositions in the bill the one that I think is the most atrocious, that has not any fairness in it, that is absolutely out of line with every bit of judicial balance that the Senate should have, is the provision that after all the rates are fixed the Federal Power Commission shall have the absolute and the only say over the rates in a little town in Tennessee.

Let us suppose that the Senator from Louisiana [Mr. BROUSSARD], who has been sitting here all the evening very attentively, had been engaged in the power business for 30 years. Let us suppose he went out with a little capital when the industry was new and hooked up 8 or 10 towns and villages until he had quite a considerable investment. Suppose he had put his profits back in the business and it had gone along until he had quite a little enterprise.

Mr. REED of Pennsylvania. Mr. President, a point of order. I make the point of order that the Senator is not standing.

Mr. TYDINGS. I beg the Senate's pardon.

Suppose the Senator from Louisiana had built up quite a little business. Suppose that after the Senator had built up that business, all contained within the boundaries of the State of Tennessee, Muscle Shoals should come along and I should compete with the Senator, in that I would buy current from the transmission line running from Muscle Shoals to the vicinity of Tennessee that he was serving. Suppose I could buy that current cheaper than the Senator could make it. Suppose through political connections, suppose through my friendliness with the commission or in any other way I could do it—politicians have a way of getting a lot of things—I should get the contract for that power when it came into Tennessee. The Senator's concern would be regulated by the public utilities commission of the State of Tennessee, and my concern would be unregulated by the public utilities commission of the State of Tennessee.

The only concern that could fix the rates on my proposition, inasmuch as I bought from Muscle Shoals, would be the Federal Power Commission, because it is provided that before said corporation shall agree to the resale of such electric power, said person or corporation shall agree to sell to the ultimate consumer of such electric power at a price that shall not exceed the amount fixed as reasonable, just, and fair by the Federal Power Commission.

There is no chance for the State to regulate it—not a chance in the world. What happens to the little municipality down in Tennessee or Louisiana or in any other State? If it does not like the rates, if politics get into the handling of the power, if politics in one section where there is a Republican or Democratic national committman or a man that is close to the commission brings a little bit of an advantage over another one, it means that the community has got to have its case heard, not by the local commission in Tennessee, but that they will have to come all the way to Washington, and the Federal Power Commission will have the case presented here.

Talk about confusion! If this business goes on we will have one half the utilities regulated by the State public-utilities commissions and the other half will be regulated by the Federal Power Commission.

One thing more than anything else that keeps impressing me with more and more force is this: I wonder what John Smith, taxpayer, is going to say when he realizes that this board, which is hereby created, shall have "such powers as may be necessary for the exercise of the powers herein specifically conferred upon the corporation," and what is not specifically conferred no man's imagination can conceive, because everything has been conferred on this board that is conferrable except the manufacture of B. V. D's.

It is provided that upon the requisition of the Secretary of War or the Secretary of the Navy they may manufacture for sale at cost to the United States explosives or their nitrogenous contents. I have no objection in the world to the Secretary of the Navy and the Secretary of War buying a few explosives in time of peace. I only hope the plant is equipped so they can get all they want in time of war. That is what it was provided for. But I doubt if there is ever going to be any more war with all these antiwar treaties and everybody signing them. It is no trouble to break up war. All we have to do is to enact a law. If they would scale down their armies a little more on the other side as well as on this side of the Atlantic, perhaps we could get further toward peace than by antiwar treaties, when, as a matter of fact, every nation in the world, at least every nation in Europe, is armed practically to the war-time standard.

If Tennessee is to lose her rights, I do not know but what next Maryland will have her rights taken away from her. South Carolina will be next in line, and so I might go on, if I were disposed, and call the roll of every State in the Union. But that would be futile. It would not prove anything. It would simply make the evidence cumulative. Then I might take the time to call the roll of the municipalities whose rights would be taken away from them, but even that would not prove anything.

When the fathers brought this country into existence there were some fine provisions in the document which have held us together ever since it was brought into existence. The things that men thought about in those days were the priceless things which mankind has won from time to time, always by terrific struggle, always with great sacrifices, with the bearing of great hardships, hunger, privation, and all the other great barriers that stood between them and a better day. They put into the Constitution, therefore, only the powers to deal with subjects which were essentially national. They did not load it up with a lot of extraneous matters, with a lot of things that had no place or bearing whatsoever. They put in only the essentials. They incorporated into the Constitution a strong framework. They were not worried with ornate details that would weaken it. They wanted it rigid and strong, well shaped and well balanced, because they knew that that would be the only way and the only kind of a Constitution which would endure through the ages.

And so, Mr. President, if we abandon this in part—and it may be wise to abandon it from time to time, as evolution takes place—but to abandon the essentials, to go back on the real fundamentals, would, in my judgment, be a grievous error. In fact, I think we should cautiously approach any change in our form of government. Certainly this joint resolution, if adopted, would change our form of government, because heretofore we have had government for the purpose of government, and now we are to have a government, according to this joint resolution, for the purposes of business. So if our prosperity has not just happened, if we have got to attribute it to something, if we have got to give credit where credit is due, we certainly ought to give credit to that particular philosophy which has made all these things possible.

But we can not always see things alike. I may be wrong; the Senator from Nebraska may be right. I can not see it as he does. He no doubt in his way is trying to bring a better day to the people of this country; but I feel—I may be wrong, and if the joint resolution passes I hope I am—that instead of a step forward we shall be taking a step backward.

It has occurred to me often that more crimes are committed in the name of progress than in the name of anything else of

which I know. Announce a new proposition, say it is progress, and millions will follow you. As a matter of fact, it may be reaction. Nothing could illustrate that philosophy better than to look at the number of religious denominations.

I believe there are 200 different religious denominations in this country to-day. Anybody can start a religious denomination. I can go out on a corner with a certain philosophy, as any other man can do, get a soap box, stand on it and make an impassioned speech, and say I believe this, that, and the other, and it would be very rarely that there would not be a new convert in the audience. Then the converts are organized, and pretty soon there is a new sect. Evangelists quite often start entirely new trains of thought, just as the joint resolution of the Senator from Nebraska is starting a new train of political thought. Of course, no one has a monopoly on being correct, not even the Senator from Texas [Mr. SHEPPARD], much as I admire him. Sometimes perhaps he is in error, and the Senator from Arizona [Mr. ASHURST] occasionally may make a mistake. Therefore, youthful and not well skilled, as I am, in the mazes of parliamentary procedure and the ways of this world, it would only be natural, perhaps, that I may be wrong even at this good hour of 1.20 o'clock of the morning in the latter part of May, 1928. I say that I may be wrong; I do not think I am. Certainly, the country that has adopted this philosophy—that of Russia—is no howling success. It does not compare with out country, not in the slightest way. If it does not compare with our country, why should we adopt its philosophy of government until it demonstrates its success in that undertaking? It seems to me to be most short-sighted to go back, I would say to the Senator from Texas, on 150 years of political philosophy, turn our backs on it all, and throw overboard the very things that have made us great. We create new enterprises to bring wealth to our people, and then, when we get wealthy, we destroy them.

As I have said, take the history of the railroads of the West. People fell over one another to get railroads to come through their State; they gave them very foolishly rights of way miles wide. Railroads came in there and built up communities; and just as soon as the communities started to grow the very people who had begged the railroads to come when the venture was somewhat doubtful turned around and started to abuse the railroads, the very thing that had built up the Nation. Is there any consistency in human souls? Is there any gratitude in mankind? Is there any charity in it? We have consolidation of the railroads going on now; in fact, we are creating monopoly while we are howling against trusts; we have a proposition to create monopolies in one end of the Capitol and are denouncing them in the other; all in the same Congress.

Well, strange things have happened before; but, Senators, seriously—I thank the Senate for its continued attention. The way that the Members have remained in their seats and given me their undivided attention at this late hour has indeed been inspiring, and I want to say that I thank each of the Senators individually and collectively not only for their presence but for the rapt attention which they have given to my poor efforts in the defeat of this joint resolution. I would prefer that Senators would not applaud, but if the Presiding Officer would permit, and the rules would permit, I should not deny them that privilege.

Mr. President, it is too bad that when war descends on a country——

Mr. REED of Missouri. Will the Senator allow me to interrupt him?

Mr. TYDINGS. I am very sorry, but I can not permit an interruption.

Mr. REED of Missouri. I do not want to take the Senator off his feet.

Mr. TYDINGS. I am very sorry, but I can not yield. Much as I should like to yield, I can not do so under the ruling of the Chair.

Mr. HEFLIN. The Senator from Missouri said he did not want to take the Senator from Maryland off his feet.

Mr. TYDINGS. Mr. President, I was saying that war produced many strange things. It was because of war and the necessity for preparing for war that Muscle Shoals was originally built and, for a time, in a small way, operated. It becomes necessary sometimes, and particularly in times of stress, to do unusual things. Of course, in times of peace we never would have given $156,000,000, I will say to the Senator from South Carolina [Mr. BLEASE], to have embarked on an enterprise of this nature. We are now past the war period. We have gone even further back than normalcy. We passed normalcy when Daugherty left the Cabinet, and we have been going back ever since. But, strange to say, even though we have gone further back than a normalcy, we will have gone still further back than we have ever gone to any matter if we shall adopt the communistic, confiscatory principle contained in the joint resolution of the Senator from Nebraska, because no private concern can compete with a Government-operated concern and hope to survive when John Smith, taxpayer, makes up the difference between Government operation from a profitable standpoint and Government operation at a loss. John Smith, the taxpayer, makes it up.

Even though we know that the Shipping Board can not operate profitably, even though we have heard it charged on this floor that the Shipping Board is honeycombed with politics; that it is mismanaged; that it is packed; even though we realize it has not been a success after years and years of trial, we want to put the Government into another business.

Mr. President, I hope those Senators who are always denouncing bureaucracy and the increase of centralization of government and the creation of new boards, commissions, and bureaus will be called to account if they vote for this measure, because if they do, not only will they create a new commission but they will give that commission unlimited power to appoint such officers and employees as may be necessary. By the way, the word "employees" takes in practically everybody who wants to go to work. The corporation to be created can have secretaries, stenographers, traveling men, agents, attorneys, and as many of them as may be necessary for the transaction of its business. It may fix their compensation, define generally their duties, require bonds of them and fix penalties thereof. If there is any kind of business that the corporation to be created under the joint resolution can not go into I have yet to find out what that business may be; in fact, if I read the measure aright, it seems to encourage the employment of numerous agents to go here and there into the various States of the Union and try—

(c) To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce;

(d) To cooperate with National, State, district, or county experimental stations or demonstration farms for the use of new forms of fertilizer or fertilizer practices during the initial or experimental period of their introduction;

(e) The board shall manufacture fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen.

Mr. President, I wish to make one motion and have another pending. I suggest the absence of a quorum; and, pending the delay in getting a quorum here, I move that the Senate recess until 12 o'clock to-morrow.

Mr. LA FOLLETTE. Mr. President, a point of order.

Mr. TYDINGS. A quorum is called for; it can not be debated.

Mr. NORRIS. A quorum can be called for, but the Senator can not do both those things at once.

Mr. TYDINGS (at 1.30 a. m. Friday). I suggest the absence of a quorum; and, pending that, I move that the Senate take a recess.

Mr. NORRIS. When there is not a quorum here, the Senator can not make another motion.

Mr. TYDINGS. Oh, yes. A motion either to recess or to adjourn is in order at all times.

The PRESIDING OFFICER (Mr. DENEEN in the chair). The Senator can not make two motions at the same time.

Mr. TYDINGS. I did not make two motions; I suggested the absence of a quorum; and, pending that, I moved that the Senate recess until 12 o'clock to-morrow.

Mr. HEFLIN. The Senator can not do that, Mr. President.

Mr. NORRIS. When the absence of a quorum is suggested, if the Chair entertains it and it is under parliamentary conditions proper to make it—which I concede that it is now—then it becomes at that instant an impossibility for the Senate to transact any business until a quorum is present.

Mr. HEFLIN. That is true.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dale	Keyes	Sheppard
Barkley	Deneen	King	Shipstead
Bayard	Dill	La Follette	Shortridge
Bingham	Edge	Locher	Steiwer
Black	George	McKellar	Stephens
Blaine	Glass	McMaster	Tydings
Blease	Hale	Moses	Tyson
Bratton	Harris	Norris	Vandenberg
Brookhart	Hawes	Nye	Wagner
Broussard	Hayden	Oddie	Walsh, Mass.
Bruce	Heflin	Pine	Walsh, Mont.
Copeland	Howell	Pittman	Waterman
Curtis	Johnson	Reed, Mo.	Wheeler
Cutting	Kendrick	Reed, Pa.	

The PRESIDING OFFICER (Mr. CUTTING in the chair). Fifty-five Senators having answered to their names, a quorum is present.

Mr. BLEASE. There are gentlemen in this body, and gentlemen all over this country, who believe that Abraham Lincoln was a great man. There was an address, delivered by Paul S. Whitcomb, of Gladstone, Oreg., on Lincoln and Democracy, which is very appropriate to the discussion before the Senate to-night. He says:

Nothing so intrigues the mind of the people of the Northern States of the American Republic as the personality of Abraham Lincoln and the imperial American Union. For 62 years the crescendo of laudation of Lincoln has been steadily rising, and the end is not yet.

That part of this address the Republicans will enjoy. A little later they will get some that will not make them quite so jubilant—

For Lincoln was the central figure and the dominating personality in one of the greatest wars of history, and, in spite of all the theories of democracy, nothing so appeals to the emotions of men, which are the wellsprings of eulogy, as martial and imperial glory. People are not given to repudiating the wars they wage or those who lead them into war. Lincoln himself was retired from Congress for eight years because of his opposition to the Mexican War.

It is an interesting question as to what Lincoln's place in history would have been if there had been no Civil War with its lurid glow to silhouette his eccentric personality for future generations. At the time of his election to the Presidency he was scarcely more than a local character. He had served in Congress without rising above mediocrity. He had played fast and loose with the questions of slavery and secession without contributing anything original or constructive to the discussion, and what he said only served to further agitate the South and to so compromise his own public position as to make secession inevitable when the black Republicans came into power.

He has been called a great thinker, but his attitude toward both slavery and secession was at once doctrinaire and the result of mechanistic logic which failed to recognize the distinction between the laws of physical science and the laws of human action. With regard to the slaves, he appealed from their legal status to the "higher" law, but with regard to secession and the rights of the free and highly civilized white people of the South he argued their rights on the basis of those maxims of despotism which were invented for the express purposes of denying to the people their rightful liberties. He argued that the principles of the Declaration of Independence applied to the negro, but denied that they applied to the free white inhabitants of the States in whose favor they were originally promulgated. He failed to discern that the independence of the slave and the independence of the States involved the same fundamental principle, that the right of secession was absolute and unqualified and no more required oppressive acts to justify it than did the right of the slave to secede from his master. He failed to see that those same class of arguments which denied freedom to the South also denied freedom to all men "and undermined the very foundation of free society."

The indiscriminate and uncritical eulogies which have been heaped upon Lincoln have been pronounced in the face of all but the most superficial facts and as though all the rest of the world was composed of brutes, knaves, and fools. There is no evidence that Lincoln was any more honest, kind, accommodating, or sagacious than the ordinary run of men. His waging of the Civil War was the very antithesis of common sense and statesmanship. There was no catastrophe potential in the secession that in any way justified the waging of the war, viewed simply as a matter of State policy, without reference to the moral and humane aspect of the war. It was one of the most colossal bankruptcies of common sense and humane statesmanship known to modern history. As the situation stood in 1860, it were better for the North and the South both that they should separate. The prosperity which followed in the wake of the Civil War was not due to keeping the South in the Union, but to the development of the West. But even if it was, it is a Prussian, and not an American, doctrine that war is a legitimate agent of national progress, that the end justifies the means. We have no right to do evil that good may abound.

Lincoln has been acclaimed the great democrat, yet the greatest act of his career was the very antithesis of democracy. Washington was infinitely the greater statesman and a greater democrat. Robert E. Lee was greater in all-around character. It has been too readily assumed that lowliness of birth is evidence of greater democracy. But the man of lowly birth can be no more than a democrat and it is no particular credit to him that he is. But the man of aristocratic birth, who has the privilege and opportunity of being more than a democrat, and yet who remains one, not only in simulation but at heart, can truly claim the title of being a great democrat. The purpose of democracy is not to drag the few down, but to lift the many up. It is not to make all common, but to make all aristocrats, to diffuse the benefits of culture and good breeding throughout the community. And Washington, who was an aristocrat by birth, because of the largeness of his heart and the breadth of his character became the first democrat through choice and affection. Never can it be truthfully charged against the man who subordinated the military to the civil through seven long miserable, heart-breaking years of revolutionary struggle and at the finish scornfully spurned a crown, that he was lacking in all the great qualities of a democrat. [It is a remarkable confirmation of this character in Washington that Col. Landon Carter, of Sabine Hall, Va., used the following language on May 3, 1776, before Washington had been called to the command of the American armies: "I never knew but one man who resolved not to forget the citizen in the soldier or ruler, and that is G. W., and I am afraid I shall not know another."—Editor.]

While Lincoln said that the question of union or disunion could only be settled by war, and ridiculed those who decried force as a legitimate and lawful means of maintaining the Union, arguing that "their idea of means to preserve the object of their great affection would seem to be exceedingly thin and airy" and compared them to free lovers, Washington said, "Let us erect a standard to which the wise and the just can repair—the result is in the hands of God"; and of the accomplished Union he said that it was "the offspring of our own choice, uninfluenced and unawed, adopted upon full investigation and mature deliberation, completely free in its principles." Washington based the Union upon the democratic principle of free consent. Lincoln ridiculed the basis of democracy, spoke of it as exceedingly thin and airy, likened it to a free-love arrangement, and asserted that force was the only sound basis of government. He appealed from the basis of democracy to the basis of despotism, from the ballot to the bullet. The Civil War was the result of the putting the new wine of democracy into the old skins of despotism.

Lord Morley has said that "where it is a duty to worship the sun it is pretty sure to be a crime to study the laws of heat." It was Webster who held up the Constitution and the Union to the idolatrous worship of the American people like the Israelites worshiping the product of their own handiwork in the wilderness. The humanitarian ends of the Union have been deliberately pushed out of view and, like as a modern Moloch, it has been declared that its vanity of sovereignty could be satiated only by human sacrifices. The wrong of empire is not in the fact of empire, but in the method by which it is attained, a principle that the American people have lost sight of.

The responsibility for the Civil War has been laid at the door of the South on the grounds that they fired the first shot against Fort Sumter. But the grounds beg the question and the responsibility for the war must await the determination of the question as to whether or not the South had a right to secede. If South Carolina had a right to secede, she had the right to take Fort Sumter. Lincoln's policy in sitting tight and forcing the South to make the first move was identical with that of Bismarck. "Success," Bismarck said, "essentially depends upon the impression which the origination of the war makes upon us and others; it is important that we should be the party attacked."

But the attack of South Carolina upon Fort Sumter was not an attack upon the North in any such a sense as the attack which Bismarck maneuvered an all too willing Napoleon into making upon Prussia.

Fort Sumter was historically and geographically an integral part of the soil of South Carolina. It was there, as Lincoln said in his special message to Congress, for the protection of the people of South Carolina. It was an integral and vital part of their system of common defense. It symbolized the right of these people to defend themselves, a right which is basic to all other rights and which is the very test of manhood. Deny a man or a group of men the right to defend themselves and you deny them all other rights, for what a man has not the right to protect it can not reasonably and intelligently be argued he has a right to at all.

Fundamentally and vitally the fort belonged to the people of South Carolina. The site of the fort had been ceded to the Federal Government for the protection of the city of Charleston, and the moneys with which the fort had been constructed were drawn by taxation from the people of the States by methods to which all the States had agreed in ratifying the Constitution. South Carolina had contributed her share and was morally entitled to a division of the common property. As to the legal phase of it, there was none, for there was no law governing the subject, regardless of the fact that no technical, legal grounds can justify such a social catastrophe as war. War defeats the very end of law and government, which is the conservation of human values.

In spite of the persistent attempt, carried on through school histories and by partisan historians in general, to brand the people of the South in general, and of South Carolina in particular, as so many hell-bent hot-heads, the fact is that the secession movement was done "decently and in order." They did not wantonly and in undue haste fire upon Fort Sumter. They sent a commission to Washington to negotiate a peaceful settlement of all questions arising from secession. The assertion that secession was an essentially warlike act was a Federal doctrine and not a southern doctrine. It was not until this commission had been snubbed on the narrow, childish legalism that the people of the South had no right to speak for themselves that the people of South Carolina took the only other course open to them and asserted their rights by force of arms. [This does not state the full case. Not only were commissioners snubbed and denied audience, but no attack

took place till Lincoln sent an armed squadron to supply the fort with men and provisions. On this very question he took the advice of his Cabinet, on March 15, 1861, and only one of them favored the movement. The rest in effect declared that the measure would inaugurate civil war, and it must be remembered that Mr. Hallam in his Constitutional History of England states that "the aggressor in a war is not the first who uses force, but the first who renders force necessary."—Editor.]

In general principle the right of the people of South Carolina to dispossess the Federal Government of Fort Sumter involves no more than the right of any property owner to discharge a watchman hired to protect his property. The Federal Government had no more reasonable or moral right to wage war against the people of South Carolina and destroy their lives and property than a discharged watchman would have to destroy the property he was hired to protect. The authority of government is not an end in itself but a means to an end. The attempt to give to civil authority a special extra moral status is without ethical or social warrant and is simply one of the superstitions invented by despots as a means of awing the people and maintaining themselves in power.

Unionists would deny that two times two makes four if it were necessary to vindicate the Civil War. To them no statement of principle is valid in favor of the independence of the South and against the war. Secession itself is a true principle when exercised in favor of the Union, as Lincoln declared in the case of the secession of the 49 counties of old Virginia.

The issues involved in the Civil War were not of concern solely to the generation which fought the war but are questions of eternal right and wrong and are subject to the law of Lincoln's doctrine that no question is settled until it is settled right. The objection that the war is water over the dam and that the problems of the present demand our attention is valid, providing that history is all bunk and that there is nothing to learn from our past. But the problems of the present are largely the legacy of the past, and if the past had settled them right they wouldn't confront us at the present time.

It has only been since the late war that an English Premier has quoted the arguments of Lincoln against secession as an answer to the principles of the Declaration of Independence as put forward in defense of the right of the Irish to freedom. And the struggle of Ireland for freedom antedates our Revolutionary War by a century and a half and involved and involves the same questions.

It is thus that our past rises up to meet us and, as Lincoln said of slavery, "deprives our republican example of its just influence in the world." Lincoln ridiculed Douglas's doctrine of squatter sovereignty as the principle that if one man chooses to enslave another, neither that man nor any third man has a right to object. In setting up the sovereignty of the Union as a basis for making war against the seceding States and as a fence against European interference he was acting upon the same principle that if one man chooses to kill another, neither that man nor any third man has a right to object. The logic of the Civil War was that the right to govern is paramount over the right to live; that man is made for government, rather than that government is made for man; and that for men to claim the right of self-government is to deserve and incur the death penalty.

Lincoln's arguments against the right of the South to independence were drawn from baseless exaggerations, the fatalistic sequence of mechanistic logic, an imperial and authoritarian interpretation of the Constitution which ignored its humanitarian purpose, a strange hodgepodge of the maxims of monarchial political science, and an instinctive metaphysical attitude toward government.

Lincoln said of slavery that it was the only thing that endangered the perpetuity of this Union, and that it was the sine qua non of secession, but from the constitutional and historical standpoint this is not true. Slavery, as he admitted, was, "indeed, older than the Revolution." It existed previous to the Constitution and the Union was formed in spite of it. Both from the standpoint of the Constitution and sound statesmanship it was not slavery but the intemperate fanatical abolition movement that endangered the Union.

These abolitionists proposed to apply all the principles of the Declaration of Independence to a race of people that were totally unprepared for self-government. They did not possess as much capacity for self-government as a well-bred 10-year-old white child, and in the abstract slavery is no more a crime than is the status of a child before becoming of age or than is our government of the Filipinos. Undoubtedly there were abuses in the slave system, but there have been as great abuses in the northern system of "free" labor and in the relation of parent to child. There have been as great or greater abuses in the relation of the English to the Irish or in the relation of the white man to the Indians. The singling out of slavery as a unique crime is without justification.

In his temperance address he made some remarks that apply equally to the reaction of the people of the South to the abolition agitations. Of the temperance reformers, he said, "Between these and the mass of mankind there is a want of approachability, if the term be admissible, partially, at least, fatal to their success. They are supposed to have no sympathy of feeling or interest with those very persons whom it is their object to convince and persuade," and admonishes them that "if you would win a man to your cause first convince him that you are his sincere friend." Of their methods, he said, "Too much denunciation * * * was indulged in. This, I think, was both impolitic and unjust. It was impolitic, because it is not much in the nature of man to be driven to anything." When the dramseller and drinker were incessantly told—in the thundering tones of anathema and denunciation with which the lordly judge often groups together all the crimes of the felon's life—that they are the authors of all the vice and crime and misery in the land—it is not wonderful that they were slow—to acknowledge the truth of such denunciations, and to join the ranks of their denouncers in a hue and cry against themselves—

"To have expected them to do otherwise than they did—to have expected them not to meet denunciation with denunciation, crimination with crimination, and anathema with anathema—was to expect a reversal of human nature."

It was the intemperate, arrogant, self-righteous, and academic attitude of the abolitionists that made any constructive solution of the slavery question impossible and forced the South to withdraw from the Union.

The southern people were dealing with a fact rather than with philosophical abstractions, and freedom was no more a solution of the slavery question than it is the solution of the problem of backward races in general. The first need of a backward race is discipline rather than liberty. They, like a child, must first learn to use their liberty, without which it will be but anarchy. This is the only real excuse for keeping the Filipinos under present duress.

Labor is the greatest disciplining agent known, and there was no particular crime in taking ignorant, superstitious savages and putting them to work. The negro through slavery was trained to efficiency, and it is certain that under free conditions he has relapsed and lost much of this efficiency, as any southern man will assert.

The relation of slavery to the Civil War may be illustrated by drawing a hypothetical case of a man driving home to dinner. On his way he is arrested on a charge of speeding. It would be as correct to say that driving home to dinner is the indispensable condition of getting arrested for speeding as to say that slavery was the sine qua non of secession. As a matter of historical fact, South Carolina had threatened to secede over the tariff. The Colonies seceded from Britain over a question of local self-government. Belgium seceded from Holland and Norway from Sweden, where no question of slavery was involved.

The attempt to prejudice the question of secession by linking it with slavery is but an effort to cloud the issue. They both involve the same basic philosophical principle—the right of men to govern themselves—and slavery can be defended by the same argument which Lincoln used against secession, and, as an abstraction, it is true, as Lincoln said "that the class of arguments put forward to batter down that idea (that the principles of the Declaration of Independence applied to the negro) are also calculated to break down the very idea of free government, even for white men, and to undermine the very foundations of free society." But in a practical way if free institutions depended for their perpetuation upon the self-governing ability of the negro, they would never have been heard of. To argue the rights of men in favor of the negroes was as silly as to argue the rights of a strong man in favor of an invalid.

Lincoln said of secession that it was the destruction of the country, of the Union, of the Nation, and of the liberties of the people and of the institutions of the country. He said, "We have, as all will agree, a free Government, where every man has a right to be equal with every other man. In this great struggle, this form of government and every form of human right is endangered if our enemies succeed." The argument was absolutely senseless. One would think to read the argument that some Napoleon, Cæsar, or Alexander the Great were attempting to conquer the southern people and set up a despotism, and that Lincoln was waging a war in aid and defense of those people, rather than that those people were seeking to do nothing more than govern themselves and that Lincoln was warring to conquer them, to keep them from exercising their rightful liberties.

The secession of the Southern States from the Union was no more the destruction of free political institutions than the secession of the southern Baptists or the southern Methodists was the destruction of free religious institutions. It was no more the destruction of political liberty than the secession of the southern Baptists and Methodists from their northern brethren was the destruction of religious liberty.

Secession was not in any substantial sense the destruction of the Nation, nor was it in a proper sense the destruction of the Union. Lincoln apparently was arguing from the viewpoint that a nation is a moral entity, a theory that has no rational basis. A nation is no more a moral entity than is a denomination or any other human organization. A nation is not an end in itself; it is simply a means to an end, the vehicle of civil government. The purpose of government is no more to form a nation than the purpose of religion is to form a denomination, or than the purpose of labor is to form a labor union.

In so far as the principle of government itself is concerned, it is universal in its application. There is as much need for government

between a Canadian and an American or between a German and an American as there is between a New Yorker and an Oregonian. The idea of the sovereign State or Nation has no philosophical basis as at present applied.

True sovereignty resides in the individual, and the purpose of civil organization is to protect him in the exercise of his legitimate sovereignty while at the same time restraining him from trespassing against the legitimate sovereignty of his fellows. Government is the cooperative exercise of the personal right of self-defense, and the basis of its authority is the right of the individual to restrain any who trespass against his rights. A New Yorker possesses no more right to govern an Oregonian that he does to govern an Englishman, and the theory of United States sovereignty is purely an imperialistic dogma.

A nation is simply a corporation through which men exercise certain of their rights, just as they exercise other of their rights through their other organizations. Political rights are not sovereign over other rights but are ancillary to them. Their importance is but the reflected importance of those rights which they protect.

Nationalism is an attempt to isolate and insulate an interest in society, and political nationalism is no more a correct principle than economic, religious, or social nationalism would be. As the purpose of civil society is to protect men in the exercise of their religious, economic, and general social rights, political organization should be coextensive with those social contacts which make government necessary.

The purpose of political organization is not to lift man above the moral law but to give social adherence to the moral law. Men possess no right to make war through their civil societies under any other conditions than would give them the right to protect their religious, economic, and social rights in general. If secession is the essence of civil disintegration, it is no less the essence of religious, economic, and social disintegration. Organization in these spheres is as vital to society as it is in the civil sphere, and in fact more so, for these constitute the vital, constructive activities of man. If political secession can not be allowed, if modern society can not exist upon such a principle, and if the state is justified in making war to prevent secession, then it is no less its duty to deny the right of secession from all organization and establish society throughout upon a basis of authority.

Secession did not destroy the Nation but merely altered its political form. All the vital human values remained intact and, as Beecher has said in his oration on "Man and his institutions," "Man is the primary power and the supreme value." Neither did secession destroy the Union, although, as a matter of reason, the States that created it have the right to destroy it. As the Apostle Paul said, the potter has power over the clay and, as he said of his apostolic authority, so it may be said of the authority of the Union that it was made for the building up and not for the casting down of the States. But the Union existed when there were only 13 States composing it, and it would have continued to exist when there were 20 States left with a boundless public domain.

As for the liberties of the people, all their liberties would have remained intact, and in arguing of secession as the loss of our liberties Lincoln was unintelligently parroting Washington, who described the Union as the palladium of our liberties. But he had in mind the preservation of the liberties of each State as against the aggression of the other States no less than the preservation of the liberties of all against the aggressions of European states. Furthermore, in spite of the gravity of the situation as it existed in 1789, Washington never proposed to use force to compel a Union. He recognized it as the precipitation of one of the very evils they were attempting to guard against and as a violation of the principles of the Revolution.

The idea of liberty as used by Washington, Webster, and Lincoln was of political liberty—the right of self-government. It is the fundamental purpose of all just government—the maintenance of the just liberty of the individuals. In his Missouri compromise speech Lincoln said: "I trust I understand and truly estimate the right of self-government. My faith in the proposition that each man should do precisely as he pleases with all which is exclusively his own lies at the foundation of all the sense of justice there is in me. I extend the principle to communities of men as well as to individuals. I so extend it because it is politically wise, as well as naturally just; politically wise in saving us from broils about matters which do not concern us. The doctrine of self-government is right—absolutely and eternally right—but it has no just application as here attempted. Or perhaps I should rather say that whether it has such application depends upon whether a negro is not or is a man.

"If he is not a man, in that case he who is a man may as a matter of self-government do just what he pleases with him. But if the negro is a man, is it not to that extent a total destruction of self-government to say that he too shall not govern himself? When the white man governs himself that is self-government, but when he governs himself and also governs another man that is more than self-government—that is despotism. If the negro is a man, why then my ancient faith teaches me that 'all men are created equal,' and that there can be no moral right in connection with one man's making a slave of another." Again he said, "What I do say is that no man is good enough to govern another man without that other's consent."

No argument could give any stronger support to the right of secession than this argument in favor of freedom for the slave. If the inhabitants of the Southern States are men, is it not to that extent a total destruction of self-government to say that they shall not govern themselves? When the people of the North govern themselves that is self-government; but when they govern themselves and also govern the people of the South, that is more than self-government—that is despotism.

In a letter to a subordinate officer Sherman said, "It is all idle nonsense for these southern planters to say that they made the South, that they own it, and that they can do as they please"; and previously he said, "I think it does good to present this view of the case to many southern gentlemen, who grew rich and wealthy, not by virtue alone of their industry and skill, but by reason of the protection and impetus to prosperity given by our hitherto moderate and magnanimous Government."

The real force of Sherman's argument, and of many of Lincoln's, is an insidious, implicit hypostatization of "government" which is difficult to get a hold of because it never breaks into formal statement. The implicit idea is that of "government" as something begotten, not made; as an exotic being possessing authority and rights underived from men, subsisting, perhaps, by divine right. But the democratic idea of government is that of men cooperating together for the common benefit of each, or, as Lincoln defined it, "government is a combination of the people of a country to effect certain objects by joint effort." It is not a moral entity, but is rather in the nature of a corporate entity based upon the principle of organized cooperation. Governments do things for the people only in the sense that any organization does things for its members. Like all organizations it is simply a device through which men do things for themselves.

Sherman's argument was in reality based upon the feudal system involving the relation of lord and vassal and of alodial title and usufructary right, a system involving principles absolutely incompatible with democracy, which is a society of equals. A democratic government is neither a feudal lord or a sovereign monarch dispensing benefits to its people and demanding allegiance in return. Man no more owes allegiance to his political institutions than he does to his economic, religious, or social institutions or organizations, or to any other device which he creates as a means of furthering his comfort, happiness, and prosperity.

The negro was the beneficiary rather than the victim of slavery, as Booker T. Washington has admitted. Lincoln's talk about "unrequited toil" ignores the fact that the condition of the negro was better under slavery than it was in Africa, it ignores the fact that as compared to white laborers of equal mentality he was not deprived of any substantial rights, it ignores the economic and social status of northern so-called "free" labor which bordered closely upon serfdom, and it ignores the contribution of management to production. The strong probability is that the negro received at least as great a share, in proportion to what he contributed to production, as did the technically free northern laborer.

In any event civil war was no more a legitimate remedy for slavery than were the reputedly revolutionary methods of the I. W. W. a proper remedy for the wrongs inflicted upon free labor by northern capitalists.

Sherman's assertion that "the United States, as a belligerent party claiming right in the soil as the ultimate sovereign, have a right to change the population; and it may be, as is both politic and just, we should do so in certain districts," is contrary to every principle of democracy and just government. It is an assertion that man exists for government and that the right to govern is derived from the soil.

Neither is there any constitutional basis for the assertion, for the Federal Government can not, under the Constitution, exercise exclusive legislative jurisdiction over the site of its own capital or of forts, magazines, and other public buildings without first getting a cession from the legislature of the State in which the site is situated. To call such a government a territorial sovereign is absurd.

If the people of the South do not own the soil on which they live, then the people of the North do not own the soil upon which they live, and no people can own the soil on which they live. The idea of territorial sovereignty as applied to democracy becomes the principle of communism.

In the same letter Sherman said: "The southern people entered into a clear compact of government—" and in his first inaugural address Lincoln said: "I hold that in contemplation of universal law and of the Constitution the Union of these States is perpetual. Perpetuity is implied, if not expressed, in the fundamental law of all national governments. It is safe to assert that no government proper ever had a provision in its organic law for its own termination. Continue to execute all the express provision of our National Constitution, and the Union will endure forever—it being impossible to destroy it except by some action not provided for in the instrument itself."

The argument views States simply as political abstractions. It ignores "States" as denoting an organization of men. It assumed

that there is some authority capable of making a contract binding upon all generations of men which shall, throughout the course of time inhabit a certain territory. It assumes that a few hundred thousand voters living along the Atlantic seaboard a century and a half ago possessed authority over all generations of men which may throughout the course of time inhabit all the country from the Atlantic to the Pacific seaboard.

The southern people of 1860 had never entered into "a clear compact of government." It is true that a generation of men previously inhabiting the same territory had done so, but that was not their affair. One generation possesses no such authority over future generations. My great-grandfather could no more impose his political institutions upon me than he could impose his religious and economic institutions upon me.

The generation that ratified the Constitution possessed far more right to extend its jurisdiction horizontally over all contemporary peoples than vertically over generations yet unborn. They possessed some concern in the conduct of their contemporary peoples. Those peoples were in a position to injure their rights. But the conduct of future generations was of no moral concern to the generation that ratified the Constitution, and they could not extend its jurisdiction to them. They could leave it to them just as they do any other institution or property.

Political theorists may call this anarchy, but they take their theories too seriously. Men do not maintain government because their granddaddy said they should any more than they live in houses or eat three square meals a day or go to church because their granddaddy said they should. Political theorists habitually assume that the people are straining at their leash to fly into anarchy and that they must invent some theory to prevent such a catastrophe. But to assert and maintain that the living generation has complete power over its political institutions is no more to imply that they will fly into anarchy than to admit that men could, if they so willed, stop eating to imply that they will do so and starve to death. The historical enemy of social order has not been any anarchial disposition of the people but the despotic disposition of government. There are no grounds whatever for the assertion of an American general that "If for one moment you remove force as the mainstay of government, that moment the civilization of 2,000 years disappears like an exploded soap bubble."

The assertion is a denial of the fundamental assumption of democracy, that the people possess the ability to govern themselves, and is a retreat to the basis and philosophy of despotism. In some notes on government Lincoln said: "Most governments have been based practically on the denial of the equal rights of men, as I have in part stated them; ours began by affirming those rights. They said some men are too ignorant and vicious to share in government. Possibly so, said we; and, by your system you would always keep them ignorant and vicious. We proposed to give all a chance; and we expected the weak to grow stronger, the ignorant wiser, and all better and happier together."

In asserting that if we continue to execute all the express provisions of the Constitution that the Union will last forever, Lincoln asserted no more than is true of any institution whose charter runs in perpetuity. But the assertion contains no argument against secession. Theorize, as men will, with regard to the basis of government it must conform to rational and moral reasoning, and there is no rational and moral reasoning to support the assumption that one generation can bind another generation in any such a way as is implicit in Lincoln's interpretation of the idea of perpetuity as applied to the Union. Many institutions are chartered in perpetuity, but that does not imply a perpetual obligation of membership but simply that it continues at the pleasure of its members without the necessity of renewing its charter at the end of a specified term of years. Such a theory of perpetuity as propounded by Lincoln is no more necessary to the continuity of civil society than it is to the continuity of any of the other equally necessary activities of man.

Lincoln neglected to draw the distinction between the right to dissolve an organization and the right to withdraw or secede from it. The one is a right which belongs to the members as a whole while the other is a right inherent, if not expressed, in the laws of any organization except as membership therein partakes of the nature of a contractual obligation involving a consideration. But the Union is not of such a nature, and there is no authority by which such a perpetual obligation could be established. Lord Blackburn, an English jurist, has reasoned that to deny a stockholder the right to sell his shares and withdraw from a commercial corporation is tantamount to confiscation. The reasoning is sound and applies with equal force to membership in all organization. In fact, the assertion of the sovereignty of the United States is but an assertion that the rights of the States have been confiscated.

In arguing that secession was the essence of disintegration and anarchy, Lincoln asked, "Why may not any portion of a new confederacy arbitrarily secede again?" "Is there such perfect identity of interests among the States to compose a new union as to produce harmony only and prevent renewed secession?"

"Plainly the central idea of secession is the essence of anarchy. A majority held in restraint by constitutional checks and limitations is the only true sovereign of a free people."

In all of his public statements after receiving his election Lincoln attempted to create the impression that the secession movement was "altogether artificial" and a hastily blown-up cloud out of a clear sky. Any candid and competent student of the secession movement knows that there was a community of interest between the Southern States on the question at issue, that the question had been discussed for 20 years, and that it was not a hasty or arbitrary movement on the part of the South. Lincoln apparently didn't dare to approach the situation on a basis of candor and frankness, but sedulously shoved realities into the background and bent his efforts to exaggerating the effect so as to make it appear arbitrary, absurd, and anarchial. Grant has admitted in his Memoirs that if the Southern States had been allowed to secede they would have set up a government that would have been real and respected, and the assertion that secession was the essence of anarchy was purely academic. It is no more the essence of anarchy than the essence of all liberty is anarchy, or than the essence of government is despotism or of war is extermination, or than the essence of discharging a governmental official is to discharge all officials and arrest the processes of government, or than the essence of shaving is to cut one's throat.

Guizot has said in his History of Civilization that nothing tortures more than logic. No sooner does the human mind seize upon an idea than it draws from it all its possible consequences; makes it produce, in imagination, all that it would in reality be capable of producing; and then figures it down in history with all the extravagant additions which itself has conjured up.

It was by such mechanical thought processes as are here described by Guizot that Lincoln arrived at his conclusions which attack the basic assumption of free government. The criterion of free government versus anarchy is not logic, but judgment, discretion, and stability of character. The essence of secession is not anarchy, but freedom, independence, and nationalism.

Lincoln asserted that "All who cherish disunion sentiments are now being educated to the exact temper of doing this (continuous disintegration)." He could have better argued that all who cherish warlike sentiments are being educated to the temper of conquest. His argument that secession was the essence of anarchy and that the movement could end only in the complete disintegration of society is answered by his own words that "Happily, the human mind is not so constituted."

But while the central idea of secession is not the essence of anarchy, war is anarchy. "It is the essence of war to summon force to decide questions of justice—a task for which it has no pertinence." War is not a true function of civil government. It is, as Guizot has said, the destruction of society itself. War is the absence of civil government. If it is treason to overthrow an established government, it can be no less treason to refuse to establish a government, and if governments are to keep faith with their own claims and principles, they must bend every effort to conduct their relations upon the principles of peace and to extend the sphere of organized government so as to encompass the world.

His assertion that a "majority, held in restraint—is the only true sovereign" is paradoxical. A sovereign can not be held in restraint. Majority rule is a political device that has no moral basis. It constitutes a trust, not a sovereign right. President Coolidge has said that "One with the law is a majority," which simply means that one, with the right on his side, has the right to govern. There is no majority or minority in rights. The essence of government is not in the making of laws but in the application of them. Law is an impersonal thing. According to the truth, as the law sees it, the courts will restrain all the people of the United States in favor of one man with the right on his side. Justice and equity alone have the right to govern, and it is only as a majority may better discern truth and justice that they possess any right to govern. According to the principle of majority rule, Lincoln had no right to his office, for he was elected by a plurality, not by a majority, and there are no consistent constitutional safeguards thrown around the principle of majority rule.

Lincoln asks, "Can aliens make treaties easier than friends can make laws?" What is a friend but an alien? Must people join our Federal Union in order to be our friend? Are not Canada and England, Germany and France to be regarded as our friends or may they not be if they so will, without joining the Union? The issues which Lincoln created were utterly fictitious. After being brought up to the idea that the southern leaders were so many hasty hotheads, it is disconcerting to read in the speeches of their real leaders the fairness, calmness, and friendliness with which they faced the situation. And this attitude was not only in their speeches but in their actions as well. They took only those measures which any people who had determined upon their course, would have taken as a matter of good judgment and precaution.

Lincoln asked, "Why should there not be a patient confidence in the ultimate justice of the people?" and again, "Will you hazard so desperate a step while there is any possibility that any portion of the ills you fly from have no real existence?" He had better have asked why he should not have a patient confidence in the ultimate justice of the southern people and why he should hazard so desperate a step as war while there was any possibility that the evils of secession had no real

existence. He had said of the southern people that in point of justice he did not consider them inferior to any people and that devotion to the Constitution was equally great on both sides.

The South in seceding did not take anything that by any moral principle belonged to the North, and if the Civil War is to be justified, either upon policy or principle, it must be upon a showing that secession was an invasion of the rights of the people of the North that justified the taking of human life. [The New York Times, in a remarkable editorial September 9, 1864, justified the war not on slavery or the restoration of the Union, but on the threatened danger to the northern people. It passed a tremendous eulogy on the resistance which had distinguished the southern people beyond any in the world, rendering their conquest absolutely necessary, lest in the future the northern States themselves might become subject to their terrible neighbors. In other words, the more evidence the southerners gave of their right to self-government, the more it was denied to them.—Editor.] No abstract, highly synthetic, and controversial theories of sovereignty can justify the taking of human life.

Man acting gregariously possesses no other right to take life than is possessed by the individual. Murder is murder, whether it is committed by 1 man or 20,000,000 of men, and the empiricisms of political so-called "science" constitute no authority for murder. The idea that a "nation" can commit murder in order to achieve a fancied destiny is the essence of immorality and imperialism. "Morality is the nature of things," and the highest destiny of a "nation" is to live true to moral principles. Lord Morley has said that "those who divorce politics from morality will understand neither the one or the other." The purpose of civil organization is not to place man above the moral law but to give public sanction to moral principles.

Lincoln said: "This country, with its institutions, belongs to the people who inhabit it. Whenever they shall grow weary of the existing Government they can exercise their constitutional right of amending it or their revolutionary right to desmember or overthrow it." His theory was that the territory of the United States belonged to the people as a whole as sovereign proprietor. That the soil of South Carolina did not belong to the people of South Carolina, who inhabit it, but to the people of the United States as a whole. Sherman expressed the principle when he spoke of "the United States—claiming rights in the soil as the ultimate sovereign." According to the principle the individual only holds a transferable usufructary right in the soil, what is known as the alodial title being held by the community as a whole.

The theory is a legacy from feudalism and monarchy, and as applied to a republican union or state is the essence of communism. Both feudalism and monarchy were systems which involved the relation of inferior and superior, of subject and sovereign, but in democracy there is no such relation, in spite of the persistency of the ideas and terminology of caste systems. Democracy is an association of equals.

Under monarchy or feudalism the title to both person and property ultimately resided in the monarch or lord. It was this principle which was the cause of the War of 1812, when England asserted that once a subject always a subject, just as Lincoln claimed that once a State in the Union always a State in the Union.

The right of expatriation, which is simply a right of personal secession, is an acknowledged American right, and has been ever since Marshall sat upon the Supreme Bench. We fought for it in the War of 1812 and incorporated it in the Burlingame treaty with China. This right is absolutely inconsistent with the description of the southern peoples as rebels and traitors and the calling of them to return to their "allegiance" to the Federal Government. The idea of "allegiance" is that of the relation of an inferior to a superior and not of the citizens of a republic to their republican society.

Certainly there is a territorial consideration in the formation of civil society, but that consideration is born of practical necessity and must end with the necessity. A seceding individual could not be allowed to move his real estate from the jurisdiction of the State. Society, however, allows the individual all the liberty in this respect consistent with social organization—it allows him to dispose of his real estate and take its value in other commodities with him.

But no such consideration was involved in the secession of the Southern States. They were as able to govern themselves as were the people of the North or of England or of France or any other state.

There are, however, no constitutional grounds for the pretense of territorial sovereignty on the part of the United States Government. It is no more sovereign over the territory of its members than a farmers' cooperative is sovereign over the farms of its members. The term "sovereign" is nothing but a high-sounding name for the right to manage or to govern, as it is called by political writers. The Government of the United States is simply the joint and common agent of the States, members of the Union, just as a farmers' cooperative is the agent of its members. The basic principles involved in the union of States are the same as those involved in the agricultural cooperatives. And, as I have previously observed, the United States can not under the Constitution exercise exclusive legislative jurisdiction over the site for its own capitol, or the sites for forts, dockyards, or other needful public buildings without first getting the consent of the legislature in which the site is situated. To call such a government a territorial sovereign is absurd.

Grant argued that the Union had the same right to defend itself that a natural person has, but who ever heard of a natural person defending itself against its different members? It is to argue that as an arm is to the body, so is a State to the Union, and that in itself possesses no more rights than an arm by itself does. But civil society carries no such implication. The people of South Carolina possess exactly the same natural, moral, and fundamental rights as against the people of the State of New York that the people of Canada do.

Lincoln spoke of the people as possessing a revolutionary right, but such talk is to deny their sovereignty and imply the sovereignty of the Constitution. Revolution is the overthrow of the sovereign not of the Constitution or of the Government. The people do not derive their sovereign authority from the Constitution. It is not the Constitution of the people but of the Federal Government, and is also the record of a compact between the States.

Lincoln admitted that the Government could be overthrown and the Union dismembered, but there is scarcely an argument he used that is not as valid and forceful against disintegration by the authority of the whole people as by the authority of the individual State. Anarchy is a fact, not a theory, and it is not concerned by the method by which it arrives, whether by secession, by authorized withdrawal, or by revolution.

The political doctrine of the right of revolution is simply an empiricism based upon historical events and the result of the passion of political theorists for what they term "legitimacy." In principle it is nothing but the medieval judicial principle of trial by combat. A successful rebel becomes a revolutionist and his success vindicates his rebellion. If he fails to succeed he is the greatest of criminals and subject to the most ignominious of deaths. It is a curious doctrine that success vindicates what would otherwise be a crime.

As a matter of historical fact, these rebellions were generally efforts on the part of the people to regain their rightful liberties and were crimes only in the sense that it is a crime for the victim to rebel against one who is robbing and despoiling him of his rightful property and liberty. As to whether or not secession was revolution depends upon whether the people of the seceding States possessed the right to run their own business.

In habitually giving to secession the status of a hostile movement Lincoln placed himself in the same position that Douglas placed himself in referring to the "struggle between the white man and the Negro" which Lincoln characterized as an "ingenious falsehood," declaring that "this good earth is plenty big enough for white man and Negro both, and there is no need of either pushing the other off." There was also room for both the "United States of America" and "the Confederate States of America," and in any event, waging war to compel the seceding States to remain in the Union didn't expand the continent.

Lowell spoke of those "ineffable sentiments" which would be obliterated by secession, but such sentiments had nothing to do with the right of the States to withdraw, and would not have been affected by secession any more than the sentiments of family life are obliterated by the leaving of the children. They are, in fact, more often sharpened as the trifling annoyances of home life are forgotten. It can scarcely be argued that those "ineffable sentiments" survived the war.

Lincoln said of secession that "It recognizes no fidelity to the Constitution, no obligation to maintain the Union," but the fact is, there is no obligation on the part of the States to maintain the Union. He said, "Surely each man has as strong a motive now to preserve our liberties as each had then to establish them," but in order to justify war he must have a stronger motive, for the Union wasn't established by force and the war overthrew those very liberties for which the Revolutionary War was fought and the Union created—the right of each State to govern itself. He said, "This Union shall never be abandoned, unless the possibility of its existence shall cease to exist without the necessity of throwing passengers and cargo overboard." A more accurate analogy would be to compare the Union to a fleet of ships sailing in voluntary convoy for mutual protection, and Lincoln's act in waging war to the act of the elected commander of such a convoy in sinking any ship that seceded from the convoy.

Of the States Lincoln said they "have their status in the Union, and they have no other legal status. If they break from this, they can do so only against law and by revolution. The Union, and not themselves separately, procured their independence and their liberty. The Union is older than any of the States and, in fact, it created them as States. Originally some dependent colonies made the Union, and, in turn, the Union threw off their old dependence for them and made them States, such as they are."

Lincoln here pretends to be arguing upon legal grounds. The force of his argument lies in the implication that the Union had the legal authority to create those "dependent Colonies, States, such as they are." But the Union of which he speaks possessed no legal status or authority whatever. It was purely an illegal, revolutionary Union, whose acts depended for their force upon ratification by the respective Colonies

represented in the Continental Congress or tacit consent. It was ridiculous for Lincoln to impute legality to such a Union while denying it to the Confederacy, which was established upon the same legal authority as was the United States.

Lincoln hypostatizes the Union and speaks of it achieving the independence of the States. But the Union was not a personality or an entity, but simply a condition of cooperation. If two men united to lift a heavy object, we wouldn't speak of it as the union but the men who did it. If 13 slaves rebelled against their master and in union achieved their liberty, could it be said: "The freedmen have their status in the union and they have no other legal status. The union is older than any of the freedmen, and, in fact, it created them as freedmen." Webster argued that the Union was a "paramount power" over the States as distinctly as was the British sovereignty over the Colonies, but Webster and Lincoln both either missed the point for which the Colonies fought or else purposely concealed it, for there is no similarity in principle between a republican union and a monarchical empire.

Edward Everett has said that from the Declaration of Independence would date the establishment of government upon a rightful foundation after thousands of years of degeneracy. Webster and Lincoln habitually interpreted the Constitution and Union by the principles of monarchical political science.

Water can not rise higher than its source; derived power can not be superior to the power from which it is derived, and the Federal Union can not be superior to the States that created it. The Constitution is supreme only in the sense that the laws of any organization are supreme over its members, so long as they remain members.

Contrary to Webster's assertion and the language of the enacting clause of the Constitution, it was not ratified either by the authority of the people of the United States or directly by the people of the States. In his reply to Calhoun, Webster said: "The powers conferred on the new Government were perfectly well understood to be conferred, not by any State or the people of any State, but by the whole people of the United States." He ridiculed Calhoun's description of the Constitution as a compact, although in his reply to Hayne, Webster had repeatedly spoken of it as a compact. His reply to Calhoun is scarcely anything more than a series of assertions running around in a circle. In the windings of his assertions he repeatedly admits the very fact that he is seeking to disprove, for he says, "On entering into the Union the people of each State gave up a part of their own power to make laws for themselves in consideration that, as to common objects, they should have a part in making laws for other States." Again he said, in speaking of a State, "She herself relinquished the power of protection, she might allege, and allege truly, and gave it up to Congress * * *," and again he said of the Constitution that "It seeks to establish a union among the people of the States * * *."

The phrase "people of the United States" does not bear out the argument of Webster and the imperialists that the people of the United States are united. The phrase is not "united people" but "United States." The present Constitution was ratified when the Union was still based upon the Articles of Confederation. If the Constitution was ratified by the authority of the United States, it must have been by some mode known to those articles. But it was not. The mode of ratification ignored the articles entirely and referred back to the prime authority of the State legislature.

Webster said of the Federal Government and the State governments that neither was primary with regard to the other, and that the authority of the Federal Government rested upon the same deep foundations as that of the State governments. But such is not the case. Every act connected with the ratification of the proposed Constitution was based upon the authority of the State legislatures, and in Virginia the Federalists, of whom Marshall was the leader, were so fearful that the soon-to-be-convened legislature would pocket the ratification that they hurried it off to New York before the legislature assembled.

There is not nor has there ever been provision for ratification of Federal Constitutions by either the people of the State or the people of the United States. It is only in a subjective or administrative sense that the people of the United States constitute one people. In the exercise of their sovereign powers they do and always have resolved themselves into sovereign States. Marshall argued that the United States was sovereign to the extent of its authority, but it is no more sovereign than any agent is sovereign. Its powers are delegated powers. In waging the Revolutionary War the men of 1776 were fighting for everything that Webster and Lincoln argued against. The men of 1776 denied the rightfulness of the asserted British sovereignty. They asserted that they were men with all the rights of men, and Englishmen with all the constitutional rights of Englishmen, and that their colonial situation had not political significance, that it was not a crime for which they could be punished by depriving them of their rights of self-government.

They claimed for their colonial legislature a constitutional parity with Parliament, possessed of exclusive legislative jurisdiction within its respective colony, and that the Empire was bound simply by the theoretical sovereignty of the Crown. They did not fight for union, but for the right of each colony to complete self-government. Lincoln's idea of "subordinate colony" and "States—such as they are," has no more validity than the idea of the slave status of human beings, and to obtain a full and accurate comparison we must draw a hypothetical case of slaves of the same race and in every way the equal of their masters.

The question as to whether the Union is a league, confederation, federation, or nation is not a vital one, but is purely technical and is simply a matter of the mode of administration of the extent of organization, not of obligation. Because it employs some machinery of government also used in national organizations is no more reason for calling it a "nation" than there would be for calling a gasoline engine a steam engine because of certain features they possess in common.

The assertion that secession is treason is not borne out by the nature of the Union by the constitutional definition of treason or the nature of treason itself or by the principles of democracy. Treason is a crime against the "sovereign." The Union is an association of coequal States, and the Federal Government is simply the common agent of those States. The Constitution says that "Treason against the United States shall consist in levying war against them or in adhering to their enemies," etc. It uses the plural "them" and "their," denoting an association of sovereigns rather than a unitary sovereign. It was Lincoln who committed treason and not the States. Lincoln overthrew 11 sovereign States and State governments, which, even according to Webster, were the equal of the Federal Government. The idea of the sovereignty of the whole people of the United States is purely an imperialistic dogma. Analyzed, it means that the people of Oregon are sovereign over the people of South Carolina and that the people of South Carolina are sovereign over the people of Oregon. The people of Oregon possess no more sovereign rights in the government of the people of South Carolina than they do in the government of the people of Canada or Mexico. The doctrine is indefensible by the principles of democracy.

Lincoln has been put forward as the great exemplar of Christianity, but the Civil War was fought in diametrical opposition not only to every principle of democracy but of Christianity. What he said of John Brown may also be said of Lincoln, that "It could avail himself nothing that he might think himself right." That can not excuse violence, bloodshed, and treason.

Like the enthusiast, of whom Lincoln said that he "broods over the oppression of a people till he fancies himself commissioned by heaven to liberate them," so Lincoln brooded until he fancied himself commissioned by heaven as a modern Moses raised up to lead the "oppressed" slaves to freedom, and when the war had brought such misery and destruction that it could no longer be justified upon the original object of saving the Union he then attributed to it the added character of a divinely appointed means of punishing the North and the South for "the bondsman's 250 years of unrequited toil."

But, regardless of the fact that slavery was in no sense a unique crime, Christ said that He "came not to judge the world, but that the world through Him might be saved." The Civil War was a greater crime than slavery. Both were a denial of the right of self-government, but where slavery simply took away the unrestrained barbaric freedom of the negro and put him to constructive employment the war destroyed the very lives of those who had been previously denied the right of self-government. Lord Morely has said that it is not enough that we should do good. We must do it in the right way. War was no more a righteous method of perpetuating the Union than it would have been a righteous method of originally forming the Union. It was no more a righteous method of keeping the Southern States inside the Union than it would be a righteous method for bringing Canada into the Union or the United States into the League of Nations. The end does not justify the means.

Lincoln would have been a true democrat if he had perpetuated the Union by the method by which Washington formed it. He would have been a true Christian if he had followed the example of that other Abraham, who said to his kinsmen, "Let there be no strife, I pray thee, between me and thee—for we be brethren. Is not the whole land before thee? Separate thyself, I pray thee, from me; if thou wilt take the left hand, then I will go to the right, or if thou depart to the right hand, then I will go to the left."

Mr. President, I do not know who this gentleman, Paul S. Whitcomb, of Gladstone, Oreg., is, but that ends the reading of what I consider to be one of the greatest arguments I have ever read. It applies absolutely to the case we are arguing here this morning. Why can some of the States of the American Union say, "We want a part of Tennessee? We are not going to ask Tennessee whether we can have her territory or not. We are going to buy power. We are going down into Tennessee and take away from her two of her counties"—steal them, that is all. There is no difference between a man slipping into your house at night and stealing from you in the nighttime, and, on the other hand, coming to you in the daytime and taking your property. He is a thief just the same. This actually is a piece of thievery. There is no doubt about it. I do not think anybody would say to the contrary. It is

common, plain stealing, just exactly as this article says happened to us down in the South. I do not care to fight the war over.

I read this argument because it is so applicable to what is trying to be done here and now with Tennessee, without any justification, without any excuse, except that the Government wants to make money—out of what? Robbing the farmers again; God bless them. Senators get up here and talk about wanting to help the farmers, but I have not seen a bill since I have been here that was worth a continental so far as they are concerned. I would state it stronger and I wish I could. I will when I get back home and get to talking to the cotton-mill boys and the railroad boys and the farm boys. I am going to say to them, "If you fellows think you have any friends in the Senate, come up here and sit in the galleries and listen-in for a few days. Then go back home and you will find I am telling you the truth when I say you have a few friends left, but they are few and far between."

The corporations have got control of the Senate; got it hog-tied. All they have to do is crack their whip and the Senate either passes through or stops any legislation they want or do not want. I know it; and the Senator knows it. Why? Because we can not get anything through here that is of material interest to the laboring people or the farmers of the country. We can not introduce a bill in the Senate and get it through to save our lives that will touch a corporation. It is an impossibility. It can not be done.

I do not know what the power is. I do not mean to say that there is anything crooked about it. I do not know what it is, but I know that if a Senator comes in here and asks for something for the poor people of the country or for the laboring people of the country, it is stopped either in the committee cemetery or in an Andrew Mellon vault. I have been here three years and I have not seen a bill passed through here yet that was of any benefit to the taxpayers of the country.

Talk about corporations. They do not pay any taxes. That is the biggest fool argument I ever listened to. There is not a railroad company in the country that pays a cent of taxes. there is not a bank in the country that pays a cent of taxes. There is not a corporation in the whole United States that pays a cent of taxes. Oh, yes; their agent carries it up to the office and gives it to the Treasurer, but the consumer, the man who uses the goods of that corporation, pays the taxes.

Look at the tax bill we passed the other day. That helps the poor man, of course. When the Republican Party had an opportunity to help the smaller corporations, the Vice President forgot to go to sleep like he did in the Warren case. He was sitting up in the Chair just like a June bug on a potato vine ready to jump on the first potato bug that comes up. Yet they say they want to do something in the interest of the poor people of the country. Yet they say they want to do something in the interest of the laboring people of the country. Not a bit of it!

Here comes a joint resolution now providing that the Government may go down into the State of Tennessee. I am fighting it, not for Tennessee especially. They have two very able Senators here—clean, conscientious men. The other day my friend the senior Senator from Alabama [Mr. HEFLIN]—and I am his friend and he is my friend—made a terrible plea here along this same line. Do you remember his story about the little boy and the brogan shoes? Do you remember the boy who said, "Daddy, the shoes don't hurt my feet, but they hurt me in my heart." Yet the Senator from Alabama comes right back here to-day and tries to put the brogan shoes on Tennessee. He comes right straight back and tries to do that. He wants Tennessee now to wear the brogan shoes and let Alabama be the baby, the child of the second wife, and have all the fancy clothes and the big red tie and go to church on Sunday. That is true, and the Senator can not get around it.

I have not a word to say about Alabama's attitude. I would fight for her harder than I would for Tennessee, because Alabama has never gone Republican. I think more of Alabama than I do of Tennessee on that account. But the same argument ought to apply to both.

Why should the Senator from Nebraska [Mr. NORRIS] want to come down into the South and meddle and mess up with our business? I think he has enough to do to attend to the West. This is his joint resolution. It is just like the Yankees did when they came down that this man talks about from whom I have been reading. True, I understand Lee turned his sword over, but I can prove to you as a matter of fact that we killed more Yankees than we had Confederate soldiers, so there was a very dear victory, if you can call it a victory. Here comes a man from the same section of the country going into the South and meddling in our affairs. I do not like it. I think the Senator from Nebraska is a fine man, a brainy man, but I think he went out of his way when he came messing in southern business.

I do not go out in the West in that way. If anybody from any section of the West gets up and says they need a dam out there, I sit here and vote for it. If they want a monument to somebody, I sit here and vote for it. We passed some measure last night providing for some kind of a monument out there with reference to some Indians and a battle they fought in 1873. I voted for that. I do not see why their people want to come down into the South and continually mess with us. Do you want another war? Is that what you are looking for? It looks like it. I know that if this bill were being passed for South Carolina, to treat South Carolina as you are attempting to treat Tennessee, you would have some trouble. I warn the Senate right now that if the United States Government ever passes a bill like this relating to South Carolina, trying to take two of our counties away from us, they are going to have to fight through every court in the land before they get it—right straight through all the courts—and then they had better be careful who they send down there to take charge of it. I will tell you that right now. I know my folks, if I do not know the folks of Tennessee.

There is no excuse for this thing. You do not need it. You own Muscle Shoals and we are willing for you to have it. All this talk about making nitrates over there is a farce and a humbug. What is it going to amount to? The fertilizer companies will take it and charge the farmers more than they have ever been charged before. I would be willing to wager anything I have in this world that if this joint resolution is passed, within 12 months after the proposition gets under way down there the farmers will be paying more for fertilizer than they are paying to-day. There is nothing to it. Why go down there and let the Federal Power Commission fix the rates in South Carolina or Tennessee? We have a concern down in my State that is supposed to look after that class of business.

As I said here this afternoon, we are building, I understand, one of the largest dams in the world. It takes water from Columbia, S. C., to Chappells, a distance of 75 miles. That concern is going to pay taxes to the State; it is going to help my people. Am I to sit here and vote for a joint resolution—and even if the conference report is signed by my colleague that does not make any difference to me; I simply differ with him; he is honest, I suppose, in his view—which authorizes the Government to go down there and say to the customers of those who have spent millions of dollars building that dam, "We are generating power at Muscle Shoals; we will sell you power cheaper than your home concern will sell it to you. So Sears, Roebuck & Co. will sometimes sell things cheaper than the home merchant; but I never have believed in people patronizing them, and I never have done so.

The merchants of Columbia, S. C., vote for me—some of them—and all of them pay taxes in the same office where I pay taxes; all of them send their children to school there and help to employ the teachers in the graded schools; they give other people who have not the money to pay to educate their children an opportunity to have them educated. Why should I take my money and send it to Sears, Roebuck & Co., or spend it in Washington. I buy my clothes in South Carolina, except some little things that I find it necessary to buy here. I buy my hats and shoes from the merchants of South Carolina, except sometimes I am forced to buy here. In the same way the merchants of Washington ought to be patronized by the people of Washington, because they are the ones who are helping to build up the community. Instead of sending money off to merchants somewhere else—I do not care where they may be—I say patronize the home merchant.

Now, we have before us a measure that would cause the power from Muscle Shoals to be transmitted into my State and other States. I do not believe in it and never have believed in it, and whether this joint resolution shall be passed or not I do not expect to vote for it. If it shall pass, I hope the President of the United States will veto it; and, if it comes back here and God spares me to be here on that day, I will certainly stand by him in his veto message. I will be very much disappointed in him if he shall not veto it, because he said the other day that he believed in State rights and I do not believe he would have said it if he had not meant it.

There are some objections to him; I objected to him sending a Georgia man into South Carolina and making him a postmaster there. I have not quite gotten over that as yet. Perhaps I should say that he allowed his henchman, Harry New, to do it; but it is the same thing. I have been fighting them ever since and am going to keep on fighting them until that man is removed from that post office. If it takes all of the next three years, I am going to fight them until he goes out of there. If we believe in State rights, as we say we do, if we believe in freedom, let Tennessee alone.

I would not have said a word against this joint resolution—I do not approve of it and I would have voted against it for the reasons I have given, but I would not have said a word against it if it had been confined to Alabama. The people of Alabama came here and said, "We want it." If representatives of South Carolina should come here and say, "We want to turn the State over to the Government," I say turn her over; I have no objection; but until they do come here and say so, then I say, Mr. President, let South Carolina alone.

Now I wish to read another short article, a very interesting one, too, entitled "James Buchanan and his Cabinet." I read from Tyler's Quarterly Historical and Genealogical Magazine of July, 1927, the same magazine from which I read a few moments ago the article on Abraham Lincoln.

"James Buchanan and his Cabinet, on the eve of the secession," by Philip G. Auchampaugh, professor of history, State Teachers' College, Duluth, Minn.

It will be noted the other article was written by a man from Oregon, while this one is written by a man from Minnesota, so that they are not southern authors. The article is as follows:

The scope of this work embraces the period from the election in 1860 to the close of Buchanan's term of office, and is a successful attempt of the writer to set forth the real facts relating to the closing months of James Buchanan's administration. It is a relief to see the moderate men of the North coming into their own again. The disgusting and unscrupulous manner in which facts have been misrepresented by northern extremists since 1861 receives a signal rebuke when men of the North, with the impartial spirit of P. G. Auchampaugh, Claude G. Bowers, George Morgan, Gamaliel Bradford, and Paul S. Whitcomb, use the pen. Mr. Auchampaugh justly observes that "the defeated parties in civil conflicts are twice unfortunate, once on the field of arms and again in the matter of bards, for few minstrels love to sing of defeats"; and as time goes on, even the conquered begin to forget their ancestors under the conditions to which they have to conform themselves. It is that way with the South to-day.

The cause, therefore, of the Democratic Party of the North in 1860 is more a "lost cause" than that of the South. As a Nation, practically unanimous, the South has had no small number of able writers who have placed their case before the world, but the Democrats of the North, who put their confidence in peaceful measures for the maintenance of the Union, have been overwhelmed by the successful party in their midst, and they have had few defenders in the South, because they stopped short of admitting the doctrine of secession. Such was the fate of James Buchanan, one of the kindest, ablest, and noblest men the North has produced. The party to which he was opposed in the North, who believed in a Union cemented by force, plunder, and slaughter, have spared no pains to detract from his ability and character, and in the South his wish to do justice to southern interests, his hatred of sectional domination, and his love of a real Union of peace and consent have been forgotten because he could not cut the ties which as a Pennsylvanian bound him to the North.

Lincoln, who became the idol of the Republican Party after their successful war to destroy the principle of self-determination, embodied in the very creation of the Union, cuts a poor figure compared with James Buchanan, as viewed under the luminous light which Mr. Auchampaugh has turned on. The first and the most outstanding difference between the two men was that Buchanan was a thorough gentleman—refined in his feelings and chaste in his language. He could as little have indulged in the filthy conversations of Lincoln as Robert E. Lee or Jefferson Davis. In the next place, Buchanan was an old and tried statesman, who contrasted with the inexperience and ignorance of Lincoln.

After the evidence produced in this work there can be no question that he was master in his Cabinet. The submission of Lincoln to Seward and Stanton is one of the facts of history, which all the soft soap employed by his admirers can not wash away. How impossible it would have been for the old tried statesman Buchanan to have signed important papers without reading them, and yet this is what Lincoln did, according to Welles, his Secretary of the Navy. As to democracy, Buchanan was a Democrat both in feeling and party name, while Lincoln was one only in lowly birth and fancy speech, positively revelling in authority over the Constitution.

When we come to consider the question of Fort Sumter the contrast is even greater; Buchanan acted the gentleman in his dealings with the southern and Virginia commissioners, and both wrote and talked to them kindly, but he steadily kept from affording them any hope that he would ever abandon Fort Sumter. Lincoln snubbed them and refused them audience, but allowed his Secretary of State, through a third party, to give them all sorts of assurances that the troops would be withdrawn from Fort Sumter. It is idle to suppose that the commissioners could have lingered in Washington a month without Lincoln being a party to Seward's communications.

The policy of the able and unscrupulous Seward was to reinforce and hold Fort Pickens and allow Fort Sumter to go. Thereby he thought that the national authority might be asserted without an immediate resort to arms and time might be given for peaceful settlement. But the weak and vacillating Lincoln could not hold to a policy to which he was committed through Seward, but influenced by a conference of war governors reversed it, and by an attempt to reinforce Fort Sumter hurried the country into war and drove off Virginia, North Carolina, Arkansas, and Tennessee, who did not want to leave the Union, and whom it was Seward's, as well as Buchanan's, policy to retain.

What emphasizes the inefficiency of Lincoln is that after four long years of bloody strife, he did what he failed to do in 1861, held a conference with Confederate commissioners.

Mr. Auchampaugh's story of the Kansas difficulties is very valuable and instructive. It is very different from that which is canonized by writers like Rhodes, Hart, Hay, and Henry Cabot Lodge. According to them the civil strife was begun by a murderous slaveholder, and the resistance which arose was that of a majority of people enlisted in a holy cause to repel the attacks of a minority of cruel men from Missouri, upheld by Buchanan and Federal troops. As a matter of fact, the reverse was the case. One can not doubt that the true story is told by J. W. Williams, who was Territorial judge—a Pennsylvanian and an opponent of slavery. The war began with one of these highly moral Free Soilers meeting a Mr. Letterman in the road and wounding him seriously with a pistol shot, merely because he would not answer whether he was "a free-State or proslavery man." The war thus begun was wholly on one side, and all unauthorized acts were performed by the "plug uglies" sent by the Emigrant Aid Societies of New England armed with Sharps rifles. Under "the cry of law and order" the New England people in the early days of the Republic had gone crazy in applying the false and immoral doctrine of the end justifying the means to the attempt to make Aaron Burr President, and now under the cry of "Liberty" they were even more insane in applying the same doctrine to the question of slavery. If the term "rebel" was ever applicable to anyone, it was so to these emigrant societies and their mercenary cutthroats in Kansas in their resistance to the Federal courts and the Federal Executive. (See letters of Judge J. W. Williams, pp. 38–47.)

Virginia was to have a taste of these bloody murderers in the thrice sainted John Brown.

Quite refreshing, too, are the facts disclosed by Mr. Auchampaugh with reference to John B. Floyd. He entirely disproves the charges that he used his position to supply the South with arms; that he plundered the Interior Department bonds and that he was a secessionist at heart. The most that Mr. Auchampaugh alleges against Floyd, after a view of all the circumstances, is occasional carelessness, but it is to be remembered that we see only one side, and the judgment might be wholly different if Floyd had lived long enough, as Mr. Buchanan did, to prepare his own defense to all charges. Then things now only vaguely understood might appear in a very different light. Floyd left Washington so poor that he had to borrow money to pay his expenses home. Of what one of the Cabinet officers of a later day can this be said?

Probably the only important criticism that can be made upon Mr. Buchanan is that he did not withdraw the body of the troops from Fort Sumter. John Tyler, the Virginia commissioner, pledged the honor of the South to make no hostile move against the fort if a sergeant and five or six men were left behind to symbolize with the flag the authority of the Government. As long as it was made a depot of troops and supplies, it constituted a menace against the city of Charleston.

Freed from all subtleties the war was a war of subjugation and conquest. It was an immense crime—a denial of the right of self-government to a highly civilized people occupying a country half the size of Europe. What makes the crime absolutely colossal is that Lincoln, to win, had to call in the aid of 800,000 foreigners and 200,000 negroes, and resort, in the last year especially, to the barbarous warfare of the Middle Ages. His own words are that without the negroes in the Army he would have had to give up the war in "three weeks!"

Mr. Auchampaugh, while not voicing these views directly, does so indirectly, when he says that Lincoln, instead of preserving the Union, destroyed "the whole fabric and theory of government handed down by the fathers." We have now a great Nation, it is true, but it is a great northern nation to which the South has had to conform all its policy and sacrifice all its ideals. Whatever liberties it enjoys are by permission, and the attitude of the North is that the South may be indulged but must be carefully watched.

Here it is again in the Muscle Shoals bill. Just what these two writers say in those articles about the South comes back to us this evening.

Here is the North coming again, going into one of the States of the South, for money—that is all—mercenary, unprincipled,

without excuse, without justification, going into the South to steal the southern power. Why? It is the same old fight. You need not try to keep it down. Why do you not go up North and have a Muscle Shoals? Why do you not go out in the West and have a Muscle Shoals? Answer me that question. Why is it that you have got to go down in the South and steal our property, as you did from 1861 to 1865, and then sent Sherman down and burned Columbia, and had a blaze of fire from Atlanta, Ga., down through south Georgia, through South Carolina and North Carolina and on up, and burned us up? Your great General Grant sent word, "Salt down the city of Charleston." The message came back, "You need not be uneasy; when we get through with South Carolina she will know we have been here"; and she did know it. They burned her to the ground, and in some instances raped her women. Not satisfied with that, now you come back. With all the water powers you have in the other parts of this country, you want to go down in the South and take her water power, to build up what? Simply to make money for the United States Government.

It will not do the people of this country one particle of good. Mark that prediction this morning, at 25 minutes to 4 o'clock. If this bill goes through, the only good it will do the people of the South is the money that may be spent right around Muscle Shoals in Alabama by local interests. It is going to be a menace to the South. It is going to be destructive not only to the South but to these people in New York and Connecticut and Massachusetts who are buying up the cotton mills in the South. These people up there, who are investing their money in the South, are going to suffer from this very bill that you are passing to-night.

Oh, you think you are not hurting anybody but the South, but you are making a serious mistake. I am mighty proud to tell you to-night that at this very time there are many millions of dollars in South Carolina that came from the North. We are glad to have it; we appreciate it; and our people stand in those cotton mills and in those banking institutions and in other institutions that are owned by northern capitalists and give their most faithful service.

I see men every time I go home that I knew when I was a boy. I see women that I knew when they were girls. Now they are like myself, getting on the shady side, with gray hair. Their lives have been spent in the cotton mills, working for men in the North without a word of complaint.

Why, now, come and want to strike them down? I resent it. I do not care whether any other southern man here resents it or not; I do, and I consider it an act of hostility for men who live north of the Potomac River to vote for this bill. I shall so treat it as long as I am a member of this body, and I propose to retaliate if I ever get the opportunity to do it; and I think that opportunity will come, possibly not between now and the 29th, but it will come. If one vote or one voice can retaliate, that voice shall be raised and that vote shall be counted to you northern people who support this measure, and steal from the State of Tennessee that which God Almighty has given to her, and not to the United States.

I have put more material in the CONGRESSIONAL RECORD about the Confederate soldiers—Lee, Jackson, Jeff Davis, and the others of the Confederacy, and the private soldiers—than all the Senators from the South who have been here since the Civil War, and I propose to continue to put it in. I propose to go back home and tell my people that the same spirit prevails in the Senate to-day that prevailed in it when Jeff Davis walked out of it; and to prove it, I will show what northern men voted to steal from the State of Tennessee her rightful property which God has given her.

Yes; I resent it. I would not vote for this bill if I knew that I would have to resign my seat before this day at 12 o'clock. I would not vote for it if I knew that every man in the Senate would refuse to speak to me for the rest of my natural life. You can not justify it from any standpoint except that the North wants to continue to try to keep her heel upon the neck of the South; and if this bill passes the Senate, and one vote can keep some others from passing, there are some others here that are not going to be passed at this session, nor next session, either.

Now, Mr. President, I want to put in this RECORD something that I have never seen before. It reads as follows:

States normally Democratic—The solid South

	Delegates Democratic convention	Electoral votes
1. Alabama	24	12
2. Arkansas	18	9
3. Florida	12	6
4. Georgia	28	14
5. Louisiana	20	10
6. Mississippi	20	10
7. North Carolina	24	12
8. South Carolina	18	9
9. Tennessee [1]	24	12
10. Texas	40	20
11. Virginia	24	12
Total	252	126

[1] Republican in 1920.

NOTE.—All Democratic since 1880 with the exception of Tennessee, which voted Republican only in 1920.

States normally Republican

	Delegates Democratic convention	Electoral votes
1. California	26	13
2. Connecticut	14	7
3. Delaware	6	3
4. Illinois	58	29
5. Indiana	30	15
6. Iowa	26	13
7. Kansas	20	10
8 Maine	12	6
9 Massachusetts	36	18
10. Michigan	30	15
11. Minnesota	24	12
12. Nebraska	16	8

Necessary to nominate (two-thirds)		733⅓
Necessary to elect		266

Mr. President, I think these tables are accurate. I had them made up because I wanted to show some of the people in this country just exactly the standing of the different States. I wanted to show particularly to the Democratic Party just what chance they have to win the Presidency of the United States, when they are fussing and scrapping as they are doing now.

Now, I want to read the platform of the South Carolina Democratic Party. I want to put it in the CONGRESSIONAL RECORD, because I want people to see why I fight just as I am fighting to-night. This is taken from the Columbia State, Columbia, S. C., of Thursday morning, May 17, 1928:

[From the State, Columbia, S. C., Thursday morning, May 17, 1928]

ADOPT PLATFORM WITHOUT DISSENT—DEMOCRATS AGREE READILY TO REPORT AT NIGHT SESSION—DOZEN PLANKS IN DOCUMENT OF SOUTH CAROLINA PARTY

The following State platform was adopted by the South Carolina State Democratic convention last night:

"The Democratic Party of our State and Nation are called upon in this year 1928 as never before to wage an uncompromising battle for our form of Government and republican institutions, the very existence of which are threatened by the combined forces of corruption in office and the power of predatory wealth. To this end we unqualifiedly pledge our party:

"1. To place our agricultural interests on a parity with industries, and to so adjust our economic system and laws as to insure the farmers a fair return for their labor and investment.

"2. Relief from the present burdensome tariff system.

"3. We favor careful enforcement of the restrictive immigration laws and pledge ourselves to such further amendments thereto as will prohibit seasonal labor being imported from neighboring States.

"4. More power and efficiency in our State government and the enforcement of its laws, and an end of the encroachments of national power, with the widest latitude.

"5. Recognition of the rights of small nations, and repudiation of any imperialistic ideas on our part in regard to them.

"6. We deplore the lack of respect for our laws and the lax enforcement which many of them receive, and pledge ourselves to honest and efficient enforcement of all our laws.

"7. Cooperation by every honorable means, in good faith, with other nations, to prevent future wars.

"8. A fair deal to American labor.

"9. We denounce the corruption which has permeated our national administration in recent years. We commend the prosecutions which have been made and call upon all who believe in our institutions for more vigilant efforts to detect, prosecute, and bring to justice those who prostitute public office for private gain.

"10. A policy, national and State, based upon the weal and welfare of the great body of citizens as distinguished from gross materialism for the benefit of classes.

"11. Conservation of national resources, a policy of watchfulness and vigor with reference to the program of the Power Trust.

"12. We stand squarely for the eighteenth amendment to the Constitution, for the Volstead Act, for the State prohibition law, and for the strict and vigorous upholding and enforcement of each one of these. And we condemn any attempt to nullify these laws by lax or corrupt enforcement methods."

That platform was adopted in the South Carolina convention just a few days ago. That is the platform I am instructed to follow.

Along with that platform we passed a resolution and bound our delegates to it by adopting a unit rule that they should not cast their ballots for any man who was in favor of the amendment or repeal of the eighteenth amendment, or any act of Congress with reference thereto.

We called attention in that platform to the Power Trust in my State, but we did not mean, as this resolution provides, that we were willing for outside people to come down there and fix the price of our electricity or our other power. That did not mean that we wanted the Federal Government to interfere with our business. That did not mean that I was to vote in the Senate for a resolution to investigate any power trust in my State save those under national control. That meant that we wanted the United States Government, as in another paragraph it is set out, to stay out of South Carolina in so far as meddling and interfering with our business is concerned.

Just a few weeks ago a commission up here committed a most outrageous offense against my State. A trolley system runs from Greenwood, S. C., by way of Anderson and Greenville, over to Spartanburg. The same trolley system runs from Charlotte, N. C., down in the direction of Spartanburg, covering some other North Carolina towns. That trolley system wanted to build a connecting link between the North Carolina point where they stopped and the South Carolina point at Spartanburg. The men representing that interest came here, had a hearing, and that distinguished statesman and jurist, Charles E. Hughes, represented South Carolina, or at least certain interests who were working in the interest of South Carolina, before that commission. The commission sat back and said, "No; you can not build that link of that railroad, because it would hurt the Southern Railway Co." Do you mean to tell me that men will cast that sort of a ballot who are not bought by somebody, who were not being unduly influenced by somebody? Freight rates is what is ruining the people of this country. If you want to help the farmer, instead of trying to steal part of Tennessee, as is being attempted here, reduce freight rates.

The truck farmers of my State, such as you heard me speak about here yesterday—I believe it is now, in reference to this Federal farm loan bank matter, down in Beaufort, Allendale, Barnwell, Bamberg, and other counties in my State—raise their truck, ship it up here, and sometimes, instead of sending them back pay for their truck, the people here actually send them a bill for freight. The freight actually eats up what the truck sells for in the northern markets sometimes, right here in Washington. Some of it comes here. The freight actually eats it up, and instead of the people to whom the truck is shipped sending some pay for it, they send back a bill for balance due on freight. The same thing happens as to cantaloupes, and the same as to watermelons.

Why can we not touch up the railroads a little bit? Oh, no; if you put your hand on them, you have to jerk it back. A bill was introduced by the Senator from Arkansas to take off a piece of railroad stealing that makes a man pay extra in a Pullman. We used to be able to come from Columbia, my home, to Washington, paying only $3 for our Pullman fare. To-night you pay $5.60, and then pay the railroad company for hauling the bed you are riding in. There is no reason in that. A correction of that would be a help to the farmers.

Oh, no; when you talk about reducing freight rates—Senators have never seen that done, have they? Senators have never seen the Interstate Commerce Commission reduce any rates, have they? Reduce the freight rates and help the farmers. The way to help the farmer is to locate a market for him where he can have his produce disposed of at the proper price, and that is also the way to help the consumer—to let the farmer have a fair price for his product, and then fix it

so that the man who is going to eat it or wear it can get it at a reasonable price.

God Almighty made this country right. He did not make any mistake. He knew exactly what He was doing. We can raise in this country, if necessary, everything in the world we eat and wear, and everything in the world we have to have. But there should be provision made by which the corn and the meat that comes from the Western States and goes to the Southern States could be hauled at reasonable rates. Look at the railroad earnings. Examine them. None of the railroads claim to-day that they are losing money. They are making money all the time, making excessive profits. They claim that the automobiles are ruining their business in the passenger line. But, Mr. President, telephone down and try to get a Pullman berth going south. I know of two people this week being delayed on their trip 24 hours because they could not get a berth. The trains are crowded. I stayed over one day myself not long ago because they said I could not get a berth.

But you can not come in here and touch a railroad. You can not come in here and reduce their freight rates. You can not come in here and take off their surcharge on the Pullmans. But you can come in here with a bill and say you are going down South and take our property, take our power, and that you are going to send your Federal Power Commission down there for the purpose.

I know in my own State, so I have been told by good people, that when they were burning corn in the West, actually burning it, making fires out of it, my people were paying $1.10 a bushel for it. If that Western farmer could have gotten that corn down into the South at a reasonable freight rate my people would not have had to pay $1.10 a bushel, and the Western farmer would not have had to burn up his corn. Out of the thousands and thousands of bushels of corn that were burned in the West they could have made thousands of dollars if they had been able to ship it to the South at reasonable freight rates. The people in South Carolina and the other Southern States would not have been compelled to pay such an enormous price for the corn they needed. The same is true of hogs and of other meats when they are shipped down there.

I want some of you Senators who are such great friends of the farmers to think about these matters. I am glad Mr. Coolidge vetoed the McNary-Haugen bill. If there ever was a humbug and a farce passed through the Congress, God knows that is it. I am glad Mr. Coolidge vetoed it. I hope I will live until some time later in the day when the Senator from Oregon [Mr. McNARY] gets that veto message out of his cemetery and brings it on to the floor of the Senate and makes an effort to pass the bill over the President's veto. I am the only man from the South, that is a cotton-growing State, who voted against the bill, and I was glad when the President vetoed it, because now I can go back home and laugh at the balance of them and say that I was right that time anyhow. If you want to help the farmer do not pass this Muscle Shoals bill. It will not help them in any respects. Reduce your freight rates and help both producer and consumer, the man who needs it, and quit serving the corporations and rich only, as you now do, and we will have a happier people.

Mr. President, having concluded what I have to say on this matter, I suggest the absence of a quorum.

Mr. NORRIS. Mr. President, I make the point of order that no business has been transacted since the point of no quorum was made before, and that the suggestion is dilatory.

Mr. BLEASE. Then I make the point of order, and want it put in the CONGRESSIONAL RECORD, that there are only eight Senators in the Chamber at this moment.

The PRESIDING OFFICER (Mr. DALE in the chair). The Chair will sustain the point of order made by the Senator from Nebraska [Mr. NORRIS].

Mr. McKELLAR. I appeal from the ruling of the Chair, and on the appeal I ask for the yeas and nays.

Mr. NORRIS. I move to lay the appeal on the table.

Mr. McKELLAR. I call for the yeas and nays on that motion.

Mr. BLEASE. Mr. President, I make the point of order and want it to appear in the RECORD that there are only nine Senators in the Chamber at 4 o'clock in the morning, this moment, and I object to any business being conducted or any work proceeding until a quorum is present.

Mr. McKELLAR. Mr. President, I desire to make the statement that there are not 15 Senators in the Chamber and were not at the time the motion was made and the demand submitted for the yeas and nays. The rule calls for the raising of the hands of 20 per cent of the Senators present, and more than that many hands were raised. Other Senators have come in since, but they were not here when the motion was made and the demand for the yeas and nays was submitted. The roll ought to have been called then and it ought to be called now.

Mr. NORRIS. Mr. President, the point of order is that there has been no business transacted since the last quorum call and that the suggestion of the absence of a quroum is only dilatory.

Mr. BLEASE. Mr. President, the Senate has no right to transact business with no quorum being present no matter when it is.

The PRESIDING OFFICER. The question is on the motion of the Senator from Nebraska to lay the appeal on the table.

Mr. McKELLAR. On that motion I ask for the yeas and nays. There are four hands up, and there are only 18 Senators in the Chamber.

Mr. GLASS. Mr. President, is it competent for a Senator on the floor to determine how many Senators are here?

Mr. McKELLAR. I can count them and thus help the Chair.

The PRESIDING OFFICER. The Chair has to assume that there is a quorum present. On that assumption there is not a sufficient number who demand a roll call.

Mr. McKELLAR. How many Senators are present now?

The PRESIDING OFFICER. There were 55 Senators present when the roll was last called.

Mr. BLEASE. They are not here now. There is not a quorum here now, and I want the RECORD to show it. We may need this later in some court proceeding.

The PRESIDING OFFICER. The Chair can not count a quorum from the Chair. The question is on agreeing to the motion of the Senator from Nebraska to lay the appeal on the table.

The motion was agreed to.

Mr. NORRIS. Mr. President, I make the point of order——

Mr. McKELLAR. Mr. President, business having been transacted, because the Senate has just voted, I now suggest the absence of a quorum.

Mr. NORRIS. I make the point of order that no business has been transacted. The only thing that has been done was to ascertain that there had not been any business transacted since the point of no quorum was last made, and that does not constitute business.

Mr. McKELLAR. There has been a vote taken on the motion to lay on the table and that is business.

The PRESIDING OFFICER. The Chair so holds, and the clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dill	La Follette	Reed, Pa.
Barkley	George	Locher	Sheppard
Black	Glass	McKellar	Shipstead
Blaine	Hale	McMaster	Steiwer
Blease	Harris	Moses	Tyson
Bratton	Heflin	Norris	Vandenberg
Brookhart	Howell	Nye	Wagner
Copeland	Johnson	Oddie	Wheeler
Curtis	Kendrick	Pine	
Dale	Keyes	Pittman	

The PRESIDING OFFICER. Thirty-eight Senators having answered to their names, there is not a quorum present. The clerk will call the names of the absent Senators.

The legislative clerk called the names of the absent Senators, and there were no responses.

The PRESIDING OFFICER. Thirty-eight Senators have answered to their names. None of the absent Senators whose names have been called have responded. There is not a quorum present.

Mr. NORRIS. Mr. President, I move that the Sergeant at Arms be directed to request the presence of absent Senators.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms will execute the order of the Senate.

At 4 o'clock and 30 minutes a. m., Friday, Mr. DENEEN entered the Chamber and answered to his name.

Mr. TYSON. I move that the Senate adjourn.

The PRESIDING OFFICER. The question is on the motion of the Senator from Tennessee. [Putting the question.] By the sound, the noes have it.

Mr. TYSON. I ask for the yeas and nays.

The yeas and nays were not ordered.

So the Senate refused to adjourn.

At 5.20 a. m. Mr. THOMAS entered the Chamber and answered to his name.

At 5.28 a. m. Mr. WATERMAN entered the Chamber and answered to his name.

At 5 o'clock and 35 minutes a. m. Mr. SMOOT entered the Chamber and answered to his name.

At 5 o'clock and 40 minutes a. m. Mr. GREENE entered the Chamber and answered to his name.

Mr. LA FOLLETTE. Mr. President, I suggest that the Sergeant at Arms submit a report of the progress he is making under the direction of the Senate to request the attendance of absent Senators.

The PRESIDING OFFICER. The Sergeant at Arms will submit his report.

The SERGEANT AT ARMS (David S. Barry). Under the order of the Senate that the Sergeant at Arms be directed to request the attendance of absent Senators, I submit the following report:

The following Senators have advised that they will come: BAYARD, CARAWAY, CUTTING, HARRISON, ROBINSON of Arkansas, ROBINSON of Indiana, STECK, TYDINGS, WALSH of Montana, and WARREN.

From the following Senators there was no response to the telephone call: BINGHAM, BORAH, CAPPER, BRUCE, COUZENS, EDGE, FLETCHER, GERRY, GILLETT, HAWES, HAYDEN, REED of Missouri, SHORTRIDGE, SWANSON, WALSH of Massachusetts, PHIPPS, BROUSSARD, and METCALF.

The following Senators are out of the city: EDWARDS, FRAZIER, GOFF, GOULD, MAYFIELD, NEELY, TRAMMELL, and WATSON.

Senator FESS had retired and left orders at the hotel desk not to be disturbed until 7.30 o'clock.

Senator KING left the Senate Chamber ill.

Senators JONES, RANSDELL, and NORBECK are also ill.

Senator SMITH is detained at home by illness.

Senator DU PONT is sick and out of the city, as is also Senator GOODING.

At Senator MCLEAN'S residence the reply was made that he would be given the message; and a similar response was received on calling the residence of Senator MCNARY.

The following Senators have arrived since the order to the Sergeant at Arms was issued: GREENE, SMOOT, THOMAS, WATERMAN, and SACKETT.

The PRESIDING OFFICER. The report of the Sergeant at Arms will be received.

At 7.10 a. m. Mr. ROBINSON of Arkansas and Mr. STEPHENS entered the Chamber and answered to their names.

At 7.15 a. m. Mr. BAYARD entered the Chamber and answered to his name.

At 7.18 a. m. Mr. CUTTING entered the Chamber and answered to his name.

The PRESIDING OFFICER. Forty-eight Senators having answered to their names, a quorum is present.

Mr. MCKELLAR. Mr. President——

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. MCKELLAR. Mr. President, there are two motions which I desire to make with reference to this matter. I move first to recommit the conference report to the conferees with instructions to the conferees on the part of the Senate to insist upon the insertion at the end of section 16 of the following proviso:

Provided, That the corporation herein created shall be subject to all the laws of the States in which it operates in the same manner and to the same extent as would a private corporation engaged in such enterprises, and when the Cove Creek Dam and power plant hereinafter provided for shall have been constructed by the United States Government the laws of the State of Tennessee and the regulations of the constituted authorities of Tennessee shall apply in full force and effect to the sale, lease, distribution, or other disposition of the power produced and of the water released for power-development purposes at the downstream plants or projects, to the imposition of taxes and tolls on all the properties, and to the regulation and control of all rates and charges: *Provided further*, That the provisions of this section shall not apply to navigation locks nor the operations concerned therewith: *Provided further*, That such a percentage of gross profits from the sale of power shall be paid to the State of Tennessee as would have been paid if the corporation had been privately owned.

Mr. NORRIS. Mr. President, I am sorry that the Senator offers that motion now, because I have got to make a point of order against it.

Mr. MCKELLAR. Will the Senator just consider the motion as pending?

Mr. NORRIS. No; I would rather not do that. The Senator can debate the motion and offer it afterwards, if he does not want the point of order raised now.

Mr. MCKELLAR. Then I prefer that course; I will merely put these motions in the RECORD at this time.

Mr. NORRIS. Then, the Senator should not offer them at this time.

Mr. MCKELLAR. I will not offer them, then, at this time.

Mr. NORRIS. If the motion is offered, I would make a point of order against it. It is subject to a point of order.

Mr. MCKELLAR. When the Senator is present, of course, I will offer the motion I have read. I wish to offer another one if the first one should not be agreed to or a point of order should be made against it. I will at this time take the liberty of reading the second motion.

Mr. NORRIS. I shall make the point of order against it when it is offered.

Mr. MCKELLAR. It will not be offered at this time.

The second proviso I desire to offer is as follows:

After section 16 add the following proviso:

"*Provided*, That the said corporation shall keep an accurate account of the cost of said dam, and of the cost of operation and maintenance, and shall out of the profits derived from the sale of power create such an amortization fund as will repay to the United States Government in such a period of time as the said corporation may find feasible the full amount of the cost of said dam together with 4 per cent interest annually thereon. If during the amortization period said corporation shall receive revenues in excess of the amount necessary to meet the periodical payments to the United States and all costs of operation and maintenance as provided in the amortization plan adopted by the corporation for paying back to the United States the cost of said dam, then, immediately after the settlement of such periodical payments, the said corporation shall pay the excess revenues to the State of Tennessee annually. When all the cost of said dam, together with 4 per cent interest thereon, shall have been repaid, as herein provided, then said dam and other properties acquired and used in connection therewith shall be deeded to the State of Tennessee."

Mr. President, as I have heretofore pointed out, I am earnestly, heartily, and whole-souledly in favor of what is known as the Muscle Shoals Dam measure. For many years, as I stated on yesterday, I worked with the Senator from Nebraska to bring about the enactment of the bill that was actually passed. That bill was to my mind a most excellent bill. It provided for the retention of the plants for use in time of war, and it provided for the manufacture of fertilizers for the farmer in time of peace so that they might obtain cheaper fertilizers. It also provided for the distribution of surplus power to municipalities and States and counties in a way that seemed to me to be excellent. It favored no combinations or trusts, as they are frequently called; it favored neither the Power Trust nor the Fertilizer Trust. It was a measure intended, I believe, for the benefit of and to care for the rights of the people in reference to the plants and dams. Under those circumstance I was, as I have said, earnestly in favor of it and I spoke in favor of it. We secured an amendment perfecting the measure, and I felt very proud of it. There was no mention in that measure, or practically no mention, of Cove Creek. The only mention of it was that it was agreed by all that it should be eliminated, and it was eliminated in the Senate bill, I thought to the satisfaction of everyone. Then the House of Representatives for some reason almost at the last moment put in this entirely new feature. The cost of it is large; the plant is large. It adds an additional project to a problem that has troubled the mind of Congress for many years in connection with Muscle Shoals, and it seemed to me to add a feature that was wholly unnecessary. With Cove Creek Dam out of the pending joint resolution, I believe that even as modified by the conferees it could be passed certainly within three minutes. After the elimination of the Cove Creek Dam provision by the conferees I do not believe there would be any votes—there might be some votes against it, but there would be no additional argument in reference to it; it would settle this matter, and the measure would go at once to the President for his signature, and thus the troublesome question of Muscle Shoals would be settled so far as the present Congress could settle it.

I had no reason to expect that this question, affecting vitally the interests of my State, would be injected into the measure at the last moment, but it was, although so far as I know practically everyone from my State, with one exception, certainly everyone from my State who has written to me or telegraphed to me about it—and there have been many—everyone except one distinguished gentleman in my State, a man who is the editor of a newspaper and stands high in the State, has protested against the inclusion of Cove Creek Dam.

I wish to say about Cove Creek Dam that under other circumstances I probably would agree to its inclusion; but, with the exclusion of every right that the State of Tennessee has—the right of regulating, the right of compensation—and in view of the taking the property of the State away without let or hindrance and without regard to the desire of the State, it has been made impossible to have the provision agreed to by the committee or by the two Houses without a violent fight; and so I was compelled to object to that part of the report.

I want to say again that if Cove Creek had not been included, the report as originally made would have had my earnest and hearty and most active assistance. I have stood here for months working side by side with the senior Senator from Nebraska in an effort to get the Muscle Shoals question adjusted

at this session of Congress. I had no reason for thinking that this new issue would be injected.

Some say, "Well, while it was injected, that was exactly the way we did in reference to the State of Alabama." As I tried to point out yesterday, the two questions are entirely dissimilar. There is no similarity between them, for this reason:

When the question of building the dam at Muscle Shoals was up in 1915 and 1916, the State of Alabama, through its legislature, in the way pointed out by the Constitution and laws of the land, took steps about it. It passed a resolution urging the Government to accept that site. Not only did its legislature do that but all of its public bodies in its various cities and its citizenship generally came to the Congress and urged the Congress to accept that site, to build that dam, to build it purely as a Federal project, to take entire charge and jurisdiction of it, and to bear the entire cost of it; and after months of effort upon the part of the two then Senators from Alabama and after months of effort on the part of every Congressman from Alabama the Government was finally induced to take that position.

I most cheerfully entered into that fight with the Representatives of Alabama, at the earnest request of the Hon. Oscar W. Underwood, one of the strongest of the men in the House at that time; and, by the way, I stop here long enough to say that perhaps there was never a more distinguished body of men in the House than there was about that time. Let me add that I am referring now to the men that I found there when I came to the Congress in 1911 and early in 1912—such men as Champ Clark, Senator Underwood—who was then Congressman Underwood—and Martin W. Littleton, of New York, on the Democratic side, and I could name dozens of others; men like James R. Mann, on the Republican side, one of the greatest legislators that we ever had in this country. They were the men in control of the House.

It happened that I was put on the Military Affairs Committee of the House; and Mr. Underwood came to me and urged me in 1914 to offer an amendment as a member of the Military Affairs Committee, it being at that time a committee that appropriated money, not like it is now. I did offer that amendment for the appropriation of $20,000,000 to begin that great project. It was done, as I say, at the request of Mr. Underwood, who was then our majority leader in the House of Representatives. He had great influence with the House—tremendous influence. No man, perhaps, ever had greater influence in the House than did Mr. Underwood at that time.

There were other strong men from Alabama in the House; and through the aid of all of Alabama's Representatives we agreed to the offer of the State of Alabama, expressed through its legislature, expressed by its governor, by all of its officials, by all of its public bodies, and by the various public bodies of the various cities of Alabama; so that question was entirely different from the question that now presents itself.

Under the present circumstances the governor of our State is wholly opposed to it. The legislature went on record, as I recall, in opposition to the Government's building the dam at that place and at that time and in that way. The State utilities commission have protested against it, earnestly protested against it, forcefully protested against the Government's taking that dam site and leaving them no regulatory authority of the power that is to be generated at the dam. So, under those circumstances, it presents an entirely different question.

This is a new question. This is the question of building a new plant, with one of the parties not agreeing to it. So, even under those circumstances, when I found that the committee intended to include this matter I presented to the committee certain amendments, the same amendments that I read just a little while ago, which will guarantee to the State of Tennessee its regulatory power, which will guarantee to the State an income in lieu of taxes, if that were preferable, and I understood that that would be preferable—some guaranty that the rights of Tennessee in this great property would be respected.

That is precisely what has been provided for in the Boulder Dam bill in one respect; that is, in respect of the excess profits going to certain States under the provisions of the Boulder Dam bill. It is not unreasonable. It is not unfair. It is not unjust; and it seemed to me that if we were to build this plant, and if the amendments I have suggested here were put in the bill, I should gladly support it, I should gladly work for its adoption, and it would be adopted.

Under these circumstances, I can not help but appeal to the Senators who are here not to take away the rights of Tennessee without her consent and over the protest of her representatives. I am quite sure that in the case of any other State, unless it had been foreclosed, as in the case of the State of Alabama, the Senate would not, over the protest of the two Senators from that State, take away the rights of that State.

In this particular case, my colleague [Mr. TYSON] and I are agreed. We could do nothing else. We are both whole-heartedly for the Muscle Shoals proposition. We want to see it go through; and I want to say to you that if you eliminate the Cove Creek Dam it will go through almost instantly. I have no doubt that those on this side who have been good enough to stand with my colleague and me in regard to this matter would cheerfully and willingly yield to the Muscle Shoals bill even in its amended state, and it would go through within 10 minutes after it is presented to this body. I hope Senators will yield and agree that this may be done in the interest of fairness, in the interest of justice to a State that has rights, and admittedly has rights.

No one has challenged the rights of the State of Tennessee in this matter. The Senator from Nebraska [Mr. NORRIS], ordinarily the fairest kind of a man, has stated that he would introduce a separate bill to give us these rights to which we are justly entitled. So it seems to me that under these circumstances we might put it in this bill, if we are going to have this property taken away, or, in the alternative, not to include it at this time, until we can include in the same measure a statement and a guaranty of the rights of the State of Tennessee in the matter.

I do want to say something about the fertilizer provision of this bill.

It will be remembered that we provide in a real and a substantial way, in the Senate bill, for the production of fertilizers down there. Senators, if the farmers are ever to have any real chance at cheaper fertilizers, they can only get that chance by providing for the manufacture of fertilizers there. It can not be done, they can get no benefit simply from an experimentation there, or very little benefit. The real benefit would come from actual sales to the farmers of cheaper fertilizers at that plant. Under the provisions of the amended conference report I very much fear that the farmers will not be guaranteed cheaper fertilizers; and the only reason why I would be willing to agree to this report, even if Cove Creek should be left out, would be the fact that we could afterward amend the bill so as to give a measure of relief to the farmers.

As we all know, as every man here knows, the Fertilizer Trust fixes the price of its product. There are many of them in combinations. Just a short time ago, as I pointed out a day or two ago, perhaps several days ago, the Department of Justice charged these several companies at Baltimore with being in a combination or trust, contrary to the antitrust law; and my recollection is that they pleaded guilty to the charge. If they did not plead guilty, they certainly were found guilty by the court; and my recollection is, though I will not be positive about it, that they pleaded guilty to the charge, and were fined $100,000; and yet in less than a year we find them fixing the prices of fertilizers in Tennessee. They admit that they fixed the prices of fertilizers at least $2.05 a ton higher in Tennessee than they did right in the same field, across the line, in Alabama.

If we are going to manufacture nitrates there—which are the principal ingredient of fertilizer—and sell them to the fertilizer people, what hope can we have, under these conditions, that the fertilizer people will sell them cheaper to the farmer?

I hope that some good may come out of it, but I can not see where it would come. I can not imagine how the farmers could get them cheaper as long as the Fertilizer Trust fixes the price of fertilizers when they sell them to the people. In my judgment, it is a monstrous thing for this great organization to fix prices higher in one State than in another. I never knew why they fixed them higher. They made some explanation of it, only one explanation, however, being the least bit tenable, and that was the explanation that there was a 20 cents per ton higher tax in Tennessee than there was in Alabama. That is inconsequential. There may have been other charges in Alabama that overcame that higher tax; but, whatever the facts were about that, certainly 20 cents a ton should have been the maximum of the increase in price to the Tennessee farmers.

Those of you who do not live in the South perhaps are not acquainted with the absolute necessity of fertilizers. The farmers can not get along without them. Millions, nay, hundreds of millions of dollars, perhaps, are spent for fertilizers every year in our southern country. We have to restore the lands in order to make them productive.

The fertilizer question is one of the principal questions to the farmer. The fertilizer expense is one of the principal expenses of the farmer. With the present low prices of our farm products, with the farmers of the country at the low ebb in which they find themselves, with prices generally going down, with the prices of everything they have to use constantly going up,

including fertilizer, their condition has been almost an intolerable one.

Every one in this country realizes that intolerable condition. Newspapers write about it every day. Magazines publish it in every issue. Statesmen talk about it. They all admit it. Lawyers and doctors agree that it is so. Business men and bankers everywhere admit and deplore the tragic condition in which the farming interests of the country find themselves. Why, indeed, Mr. President, President Coolidge—who has vetoed the McNary-Haugen bill the second time—admits that there is a serious condition affecting the farmer, and he has a plan by which he thinks he could help them. Yet, with this frightful condition existing as to the farming in our country, we find that the Fertilizer Trust is fixing its prices, and we find this legislation, which will benefit the Fertilizer Trust perhaps more than it will benefit any other class of our people.

I understand that the Fertilizer Trust is entirely satisfied with this measure, and I think they should be. I hope it may be amended if it is to go through, and that it will go through without the Cove Creek Dam provision in it.

I would be willing to agree to the conference report as it has been presented if the provision as to Cove Creek could be stricken out of it, with the hope that in the future the act could be amended so as to make it a better act for the farmers of the country.

Mr. President, I happen to have been born on a farm. I think I know the farmer's condition. I have certainly the warmest sympathy for the farmers in their present plight, and I have tried as faithfully as a representative ever tried to do everything possible for their relief. In voting and in working for the McNary-Haugen bill I could not be assured that that was the real cure for the present ills of the farmer. Nobody could say that. But what I can say about that bill is that it is certainly the only plan the farmers themselves think is a real plan. They are almost uniformly for it. I think wherever they have studied it and understood it they have recommended it to the Congress. They have been here for years applying for that relief. We might certainly try that plans, as nobody has suggested a better one. Nobody has suggested any real plan at all except that plan. It is the only plan. So it has met the overwhelming approval of the Congress, and I regret more than I can say that the President, in his consideration of the matter, could not reach the same conclusion Congress has reached. I hope the bill will be passed over the President's veto. I shall certainly vote to pass it over his veto, and I hope this body to-day, perhaps, will pass the bill over the President's veto and that it will go to the House and will there be repassed over the President's veto.

I think it would be for the best interest of the farmers that that should be done. I do not know whether it can be done or not. The vote will be close in this body, and probably, from what I have heard, the bill can not pass the other House. But if it can not be passed, I regret that that is the fact. I believe it would be to the highest interest of the farmers of the country for that bill to become a law.

I might say here, Mr. President, that the American people have become divided into five large groups or classes. One is the banking capital class, one is the industrial class, one is the laboring class, one is the transportation class, and one is the farming class. Congress has passed laws for the benefit of all these classes except the farmers. We have passed the highest tariff laws in the history of this country for the benefit of the industrial class. They are prosperous to the extent they are now prosperous because of Government aid and benefit, which has been constantly given.

The transportation class of our citizens have been greatly benefited; they are prosperous now, and why? Because of Government aid through the Esch-Cummins law. They have been allowed to raise their rates; they have been allowed to become prosperous because of the Government aid.

So with the banking class of our people. By reason of Federal laws it has come about that they have become prosperous. Indeed, the banking conditions of the country are so well upheld by our national laws that it is almost impossible for any bank not to make large profits so long as the officers and agents are honest.

We take next organized labor. Organized labor has been given large benefits by Federal law, very large benefits. Some of my good Democratic friends say, "The condition of the farmers will be all right provided you take away all these special benefits that have been given to these other classes." The capital banking class, the industrial class, the transportation class, and the labor group of our people constitute now 70 per cent of all, and the farmers constitute the other 30 per cent. We have passed legislation voting into the pockets of the 70 per cent large returns for their labor and their capital. But we have not done anything, substantially speaking, for the other class, the farmers of the country. We have done nothing at all. We have given them no special benefits. So my Democratic friends say, "The thing to do to help the farmers is not to give them special benefits also, but to take away the special benefits now being given the other four classes."

My friends, if we could do that, that perhaps would be the ideal way to arrange the matter, but, looking at it as reasonable and ordinarily prudent men, does any man believe that we are going to do away with the protective tariff entirely? Even if we Democrats get into power, we are not going to do anything more than lower the rates. We are not going to abolish the system. Perhaps it could not be abolished, in justice and right. But certainly we are not going to do it; we are going to continue to give that class of our citizens better protection than we are giving the farmers.

So it is with the transportation class. We have given them benefits by the enactment of laws. Does any reasonable person believe that those laws are going to be repealed? We are going to continue to uphold that class of our citizens.

We are going to continue to uphold the laboring class of our citizens. It is the pride of every American that in these late days the man who labors with his hands should receive a reasonable and a fair and a just reward for that labor. So in the last few years by Federal law we have improved the condition of those who labor in industry, and those who labor in the transportation companies, and those who labor in the other walks of life. Does anybody believe we are going to take that away from them? We are not going to do it.

So with the banking class. Does anybody believe we are going to take away those special benefits? We know we are not going to do it. Then how can we help the farmer? By talking about taking away from the other classes the benefits they have? That is not the way to do it. The way to do it is to put the farmer on the same plane with these other four classes, and it can be done only by Federal law.

In order to help do that surely we ought to pass this bill as a fertilizer bill, to reduce the farmer's fertilizer expenses, to give him cheaper fertilizer, to take him out of the hands of the Fertilizer Trust in America, to take him out of the hands of those who fix prices, without regard to the farmer's need or without regard to competition.

I greatly regret that the Senate bill as it passed, and that the original conference report as it was brought here, have been changed in regard to the fertilizer provision of the measure, and, as I said before, I shall do all I can to have the report changed to the extent of providing for cheaper fertilizer to the farmers, just as was provided in the original bill.

Mr. President, I looked up the record in regard to the building and disposition of Muscle Shoals. We have had it ever since it was completed, and I want to recall the history very briefly.

In 1919 our Republican friends came into power, and one of the first things they did was to interfere with Muscle Shoals. At that time Dam No. 2, so-called, the Wilson Dam, the dam that generates enormous power there, was incomplete. It required many millions more to complete it. There was a recommendation from the War Department that the Congress appropriate the necessary money in the year 1919 to complete that dam.

The distinguished senior Senator from Utah [Mr. SMOOT], than whom there is not a more industrious or a more active legislator in this body, made a speech against making that appropriation, taking the position that every dollar the Government had put in Muscle Shoals had been wasted, and that if Congress appropriated any more money for the completion of that dam, it would be throwing good money after bad money, and all of it would be lost. He said that the dam if completed would be a liability to the Government instead of an asset. It was about that time that Henry Ford, who had caught the public imagination by his wonderful success as a manufacturer of automobiles, came forward with an offer for that dam. I should have said that the Republican Congress of 1919 defeated the appropriation bill by which the dam could have been completed, and stopped the work on the dam, on the theory, as the Senator from Utah [Mr. SMOOT] explained, that it would never be worth anything, that it was a liability instead of an asset.

Then it was that Mr. Ford came forward with his offer, and galvanized Muscle Shoals into life. A short time thereafter, at the next session of Congress, the money was forthcoming to build that dam, and the very Senators who had said that it was a liability instead of an asset suddenly became aware of what a splendid property it was, and many of them took the position that it was too great a property, too valuable a property to be turned over to Mr. Ford for the consideration he offered.

Mr. Ford caught the public imagination, and the whole country seemed to want him to have it. I think in my State practically nine-tenths of the people wanted him to have it.

They thought he would establish a great manufacturing plant there. They thought he would move his plant, perhaps from Detroit, down to that locality. At all events, as I said, it caught the imagination and for some years many Members of Congress tried, and I was one of them, to get the Congress to accept that offer; but they did not do it and Ford withdrew the offer.

In the meantime the dam was completed and the Government is now earning, selling the power at the extremely low price of 2 mills, or one-fifth of a cent, to the Alabama Power Co., a good return, much larger than the return from any of the offers that had been made before it. In other words, since the time when Ford's offer was withdrawn the Alabama Power Co. and its associates presented an offer. I think the Cyanamid Co. presented an offer and the Carbide Co. presented an offer, but from none of those offers would the Government have received as much as the Government is now getting by the sale of power at 2 mills, or one-fifth of a cent, per kilowatt. It is getting a very excellent income from the property at that price. Frequently, we hear that the Government is doing nothing at Muscle Shoals. It is doing everything at Muscle Shoals that it could do under the plan adopted by the President, namely, the selling of the power simply to one company, the Alabama Power Co.

What do we find is being done with the property? The Alabama Power Co. is reselling the power to the people down there at a maximum of 12½ cents a kilowatt. That is something like an 8,500 per cent spread between its cost price and selling price when we regard the 12½ cents as the maximum. But the power company comes back and says in answer to that that it is the small consumer that they sell at that large price; that to the large users they sell at a very much less price, and that is true.

Why is that? It is because of the potential competition of the large users. A large manufacturing concern can generate electricity for something like 1 cent to 1⅛ cents, as I understand the proposition. Therefore, if the power company that receives this at one-fifth of a cent from the Government does not sell to the large consumers the power at a reasonable cost, the large consumers can put in a steam plant and generate the power at about 1 to 1¼ cents. For that reason, what the power company does with the large consumer is to fix the price the slightest degree under what that large consumer could put in a steam plant for, and in that way a large amount of the current is sold to large consumers at that price. But when we remember that the power company pays only one-fifth of a cent for it and sells it for 1½ or 2 cents or 3 cents, as the case may be, all depending upon the cost of putting in an independent steam plant, it shows that they make an enormous profit.

But it is the small user of the current that the power company charges. For instance, if the Senator from Delaware [Mr. BAYARD] is a small user and has his residence in Birmingham, and if he does not pay the price asked, which is probably 10 cents in Birmingham and which is a 6,250 per cent spread over the price which the power company pays for it, they turn off his current. He can not enter into competition with them. The small consumer has no way to compete. He is obliged to take what the power company gives and pay what the power company asks.

Mr. BAYARD. Mr. President——

The PRESIDING OFFICER (Mr. BROOKHART in the chair). Does the Senator from Tennessee yield to the Senator from Delaware?

Mr. McKELLAR. I yield.

Mr. BAYARD. Is it not a fact that the power purchased by the Alabama Power Co. from the Federal Government and then resold to individual consumers is sold at a price which is not regulated by the public utilities commission in the community in which the power is sold?

Mr. McKELLAR. It is regulated by the State.

Mr. BAYARD. And in the regulation of those rates does not the State commission, or whatever body it may be called, take into consideration the cost of the transfer and delivery of that power from the Muscle Shoals plant, where it is bought by the Alabama Power Co., until it is delivered to the ultimate consumer?

Mr. McKELLAR. Of course, but I will say to the Senator that the distribution charge—and, of course, there is some slight loss in transmission—including the cost of transmission and the cost of distribution, would not be more than another 2 mills, so that if the Alabama Power Co. gets this particular current at a very low rate, the result is that the small consumer has the brunt of the burden to bear. Of course, I am very hopeful that the passage of the joint resolution will provide for that very situation. One of the things that we have all worked for is to help the small consumer.

I have nothing in the world against the Alabama Power Co. or any other company. As an American citizen I want to see them prosper. I want them to make a good profit, a generous profit, a full profit; but such a profit as that out of Government property is, to my mind, unreasonable and unfair and should be regulated in some way. We have attempted to do it in an indirect way in the pending measure and I hope it will be the means of great help to the people of my State and to the people of the surrounding States. If the municipalities secure a portion of the surplus current from Muscle Shoals, I have no doubt they will secure the distributing plant, under contract, to distribute that power. I believe it would be helpful to the power companies as well as to the people. I suppose that by reason of the joint resolution the price of current to the small consumer should be made, instead of a maximum of 12½ cents, a maximum of 5 cents a kilowatt, giving to the companies, as in the case of the other cities, a large profit, a profit that will pay large dividends, which, it seems to me, will be of immense value to the people. That is one of the reasons why I am constrained to vote for the joint resolution if the Senator in charge will leave out Cove Creek Dam.

Mr. BAYARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Delaware?

Mr. McKELLAR. I yield for a question.

Mr. BAYARD. The thing that worries me is this: I do not quite understand the Senator's argument, or else he is omitting something.

Mr. McKELLAR. I hope I am not.

Mr. BAYARD. There is a very great spread between a fraction of 1 cent and 12 cents per kilowatt. The 2 mills is the purchase price paid to the Government, and the 10 or 12 cents is the price paid by the individual ultimate consumer. I suggest to the Senator that that rate to the ultimate consumer was probably allowed by the public utility commission in the State in which it was sold, or by the public utility commissions in the several States in which it is sold.

Mr. BLACK. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator will state the point of order.

Mr. BLACK. The Senator from Delaware is not asking a question. I insist that if he makes a speech while the Senator from Tennessee yields to him the Senator from Tennessee loses the floor.

Mr. McKELLAR. It was in the form of a question. All the Senator was doing was putting it in the form of a question.

Mr. BLACK. I insist the Senator from Tennessee has lost the floor.

Mr. McKELLAR. No; I have yielded only for a question.

Mr. BAYARD. I was asking a question. I would rather form my own question in my own way, if I may.

Mr. BLACK. I am raising the point of order not because I object to the Senator from Delaware speaking, however.

Mr. BAYARD. Perhaps the Senator is so sleepy that he does not recognize the form of a question.

Mr. McKELLAR. It is certainly a question.

Mr. BLACK. I make the point of order that the Senator from Delaware, instead of asking a question, was making a statement which is the basis of an argument, and when he does that the Senator from Tennessee, if he yields, loses the floor.

Mr. McKELLAR. I have not yielded to the Senator from Delaware for anything except a question.

The PRESIDING OFFICER. The Chair will request the Official Reporter to read the matter in dispute.

The Official Reporter (Mr. Wick) read as follows:

Mr. BAYARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Delaware?

Mr. McKELLAR. I yield for a question.

Mr. BAYARD. The thing that worries me is this: I do not quite understand the Senator's argument or else he is omitting something.

Mr. McKELLAR. I hope I am not.

Mr. BAYARD. There is a very great spread between a fraction of 1 cent and 12 cents per kilowatt. The 2 mills is the purchase price paid to the Government, and the 10 or 12 cents is the price paid by the individual ultimate consumer. I suggest to the Senator that that rate to the ultimate consumer was probably allowed by the public utility commission in the State in which it was sold, or by the public utility commissions in the several States in which it is sold.

Mr. BLACK. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator will state the point of order.

Mr. BLACK. The Senator from Delaware is not asking a question. I insist that if he makes a speech while the Senator from Tennessee yields to him, the Senator from Tennessee loses the floor.

The PRESIDING OFFICER. It would seem to the Chair that the matter is not in the form of a question.

Mr. McKELLAR. Is the Chair going to refuse to take the word of the Senator from Delaware? I have always understood that the word of the Senator from Delaware was good.

Mr. BAYARD. I started to formulate my question, and the Senator from Alabama interrupted. Just what he said I could not hear, but I was giving the ground for my question. I started my colloquy a moment ago with the Senator from Tennessee by asking him a question.

Mr. McKELLAR. And I yielded for a question.

The PRESIDING OFFICER. We will hear the Senator from Delaware complete the question.

Mr. McKELLAR. I yield for the purpose of enabling the Senator to complete the question.

Mr. BAYARD. I would like to restate my question so the Senator from Alabama may not take offense or object.

Mr. McKELLAR. I yield, provided it does not take me off the floor.

The PRESIDING OFFICER. The Chair can not act until the matter is presented, because the point of order has been raised.

Mr. McKELLAR. This question will not interfere with the rule.

Mr. BLACK. I had raised the question that whenever any Senator——

Mr. McKELLAR. Oh, Mr. President, I can not yield to the Senator from Alabama.

Mr. BAYARD. Mr. President, I withdraw my attempt to propound any question whatsoever.

Mr. BLACK. If any talk is being made, whether it is called a question or not, the Senator from Tennessee loses the floor if it is a speech instead of a question.

The PRESIDING OFFICER. As the record stands, the matter is not a question.

Mr. McKELLAR. The Senator from Delaware stated that he was about to complete his question when he was interrupted by the Senator from Alabama. I take it the Senator from Alabama was not correct in his point of order. I would like to have the Chair rule.

The PRESIDING OFFICER. The Chair rules that, as the record stands, no question has been asked, and the Senator has, therefore, lost the floor.

Mr. BLACK. Mr President, I understand this is the second speech the Senator from Tennessee has made.

Mr. McKELLAR. Oh, no; it is not. I spoke yesterday on the subject of recommitting the conference report.

Mr. NYE. Mr. President, has the Chair ruled that the Senator from Tennessee has lost the floor?

The PRESIDING OFFICER. The question before the Senate is the adoption of the conference report.

Mr. McKELLAR. I know, but does the Chair rule that I have lost the floor?

The PRESIDING OFFICER. The Chair so rules.

Mr. McKELLAR. I appeal from the ruling of the Chair. I will say to the Senator from Nebraska that I am compelled to do so by reason of a point of order which has been raised. I believe I told the Senator from Nebraska that I would make no point of order or anything of that kind while he was out, and I am just saying to him now that I feel that I should appeal from this ruling, if it meets his approval. I do not want to be put in the attitude of acting contrary to any statement that I made a while ago to the Senator from Nebraska.

Mr. GEORGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Georgia?

Mr. McKELLAR. No, Mr. President; I decline to yield.

Mr. GEORGE. I am not asking the Senator to yield. I rise to a point of order.

The PRESIDING OFFICER. The Senator will state the point of order.

Mr. GEORGE. I think if the Chair had heard all that was said by the Senator from Delaware [Mr. BAYARD] he could not sustain his ruling. If he will call for the official reporter and have him read all that was said, I think he will see that I am correct. The Senator from Delaware began with a very proper, pertinent, and direct question, which involved two or three other questions. From so much of the record as was read to the Chair it may have appeared that the interruption was not in the form of a question, but if the whole colloquy be read it will be seen that the Senator from Delaware clearly asked a question; there was no argument about it.

The PRESIDING OFFICER. The Chair would like to have the whole colloquy read, of course.

Mr. GEORGE. If the Chair will call for the return to the floor of the reporter who took the notes, and have it all read, he will see that it was a very proper question which the Senator from Delaware directed to the Senator from Tennessee.

Mr. McKELLAR. Mr. President, I am appealing from the ruling of the Chair. May I speak upon the appeal? I ask to be recognized in order to speak upon the appeal. I have the floor; I think I have been recognized on that subject.

Mr. BLACK. I will state that I knew nothing of any agreement or suggestions of any kind between the Senator from Tennessee and the Senator from Nebraska. So, for this time, I will withdraw the point of order, but I give notice that during the continuance of this filibuster if any more speeches are made for relief during the time that a Senator is supposed to be speaking I will raise the point of order.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. McKELLAR. Mr. President, I was speaking——

The PRESIDING OFFICER. The Chair understands the Senator from Tennessee to withdraw his appeal?

Mr. McKELLAR. Yes; I withdraw it.

Mr. HARRISON. A parliamentary inquiry. What is now the status of this controversy?

The PRESIDING OFFICER. The Senator from Tennessee has the floor.

Mr. HARRISON. Is he speaking on the appeal or is he speaking on the conference report?

The PRESIDING OFFICER. He is speaking on the conference report.

Mr. HARRISON. What become of the appeal? Why was it withdrawn?

The PRESIDING OFFICER. The point of order was withdrawn by the Senator from Alabama, and the Senator from Tennessee then withdrew his appeal.

Mr. McKELLAR. Mr. President, when I was interrupted——

Mr. HEFLIN. Mr. President, I make a point of order.

Mr. McKELLAR. I decline to yield.

Mr. HEFLIN. I make a point of order.

The PRESIDING OFFICER. The Senator from Alabama will state his point of order.

Mr. HEFLIN. I make the point of order that it is out of order for Senators who slipped off last night and slept somewhere, and not knowing what has been going on, to come walking in at this time making inquiries.

The PRESIDING OFFICER. The point of order is well taken, but it does not interfere with the situation so far as the Senator from Tennessee is concerned.

Mr. McKELLAR. Mr. President, when I was interrupted, I was giving a history of the Muscle Shoals Dam project. I have before me a very interesting report submitted by the late Senator Edwin S. Ladd for himself and Messrs. SMITH, HARRISON, HEFLIN, and CARAWAY, from the Committee on Agriculture and Forestry on June 3, 1924. I will read from that report.

The undersigned members of the Committee on Agriculture and Forestry have long been convinced that the public interest will best be served by the acceptance of the offer of Henry Ford for Muscle Shoals. The extended hearings which have been held by our committee on the various offers have merely added strength to our conviction. The summary of his offer is as follows:

1. He completes Dam No. 2.

It will be remembered, Mr. President, that at that time Dam No. 2 was incomplete and was just being completed—

1. He completes Dam No. 2 and builds Dam No. 3 as rapidly as possible at cost and without profit, subject to the approval of the Chief of Engineers.

2. He leases both dams and manufactures commercial fertilizers in accordance with the demand, but he must produce annually at least the equivalent of 250,000 tons of Chilean nitrate, either mixed with other fertilizers (phosphoric acid or potash) or unmixed. This is enough for 2,000,000 tons of 2–8–2 fertilizer.

I digress long enough to point out the difference between that bill and the pending measure. Under that bill Mr. Ford was required to produce commercial fertilizers in accordance with the demand, while under the pending joint resolution, as reported by the conferees, there is no provision for the manufacture of fertilizer except for experimentation. Under the Ford offer the farmers would have unquestionably received cheaper fertilizer; under the conference report now pending there is no guaranty at all that the farmers will receive cheaper fertilizer.

I proceed with the reading of the report:

The present demand is for about three and one-half times as much phosphoric acid as nitrogen, and his obligation requires at least 257,000 horsepower continually throughout the year, or its equivalent, although the power dependable throughout the year at both dams is only 240,000 horsepower, including the steam plants. He must improve some of the irregular and unreliable power that is available for only a part of the year in order to carry out his minimum obligations as to fertilizer. There would be only 326,000 dependable all-year horsepower after storage dams in the upper tributaries of the Tennessee River have been built.

Witnesses all agreed that the price of commercial fertilizers to the farmers can be reduced one-half at Muscle Shoals, so Mr. Ford probably could not supply the entire demand; but he would have to do so at Muscle Shoals to the extent of his reasonable ability. Possibly a ton of fertilizer may be produced with less power than is now required. Then Mr. Ford could supply a greater portion of the demand from Muscle Shoals than otherwise.

Mr. President, this refers, no doubt, to the synthetic method of producing fertilizer at Muscle Shoals about which there has recently been so much talk. I am inclined to think that former Senator Ladd was correct. He was one of the most accomplished chemists that this country ever produced; he certainly was one of the most accomplished chemists that ever sat in this body. He had a wonderfully fine mind; he worked most assiduously on the Muscle Shoals problem, and sought, in a general way, to bring about the very thing that was proposed in the original Muscle Shoals bill as it passed the Senate and is brought about by that part of the joint resolution which does not undertake to take in Cove Creek. Reading further from the report:

3. He agrees to a policy of regulation by the consumer through a board of nine voting members, seven from the three leading national farm organizations, nominated by the President by and with the advice and consent of the Senate, who inspect his books, limit his profits to not more than 8 per cent of the fair actual annual cost of production, and regulate the price and distribution of the fertilizer. Since it is left to these farmers to say what items are "fair" in the fertilizer operations, the entire scheme of manufacture is virtually placed in the hands of the consumers.

4. He maintains nitrate plant No. 2 or a better one ready for use by the Government in time of war for manufacture of explosives.

5. He pays 4 per cent on the entire cost of completing Dam No. 2 and on the entire cost of building Dam No. 3, including dams, power houses, equipment, and locks, except that during the preliminary period his payments are $200,000 per year for the first six years at Dam No. 2 and $160,000 per year for the first three years at Dam No. 3.

I merely wish to say that there has been no year since that offer was made when this property has not produced a much larger return to the Government than was provided for in the Ford offer.

6. He provides for a sinking fund, which if invested in Federal farm-loan bonds will return the Government more than $100,000,000 at the end of the 100-year lease. The Government in addition to its interest would receive far more than its entire capital investment in the dams, including $17,000,000 of war-time expenditures on Dam No. 2. Thereafter the water power will be free from interest charges and its cost greatly reduced.

7. He pays $55,000 annually for maintenance and operation of the locks and dams which the Chief of Engineers agrees is sufficient for the purpose. The responsibility for the maintenance of the dams is left to the United States, but the Government is not required to rebuild the dams if they should be destroyed. He furnishes free power to operate all locks.

8. He researches improved methods of fertilizer manufacture at his own expense, employing such as are found successful, thus keeping the nitrate plant up to date.

9. As a cash payment in addition to the foregoing considerations he pays $5,000,000 for nitrate plants No. 1 and No. 2 and their accessories. Plant No. 1 is admittedly unsuccessful and would require a prohibitive expenditure to make it operative, and all agree that nitrate plant No. 2 is obsolete and must be completely rebuilt.

I call attention here to the fact that many people think—and I believe it is included in this bill—that this nitrate plant No. 2 is to be experimented with, though Doctor Ladd at that time, even that far back, thought it was obsolete and would have to be rebuilt.

10. In lieu of the Government's interest in the Gorgas steam plant (sold to the Alabama Power Co.) only the amount received from that plant shall be used to construct a similar plant so as to retain the status of the Government properties existing when bids were asked.

OPPOSITION EXAGGERATES OBJECTIONS

We do not claim that the Ford proposal is a perfect instrument. We are quite aware that objections to certain of its provisions have been industriously spread throughout the country. But we realize that no proposal made by any human being, however good or great or wise, can satisfy everybody.

The Ford offer has been made the subject of the most savage attacks which we have ever seen in any legislation. These attacks have not been of a character calculated to lead to a calm and logical decision. There have been exaggerated statements as to the amount of power involved, while the power necessary for the manufacture of fertilizer has been grossly underestimated.

By the way, I will stop long enough to say that I think it is still greatly underestimated—

The value of the property which Mr. Ford would receive, the title under which he would receive it, the significance of the lease period, the effect of the Federal water power act—in all of these particulars statements which grotesquely distort the picture have been made without fear of contradiction because of the technical difficulties involved in stating the real facts. These impassioned exaggerations have tended to lead us away from the actual facts and to appeal to our prejudices rather than to suggest constructively as to how the great benefits admittedly possible at Muscle Shoals can be best made available to this Nation.

FERTILIZERS THE PEACE-TIME PURPOSE

When Congress authorized the development of water power and the construction of nitrate plants in 1916 under section 124 of the national defense act the legislation made it clear that the peace-time purpose of the enterprise was the production of fertilizers. It was due to the farmers that the original legislation was passed. It was a consideration for their interests that caused this enterprise to be established at Muscle Shoals adjacent to a great water power and close to the Tennessee phosphate fields.

The adoption of this legislation by Congress was a pledge to the farmers that Muscle Shoals should be operated primarily for the production of cheaper and better fertilizers.

I will stop here long enough to say that I fear that this pledge is not being kept in the present report. The present report provides only for experimentation. It does not provide for the manufacture of cheaper and better fertilizers for the farmer.

Then the report goes on to say:

Have the farmers hoped in vain? The experts before our committee unanimously declare that they have not, for all agree that under a businesslike management, such as may be reasonably expected with competent private operation at Muscle Shoals such as is to be expected under the Ford plan, the cost of fertilizers to the farmers can be reduced one-half.

The feasibility of such a reduction is evident, for all agree that the nitrogen, which is the most expensive part of the fertilizer that the farmer must buy, can be produced at Muscle Shoals in the form of ammonia for 5 cents per pound, as against 15 cents per pound for ammonia in the form of Chilean nitrate at our ports, and 20 to 25 cents per pound in the form of mixed fertilizer delivered on the farm.

Among those who have made proposals for Muscle Shoals only one bidder from the beginning has undertaken to carry out the purposes of Congress at his own expense. It was his bid which originally redeemed Muscle Shoals from the program of dismantlement and destruction which had already begun when bids were requested by the Government on April 2, 1921. It was his bid which gave the lie to the representations of the group of power companies dominated by Wall Street who, when asked to bid, declared that the project was without merit and should be abandoned by the Government and that the great Wilson Dam should be left unfinished—that neither private nor Government capital should be invested in its completion.

It was his bid which carried consternation to the group of allied fertilizer companies who, with one accord, declined to make an offer when earnestly besought by the former nitrate director, Dr. A. G. Glasgow, to undertake the operation of the nitrate plants, rent free until they should earn 9 per cent on whatever investment was necessary for their operation, thereafter dividing additional profits evenly with the Government. These are the interests which, like the power companies, now heartily indorse the chairman's bill. They see real danger in Ford competition, but in the chairman's poverty-stricken Government corporation they see nothing to fear.

The chairman of the committee at the time referred to, 1924, was the senior Senator from Nebraska [Mr. NORRIS].

NO LIMIT TO FERTILIZER PRODUCTION IN FORD OFFER

The fact is most significant that while none deny that fertilizers can be made and their cost can be reduced one-half at Muscle Shoals, yet only one bidder agreed to produce fertilizers with the full capacity of

nitrate plant No. 2 as a minimum, and, unlike all others, one bidder alone placed no maximum on the amount of power to be devoted to fertilizer production. Other bidders copied the provisions of that proposal as nearly as they dared, but they dared not copy the fertilizer provisions of the offer of Henry Ford for Muscle Shoals. So, aided and encouraged by the chairman of our committee, they sought to belittle and discredit the only proposal that offers the farmer the full measure of the benefits possible for him at Muscle Shoals.

Mr. Ford's minimum obligations to produce fertilizer are limited as to the kind to be produced and the maximum amount to be produced, only by the demand. His fertilizer obligations will require more power than the entire supply of the dependable power available at Muscle Shoals with both steam-power plants in operation, and they will require the improvement of some of the irregular and unreliable power in order to carry them out.

To produce 40,000 tons of fixed nitrogen by the most approved process (Haber-electrolytic), and to furnish with that the phosphoric acid that must be supplied to market these fertilizers according to demand, will require the continuous use of 257,000 horsepower or its equivalent, while the entire dependable supply of power available at Muscle Shoals is only 241,300 horsepower, including the steam-power plants. The frequent statements of the newspapers that the useful power at Muscle Shoals is 850,000 or 1,000,000 horsepower are simply idle exaggerations. We brand all such misleading declarations as false, and we base our statement on the testimony of the United States engineers. Instead of representing one-third or one-fourth of the water-power resources of the Southeastern States, Muscle Shoals in reality constitutes only an insignificant part of these resources, and its entire possibilities amount to a very small fraction of the undeveloped water powers of the United States.

EFFECT OF IMPROVED PROCESSES

It is to be expected that as the processes become improved the amount of power necessary for the manufacture of fertilizers will be reduced; i. e., a ton of high-grade fertilizer probably will be made in the future with less power than is now possible. We can not agree, however, that the time ever will come when no power at all will be required to manufacture fertilizers or anything else. A manufacturing operation of any kind, by its very nature, requires the expenditure of energy and always will.

Since it is agreed that at Muscle Shoals, under competent private management, the cost of fertilizers can be reduced one-half, it is not reasonable to expect that Mr. Ford will be able to supply the entire fertilizer demand of the United States, for witnesses agree that as the cost is reduced the demand will be multiplied, but Mr. Ford will be obliged to meet the demand at Muscle Shoals to the extent of his reasonable ability. In fairness to Mr. Ford, we must therefore conclude that as the power requirements diminish the tonnage of fertilizer will be increased and the effect of improved processes will be, not to place at Mr. Ford's private disposal a large amount of power for private purposes, as has been represented, but to enable him to supply a greater part of the demand for these improved fertilizers than he could supply otherwise.

Mr. Ford under his offer agrees to research these improved processes and adopt such as are commercially successful. His obligation to do this is not dependent upon whether or not he has been able to amortize his investment in any particular process or plant. Nitrate plant No. 2 must be rebuilt not once but many times over, no matter whether it has been possible to write off the cost of the plant and pay for its reconstruction out of the earnings or not. To our minds this constitutes as valid an assurance as this Government could obtain from any source, guaranteeing that for 100 years this Nation will keep pace with the nations of the world in its means of obtaining the nitrogen that is indispensable to our national life, whether in war or in peace.

It has been claimed that Mr. Ford desires Muscle Shoals chiefly to produce aluminum, magnesium, and their alloys, and other metals, and it has been brought to the attention of our committee that on the authority of the United States Fixed Nitrogen Research Laboratory processes do exist whereby aluminum can be produced as a by-product of fertilizer.

Since the determination of the fairness of the items which constitute the cost of the fertilizer under the Ford offer is placed in the hands of the consuming public themselves, it may safely be assumed that the more valuable the by-products which can be produced in connection with the fertilizer manufacture the cheaper the fertilizer itself will become, and we believe that the production of useful by-products in this way, as suggested to our committee by Mr. Ford's chief engineer, Mr. W. B. Mayo, should be encouraged.

PUBLIC INTEREST PROTECTED THROUGH REGULATION BY CONSUMER

Under the Ford proposal a new policy in the utilization of a great natural resource would be adopted; a policy of regulation by the consumer in the manufacture and sale of fertilizers. This is a policy which has been proposed only by Mr. Ford. It is a policy which the special interests are fighting with every resource at their command, and it is accomplished in the Ford offer by limiting the profit on fertilizer to a maximum of 8 per cent upon the fair actual annual cost of production, as determined by a board of farmers' representatives who inspect the books and determine the price and distribution of the product. Since it is left to these farmers to say what items are fair in the operations, the entire scheme of manufacture is placed in the hands of the consumers.

The production of fertilizers under the Ford offer is not made conditional upon the ability of Mr. Ford or his company to make a profit of 8 per cent or any other per cent, but his profit, if any, is limited to this amount.

Since this regulation by the consumer applies to the principal operations at Muscle Shoals, namely, the manufacture of fertilizer, contrary to all the misrepresentations that have been broadcasted throughout the country by a willing press, the truth is that under the Ford offer the Muscle Shoals power will be employed primarily in the public interest and primarily under public control.

FAVORING POWER COMPANIES AT FARMERS' EXPENSE

There is another policy, the adoption of which has been urged at Muscle Shoals; namely, that this power should be devoted primarily not to fertilizers but to public utilities and used for operating cotton mills, street cars, small motors, and electric lights. To adopt such a policy and distribute this power insteady of utilizing it first of all for the purpose for which the dam was built, namely, for the production of cheaper and better fertilizers, would be to violate our pledge to the farmers of the country and to decline to bring this effective aid to the farmer at the time of his greatest distress.

Public utilities already control 90 per cent of the water powers of the country, yet they have done nothing to help the farmer reduce his expenses by the sound and feasible method of increased production at less cost through the use of cheaper and better fertilizers. Since only 16 per cent of the water powers of the country have yet been developed, and 8,000,000 horsepower are available in the section of the country in which Muscle Shoals is located, we believe that the least we can do for the farmer is to permit this one development to serve agriculture by the acceptance of the Ford offer.

POWER DISTRIBUTION UNDER FORD BID

As for distribution of power under the Ford proposal, we are convinced that since the production of fertilizers is the purpose of the development in peace time it is not a matter of importance whether power is distributed from this plant or not. It will be interconnected with other plants, of course, as a matter of common business sense, whoever operates it. Mr. Ford has promised the public in a statement published October 11, 1923, that he will build transmission lines 200 miles each way from Muscle Shoals. This is feasible, since undoubtedly there will be a period of years while the new fertilizers are being introduced, during which time there will be power available for distribution. When, later, the demands of fertilizer manufacture require the use of this power it is reasonable to expect that it can be supplied to the consumers from the storage dams to be built in the upper tributaries of the Tennessee River, or from other sources. In any event, when Mr. Ford distributes power to the public his company becomes a public utility, and, like any other public utility, including the chairman's Government corporation, his company automatically becomes subject to regulation by the State public-utility commission of the State in which he does business.

EXAGGERATED VALUE OF PROPERTY

We repudiate the extravagant statements that have been made by the chairman of the committee and others to the effect that the Government is selling $85,000,000 worth of property for $5,000,000. The property has no such value. Half-price fertilizers can not be furnished to the farmer by utilizing either of the present nitrate plants. Either plant would have to be completely rebuilt to accomplish such a purpose.

Nitrate plant No. 1 is a small, unsuccessful experimental plant having a capacity of 30 tons of ammonia per day and requires a prohibitive expenditure from the standpoint of cheap fertilizer in order to make it operative at all.

Nitrate plant No. 2 was built to use the cyanamide process, which is admittedly obsolete, and the plant must be rebuilt to use another process and must be supplemented by other plants before it can serve agriculture effectively.

The salvage value of these two nitrate plants has been estimated by the Ordnance Department, first, as scrap only, $7,952,000, and second, as an operating concern for those portions which can be commercially operated and the remainder as scrap, $12,597,000. They have no value at all approximating their original costs.

Neither of these unsuccessful and obsolete plants, however, is to be conveyed in fee simple to Mr. Ford. He does not get a clear title to any real estate, improved or unimproved, for the provisions of his offer are written into his deeds and become a cloud on the title for 100 years.

PROVISIONS OF POWER ACT DO NOT APPLY TO FERTILIZER MANUFACTURE

To ask Mr. Ford to come under the Federal water power act would be unfair to him, for this is an entirely different form of enterprise

from those which the Federal water power act is intended to cover. It would be equivalent to asking him to invest $50,000,000 or more in an enterprise to be controlled by three political appointees sitting here in Washington. Furthermore, it is a matter of serious doubt, in view of the testimony as to the decisions of the Supreme Court, whether the "50-year" limit and other so-called regulations of the Federal water power act could be enforced against private operators who own their own dams in navigable streams, while there is no question that such provisions could be enforced against Mr. Ford as conditions attaching to a lease of Government property.

As Mr. McKenzie has declared in the House, the length of the lease of a water power has no more to do with the rate at which that power is sold than the length of the lease of a railroad has to do with the price of a railroad ticket. We believe it is absolutely immaterial as to whether the lease is for 50 years or for a hundred years if the terms of the lease are in the interest of the public.

GREATER REGULATION IN FORD OFFER THAN IN POWER ACT

We contend that Mr. Ford and his company are regulated in the public interest under the terms of his proposal to a far greater degree than is any licensee under the Federal water power act.

Under the power act a private operator who develops a water power can use that power for whatever purposes he pleases, and he can sell the products made by its use at whatever price the market will bear. No consumer is entitled to inspect his books. He fixes his prices as he pleases and he distributes his product to suit himself.

Under the Ford offer the chief product must be fertilizer, and in its manufacture the profits are limited to 8 per cent of the fair actual annual cost of production. Mr. Ford's books are subject to inspection by a board of consumers, who determine what items in his costs are fair and what his actual cost has been, and who fix the price of the fertilizer and control its distribution. No more complete case of regulation of a great industry by consumers ever was proposed, and nothing in the history in this or any other country for the past hundred years that has come to our notice justifies the belief that by defeating the Ford proposal we will secure something better for the farmers and other consumers.

FALLACY OF 50-YEAR LEASE

A short lease accomplishes but one purpose—it provides an opportunity whereby the Government can step in at the end of the lease period and demand a greater charge. No objection to this charge is made by the power companies who are licensed under the power act, for such a charge becomes at once a fair part of the cost of the power, which is not paid by the power companies, but is merely added to the consumer's bill and becomes in effect a tax—not a uniform tax upon the industry as a whole but a special kind of a tax upon the particular class of consumers who happen to be dependent upon this particular power.

We agree with Mr. McKenzie that electric power generated from coal is one of the very few commodities that is cheaper to-day than it was 20 years ago, and since it is well known that more than 80 per cent of the energy in our coal is wasted in the best of our steam power plants, there is a vast room for improvement; and improvements, we believe, will continue to be made. As Mr. McKenzie states, the new mercury boilers are an excellent example of the progress that may be expected in this direction.

A mere superficial examination of the case will convince anyone that if the Ford offer is rejected the taxpayers will lose far more in 50 years of Government ownership and operation at Muscle Shoals than they can possibly gain by refusing to consent to the 100-year lease period in Henry Ford's offer.

NO REGULATION OF PROFITS OR RATES UNDER POWER ACT

It has been claimed that under the Federal water power act the profits of a licensee would be limited and the public would secure all profits in excess of a fair return on the licensee's actual net investment. This is denied by the official statement of the executive secretary of the Federal Power Commission himself, who admits in his last annual report that he does not expect to expropriate a dollar of excess profits, for this is a function of the States. The State of Alabama can regulate Mr. Ford's profits, but not the Federal Power Commission.

Another State function in which the Federal Power Commission has little or no voice is the regulation of rates. The Federal Power Commission can not intervene except in the unlikely contingency in which two State utility commissions fail to agree on the rates. In all other cases the rates are in the hands of the State public-utility commissions themselves, as are also the terms of service and amounts of security issues.

Under section 8 of his bill the chairman attempts to put his Government corporation into the public-utility power business on a different basis from any other power company operating in the State of Alabama. He undertakes to give his board of directors the power to make rates. This provision of his bill is illegal, and the Senator's company will soon discover that they have no such power as is here attempted to give them, either as to rates or service, including the construction of transmission lines, for, like any other public utility, they will be subject to the rulings of the State utility commission.

The constitutionality of the entire Federal water power act, aside from its provisions for the control of navigation, has been called into question by the States of New York and New Jersey, and the attorney general of New York reports that an adjustment has been reached in their case under which the State is to retain its rights and that a settlement of the case is in sight.

In view of the benefits which have been claimed for the Federal water power act by the advocates of the chairman's bill and their loud protests against the Ford offer for not coming under it, it is surprising to see that no effort is made in this bill to extend the benefits of this act to the chairman's corporation at Muscle Shoals.

It, indeed, would be a flimsy pretext for ignoring the welfare of the farmer to deny to him the benefits of the Ford offer because that offer failed to conform to certain arbitrary conditions wholly inapplicable in the Muscle Shoals case, conditions which even the advocates of the power act are unwilling to meet at Muscle Shoals and which conditions in all probability will be found to be illegal and unenforceable.

NO GOVERNMENT INSURANCE OF DAMS

The fund of $55,000 per annum provided in the Ford offer for the maintenance of the dams and locks has been declared sufficient for all ordinary maintenance costs both by the Chief of Engineers, Gen. Lansing H. Beach, and the Assistant Chief of Engineers, Gen. Harry Taylor.

So far as insuring the dams is concerned, while the United States is responsible for their maintenance, there is nothing in the Ford offer which compels the Government to guarantee their stability during the lease period. The Government is no more in the insurance business under the Ford offer than it is under Government operation itself. While Henry Ford does not agree to rebuild the dams in the very remote contingency of their failure, neither is the Government compelled to do so.

THE FERTILIZER MONOPOLY

Since the chairman's report attempts by indirection to make it appear that the Fertilizer Trust is a mere fiction created in the farmers' minds to deceive them, we offer the following editorial from a leading trade journal:

"CHILEAN NITRATE PRODUCERS TIGHTEN GRIP ON MONOPOLY

"News of exceptional interest in the nitrate industry is reported elsewhere in this issue regarding recent action of the Chilean Nitrate Producers Association. This body, which controls 98 per cent of the production of Chilean nitrate, voted to continue its organization for the next six years, reduced the price of nitrate for the current year, and passed a resolution not to sell nitrate to purchasers who may also buy from nonmembers of the association. About the same time the Chilean Government published a decree permitting the sale of nitrate lands only to members of the association during the life of that body.

* * * * * * *

"This decision to restrict sales of nitrate, if inclusive, means that American producers and dealers are either blacklisted by the organized producers or limited in their activities by the American law which restrains them from entering price-fixing organizations. It is a clear declaration of war against American interests in the nitrate business. The means to meet this hostile act are not obvious nor will the contest be short or easy. The ultimate result, however, is already clear. The United States will take steps to insure at the earliest possible moment full independence in nitrogen supply. It is intolerable that an act of this sort should permanently place a limitation upon the industrial and fertilizer use of nitrates." (Chemical and Metallurgical Engineering, May 19, 1924.)

If anyone doubts the reality or the effectiveness of this monopoly let him examine this country's nitrate bill, which totaled $62,972,054 for 1923, and since the beginning of importations has reached the staggering total of $1,103,153,964.41, some 60 per cent of which is paid by the farmer.

The statements about the existence of a Fertilizer Trust are undeniable, and the farmer's interests will not be served by any attempt to ridicule the facts.

Muscle Shoals under efficient private operation as would follow the acceptance of the Ford offer would have a radical effect upon the prices of the Nitrate Trust, for Mr. Madden testified before the House Military Committee:

"I was told by one of the men heavily interested in Chilean nitrates the other day—I was talking to him about this plant, and I told him I thought we would be able to produce nitrates and sell to the farmer much more economically than they have ever purchased them before. He said, 'If that shall prove to be the case, we will cut the price of Chilean nitrates in two—in three, if necessary' * * *."

TWO COURSES OPEN

We agree with the majority of the committee who have finally come to the conclusion that we, like many others, reached two years ago, namely, that there are but two courses open to the Government, and after hearing the additional testimony of the past six weeks we are the

more firmly convinced that Acting Chairman McKenzie, of the House Committee on Military Affairs, correctly appraised the situation when he stated in his majority report:

"Two courses are open, one Government ownership and operation, which in view of the character of the project would, in the judgment of the majority of the committee, mean not only failure from the standpoint of income but disaster to the hopes of the farmers and other users of commercial fertilizer. To have the Government undertake to engage in the manufacture of fertilizer ingredients, with political superintendents, foremen, and straw bosses is unthinkable, and to undertake such a scheme would be unspeakable folly.

"The alternative course is to sell the tangible property to private individuals or to a corporation on conditions prescribed by Congress, lease the power at a fair rental, and permit individual American initiative and ingenuity to have an opportunity at this place, where the greatest water power in our country can be developed, requiring the preservation of the element of national defense, and at the same time giving an opportunity for relief, if such there can be, to not only the Southland but our entire country in the way of commercial fertilizer at reasonable prices.

"Is this possible? Does the Ford proposal promise such a consummation? We feel that it does" * * *.

We heartily concur in these views.

THE FOLLY OF A GOVERNMENT FERTILIZER BUSINESS AT MUSCLE SHOALS

We speak in the interest of those who favor Government operation as a principle when we declare that they do a grave injustice to the cause which they indorse when they urge that this course be followed at Muscle Shoals. If they were proposing that the Government should go into the shoe manufacturing business, for example, even so radical a course would be open to less objection than that which the majority propose: The shoemaking business is an old-established industry. Its operations and methods are well known; they have been standardized for a generation or more.

The electrochemical fertilizer industry, on the other hand, exists in large commercial form only in Germany where, according to the testimony of Doctor Cottrell, it has been operated entirely by private enterprise. In the United States there is no such industry, and there are no precedents to follow. Mr. E. H. Hooker, one of the most competent electrochemical engineers in the United States, well expressed the situation to our committee when he said, "This art is changing so fast that you can hardly follow it."

The majority of the committee would have the Government engage in an undertaking in which any plant, however well designed, admittedly may become obsolete even before its construction is completed. How can any reasonable man insist upon taking the taxpayer's money by the scores of millions of dollars and sinking it in great fertilizer plants under such conditions when, with the Ford offer accepted, private capital agrees to research these improved processes on a commercial scale and to adopt such processes as prove their worth, insuring that the nitrate plant will be kept up to date without 1 cent of expense to the United States Government?

OUR EXPERIENCE WITH GOVERNMENT OPERATION AT MUSCLE SHOALS

Our own experience in this nitrate business should be a warning to us. Nitrate plant No. 1, utilizing the so-called Haber-Bosch process, was built on the strength of a report which recommended the expenditure of $3,000,000 for this purpose, but actually cost $13,000,000, and then was unsuccessful as a nitrogen plant. The cost of making that plant a success has been estimated at $4,000,000 to $5,000,000, but its capacity is only 30 tons of nitrogen in the form of ammonia per day. Such an investment for so small a production would be prohibitive from the standpoint of cheapening the cost of fertilizer. It was not until the process was perfected by the Atmospheric Nitrogen Corporation (a subsidiary of the Solvay Process Co., and of the General Chemical Co.) under private initiative at Syracuse, N. Y., that it was made physically possible to operate this process successfully.

Whether this Haber-Bosch process is best for fertilizer is a disputed question; the former advocates of the process now recommend the "Haber-electrolytic" process; but no manufacturer in the United States has undertaken to build a large-scale plant to utilize either of these processes for fertilizers or for any other purpose.

Nitrate plant No. 2, utilizing the cyanamide process, was authorized when it became apparent that we had to have a domestic supply of fixed nitrogen for explosives regardless of cost in order to win the war. It was originally contended by the American Cyanamid Co., who built the plant, that the cyanamide process was the only process suitable for the production of nitrogen fertilizers. The war-time estimate for its cost was $30,300,000, but it actually did cost, not including the Gorgas steam plant and transmission line, $67,800,000. Yet all witnesses agree that for fertilizers, the cyanamide process is obsolete, and it has been declared by Maj. J. H. Burns that to change to the Haber-electrolytic process now in favor, would cost not less than $10,000,000.

Government operation in the construction of the nitrate plants has demonstrated: First, that where a process had not been commercially worked out under private initiative it was not solved under Government management; second, that the cost of construction greatly exceeded the war-time estimates; third, that the processes of both nitrate plants became obsolete before the plants were completed.

If we are to undertake public operation of industry in the United States, then let us give it a fair trial. Let us begin with some well-established industry in which the day of radical changes has long gone by. To begin with such an industry as commercial nitrogen fixation, with the chances all against us, with only one thing certain, and that is that the expenditure will be many times the original estimate, is a course which would do a grave injustice to the general policy of Government operation. It could be justified only if we had no satisfactory offer from private sources. With the offer of Henry Ford before us, it is neither justifiable nor excusable.

WHY GOVERNMENT OPERATION FAILS AT MUSCLE SHOALS

At the very outset the success of the Government enterprise is jeopardized by a three-way division of responsibility: The Secretary of War builds the power dams and the upper storage dams; the Government corporation builds an addition to the steam power plant at nitrate plant No. 2 and transmission lines and operates the dams and this steam power plant, selling power to the Secretary of Agriculture and to the public; the Secretary of Agriculture operates either or both of the nitrate plants (although his power supply is limited to barely half enough to operate nitrate plant No. 2 for nitrogen alone, to say nothing of phosphoric acid) and makes fertilizer and sells it at any "reasonable" profit to the trade in general.

The opportunity for advancing a perfect alibi on the part of any or all concerned in case of misfortune is too evident to require comment. No one is responsible for the conduct of the enterprise as a whole, and no one must take the sole and direct responsibility if it fails. The very first axiom of successful industry is inexcusably violated.

The success of a manufacturing enterprise is very largely dependent upon competent experienced management. Executives capable of successfully operating an enterprise of such a magnitude are not to be had for $7,500 per year and are not likely to be found in a Government bureau. Such men would be hard to find, particularly in an undeveloped industry, for they are already employed at salaries many times this amount.

The influence of politics presents another easy road to failure under Government operation. The chairman has endeavored to prevent political considerations from affecting the success of the enterprise, but so long as human nature remains as it is, the element of politics, directly or indirectly, must be reckoned with in any Government undertaking. If Congress wishes to repeat the scandals of the Veterans' Bureau, the Shipping Board, or the oil leases it needs only to turn this great plant over to a Government bureau to be operated as a commercial undertaking.

GOVERNMENT OPERATION MEANS MANY MILLIONS MORE APPROPRIATIONS

The overwhelming objection to the chairman's bill, however, when Congress is endeavoring to reduce taxes, is the large and unwarranted additional expense which the taxpayers must shoulder under the chairman's bill with no assurances of any adequate return on the investment or of ever recovering any part of the principal. Chairman Madden, of the House Committee on Appropriations, forcibly brought this feature of the situation to the attention of the House on June 30, 1923, and again on March 6, 1924.

Mr. Madden took the official estimates of the cost of remodeling the nitrate plants so as to utilize the process which at present is most in favor, and the estimated cost of partially stabilizing the flow of the Tennessee River in a way similar to that proposed by the chairman in his bill, and found that if the Government undertook to engage in the fertilizer business there would be required the following additional appropriations:

1. Auxiliary or reserve water supply to stabilize the flow of the Tennessee River that a more uniform amount of power would be available the year around	$20,000,000
2. For remodeling nitrate plant No. 1	4,000,000
3. For remodeling nitrate plant No. 2	10,000,000
4. For a phosphoric acid plant to meet the demand for mixed fertilizers	15,000,000
5. Operating fund	10,000,000
Total	59,000,000

Since Mr. Madden prepared these figures, however, experts before our committee have indicated that they are too low. For example, the phosphoric-acid plant necessary to enable the Government to produce nitrogen and other commercial fertilizers according to demand has been estimated to cost $20,000,000 instead of $15,000,000. It also appears that the $20,000,000 estimate for the cost of the upper river storage dams may be entirely inadequate, for the surveys of these dams have not yet been completed.

The Secretary of War is directed in the Norris bill to build as many storage dams as he sees fit to regulate the flow of the Tennessee River. Without denying the desirability of regulating the flow of the river, this is an unlimited authorization to take funds from the public Treasury for the purpose of building dams when private power companies

are already competing for the privilege of constructing these very dams at their own expense. The Federal Power Commission already has conflicting applications for permits to build many of these storage dams.

The chairman's bill also provides for adding 50 per cent to the capacity of the steam power plant at nitrate plant No. 2. This is an authorization to add 40,000 horsepower to the capacity of the plant which at the reasonable figure of $100 per horsepower would cost $4,000,000.

In section 3 of his bill, Senator NORRIS undertakes to compel present and future owners of dams on the Tennessee River which would benefit by these storage dams, to pay for a share in the cost of these dams proportionate to their benefits, but this provision, however fair it may be, is clearly unconstitutional, for the Federal Government has no authority over navigable streams by virtue of which it can compel developments on one stream to pay for their share or proposed storage reservoirs while those on other streams do not.

NO CHEAP FERTILIZER FOR FARMER UNDER NORRIS BILL

The change in the title of the chairman's Government corporation from the Federal Chemical Corporation to the Federal Power Corporation, is very appropriate. While it might conceivably have been agreed that the principal aim of the chairman's bill of last year was to preserve the purpose of Muscle Shoals as a source of better and cheaper fertilizers for the farmers of the country, it can not be denied that in this bill as now amended the fertilizer becomes a very minor and secondary consideration.

I might add that unfortunately, under the provisions of the amended conference report, the fertilizer becomes, in my judgment, a most minor consideration, even more so than under the original bill.

Muscle Shoals under the chairman's bill is a public utility power proposition in which the interests of the farmers have been utterly lost in a giant superpower scheme in which Muscle Shoals would be but an insignificant part. The national value of Muscle Shoals disappears and the great dam that was built to serve the farmer becomes a mere cog in a machine for operating street cars, cotton mills, and electric lights in a limited section of the country. Let no farmer expect cheaper fertilizer under such a plan—his chance is gone.

It needs no argument to show that this is so, for the chairman's bill provides that no more than 25,000 primary horsepower shall be used for the manufacture of fertilizer, together with 75,000 horsepower of the secondary or irregular power which would exist not more than four or five months of the year and perhaps less.

Among the proposals made to the committee were several in which the bidders sought to throw a fertilizer sop to the farmers in order to secure control of the water power, but none of them offered to provide as little as 25,000 primary horsepower for fertilizer purposes. If we would protect the farmers' interests then any of the bids which were considered by our committee would be far superior to what the chairman proposes. The fertilizer monopoly and the Alabama Power Co. and their associates could not have drawn a bill that would have more effectually freed them from any real competition at Muscle Shoals than this Government corporation.

WHY NOT AWARD IT TO THE ALABAMA POWER CO.?

The power companies see in this bill a wide-open gateway to the power that they long have coveted and which they could not get directly by offers of their own.

It is a well-known fact that the Alabama Power Co. and its associates have been endeavoring to secure control of the Muscle Shoals power for years, and if under Government operation we are merely to operate the hydroelectric plants for the benefit of the power companies, turning over the power to them to distribute and sell, then, in our judgment, we would deal more honestly with the country if we accepted the offer of the power companies directly. We do not believe that this Government should try to do by indirection what it is unwilling to do frankly and openly.

$130,000,000 MORE APPROPRIATIONS

Since the chairman has proposed to take away this power from the farmers and to distribute it over independent lines to the principal cities within a radius of 400 miles, and since this is the policy to be voted on under this bill, we want the Senate to know what that means:

The present estimate of $51,000,000 for the cost of Dam No. 2 complete does not include the cost of the transformers, transmission lines, and other equipment necessary for long-distance transmission.

Considering only five main lines—Cincinnati via Nashville and Louisville; Little Rock, Ark., via Memphis; New Orleans via Meridian; Atlanta via Birmingham; and Knoxville via Chattanooga—the transmission distance would be at least 1,500 miles, and, according to General Taylor, a single power line would cost on an average at least $20,000 per mile, not including the right of way. This would cost $30,000,000 for transmission lines alone, and the additional equipment, not including the local distribution in the various towns and cities, would require at least $5,000,000 more.

If we confine our transmission system only to those cities within 200 miles of Muscle Shoals, we would require at least 550 miles of main trunk lines.

The cost would be:

550 miles of high-tension transmission line, at an average cost of $20,000 per mile	$11,000,000
Right of way, transformers, and other equipment (estimated)	4,000,000
Total	15,000,000

Correcting the estimate of probable appropriations necessary on which no reasonable return can be assured, we must increase Mr. Madden's figures as follows:

Estimated additional cost to Government if United States engaged in fertilizer business (Madden estimate)		$59,000,000
For additional cost of phosphate plant	$5,000,000	
For transmission system to near-by cities	15,000,000	
Addition to steam-power plant	4,000,000	
		24,000,000
Total		83,000,000

If, however, the power is to be distributed over a 400-mile radius by means of the five transmission lines referred to above, we must add $21,375,000 to this estimate, bringing the total new appropriations to $104,375,000.

To this we must add $25,000,000 for building Dam No. 3, and our immediate future expenditure then becomes $129,375,000.

When we have completed Dam No. 2, our expenditures at Muscle Shoals will total (exclusive of Dam No. 3)	$107,400,000
To carry out the chairman's program we would have to invest another	125,375,000
Bringing our total investment to	232,775,000

without the slightest assurance that any part of this huge sum could ever be returned to the taxpayers.

The capital of the corporation consists of $3,472,487.25 received by the United States from the sale of the Gorgas steam plant to the Alabama Power Co., together with such surplus materials as are available at Muscle Shoals, and the sum of $1,500,000 for the purpose of rebuilding nitrate plants and carrying on a great commercial fertilizer business. In other words, with less than $5,000,000 of actual cash this company is expected to obtain enough appropriations to do at least $119,000,000 worth of construction work and carry on a business which has been estimated by Mr. Madden to require at least $10,000,000 for operating capital alone. If, however, the expectations are to be carried out as recited in the chairman's report and this power is to be distributed over modern high-tension lines into even a few principal points within the area from Louisiana to the Ohio River, the immediate future appropriations for which this Government corporation would call upon us will total practically $130,000,000.

CHEMISTS AS MANAGERS

Section 14 of the chairman's bill providing for the turning over of nitrate plants Nos. 1 and 2 to the fixed-nitrogen research laboratory for operation is an amazing proposal. With no reflection upon the character or ability of the high-grade chemists of the nitrogen research laboratory, the fact remains that they are not operating executives and do not claim to be. The problems of plant operation in the production of the equivalent of 2,000,000 tons of commercial fertilizer per year (the capacity of nitrate plant No. 2) are not problems with which research chemists can be expected to deal successfully. They are problems of money, men, and management. The man who can take a new industry and operate it from the beginning on a large scale and not make any mistakes has never yet been found. Mistakes, costly ones, will be made. Some one must pay the bill. According to the chairman's plan the taxpayers of the United States will pay it, and under his plan the bill will be a large one. Under the Ford offer Henry Ford will pay it, whether it is small or large.

RISK IN MANUFACTURE OF NEW NITROGEN COMPOUNDS

There is another side to the operation of these nitrate plants which to our minds presents an unanswerable argument as to the folly of our attempting to salvage a war-time expenditure and to utilize an obsolete nitrate plant and a few houses and town lots down in Alabama by going into the manufacture of fertilizer as a Government enterprise. We refer to the serious element of physical risk which accompanies the manufacture of new nitrogen compounds.

On February 8, 1923, Senator Ladd called attention to the record of disastrous explosions which have occurred at plants using the Haber process of nitrogen fixation. He particularly made reference to the great explosion at Oppau which destroyed 1,500 lives and more than $50,000,000 worth of property in a few moments. It is now claimed that this was not an explosion due to the process but that it was an explosion of a stored supply of a new fertilizer compound containing ammonium nitrate (the latter being the same material which it has been proposed to produce under Government operation at nitrate plant No. 2) which was responsible for this terrible calamity. Assuming that

the nitrogen fixation process was in no way responsible for the accident, the fact remains that there is a serious element of risk in the preparation and handling of new nitrogen compounds.

Still more recent is the explosion on March 1, 1924, of a batch of ammonium nitrate at the plant of the Columbia Salvage Corporation at Nixon, N. J. Commenting on this explosion editorially, the Oil, Paint and Drug Reporter of March 10, 1924, says:

"As was the case with respect to the disaster at Oppau a couple of years ago, the recent explosion of Nixon, N. J., which may reasonably be considered to have much in common with the German catastrophe has given rise to a great variety of opinion as to the cause * * *.

"There are so many factors of hazard connected with the handling of such material as ammonium nitrate that it would be extremely difficult to determine whether the fault was a mechanical one or one of contaminated material or lay in human error. Temporarily faulty control of evaporation might result in overheating. Momentary carelessness on the part of a workman might easily lead to disastrous results. It is, at best, doubtful whether the investigations that have been ordered will reach a solution of the mystery; although, for the sake of progress in the production of nitrogen compounds, it is to be hoped that they will uncover evidence that the explosion was not due to an irremediable hazard in such processes. It will be recalled that the owners of the Oppau plant decided after the disaster there, to give up the manufacture of ammonium nitrate.

"Whatever the cause, the explosion at Nixon points clearly to the fact that the production and handling of fixation compounds of nitrogen are not the child's play which some comment in Congress and elsewhere on the disposition of the Muscle Shoals plant might be taken to assume. Even though ammonium nitrate be somewhat more hazardous than the other compounds more generally associated with the economic consideration of nitrogen fixation, the importance of efficient chemical control of fixation plants can not be gainsaid. Such establishments are not to be classed with cider mills among the enterprises adaptable to agricultural cooperative movements."

As the Chemical and Metallurgical Engineering Magazine of March 17, 1924, remarks:

"It is to be hoped that the different investigations now under way may reveal something of the cause of the explosion—information that will help to fill the admitted void that exists in our knowledge of the behavior of ammonium nitrate, particularly under conditions in which it is associated with other materials."

When we realize that right to-day we have accumulated in the process of manufacture at nitrate plant No. 2 some 1,700 tons of ammonium nitrate, a nitrogen compound which, in itself, is supposed to be harmless, but which has already cost the lives of thousands and untold millions of property damage by its explosion, and when we realize how little is really known of the behavior of this and other nitrogen compounds, we can not avoid the feeling that if we reject the offer of Henry Ford and undertake Government operation, we may awake some morning to find that our supposed economies have vanished in the untold losses of a great calamity.

Since we have before us a responsible offer to develop this industry at private expense, backed with adequate capital which is able to command the best technical talent that the world affords, and since by accepting this offer we can assure ourselves that the United States will maintain its advanced place among the nations in this most important industry, we believe that we are indeed fortunate to have such an offer available, and in our judgment common prudence and a regard for the public interest demand that we accept it.

Mr. President, in fairly presenting the history of this plant it is necessary to present the opposing view, as presented by the then chairman of the committee, Mr. NORRIS. This is dated May 31, 1924:

The Committee on Agriculture and Forestry, having had under consideration the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala., nitrate plant No. 2, at Muscle Shoals, Ala., Waco quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes, report the same back to the Senate, with the recommendation that it be amended as follows:

1. Strike out all after the enacting clause of said H. R. 518 and insert the following:

"That the Secretary of War is hereby authorized and directed to complete the construction of Dams Nos. 2 and 3 in the Tennessee River, at Muscle Shoals, Ala., in accordance with report submitted in House Document 1262, Sixty-fourth Congress, first session: *Provided*, That the Secretary of War may in his discretion make such modifications in the plans presented in such report as he may deem advisable in the interest of power or navigation: *Provided further*, That funds for the prosecution of this work may be allotted from appropriations heretofore or hereafter made by Congress for the improvement, preservation, and maintenance of rivers and harbors; and in order to provide for a larger amount of primary power to be developed on the Tennessee River, if a suitable site or sites can be found upon investigation, where practical storage reservoirs can be obtained at reasonable cost, the Secretary of War is directed to take the necessary steps to secure such sites and to build the necessary dams for the impounding of water therein. If the Secretary of War, under authority of this act, constructs one or more dams for the purpose of impounding the waters of said river, he shall give due consideration in the construction of such dams to the development of hydroelectric power, to the necessities of navigation, and flood control.

"SEC. 2. That in the construction of said Dam No. 3, or in the construction of other dams or other works provided for in this act, the Secretary of War is hereby authorized to use and to remove any of the temporary buildings now owned by the Government of the United States and erected anywhere in the vicinity of Muscle Shoals or nitrate plants Nos. 1 or 2, providing the removal of such buildings will not interfere with the operations of the Federal power Corporation as hereinafter set forth.

"SEC. 3. That if the Secretary of War should find it advisable and practical to construct storage reservoirs on the Tennessee River or any of its tributaries as hereinbefore provided, and that by virtue thereof the flow of the Tennessee River is equalized and a larger amount of primary power thereby developed, he shall require of any private person, partnership, or corporation maintaining a dam on said river for the development of power to contribute his or its proportionate share for the construction of said reservoirs, and he is hereby authorized to take the necessary action or actions in court for the purpose of compelling contribution to such development by any person, partnership, or corporation receiving the benefits therefrom; and if the right to dam said river for the purpose of developing hydroelectric power is hereafter given by virtue of any law of the United States to any person, partnership, or corporation, one of the requirements of said grant shall be that the person, partnership, or corporation given the privilege to build any such dam shall pay his or its proportionate share of the expenses of the construction of any such reservoir or reservoirs, either then constructed or thereafter constructed by virtue of this act."

I call attention to the fact that the same provision, or substantially the same, was passed by the House. It was stricken out in conference on the theory, as I am told, that it was already contained in the Federal power act, and therefore it was not necessary to be repeated; but it is the same provision which allows this corporation to take over the power of other companies that are benefited by the building of Cove Creek Dam.

SEC. 4. That there is hereby incorporated and created a corporation by the name, style, and title of "The Federal Power Corporation"—hereafter referred to as the corporation. Said corporation shall have perpetual succession and shall have power—

(1) To adopt, use, and alter a corporate seal;

(2) To sue and be sued and to complain and to defend in any court of law and equity within the United States;

(3) To make and enforce such contracts as may be necessary to carry out the provisions of this act;

(4) To appoint and fix the compensation of such employees, attorneys, and agents as are necessary for the transaction of the business of the corporation, to define their duties, require bonds of them, and fix the penalties thereof; but in no case shall any such employee receive a salary in excess of $7,500 per annum;

(5) To prescribe, amend, and repeal by-laws not inconsistent with this act for the conduct of its business;

(6) In the name of the United States Government, to exercise the right of eminent domain, and in the purchase of any real estate or in the acquisition of real estate by condemnation proceedings the title to such real estate shall be taken in the name of the United States Government; and

(7) To exercise all the rights, powers, and privileges conferred upon it by this act and such additional powers as may be necessary to carry out the provisions of this act.

SEC. 5. That the business of said corporation shall be transacted by a board of directors—hereinafter called the board—consisting of three persons, to be appointed by the President of the United States, by and with the advice and consent of the Senate. Members of said board shall hold their offices during good behavior and shall receive a salary of $7,500 per year, payable monthly: *Provided*, That any member of said board may be removed from office at any time by a concurrent resolution of the House of Representatives and the Senate. No member of said board shall during his continuance in office be engaged in any other business, but shall give his entire time to the business of said corporation. Said board shall select one of its members as president. It shall select a treasurer and as many assistant treasurers as

it deems proper, and such treasurer and assistant treasurers may be corporations or banking institutions and shall give such security for the safe-keeping of the moneys of said corporations as the board may require.

SEC. 6. In the appointment of officials and the selection of employees for said corporation and in the promotion of any such employees or officials no political test or qualifications shall be permitted or given consideration, but all such appointments and promotions shall be given and made on the basis of merit and efficiency. The board shall keep a record of all requests, oral and written, made to any member thereof, coming from any source, asking for any favor in behalf of any person or the promotion of any employee, which record shall be open to public inspection.

Apparently, Mr. President, that is left out of the conference report. There is no reason why under this bill political appointments can not be made.

Any member of said board who permits the use of political or partisan influence in the selection of any employee, or in the promotion of any such employee of said corporation, or who gives any consideration to political considerations in the official action of said board, or who, knowing that such political influence has been or is attempted, does not record the same in said record, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in a sum not exceeding $1,000 or be imprisoned not to exceed six months, or both such fine and imprisonment, and the conviction of any member of said board of the offense herein defined shall have the effect of removing such member from office.

SEC. 7. That upon the completion of the organization of said corporation the President and Secretary of War shall turn over to said corporation the steam plant located at nitrate plant No. 2, at Muscle Shoals, Ala., together with all the real estate used in connection therewith; all machinery, tools, equipment, accessories, and materials thereunto belonging; the railroad, together with the engines, cars, tools, materials, machine shops, and all accessories used in the operation of said steam plant; and all transmission lines connecting said plant with nitrate plants Nos. 1 and 2 and Dam No. 2: *Provided however*, That the transfer of any of the property above described to said corporation shall be subject to such use of said property by the Secretary of War as he may elect in the construction and development of the dams herein provided for. As soon as any of the dams herein provided to be constructed by the Secretary of War have been completed, the President and the Secretary of War shall turn the same over to said corporation, and thereafter said property shall be in the control and under the management of said corporation, and the said corporation shall manage said dams and keep the same in first-class condition: *Provided, however*, That said corporation shall be under no obligation to repair or to maintain any of the locks in said dams placed there for the purposes of navigation. There shall also be turned over to said corporation all the real estate, including all residences and other buildings now owned by the United States in the vicinity of Dam No. 2.

SEC. 8. That in case all the power developed at Dams Nos. 2 and 3, or any other dam or dams constructed by the Secretary of War under the provisions of this act and turned over to said corporation, can not be used to practical advantage and is not necessary for the manufacture of fertilizer or explosives as herein provided, the board may, in its discretion, sell any such surplus power so developed to any State, municipality, district, corporation, partnership, or person, upon such terms and under such conditions as the board may deem just; and in making such sale the board shall give preference to States, counties, municipalities, and districts, and if the sale of such surplus power is made to private individuals, corporations, or partnerships, for distribution or resale, the board may, as one of the conditions of such sale, provide in the contract therefor, for the regulation of the price at which any such individual, partnership, or corporation shall charge the consumer in a resale of such power. It shall be the policy of said corporation in selling electric energy to fix the time of such sale for as short a term as possible and in no case for a longer term than 25 years.

In order to convert secondary power into primary power, and thereby cheapen the hydroelectric power produced and increase the number of people to be benefited by such use, as well as to cheapen the price thereof to the consumer, the corporation is hereby authorized to enter into agreements with the owners of existing transmission lines, or with the owners of transmission lines hereafter constructed, to bring about the exchange of power whenever the same can be advantageously done. The corporation is authorized to construct transmission lines for the purpose of giving wider distribution to the use of the hydroelectricity developed at any of said dams, and to enter into contracts with persons, partnerships, corporations, municipalities, districts, or States for the joint construction and joint use of such transmission lines, having always in view that one of the objects of this act is to give as wide a distribution as possible at the smallest practical cost, the use of the electric current developed at any of the dams herein provided for.

SEC. 9. The corporation is hereby authorized to complete the steam auxiliary plant at nitrate plant No. 2, in accordance with the original plan.

It shall also have power to purchase or lease transmission lines owned by other parties, or to purchase or lease an interest in the same for joint use.

SEC. 10. There shall be turned over to said corporation by the Secretary of the Treasury the sum of $3,472,487.25, received by the United States for the sale to the Alabama Power Co. of the Gorgas steam plant at Gorgas, Ala., and said sum is hereby appropriated, out of any money in the Treasury not otherwise appropriated. The Secretary of War is directed to sell all surplus materials at Muscle Shoals not needed by said corporation or the Secretary of Agriculture in carrying out the provisions of this act and turn the proceeds thereof over to said corporation, which sums shall be considered the operating capital of the corporation. The corporation shall continue to increase said capital from its net earnings until the sum amounts to $25,000,000, and thereafter all the income from said corporation not necessary for depreciation, management, and other legitimate expenses of said corporation shall be turned over to the Treasury of the United States.

SEC. 11. The corporation shall supply to the Government of the United States, free of charge, a sufficient amount of power necessary to operate all the locks that are established in any of the dams herein provided for for navigation purposes.

SEC. 12. The corporation shall at all times furnish power for the operation of nitrate plants Nos. 1 and 2, as the same may be demanded or called for by the Secretary of Agriculture or any other agency having in charge the operation of said nitrate plants except as provided herein; and in the reconstruction or modification of either one or both of said nitrate plants the corporation shall likewise supply all power necessary for such construction purposes.

In order to cheapen the cost of fertilizer products as much as possible, it shall be the duty of the Secretary of Agriculture in the operation of said nitrate plants to use the most economical grade of power available, and he shall not demand of the Federal Power Corporation for such purpose more than 100,000 horsepower, of which not more than 25,000 shall be primary power. The price charged for power so supplied shall not exceed the lowest price for similar power at which the same is sold to any other purchaser.

SEC. 13. The board shall make a complete and detailed report of its operations as soon after the close of each calendar year as possible to the Congress, and the Secretary of War shall at least once each year make a complete audit of all the accounts and of all the financial operations of said corporation and shall include in his annual report to Congress a detailed statement thereof.

The principal place of business of said corporation shall be established by the board at or in the vicinity of Muscle Shoals, Ala.

SEC. 14. Upon the passage of this act nitrate plants Nos. 1 and 2, the Waco Quarry in Franklin County, Ala., the steam plant at nitrate plant No. 1, the railroad and the engines, cars, and other personal property necessary for the operation of the same, together with the real estate and residences owned by the United States at nitrate plants Nos. 1 and 2 and at the said Waco Quarry, shall be placed under the control and jurisdiction of the Secretary of Agriculture. The Secretary of Agriculture is hereby authorized to provide for the operation of one or both of said plants, through the fixed nitrogen research laboratory, or through such other means as he may deem advisable, and he is hereby authorized, if in his judgment better results can be obtained, to enter into a contract or contracts with private persons or corporations for the operation, either in whole or in part, of said nitrate plants, or other property or parts thereof, and to likewise, through the instrumentalities aforesaid, provide for experimentation, study, and research in any other manner that he may deem advisable for the cheapening of the manufacture and sale of fertilizer or other products. He is hereby authorized to remodel nitrate plant No. 1 and to use the same in the manufacture of fertilizer or other products and in experimental work designed to cheapen the production of such products. He is also authorized to add to or change nitrate plant No. 2 for the purpose of supplying fertilizer or other ingredients: *Provided, however*, That no change shall be made in nitrate plant No. 2 that will interfere in any way with its use to its full capacity in the manufacture of explosives to be used for war purposes, unless and until by the experiments above provided for it shall have been ascertained and developed that the manufacture of explosives can be cheapened and improved over the method provided for by the use of nitrate plant No. 2, and until the Secretary of War shall have determined that such new improved method has been installed with sufficient capacity to equal the present capacity of nitrate plant No. 2.

SEC. 15. It is hereby declared to be one of the objects of this act to cheapen as much as possible the cost of fertilizer and fertilizer ingredients and other products helpful to agriculture, and to bring about such objects the Secretary of Agriculture shall have power to manufacture fertilizer ingredients or a completed fertilizer and such other products ready for use, and in order to prevent a monopoly of the fertilizer or other business or an undue or unreasonable enhancement in the price thereof he is authorized to sell such products direct to farmers or to organizations of farmers, or to dealers in and manufacturers of fertilizer, and to likewise sell to the trade generally fertilizers and any by-products that may be obtained in the manufacture of fertilizer or other products. In the sale of such products to dealers and manufacturers he shall likewise

have authority to provide that in the resale by the purchaser of said products to consumers thereof that no more than a reasonable profit shall be exacted.

At this point I want to say that section 15 has been stricken from the pending conference report. No longer is the purpose to cheapen fertilizers to the farmer, no longer is it to be made an aid to agriculture, no longer is this plant to be used for the benefit of the farmer, but the provision that has been inserted means that it will be used for the benefit of the Fertilizer Trust of the country.

SEC. 16. In the appointment of officials and the selection of employees under this act by the Secretary of Agriculture, or any of his subordinates, such appointments and selections and all promotions shall be made in accordance with the requirements of section 6 of this act, and all of the provisions of said section shall apply with full force and effect to all such appointments, selections, or promotions.

SEC. 17. To enable the Secretary of Agriculture to carry out the provisions of this act with reference to the cheapening and improvement of fertilizer products and other products, and the manufacture of fertilizer, by or under the authority herein given to the Secretary of Agriculture, there is hereby appropriated, out of the Treasury of the United States, the sum of $1,500,000, available until expended, and all receipts for the sale of any such fertilizer products or other products shall be covered into the Treasury of the United States as miscellaneous receipts and a full and detailed report of all such operations shall be made annually to Congress.

SEC. 18. All laws relating to embezzlement, conversion, improper handling, redemption, use, or disposal of moneys of the United States shall apply to moneys of the corporation while in the custody of any officer, employee, or agent of the United States or of the corporation.

SEC. 19. All transmission lines constructed by the Federal Power Corporation, excepting transmission lines connecting the dams herein provided for any other properties of the Government at Muscle Shoals, shall be subject to taxation under the laws of the State wherein located.

I call attention here to the fact that even away back in 1924 the Senator from Nebraska, in the measure that was then reported out by him measurably took care of the rights of the States in providing that the property should be taxed, but in this conference report that provision is left out.

SEC. 20. It is hereby declared to be the spirit and intention of Congress in passing this act—

(a) Primarily to provide for the national defense by maintaining ready for immediate use for war purposes, nitrate plant No. 2.

(b) To promote agriculture by developing cheap fertilizers and other things of benefit to agriculture to the highest degree.

(c) To assist in the development of electric power by the complete storage and utilization of the waters of our rivers and their tributary streams in conjunction with steam and other sources of fuel to the end that electrical energy may be carried to all citizens.

(d) These objects shall be carried out as nearly as possible without interference with private enterprise.

2. Amend the title to said act so as to read as follows:

"An act to provide for the manufacture of explosives for the use of the Army and Navy, to provide for the manufacture of fertilizer and other agricultural products, to incorporate the Federal Power Corporation, and for other purposes."

As thus amended, the committee recommends the passage of the bill.

The question presented in the Muscle Shoals problem is one that we have inherited from the Great War. Primarily, it is a question of national defense. It became evident during the progress of the World War, even before we entered it, that modern warfare required the manufacture of explosives in such large quantities that the life of our Nation might be put in jeopardy because of our inability to supply such explosives in sufficient quantities to carry on a modern war. We were dependent to a great extent upon the importation of nitrates to keep our Army and our Navy supplied with a sufficient amount of explosives to defend our country and preserve the life of the Nation in times of great emergency.

Nitrogen is one of the ingredients of the air, and an inexhaustible supply exists everywhere; but the question of extracting it from the air was a very difficult and not fully understood proposition. Several processes for this extraction have been known for years in the scientific world, but all of these processes were expensive and required an immense amount of cheap power in order to accomplish results with any degree of economy. It was primarily to solve this question that the Government engaged in its activities at Muscle Shoals, Ala.

We have expended of public funds in the neighborhood of $125,000,000, and by the time the contemplated work is completed we will have expended over $150,000,000. We built nitrate plant No. 2, with a capacity of 40,000 tons annually of atmospheric nitrogen. This plant is designed to utilize what is known in the scientific world as the cyanamide process. It is a well-established and well-understood process, but it was known when the plant was constructed that this system was expensive and required a large amount of power. As a war proposition the expense of securing the explosives, while an important consideration, is nevertheless secondary in importance to certainty in production. This plant is not excelled by any other plant using the cyanamide process in the world. It is capable of producing 40,000 tons of fixed atmospheric nitrogen per annum.

Knowing the expensive nature of this process, the Government officials also constructed at Muscle Shoals another nitrate plant of much smaller capacity, which was designed to extract nitrogen from the air by what is known as the Haber process. It was known that this was more or less an experiment, although the experts believed then, as they do now, that the Haber process was the one which presented a greater field for improving the method and cheapening the production.

Nitrate plant No. 1 was never a success. The experience, however, that was obtained from this more or less experimental plant has resulted in improved methods, and it is known now that this plant, by the installation of new machinery, can extract nitrogen from the air more cheaply than can be done at nitrate plant No. 2, equipped for such work by the cyanamide process.

The Government constructed a steam-power plant at nitrate plant No. 2 capable of producing 120,000 horsepower. There was installed at this steam plant units amounting to 80,000 horsepower. The additional unit is provided for in the construction of the building, and it only remains to install additional boiler capacity in order to increase the present power facilities to the original design. There was installed a steam plant likewise at plant No. 1, with a capacity of 5,000 horsepower. These steam plants are modern in every way and are not surpassed to the extent of their capacity by any other steam plants in the world.

FERTILIZER

There is a definite connection and relation existing between the production of explosives for war purposes and the production of fertilizer for use in agriculture. Nitrogen is one of the ingredients of every fertilizer product, and therefore this question presents a peacetime problem as well as one of war and national defense. It is extremely desirous that the machinery and the investment used for the production of explosives in time of war should be used for the purpose of increasing and cheapening fertilizer products in time of peace; and when we consider the fertilizer problem we are at once faced with the question of cheapening the product. It is advisable of course, to cheapen it in time of war, but this is a secondary consideration. In time of peace, for fertilizer, the question of economy is a paramount one, and these great plants can not be used for the production of fertilizer unless the process can be cheapened to a price that will at least not exceed the cost of fertilizer by other methods. The question of fertilizer will be discussed more in detail later on in this report.

WATER POWER

At the same time the Government constructed these plants it planned the construction of two dams on the Tennessee River at Muscle Shoals. One of these dams, known as Dam No. 2, is now nearing completion, and it is estimated that it will be completed and ready to produce hydroelectric energy by the 1st of July, 1925. It will take from three to five years to complete Dam No. 3.

POSSIBILITIES OF POWER AT DAM NO. 2

The weakest point in the development of hydroelectric energy, especially in the South, is the great difference between high and low water flow of the rivers. The flow of the Tennessee River at the location of Dam No. 2 is sometimes sufficiently high to produce nearly if not quite a million horsepower if the entire flow could be utilized, while in case of extreme drought at very short intervals, the minimum flow would produce a little less than 100,000 horsepower. Gauge readings of the river have been carefully taken for a period of 50 years, and these readings show that at Dam No. 2 there will be developed horsepower as follows:

	Horsepower
99.4 per cent of the time	87,300
97 per cent of the time	100,000
88.3 per cent of the time, or about 10 months	141,000
66⅔ per cent of the time, or about 8 months	205,000
50 per cent of the time, or about 6 months	306,500
20 per cent of the time, or about 2½ months	600,000
7 per cent of the time, or a little less than 1 month	1,000,000

DAM NO. 3

The amount of power that will be developed at Dam No. 3 can be readily understood when it is known that the power possibilities of that dam are 40 per cent of the power possibilities at Dam No. 2. The difference between high and low water, and therefore the difference between primary and secondary power, is practically the same at Dam No. 3 as it is at Dam No. 2.

PRIMARY AND SECONDARY POWER

Primary power is the power that can be utilized every hour in the day and every day in the year. Secondary power is that which is only developed a portion of the year. In the use of power it can readily be seen that there is a great difference between primary and secondary power. For most purposes, primary power is required, and therefore its value is much greater than secondary power. Moreover, there are various degrees in value of secondary power. Secondary power, for instance, that can be utilized for 11 months in the year is much more

valuable than secondary power that can be developed for only one month in the year. By the use of an auxiliary steam plant, or by the construction of a storage dam, that would equalize the flow of the river, much secondary power can be converted into primary power, and wherever this can be accomplished there is more economy and great gain in power. Secondary power, sometimes almost valueless, can by one or both of these means be converted into primary power at very little additional expense.

TWO PROPOSITIONS AT MUSCLE SHOALS

It can readily be seen, therefore, that there are two definite and distinct propositions presented for consideration, and they have no very definite connection with each other. The question of power and the question of explosives and of fertilizer material.

POWER PRODUCTION

The production of power at Muscle Shoals is comparatively a simple question. All the elements involved in it are well understood and well known. It is assumed that everybody is in favor of cheapening the cost of hydroelectric energy as much as possible, and that in a general way this power should be distributed over as wide an area as possible in order that the greatest number of our citizens may receive benefits from such production.

It must be remembered the power at Muscle Shoals is developed from a navigable stream over which the Federal Government has jurisdiction. The power thus produced from a waterway belonging to all of the people should not be given away to any private individual or corporation for his or its personal financial benefit. We should adopt a method that will give the benefits of electricity to just as many of our citizens as possible. Modern methods of transmission of electric current have revolutionized the possibilities of such distribution. It can readily be seen that one of the necessities in economic power development and distribution depends to a great extent upon the conversion of secondary power into primary power. It is likewise apparent that to develop the maximum amount of hydroelectric energy the entire stream and all its tributaries should be considered as a whole. Every dam site should be selected with reference to all other dam sites, keeping always in view the question of navigation. In addition to this, it is important that in order to regulate the flow in any stream and keep it as nearly uniform as possible we should construct storage dams where large amounts of flood waters can be stored and let out at times of low water, thus decreasing the maximum and increasing the minimum flow.

It should be borne in mind that the maximum flow is often as damaging to the production of hydroelectric energy as the minimum flow. The amount of hydroelectric energy that can be developed at any given time is often very materially decreased by too large a flow of the stream, which has a tendency to back the water up below the dam and thus decrease the fall of water over the dam, which in turn materially decreases the amount of hydroelectric energy produced. It is therefore seen that the storage of flood waters not only increases the amount of hydroelectric energy upon the dams on the stream during low water, but likewise increases it during high water by holding the water back when it would do damage rather than good.

The construction of storage dams has also another important feature. It is a very important element in flood control and holds back floods that would do damage, while it increases the electric current that can be produced both at high and low water, and likewise regulates the stream so as to make navigation possible at all times.

STEAM AUXILIARY PLANTS

Another method of converting secondary into primary power is by the construction of steam auxiliary plants. Such plants would not be able to produce electricity as cheaply as water power, but if they can be used for portions of the year when the water is low, and thus bridge over the gap of such portion of the year, they convert into primary power what would ordinarily go to waste and be absolutely of no value.

GIANT POWER

But after we have constructed flood reservoirs and steam auxiliary plants, we have not yet completely converted all secondary power into primary power. There will be seasons and perhaps times in every season when the watershed supplying the stream with water, is deficient in rainfall, and notwithstanding the help of storage dams and auxiliary steam plants, there is still a large amount of secondary power going to waste.

When one stream has a period or even a season of low water, some other stream on the other side of a mountain or a different watershed, may have an oversupply—indeed, it may have so much as to seriously interfere with the production of the maximum amount of electric current. Modern methods of the transmission of electricity require that these different systems be hooked up together with transmission lines, and when one system is short of water, and another system has too much water, a transfer of electricity from one system to another can be brought about by simply pushing a button—and thus on a larger scale do we utilize all the electricity developed in both of the systems.

It is now possible to transmit electricity direct from 250 to 300 miles without material loss, but the same effect of transmitting electric power from one system to another can be brought about by what is known as a relay of power from one system to another system, and in this way the same practical effect can be had as though electricity could be carried direct indefinite distances. There is no limit to which power can be thus relayed.

This was well illustrated a few years ago by relieving a condition that existed in the State of North Carolina. North Carolina has a system of electric distribution that covers a quite large portion of the State, but in the year 1921 the rainfall in North Carolina was very deficient. It was evident that the requirements for power were so great that the system could not be supplied on account of the decrease brought about by the drying up of the streams, and, had there been no way of relief, it would have been necessary for many of North Carolina's industries to shut down and some of her residences would have had to go back to kerosene lamps, and in many ways great damage and inconvenience would have resulted to millions of people and many industries.

Between North Carolina and the Government's great steam plant at nitrate plant No. 2 at Muscle Shoals there is a distance of 600 miles. The power company in North Carolina secured power from companies in South Carolina, but the companies in South Carolina could not have supplied this had they not been able to get a supply of power from companies in Georgia, and the Georgia power companies had no power to spare and could not have supplied this extra energy had it not been possible for them to get power from the Alabama Power Co. in Alabama. The Alabama Power Co. had no power to spare, but they had leased the steam plant owned by the Government at nitrate plant No. 2, and they supplied the Georgia company with some of their power and in turn made up the deficiency by starting up this great governmental steam plant, which poured the electricity into their system from the western side, and thus the effect was to transfer electricity from the Government steam plant at Muscle Shoals to the factories and homes in North Carolina 600 miles away.

The Alabama Power Co. is now building storage reservoirs and power dams on the Tallapoosa River in that State. It seems that this river possesses wonderful capacity for storage water. It has likewise a certain definitely known power possibility. Dam No. 2 at Muscle Shoals has likewise a known power capacity. If these two systems were hooked up together with a transmission line, it would be possible, by using the two together and trading power back and forth, to increase the output by more than 100,000 horsepower above the combined estimate of the Tallapoosa system and Muscle Shoals put together.

It can be seen, therefore, that the economic way of securing all the benefit possible from the flow of our streams is to combine them into systems, with interchangeable transmission lines, so that the maximum amount of power can be developed and the maximum amount of secondary power be converted into primary power.

The State of Virginia has potential power possibilities of 459,000 horsepower. The State of Kentucky has potential power of 77,000 horsepower. The State of Tennessee has a potential power possibility of 432,000 horsepower. Arkansas has potential power of 125,000 horsepower. This is in all cases primary power. There would be about an equal amount of valuable secondary power. It is conceivable and reasonable that within a few years these power possibilities will be developed either by the States and municipalities or by private persons or corporations. They should be connected with Muscle Shoals, which in turn would connect them up with all the other hydroelectric companies of the South. The Senate has passed a bill recently providing for the utilization of the power possibilities of the Potomac River. If the House passes the bill and that improvement is made, there will be twice as much power produced as can be utilized by the District of Columbia. It in turn could be connected up with the Virginia power development, and thus become a feeder in a great system of power production that would extend from the Potomac River to the Gulf of Mexico, and from the Atlantic Ocean to the municipalities and the farms of Mississippi and Louisiana. But this would not necessarily be the limit. The great State of Pennsylvania is already making a survey with the idea of utilizing her streams and many of her coal mines in the organization of a giant power proposition. It is reasonable to assume that in the next 10 or 20 years, all water power east of the Mississippi River, together with numerous auxiliary steam plants located at the mouth of coal mines, will be united into one giant power scheme in which the maximum amount of electricity will be developed and distributed to the maximum number of people at the lowest possible cost. This electricity will be developed to a great extent by the flow of the streams which, as a matter of fact, belong to all the people, and it is therefore but fair that the greatest number of people possible should secure the benefits of such development.

I desire to call particular attention to this giant power scheme, as it is called, to unite all the great power companies, I can not imagine how the power companies could be any better pleased than by this scheme. It is a scheme of the Senator from Nebraska. This is his report. If that is what is provided for in the joint resolution, it ought to be defeated. I want to be perfectly frank about it. I do not think that it provides for it

to the extent that is here set out, but if it does provide for that sort of scheme, and, if I am not mistaken about that, it ought to be defeated.

DANGER OF MONOPOLY

To the writer there is one possible danger in such a scheme, and that is the danger of monopoly. With a network of wires spread over the country, carrying light, power, and heat to all the people, it is absolutely incumbent upon governmental authority to provide by proper regulation that such a great plant shall not be utilized for the financial benefit of individuals or corporations and that those controlling such a system should not in any way be permitted to utilize the great power in their hands, unrestrained and unregulated. Practically all the States have commissions that regulate not only the price of electricity but the service as well, but in addition to such regulation the most effective help to save the people from such a monopoly would be to have the Federal Government own at least some of the power-producing elements that enter into such a system.

It is therefore important that the Government should retain the ownership and management of Muscle Shoals. In the system that I have above outlined Muscle Shoals, if properly developed and improved by the construction of storage dams on the Tennessee River and its tributaries, will be the greatest one unit in the entire system. It will be, as it were, a partner in this great plan. It will have a direct voice in the management and control of the entire system. It can therefore more directly control any tendency toward monopoly than can be done by State commissions, however valuable their service may be.

No one can tell us just what the future will bring forth. Improvement in the production and the transmission of electricity are constantly taking place. In my opinion the time will come at no distant date when the Government will have to take a still greater part in the regulating, the generating, and the distribution of electricity. Present indications are that electricity is going to be demanded in every home and on every farm for light and power purposes at least, and it ought to be one of the duties of Government, both Federal and State, to see that the one danger to what will be the happiness and comfort of all the people is prevented from exercising any monopolistic control.

The consummation of giant power systems will be to stop the present tendency that has been going on ever since the economic use of steam has been in use, which because the power thus generated was used in the immediate vicinity of its generation, turned the tide from the country, the village, and the small city into the great population centers. The sending of electricity over a wire throughout the country will divert the tide of manufacturing enterprises from the congested centers into localities where the raw product is produced. The generation of power from steam can be most economically produced in very large units and under conditions of the past years, such economy in the production of steam power necessarily brought manufacturing establishments and the millions of employees and other people together into congested centers. The small manufacturer was driven out of business. The economy of large steam plants increased the population of manufacturing centers, to the detriment of the country and the smaller cities. The new electric age which is just dawning will change this tide. It will make it possible for the small manufacturer located in the vicinity of the production of his raw material to economically produce a finished product and successfully compete with the larger concerns.

With this great economic change going on in our country, it would be almost criminal to permit any person or any corporation to utilize all of the electric power at Muscle Shoals for one concern and for the benefit and profit of one corporation. It is not contended, of course, that there will be sufficient power developed at Muscle Shoals to supply the entire South, but it is the key to the entire problem. It will be the dominating influence in the system that will grow up, and an examination of the map will show that Muscle Shoals is practically in the northwest corner of existing systems of production, covering several Southern States. Tennessee, immediately to the north, has but partially developed her power. Mississippi and Louisiana, to the immediate west and south, ought to receive the benefit of proper distribution of this power. Arkansas is within transmission distance, and she possesses a large amount of potential water power. There is no reason why these States should not be covered with a network of transmission lines, of which Muscle Shoals would be the one most important distributive point. Moreover, if Muscle Shoals is turned over to one corporation, particularly if that corporation is given a governmental subsidy in the way of cheap money, on a basis of 100 years' time, and then the corporation permitted to use all of this cheap power in its own manufacturing business, it would in effect be giving to such corporation a governmental subsidy running over a period of years, which would give it an undue advantage—an advantage backed up by money of the taxpayers of the country—over every other manufacturing establishment of a similar nature in the entire South.

If we turn over this valuable property for 100 years to one corporation and then give it money at an extremely low rate of interest, it would be using the taxpayers' money and the taxpayers' property to give an advantage to a favored corporation, which would be able to put manufacturers of similar products entirely out of business, and once having put them out of business, such a favored corporation would be able to fix its own price and levy tribute upon the people at will; and if such a corporation were given such a franchise that ran over a period of 100 years, it would be no defense that the present organizer of such a corporation would be moved by the highest kind of philanthropic motives. It would be but a few years until by the operation of nature itself those now living would pass away and such a corporation would be as cold and as clammy as any trust or monopoly that has ever existed in the history of civilization.

INVESTIGATION OF THE COMMITTEE

The committee has given months of study to the questions involved at Muscle Shoals. It held extensive hearings two years ago, and this year it has just finished the most minute and elaborate study of the question involved ever undertaken by any committee of Congress and, perhaps, by any investigating body in the country. We have had before us various bids and propositions made by individuals and corporations. We have had two alternative propositions submitted by the Union Carbide Co.; one bid submitted by Mr. Hooker and his associates; another one by Henry Ford; still another one by a body of several allied electric power companies already operating in the South; and we have had also a proposition submitted by ex-Congressman Lloyd, who represented no bidder but who proposed to the committee a plan of development which contemplated the retention of the property in the hands of the Government. We have also had before us for consideration a bill introduced by the chairman of the committee providing that the Government should retain title to all this property and operate the same through the instrumentality of a governmental corporation, providing for the widest possible distribution of the power development and the continued exploitation and experimentation with a view of cheapening the ingredients, production, and distribution of fertilizer products. The amendment to the House bill, which the committee proposes, follows in substance the bill of the chairman of this committee.

THE HEARINGS

These bidders, with one exception, have furnished the committee much valuable information. A great amount of it was, from its very nature, quite technical. The intricate problems connected with the extraction of nitrogen from the air and kindred subjects were discussed in great detail by experts representing these various bidders. They placed themselves at the disposition of the committee and frankly and courteously answered all questions propounded to them relating to their various bids, and in every way showed a fair and honorable disposition to assist the committee in every way possible in the solution of this difficult problem.

The only exception to this rule was Mr. Ford. He not only declined to come before the committee and be questioned but he did not send anyone with authority to represent him. In this connection it is fair to call attention of the Senate to the fact that although Mr. Ford's bid has been pending for two years, and that in the preceding Congress hearings were held by a House committee and by the Senate Agricultural Committee, and that during this Congress hearings were again held by the House committee and also by the Senate committee, Mr. Ford has never yet appeared in person before either committee or before any other authorized committee of the Senate or House. He has been invited by the House committee to appear before it, and on both occasions when hearings were had by the Senate committee a request for him to appear was officially sent to him. No opportunity has ever been given for anyone to ask him a single question regarding his bid. He has either ignored or declined every respectful request that has been sent to him. He is the one bidder for this great property who has pursued such a course, and yet, as queer as it may seem, he is the only person who has made a bid for Muscle Shoals that any committee of either House of Congress has reported favorably on or given serious consideration to as far as acceptance is concerned. It seems to be universally considered, both in Congress and out of Congress, that under no circumstances should this valuable governmental asset be turned over to any person or corporation unless it be to Mr. Ford; and he is the only one of all the bidders who has ignored every request of Congress to appear before authorized committees for examination. It is unnecessary to discuss the other bids made, because after full hearings no member of the committee was in favor of accepting any of them, and yet, in the opinion of the writer, Henry Ford's bid was by far the most undesirable of any that has been submitted. After many months of serious consideration I am of the opinion that not only is Mr. Ford's bid the most undesirable for the Government to accept but it is so much more undesirable than any of the other bids that it is not in the same class with any of them.

It is difficult to understand how there can be any sentiment either in the country or in official circles favorable to the acceptance of Mr. Ford's offer. This I state with perfect respect to Mr. Ford. He has, of course, a perfect right to make any bid he pleases, however undesirable it may be to the Government or however favorable it may be to his corporation. The only explanation that can be given to the sentiment in favor of the acceptance of this bid is the wonderful propaganda that has been spread over the country, asking Congress to turn

Muscle Shoals over to Mr. Ford. This propaganda has not been equaled by any that I have come in contact with during a service in Congress of over 20 years.

Mr. President, I have thus given both sides of the Muscle Shoals question. It will be seen that these reports and the debates in the Senate at that time were purely about Muscle Shoals. There was some vague reference to storage dams on the Tennessee River, but there was no proposal such as is now made at the last minute in this case; and, Mr. President, I want to appeal again to the Senate of the United States not to put in the bill this provision that has been reported by the conferees.

This bill would pass within five minutes if it were stricken out. It would have an infinitely better opportunity to receive Executive approval, I am advised, if it were out. There is no necessity for its going in. Even if it should go in at some future time, even if it should be found desirable to be enacted into law at some future time, it is not necessary to put it in now. Why jeopardize this great Muscle Shoals matter that we have been working over for seven years by putting in this provision at the eleventh hour—for, indeed, it was put in at the eleventh hour?

It was not in the bill as originally reported in the House. It was only put in of late; and, as I understand the House conferees, they are not insistent upon this provision. I talked to the chairman of the House conferees on yesterday. He was not insistent on this provision. I talked to other members of the conferees of the House. They were not insistent upon this provision. Why jeopardize this legislation—this legislation that we have all been working for—by putting in it this provision which means, if it means anything, that it vastly increases the prospect of Executive disapproval? Why take that risk? Why put it in jeopardy? What is the reason for it? What is behind it?

In all the other bills presented by the Senator from Nebraska he provided for taxation by the local authorities in Tennessee and by the State of Tennessee. It is in his original bill. It was stricken out in the report. It is provided in this bill alone that the Federal Government goes to Tennessee and takes territory equal in area to an ordinary sized county, or parts of two counties. It will practically break up two counties, as I am informed and as I believe. It will take the better part of the land of the two counties. It will leave some mountainous districts in those counties, but it will take the rich and valuable land. It will take the homes and farms down there for this great reservoir without any compensation to the State, without any consideration to the State, without any consideration to the county or the counties.

I believe three of them are interested in it. Three of them have territory in this proposed area. Not only that, but it takes this plant, that has been variously estimated in its raw state, in its undeveloped state, at something like a million dollars, which, if developed by private enterprise, will be subject to taxation, and it removes the power of the State, so far as it can do so, to tax that plant when constructed.

In the other bills presented by the Senator from Nebraska he provided for State taxation. He did not take it away. He did not undertake to override the rights of Tennessee and the counties thereof. Why is it brought in here at this late hour? What is behind it? What reason is there for it? None has been offered. Why should it be connected with Muscle Shoals?

Muscle Shoals is owned by the Government in fee simple, bought in the proper way, with the consent and upon the application of the State of Alabama. It is a wholly different thing; and I want to appeal to Senators, in all common fairness, do not take this property away from Tennessee without her consent. Do not do it. If she wants it, if she sends an application in here for it, no one will be more willing to uphold what she wants than I will. My purpose in taking the course I have taken about this matter was to protect the interests of my State. I would be unworthy to represent her if I did not stand up for her rights. I said on yesterday and I say to-day that I am going to do everything humanly possible to prevent this rape of the State of Tennessee of a part of her domain without compensation to her or to her counties.

I mean no disrespect. I am serious and in earnest about it, Senators. I am astonished beyond measure that Senators on this floor, on this side of the aisle as well as on the other side of the aisle, should be willing at this late moment, when there can not be any useful purpose subserved, to put this measure in over the protest of the two Senators from Tennessee.

If it were United States property, and we were dealing with it, it would be a different thing; but this is private property and county property and State property, and you are taking it without compensation. Senators, it is not fair; it is not right, and I protest against it.

I have offered amendments here. I have offered to send this bill back with amendments putting in the very provisions, in substance, that were submitted in previous bills by the Senator from Nebraska. One of those amendments incorporated in this bill, just what he told me he would be willing to put in a bill at the next session of Congress. If it is right to go in at the next session of Congress, why, in God's name, is it not right to go in at this session of Congress? What excuse is there for such action? What reasons are there for such action? None has been advanced.

This dam site is not accessible to Muscle Shoals. It is 300 miles from Muscle Shoals; and provision is made here to generate what power there is there and build a transmission line for the purpose of sending that power out of Tennessee to Alabama. It is not fair; it is not right; and I again appeal and appeal to my colleagues here on this floor not to take this property away from my State without compensation.

Mr. President, this morning at an early hour I offered a motion which I then read, and which I now send to the desk; and I want to appeal to my friend from Nebraska, with whom I have collaborated as vigorously and as earnestly and as effectively, I think, as any Senator on this floor, and I think the Senator from Nebraska will say so. There was not a step in this legislation in which I did not aid him. We conferred daily and hourly about it. I got my colleagues together in the Democratic cloakroom of the Senate, and got them to agree on a measure that we could all agree upon. It was a give-and-take proposition. The Senator from Nebraska acted in a splendid compromising spirit. The Senators on this side of the aisle did the same thing. The question of Cove Creek was never referred to at that time, except that I said to the Senator, and he agreed with me, that it ought not to go in this bill at this time; that we ought to dispose of this long-unsettled question; and yet, after we have worked together, after we have collaborated, after we have agreed on every feature of this great measure, at the last moment a conference report is made which has a disastrous effect upon the property of Tennessee, as Tennesseeans think.

The Senator from Nebraska says Tennessee ought to be glad to get it. He may be right, and the people of Tennessee may be wrong, but that is not what they advise me they want. I am their representative; and as long as I am here, and as long as I am able to present what they want in this body, I intend to do it. It is my duty to do it.

I want to say that while I am earnest about it, I have not the slightest feeling in the matter in any manner, shape, or form. I should be delighted to vote for the Muscle Shoals bill with this provision out of it. It has been one of the dreams of my legislative career. I have been working on it longer, even, than the Senator from Nebraska. I started it in the House, as I have heretofore explained. He has worked along similar lines, and in most respects we have agreed, and I am happy that we have agreed. After going together right along, working in perfect harmony, and keeping in view the main idea, which was the disposition of Muscle Shoals, at the last minute to bring in here an amendment, put in by the House conferees, that I never dreamed would be accepted, is something that I can not understand.

I went to the Senator from Nebraska and told him my complications about it. I told him the situation in Tennessee about the matter, and urged him not to put in the amendment; but it came in. I urged other conferees not to put it in. One of them said he thought I was joking. Why, Senators, I would not joke about a great interest of my State. If I appeared to be in a joking humor for the last 24 hours while this matter has been under consideration, Senators who thought so were laboring under a misapprehension. I have not joked about it. I do not want anything but what is right. We are dealing with Muscle Shoals. We ought not to be dealing with new projects.

You may have a majority for this amendment. Apparently you have. You may jam this down our throats, because physical endurance will not permit me to speak forever; and if you are just going to keep us here you may, through physical exhaustion, ram it and jam it down the throats of the two Senators from Tennessee; but I appeal to you, is that fair or just? Is it right?

Look into your hearts, my friends, and tell me: After collaborating with me for all these months in reference to this subject on terms of perfect understanding, as I said, do you think it is right at the last minute to bring in here a measure separate and apart, calling for the expenditure of $37,000,000 in aid of another project, having no real relation to this project, violating the rights of my State, violating the rights of my county, violating the rights of the regulatory powers of Tennessee? I should be unworthy of representing that State in

this body if I did not protest as earnestly as I can against such a course.

Somebody said, "Why, you ought not to have taken up all this time." I want to say that I have taken the time in an earnest endeavor to the best of my ability to prevent this rape of the property rights and the sovereign rights of the State that I love.

Mr. President, this instruction to the conference committee embodies amendments substantially equivalent to what the Senator from Nebraska has already stood up for and upheld in other bills on this subject. I had no idea that he would ever be willing to take away the rights of Tennessee without compensation; so I offer this motion, which I ask the Clerk to read.

The VICE PRESIDENT. The Secretary will read the motion.

The Chief Clerk read as follows:

I move to recommit the conference report to the conferees with instructions to the conferees on the part of the Senate to insist upon the insertion at the end of section 16 of the following proviso:

"*Provided*, That the corporation herein created shall be subject to all the laws of the States in which it operates, in the same manner and to the same extent as would a private corporation engaged in such enterprises, and when the Cove Creek Dam and power plant hereinafter provided for shall have been constructed by the United States Government the laws of the State of Tennessee and the regulations of the constituted authorities of Tennessee shall apply in full force and effect to the sale, lease, distribution, or other disposition of the power produced and the water released for power-developing purposes at all downstream plants or projects, to the imposition of taxes and tolls on all the properties, and to the regulation and control of all rates and charges: *Provided*, That the the provisions of this section shall not apply to navigation locks nor the operations concerned therewith; that such a percentage of gross profits from the sale of power shall be paid to the State of Tennessee as would have been paid if the corporation had been privately owned."

Mr. NORRIS. Mr. President, I make a point of order against the proposed motion. First, on the ground that it is out of order because it is illegal for the Senate to instruct its conferees and ask the House for a full and free conference with the conferees on the part of the Senate having their hands tied.

Second, it is out of order and illegal for the Senate to instruct its conferees as to what to do in a conference, unless there is a disagreement in the conference and the conferees have reported that disagreement to the Senate.

Third. It is illegal and violates parliamentary law and procedure for the reason that the proposed amendment, if inserted by the conferees, would make their conference report subject to a point of order both in the Senate and in the House, because it inserts as an amendment matter that is not and has not been in either the Senate resolution or the House resolution.

Fourth. It violates the Constitution of the United States by providing for the taxation of United States property by State authorities.

Mr. KING. Mr. President——

The VICE PRESIDENT. Does the Senator wish to speak on the point of order?

Mr. KING. Yes; and particularly on the fourth proposition announced by the Senator from Nebraska.

The VICE PRESIDENT. The Senator from Utah is recognized.

Mr. KING. I have just returned to the Chamber and did not hear the entire motion submitted by the Senator from Tennessee. As I understand, the Senator has moved to recommit the conference report with instructions that the conferees insert a provision in the bill—and that means, of course, in the conference report—providing that the corporation to be organized under the bill shall be subject to State taxes and regulations in the same manner and to the same extent as are private corporations engaged in similar enterprises. And also that when the Cove Creek Dam and plant are built the laws of Tennessee, and the regulations of the constituted authorities of the State, shall have equal application to the sale, lease, and distribution of the power produced and the water released for power-development purposes, and to the same taxes imposed and controlled with respect to rate and charges as are private persons or corporations engaged in similar activities. The Senator's motion also calls for an amendment to the bill requiring that the gross profits from the sale of power shall be subjected to the same regulations with respect to the payments to be made to the State as are imposed upon like private corporations engaged in the production of power.

The Senator from Nebraska [Mr. NORRIS] takes the position that no instructions of the character indicated can be given by the Senate to its conferees. His fourth objection raised in his point of order is that if the provision offered by the Senator from Tennessee were accepted and became part of any statute enacted by Congress, it would be violative of the Constitution of the United States because it would seek to impose State taxes upon property of the United States.

Mr. President, this is to my mind a rather singular objection to be urged in raising a point of order. Whether a law may be constitutional or unconstitutional may be important and should be to lawmakers, but I submit that the alleged unconstitutionality of an act may not be challenged upon a point of order when it is properly before the Senate for consideration. But the doctrine announced by the Senator from Nebraska, if the point of order is to be decided upon the question as to whether the amendment offered by the Senator from Tennessee is constitutional, calls for some examination. I do not admit that all property owned by the United States and under all circumstances and conditions is free from State taxation, and that Congress may not declare by appropriate statute that property which belongs to the United States shall be subject to State regulation and State taxation.

The United States is fast becoming a business proprietor and the owner of valuable property used for purely business purposes. When the Government is engaged in activities, not of a governmental character, when it exercises functions that are not governmental and are not connected with its sovereign and governing character, then a different proposition is presented. When it enters the domain of business and exercises what is denominated as a proprietary right or authority, then it may not complain if it should be subject to the same laws, rules, and regulations as are imposed upon private corporations and private individuals. When the Government leaves its exalted station as a sovereign and becomes a mere business proprietor and entrepreneur then it subjects itself, or at least it should be subjected, to the same limitations and the same laws and regulations as are applied to private persons or corporations engaged in similar undertakings.

To hold otherwise would be to subject private capital and private enterprises to an overpowering danger; indeed, to destructive forces which they could not escape. To organize corporations under Federal statutes to go out into the field of private endeavor and to engage in business activities which command the attention and capital of private persons and private corporations is, generally speaking, not only unwise but unjust. Moreover, it is usually accompanied by the assertion of an authority and power not committed to the Federal Government and not intended by the founders of the Republic to be exercised by it.

The Constitution limits the authority of the Federal Government. Certain political and governmental powers were granted to it; not authority to engage in business pursuits, not authority to become a tyrannous, paternalistic government, or a deadly and destructive socialism. Our fathers sought to get away from the evils of paternalistic government. They believed in the capacity of the people to govern themselves, and the people conferred no power upon the Federal Government to invade those domains reserved to the people themselves.

The proposition of the Senator from Nebraska postulates the view that there are no restrictions upon the General Government; that it may engage in all kinds of business activities, even though in so doing the Government comes into competition with private business, and in such a way as to destroy capital and investments to the utter ruin of those engaged therein. The Senator's position is that the Federal Government in its competitive and destructive business activities may enjoy advantages denied to private persons and private corporations. If the Federal Government may organize corporations to build power plants and railroads and fertilizer plants and to manufacture and sell commodities essential to the welfare of the people, and intrench them in the various States of the Union and throw around these precious children of its creation the protection of Federal authority under which they are immune from State regulation or State taxation, then it is manifest even to the dullest persons that such advantages and special privileges will crush all private enterprise occupying the same field of business activity.

I submit, Mr. President, that if Congress is so unwise and so unjust as to enact legislation that places the Government in business either in its own name or in the name of corporations which it creates, it should not claim further advantages by demanding freedom from State taxation and regulation of the same character as that imposed by the States upon private persons and corporations engaged in similar business activities within their borders.

Mr. President, I insist that if the United States becomes a business man and engages in private business it should be subject to the same laws and regulations as are imposed by the States upon private persons and corporations engaged in the

same character of business. There is a powerful movement in our country in favor of paternalistic policies. It ignores the rights of the States and regards them as possessing no prerogatives or powers which the Federal Government may respect. Unfortunately many of the people encourage Federal aggressions and the assertion by the Government of unconstitutional and indeed autocratic power. This movement contemplates that the Federal Government shall take over and operate the railroads, shall engage in the shipping business, shall take over, own, and operate anthracite and bituminous coal mines; deprive the States of their control over the streams within their borders in order that the Federal Government may construct power plants and manufacture, sell, and distribute electric energy and engage in various forms of industrial activities for the utilization of power. Indeed, those who support this movement find no limitation upon the powers of the Federal Government. State sovereignty is a fiction. An indestructible union of indestructible States is a meaningless expression, not a solemn and living truth.

The Muscle Shoals proposition is a part of this movement. It is the purpose of some to weaken private capital and to further project the Government into the important activities of our country. This policy, of course, means further Federal corporations and bureaus and agencies. It means the withdrawing of property from taxation by the States. It means that the General Government, even within the States, is to be advanced to the position of paramountcy, even where the questions involved are domestic and under the Constitution purely of State cognizance.

The Senator from Nebraska insists that the Government corporation to be created by the measure under consideration shall build plants, manufacture fertilizers, sell and dispose of the same, build power plants, impound waters, build distributing lines, and sell and dispose of electric energy to the people within various States and that in all of these activities it shall be subject to no State laws or regulations; it shall pay no State taxes, tolls, or licenses; it shall have turned over to it property of the value of $150,000,000 and have opportunity to draw upon the Treasury of the United States for millions of dollars to carry on its activities; that it shall do all these things in competition with private corporations and individuals regardless of the consequence and in defiance of State laws and the rights of sovereign States.

Mr. President, this is a dangerous doctrine and one which, if accepted, will bring a train of evil consequences, the ultimate results of which even the wisest can not accurately determine. These efforts to weaken and destroy the States and to compound them into a colloidal mass should be vigorously opposed. We are, however, encouraging them and lending momentum to the centripetal forces which have so powerfully and destructively operated in all ages of the world. But I have consumed too much time in discussing this fourth provision in the point of order raised by the Senator from Nebraska.

With reference to the other questions raised by the Senator I am free to confess that he has some precedents in parliamentary procedure to sustain him. He insists that the Senate may not instruct its conferees, but must leave them entirely free to conduct such negotiations as to them seem proper. When the Senate passes a measure it expresses itself, and when it appoints conferees it is because it has a view not acceptable to the other legislative body. The conferees when appointed are supposed to represent the views of the Senate. It is not an uncommon thing for Senators when an amendment is offered to the bill and the amendment is carried to express more than a hope, indeed their views often take the form of a demand, that the conferees shall not recede but insist upon carrying out the wishes of the Senate as expressed in the provisions of the bill after having been perfected by the Senate. Conferees in a way are bound. They are not entirely free to carry out their own wishes. They are expected to represent the legislative body appointing them and to respect all instructions given for their guidance.

Parliamentary bodies should not be governed by mere technical rules. They should seek to enact measures representing their views. If it is the view of the Senate that the Federal Government in building and operating hydroelectric plants and plants for the manufacture of fertilizers should be subject to the laws and regulations of the State of Tennessee imposed by it upon corporations engaged in similar pursuits, then it would seem to me that we have the right to so state and to so indicate to the conferees. If the measure before us was being considered as a bill, it could be amended in conformity with the views expressed in the motion offered by the Senator from Tennessee. Why should the Senate be denied the right to express its views because the measure appears in the form of a conference report not adopted either by the House or Senate?

The conferees may not roam throughout the legislative skies without restraint. Those appointed by the Senate are its servants to do its will. Why may not the Senate now express its will so that the conferees when they confer with representatives from the other legislative branch may seek to carry out the views of the Senate?

The fact that the conferees chosen by the House and Senate have submitted a report does not shackle either the House or the Senate; nor does it, in my opinion, prevent either the House or the Senate from rejecting the report and asking for further conference and indicating to their respective conferees the views of the Senate and the House. If the Senate believes that the Federal Government, when it asserts its proprietary power and goes into business pursuits in Tennessee, should not be free from the usual taxes and regulations imposed by that State upon their corporations engaged in the same line of business, why may not the Senate so declare and require its conferees in their negotiations with the conferees selected by the House to try and secure the adoption of that view.

Parliamentary rules should not be so highly technical as to impede legislation or prevent legislative bodies from executing their wills. The Senator, in making his point of order, contends that it is illegal for the Senate to instruct conferees when there is no disagreement. Perhaps there are precedents to support this view, and yet it would seem that pushing this technical view to the extreme would lead to undesirable if not absurd consequences. Suppose a majority of the Senate believed the views expressed in the motion of the Senator from Tennessee are sound, and that the bill before us should contain provisions expressing such views, are we to wait until the conference report now before us is rejected and another conference sought and the same or other conferees appointed who, failing to agree, report disagreement to their respective bodies? And if in this circumstance a disagreement is reported, is the Senate in a better position to express its views upon this question than it is at the present time?

I submit, Mr. President, the common-sense view of this situation supports the position of the Senator from Tennessee. Does the Senate desire that the measure before us shall be so amended as to carry out the views expressed in the motion made by the Senator from Tennesse? If so, why may not the Senate so declare in order that the conferees may be apprised of the character of legislation desired by the Senate, so that in their negotiations they may strive to achieve the thing desired by those whom they are appointed to serve?

Mr. President, I submit that the point of order should be overruled and the Senate given an opportunity to vote upon the motion offered by the Senator from Tennessee.

The VICE PRESIDENT. The Chair has had ample time during the night for reflection upon this question.

The Chair has caused an investigation to be made into the question of recommittal of conference reports with instructions to conferees, and has found that there is a practical unanimity of opinion, where a conference report is before the Senate for consideration, that a motion to recommit with instructions at that stage is not in order. The rule appears to be that instructions are only in order after a motion to ask or agree to a conference has been agreed to, and prior to the appointment of conferees. In the present case, the conferees have already been named, and following the rule established by the decisions extending over a period of several years, the Chair feels impelled to sustain the point of order.

Mr. McKELLAR. Mr. President, I offer the following motion, the same motion as before with an addition. I hope the Senator from Nebraska will not make the point of order against the proposal.

The VICE PRESIDENT. The motion will be stated.

The CHIEF CLERK. After section 16, add the following proviso:

Provided, That the said corporation shall keep an accurate account of the cost of said dam, and of the cost of operation and maintenance, and shall out of the profits derived from the sale of power, create such an amortization fund as will repay to the United States Government in such a period of time as the said corporation may find feasible, the full amount of the cost of said dam, together with 4 per cent interest annually thereon. If during the amortization period said corporation shall receive revenues in excess of the amount necessary to meet the periodical payments to the United States and all costs of operation and maintenance as provided in the amortization plan adopted by the corporation for paying back to the United States the cost of said dam, then, immediately after the settlement of such periodical payments, the said corporation shall pay the excess revenues to the State of Tennessee annually. When all the cost of said dam, together with 4 per cent interest thereon, shall have been repaid, as herein provided, then said dam and other properties acquired and used in connection therewith shall be deeded to the State of Tennessee.

Mr. NORRIS. Mr. President, I make the point of order that it is improper and illegal to attempt to instruct the conferees in a case where there is an agreement of the conferees upon a report and that report is pending in the Senate; also, whether the Senator calls it an amendment or instruction—I do not know which the Senator calls it—if it is an amendment, it is illegal under all circumstances to amend a conference report. If it is an instruction, then it proposes to insert into a conference report a provision that is not in either the House or the Senate measure, and would, therefore, be subject to a point of order now if it were in the conference report.

The VICE PRESIDENT. The Chair sustains the point of order.

Mr. McKELLAR. Mr. President, for nearly 24 successive hours I have been on the floor, either talking or acting, trying to obtain from the Senate the exclusion of this project from the joint resolution. An utter lack of physical endurance compels me to suspend my activities. In order that we may have a vote, I am not going to take the time to make another speech but only for the reason just stated.

I want to say that during the 17 years I have been in Congress I have never seen or known of such a flagrant injustice done or attempted to be done to a State, or such a flagrant injustice done or attempted to be done a colleague who has been cooperating with another Senator about a measure. If there was any way humanly possible to defeat the measure with the Cove Creek provision in it, I would do it. But I am not physically capable of going on indefinitely, and so I am regretfully compelled to yield the floor with the statement that in my judgment the insertion of this provision, without the semblance of right or excuse, will cause its disapproval by the President of the United States, and all the good work that the Senator from Nebraska [Mr. NORRIS] has done in so far as Muscle Shoals is concerned will come to naught, not only for this session, but probably for all time.

Mr. TYDINGS. Mr. President, I do not care to take more than five minutes at this time to continue the discussion in opposition to the joint resolution. From sources which I deem to be reliable I am informed that the joint resolution in all probability, even though passed by both Houses of Congress, will not become a law. While I do not wish to transfer my responsibility to any other source, having stated my position last night at some length, I will be content to say nothing more about the measure except to register my protest in a vote.

I want to take this occasion to say that it has never been my intention to engage in a filibuster against it. I believe that what was brought out last night resulted in presenting both sides of the argument and to some extent has acquainted the people of the country with the iniquities which permeate the measure from the first word to the last period. I shall, therefore, be content to withdraw from the discussion and to register my vote against it when opportunity permits.

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. KING. Mr. President, before the conference report is voted upon I desire to briefly consider some of the provisions of the joint resolution which is a part of the report. The joint resolution before us contains most remarkable provisions. Under the guise of "national defense" unwise and oppressive measures have become laws. These sonorous words often silence criticism and prevent opposition. During the World War substantially every legislative enactment contained a declaration that it was in the interest of "national defense." The habit then formed still clings to the Congress. The high sounding words "national defense" in these days of peace should arouse some suspicion as to the merits and justice of proposed legislation which it is claimed is demanded upon the ground of "national defense." Of course, it is absurd to say that this Republic is menaced by any foreign foe or that the joint resolution before us is required to fortify our country or protect it from dangers seen or unseen.

Mr. President, the question before us is not that of "national defense," but whether a policy is to be adopted inconsistent with our form of government, invasive of the rights of sovereign States, and at variance with the economic views and policies which have, in part at least, been applied during the life of this Republic. The question is presented in one form or another as to whether the Federal Government may invade States, take over the property of individuals for business purposes, tax the people of the United States to enable the Federal Government to engage in activities of a private and business character, and generally to engage in business activities in competition with private persons or corporations. In a word, shall the Government ignore constitutional limitations and follow the lead of paternalistic or socialistic governments whose melancholy experiences, and in many instances tragic ends, are recorded in the volumes of history open for our enlightenment?

The so-called Muscle Shoals bill now before us is not the beginning or to be the end of paternalistic and socialistic undertakings. It is one of a series of contemplated measures, having for their object the projection of the Federal Government into fields of business activity and into industrial and business enterprises. These measures have been devised or are being formulated by individuals and organizations who are imbued with Marxian philosophy, or who desire to see the National Government extend its jurisdiction and activities so as to take over responsibilities which belong to sovereign States and to set up business enterprises in competition with individuals and corporations.

It is a patent fact that there is considerable sentiment in the United States favorable to Government ownership and operation, not only the railroads, but of ships and boats and barges upon our inland waterways, and bituminous and anthracite coal mines as well as other industries and properties connected therewith. It is no easy task to confine governments to their legitimate sphere. No matter how sound and just the basis of a political structure may be, and no matter how wise and just the policies of a government are, there are bound to be some injustices and inequalities socially, economically, and industrially. And these are seized upon by many thoughtless, and by some sincere and patriotic, persons as pretexts for the government to extend its authority beyond constitutional lines, and to undertake functions and activities wholly outside of constitutional limitations or wise governmental policies. Moreover, there are some persons who sincerely believe that all governments should be paternalistic or socialistic, and that the greatest felicity may be had under communistic or socialistic systems. It must also be conceded that bureaucracy contributes to the development of a paternalistic and socialistic spirit. Bureaucracy maintains a sleepless vigil for the purpose of extending its authority and power. It finds a multitude of fields into which it projects its authority, and discovers a thousand plausible arguments to justify its usurpatory acts. It conceives itself to be endowed with gifts denied to others and to possess wisdom superior to the great mass of the people struggling in the fields of private life. With professions of altruism and disinterestedness bureaucracy proclaims its purpose to take the Government to the people and to make the latter the beneficiaries of governmental bounties, favors, benefits, and activities. Bureaucracy would supplant industrialism and private initiative and personal courage with the splendid, if not necessary, audacity required particularly in modern life. Bureaucracy is a challenge to democracy. It is an unrelenting foe to the democratic spirit, and to the aims of a living and vital democracy. It seeks to level the people and to exalt officialdom and make of it a caste to dominate and rule. The growth of the bureaucratic spirit in the United States has been astounding, and its influence, not only nationally but in the States, constitutes a danger to republican institutions. The astonishing growth of bureaus, departments, executive agencies, and administrative boards not only in the Federal Government but in the States, may well challenge the attention of thoughtful people in our country. In many States there are not scores but hundreds of bureaus and boards and departments. The increase in the number of officeholders in our cities, counties, and States is wholly unjustificable and has resulted in imposing upon the people grievous burdens of taxation. The National Government is multiplying its agencies, departments, bureaus, and administrative instrumentalities. Many of these organizations are given power to promulgate rules and regulations containing penal provisions, the enforcement of which call for additional organizations and employees. It will be but a few years before the number of Federal employees will reach the million mark, and within the next five years the salaries and compensation of the officials and employees of the Federal Government will exceed $1,000,000,000 annually.

Notwithstanding this record of bureaucracy its power is increasing, and no earnest efforts are being made by any important agency of organization to curb its avaricious demands for more power and its unconcealed efforts to control legislation and determine political and governmental policies.

Officialdom is never satisfied with administering the law. It seeks to control legislation. It has always been and always will be indifferent to proper or constitutional limitations. It conceives the functions of Government subject to no restrictions, and paternalism is one of its objectives.

It must be admitted, however, that when corporations become arrogant and when monopolies are formed to control the industrial and economic life of the people, paternalism and socialism receive a mighty impetus. Some persons are driven into socialistic and paternalistic movements because of the abuses by private capital, and the efforts of some possessing

great wealth to stifle competition, and dominate, through monopoly and giant organizations, the industries of the country and control national policies and State legislation. It is certain that if this movement, directed toward the consolidation of industry with resulting monopoly, and the destruction of the middleman and the competitive system shall continue, a different governmental policy will be required to meet the situation. The Sherman law and the Clayton Act, either because of inherent defects or misconstruction by the courts, or indifference upon the part of the Executive branch of the Government, have not accomplished the purposes for which they were intended; nor have they effectively dealt with the great conspiracies in restraint of trade and the monopolies which have grown to such huge proportions. Undoubtedly the great consolidations of capital which are being affected in all lines of industry, have contributed to the growth of socialism and to the insistance that the Government shall enter into business activities outside of its constitutional authority.

The bill before us has received almost fanatical support from groups who view with apprehension the centralizing movements existing in our banking and financial institutions and in the industries of our country.

Undoubtedly there are those who believe that the greed of corporations can only be curbed and the dangerous concentration of capital can only be arrested, if not entirely stopped, by the Government entering business fields and engaging in enterprises universally conceded to be outside of the functions of government. Unfortunately there are many in the United States who do not understand that we have a dual form of government and that the National Government possesses limited powers. Its duties and authority are clearly pointed out in the Constitution which prohibits it from transcending the limits set therein. The States have wider fields within which to operate than does the Federal Government. The States, unless there are limitations in their constitutions, may construct power plants and manufacture fertilizers and engage in various activities which are within the field of private endeavor. It may be unwise to do so; it may be socialism or paternalism, but the people of the States with respect to local and domestic affairs are the supreme judges of the policies to be pursued. A number of years ago North Dakota went into the banking business and built elevators and undertook many private activities of an experimental character. That some of its activities were socialistic or paternalistic can not be denied. It is unnecessary to inquire whether or not they were justified under the circumstances. However, the results were disappointing, and, as I understand, the State abandoned its experimental enterprises. But North Dakota's experiments furnish no ground for the Federal Government to engage in business pursuits. As stated, the National Government possesses only limited and enumerated powers, and it may not do what the States or the people within the States, operating through their State governments, may do.

In considering the policies of the Government and legislation relating thereto, we are not at liberty to disregard the Constitution or place a construction upon it not warranted. But waiving, for a moment, that proposition, we should inquire whether it is wise, whether the results will justify the National Government embarking in all sorts of private business enterprises. Will it prove in the long run for the best interests of the Republic for the Government to develop a powerful paternalism or foster socialism or create a bureaucracy which constantly increases its members and extends its powers? In my opinion, no greater service could be rendered the people than to abolish many bureaus and Federal agencies, repeal many Federal laws, vigorously enforce those that are permitted to remain upon the statute books, strengthen the antitrust laws so that monopolies and great consolidations of wealth may not destroy competition, or crush the small business man and those who are really the foundation of our political superstructure as well as of our social organism.

But, Mr. President, I arose primarily to call attention to a few of the provisions of the joint resolution embodied in the conference report. It declares that—

> for the purpose of maintaining and operating the properties now owned by the United States in the vicinity of Muscle Shoals, Ala., in the interest of national defense and for agricultural and industrial development, and to aid navigation and the control of destructive flood waters in the Tennessee River and Mississippi River Basins, there is hereby created a body corporate by the name of the "Muscle Shoals Corporation of the United States."

I have referred to the words "national defense" and the absurdity of seeking to justify this proposed legislation upon the ground that the national defense requires it. The declaration that the measure is to "aid navigation" is absurd and, in my opinion, wholly insincere. A number of corporations have been created by Congress to undertake business activities, and this measure adopts the same policy and provides for the creation of a corporation. Recently a corporation was created to operate barges upon the Mississippi River. The Shipping Board operates as a corporation, the Government owning all of the stock. The policy seems to be to have Congress create a multitude of corporations to engage in business pursuits; by so doing the impression is conveyed that the Government is not in business. These corporations are to possess authority, however, denied to private corporations and, of course, are to be backed by the Federal Government and the Treasury of the United States. If this policy shall continue, we shall soon have Federal corporations engaged in acquiring and operating coal mines, smelters, manufacturing plants of various kinds, railroads, and, indeed, property of all descriptions for the purpose of being employed in every variety of business pursuits.

If this policy shall continue for a number of years it will materially modify our industrial and economic life. Private capital will hesitate to make investments, and individuals will shun certain fields of private endeavor, finding a powerful and destructive competitor in the Government, which should protect rather than destroy. More and more the Government will cease to be a political entity, and develop into a huge business organization which will create and send out a brood of business concerns controlled and directed by bureaucrats whose sympathies will not be with those engaged in competing private business, and who will trample upon State rights, local authority, and the domestic policies of the people within the States. The language of the joint resolution is to "maintain and operate property." This indicates that the Government is not entering upon a mere experimental scheme which is to be terminated within a limited period. The language, as well as the resolution itself, is a commitment of the Government to the definite "maintenance and operation" of fertilizer plants, power plants, distributing systems, and such ancillary activities as are common to such undertakings. It is not contended that the vast expenditures made, and that will be made under the terms of the joint resolution, are required to produce nitrogen for governmental purposes. It is known that corporations are now producing nitrogen by various processes and that new plants are being constructed for the purpose of supplying nitrogen to be used in manufacturing fertilizers for agricultural purposes.

The German processes are well known in the United States, and American chemists are making distinctive progress in all chemical lines. The discoveries of yesterday are being superseded by those of to-day and the morrow will bring developments that make obsolescent or obsolete the triumphs of the past. Those engaged in the industry in the United States are spending millions annually in research and scientific investigation and for the promotion of the industries with which they are identified. More than $150,000,000 have been expended by the Government at Muscle Shoals and the measure before us contemplates the expenditure of perhaps a hundred millions of dollars more. Indeed, it is impossible to determine what the Government ultimately will be compelled to spend if this visionary enterprise is carried forward by the National Government. Not satisfied with developing Muscle Shoals, this bill commits the Government to the gigantic task of entering the State of Tennessee and securing approximately 60,000 acres of lands at enormous cost, which will be converted into a reservoir. The pretext is that more power must be developed and so the property of Tennessee is to be taken from the people of that State; a large dam is to be constructed and power generated to be transmitted to Muscle Shoals, there to be used for the production of nitrogen. If there is a surplus of power it is to be supplied to the people residing within a limited radius of Muscle Shoals. Tennessee is to be deprived of the revenue derived from the property within her borders and which is to be taken over by the Federal Government. Neither Tennessee nor Alabama can derive any revenue from the holdings of the Federal Government. Private corporations engaged in the manufacturing business or the production of power within these States pay large sums as taxes and license fees, but the Federal Government may not be taxed. It may use the moneys derived from the residents of Tennessee and Alabama and from the corporations engaged in business therein, for the purpose of putting into operation business enterprises in competition with private enterprise. The Federal power plants and manufacturing plants not only will pay no taxes but capital is furnished from the taxpayers of the county, and the Federal Treasury is the never-failing fountain from which deficits will be met.

An examination of the hearings before the House and Senate committees and the statements made by Senators have led many to believe that this enterprise is not for the manufacture of fertilizers but is essentially a power scheme. The Senator from Nebraska in speeches made in former sessions of Congress clearly indicated, as I remember his position, that Muscle Shoals could never successfully produce fertilizers; that it was a power proposition and nothing more. I have no doubt that if nitrogen is produced the cost will be so great as to be prohibitive; so that as a fertilizer enterprise, in my opinion, it is foredoomed to failure. If the provisions of the resolution before us are carried out, and the additional millions required are expended, I believe that as a power scheme the project will not be a success. I do not mean that power will not be generated and that a market will not be found for the same. I do mean, however, that the cost of production and distribution will be so great that the Government will receive no returns upon the investment and will be met with annual deficits to be paid out of the Treasury of the United States. As stated, the aggregate cost under the plan contemplated will perhaps be from two hundred to two hundred and fifty millions of dollars. To acquire the 60,000 acres in Tennessee and construct additional dams and transmission lines and distribution systems will, in my opinion, bring the total capital investment to the enormous sum just indicated. The returns will never compensate the Government for the expenditures called for, and it is obvious that with the Government going into the power business with the United States Treasury behind it, private capital will not be inclined to seek permits to construct power plants upon the Tennessee River or its tributaries. When the Government with its great authority and with the Treasury behind it enters into any field of business, it means that private capital will hesitate to measure arms with the Government.

Returning to the resolution, one of the provisions is as follows:

> All members of the board shall be persons that profess a belief in the feasibility and wisdom * * * of producing fixed nitrogen under this act of such kinds and at such prices as to induce the reasonable expectation that the farmers will buy said products, and that by reason thereof the corporation may be a self-sustaining and continuing success.

The absurdity of this provision must excite the risibilities of the most languid person. I presume that the Government will be required to have psychoanalysts ascertain the belief of persons as to the "feasibility" of a scheme.

The Government must secure Professor Freud or some of those who accept the Freudian philosophy to inspect the members of the board with their psychic microscopes in order to ascertain whether they "profess a belief in the feasibility" of the project. It may be said, though, that if the aspirants for membership upon the board "profess a belief in the feasibility" to produce fixed nitrogen, then they will be eligible to appointment and competent to draw the salaries which the jobs created by this resolution provide. Of course, persons wanting a job will loudly profess their belief in the feasibility of the scheme; nay, they will cry to Heaven that it is the most perfect scheme ever devised by the wit of man. They will aver with great unction that fixed nitrogen can be produced, and at prices so low as to induce not only a "reasonable" but an unreasonable "expectation that farmers" will buy nitrogenous products developed and manufactured at Muscle Shoals. They will affirm with zeal that the corporation will be "self-sustaining" and a continuing success. There would be much more sanity in this provision of the resolution if it provided that men of scientific knowledge and business judgment and experience were to be selected for service upon the board, no matter what their views were as to the "feasibility" of the scheme, than to make the sine quo non for eligibility a professed belief in the "feasibility and wisdom" of producing fixed nitrogen at such prices as "to induce the reasonable expectation that the farmers will buy it and its products" and that the "corporation will be a self-sustaining and a continuing success."

I do not believe that any legislative body ever had before it a provision so grotesque as the one to which I have just referred. Any person competent to occupy a position on the board, and with a proper sense of responsibility, and who knows the weaknesses and evils of bureaucracy, could not qualify for a place upon the board if he honestly answered the requirements contained in the provisions just quoted. What is meant by the words "feasible and successful" as applied to the enterprise? Will it be considered "feasible and successful" if in time the corporation meets current expenses without allowing anything for reserves or amortization of cost or interest upon the investment? I have in mind a Government project which it is claimed is successful, though additional millions are asked to be appropriated, a portion of which will be required to meet operating costs. No interest has ever been paid upon the investment, and the capital invested by the Government is treated as a gratuity. This scheme may be "successful" if the Treasury is to pour forth its golden stream whenever it is called upon to do so, even though no provision is made to reimburse the Government for the two hundred millions invested and if no interest is to be paid upon the investment, and if a number of other conditions are to be regarded as unimportant.

Senators will remember that the tax burdens of the American people are exceedingly grievous. The expenditures of the National Government for the next fiscal year will, in my opinion, exceed $5,000,000,000. In 1917 they were approximately $1,000,000,000. The curve of expenditures is rising, and with the indifferent attitude of the executive department and Congress toward appropriations it is certain that the expenses of the Federal Government will rapidly increase during the next few years. Projects such as that of Muscle Shoals will swell the Government appropriations and add to the tax burdens of the people. It is quite likely that the Seventy-first Congress will be compelled to increase the taxes and to seek out other sources from which to obtain revenue or to derive larger revenues from personal incomes and corporations.

Mr. President, I have heretofore criticized the executive department as well as Congress for unwise and improvident appropriations. The President has recommended during the last five years appropriations aggregating approximately $300,000,000 in excess of the amount approved by Congress. In other words, the exultant and boastful claims that economy has been enforced by the Executive are without basis. Congress, notwithstanding its propensity to make drafts upon the Federal Treasury, has cut appropriation bills during the period mentioned about $300,000,000 below the Budget recommendations.

The resolution before us provides that the board is authorized and directed to "operate existing plants for governmental purposes; to construct, maintain, and operate governmental plants at or near Muscle Shoals for the manufacture of fertilizers or any of the ingredients comprising fertilizers for governmental purposes." This provision, and subsequent ones in the resolution, clearly indicate that the corporation to be created is not limited to the manufacture of "fixed nitrogen." When the United States entered the World War there were various projects entered upon which were not necessary and some of which were visionary. Nitrogen was needed for munition purposes, and it was believed that nitrogen could quickly be produced at Muscle Shoals. Accordingly Muscle Shoals project was entered upon. Many changes have occurred since then, and the situation to-day demonstrates, in my opinion, that the Government is not warranted in expending an additional sum of $100,000,000 for the production of fixed nitrogen or fertilizers or power at Muscle Shoals. As stated, in the provisions just quoted, the corporation may engage in the manufacture of any form of fertilizers, though nitrogen may be a rather unimportant constituent part. There are various kinds of fertilizers, and under this bill any sort of fertilizer could be produced. It is, therefore, disingeneous to declare that this bill is for the purpose of producing "fixed nitrogen."

The resolution also provides that the board is authorized:

> (c) To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce.

Mr. President, this provision is not only uncertain but it is absurd. In what manner is the board to "arrange with farmers or farm organizations for large-scale practical use of the new forms of fertilizers"? How are they to arrange this? Are they to extend credits to farmers and farm organizations? If so, upon what terms? What is meant by the words "large scale" as applied to farmers? If a farmer has only 10 acres of land to which he desires to apply fertilizers, may he be denied the right to obtain fertilizers from the board because he has a very small farm and therefore would not answer the meaning of the words "large scale"? Is the "large scale" to be applied to annual consumption of fertilizer or for an indefinite period? I direct attention to the concluding part of the sentence "under conditions permitting an accurate measure of the economic return they produce." How is an "accurate measure" of the "economic return" to be determined? I presume the board will require bookkeepers and accountants. Experts will be required to ascertain the value of lands upon which fertilizers will be used. They will have to ascertain former yields upon the same ground, take into account climatic conditions and the manner in which the ground in previous years has been farmed, make allowance for rainfall and lack of rainfall, determine whether the methods employed in farming during preceding

years were proper or improper, and what effect they had upon the crops raised. Experts will be required to determine what is a fair economic return. To make such determination the capital invested must be considered and the value of the labor employed from year to year upon the farms together with the earnings of capital in other industries. Comparisons will necessarily have to be made not only as to the character of labor employed, and the value of the same, but all other factors which constitute the basis and foundation in determining what is a "fair economic return."

I recall that the Couzens committee, of which I was a member, had its attention brought to the difficulties involved in fixing the value of property which was necessary to the determination of what the excess-profits tax should be. Upon certain mining properties one expert placed a valuation of approximately $600,000,000. Another expert upon the same property gave it a valuation of considerably more than $1,000,000,000.

The resolution requires that the existing plants at Muscle Shoals are to be "modernized." What the costs will be no one knows. We know that the cyanamide plant may be changed and brought down to date. There is considerable testimony before the committee indicating that the cyanamide process is a success where it is employed not by bureaucrats and governmental agents but by keen up-to-date business men engaged in private activities. It is pertinent to state that five or six plants in the United States are now producing fixed nitrogen and within a very short time there will be produced all the nitrogen required for all purposes and by all persons in the United States. It is needless to say that it will be produced at a price less than the cost of production by the Government.

And the question is worthy of consideration as to the effect of a legislative enactment which requires the Government, or the corporation which it creates, to expend millions of dollars for the production of nitrogen or nitrogenous products for fertilizers. I have heretofore called attention to what the effect would be of the announcement by the Government that it intended to spend tens of millions of dollars in some private enterprise. Manifestly those who might contemplate engaging in the same business would turn their attention to some other enterprise. Notwithstanding their superior knowledge and their competency to carry on the business successfully, they would not measure arms with the Government knowing that the Government's purse was longer than theirs. Their knowledge that governmental operations are wasteful and inefficient would not overcome their determination to not compete with it. They would know that they could produce much cheaper than the Government but they would know that they would be placed at a great disadvantage when competing with the Government. They would be required to pay taxes, State and national. They would have fixed charges upon their investments, perhaps interest upon borrowed moneys, dividends to pay upon preferred stock, and other obligations not assumed by Federal corporations; they would be required to make provisions for amortization, and to meet all the conditions that prudent business men would feel compelled to make provision for, in all their business pursuits. They would know that the Government enterprise would have none of these burdens and responsibilities to carry.

Under the provisions of this resolution the Government may expropriate the patents of chemists and scientific men engaged in the production of nitrogen and various forms of fertilizers. This provision will tend to retard chemical research, particularly in the field of nitrogenous compounds. A scientist who has devoted his time and means to discover new processes will feel that a spectre is ever at his side, ready to seize the product of his toil and the child of his brain.

I submit, Mr. President, that this joint resolution is a measure that will discourage private endeavor, interfere with initiation, and be regarded as a thrust at the development of the chemical industry. It is a challenge to those who are now producing fixed nitrogen and those who are engaged in the production of various forms of fertilizer. It is, in effect, a challenge to them not to make further investments or to continue their investigations and developments because the National Government has created a corporation and given to it property which has cost approximately $150,000,000, and to which will be contributed approximately $100,000,000 more—all taken from the Treasury of the United States, and upon which no interest or dividends are to be paid.

Mr. President, those who are engaged in the power business, as well as those producing fertilizers, will know that Government investments will be free from taxation, whereas they will be required to meet heavy Federal, State, and municipal taxes. The State in which I live derives annually a large sum from the corporations engaged in the production and distribution of electric energy. The same may be said of other States. My recollection is that Utah derives a larger revenue from the corporations producing electric energy for sale than it does from either of the great railroads whose lines cross the State.

Mr. President, there are some who are giving support to this measure who desire to have the National Government enter into the power business. They would deny to the States any control whatever over the streams, whether navigable or unnavigable, found within their own borders. They deny the right of the States to license power plants built upon streams navigable or unnavigable. They would nationalize what, in the absence of proper words, I call the power industry. There are some extremists who would go so far as to drive out of the field corporations now engaged in the production of hydroelectric energy. The large sums invested in the development of power they would destroy.

Mr. President, I am not defending corporations engaged in the power business. Some of them have been oppressive and have engaged in practices reprehensible, if not illegal. The policy pursued in consolidating electric-light plants and companies has not always been fair or just, and often has been against the best interests and welfare of the public. Enormous prices have often been paid for electric-light plants and potential power enterprises, and I have no doubt that fictitious values have in some instances been ascribed to merged or consolidated properties, and bonds and securities issued, based upon such fictitious values. These practices deserve condemnation and call for legislation that will prevent a continuation of these practices.

I have heretofore stated that the rapacity and injustices of capital are in part responsible for the demand for governmental ownership and operation of public utilities and some of the key or fundamental industries of our country. While I am opposing the Government engaging in private business pursuits, I am not defending, but upon the contrary, I am denouncing many of the practices of corporations and the oppressive policies which they have often pursued to the great injury of the public. I warn these great captains of industry that they must abandon all unfair practices in the conduct of business; they must not seek to monopolize trade and commerce; they must not stifle competition and drive to the wall by unfair practices or otherwise those whose resources are not so great and who are engaged in the same lines of business. This must remain a land of freedom—freedom in business and freedom in industry. Political and civil liberty are important, but economic and industrial liberty and freedom are equally as important. Economic and industrial domination have produced revolutions; it will certainly change political institutions when it becomes oppressive and ruthless.

Upon several occasions since I have been in this body I have invited attention to the growth of trusts and monopolies and combinations in restraint of trade, and to the unfair practices obtaining in some of our industries. I have insisted that the Sherman anti-trust law and the Clayton Act be vigorously enforced; that those who violate these laws should be indicted and punished; and that corporations offending against the provisions of these acts should be proceeded against and monopolies and illegal combinations and trusts dissolved. I favor the strengthening of these acts to the end that there shall be competition and the free flow of the economic forces in all parts of our country. And while so contending I have expressed my disapproval of the Government transcending the limitations of the Constitution and embarking in all forms of business activities.

During the discussions of the measure before us reference has been made to navigable and unnavigable streams within the States. It is insisted by many that the Federal Government owns and controls all streams within the States; that it may prescribe their use and exercise complete control over the beds and banks and waters thereof. This view is contrary to that which has obtained in the United States from the beginning. It has been repeatedly held by the Supreme Court of the United States, as well as by State courts, that the Federal Government has no control whatever over unnavigable streams, and that with respect to navigable streams its authority is limited to preventing any interference with navigation. The States are the owners of the banks and beds of navigable streams, and they have the sole right to determine how rights in and to the waters of the streams within their borders may be acquired. The States may adopt the riparian doctrine or, as has been done very largely in the West, the rule of appropriation. The States have the right to derive revenue from the use of the streams and to grant licenses for their development. But under this new doctrine they are to be shorn of all control over the waters within their borders, and the Federal Government is to exercise unlimited authority and to be the overlord with respect to all streams and the waters thereof in all parts of the United States.

Recently the Governor of the State of New York repudiated this un-American and unconstitutional doctrine, and in effect told the Federal Government to keep its hand off from the waters and streams of the State of New York.

Under the joint resolution before us, the corporation to be created is to produce electric power and to sell the same. There are no restrictions upon its authority in this matter. It may fix rates so low as to destroy competition. It is not required to derive any revenue from corporate operations or to prevent corporate deficits. This unlimited authority, of course, will result in discouraging private investments and may materially injure those who may now be engaged in producing and distributing electric power. And of course, as I have stated, the States in which any part of this enterprise is conducted may not interfere in any manner with its operations, nor may they tax the property of the corporation or license it or derive any possible revenue therefrom.

I am amazed that Senators give their approval to a doctrine that declares that the Federal Government may enter their States, take over the streams therein, engage in competition with corporations producing power, or commodities of any kind, and that in all of such activities it and all corporations created by it shall be free from any State supervision or control, immune from any State regulation, and, of course, from all forms of State or municipal taxation. I can not believe that Senators appreciate the consequences that will inevitably follow the acceptance of this doctrine. It is a direct assault upon the States. It is a blow made at the integrity of the States and at the right of local self-government.

Mr. President, I should like to further analyze some of the provisions of this bill, buf I know that Senators are eager to have the conference report disposed of. Some will vote for its adoption because they are tired of the very name Muscle Shoals, and hope that this measure will enable them to write "finis" at the end of the chapter. To those who may take this view I can only say that if this measure becomes a law the matter is not ended. Muscle Shoals will be before Congress during their lifetime and for an indefinite period. They will discover that this action will be regarded as a precedent calling for further departures from sound policies and from the path of constitutional legislation. They will find that additional demands will be made for paternalistic and socialistic legislation; one false step often leads to another still more dangerous. It were well to resist the impulse to take the first step.

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. McKELLAR. I call for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES], which I transfer to the junior Senator from Texas [Mr. MAYFIELD], and will vote. I vote "yea."

Mr. TYSON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. I am informed, however, that I am released from that pair, and I vote "nay."

The roll call was concluded.

Mr. McMASTER. I desire to announce that my colleague [Mr. NORBECK] is detained at his home on account of illness. He has a pair on this question with the Senator from West Virginia [Mr. GOFF]. If my colleague were present and at liberty to vote, he would vote "yea," and the Senator from West Virginia, if present, would vote "nay."

Mr. DILL. My colleague [Mr. JONES] is absent on account of illness. If present, he would vote "yea."

Mr. NYE. I desire to announce that were my colleague [Mr. FRAZIER]—who is unavoidably absent—present, his vote would be "yea."

Mr. BLACK. I wish to announce that my colleague [Mr. HEFLIN] has been here throughout the entire night and left a few moments ago, not knowing that this vote would come at so early a period. If he were present, he would vote "yea."

Mr. REED of Missouri. My colleague [Mr. HAWES] is detained from the Chamber by illness. If he were present, he would vote "yea."

Mr. SHEPPARD. My colleague [Mr. MAYFIELD] is unavoidably absent. If he were present, he would vote "yea."

Mr. HALE. I wish to announce the necessary absence of my colleague [Mr. GOULD] on account of illness in his family. He is paired with the senior Senator from Louisiana [Mr. RANSDELL]. If my colleague were present, he would vote "nay."

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Wyoming [Mr. WARREN] with the Senator from North Carolina [Mr. OVERMAN];

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL]; and

The Senator from Idaho [Mr. GOODING] with the Senator from Louisiana [Mr. BROUSSARD].

The result was announced—yeas 43, nays 34, as follows:

YEAS—43

Barkley	Dill	McMaster	Simmons
Black	Fletcher	McNary	Smith
Blaine	George	Neely	Steiwer
Borah	Glass	Norris	Stephens
Bratton	Harris	Nye	Swanson
Brookhart	Harrison	Reed, Mo.	Thomas
Capper	Howell	Robinson, Ark.	Wagner
Caraway	Johnson	Robinson, Ind.	Walsh, Mass.
Copeland	Kendrick	Schall	Walsh, Mont.
Couzens	La Follette	Sheppard	Wheeler
Cutting	Locher	Shipstead	

NAYS—34

Ashurst	Edwards	McKellar	Smoot
Bayard	Fess	McLean	Steck
Bingham	Gerry	Metcalf	Tydings
Blease	Gillett	Moses	Tyson
Bruce	Greene	Oddie	Vandenberg
Curtis	Hale	Phipps	Waterman
Dale	Hayden	Pine	Watson
Deneen	Keyes	Reed, Pa.	
Edge	King	Sackett	

NOT VOTING—17

Broussard	Gould	Norbeck	Trammell
du Pont	Hawes	Overman	Warren
Frazier	Heflin	Pittman	
Goff	Jones	Ransdell	
Gooding	Mayfield	Shortridge	

So the conference report was agreed to.

PAYMENT OF TAXES IN VIEW OF DISCLOSURES (S. DOC. NO. 157)

The VICE PRESIDENT. The Chair lays before the Senate a communication from the chairman of the Joint Committee on Internal Revenue Taxation. The attention of the Senator from Montana [Mr. WALSH] is requested. What disposition does he desire to have made of the communication?

Mr. WALSH of Montana. I ask that the communication be read.

The VICE PRESIDENT. The clerk will read it.

The Chief Clerk read as follows:

CONGRESS OF THE UNITED STATES,
JOINT COMMITTEE ON INTERNAL REVENUE TAXATION,
Washington, May 24, 1928.

The VICE PRESIDENT OF THE UNITED STATES,
Senate Chamber.

SIR: Pursuant to Senate Resolution 235, adopted May 18, 1928, I have the honor to transmit a report of the Joint Committee on Internal Revenue Taxation, relating to taxes and penalties paid consequent upon disclosures before the Committee on Public Lands and Surveys of the Senate in the course of the investigation by it pursuant to said Senate Resolution 101, and related matters.

Very respectfully,

W. C. HAWLEY,
Chairman Joint Committee on Internal Revenue Taxation.

REPORT OF THE JOINT COMMITTEE ON INTERNAL REVENUE TAXATION

(Pursuant to S. Res. 235, adopted May 18, 1928)

WASHINGTON, D. C., *May 24, 1928.*

Senate Resolution 235, adopted May 18, 1928, is as follows:

"*Resolved*, That the Joint Committee on Internal Revenue Taxation be, and it hereby is, requested to secure from the Secretary of the Treasury and submit to the two Houses of Congress full information concerning what taxes and penalties, if any, have been collected by or paid into the Treasury consequent upon disclosures made before the Committee on Public Lands and Surveys of the Senate in the course of the investigation conducted by it pursuant to Senate Resolution 101, or through inquiries prosecuted incidental to such investigation, including the date of payments, the amount of the same, and the persons making the payments; and likewise, in so far as it may not be incompatible with the public interest, further information concerning any claims or demands being made by the Treasury against any persons or corporations for taxes or penalties over and above such sums as may have been heretofore paid on account of the receipt of assets so disclosed and not duly reported for taxation as required by law."

A copy of the resolution was transmitted to the Secretary of the Treasury on May 19, 1928, with a request that the information specified in the resolution be furnished to this committee as soon as possible. The reply of the Secretary of the Treasury, dated May 23, 1928, is as follows:

THE SECRETARY OF THE TREASURY,
Washington, May 23, 1928.

DEAR MR. CHAIRMAN: Receipt is acknowledged of your letter dated May 19, 1928, in which you quote Senate Resolution 235, adopted May

18, 1928, requesting your committee to secure from the Secretary of the Treasury full information with respect to the amount of taxes and penalties that has been collected as a result of the disclosures made before the Senate Committee on Public Lands and Surveys in the course of its investigation under Senate Resolution 101, or other inquiries prosecuted incidental to such investigation; also, if not incompatible with public interest, to furnish your committee with information with respect to any claims or demands being made by the Treasury for taxes and penalties in addition to such sums as have already been paid.

While this department has availed itself of the information secured by the Committee on Public Lands and Surveys of the Senate, the department has made an independent investigation of various matters connected therewith. We are unable to say that the payments hereinafter referred to are wholly the result of disclosures made before the said committee, but as a result of these disclosures and of the department's own investigations, these payments have been made. You are advised that these investigations disclosed that the Continental Trading Co. (Ltd.), of Canada, was liable to the United States for income taxes for the years 1922 and 1923 in the total amount of $393,653.42. The corporation, having failed to file income-tax returns for those years, was held liable also for a penalty of 25 per cent, or $98,413.36, making a total liability of $492,066.78, plus interest. Jeopardy assessments were made against the corporation on March 13, 1928.

The corporation being out of existence, steps were taken to collect the liability from the transferees of the corporate assets, Messrs. James E. O'Neil, Henry M. Blackmer, Harry F. Sinclair, and Robert W. Stewart. On April 25, 1928, the attorney for Mr. O'Neil requested the immediate assessment of one-fourth of the corporate tax liability against his client, and on May 9, 1928, he made payment on behalf of Mr. O'Neil in the sum of $151,305.91, representing one-fourth of the taxes and penalties of the corporation, plus interest to the date of assessment against Mr. O'Neil.

On May 9, 1928, the attorney for Mr. Blackmer made a payment on behalf of his client in the full amount of $151,597.10, representing one-fourth of the liability of the corporation for taxes and penalties, plus interest to the date of assessment against Mr. Blackmer. On May 10, 1928, the president and general counsel of the Sinclair Crude Oil Purchasing Co., of Tulsa, Okla., paid on behalf of the Continental Trading Co. (Ltd.) the balance of the latter's liability, amounting to $246,033.38, plus interest in the sum of $57,160.80, a total payment of $303,194.18. The amount thus collected in full satisfaction of the corporation's liability for taxes, penalties, and interest was $606,097.19.

A further result of these investigations was the payment from other sources of $1,398,910.09 additional tax. Inasmuch as these matters are the subject of further investigation, it is deemed incompatible with the public interest to disclose the name or names of the persons involved.

The department is taking appropriate steps to determine the liability of all individuals or corporations for taxes and penalties based upon the receipt of income from the assets mentioned in Senate Resolution 235, but I feel that it is not compatible with the public interest to disclose at this time the detailed facts in connection therewith.

Very truly yours,

A. W. MELLON,
Secretary of the Treasury.

Respectfully submitted.

W. C. HAWLEY,
Chairman Joint Committee on Internal Revenue Taxation.

Mr. WALSH of Montana. Mr. President, briefly this report from the Secretary of the Treasury advises us that there have been recovered by the Treasury in taxes, penalties, and interest, in consequence of the investigation into the affairs of the Continental Trading Co., ordered by the Senate, an aggregate of something better than $2,000,000. Six hundred-odd thousand dollars was taxes, interest, and penalties assessed against the Continental Trading Co. and paid by the four gentlemen who were prominent in the organization of that institution, Mr. Blackmer, Mr. O'Neil, Mr. Stewart, and Mr. Sinclair, each paying one-fourth thereof. The other $1,300,000 comes from sources which it is deemed inadvisable at the present to disclose, but the story of which is somewhat romantic in its features.

In addition to these sums there will still be due further sums from the individuals into whose hands the profits of the Continental Trading Co. transactions went. The amount paid for the Continental Trading Co. is the simple 12½ per cent tax due from the corporation, but its assets having been distributed, an income tax is due from those who received the amount.

I am informed by the financial clerk of the Senate that the expense of this investigation up to the present time is $14,165.

CONTROL OF EUROPEAN CORN BORER (S. DOC. NO. 155)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation, amounting to $7,000,000, for the Department of Agriculture, fiscal year 1929, for the eradication or control of the European corn borer, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed the following bill and joint resolution, in which it requested the concurrence of the Senate:

H. R. 13399. An act authorizing the Baltimore Gas Engineering Corporation, a Maryland corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Kanawha River at or near Dunbar, W. Va.; and

H. J. Res. 318. Joint resolution amending the joint resolution entitled "Joint resolution directing the Secretary of the Interior to withhold his approval of the adjustment of the Northern Pacific land grants, and for other purposes," approved June 5, 1924 (43 Stat. 461), as amended by the joint resolution approved March 3, 1927 (44 Stat. 1405).

PUBLICITY OF INCOME-TAX RETURNS

Mr. SMOOT. Mr. President, as a partial report from the committee of conference on the bill (H. R. 1) to revise and equalize taxation, to provide revenue, and for other purposes, I move that the Senate recede from its amendment No. 54, and that the conferees on behalf of the Senate be instructed accordingly.

Mr. JOHNSON. Mr. President, this is in the nature of a conference report, I understand.

The VICE PRESIDENT. Yes; it will not interfere with the unfinished business.

Mr. JOHNSON. It will not interfere with the unfinished business. Of course, I wish the unfinished business could remain before the Senate, but under the circumstances it is impossible to debate the matter.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Utah.

Mr. BRUCE. Mr. President, I would like to discuss that motion.

Mr. SMOOT. It is not debatable.

Mr. REED of Pennsylvania. I make the point of order that the motion is not debatable.

The VICE PRESIDENT. A motion to proceed to the consideration of a conference report is not debatable.

Mr. SMOOT. Mr. President, I will ask the Senator from Maryland to let me submit my motion.

Mr. BRUCE. Certainly.

Mr. SMOOT. I move that the Senate recede from its amendment No. 54, and that the conferees on behalf of the Senate be instructed accordingly.

Mr. President, I desire to make a very brief statement. The Senate conferees have stood out for the amendment and they do not feel justified in yielding unless it is so ordered by the Senate. In fact, I want to say to the Senate frankly that the conferees on the part of the Senate are in the position that each one of the conferees voted against the proposition when it was before the Senate. Therefore, none of us felt like receding unless the Senate authorizes us to do so. The House conferees are a unit and will not yield, so we are told by them, but before the Senate conferees do so, we ask instructions from the Senate.

Mr. DILL. Mr. President, will the Senator yield for a question?

Mr. SMOOT. Certainly.

Mr. DILL. What will be the result if the Senate refuses to recede? Is it not possible for the House to take a vote on the question? The Senate has already voted on it. Why should not the House vote on it?

Mr. SMOOT. The House has already voted on it in the bill itself.

Mr. DILL. But not on this amendment.

Mr. SMOOT. Yes; upon this amendment.

Mr. DILL. It was not in the bill when it was introduced in the House.

Mr. SMOOT. Oh, yes. In other words, the existing law will remain as it is to-day.

Mr. DILL. But the House has not voted on this particular amendment at any time.

Mr. SMOOT. Does the Senator mean the amendment of the Senate?

Mr. DILL. The amendment the Senator is asking to recede from.

Mr. SMOOT. Of course, the House conferees will not yield on it.

Mr. REED of Missouri. I presume the House passed the usual resolution that it adhered to its bill as passed, and in that way it did vote on the amendment.

Mr. SMOOT. I say that they insist upon the publicity amendment as provided in the House bill. The only question is that we thought it was proper and right to bring the Senate publicity amendment here, and let the Senate decide and instruct its conferees. That is what the motion is at the present time.

Mr. BRUCE. Mr. President, in view of the importance of the matter which the Senator from Utah is submitting to the Senate, I gladly waive my right to the floor, but I hope the Senate will give me an opportunity later to say what I want to say.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Utah.

Mr. COUZENS. Mr. President, I have no desire to delay the Senate in a vote on the pending question, but there is such a general misconception throughout the country as to the meaning of the amendment adopted by the Senate that I think it proper to have the matter straightened out.

No sooner had the amendment been adopted by the Senate than the press, and the Associated Press in particular, sent out stories that the old publicity feature of the law had been again voted by the Senate; in other words, the whole public got the impression that the Senate amendment provided the same sort of publicity that was so objectionable in the 1924 act and which was properly repealed in the 1926 act.

Just to give Senators an idea of some of the misconceptions that have been sent around the country as to the meaning of the amendment, I want to read an editorial which appeared in the Washington Post on the 23d of May:

PRYING INTO PRIVATE AFFAIRS

Republican leaders in the Senate, with the aid of Vice President Dawes, succeeded in keeping the tax reduction bill within the bounds set by the financial authorities of the Government. The measure as it goes to conference is only $4,000,000 above the mark set by Secretary Mellon. The problem now is to iron out the differences between the House and Senate in conference. A way must be found to reach a compromise between the views of the two Houses, which vary more than $84,000,000 in their tax-reduction proposals.

In addition to this disparity there is one other important question to be settled. The Senate, at the instance of Senator NORRIS, amended the bill to provide once more for publicity on income-tax returns. Senator SMOOT did not, as was anticipated, move to reconsider this vote, which was taken when a bare majority of Senators were present. He hopes to eliminate the amendment in conference.

The conferees should make short work of this amendment. The Nation has had one dose of snooping into tax returns and wants no more of it. The practice of throwing open income-tax payments served no legitimate purpose. The benefits went to persons who made shady use of the information so obtained. Business heads and individuals were subjected to criticism which was not deserved, since it was never possible to determine from the total tax paid the circumstances under which the figure had been reached.

The demand of vulgar curiosity is not sufficient excuse for making public income-tax returns. The fact that a citizen contributes to the support of his Government should not make his affairs the property of snoopers and blackmailers. The pledge of secrecy which the Government gave at the time the income tax law was passed should be observed. There is too much interference with private affairs already without adding this amendment.

The amendment offered by the Senator from Nebraska [Mr. NORRIS] and adopted by the Senate was simply this:

Returns under this title shall be open to examination and inspection as other public records, under the same rules and regulations as may govern the examination of public documents generally.

That is the amendment which the Senate adopted. The provision which the newspapers and the country are commenting on, the provision of law that was put in the 1924 act and which everybody admits was objectionable, was set forth on page 24 of the 1924 act:

The commissioner shall, as soon as practicable in each year, cause to be prepared and made available to public inspection in such manner as he may determine, in the office of the collector in each internal revenue district, and in such other places as he may determine, lists—

I want to emphasize the fact that he had to publish lists—

containing the name and post-office address of each person making an income-tax return in such district, together with the amount of income tax paid by such person.

That was the provision which was so generally objected to, and properly so. It absolutely meant nothing. I mean that the internal-revenue collectors, after having received the tax from the individuals, were required to go through the entire list of taxpayers, prepare a list of the names, with the amount of tax paid, and lay it on the counter of the office of the internal-revenue collector. Immediately the press went in and took those lists and published them, page after page, throughout the United States. That obviously was objectionable. That provision never should have gone into the 1924 act. It was properly repealed in the 1926 act.

This provision now under discussion does not provide any such sort of publicity. When we talk about publicity of income-tax returns we do not contemplate what is implied in the Norris amendment. What is implied is that the records should be open to inspection if a man goes in and makes a requisition for the name of the corporation or concern whose income-tax returns he desires to see. If that procedure were possible, there would not be the many inaccuracies and unfair decisions between taxpayers as to taxes.

I want to show how very evident it is that the Secretary of the Treasury does not understand the new amendment. In yesterday's Evening Star he gave out a statement which indicates his absolute lack of knowledge of the new amendment. The article reads:

MELLON ATTACKS INCOME PUBLICITY—PROVISION IN TAX BILL NOW BEFORE CONFEREES FUTILE, SECRETARY HOLDS

Sharply attacking the publicity provision inserted by the Senate in the revenue bill now before conferees, Secretary of the Treasury Mellon to-day declared the provision to be "entirely futile for any purpose."

In addition to doing no good, the Secretary believes it is definitely harmful in many ways. He is hoping the "objectionable" feature of the bill may be eliminated by the conferees, but explained he has no assurances as to what the conferees will do.

The principal objection to publicity of income-tax figures, the Secretary emphasized, was that the Government had no right to disclose the private business of the individual.

It will be observed that he continued to talk about publicity. There is nothing in the amendment which provides that the Treasury Department shall give any publicity whatsoever to any of the income-tax returns.

Continuing to read:

"No civilized country I know of," said the Secretary, "publishes the private affairs of its people. There is nothing of the sort in England or any of the leading countries of the world."

"The publicity provision is entirely futile for any purpose," Mr. Mellon declared, "because the return as published does not give any accurate idea of the actual income back of the return. Many factors enter into the making of a return, such as deductions or matters which belong in the year before."

Again I point out that he is talking about publishing the private affairs of the people. There is nothing in the amendment which requires him to publish the private affairs of the people.

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. COUZENS. Yes; I yield.

Mr. SMOOT. The newspaper that wanted to obtain the names of the taxpayers and the amount of their taxes could go to the Treasury Department and collect that information and publish it, under the Norris amendment.

Mr. COUZENS. But what would the agent of the newspaper collect—the names of all the taxpayers?

Mr. SMOOT. He could collect them all or any one that he wanted in any district of the United States. Under the Norris amendment a newspaper or any number of newspapers could secure a complete list, as in the case of all public records, and the newspapers could publish what they wanted just as they did under the 1924 act.

Mr. COUZENS. But the list will not be prepared by the department, as it was in the old days.

Mr. SMOOT. That is the difference between the two. Under the 1924 act it was compulsory to prepare the list, and the newspapers could take it and publish it as prepared by the department, while under the Norris amendment a newspaper can send a man there and examine every document that there is and take every name that he wants to or all of them just as he could under the 1924 act.

Mr. COUZENS. In answer to that I wish to say there is not the same object in view, because he would have to requisition the names of the particular persons whose income taxes he wanted to ascertain.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

Mr. COUZENS. I yield.

Mr. ROBINSON of Arkansas. Making income-tax returns public records opens them to the inspection of any person who desires to see them.

Mr. COUZENS. The same thing is true as to public records in any other department of the Government.

Mr. ROBINSON of Arkansas. It would devolve upon the custodians of the records the continuous duty of exhibiting the

records to such persons as might want to examine them. So the making of them public records, while not a publishing of them in the sense the Senator has discussed, is in no sense a denial of publicity; it is giving the broadest publicity, in fact.

Mr. COUZENS. I disagree with the Senator.

Mr. ROBINSON of Arkansas. I wish to say, with the permission of the Senator from Nebraska, that I do not believe there exists a substantial demand for the publicity of income-tax returns. The subject has been agitated, I know, in the Congress for a great many years, but the only discussion of it that I have ever heard is right here in the Congress. I believe that it is repugnant to the majority of the men who make income-tax returns to have them published and to have them made public records. The time may come when it will be found necessary to take that course, but under present conditions——

Mr. COUZENS. I submit the Senator is making a speech in my time, and he rose, as I thought, to ask a question.

Mr. ROBINSON of Arkansas. Yes. I thought the Senator yielded the floor. However, I have concluded what I desire to say. I merely wish to reiterate that I do not believe there is any demand or substantial necessity for the publicity of income-tax returns.

Mr COUZENS. The Senator does not know whether there is a demand or not.

Mr. ROBINSON of Arkansas. That may be true.

Mr. SHIPSTEAD. Mr. President, the other day I think the Senator from Michigan addressed the Senate and during the course of his remarks stated that in the administration of the internal revenue act the rulings and decisions of the bureau were kept secret. Is there anything in this amendment that provides for the making public of such secret rulings so that the taxpayers may understand what the rules and regulations of the Treasury are when they make out their tax returns?

Mr. COUZENS. Not in the provision which I have been discussing, but there is a provision of the law which requires the rulings to be made public.

Mr. SHIPSTEAD. Does the Senator mean to say that the Treasury Department does not obey that part of the law?

Mr. COUZENS. Absolutely not, and the excuse they offer is that they can not publish the decisions without disclosing the names of the taxpayers; in other words, it is impossible to disclose the decisions and to delete the names. In other words, they arrive at a conclusion, and reach a decision based on a particular case and then say in their record, "This is not to apply to any other case." Of course, that is a decision, and is one of the perhaps 20,000 which were disclosed in the report of the special committee.

Mr. SHIPSTEAD. Does the Senator mean to say that tax cases are settled not according to the law but according to the conscience of whatever clerk happens to sit in judgment?

Mr. COUZENS. There is possibly a difference of opinion sometimes as to the interpretation of the law, but the investigation of our committee disclosed that many cases were decided upon the whim of an individual officer, engineer, or accountant, because it was easy to do it, for after it was done the record was absolutely closed to anybody's inspection or examination unless Congress asked to have the particular case examined. Under a resolution of Congress, of course, it could be done.

Mr. SHIPSTEAD. May I ask the Senator another question?

Mr. COUZENS. Certainly.

Mr. SHIPSTEAD. Does the Senator mean to say that these secret rulings are not applied uniformly in the decisions of the Treasury applying to cases of the same character and kind? In other words, are these secret rulings in the administration of the Revenue Bureau of the Treasury Department not applied uniformly to all taxpayers in like cases and like circumstances?

Mr. COUZENS. That is absolutely correct, because they do not know that a certain decision has been rendered. Within the bureau itself decisions are made by individuals that other individuals do not know about, and, therefore, they can not apply the ruling, as it has not been printed or promulgated. As a consequence, a man sitting in one room considering a case may decide it in an entirely different way than a man in the next room may decide a similar case, because there is no method of promulgating the rulings and decisions as rendered in each specific case.

Mr. SHIPSTEAD. Then, the application of the law is not uniform to all taxpayers?

Mr. COUZENS. Absolutely not, and it never has been.

Mr. SHIPSTEAD. I can only say that I am very much amazed.

Mr. COUZENS. So long as these records are secret, so long as no one can go in and see how a particular case was settled, the condition will continue to exist.

The Senator from Connecticut [Mr. McLEAN] just said that there were no secret rulings. I challenge the statement that there are no secret rulings. I question whether the Senator from Connecticut ever read the record of the hearings before the special committee to investigate the Revenue Bureau.

Mr. McLEAN. Mr. President, there is now and always has been a wide difference of opinion as to how secret these rulings have been. I call the attention of the Senator to the fact that now any aggrieved person has an appeal to the Board of Tax Appeals if he is not satisfied with any ruling or any decision.

Mr. COUZENS. That is entirely true, and I am glad the Senator has raised that point, because I want to point out that any time a taxpayer wants any money from the Government or any time he wants a refund or any time he wants a tax abated he exposes every bit of his tax record before the Board of Tax Appeals or before a Federal court. When he wants money out of the Treasury he never hesitates about exposing the most intimate details of his tax returns to the public.

Just why this pretended objection to exposing one's income-tax return is made I do not understand, in view of the fact that, as I have said, when a case is tried before the Board of Tax Appeals or in a Federal court every item is made public. The taxpayers in that position do not object that their income-tax returns are going to be exposed in the record. There are 22,000 cases before the Board of Tax Appeals. Thousands and thousands of them involve the returns of corporations, and in those proceedings every detail of the corporate returns is exposed to the public gaze; and, in fact, detailed and discussed and argued before the Board of Tax Appeals or before the court. In that case there is no objection. The real objection to this is the fact that when taxpayers receive favorable decisions, decisions that sustain their viewpoint, they then, of course, do not want any other person to know what kind of settlement they made, especially if the bureau has stretched the law in favor of the taxpayer.

Mr. HOWELL. Mr. President——

Mr. COUZENS. I yield.

Mr. HOWELL. Where a taxpayer may receive a favorable settlement is there anyone to audit the case?

Mr. COUZENS. There are auditors in the bureau, of course.

Mr. HOWELL. There are auditors in the bureau, but the same department that makes the favorable credit or reduction audits that account.

Mr. COUZENS. I want to be perfectly fair. There is this distinction: The collectors and their staffs in the respective districts of the country audit the returns of the taxpayer. Then their audit is sent for final determination, in most cases, to Washington, to be reaudited and a determination reached to see whether the auditors in the field are in agreement with the auditors in the office at Washington.

Mr. HOWELL. But is there any other department of the Government that has the authority to make expenditures and enter into contracts that also audits its own accounts?

Mr. COUZENS. I think there is a difference. This is a tax collection agency, not a disbursing agency. What the Senator says is entirely correct with respect to any department that is disbursing appropriations made by the Congress, and, in that connection, it is provided that the comptroller shall have control of disbursements. This, however, is not an analogous case, because the Bureau of Internal Revenue is a tax-collecting agency and not a disbursing agency.

Mr. HOWELL. Why should any single agency be allowed to collect and expend money without an audit, even if the expenditure is in the nature of a return?

Mr. COUZENS. I do not call a refund an expenditure. I think there is a difference between a refund that is legitimately due a taxpayer and a disbursement made from an appropriation by Congress. I appreciate what the Senator has in mind, but I believe it is absolutely impossible. As much as I should like to see it done, I think it would be impracticable to have all of the millions of tax returns audited by two agencies. There are millions and millions of cases, and thousands and hundreds of thousands of them, in fact, are as yet undetermined, and we would have to set up another agency almost comparable with the Bureau of Internal Revenue in Washington if there was to be an absolute check on each transaction by the Bureau of Internal Revenue.

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. COUZENS. I yield.

Mr. SMOOT. I wish to say to the Senator that in the case of every tax return there are eight audits before it is finally disposed of.

Mr. COUZENS. I should like to say in that connection that that means nothing.

Mr. SMOOT. It is not by the same person, of course, but it is in the department. Each tax return has to go through that order of procedure.

Mr. COUZENS. But that means nothing, Mr. President, because the judgment of the chief auditor is taken. We have record after record that discloses that fact. When the chief auditor has reached his conclusion as to the method of determination he says to his subordinates, "sign on the dotted line," and the subordinate auditors do sign on the dotted line, for obvious reasons. One is they want promotion; another is that they do not want to lose their jobs. Protest has been discouraged in the bureau. When a subordinate in the auditor's office or in the engineer's office protests against a ruling by his superior he is reprimanded instead of being encouraged. So, the whole bureau is permeated with men who know that conclusions and decisions are wrong, but are afraid to protest because they are discouraged from protesting against the action of their superior officers.

Mr. HOWELL. Is not that the very reason why there should be an independent audit?

Mr. COUZENS. I believe if these records were open so that anyone who questions a decision could go in and review it, that that would automatically stop these preferences.

Mr. LA FOLLETTE. Mr. President, I rise to a point of order.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). The Senator will state it.

Mr. LA FOLLETTE. The Senate is in such disorder that it is impossible to hear the proceedings.

The PRESIDING OFFICER. The Senate will be in order and audible conversation will cease.

Mr. COUZENS. The viewpoints of the junior Senator from Nebraska [Mr. HOWELL] are ideal, but I believe to a large extent impracticable because of the enormous detail. I also think that the audit in the field and the audit in the Washington office would be quite sufficient if the final audit were not secret. I think that that secrecy in its itself encourages men to do the very thing that I have said they have done.

We disclosed cases in the hearings where a single individual in charge of a division—and there are many of them—would take a taxpayer into a room and settle his case all alone. Then, afterwards, he would go out and say to his subordinates, "I have agreed with Mr. Jones that this is the basis of settlement, and you will make up your report accordingly." The records disclosed that in many cases these decisions were unlawful. I hesitate to say that they were fraudulent, but they were in effect fraudulent so far as the Government's revenue was concerned.

I do not know what these men got, if anything, for making these favorable decisions. The committee did not have a detective agency or an investigating department which investigated the private lives of the auditors to see whether or not they had secured any compensation for performing these favorable acts for the taxpayers.

The whole thing is greatly misunderstood by the public. There is not a particle of difference in effect between the Norris amendment and what happens in every State in the Union.

Mr. HOWELL. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Nebraska?

Mr. COUZENS. I yield.

Mr. HOWELL. If we are not to have publicity of the kind that is provided by the Norris amendment, ought we not, then, to have an independent audit?

Mr. COUZENS. I think that would be highly desirable. I think an independent audit would be highly desirable if we are not going to have these records open for supervision and inspection; and I entirely agree with the Senator from Nebraska.

For instance, in my State a taxpayer files with the assessors a statement showing the value of his furniture, his personal property, his jewelry, his cash in bank, his personal holdings in stocks and bonds, and it is absolutely open to public inspection. I can walk into the assessor's office in the city of Detroit and call for the tax return of any individual taxpayer. I can have a clerk hand me that record, and I can look it over and observe the minutest details; and, in fact, that has been done on occasion, but the newspapers take no interest in it. They do not go into these things to investigate the tax returns of individuals or corporations.

If the newspapers were to do as the Senator from Utah suggests, retaliation could be made against them by another newspaper, and their tax returns exposed. In other words, there would be no incentive for newspapers or others to go in and dig out these tax returns for the mere sake of publishing them. Anybody who did that would be subject to retaliation.

Mr. LA FOLLETTE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Wisconsin?

Mr. COUZENS. I do.

Mr. LA FOLLETTE. There would be no more incentive, may I suggest to the Senator from Michigan, than there is for their publication now of the property-tax return.

Mr. COUZENS. Absolutely not; and, as stated by the junior Senator from Wisconsin [Mr. BLAINE], the income-tax returns in the State of Wisconsin have been public records to the same extent as these returns would be under this provision, and yet there has been no objection to it. The newspapers have not gone in and requisitioned the returns of individual taxpayers or corporations and published them in the press.

It is this misunderstanding that is created throughout the country that brings about this campaign of opposition. Some Senators said to me yesterday, "We voted for the Norris amendment in the original Senate bill. We now have to reverse ourselves, because we have received some telegrams from home objecting to the provision." How do they get the information to object to this provision? It is based on the kind of editorials and statements that I have just read, alleging that an effort is being made to return to the old publicity methods of 1924, which is not contemplated at all. Even the Secretary of the Treasury does not understand the proposal. He disclosed in his statement last night that he is unfamiliar with the provisions of this amendment. Every effort is being made to mislead the public; I do not say intentionally, but it certainly is being done in opposition to this amendment, for the reason that the act of 1924 did create a very unsatisfactory and disagreeable situation, and was entirely unjustified.

Mr. BARKLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Kentucky?

Mr. COUZENS. I do.

Mr. BARKLEY. I have heretofore, as a Member of the House, voted for publicity of these tax returns. I voted against the repeal of this tax in the last tax bill. I have been inclined to draw an analogy between the records of a county tax assessor, which are public records in the courthouse in every county seat, and the publicity feature of the income-tax reports.

But does the Senator draw any distinction between public records in every courthouse in every county seat in the country which are open to inspection, such as deeds of conveyance, which in most cases do not disclose the real consideration, where everybody in the county can easily have access to the records in a courthouse, and a situation where there is only one collector in a whole State, and there will be no incentive for the people of the whole State to go to that collector's office in order to inspect the returns of all the income-tax payers in the State.

I ask that question with reference to the practical value of the publicity which the Senator himself has in mind, and which is contemplated in this amendment.

Mr. COUZENS. The Senator asks if there is an analogy?

Mr. BARKLEY. Yes.

Mr. COUZENS. With reference to the filing of deeds or mortgages, I do not think there is an analogy; but I tried to draw a picture of an analogy where a tax payer files a property return tax for local assessment.

The point which the Senator from Kentucky makes, that with one collection agency in a State there would in all probability be no great desire of the people of the State to go into the tax returns, because they are all concentrated in one district, is probably true; but if the Senator were a lawyer for a taxpayer, and his client was uncertain as to the method of settlement that should be made with respect to a specific tax case, he then could say, "Well, I happen to know that John Jones has a like case. I will see how the bureau settled that particular case." He walks in and requisitions John Jones's tax return, and he sees how the bureau determined the case, and he therefore has a guide. In other words, it would create uniformity of assessments against taxpayers, instead of the diversity of systems that now exists.

Mr. BARKLEY. That might aid lawyers representing taxpayers who have cases in the Bureau of Internal Revenue; but what worries me is, what public benefit would be conferred by a provision that might be helpful to such lawyers, in view of the fact that for all practical purposes the public would have no access to these returns, and would have no interest in them?

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield, and, if so, to whom?

Mr. COUZENS. They may not have any interest. If they have no interest, they do not go and examine them; but I contend that if they have an interest they should have access.

Mr. BARKLEY. Even if they have an interest, for instance, in the State of Kentucky—which is more than 500 miles in length, with more than two and one-half million people, and with one office in the city of Louisville, practically in the center of the State—if all of them, or any considerable number of them, had an interest in knowing how much income tax any citizen of that State had paid, what practical help would they have from this provision; and how many of them would journey all the way to Louisville for the purpose of inspecting the income-tax returns in order to satisfy either their curiosity or their interest?

Mr. LA FOLLETTE. Mr. President, will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Wisconsin?

Mr. COUZENS. I should like to reply to the Senator from Kentucky first. The very point that the Senator makes is the point that I believe would perhaps exist—that is, that there would be no interest on the part of the general public as to the taxes paid by any particular individual, and therefore they would not journey to the collector's office to see the returns—but that is the very thing that the opponents of this amendment contend would happen.

Mr. BARKLEY. That they would journey to the office to see the returns that were made?

Mr. COUZENS. Yes; out of curiosity—that they would journey to the office for the purpose of snooping into the tax payments of their neighbors.

I contend that the public interest is greater than the interest of the individual who may want to know what a taxpayer pays. The great public interest is to see that there is a uniformity of application of the law to all taxpayers alike. It would insure the employees of the Government, scattered all over the United States, giving fair and equitable treatment to all the taxpayers, because they never would know when their records were going to be checked and when any inaccuracy or favoritism might be disclosed. Under the present law, however, the employee is free to do as he chooses; and he knows that the tax discrepancy may never be discovered, and probably never will be discovered. That was clearly disclosed in the hearings which the committee held.

Mr. BARKLEY. I think uniformity of practice would be very desirable in the administration of the tax laws and the decision of contested cases; but I imagine that if there is any field of legal jurisprudence or jurisdiction where uniformity is impossible, it is in the application of a tax law under the varying circumstances that surrounds every man's individual tax and his individual business. Desirable as it might be to have uniformity, I doubt whether we shall ever attain it.

Mr. LA FOLLETTE. Mr. President, will the Senator permit me to trespass upon his time for a moment to make an observation in response to the suggestion of the Senator from Kentucky?

Mr. COUZENS. I yield.

Mr. LA FOLLETTE. The Senator asked for practical results. In Wisconsin from 1913 to 1923 our income-tax returns were secret, just as they are under the Federal law now. In 1923 we enacted a provision precisely like the one offered by the Senator from Nebraska and adopted by the Senate. A reaudit of income-tax returns from 1916 to 1923 in Wisconsin disclosed that taxpayers in Wisconsin had fraudulently withheld from the treasury of the State approximately $9,000,000 during the period when the income-tax returns were secret.

Since 1923 and down to date, when we have had these income-tax returns public records, we have found no such discrepancy in the amount of returns made by the taxpayers and the amount of tax which they should pay according to the law. In other words, Mr. President, it is a very clear indication, I believe, that the fact that the income-tax returns are public records produces a very different psychology upon the part of the individual taxpayer when he makes out his return, whether it be under a secret provision or whether it be under a provision where it is a matter of public record.

Mr. BARKLEY. Mr. President, may I ask the Senator, for information, whether these tax reports were available for public inspection at the State capitol or whether they were available in each county courthouse?

Mr. LA FOLLETTE. They are available only at the office of the Income Tax Commission in Wisconsin for corporations. Of course, for individuals they are open to inspection in the respective districts; but for corporations the tax returns are available for public inspection only in the office of the commission at the capitol at Madison.

Mr. BARKLEY. Are those incomes collected by the local collecting officer of the county or only by the State authorities?

Mr. LA FOLLETTE. They are collected by the State income tax collectors. I thank the Senator from Michigan for yielding.

Mr. COUZENS. Mr. President, I continue to read the misunderstanding the Secretary had of this provision:

The publicity provision is entirely futile for any purpose.

In that connection I want to say that in the examination of the United States Steel Corporation returns we found that the Bureau of Internal Revenue had allowed depreciation, amortization, and depletion for the United States Steel Corporation railroads, though the law specifically prohibited amortization for railroads. In other words, there was no other railroad in the country that we knew of that was getting amortization for railroad extension and expansion for the prosecution of the war. But the steel corporation railroads were allowed that.

It was cumbered up in the records of credits which the Steel Corporation asked for, and we discovered it, and said, "This is in violation of law. You are not permitted to allow amortization for railroads, and yet you are allowing it in the case of the Steel Corporation"; and the bureau admitted their error, and I am informed, at least, have agreed to correct it. There is a case that could have gone through without anybody observing it. As I understand, the Steel Corporation tax cases have been held open by waivers ever since 1917 because of a failure to agree upon credits and the exact amount of tax due the Government. I contend that the opening of these records to inspection is not futile.

The publicity provision is entirely futile for any purpose, Mr. Mellon declared, because the return as published—

Nobody talks about publishing the return—

because the return as published does not give any accurate idea of the actual income back of the return.

There he is talking about the old tax provision in the 1924 act. That is not the provision in the pending bill. There is no publication of the tax paid, and as applied to the 1924 act the Secretary was absolutely right, the publishing of those amounts by the individual taxpayer meant nothing. It was a silly sort of a provision to be put in the law in the first place, and I am convinced that the opponents on opening these records to publicity put that in the law as a joker—

because the return as published does not give any accurate idea of the actual income back of the return. Many factors enter into the making of a return, such as deductions or matters which belong in the year before.

If these records could be examined by people who were justified in examining them, the returns themselves, and especially the work sheets of the auditors and engineers who make up the final determination of the taxation, would show that.

Former provision repealed. A provision requiring publicity for income-tax figures was inserted in the 1924 revenue law, but Secretary Mellon emphasized it was repealed in the 1926 law.

That was perfectly correct. It should have been.

And has since been inoperative. Although it was not in effect long enough to make any material change in the amount of revenue to the Government—

A practical admission that if it had been in force long enough it might have secured additional returns to the Government.

Secretary Mellon thought the publicity given returns did not serve the purpose of increasing returns.

The returns as formerly made public, or as proposed to be made public—

There is the deception or misunderstanding. He says that—

The returns as formerly made public, or as proposed to be made public under the present bill, Secretary Mellon said, would not give a clue to the current income of the taxpayer.

Nobody wants to give a current report of the income of the taxpayer.

As one might suppose, but on the contrary would very likely be "entirely misleading."

Of course, he is again talking about the old act, and it was entirely misleading, and meant nothing.

Assistant Secretary of the Treasury Bond, in charge of the Internal Revenue Bureau, branded the publicity provision as "impractical."

I do not see how it is impractical so far as the bureau is concerned, because it does not affect the bureau. It does not entail any publishing of the lists, as the old act did, and the only part that can be impractical, as applied to the bureau, is

the fact that they may be required to go on and treat taxpayers all alike, and have a uniformity in the application of the law. That, of course, from the bureau's standpoint, may be impractical.

Two main objections were voiced by Mr. Bond. First, he said it would embarrass the bureau in its normal work.

Just think of the fact that the ability of somebody to walk in and look at the records embarrasses the bureau in its normal work. I confess that under the present arrangement of the bureau that may be so.

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Missouri?

Mr. COUZENS. I yield.

Mr. REED of Missouri. As to that point, the rule is well settled that when a record is a public record to which any person coming at proper hours has a right to have access, that access is always governed by the rule that it must be under such circumstances and conditions that it will not materially interfere with the conduct of the business of the office. It always must be a reasonable request, made for some reasonable purpose, but always the examination must be made in a manner that does not conflict with running the business of the office.

Mr. COUZENS. That is correct, and since the Senator raises that question I want to point out that these records are public records according to law, but they are public records with certain restrictions, which makes it possible only for people whom the President approves to get the returns, because in a part of the 1924 act which was not repealed by the 1926 act it was provided that returns upon which the tax has been determined by the commissioner shall constitute public records, but they shall be open to inspection only upon order of the President, under rules and regulations prescribed by the Secretary and approved by the President.

So all of this time these records, according to law, have been public records, but the public has access to them only by an order of the President. In other words, the President is in a position to get all the tax returns of everybody he desires for his friends, for himself, or for anybody that he desires to have them, but no one else under this provision can have access to those returns.

Every presidential candidate who may be opposing a President anywhere at any time may have his tax returns examined by his political opponent to the smallest detail, and yet nobody else can get the return under the present law and a law which it is proposed shall continue. I want to say further—I overlooked this—that the law further says that the Ways and Means Committee and the Committee on Finance, or a special committee, shall have the right to call on the Secretary of the Treasury for and it shall be his duty to furnish any data of any character contained in or shown by the returns, or any of them, that may be required by the committee.

Mr. NORRIS. Mr. President, I want to ask the Senator a question.

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Nebraska?

Mr. COUZENS. I yield.

Mr. NORRIS. I want to ask the Senator first, the question of this amendment has never been passed on by the House except in a general way, has it?

Mr. COUZENS. This provision of the law has never been passed on by the House.

Mr. NORRIS. I remember it was a Senate amendment, of course, but I mean the House has never had an opportunity to express its judgment on this particular amendment?

Mr. COUZENS. It never has.

Mr. NORRIS. Then I would like to ask the Senator what was the idea, when the Senate had expressed itself on this amendment by a roll-call vote, in sending it back to the Senate for another vote, instead of sending it to the House, where they had never had an opportunity to vote on it? Why should we vote on it a second time, and never permit the House to vote at all?

Mr. COUZENS. The chairman of the Finance Committee, the Senator from Utah [Mr. SMOOT] said that the House conferees declined to do it, and the Senator perhaps can tell the reason why they declined. I understand there are some other extraneous reasons.

Mr. NORRIS. Does the Senator mean declined to take it back to the House?

Mr. COUZENS. Declined to take it back to the House.

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. COUZENS. I yield to the Senator from Utah.

Mr. SMOOT. I will say this to the Senator, that all of the House conferees said that not a third of the House would vote for that provision, and that there was no need of taking it back. They said they knew that, and that there was no need of undertaking to get the House to agree to it.

Mr. COUZENS. I assume that is correct, because of the superficial understanding of just what this means. I will warrant that there is not 1 per cent of the House, or 10 per cent of the House, at least, that knows just what this amendment is and the purport of it, and its intent, and the difference that exists between this amendment and the law of 1924.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. COUZENS. I yield.

Mr. COPELAND. A moment ago the Senator from Nebraska spoke about the roll call that was had in the Senate. I was not present when that was taken, but by the RECORD it was indicated that there were very few Senators here.

Mr. COUZENS. I do not see what difference that makes to the discussion. Senators had a right to be here; they ought to have been here.

Mr. COPELAND. It makes this difference, that some of us who did not have an opportunity to vote would like to vote on this.

Mr. COUZENS. The Senator will have a right under the pending motion.

Mr. COPELAND. I am opposed to this publicity feature.

Mr. COUZENS. I expected the Senator would be.

Mr. NORRIS. Mr. President, will the Senator yield again?

Mr. COUZENS. I yield.

Mr. NORRIS. It is quite evident that not only did we vote—and that will be disclosed upon an examination of the CONGRESSIONAL RECORD—not only did the Senate vote, and not only did every Senator have an opportunity to vote, but there was considerable discussion and debate on this question in the Senate pro and con. In the House there has been none. The House has never voted on it. They have never had a chance. Now come the conferees and say, "The House is opposed to it," but the House has not had a chance to say whether it is opposed to it or not. It seems to me the conferees were in a position to say to the House conferees, "We have considered this, and the House has not. If anybody is going to take it back, you take it back and debate it and come back and tell us what the judgment of the House is."

Mr. SMOOT. When the bill was up before the House, anyone could have offered an amendment to the provision in the bill. If anyone had wanted a vote, it could have been had at that time.

Mr. NORRIS. Oh, yes; but everybody knows how those things are voted on when they are laid before either House. The chairman of the conferees says, "Mr. Speaker," or "Mr. President," according to the House in which it happens to be, "I ask that the amendments of the House" or "I ask that the amendments of the Senate" "be disagreed to and the House" or the Senate, as the case may be, "asks for a conference, and that the Chair appoint conferees." In that sense the House did consider this amendment, together with all the other amendments that the Senate put on the bill as it passed the House.

Mr. COUZENS. Oh, no; I do not think the House has considered the conference report yet.

Mr. NORRIS. Not the conference report.

Mr. COUZENS. I do not believe any amendment was offered. I am quite sure no amendment was ever offered.

Mr. NORRIS. No; but in the House. The Senator does not get my idea. This bill passed the House and then came to the Senate, and we put on it a lot of amendments, including this one.

Mr. COUZENS. That is right.

Mr. NORRIS. Then it was messaged back to the House, and there, I presume—I have not looked up the RECORD, but it is the usual case—the chairman of the committee said, "I ask unanimous consent that all the amendments of the Senate be disagreed to, that the House ask for a conference, and that the Speaker appoint the conferees." Probably that is what happened. They never discussed any of the amendments. They were acted on en bloc.

It is a matter of form. We take the same course here, although, as the Senator says, we could insist on taking a different course when the bill came over here and have the amendments referred to the committee, and by the committee brought before the Senate, and every one of them discussed in detail. But that is not the usual practice; and I assume that in this case the House has never given any consideration to this particular amendment, but we have. Now they are asking us to reconsider it rather than the House, the branch of the legislature that never has even had an opportunity to consider it.

Mr. SHIPSTEAD. Mr. President, will the Senator yield?

Mr. COUZENS. I yield.

Mr. SHIPSTEAD. I want to ask the Senator from Nebraska a question. Is it proper for the Senate to instruct its conferees to take up the matter with the conferees of the House and have the House conferees requested to take the question back to the House?

Mr. COUZENS. No; we could not do that.

Mr. NORRIS. I do not know why we could not.

Mr. COUZENS. The particular motion before the Senate——

Mr. NORRIS. The Senate can instruct its conferees whenever its conferees report disagreement to the Senate and can give them any instructions we want to.

Mr. COUZENS. The Senator from Minnesota asked if we could give instructions to the House conferees.

Mr. NORRIS. Oh, no; we can not instruct the House conferees.

Mr. COUZENS. The motion asks us to recede from the provision we put in the bill to make the records public. That is the motto: Shall we recede from the position we heretofore took because the House conferees refused to go back to the House and have the House consider the amendment? That forces the Senate conferees to come here and ask for instructions.

Mr. SMOOT. And that is what we have done.

Mr. SHIPSTEAD. If the Senate votes to sustain its original position and the conferees go back to further conference, then what is the procedure?

Mr. COUZENS. They have to go back and tell the House conferees that they are not permitted to recede. They will have to debate the thing all over again, and it will probably force the House conferees to go back and ask their body what they desire to do.

Mr. REED of Missouri. Mr. President, will the Senator yield?

Mr. COUZENS. I yield.

Mr. REED of Missouri. I would like to ask the Senator a question. I am in favor of the amendment. I supported it. I am very much in favor of it. But under the present situation does the Senator believe there is any chance to get the conferees of the House to report to the House and to have the House accept the Senate amendment?

Mr. SMOOT. I will say to the Senator that every amendment in the bill was agreed to and this one was left to the very last. They will not agree to it, and therefore we came here and asked for instructions about yielding before the Senate conferees would yield.

Mr. REED of Missouri. I want the amendment in the bill just as much as the Senator from Michigan does, I believe. No; I will not say that, because he has given so much time to the question that he is probably better informed regarding it than any other Member of the Senate. But I ask whether at this late hour in the session, with several important matters that ought to be considered, we really gain anything by insisting upon the amendment? I very much doubt it.

My attention has been called to the fact that the old Mississippi-Warrior Boat Line matter is a question of vast importance. That line is liable to be terribly crippled unless a bill which has already passed the House can have a vote in the Senate. There are other bills in the same situation on the Senate calendar. The Senator from Michigan takes so little time of the Senate, and when he does speak always speaks so well to the point, that I hesitate to make this appeal to him.

It seems to me to be an utterly useless thing to insist on the amendment. I think we might as well let it go because of the situation, and bring it up at the next session. We can bring it up at any time we want to and discuss it. As long as I am here, unless I very materially change my mind, I will be standing with the Senator on the proposition. I think the arguments against it are ridiculous. I think they can be shown to be ridiculous. But that does not do us any good unless we can get it to the House.

Mr. COUZENS. The question of expediency will have to be determined by each individual Senator. I am not here to discuss the question of expediency. I am by no means hopeless, however, that if the Senate votes to insist on the amendment, in all probability, in a desire to have the bill passed, the House conferees will submit it to a vote in the House. If the House conferees are so sure that it will not be adopted, why not let the House have a chance to vote on it? Why hesitate about it? Why not let them take it back to the House and vote on it? That will not delay the work of the Senate at all, because while the conferees are taking it back to the House the Senate can proceed with its normal business.

Mr. BARKLEY. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Kentucky?

Mr. COUZENS. I yield.

Mr. BARKLEY. The question raised by the Senator from Missouri is one which has given me some trouble as to my own vote. It has been rumored—we hear all sorts of rumors here—and it has come to my attention that the statement has been made that rather than agree to the amendment, the House conferees and the House would see the whole tax-reduction program defeated. Is the Senator from Utah in a position to say whether that is reliable, or whether it is mere rumor?

Mr. SMOOT. I will say to the Senator that I never heard of it.

Mr. COUZENS. Nor have I.

Mr. BARKLEY. I have heard it from half a dozen sources.

Mr. REED of Pennsylvania. Mr. President, if the Senator from Michigan will yield——

Mr. COUZENS. I yield.

Mr. REED of Pennsylvania. I was told by the House conferees, all five of them, that in their honest judgment if the Senate insisted upon the publicity amendment the bill had no possible chance of passage. While I was skeptical of that at first, I became convinced of their good faith in making the statement. They said it was utterly impossible to get the House to agree to the provision.

Mr. BARKLEY. I should like to ask the Senator from Michigan if it should turn out that, in order to secure tax reduction at all, it is necessary to eliminate the publicity amendment, would the Senator then feel it is his duty to insist that the amendment should be insisted upon by the Senate regardless of the result on tax reduction?

Mr. COUZENS. I was interrupted at the time the Senator asked his question. I understood the Senator from Pennsylvania, who was one of the conferees, to make a statement which I did not hear.

Mr. REED of Pennsylvania. What the Senator from Kentucky asked was whether we had heard the statement that this amendment would not be agreed to by the House, and that insistence by the Senate upon it would practically kill the bill. I said that I had heard that statement. It was made, I think, by all five of the conferees on behalf of the House, and while I was skeptical of it at first, I became convinced, and I think some of my fellow conferees from the Senate became convinced, that that was the situation.

Mr. COUZENS. Without criticizing my friend from Pennsylvania I want to say that, of course, when 10 conferees are opposed to a provision in the bill it is very easy to reach the conclusion the Senator from Pennsylvania has reached.

Mr. REED of Pennsylvania. Of course the Senator knows my prejudice against the amendment. I am trying to be perfectly candid about it. We tried to play square with the Senator and with the Senate by bringing it back for a separate vote. That is the only reason why it is not a full report.

Mr. COUZENS. I am not charging the conferees with not being fair. I want to say that they have been perfectly fair, because they went into conference, every one of them, disagreeing with the amendment, and promised us that they would see that the Senate had another chance before they agreed with the House on the amendment. All I ask is that the House be given the same opportunity to vote on it. I can not see any reason for defeating the bill. If the House votes to reject the publicity amendment, so far as I am concerned, I will not try to insist.

Mr. SMOOT. The House will have a chance to vote upon it, because when the conference report is adopted here, if it is adopted to-day, it will immediately go to the House and the House can vote on the conference report.

Mr. COUZENS. Oh, yes; but that would be a vote on 100 amendments. They would vote on 100 amendments en bloc.

My position is that if the conferees of the Senate will tell the conferees of the House to go back and submit this identical question, and the House does not agree, then so far as I am concerned I will not be a party to blocking the tax reduction bill or defeating it. I will be willing then that the Senate shall recede if the House, after voting upon it, say they will not adopt it.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield for a suggestion?

Mr. COUZENS. I yield.

Mr. REED of Pennsylvania. As I understood it, our arrangement was that before we would recede on the amendment we would bring it back here for a separate vote, on which the Senate could register its will.

Mr. COUZENS. That is correct.

Mr. REED of Pennsylvania. Is it not changing that program somewhat to ask that, instead of the Senate doing it, the House shall do it?

Mr. COUZENS. I am not asking that. What I am seeking is that we shall continue to maintain our position that we pre-

viously took without any fear of intimidation on the part of the House.

Mr. REED of Pennsylvania. I think the Senator is perfectly right in that.

Mr. SMOOT. So do I.

Mr. COUZENS. The debate has led us into a situation where we are talking about expediency, where we say the bill will be wrecked if we do not recede on this amendment. I object to that sort of intimidation and trying to get Senators to change their votes as a matter of expediency before the House itself has rejected the amendment.

Mr. REED of Pennsylvania. I think the Senator is exactly right in that, because necessarily the question of opinion and prophecy applies to what the effect of our standing by the amendment would be. As the Senator has explained, the bias of the House conferees might lead us to blame them for the rejection of the amendment, and perhaps I might suggest that his own belief in the amendment would give him a corresponding bias in the other direction. So it will be for the Senate to make up its mind whether, everything considered, it wants to risk jeopardizing the bill and to form an opinion as to whether it does risk and jeopardize the bill. We are all agreed on that proposition.

Mr. COUZENS. I think that is true, but I want to say that I do not think that is a feature to be considered at this time. It is wholly practicable for the Senate to maintain its position and go back to the conference and insist that the conferees on the part of the House submit the question to the House. That is all I am asking the Senate to do.

Mr. SWANSON. Mr. President, will the Senator yield?

Mr. COUZENS. I yield.

Mr. SWANSON. Some one said something about an understanding. What understanding was that? We ought to carry out any understanding. An understanding with whom? That the thing should be submitted back to the Senate before it should be yielded in the conference?

Mr. COUZENS. If the Senator wants an explanation of that, I will say that the night we passed the tax bill the Senator from Utah [Mr. SMOOT] had given notice that he was going to ask for another vote on the Norris amendment when the bill reached the Senate. It was getting late and they were anxious to pass the bill. The Senator himself was auctioneering off the time here to stop debate. Out of my respect and consideration for the Senator from Utah, I said to him, "If you do not insist upon consideration of the vote at this time when the bill reaches the Senate, but will agree to bring it back here in case the conferees do not agree, I will not insist on another vote." That is the kind of agreement we had.

Mr. SWANSON. It did not extend any further than that?

Mr. COUZENS. No.

Mr. SWANSON. It had nothing to do with the exemptions in connection with the corporation tax?

Mr. COUZENS. Absolutely not. It was made right on the floor of the Senate.

Mr. SWANSON. I am very glad it did not extend any further.

Mr. COUZENS. I am not disclosing all the agreements we had, but that is the one the Senator asked about.

Mr. SWANSON. I would like to know about all of the agreements.

Mr. COUZENS. I am not going to tell that. The Senator knows that his party has caucuses. I want to make it plain that I have no desire to defeat the tax reduction bill, but I still contend there are three or four days, even if we adjourn according to the concurrent resolution sent here by the House, for the conferees on the part of the House to go back and do the fair thing and submit it to a vote of the House. If the House disagrees, I will be one of the first to yield on our part and let the bill go through.

Mr. SMOOT. That will come about in the regular way. If the Senate now instructs its conferees not to yield, the House conferees will have to take it back to the House. The only question is what the Senate will do with the motion.

Mr. LA FOLLETTE. Mr. President, if the Senator from Michigan will permit me——

Mr. COUZENS. I yield.

Mr. LA FOLLETTE. If the Senator from Utah thinks that is the logical outcome of the Senate's insistence upon its amendment, how can we talk about it jeopardizing the tax bill?

Mr. SMOOT. We do not know what the House will do.

Mr. LA FOLLETTE. It makes no difference what the House does so far as the ultimate passage of the bill is concerned.

Mr. SMOOT. I think it would make quite a difference.

Mr. LA FOLLETTE. In what respect, may I ask the Senator?

Mr. SMOOT. Mr. President, if the Senate shall now adopt my motion there will not be anything in conference, and the conference report will go right over to the House, but if the Senate votes against the motion that I have offered, automatically the bill will go back to conference, and then, of course, it will have to go back to the House for action.

Mr. LA FOLLETTE. Certainly, but that does not jeopardize the ultimate passage of the bill.

Mr. SMOOT. I have not said a vote upon it would do so.

Mr. LA FOLLETTE. There has been talk to that effect here, and Senators are being urged to change their votes on the theory that if they vote to sustain the vote of the Senate on this amendment they will jeopardize the bill. I merely wanted to point out that; from the remarks made by the Senator from Utah, there is no such issue at stake.

Mr. COUZENS. Mr. President, that is the point I am trying to make. All I ask, and all I asked in the first place was that the Senate vote on the merits of the Norris amendment. Now there has been injected into the discussion intimidation, so as to get Senators to change their votes in order to assure the passage of the tax bill. That is what I resent. I want this amendment voted on on its merits, and then we will take our chances upon it after the conferees shall have been instructed.

Mr. SMOOT. I wish to say to the Senator that I have not asked a single Senator to change his vote.

Mr. COUZENS. I am not charging the Senator from Utah with anything. I am saying that the first intimation of it came from the Senator from Missouri, who talked about the expediency of it; then the Senator from Pennsylvania talked about the probability of the defeat of the tax bill, all of which naturally has an influence upon the minds of Senators when this question comes to be voted on. That is what I object to having injected into this discussion, because Senators for that reason may not vote on the merits of the Norris amendment.

Mr. REED of Pennsylvania. Mr. President, all I did was to answer truthfully the question as to the attitude of the House as expressed by their conferees.

Mr. COUZENS. I am not finding fault with the Senator from Pennsylvania because the question was first raised by the Senator from Missouri, and it led to the suggestion as to voting on the ground of expediency rather than on the merits of the amendment.

Mr. EDGE. Mr. President, will the Senator yield?

Mr. COUZENS. I yield.

Mr. EDGE. I want to say that, from my viewpoint, I agree absolutely with the Senator from Michigan, and sincerely trust that the result of the vote will indicate absolutely the opinion of Senators on the merits and the merits alone of this proposal.

Mr. COUZENS. Mr. President, I say to the Senator that can not be done now, because a fear as to the passage of the bill has been put into the minds of Senators who may have been in doubt or may have been on the edge, and they will now vote against the amendment, for fear that the tax bill might be blocked if the motion were defeated.

Mr. BLACK. Mr. President——

Mr. COUZENS. I yield to the Senator from Alabama.

Mr. BLACK. I thought the Senator had yielded the floor.

Mr. COUZENS. No; I wish to make a few more comments.

Mr. President, I wish to complete this discussion about the misapprehension existing in the minds of some people. I have already taken too much time, but I still think that such a misapprehension exists, and I want to make it plain that the misapprehension the public has about this amendment is not justified.

Mr. Bond, the Assistant Secretary of the Treasury, continues to say:

> Two main objections were voiced by Mr. Bond. First, he said it would embarrass the bureau in its normal work; it would interrupt its functioning merely to "satisfy idle curiosity." Second, Mr. Bond thought, was the even more serious objection to publishing the private business affairs of the individual.

That is the point I keep emphasizing; there is no provision for publishing the private affairs of individuals contained in this amendment.

> Such publication, he thought, would probably assist a man's creditors in further embarrassing him, and might prove to be a hindrance to business.

Think of the absurdity of that suggestion coming from a man competent to be Assistant Secretary of the Treasury. There is not a business man in America who does not know that he can get the most intimate details of his competitor's financial standing and his profits either through Dun or Bradstreet or some other credit agency. That is merely a mountain raised to protect the bureau from having to give these decisions and

records to the public as they ought to do. The amendment if it should become a part of the law would hinder business and help creditors. Does any man think that a creditor can not find out the condition of the debtor? It is perfectly absurd. He can get it through his banker; he can get it through a credit agency. Such talk is indulged in for the purpose of misleading the public with respect to this amendment.

Outside of the publicity feature of the revenue bill, Secretary Mellon thought it was "not a radical bill," generally speaking.

The words "not a radical bill" are in quotations.

When publicity first was given to income-tax returns following enactment of the 1924 law, a storm of opposition arose from the entire country, with the result that the next revenue act repealed what had been caustically dubbed the "Paul Pry" section.

I think that name was given to the amendment by the Senator from Pennsylvania.

Mr. REED of Pennsylvania. I am not to blame for everything.

Mr. COUZENS. I agree with the Senator from Pennsylvania that that kind of a publicity provision was a "Paul Pry" provision. It was put in the bill as a joker to help defeat what the proponents of the making of these records public were really trying to get at.

The Government was castigated by cartoon, comedy, and stage for "sticking its nose" into everybody's business, and Congress was quick to respond by striking from the law the objectionable provision.

I want to compliment those who put that provision in the law as a joker, because they certainly accomplished the purpose desired; it certainly set back, probably for years, the movement in Congress to have these records public.

Assistant Secretary Bond also expressed the opinion that the provision in the bill as it stands to-day would not only force making public of the actual amounts paid but also of the files of the income tax returns made by the individual or corporation to the Government.

If he knows how to read English he knows that there is nothing in the amendment which would force making income tax returns public.

The Supreme Court of the United States held that newspapers had the right to publish the names of taxpayers and the amounts of taxes paid by them, under the 1924 provision, regardless of another apparently contradictory provision of the Revised Statutes which would have made such publication a violation of the law.

Then there is a brief note at the bottom which no effort was made to explain. It reads:

Language of the new publicity provision, however, is somewhat different from that in the 1924 act.

But there was an entire failure to point out the differences between the two provisions. I hope that the amendment will be insisted on by the Senate.

Mr. BLACK. Mr. President, I desire to speak briefly on the pending question. It is my judgment that the law at present with reference to the publication of income-tax returns is entirely too restrictive in its scope. It is also my judgment that the amendment which the Senate adopted is entirely too broad. For that reason I voted against the amendment, but I now find myself placed in a situation where, in order to express my views by my vote, I shall be compelled to vote against receding from the amendment which, in my judgment, covers too broad a territory. That arises in this way: The law at present does not give even to the Governor of a State, who may be interested in tax returns from his State, the right to have those returns inspected. Two representatives from Alabama came to the city several weeks ago, and I requested that the Secretary of the Treasury permit those representatives of the chief executive of my State to examine the tax returns, in order that they might obtain information upon which properly to work out a taxation system for Alabama. The Secretary of the Treasury, rightfully in my judgment under the existing law, declined to grant such permission. As I read the law, there is no Member of the House of Representatives and no Member of the Senate to-day, unless he be the chairman of two certain named committees in the law, who has a right to look at the tax returns from his State or from any other State.

I am thoroughly in sympathy with the arguments which have been presented by the Senator from Michigan [Mr. COUZENS] and by others to the effect that tax returns should be public records. I am just as much opposed, however, to a system which permits such tax returns to be flaunted on the front page of the daily newspapers in order to satisfy people who may have a curiosity. By reason of the fact that, in my judgment, contrary to the judgment of the distinguished Senator from Michigan, for whose judgment I have the highest respect, the amendment offered by the Senator from Nebraska would permit such unwarranted publication in the newspapers, I voted against the amendment, but I now find that, although I had an amendment which I would have offered, and which had been proposed——

Mr. SMOOT. And which if offered would have been accepted.

Mr. BLACK. And would have been accepted, for I will state that the Senator from Utah had already agreed to accept it, and so had certain other members of the Finance Committee. That amendment would have provided that the proper officers of any State could, upon request of the governor, have access to the returns of any taxpayer or to an abstract thereof showing the name and income of the taxpayer at such time and in such manner as the Secretary might prescribe. If we recede from amendment adopted by Senate, neither the State of Alabama nor any other State in the Union will have the right, even though it desires, to inspect the tax returns of the citizens of such State.

Mr. SMOOT. Under the present law the governor of a State has the right to inspect any corporation tax return.

Mr. BLACK. Yes, sir; the Senator from Utah is correct in that statement. The governor of a State has the right under the present law to inspect such returns.

Mr. SMOOT. Mr. President, I wish to say to the Senator from Alabama that his amendment failed to be offered, but it was not the fault of the chairman of the Finance Committee.

Mr. BLACK. That is correct. I will state in a moment just how that happened. The chairman of the committee, I will again state, had agreed to accept the amendment. I sought to get the floor several times, but, in the rush of passing the bill and the difficulty of the then occupant of the chair to recognize me by reason of the fact that I was not on the committee—which was proper—I did not secure recognition until after the amendment with reference to the general publication of tax returns had been adopted. It was then useless to offer an amendment for the limited publication of such returns when the Senate had already adopted language providing for general publication. In my judgment, it would have been out of order. So now, unless there can be some kind of compromise reached by the conferees—and perhaps it would have to be initiated by the conferees of the House—we still retain a restrictive system under the law, which does not even permit the governor of a State, charged with the chief executive functions of that State, to have access to a tax record which, in my judgment, should be a public record.

I thought, and I so stated to the Senator from Nebraska, that if his amendment had provided an additional statement such as was in the old law referred to by the Senator from Michigan, that the newspapers should not publish the tax returns, it would have been a very fair and just law, based on sound public policy and sound public principles because tax returns should be public records; but they should not be, in my judgment, so public that to satisfy mere curiosity they are placed on the front pages of the papers.

I have no criticism to make of the papers for publishing them if they have the opportunity and it is good news. There is no reason why they should not, if they are given the privilege; but I find——

Mr. COUZENS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Michigan?

Mr. BLACK. I yield.

Mr. COUZENS. I should like to ask the Senator if he sees any real difference between the publication of the tax returns in the case of litigation and where there is no litigation? In other words, where there is litigation you will find that every metropolitan paper gives in great detail the evidence in the litigation.

Mr. BLACK. That is correct.

Mr. COUZENS. What is the difference between a case of that kind and the case of the ordinary taxpayer?

Mr. BLACK. There is this difference, in my judgment: When the tax returns were made public in Alabama, I did not hear a single citizen of that State—not a citizen, and I traveled around a good deal—express to me that he thought it was proper to publish these tax returns in the papers. On the contrary, there were hundreds and hundreds of criticisms made to me about publishing these tax returns in the papers; and they were not made by the big-tax payers. Strange to say, most of the objections which were made to me were made by the smaller-tax payers, who felt that it was not right to put their names on the front page of the paper to advertise the smallness of the income tax which they paid.

Personally, it is my judgment—it may be entirely wrong, of course—that there is no added income to amount to anything which goes into the Government's Treasury by reason of the publication of income-tax reports. Lest I be misunderstand, I want to say that I would vote for an amendment or a law which would open up every tax record as a public record to any citizen of this Nation if it carries with it a restriction, which in my judgment is honest and right and fair, that it shall not be published as a long list merely to satisfy curiosity.

I shall only take about one or two more minutes, Mr. President, to make this position clear.

If we decline to recede from the amendment, it will afford a chance to have some kind of added privilege given, certainly to those who by all means should have it, by a compromise conference report. We know that if there is no effort to reach an agreement by sending the bill back to conference, there is no chance to extend it a particle.

I do not want to delay the revenue bill. I think it ought to pass. If that can not be done, we can get it back, and it may be disposed of with great rapidity. But in order to extend the right to view the tax records to those who by all means, according to all reasonable logic and argument, ought to have the right to that view, although, as I stated, for the reasons given I am not in favor of the amendment offered by the Senator from Nebraska in its entirety, I sincerely trust that the Senate will not recede from that amendment in the present conference report, but will wait, so that, if possible, we may reach some kind of a reasonable compromise which will meet certain injustices with reference to publication at the present time.

Mr. BRUCE. Mr. President, the first client I ever had in my life was an old colored woman. The amount involved in the controversy was about $15. I was a young fellow, and my opponent was quite an elderly man, though I did not regard him then, and certainly would not now regard him, as a very formidable opponent for anyone.

I lost the case; and a friend of my client, another colored woman, was overheard talking to my client about the result of the case; and she was heard to say: "Well, didn't I tole you so, honey? Didn't I tole you so? Sperience is the thing, honey—sperience is the thing!"

In connection with this matter of income-tax publicity we have had the fullest measure of instructive experience. When publicity was first proposed in the Senate in 1924 I voted in favor of it. I did that deliberately, though I did it with the gravest misgivings. I did it because I believed that the public mind would never be at rest until the virtue of tax publicity had been actually tested by administrative experience.

It was tested. After the law had been in operation I addressed to the Secretary of the Treasury a communication asking him whether he would not obtain reports from the internal-revenue collectors of the country as to how publicity had worked in point of practice, and he wrote me that he would do so, and he did do so; and all that one has to do to satisfy himself as to the side on which the merits of the pending proposition lie is to read those reports, if I have been correctly informed as to their contents.

As I recollect, the only one of the collectors who declared that he could refer any increase in his income-tax collections to tax publicity was an internal-revenue collector who said he thought that he could attribute an increase of $180 to its operation.

Why should the matter be argued any longer, after such a convincing course of experience? It shows that this thing of attempting to swell the income-tax collections of the country through the agency of such publicity is like the process of shearing a hog—all cry and no wool.

Publicly proved sterile of revenue, barren of any public benefit, but fertile in the highest degree of vexation, of annoyance, of prurient curiosity, of invidious business rivalry, of business injustice. It had about the same effect that a sensational social scandal has in stimulating the morbid impulses of human curiosity. It enabled inquisitive persons to avail themselves of the opportunity that it created to obtain information relating to the pecuniary incomes of their friends or acquaintances.

There is not a man in the United States who had any income worth publishing who did not, a short time after tax publicity went into effect, have a whole raft of insurance solicitors, bond solicitors, realtors, and other members of the eager tribe of solicitation come down on his head; and, worst of all, as I have intimated, it afforded a man in business the opportunity to gather information with reference to the prosperity or adversity of his business rivals that he could turn to his own purely selfish advantage. The truth is that, after all, there is nothing like the amount of cheating and fraud in connection with the workings of the income tax law that some suspicious individuals are prone to suppose.

I have had income-tax agent of the Government after income-tax agent to tell me that the cases in which the citizen overstates his taxable income far, far exceed the cases in which he understates it.

Speaking from the experience of all the internal-revenue collectors throughout the country, that splendid public official, Mr. Blair, confirmed this view only a few days ago in a conversation that I happened to have with him.

From no point of view, therefore, it seems to me, is there any reason to think that tax publicity is likely to be fruitful of any public benefit. We have all heard of such a thing as "pitiless publicity." I call this form of publicity pitiable publicity—publicity utterly ineffective for any good purpose and effective only to irritate and harrass and to work injustice to the citizen in one insidious form or another.

As I said, I voted for tax publicity in the first instance, not only for the reason that I have already given but because with us politicians publicity is a word of no little moment. We are afraid of it. We are not disposed to take any chances with it. Nothing is more likely than opposition to reasonable publicity to destroy the standing of a public man. But now we have an ample fund of administrative experience to draw upon, and the consequence is that when at the last session of Congress the proposition came along to repeal the publicity tax provisions of 1924, I voted for it with other Members of the Senate and publicity was repealed. I am glad that I voted as I did, and I have never had any reason to believe that I made a mistake in doing so.

Mr. COUZENS. Mr. President, will the Senator yield?

Mr. BRUCE. I yield.

Mr. COUZENS. Does not the Senator see any difference between the act of 1924 and the Norris amendment?

Mr. BRUCE. I do not see any substantial difference, and I had a conversation only a few moments ago with the Senator from Mississippi [Mr. HARRISON], one of the conferees, and he believes that there is no essential difference.

Mr. COUZENS. That just shows that the Senator does not understand it, because there is as much difference as there is between daylight and darkness; but anyone who does not want to go into the matter will not see the difference.

Mr. BRUCE. That is the way the Senator looks at it, but it is by no means the way that the ordinary man looks at it.

Mr. COUZENS. It is a matter of fact. There are two statutes, and they are nowhere near alike.

Mr. BRUCE. I am opposed to it in any form in which it presents itself.

Mr. COUZENS. No one can have any objection to the Senator taking that position if he wants to.

Mr. BRUCE. There is never any real difficulty in getting at the returns of income tax.

Mr. COUZENS. That is not a correct statement, because every experience has indicated to the contrary. You can not get at these changes without getting the consent of a committee of Congress, or going through a lot of red tape, or getting the consent of the President to get the returns, and that does not help the general public.

Mr. BRUCE. Consent can always be obtained, and I think that there is nothing in the idea that the only restriction on publicity should be that against newspaper publication of income. That restriction might have some value if access to income-tax returns were sought only by mere busybodies and gossips; but when a man desired to find out what the income of his business competitor was, he would hardly shrink from going down to the collector's office in his district and ascertaining the facts.

Mr. COUZENS. Does the Senator think a man could not get the facts about his competitor?

Mr. BRUCE. He can get them to a certain extent, of course, by inquisitive methods of one sort or another.

Mr. COUZENS. Certainly.

Mr. BRUCE. But only approximately, as a rule.

Mr. COUZENS. Oh, no.

Mr. BRUCE. Not with the certainty that is afforded by an income-tax return.

Mr. COUZENS. If the income-tax returns are no more accurate, perhaps, than some of the statements that are filed with Dun and Bradstreets, that may be so, but some of the corporations are honest, and some are dishonest. Some file correct statements with the credit agencies, and some correct statements with the Bureau of Internal Revenue, and others not, but I want to say, as a business man with long experience, that I can find out the details of any business in America.

Mr. BRUCE. The Senator is a good sleuth hound; we all know that. In some instances, it should be remember, income-tax returns are absolutely misleading in effect. I recall the fact that immediately after the tax publicity provision of 1924

went into effect the city of Baltimore was astonished at a certain gentleman, one of the wealthiest and best of our Baltimore citizens, making a very small tax return; but it turned out, when investigation was had into the circumstances, that he had suffered an enormous loss, though he was so wealthy that the loss, after all, did not make any lasting difference to him. Consequently, he had no income to return, and the result of the exposure of his income was to bring his loss to the public attention.

Mr. COUZENS. Under the Norris amendment that would not happen, because it would not be given to the papers as it was under the 1926 act.

Mr. BRUCE. That would not make any difference, in my humble judgment. As I have said, some gossips up on Nineteenth or Eighteenth Street in Washington, for instance, might not take the trouble to go to the collector's office to find out just what the income of some social friend or acquaintance of his was, but do you think that the mere absence of newspaper publication would keep some fellow who really wanted, for selfish purposes, to know what the income of his business rival was, from going to the collector's office to gratify his desire?

Mr. COUZENS. He may do that, but it would not be published in the press, the same as the case to which the Senator just referred.

Mr. BRUCE. The injury that results immediately from newspaper publication is comparatively a trivial thing. It may result in nothing but the mere gratification of ordinary human curiosity.

Mr. COUZENS. That was the thing the Senator said chagrined his friend in Baltimore, that he paid such a small tax, and that was the part that was humiliating.

Mr. BRUCE. Yes; that helped to rub it in; that helped to aggravate it.

Mr. COUZENS. But if they had seen the return instead of just having seen the published amount, if they had gone down and looked at the record, they would have found that the reason he paid a small return was because he had the big losses.

Mr. BRUCE. But I imagine that it would have been bruited about that there was a very small tax return, and that people interested from a business point of view in the material welfare of this gentleman would have gone down to the collector's office all the same.

Mr. COUZENS. Does the Senator think the whole Nation would be such snoopers that they would go out and investigate everybody's tax returns?

Mr. BRUCE. I do not think this is a Nation of snoopers except so far as prohibition has made it so; but, at the same time, we know that there is nothing more deeply implanted in human nature than the instinct of curiosity. We all know how curious even the best of us is to know a little bit about what our friends or acquaintances are doing, or what good has come to them, or what harm has befallen them. So, as I said, when tax publicity came up the last time I voted against it, and now, naturally enough, I trust sincerely that the pending motion will prevail and that the Senate will recede from the publicity feature of the pending tax measure.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Utah.

Mr. HARRISON. Let us have the yeas and nays.

The yeas and nays were ordered.

Mr. HOWELL. Mr. President, the Treasury Department is not only the cashier of the Government, but also keeps books of account therefor, so far as income taxes are concerned. If the Treasury Department expends the smallest amount of money, under an ordinary appropriation, the expenditure has to be audited by the Comptroller General. But the Treasury Department has made refunds and repayments on account of income taxes that, up to the present time, amount to probably a billion dollars, and there is no independent audit whatever by the Comptroller General or anyone else. True, the accounts go to the Comptroller General, but the duty he has to perform is merely to determine the proper persons to whom that money should be paid. He has no authority whatever to audit these expenditures but he does audit other expenditures, not only of the Treasury but every other department of the Government.

What is the consequence? Billions of dollars have been repaid or credited by the Treasury upon the Government's books in secrecy—without review—by the auditing department of the Government. It will be recalled that a few moments ago, when the able Senator from Michigan [Mr. COUZENS] was discussing the publicity amendment, he thought that if such an amendment were adopted it might obviate the necessity of a separate audit for these repayments and credits. But he acknowledges that if the publicity amendment is defeated, by all means there should be an independent audit by the Comptroller General.

To meet the situation, I offered an amendment to the tax bill, which was accepted by the Senator from Utah [Mr. SMOOT] on last Saturday evening, but I understand that whereas that amendment was accepted, it has not been agreed to by the conferees. As a consequence, it is out of the bill; and now it is proposed to put out the publicity amendment also and thus continue to maintain secrecy respecting credits and refunds on account of income taxes by the United States Treasury.

Mr. President, this is an intolerable practice. No private institution would consent to such a conduct of its affairs under any circumstances. Why? It leads to favoritism, fraud, and consequent scandal. But the conferees now come back to the Senate and tell us that the provision for auditing has been eliminated, and under the rules we know that there is no way to restore the provision for audit, and yet they ask that the amendment providing for publicity be stricken out also, which in effect will perpetuate in the Treasury Department the secret repayment and crediting of huge sums of money, without any proper accounting. Inasmuch as we can not restore the amendment for the independent audit of these accounts, certainly, as suggested by the Senator from Michigan, we ought to insist upon the publicity amendment which was offered by my colleague, the senior Senator from Nebraska [Mr. NORRIS] on last Saturday evening, and adopted by a record vote.

This is not a trifling matter. It involves billions of dollars, and the perpetuation of conditions which ought not to be tolerated for another year. Therefore, in my opinion, upon this ground alone, we should hold to this publicity amendment proposed by my colleague—that is, hold to it in this way: Vote down the proposal that the Senate recede therefrom.

Mr. DILL. Mr. President, I make the point of no quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Edwards	Locher	Shipstead
Barkley	Fess	McKellar	Shortridge
Bayard	Fletcher	McLean	Simmons
Bingham	George	McMaster	Smith
Black	Gerry	Metcalf	Smoot
Blaine	Gillett	Moses	Steck
Borah	Glass	Neely	Steiwer
Bratton	Greene	Norris	Stephens
Brookhart	Hale	Oddie	Swanson
Bruce	Harris	Overman	Thomas
Capper	Harrison	Phipps	Tydings
Caraway	Hawes	Pine	Tyson
Copeland	Hayden	Pittman	Vandenberg
Couzens	Heflin	Reed, Mo.	Wagner
Curtis	Howell	Reed, Pa.	Walsh, Mass.
Cutting	Johnson	Robinson, Ark.	Walsh, Mont.
Dale	Kendrick	Robinson, Ind.	Warren
Deneen	Keyes	Sackett	Waterman
Dill	King	Schall	Watson
Edge	La Follette	Sheppard	Wheeler

The VICE PRESIDENT. Eighty Senators having answered to their names, a quorum is present. The clerk will call the roll.

Mr. BRATTON. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. BRATTON. What is the pending question on which we are about to vote?

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Utah [Mr. SMOOT] that the Senate recede from its amendment No. 54, the publicity amendment to the tax reduction bill.

The Chief Clerk proceeded to call the roll.

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES]. I am informed that I can transfer that pair to the senior Senator from South Carolina [Mr. BLEASE], which I do, and vote "yea."

Mr. WHEELER (when his name was called). I have a general pair with the Senator from Idaho [Mr. GOODING]. I understand if he were present he would vote "yea." I transfer that pair to the Senator from South Dakota [Mr. NORBECK], and vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Oregon [Mr. MCNARY] with the Senator from Florida [Mr. TRAMMELL].

The Senator from Delaware [Mr. DU PONT] with the Senator from North Dakota [Mr. FRAZIER];

The Senator from West Virginia [Mr. GOFF] with the Senator from Texas [Mr. MAYFIELD]; and

The Senator from North Dakota [Mr. NYE] with the Senator from Louisiana [Mr. BROUSSARD].

Mr. GERRY. I wish to announce that the Senator from Louisiana [Mr. RANSDELL] has a general pair with the Senator from Maine [Mr. GOULD].

The result was announced—yeas 57, nays 23, as follows:

YEAS—57

Ashurst	Gerry	Oddie	Steck
Barkley	Gillett	Overman	Stelwer
Bayard	Glass	Phipps	Stephens
Bingham	Greene	Pine	Swanson
Bruce	Hale	Pittman	Tydings
Caraway	Harrison	Reed, Mo.	Tyson
Copeland	Hawes	Reed, Pa.	Vandenberg
Curtis	Hayden	Robinson, Ark.	Wagner
Dale	Kendrick	Robinson, Ind.	Walsh, Mass.
Deneen	Keyes	Sackett	Warren
Edge	Locher	Schall	Waterman
Edwards	McKellar	Shortridge	Watson
Fess	McLean	Simmons	
Fletcher	Metcalf	Smith	
George	Moses	Smoot	

NAYS—23

Black	Couzens	Johnson	Sheppard
Blaine	Cutting	King	Shipstead
Borah	Dill	La Follette	Thomas
Bratton	Harris	McMaster	Walsh, Mont.
Brookhart	Heflin	Neely	Wheeler
Capper	Howell	Norris	

NOT VOTING—14

Blease	Goff	McNary	Ransdell
Broussard	Gooding	Mayfield	Trammell
du Pont	Gould	Norbeck	
Frazier	Jones	Nye	

So Mr. SMOOT's motion was agreed to.

TAX REDUCTION—CONFERENCE REPORT

Mr. SMOOT. I now present the conference report on the tax reduction bill, being House bill 1, and ask unanimous consent for its immediate consideration.

The VICE PRESIDENT laid before the Senate the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes; and there being no objection, the Senate proceeded to its consideration.

The conference report is as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 1) to reduce anl equalize taxation, provide revenue, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 8, 13, 21, 24, 25, 26, 27, 28, 36, 54, 81, 82, 88, 139, 149, 175, 176, 191, 192, 194, 195, 196, 197, 198, 199, and 200.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 5, 6, 7, 11, 12, 14, 16, 17, 18, 19, 20, 22, 23, 29, 30, 31, 32, 34, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 55, 56, 57, 58, 59, 60, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 76, 77, 78, 79, 80, 83, 84, 85, 86, 87, 89, 90, 92, 93, 94, 95, 96, 97, 98, 100, 101, 103, 104, 105, 106, 107, 108, 109, 110, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 131, 132, 133, 134, 135, 136, 137, 138, 140, 141, 142, 143, 144, 145, 146, 147, 148, 153, 154, 155, 156, 158, 159, 160, 161, 162, 163, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 177, 178, 179, 180, 181, 182, 183, 184, 185, 188, 189, 193, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 221, and agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 404. Credit of gift tax and a period"; and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment as follows: Omit the matter proposed to be inserted and restore the matter proposed to be stricken out by the Senate amendment, and on page 6 of the House bill strike out the sixth line under the heading "Title IV—Administrative Provisions," and in lieu thereof insert the following:

"SEC. 605. Retroactive regulations and a period"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 702. Basis of property upon sale by estate—retroactive.

"SEC. 703. Deduction of estate and inheritance taxes—retroactive.

"SEC. 704. Taxability of trusts as corporations—retroactive.

"SEC. 705. Installment sales—retroactive.

"SEC. 706. Contributions to charity—retroactive.

"SEC. 707. Income tax on sale of vessels built before 1914.

"SEC. 708. Definition of the term 'motor boat.'

"SEC. 709. Remission or mitigation of forfeitures.

"SEC. 710. Refunds and credits to be referred to joint committee.

"SEC. 711. Commissioners of Court of Claims.

"SEC. 712. Bureau of Internal Revenue—details to Washington.

"SEC. 713. Salaries of collectors of internal revenue.

"SEC. 715. Separability clause.

"SEC. 716. Effective date of act."

And a period.

And the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "12 per cent"; and the Senate agree to the same.

Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment as follows: Omit the matter proposed to be inserted by the Senate amendment and on page 224 of the House bill, after line 8, and after the section inserted by Senate amendment 215, insert the following:

"SEC. 706. CONTRIBUTIONS TO CHARITY—RETROACTIVE.

"In computing the net income of any individual, other than a nonresident alien, for the taxable year 1923, there shall be allowed as a deduction (subject to the percentage limitation prescribed by section 214(a)(11) of the revenue act of 1921) any contributions or gifts to or for the use of a trust organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes, if such individual made during the taxable year 1924 contributions or gifts to the same trust and in the aggregate of substantially the same amount. In no case shall there be allowed as a deduction under this section contributions or gifts to an amount in excess of $50,000. Any tax paid in respect of such deduction shall, subject to the statutory period of limitation applicable thereto, be credited or refunded."

And the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"(q) Pension trusts.—An employer establishing or maintaining a pension trust to provide for the payment of reasonable pensions to his employees (if such trust is exempt from tax under section 165, relating to trusts created for the exclusive benefits of employees) shall be allowed as a deduction (in addition to the contributions to such trust during the taxable year to cover the pension liability accruing during the year, allowed as a deduction under subsection (a) of this section) a reasonable amount transferred or paid into such trust during the taxable year in excess of such contributions, but only if such amount (1) has not theretofore been allowable as a deduction, and (2) is apportioned in equal parts over a period of 10 consecutive years beginning with the year in which the transfer or payment is made."

And the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: On page 12 of the Senate engrossed amendments, line 8, strike out the period and insert a semicolon; and the Senate agree to the same.

Amendment numbered 75: That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment as follows: On page 14 of the Senate engrossed amendments, at the end of line 14, insert a period and the following:

"In the case of property transferred in trust to pay the income for life to or upon the order or direction of the grantor, with the right reserved to the grantor at all times prior to his death to revoke the trust, the basis of such property in the hands of the persons entitled under the terms of the trust instrument to the property after the grantor's death shall, after such death, be the same as if the trust instrument had been a will executed on the day of the grantor's death."

And the Senate agree to the same.

Amendment numbered 91: That the House recede from its disagreement to the amendment of the Senate numbered 91,

and agree to the same with an amendment as follows: On page 20 of the Senate engrossed amendments, line 17, strike out all after "group" and insert in lieu thereof a period and the following: "An insurance company subject to the tax imposed by section 201 or 204 shall not be included in the same consolidated return with a corporation subject to the tax imposed by section 13" and a period; and the Senate agree to the same.

Amendment numbered 99: That the House recede from its disagreement to the amendment of the Senate numbered 99, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "12 per centum"; and the Senate agree to the same.

Amendment numbered 102: That the House recede from its disagreement to the amendment of the Senate numbered 102, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "12 per centum"; and the Senate agree to the same.

Amendment numbered 111: That the House recede from its disagreement to the amendment of the Senate numbered 111, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "12 per centum"; and the Senate agree to the same.

Amendment numbered 112: That the House recede from its disagreement to the amendment of the Senate numbered 112, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "12 per centum"; and the Senate agree to the same.

Amendment numbered 113: That the House recede from its disagreement to the amendment of the Senate numbered 113, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "12 per centum"; and the Senate agree to the same.

Amendment numbered 114: That the House recede from its disagreement to the amendment of the Senate numbered 114, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "12 per centum"; and the Senate agree to the same.

Amendment numbered 130: That the House recede from its disagreement to the amendment of the Senate numbered 130, and agree to the same with an amendment as follows: On page 166 of the House bill, line 4, strike out "three" and insert "two"; and on page 178 of the House bill, line 20, strike out "three" and insert "two"; and on page 178 of the House bill, line 25, strike out "three" and insert "two"; and on page 179 of the House bill, line 2, strike out "three" and insert "two"; and on page 180 of the House bill, line 10, strike out "three" and insert "two"; and the Senate agree to the same.

Amendment numbered 150: That the House recede from its disagreement to the amendment of the Senate numbered 150, and agree to the same with an amendment, as follows: Omit the matter proposed to be inserted by the Senate amendment, and on page 186 of the House bill, line 13, strike out "or" and insert a comma and the following: "credit, or abatement"; and the Senate agree to the same.

Amendment numbered 151: That the House recede from its disagreement to the amendment of the Senate numbered 151, and agree to the same with an amendment, as follows: Omit the matter proposed to be inserted by the Senate amendment and on page 186 of the House bill, line 16, strike out "or" and insert a comma and the following: "credit, or abatement"; and the Senate agree to the same.

Amendment numbered 152: That the House recede from its disagreement to the amendment of the Senate numbered 152, and agree to the same with an amendment as follows: Omit the matter proposed to be inserted by the Senate amendment and on page 186 of the House bill, line 18, strike out "or" and insert a comma and the following: "credit, or abatement"; and the Senate agree to the same.

Amendment numbered 157: That the House recede from its disagreement to the amendment of the Senate numbered 157, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"(a) No refund shall be made of any amount paid by or collected from any manufacturer, producer, or importer in respect of the tax imposed by subdivision (3) of section 600 of the revenue act of 1924, or subdivision (3) of section 900 of the revenue act of 1921 or of the revenue act of 1918, unless either—

"(1) Pursuant to a judgment of a court in an action duly begun prior to April 30, 1928; or

"(2) It is established to the satisfaction of the commissioner that such amount was in excess of the amount properly payable upon the sale or lease of an article subject to tax, or that such amount was not collected, directly or indirectly, from the purchaser or lessee, or that such amount, although collected from the purchaser or lessee, was returned to him; or

"(3) The commissioner certifies to the proper disbursing officer that such manufacturer, producer, or importer has filed with the commissioner, under regulations prescribed by the commissioner with the approval of the Secretary, a bond in such sum and with such sureties as the commissioner deems necessary, conditioned upon the immediate repayment to the United States of such portion of the amount refunded as is not distributed by such manufacturer, producer, or importer, within six months after the date of the payment of the refund, to the persons who purchased for purposes of consumption (whether from such manufacturer, producer, importer, or from any other person) the articles in respect of which the refund is made, as evidenced by the affidavits (in such form and containing such statements as the commissioner may prescribe) of such purchases, and that such bond, in the case of a claim allowed after February 28, 1927, was filed before the allowance of the claim by the commissioner.

"(b) The second proviso under the heading 'Internal revenue' in section 1 of the first deficiency act, fiscal year 1928, and the second proviso of the fourth paragraph under the heading 'Internal Revenue Service' in section 1 of the Treasury and Post Office appropriation act for the fiscal year 1929, are repealed" and a period.

And the Senate agree to the same.

Amendment numbered 164: That the House recede from its disagreement to the amendment of the Senate numbered 164, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 442. TAX ON STEAMSHIP TICKETS.

"(a) Subdivision 5 of Schedule A of Title VIII of the revenue act of 1926 is amended to read as follows:

"'5. Passage ticket, one way or round trip, for each passenger, sold or issued in the United States for passage by any vessel to a port or place not in the United States, Canada, Mexico, or Cuba, if costing not exceeding $30, $1; costing more than $30 and not exceeding $60, $3; costing more than $60, $5. This subdivision shall not apply to passage tickets costing $10 or less.'

"(b) Subsection (a) of this section shall take effect on the expiration of 30 days after the enactment of this act."

And the Senate agree to the same.

Amendment numbered 186: That the House recede from its disagreement to the amendment of the Senate numbered 186, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "or the Undersecretary" and a comma; and the Senate agree to the same.

Amendment numbered 187: That the House recede from its disagreement to the amendment of the Senate numbered 187, and agree to the same with an amendment as follows: On page 37 of the Senate engrossed amendments, lines 7 and 8, strike out "extinguishment of liability by bar of statute of limitations" and insert "effect of expiration of period of limitation"; and the Senate agree to the same.

Amendment numbered 190: That the House recede from its disagreement to the amendment of the Senate numbered 190, and agree to the same with an amendment as follows: In lieu of the matter proposed to be stricken out by the Senate amendment insert the following:

"SEC. 611. COLLECTIONS STAYED BY CLAIM IN ABATEMENT.

"If any internal-revenue tax (or any interest, penalty, additional amount, or addition to such tax) was, within the period of limitation properly applicable thereto, assessed prior to June 2, 1924, and if a claim in abatement was filed, with or without bond, and if the collection of any part thereof was stayed, then the payment of such part (made before or within one year after the enactment of this act) shall not be considered as an overpayment under the provisions of section 607, relating to payments made after the expiration of the period of limitation on assessment and collection."

And the Senate agree to the same.

Amendment numbered 214: That the House recede from its disagreement to the amendment of the Senate numbered 214, and agree to the same with an amendment as follows: On page 41 of the Senate engrossed amendments, line 21, after "taxable," insert "(whether distributed or not)"; and the Senate agree to the same.

Amendment numbered 215: That the House recede from its disagreement to the amendment of the Senate numbered 215, and agree to the same with an amendment as follows: On page 42 of the Senate engrossed amendments, line 11, strike out

"a return or an amended," and insert "an original"; and the Senate agree to the same.

Amendment numbered 216: That the House recede from its disagreement to the amendment of the Senate numbered 216, and agree to the same with an amendment as follows: On page 44 of the Senate engrossed amendments, line 4, after the period, insert "The basis of any such new ship shall be reduced by the amount of the gain from such sale exempt from taxation under this paragraph" and a period; and the Senate agree to the same.

Amendment numbered 217: That the House recede from its disagreement to the amendment of the Senate numbered 217, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 708. DEFINITION OF THE TERM 'MOTOR BOAT.'

"The term 'motor boat,' when used in the act of September 21, 1922, includes a yacht or pleasure boat, regardless of length or tonnage, whether sail, steam, or motor propelled, owned by a resident of the United States or brought into the United States for sale or charter to a resident thereof, whether or not such yacht or boat is brought into the United States under its own power, but does not include a yacht or boat used or intended to be used in trade or commerce, nor a yacht or boat built or for the building of which a contract was entered into prior to December 1, 1927."

And the Senate agree to the same.

Amendment numbered 218: That the House recede from its disagreement to the amendment of the Senate numbered 218, and agree to the same with an amendment as follows: On page 44 of the Senate engrossed amendments, line 17, strike out "penalties" and insert "forfeitures"; and the Senate agree to the same.

Amendment numbered 219: That the House recede from its disagreement to the amendment of the Senate numbered 219, and agree to the same with an amendment as follows: On page 45 of the Senate engrossed amendments, line 2, strike out "709" and insert "710"; and the Senate agree to the same.

Amendment numbered 220: That the House recede from its disagreement to the amendment of the Senate numbered 220, and agree to the same with an amendment as follows: On page 45 of the Senate engrossed amendments, line 18, strike out "710" and insert "711"; and the Senate agree to the same.

Amendment numbered 222: That the House recede from its disagreement to the amendment of the Senate numbered 222, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "712"; and the Senate agree to the same.

Amendment numbered 223: That the House recede from its disagreement to the amendment of the Senate numbered 223, and agree to the same with an amendment as follows: On page 46 of the Senate engrossed amendments, line 6, strike out "712" and insert "713"; and the Senate agree to the same.

Amendment numbered 224: That the House recede from its disagreement to the amendment of the Senate numbered 224, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "714"; and the Senate agree to the same.

Amendment numbered 225: That the House recede from its disagreement to the amendment of the Senate numbered 225, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "715"; and the Senate agree to the same.

Amendment numbered 226: That the House recede from its disagreement to the amendment of the Senate numbered 226, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "716"; and the Senate agree to the same.

REED SMOOT,
GEO. P. MCLEAN,
DAVID A. REED,
PETER G. GERRY,
PAT HARRISON,
Managers on the part of the Senate.

W. C. HAWLEY,
ALLEN T. TREADWAY,
ISAAC BACHARACH,
JNO. N. GARNER,
J. W. COLLIER,
Managers on the part of the House.

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. COPELAND. Mr. President, I should like to ask the Senator from Utah some questions about several amendments that were adopted by the Senate. First, I make inquiry with regard to the amendment regarding life insurance companies.

Mr. SMOOT. I assume the Senator has reference to the amendment offered by the Senator from Pennsylvania [Mr. REED].

Mr. REED of Pennsylvania. Mr. President, there was nothing in conference as to life insurance companies. There was no effort made by the conferees to change the bill as it passed the Senate.

The amendment as to fire insurance companies, which was adopted by the Senate, was retained by the conferees.

Mr. SIMMONS. Mr. President, as a matter of fact, the present law with reference to insurance companies, both fire and life, is retained, is it not?

Mr. REED of Pennsylvania. No. Stock companies doing a fire-insurance business are taxed the same as mutual companies on their capital gains.

Mr. SIMMONS. I did not refer to that kind of insurance companies.

Mr. SMOOT. The life insurance companies are left exactly in the same position as under the present law.

Mr. SIMMONS. Exactly the same.

Mr. COPELAND. The Senator from Pennsylvania will recall the little discussion we had and the letters which I presented from Mr. Fiske and others. Was there no change made?

Mr. REED of Pennsylvania. No; there was no change made in the action of the Senate as to insurance companies.

Mr. COPELAND. May I ask about the amendment relating to international bridges?

Mr. SMOOT. I will say to the Senator that the amendment as to international bridges was disagreed to.

Mr. COPELAND. Did the conferees make every effort to retain it?

Mr. SMOOT. We did all we could, but the House conferees would not agree to it.

Mr. COPELAND. Was the matter presented in such a way that it was understood by the House conferees?

Mr. SMOOT. I did everything I could, but I may just as well say that a question came up as to international bridges into Mexico. The House conferees thought that if the amendment were adopted it would apply there, and they did not want it adopted, and if the Senator knew the details I do not know that he would want it in the bill.

Mr. COPELAND. I was not interested in any bridge except the Peace Bridge at Buffalo. It appears to have gotten mixed up with these other bridges and gone downstream.

Mr. SMOOT. The Senate conferees had to yield.

Mr. COPELAND. What about the public-utility amendment offered by the Senator from Michigan [Mr. VANDENBERG]?

Mr. SMOOT. That was disagreed to.

Mr. COPELAND. Does the Senator mean to say that the employees of water and other utility companies will be taxed?

Mr. SMOOT. They will be taxed the same as they are taxed to-day.

Mr. COPELAND. Was there much discussion of that particular amendment?

Mr. SMOOT. Yes; that question was before the Senate when the 1926 act was considered, and also the 1924 act, but the House conferees took the same position on this occasion that they took heretofore.

Mr. COPELAND. Was every effort made to retain that amendment?

Mr. REED of Pennsylvania. Yes. The House conferees stood very firm against every amendment that would tend to make exceptions or grant additional deductions, taking the position that such provisions were in principle unsound. We did our best to retain the Senate amendment to which the Senator refers, but we could not do it.

Mr. COPELAND. May I ask what happened to the amendment, put on by the tremendous vote of 59 to 13 in the Senate, relating to traveling expenses of professional men?

Mr. SMOOT. That was disagreed to.

Mr. COPELAND. May I ask what happened to the ticket-broker's amendment?

Mr. SMOOT. That was agreed to, I will say to the Senator.

Mr. COPELAND. What about the amendment in regard to club dues?

Mr. SMOOT. That was agreed to as the Senate amended it.

Mr. COPELAND. I judge from what the Senator has said that the House dictated the bill?

Mr. SMOOT. No. If the Senator from New York will notice the conference report, he will find that there were very few Senate amendments which were disagreed to, and a long list of Senate amendments which were agreed to. I do not know that I ever sat on a conference committee in my life where a

greater percentage of Senate amendments was agreed to than in the conference on the tax reduction bill.

Mr. COPELAND. Does the Senator find any embarrassment as a conferee in dealing with amendments which we adopt in the Senate but which he opposes here?

Mr. SMOOT. I have no embarrassment at all, because I do the bidding of the Senate and stand for the action of the Senate just as long as I can.

Mr. COPELAND. I think that the Senator has failed miserably in several particulars to do the bidding of the Senate in connection with this bill.

Mr. SMOOT. If the Senator from Utah failed, so did all four of the other Senate conferees, and I doubt whether we could have got any better report than the one which was finally prepared.

Mr. COPELAND. It seems very strange to me, if the Senator will permit me to say so, that, for instance, as to the amendment relating to the traveling expenses of professional men, when it passed by such an overwhelming vote in the Senate, the conferees on the part of the Senate were unable to make any impression upon the House conferees.

Mr. SMOOT. The House conferees did not propose to make any further exemptions in the existing law if they could prevent it and they insisted upon the House provision.

Mr. COPELAND. I am very much disappointed, I am frank to say, Mr. President.

Mr. HARRISON. Mr. President, may I say to the Senator from New York that every effort was made in behalf of the amendments to which he has referred, especially the last one, and the best part of the argument that I employed was quotations from the Senator's speech on the floor of the Senate.

Mr. COPELAND. Of course, I am much flattered by that, but apparently the speech I made, while a good argument in the Senate, did not go very far with the House conferees.

Mr. President, I am very sorry, indeed, that the amendments to which I have referred were not agreed to.

Mr. ROBINSON of Arkansas. Mr. President, I understand the conference report represents a complete and final agreement?

Mr. SMOOT. It is a complete report.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

PETITIONS AND MEMORIALS

Mr. BINGHAM presented a communication in the nature of a memorial from Star of Good Will Lodge, No. 9, Order of Shepherds of Bethlehem, of New Britain, Conn., remonstrating against the passage of the bill (S. 1752) to regulate the manufacture and sale of stamped envelopes, which was referred to the Committee on Post Offices and Post Roads.

He also presented a communication from the board of directors of the New Haven (Conn.) Council of Churches, favoring the passage of legislation to permit the admission within the immigration quota of certain relatives of declarants, which was referred to the Committee on Immigration.

He also presented papers in the nature of petitions from the Meriden League of Republican Women, members of the Woman's Foreign Missionary Society of the New Haven District of the New York East Conference of the Methodist Episcopal Church, and sundry citizens of the State of Connecticut, praying for the adoption of Senate Resolution 139, suggesting a further exchange of views relative to the World Court, which were referred to the Committee on Foreign Relations.

ALL-AMERICAN WATERWAY

Mr. WALSH of Massachusetts. Mr. President, I have a communication from representatives of various commercial and industrial organizations of Massachusetts with respect to the attitude of those organizations expressing opposition to the substitution for the St. Lawrence River route providing a waterway from the Great Lakes to the Atlantic Ocean recommended by the two international commissions, an all-American waterway across the State of New York.

I request that the letter from the representatives of these influential organizations be treated as in the nature of a petition, referred to the Committee on Commerce, and printed in the RECORD.

Mr. COPELAND. Of course, I have no objection to the admission of the letter, but I hope the Senator from Massachusetts will ultimately favor the New York route.

There being no objection, the communication was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

BOSTON, MAY 22, 1928.

Hon. DAVID I. WALSH,

United States Senate, Washington, D. C.

DEAR SENATOR WALSH: We have been given to understand that certain New York interests are extremely active in attempting to secure support from various Members of Congress for their proposal for an all-American waterway across the State of New York in substitution for the St. Lawrence River route recommended by the two international commissions.

Whatever your opinion may be respecting the desirability of providing a waterway from the Great Lakes to the Atlantic Ocean, we trust that you will withhold your promise of support for the suggested New York route for the following reasons:

1. Such a waterway across New York State will cut all existing transportation routes from the west into New England and will place a premium upon the diversion of traffic from New England to the port of New York, where there are always available facilities for absorbing export tonnage to all ports of the world.

2. The construction of the proposed route across New York State will deprive New England coastal ports of a much more efficient and expeditious water route to the interior of the country via the St. Lawrence River. Comparing the two routes, that by way of New York would involve the passage of 20 locks instead of 9; 54 overhead bridges in place of 8; 128 miles of navigation in restricted channel compared with 25 on the St. Lawrence route, and would necessitate passage through the congested port of New York. In addition, the all-American route suggested by the New York interests would cost over four times as much to construct as would that via the St. Lawrence River.

3. The construction of the New York route would provide no hydroelectric power, whereas that via the St. Lawrence would make available immediately or in the future, 5,000,000 horsepower of electric energy, a considerable portion of which would be available for New England industries. Furthermore, it is estimated that this water power will produce electric current which would require 65,000,000 tons of coal annually to produce. Such a saving by utilizing a present waste should not be ignored.

4. The purpose behind the suggested all-American route has evidently one of three motives, or a combination of all.

First. To unload upon the Federal Government an inefficient and unprofitable state-owned barge canal.

Second. To increase the export and import business of the port of New York and the new port of Albany.

Third. To prevent any action whatever in giving the West an outlet to the sea by insisting upon an inadequate and inefficient waterway the cost of which would be prohibitive.

In view of these circumstances and the commercial isolation of New England which would inevitably follow the construction of such a waterway as that proposed, we feel that you would be acting contrary to the interests of this section of the country in case for any reason you saw fit to lend aid to the proposed measure.

While we are aware that the subject matter is not officially before the Congress, we are informed that efforts are being made to commit Members of Congress to the New York route in advance of its official consideration and we respectfully ask you to study the matter from the angles presented above before lending any encouragement to the sponsors of the movement.

Very truly yours,

ALTON D. EDES,
Representing the Massachusetts State Chamber of Commerce,
ARTHUR W. GILBERT,
Massachusetts Commissioner of Agriculture,
CHARLES R. GOW,
Representing the Associated Industries of Massachusetts,
ALLEN HUBBARD,
Representing the Affiliated Technical Societies of Boston,
BERNARD J. ROTHWELL,
Representing the Boston Chamber of Commerce,
Massachusetts Members of the Joint New England Committee on the St. Lawrence Seaway Project.
CHAS. R. GOW, *Chairman.*

SHOOTING OF JACOB D. HANSON

Mr. COPELAND presented the following resolutions, which were referred to the Committee on Commerce and ordered to be printed in the RECORD:

Resolution by Niagara Falls Lodge, No. 81, I. O. O. F.

NIAGARA FALLS LODGE, No. 81, I. O. O. F.,
NIAGARA FALLS, N. Y., *May 10, 1928.*

Whereas Jacob D. Hanson, a reputable, law-abiding, and respected citizen of the United States and for the past 25 years a member of this order, while driving his automobile on a much-traveled highway in the town of Lewiston, N. Y., on the morning of the 6th of May, was fired upon and possibly fatally wounded by members of the United States Coast Guard; and

Whereas incidents of this type are reported to be of frequent occurrence, constituting a serious menace to the lives and property of the traveling public and placing them in constant danger and are a violation of the laws and constitution of our State and Federal Government; and

Whereas the commander of the unit of said United States Coast Guard Service at Youngstown, N. Y., refuses to allow warrants duly issued by the State courts for the arrest of said assailants of said Jacob D. Hanson to be executed and is reported to have made statements to the effect that said Coast Guards were acting in accordance with orders issued to them to fire upon any automobile which refused to stop on their signal: Now, therefore, be it

Resolved, That Niagara Falls Lodge, No. 81, I. O. O. F., of Niagara Falls, N. Y., hereby indignantly protest against the reckless use of firearms against the persons and automobiles of law-abiding citizens of this community, and the unjust and unlawful stopping, annoying, and searching of law-abiding citizens traveling upon our highways without any cause or reason therefor by apparently irresponsible persons in the employ of the United States Coast Guard Service or any other governmental service, and we hereby resolve that every effort should be made to bring said members of the United States Coast Guard to answer in the courts for their unjust assault upon said Jacob D. Hanson to the full extent of the law, and that civil authorities cause an investigation to be made as to the unlawful issuing of orders by anyone in governmental capacity directing subordinates to shoot anyone who refuses to stop at their direction; that copies be sent to the Secretary of the Treasury, Senators COPELAND and WAGNER, United States Senators for the State of New York, and Congressman from this district, S. WALLACE DEMPSEY, and to the district attorney of the county of Niagara.

Dated Niagara Falls, N. Y., May 10, 1928.

EDWARD ROTH,
Acting Noble Grand.

Attested:

E. F. SANDSTRUM,
Chairman Committee.

Whereas Brother Jacob D. Hanson, secretary of Niagara Falls Lodge, No. 346, B. P. O. E., a very reputable, respectable, and law-abiding citizen of the city of Niagara Falls, N. Y., was on the morning of May 6, 1928, returning to his home in said city and was traveling in his automobile on a public highway, Lewiston Road, partially in the city of Niagara Falls, in a lawful and peaceful manner; and

Whereas while so traveling on said public highway the said Jacob D. Hanson was the victim of a terrible, unjustifiable, and murderous assault committed upon his person by members of the United States Coast Guard Service stationed at Youngstown, N. Y.; and

Whereas our Brother Jacob D. Hanson is now lying at the point of death in a hospital at the city of Niagara Falls, N. Y., with a bullet in his temple as a result of this assault; and

Whereas occurrences of this nature are wholly unauthorized, unnecessary, and unjustified; and

Whereas the commander of the United States Coast Guard Service at Youngstown, N. Y., refuses to surrender the two men guilty of this murderous assault to answer for their deeds: Now, therefore be it

Resolved, That North Tonawanda Lodge No. 860, B. P. O. E., voice its whole-hearted and indignant protest against the reckless, careless, and negligent use of firearms against the persons and property of law-abiding and peaceful citizens of the United States by members of the United States Coast Guard Service, and also the manner in which the irresponsible persons in said service are attempting to perform their duties; and be it further

Resolved, That the greatest effort be made to make the members of the United States Coast Guard Service who are responsible for this act answer for this deed; and

That copies of this resolution be mailed to the following:

Niagara Falls Lodge, No. 436, B. P. O. E.

John F. Malley, Grand Exalted Ruler, B. P. O. E.

Congressman S. WALLACE DEMPSEY.

Congressman JAMES M. MEAD.

Senator ROYAL S. COPELAND.

Senator ROBERT F. WAGNER.

Dated at the city of North Tonawanda, N. Y., this 15th day of May, 1928.

UNITED ASSOCIATION OF JOURNEYMEN PLUMBERS AND STEAM FITTERS OF THE UNITED STATES AND CANADA,
Chicago, Ill., May 16, 1928.

Hon. ROYAL S. COPELAND,
United States Senator, Washington, D. C.

DEAR SENATOR. There has been brought to the attention, through the press and otherwise, of Local Union No. 36, Journeymen Plumbers and Gas Fitters of Buffalo, N. Y., the vicious and unwarranted shooting of a well-known business man and citizen, Mr. Jacob Hanson, a resident of Niagara Falls, N. Y., by United States Coast Guard men Messrs. Jennings and Dew, apparently without any just cause or reason therefor. Our information is that Mr. Hanson enjoys the reputation of being an honest and upright citizen and one who obeys and complies with the law and does not violate the same. Particularly, we understand at the time of this unwarranted and wholly uncalled-for assault upon him, he was engaged in his own lawful, private occupation.

By reason of the above, the following resolution was unanimously passed at a regular meeting of our Local Union No. 36, held at its hall in the city of Buffalo, N. Y., on the 11th day of May, 1928; and the undersigned president and secretary, by direction of such Local Union No. 36, are sending the same to you in your official capacity, and asking that you take vigorous action concerning the same as you feel is justified and warranted:

"*Resolved*, That emphatic protest be, and hereby is, made to the necessary Federal authorities against the unwarranted and vicious assault committed by United States Coast Guard men upon Jacob Hanson, by unlawfully and illegally shooting him; and whereas, such acts were wholly unjustified and unwarranted and we believe exceeded any and all authority of the said United States Coast Guard men, we, the members of Local Union No. 36, Journeymen Plumbers and Gas Fitters of Buffalo, N. Y., do hereby respectfully request and urge our Federal representatives, and particularly our Congressmen and United States Senators, to take any and all necessary and required steps to see that full justice is meted out and that such unwarranted assault be properly and adequately punished, and that the perpetrators of same receive the full penalty of the law and shall not be permitted to escape their just punishment."

[SEAL.] ARTHUR J. WONNACOTT,
President.

Attest:

JOSEPH A. PERRY, *Secretary.*

Resolution adopted at the meeting of the executive committee of the New York State Bar Association held April 25, New York City

Resolved, That the executive committee of the New York State Bar Association is opposed to the enactment of Senate bill 3151, amending section 24 of the Judicial Code of the United States with respect to the jurisdiction of the United States courts, believing that such changes would deprive the Federal courts of the most important classes of their civil jurisdiction, and would tend toward delay and uncertainty in the administration of justice; further

Resolved, That the officers of the association and the chairman of the committee on procedure in the Federal courts are hereby authorized to take such steps as they may deem advisable with respect to communicating with local bar associations and such other action as they may deem proper to express the opposition of this association to the enactment of said bill.

Resolution of the Association of the Bar of the City of New York adopted at a meeting held on May 8, 1928, in New York City

Whereas there has been introduced in the present Congress of the United States Senate bill 3151, by which it is sought to deprive the United States district courts of the larger part of their jurisdiction in common-law and equity cases conferred upon them by paragraph 1 of section 24 of the Judicial Code (sec. 41, U. S. C.), being the most important part of the jurisdiction conferred by that section, and that most frequently exercised;

Whereas the Association of the Bar of the City of New York is of the opinion that it is the duty of the association, acting through its proper committees, to oppose the passage of this bill, S. 3151, intended to diminish the powers and to limit the jurisdiction of the Federal courts.

Rtsolved, That the executive committee of the Association of the Bar of the City of New York and the committee on Federal legislation of the bar of the city of New York be, and they hereby are, authorized in the name of the association to oppose the passage of Senate bill 3151, said bill being intended to diminish the powers and to limit the jurisdiction of the Federal courts; be it further

Resolved, That a copy of the report of the committee on Federal legislation made with respect to this bill at a stated meeting of the Association of the Bar on May 8, 1928, be printed in convenient form and sent to each Member of the United States Senate.

GREENWICH VILLAGE HISTORICAL SOCIETY (INC.),
New York.

At a regular meeting of the Greenwich Village Historical Society, May 15, 1928, at 92 Fifth Avenue, New York City, the following resolution, moved by Doctor Sauchelli and seconded by Mrs. Steindel, was carried:

"*Resolved*, That the Greenwich Village Historical Society go on record as favoring the public ownership and control of the Boulder Dam power activities; and as opposed to permitting any private interests owning or controlling them; Be it further

"*Resolved*, That a copy of these resolutions be sent to the Senate, the House of Representatives, to the Vice President, Hon. Charles G.

Dawes, and Senators Hon. ROYAL S. COPELAND, Hon. ROBERT F. WAGNER, Hon. EDWARD I. EDWARDS, and Hon. WALTER E. EDGE. Also to the newspapers, especially to the New York American."

JULIA GOLDZIER, *Secretary.*

RECORD OF SENATOR SHIPSTEAD ON FARM RELIEF

Mr. WHEELER presented a letter from George N. Peek, chairman administrative committee, North Central States Agricultural Conference, relative to the record of the senior Senator from Minnesota [Mr. SHIPSTEAD] on the subject of agricultural relief, which was ordered to be printed in the RECORD as follows:

NORTH CENTRAL STATES AGRICULTURAL CONFERENCE,
[EXECUTIVE COMMITTEE OF 22]
Washington, D. C., May 11, 1928.

Hon. HENRIK SHIPSTEAD,
United States Senate, Washington, D. C.

DEAR SENATOR SHIPSTEAD: I want to take this opportunity of expressing my appreciation of your cooperation and support in the passage of the McNary-Haugen bill in Congress.

I am sure you will agree with me that the farmers of America are now engaged in the most momentous struggle in their history, or at least since the war of 1861 to 1865.

It is the age-old struggle for economic equality. It is the kind of a struggle that makes or breaks political parties. Therefore, the question is bigger than partisan politics.

Since the great meeting of farm organizations in St. Paul in July, 1924, farmers have followed the practice of rewarding their friends in Congress by their support and of defeating their enemies by their opposition, and this regardless of partisan politics.

Your record in Congress is a clear one on behalf of agriculture and I am happy to express not only my appreciation for what you have done but the hope that you will have the unanimous support of the farmers of your State for reelection regardless of party lines. If farmers are to secure and retain their proper place in our complicated economic scheme of things they must place their economic interest above partisanship and stay by their friends.

I have written a number of letters in behalf of both Republican and Democratic Members of Congress of a similar character to this one so it can not fairly be said that in writing you in this way that my motives are partisan.

With best wishes, I am

Sincerely yours,

GEORGE N. PEEK.

REPORTS OF COMMITTEES

Mr. RANSDELL, from the Committee on Commerce, to which was referred the bill (S. 4518) to establish and operate a national institute of health, to create a system of fellowships in said institute, and to authorize the Government to accept donations for use in ascertaining the cause, prevention, and cure of disease affecting human beings, and for other purposes, reported it without amendment and submitted a report (No. 1280) thereon.

He also, from the Committee on Agriculture and Forestry, to which was referred the bill (S. 872) to standardize bales of cotton and requiring sale of cotton by the true net weight of bale, reported it with amendments and submitted a report (No. 1281) thereon.

Mr. WATSON (for Mr. MAYFIELD), from the Committee on Interstate Commerce, to which was referred the bill (S. 2309) to amend the interstate commerce act in respect of certificates of public convenience and necessity, reported it without amendment and submitted a report (No. 1282) thereon.

Mr. BROOKHART, from the Committee on Post Offices and Post Roads, to which was referred the joint resolution (S. J. Res. 144) relating to the manufacture of stamped envelopes, reported it without amendment and submitted a report (No. 1283) thereon.

Mr. DENEEN, from the Committee on the Judiciary, to which was referred the bill (H. R. 12311) to provide for the payment of compensation to William J. Tilson, reported it without amendment.

Mr. REED of Pennsylvania, from the Committee on Military Affairs, to which was referred the bill (S. 2949) to credit the accounts of Richings J. Shand, United States property and disbursing officer, Illinois National Guard, reported it without amendment and submitted a report (No. 1292) thereon.

Mr. MOSES, from the Committee on Post Offices and Post Roads, to which were referred the following bills, reported them severally without amendment:

A bill (H. R. 325) repealing existing law requiring the Postmaster General to report action taken on claims of postmasters;

A bill (H. R. 7354) to allow the Postmaster General to promote mechanics' helpers to the first grade of special mechanics;

A bill (H. R. 8728) to authorize the Postmaster General to give motor-vehicle service employees credit for actual time served on a basis of 1 year for each 306 days of 8 hours served as substitute;

A bill (H. R. 12354) to grant to the city of Leominster, Mass., an easement over certain Government property; and

A bill (H. R. 12605) to enable the Postmaster General to purchase and erect community mail boxes on rural routes and to rent compartments of such boxes to patrons of rural delivery.

Mr. HEFLIN, from the Committee on Agriculture and Forestry, to which was referred the bill (S. 4206) authorizing the Director of the Census to collect and publish certain additional cotton statistics, reported it with an amendment.

Mr. McMASTER, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 8628) for the relief of Amos Dahuff (Rept. No. 1293); and

A bill (H. R. 11758) authorizing the Secretary of War to grant a right of way for a levee through the Chalmette National Cemetery (Rept. No. 1294).

SURVEYS AND PROJECTS, NATIONAL CONFERENCE ON OUTDOOR RECREATION

Mr. SHIPSTEAD, from the Committee on Printing, reported a resolution (S. Res. 251), which was considered by unanimous consent and agreed to, as follows:

Resolved, That the report epitomizing the results of major fact-finding surveys and projects which have been undertaken under the auspices of the National Conference on Outdoor Recreation be printed as a Senate document.

REPORTS OF THE COMMITTEE TO AUDIT AND CONTROL, ETC.

Mr. DENEEN. I submit several reports from the Committee to Audit and Control the Contingent Expenses of the Senate, and I ask unanimous consent for their immediate consideration.

The PRESIDING OFFICER (Mr. DALE in the chair). Without objection, the reports will be received.

FORMER SENATOR MAGNUS JOHNSON

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Resolution 176, reported by Mr. SHORTRIDGE on March 22, 1928, from the Committee on Privileges and Elections, reported it without amendment and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay from the appropriation for the expenses of inquiries and investigations, contingent fund of the Senate, fiscal year 1926, to Hon. Magnus Johnson the sum of $2,500, in full payment for all expenses, including fees and expenses of his attorneys, incurred in prosecution of his claim to a seat in the Senate in the contest of the election of a Senator from the State of Minnesota in 1924.

MILDRED G. SMITH AND MILDRED N. LOCKETT

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 238, submitted by Mr. BROOKHART on May 19, 1928, reported it with an amendment in line 4, before the name "Smith," to strike out "G" and insert "C," so as to make the resolution read:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay from the appropriation for miscellaneous items, fiscal year 1927, contingent fund of the Senate to Mildred C. Smith and Mildred N. Lockett, daughter and granddaughter, respectively, of James A. Crystal, late a messenger in the employ of the Senate under direction of the Sergeant at Arms, a sum equal to one year's compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

The amendment was agreed to.

The resolution as amended was agreed to.

HARRIMAN GEOGRAPHIC CODE SYSTEM

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Concurrent Resolution 15, submitted by Mr. MOSES on April 10, 1928, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That the Secretary of the Senate and the Clerk of the House of Representatives hereby are authorized and directed to pay out of the contingent funds of the Senate and House of Representatives, respectively, the sum of $2,000, or so much thereof as may be required, one half of said sum to be paid by the Secretary of the Senate, the remaining half by the said Clerk of the House upon vouchers duly approved by the chairman of the joint committee of both Houses authorized by Senate

Joint Resolution 110, Public Resolution 70, Sixty-ninth Congress, to consider the purchase of the right to an unrestricted use of the Harriman Geographic Code System under patents issued, or that may be issued, and also the unrestricted use of the copyrights issued, or that may be issued, in connection with the products of the Harriman Geographic Code System, for all governmental administrative, or publication purposes for which the same may be desirable.

ASSISTANCE FOR INVESTIGATION OF STREET-RAILWAY MERGER IN THE DISTRICT OF COLUMBIA

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Resolution 244, submitted by Mr. CAPPER on May 22, 1928, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on the District of Columbia, or any subcommittee thereof, hereby is authorized to employ during the sessions and recesses of the Seventieth Congress such expert assistance as may be deemed advisable to aid said committee, or subcommittee, in a detailed investigation of the plan of street railway merger and the unification agreement therein mentioned as embodied in Senate Joint Resolution 133.

For such purpose there is hereby authorized to be expended a sum not to exceed $10,000, to be paid from the contingent fund of the Senate upon vouchers properly approved.

PRESIDENTIAL CAMPAIGN EXPENDITURES

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Resolution 234, submitted by Mr. ROBINSON of Arkansas, on May 17, 1928, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the powers and duties conferred upon the special committee appointed under Senate Resolution 214 and any subcommittees thereof are hereby extended so as to authorize and require the said committee to continue its investigation under said resolution and said committee is hereby authorized in addition to the authority conferred by Senate Resolution 214 to sit and act during adjournment of Congress and to ascertain all facts in relation to the receipts and expenditures of the several political committees and of party organizations and agencies and other persons, including the amount contributed, pledged, loaned, or otherwise made available for use, either directly or indirectly, and also the methods of expenditure of said sums, and also the use of any other means or influence, including the promise or use of patronage and of governmental favors, and such other matter as will aid Congress in its further consideration of necessary remedial legislation, and to report to the Senate as soon as possible after the convening of the second session of the Seventieth Congress.

That said committee is further authorized to employ stenographic assistance, at a cost not exceeding 25 cents per hundred words, to report such hearings and proceedings as may be had in connection with any subject which may be before said committee, and such clerical and other assistance as may be deemed necessary by the committee. The cost of such stenographic, clerical, and other assistance shall be paid out of the contingent fund of the Senate upon vouchers properly approved.

That the appropriation authorized by Senate Resolution 214 shall be considered available in the performance of the further additional duties of the committee hereby conferred, and the further sum of $25,000 is authorized to be appropriated out of the contingent fund of the Senate to carry out the additional purposes hereby conferred.

INVESTIGATION RELATIVE TO NATIONAL PARKS

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Resolution 237, reported by Mr. NYE on May 19, 1928, from the Committee on Public Lands and Surveys, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on Public Lands and Surveys, or any subcommittee thereof, be, and it is hereby, authorized and directed to investigate the advisability of establishing certain additional national parks and the proposed changes in, and boundary revisions of, certain other national parks. For the purpose of carrying out the provisions of this resolution, such committee or subcommittee is hereby authorized to sit, act, and perform its duties at such times and places as it deems necessary or proper; to require, by subpœna or otherwise, the attendance of witnesses; to require the production of books, papers, documents, and other evidence; and to administer such oaths and to take such testimony and make such expenditures as it deems advisable. The cost of stenographic service to report such hearings shall not exceed 25 cents per 100 words. The expenses of such committee or subcommittee, which shall not exceed the sum of $3,500, shall be paid from the contingent fund of the Senate. The committee or subcommittee shall make a report as to its findings at the second regular session of the Seventieth Congress, together with recommendations for such legislation as it deems necessary.

LANDS WITHIN THE RAINY LAKE WATERSHED, MINNESOTA

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Resolution 239, reported by Mr. MCNARY on May 19, 1928, from the Committee on Agriculture and Forestry, reported it with an amendment on page 2, line 23, before the word "shall," to insert "$2,000," so as to make the resolution read:

Whereas on April 4, 1928, there was introduced in the Senate a bill (S. 3913) to promote the better protection and highest public use of lands of the United States and adjacent lands and waters in northern Minnesota for the production of forest products, and for other purposes; and

Whereas the preamble to said bill emphasizes the importance of protecting and conserving the area covered by the Rainy Lake watershed, lying in Ontario and Minnesota, and the adjacent lands and waters, out of international, historic, reactional, scenic, and economic and esthetic considerations; and

Whereas said bill contemplates the development of a uniform plan of treatment and protection for this entire region; and

Whereas said bill provides for the withdrawal from entry or appropriation of certain public lands of the United States situate in such region and for the conservation and protection of the natural features of such region in an unmodified state: Therefore be it

Resolved, That the Committee on Agriculture and Forestry, or any duly authorized subcommittee thereof, is authorized to investigate the matters recited in the preamble to Senate bill 3913 and consider the protective measures proposed to be adopted by said bill, with a view to determining the advisability and practicability of carrying out the principles therein set forth or determining what other plan for the development and protection of the region therein specified may be adopted, and to report thereon to the Senate as soon as practicable, with such recommendations for legislation as it deems advisable. For the purposes of this resolution such committee or subcommittee is authorized to hold hearings, to sit and act at such times and places in the United States and Canada, to employ such experts and clerical, stenographic, and other assistance, to require, by subpœna or otherwise, the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, and to take such testimony and make such expenditures as it deems advisable. The cost of such stenographic service to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of such committee or subcommittee, which shall not be in excess of $2,000, shall be paid from the contingent fund of the Senate.

The amendment was agreed to.

The resolution as amended was agreed to.

The preamble was agreed to.

MESSENGER TO SENATOR SCHALL

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Resolution 243, submitted by Mr. ROBINSON of Indiana, on May 21, 1928, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That THOMAS D. SCHALL, a Member of the Senate, whose term expires March 4, 1931, be, and he is hereby, authorized to appoint a messenger to act as personal attendant, in lieu of the page heretofore appointed, as provided by Senate Resolution 42, adopted December 17, 1927, said messenger to be paid out of the contingent fund of the Senate at the rate of $100 per month.

MEDAL TO THOMAS A. EDISON

Mr. EDGE. I ask unanimous consent to report back favorably, without amendment, from the Committee on Banking and Currency, the joint resolution (H. J. Res. 243) to provide for the striking of a medal commemorative of the achievements of Thomas A. Edison in illumining the path of progress through the development and application of inventions that have revolutionized civilization in the last century, and I submit a report (No. 1285) thereon. I ask unanimous consent for the present consideration of the joint resolution.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

Mr. DILL. What is the resolution?

Mr. EDGE. It is a joint resolution providing for the striking of a medal for Thomas A. Edison to be presented to him on his birthday, at the same time he is presented with a medal by the National Society of Arts and Sciences. It is a unanimous report from the Committee on Banking and Currency.

Mr. DILL. I think it had better go to the calendar.

Mr. KING. I think so too. Where is the authority for it?

The PRESIDING OFFICER. The joint resolution will be placed on the calendar.

AMENDMENT OF ADJUSTED COMPENSATION ACT

Mr. REED of Pennsylvania. I ask unanimous consent to submit a report from the Committee on Finance proposing to amend the adjusted compensation act. The report is unanimous. It merely extends the time for two years for filing applications under the adjusted compensation act. It will not lead to any debate.

Mr. ASHURST. I hope the bill may be put on its passage.

Mr. SMOOT. There is one amendment to it.

Mr. REED of Pennsylvania. There is an amendment which will not lead to debate.

I report back favorably from the Committee on Finance the bill (H. R. 10487) to amend the World War adjusted compensation act, as amended; and on behalf of the committee and the legislative drafting counsel, I propose an amendment, being the insertion of two words inadvertently omitted.

There being no objection, the bill was considered as in Committee of the Whole.

The amendment was, on page 3, line 5, after the word "making," to insert "and filing."

Mr. REED of Pennsylvania. All through the act those two words are connected in speaking of applications, and this amendment makes the bill consistent.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. FLETCHER:

A bill (S. 4561) to amend the first paragraph of section 3 of the shipping act, 1916, as amended; to the Committee on Commerce.

A bill (S. 4562) granting the consent of Congress to the boards of county commissioners of Escambia and Okaloosa Counties, Fla., their successors and assigns, to construct, maintain, and operate a canal through and across Santa Rosa Island in the State of Florida, and for other purposes; to the Committee on Military Affairs.

By Mr. SHORTRIDGE:

A bill (S. 4563) to remit the duty on a Zeiss planetarium to be imported for the University of Pennsylvania; to the Committee on Finance.

A bill (S. 4564) for the relief of Albert Ross; to the Committee on Naval Affairs.

By Mr. HARRIS:

A bill (S. 4565) to authorize the appointment of Technical Sergt. Tom Bowen as a warrant officer, United States Army; to the Committee on Military Affairs.

By Mr. COPELAND:

A bill (S. 4566) granting the consent of Congress to the New York Development Association (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the St. Lawrence River near Alexandria Bay, N. Y.; to the Committee on Commerce.

By Mr. GEORGE:

A bill (S. 4567) for the relief of Julius Victor Keller; to the Committee on Military Affairs.

By Mr. NEELY:

A bill (S. 4568) amending section 764 of Subchapter XII, fraternal beneficial associations, of the Code of Law for the District of Columbia; to the Committee on the District of Columbia.

By Mr. HALE:

A bill (S. 4569) for the relief of Oaks Aldus;

A bill (S. 4570) to authorize alterations and repairs to certain naval vessels;

A bill (S. 4571) to authorize an increase in the limit of cost of one fleet submarine; and

A bill (S. 4572) to authorize the Secretary of the Navy to proceed with the construction of certain public works, and for other purposes; to the Committee on Naval Affairs.

By Mr. WALSH of Massachusetts:

A bill (S. 4573) for the relief of John I. Fitzgerald; to the Committee on Claims.

By Mr. HOWELL:

A bill (S. 4574) for the relief of the Baltimore branch of the Federal Reserve Bank of Richmond (with accompanying papers);

A bill (S. 4575) for the relief of Christina Arbuckle, administratrix of the estate of John Arbuckle, deceased (with accompanying papers); and

A bill (S. 4576) to allow credits in the accounts of certain disbursing officers of the United States Veterans' Bureau (with accompanying papers); to the Committee on Claims.

By Mr. EDGE (for Mr. NORBECK):

A bill (S. 4577) to amend section 29 of the Federal farm loan act, and for other purposes; to the Committee on Banking and Currency.

CHANGES OF REFERENCE

Mr. SHORTRIDGE. I ask that the bill (S. 825) to amend the Federal corrupt practices act, 1925, approved February 28, 1925, by prohibiting the acceptance of certain contributions, and for other purposes, and the bill (S. 826) to prohibit the acceptance by any person of certain contributions for the purpose of influencing Congress as to legislation or other matters, bills introduced by the junior Senator from Missouri [Mr. HAWES] heretofore referred to the Committee on Privileges and Elections, be referred to the Committee on the Judiciary.

The VICE PRESIDENT. Without objection, it is so ordered.

MATHILDE B. WHIPPLE

Mr. COPELAND submitted the following resolution (S. Res. 247), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay from the appropriation for miscellaneous items, fiscal year 1927, contingent fund of the Senate, to Mathilde B. Whipple, widow of Charles Ayer Whipple, lately employed as an artist for mural redecoration in the Senate Wing of the Capitol, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

STATUS OF THE PACKERS' CONSENT DECREE

Mr. COPELAND submitted the following resolution (S. Res. 248), which was ordered to lie on the table:

Whereas on February 27, 1920, a consent decree was entered in the Supreme Court of the District of Columbia in the suit of United States *v.* Swift & Co. et al., known as the packers' consent decree; and

Whereas on May 1, 1925, the Supreme Court of the District of Columbia overruled motions by Swift & Co. and Armour & Co. to vacate the consent decree but suspended the operation of the decree as to California Cooperative Canneries; and

Whereas on March 19, 1928, the Supreme Court of the United States upheld the said consent decree and rejected contentions of Armour & Co. and Swift & Co. that the decree is void: Be it

Resolved, That the Attorney General be, and he hereby is, directed to report to the Senate all information as to the status of such consent decree in view of its suspension by the Supreme Court of the District of Columbia.

ADDITIONAL EXPENSES FOR INVESTIGATION OF CONDITIONS IN THE COAL FIELDS

Mr. WATSON submitted the following resolution (S. Res. 249), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Senate Committee on Interstate Commerce, or any subcommittee thereof, investigating conditions existing in the coal fields of Pennsylvania, West Virginia, and Ohio, and other matters in connection therewith, under authority of resolution No. 105, agreed to February 16, 1928, hereby is authorized to expend $10,000 from the contingent fund of the Senate in furtherance of the purposes of said resolution, in addition to the amount heretofore authorized to be expended in such behalf.

CIVIL WAR EXPENDITURES OF NEVADA

Mr. PITTMAN submitted the following resolution (S. Res. 253), which was referred to the Committee on the Judiciary:

Senate Resolution 253

Mr. PITTMAN submitted the following resolution, which was referred to the Committee on the Judiciary:

Resolved, That the Comptroller General of the United States be directed to reopen, restate, and resettle the account of the State of Nevada for moneys advanced and expended by reason of the assumption of the debts and obligations contracted by the Territory of Nevada in aid of the Government of the United States during the War between the States, and on such restatement and resettlement (1) to accept as a basis of calculation the balance due the State of Nevada on January 1, 1900, stated in the account set forth in the report of the Secretary of the Treasury printed in House Document No. 322, Fifty-sixth Congress, first session; (2) to add to such balance the interest certified by the controller of the State of Nevada as actually paid by said State

from January 1, 1900, to May 1, 1928, on that part of the debt so contracted by the Territory of Nevada and assumed by the State and bonds issued to cover same, for which no applicable funds to redeem such bonds were available on April 1, 1879; (3) after deducting the amount repaid by the United States to the State of Nevada since January 1, 1900; (4) deducting the difference between the amount of interest on the sum found available in "the Territorial interest and sinking fund" of Nevada on April 1, 1879, for the redemption of Territorial debt bonds and the amount of interest credited to the State of Nevada in the account stated in said House Document No. 322 from May 1, 1879, to December 31, 1899; and (5) deducting the amounts, if any, included in said statement of account reported in said House Document No. 322, incurred by the State of Nevada under the act of the legislature approved March 11, 1865 (Stats. Nevada, 1865, p. 389), for enlistments and expenses incident thereto in addition to those contracted under the Territorial act approved February 20, 1864 (Stats. Nevada Territory, 1864, p. 81), to report to the Senate the balance found due the State of Nevada.

POSTAL RATES—CONFERENCE REPORT

Mr. MOSES submitted the following report, which, with an accompanying statement, was ordered to lie on the table and to be printed:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12030) to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its amendments numbered 1, 2, 3, 4, 5, 6, and 7 with amendments as follows:

Page 3, line 12, strike out "1¾" and insert "1½."
Page 3, line 13, strike out "2½" and insert "2."
Page 3, line 14, strike out "4" and insert "3."
Page 3, line 15, strike out "4¾" and insert "4."
Page 3, line 16, strike out "5½" and insert "5."
Page 3, line 17, strike out "7" and insert "6."
Page 3, line 21, strike out "7¾" and insert "7."
And the House agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 8 with amendments, so as to make the amendment read as follows:

"That section 202, Title II, act of February 28, 1925, is amended by the addition of a paragraph 4 to read as follows: "'(4) *Provided*, That in the case of publications entered as second-class matter where the number of individual addressed copies or packages to the pound is more than 32 and not in excess of 48, the rates of postage thereon shall be double the rates prescribed in paragraphs (1), (2), and (3-a) of the act of February 28, 1925; where the number of individual addressed copies or packages to the pound is more than 48 and not exceeding 64, the rates of postage shall be three times the regular rates, and for each additional 16 individually addressed copies or packages or fractional part of such number of copies or packages there may be to the pound the rates of postage shall be correspondingly increased over the regular rates'"; and the Senate agree to the same.

That the Senate recede from its amendments numbered 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, and 20.

That the House recede from its disagreement to the amendments of the Senate numbered 21, 22, and 23.

That the House recede from its disagreement to the amendment of the Senate numbered 24 with amendments, so as to make the amendment read as follows: "SEC. 9. The Postmaster General is authorized to appoint a director of parcels post."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 25.

GEO. H. MOSES,
L. C. PHIPPS,
KENNETH MCKELLAR,
Managers on the part of the Senate.

W. W. GRIEST,
C. W. RAMSEYER,
THOS. M. BELL,
Managers on the part of the House.

STATEMENT

The House bill as agreed upon by the conferees remains substantially intact except in second-class matter, where the House conferees agreed that the so-called 1921 rates in the House bill should be amended so as to fix rates midway between the 1921 rates of the House bill and the 1920 rates of the Senate bill. This compromise effects a reduction in second-class rates officially estimated at about $2,700,000.

The bill as it now stands, therefore, effects a reduction in postal revenues of about $16,285,000, or $2,700,000 more than the original House bill. As it passed the House, the bill effected a reduction in postal revenues of $13,585,000; as it passed the Senate, a reduction in postal revenues of $38,550,000.

The bill includes provisions as follows:

To restore the 1-cent postage rate on post cards.

To provide for accepting business reply cards and letters in business reply envelopes for transmission in the mails without prepayment of postage.

To provide for collecting 1 cent additional an ounce on first-class matter when mailed with postage deficient more than one rate.

To reduce the postage on advertising portions of second-class matter.

To reduce the postage on magazines and newspapers when sent by others than the publisher or news agent.

To effect a minimum charge per piece on second-class matter when there are more than 32 pieces to the pound.

To provide for bulk pound rates on third-class matter.

To reduce the postage on fourth-class matter.

To provide for a special rate of postage on library books.

To provide for special handling and special delivery, combined, at reduced rates. This service is extended to all classes of mail.

To authorize the appointment of a director of parcel post by the Postmaster General.

RECAPITULATION

	Net increase in revenue	Net decrease in revenue
Sec. 1. Post cards, reduction in rates from 2 cents to 1 cent each		$1,200,000
Sec. 2. Business reply cards and envelopes, collect on delivery	$4,000,000	
Sec. 3. Deficient postage, penalty for	75,000	
Sec. 4. Second-class matter, between 1920 and 1921 rates		6,560,000
Sec. 4. Minimum charge per piece on second class		
Sec. 5. Second-class matter, transient rates reduced		100,000
Sec. 6. Third-class matter, bulk pound rates		10,500,000
Sec. 7. Fourth-class matter, reduction in rates to distant zones		2,200,000
Sec. 8:		
Special delivery combined with special handling	800,000	
Special handling exclusively		600,000

INCREASED TARIFF DUTIES ON FARM PRODUCTS

Mr. SHIPSTEAD. Mr. President, I ask unanimous consent to print in the RECORD a letter from the Twin City Milk Producers Association.

This letter speaks for itself. It is hard for farmers to understand why, under present conditions of agriculture, Congress should refuse to give relief by changing the present inequalities in our tariff situation when a billion and a quarter agricultural products are being imported here, $500,000,000 worth of which comes in competition with agricultural products produced in the United States. To answer them by saying that a tariff amendment to a revenue bill is not proper is evading the question and is not true. It is just as lame an excuse as it would be to refuse food to a starving man because you had to serve him the food on a saucer instead of a plate. It is just as silly as to say that this man must starve because food must be eaten from a plate and not from a bowl. As a matter of fact, a tariff amendment and a tax amendment are both revenue measures, and therefore are in order when attached to revenue bills.

It is plain that Members of Congress do not want to remedy the inequalities of tariff provisions operating now to such an extent in favor of industry as to cause the farmer to suffer from a condition which can be called by no other name than that of a political and economic swindle. The coming elections will show if the farmers are going to continue to vote for the continuation of this and other political swindles that are piling up mortgages, breaking banks and business houses in agricultural sections to such an extent that people are in despair and are beginning to believe that political parties are organized merely for the purpose of passing laws to be administered for the purpose of robbing the people who produce the Nation's food and wealth.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TWIN CITY MILK PRODUCERS ASSOCIATION,
St. Paul, May 21, 1928.

Hon. HENRIK SHIPSTEAD,
Senate Office Building, Washington, D. C.

DEAR SIR: We could hardly believe our eyes when we read in yesterday's paper that your amendment received only 13 votes. It appeared to us that this was one opportunity that Congress had to help agriculture with legislation that had the unanimous support of all branches of the industry and could not be objected to on the basis of fairness by any group.

We would like very much to secure the names of those who supported this amendment and those who voted against it. We feel that this should have publicity as even the conservative farmers are about ready to accede to the belief that the people in Washington as a whole do not intend to be fair to agriculture.

We appreciate the fact that you did your part and will be very glad to have all the information regarding the situation that you can give us.

Yours very truly,

H. R. LEONARD, *Manager.*

Mr. SHIPSTEAD. I also ask unanimous consent to print in the RECORD an editorial from the Minneapolis Tribune of May 22.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE SENATE'S STRANGE DEVOTION TO AGRICULTURE

The defeat in the Senate of the Shipstead amendment to the revenue bill calling for increased tariff duties on farm products discloses rather clearly the quality of the friendship professed for the farmer by that august body.

On April 12 with a loud beating of agricultural hearts the McNary-Haugen bill was passed by a vote of 53 for and 23 aganist.

On May 19 the Shipstead amendment was only able to muster 13 votes, while 44 Senators voted against it.

Just how these Senators, as professed friends of the farmer, can reconcile their votes of Saturday with the vote on the McNary-Haugen bill will probably ever remain a moral and a political mystery.

There can well be and there is a difference of opinion concerning the merits of the McNary-Haugen bill. Whether one is for or against the bill, there can be no doubt that the bill had as its necessary foundation the tariff. Assuming that the McNary-Haugen bill will do for the farmer what its proponents claim, a higher tariff on agricultural products is the first necessity. If the tariff is to be made effective for the farmer, according to the McNary-Haugen proponents the tariff on agricultural products will have to be increased. There can be no increase in the United States price of farm products beyond the barrier fixed by the tariff law. It is distressingly obvious that any increase in this country that exceeds the world price plus the tariff will immediately bring into this country foreign agricultural products.

The only conclusion that can be legitimately drawn from the action of the Senate in defeating the Shipstead amendment is that a great many proponents of the farmer in the Senate are wholly insincere in their advocacy of that measure. That there was some fear that the stress of politics might force President Coolidge into signing the bill was more than suggested when the fund for its operation was increased to $460,000,000. To many calm observers of congressional politics it looked as if this increase was made in order to be certain that the President would veto it.

Yet when this same Senate that voted for the McNary-Haugen bill 53 to 23 was called upon to vote for increased tariff duties on farm products it could only muster 13 Senators instead of 53. This on the part of those who were loudly proclaiming their unalterable determination to put agriculture on a tariff parity with industry is nothing less than astounding. No one, whatever his opinion may be on the merits of the McNary-Haugen bill, will deny the value to the farmer of increased tariffs. The measure was particularly important to the dairy industry as well as the poultry industry. It is true that it would not settle the problem of surplus wheat, but it would have been of benefit to a vast number of farmers and to agriculture as a whole. Those who voted against it can not logically hide behind the assertion that they want the McNary-Haugen bill or nothing, because if they got the McNary-Haugen bill they would have to have these increased tariffs. The bill did not conflict in any way with the McNary-Haugen bill, and would have been of unquestioned help to the farmer. Still only 13 Senators were for it.

One would hardly be termed too pessimistic or too cynical if in view of Saturday's action in the Senate he came to the conclusion that farm relief was a political football that was being kicked around the field for the sole purpose of getting votes, and with scant care as to whether or not the farmer got any relief. He might even come to the conclusion that those who made the biggest noise in professing their love for the farmer and asserting their demands for justice were being exceedingly careful to advocate only such measures of relief as they were certain would never come into effect.

HARDING, THE MAN

Mr. FESS. Mr. President, on the 16th of this month Secretary of Labor James J. Davis delivered a very notable address before the Breakfast Club at Columbus, Ohio. The address was on "Harding, the Man." The Secretary of Labor was introduced by Hon. John J. Lentz, a former Member of the House of Representatives and a Democrat. I should like to have both these addresses inserted in the RECORD.

There being no objection, the addresses were ordered to be printed in the RECORD, as follows:

INTRODUCTION BY HON. JOHN J. LENTZ

My friends, as president of the Columbus Breakfast Club, I now call you to order. I am happy to see so many of you here this morning, and I am sorry we do not have sufficient places for all. In looking over the group it seems to me that the Republicans are in the majority. For that reason, I have been careful to have former Mayor Karb, a Democrat, here so that you might shine in borrowed light.

I remember once a man told me that he thought I was a Democrat. I had thought so myself, but in looking over the pages of history, I found that Abraham Lincoln said, "I have never entertained a political sentiment nor pronounced a political principle which I did not myself draw from the life and writings and public proclamations of Thomas Jefferson." Ever since that, I have been claiming that I am a Lincoln Democrat and a Jeffersonian Republican, too.

It seems to me that this capital city of Ohio is just the place in which we should have an address on Warren G. Harding, one of Ohio's most distinguished sons. And it is fitting, too, that to deliver this address we have such a man as the Hon. James J. Davis, Secretary of Labor in the Harding Cabinet and in the Cabinet of President Coolidge.

Before calling upon our speaker, may I say a few words by way of introduction. I happened to be with Secretary of Labor Davis in New Orleans seven years ago last January when the Mooseheart governors were searching for a site upon which to establish Moosehaven, a home for aged members of the Loyal Order of Moose. The committee was investigating sites in every State fronting on the Gulf of Mexico. At New Orleans Mr. Davis received a telegram from President-elect Harding inviting him to come to Marion. He obeyed this call, and after a conference with President Harding joined our party again at Spartansburg, S. C. There he took us into a conference with reference to Mr. Harding's invitation to become a member of the Cabinet.

Mr. Harding did not call James J. Davis to his Cabinet merely because he was a Republican. He called him into that Cabinet because he was America's greatest fraternalist. He was then the greatest fraternalist in America; he is now the greatest fraternalist in the world.

I know that you are here this morning to pay your respects to the one man who has served so favorably in two Cabinets of the United States and who, in addition to all that, is doing such a great work in behalf of what we call fraternalism. It is peculiarly appropriate that James J. Davis should speak to us on "Harding, the Man." No man in America knew him so well; no man in America had the opportunity of knowing what moved his heart and influenced his actions. Mr. Davis knew Mr. Harding intimately for many years as a friend. He knew him as President of the United States and as "Harding, the Man."

With all our hearts we welcome our distinguished visitor to Columbus and to this meeting of the Columbus Breakfast Club. I congratulate you upon this privilege and honor of hearing the Hon. James J. Davis speak upon "Harding, the Man."

SECRETARY DAVIS'S ADDRESS

Gentlemen of the Columbus Breakfast Club, I am happy to be with you this morning and I certainly appreciate this opportunity of saying a word to you on "Harding, the Man."

Warren Gamaliel Harding received the largest vote ever cast for a President of the United States up to the time of his election. He was one of our most popular Presidents; and his death was lamented by the entire Nation, irrespective of sectional and political lines. Lest we forget, it is well that we pause in our busy lives to recall the achievements of Mr. Harding and the good that he wrought during his Presidency.

Mr. Harding was an exceedingly modest man, and he would not approve of any attempt to place him upon a pedestal. But no American President has ever been placed in a more difficult position, one in which a greater number of difficult problems presented themselves for serious consideration, than fell to the lot of Mr. Harding, and I believe that no American President ever faced his problems, which were world problems, with a larger-minded seriousness, or surmounted them with greater skill.

Mr. Harding entered the Presidency at the end of the greatest war the world has ever known. That war left Europe in a condition which can not be described adequately in words. A majority of European homes were in mourning for their brave sons who would never brighten the firesides again. In America we suffered less, but we suffered enough. It has been said that it is the silent organ which chants loudest the requiem of the master. And so it is the vacant chair that

will never be filled on earth again which speaks to the bereaved heart most eloquently of death and its significance. And when the war was over there were not less than 15,000,000 vacant chairs, never to be filled on earth again, which brought home the reality of the war in a way that no historian of the future will ever succeed in doing.

There were millions who suffered from wounds, and many other millions who would never know in the future the meaning of health. Billions of dollars in property had been destroyed, so that Europe, once the world's greatest treasury of riches, was seized by the plague of poverty. Men who had possessed great wealth were reduced to the condition of poverty. The populace were largely out of work, thrones tottered and fell, governments became more or less unstable, and Russia, one of the most conservative nations of Europe, fell before the onslaught of communism. Repercussion of the great disaster that had befallen the Old World were heard in the new, and it seemed for a time as if our country might be drawn into the maelstrom. The world was war weary and desired to forget.

In his early campaign speeches Mr. Harding announced that his policy was to bring the country back to "normalcy." After his inauguration the country looked to him to do that very thing. The United States was tired of war. It wanted to get back to normalcy, to the old American ways of looking at life and destiny and to business as it had always been done.

But in spite of our desire many obstacles confronted us. We discovered that all the war-weary men of Europe who were unable to obtain employment at home wanted to come here. Shipload after shipload of them were coming. America was not prosperous at this time, for nearly 6,000,000 of her own workers were out of employment, yet conditions were so much better here that to the unemployed of Europe America seemed like a promised land. Something had to be done quickly if America was not to be swamped and go the way that Europe was going. It was necessary to keep the unemployed masses of Europe from coming here, where they would augment our own unemployed and add to the problems of our period of readjustment.

The evils of unrestricted immigration had been apparent long before the war, and more than once a bill to restrict immigration had passed Congress only to meet a presidential veto. Mr. Harding saw at once that unrestricted immigration was a gigantic evil to the American Nation, and especially to American workers; and if this evidence of profound insight were the only distinguishing feature of Mr. Harding's career it alone would be sufficient to stamp him as one of our greatest statesmen.

Three Presidents before Mr. Harding had vetoed acts passed by Congress for the restriction of immigration. I personally knew of the immense pressure that was brought to bear upon Mr. Harding to induce him to follow their example. No doubt the parties who brought this pressure to bear sincerely feared for American industry if the supply of what is known as "common labor" was cut down. President Harding thought only of the interests of his country as a whole; with a magnificent display of courage he affixed his signature to the new law restricting immigration. Now, that law passed during his administration is everywhere regarded as the most useful piece of legislation enacted during the past 50 years, and the Nation owes it to Mr. Harding that we are now enjoying its benefits.

The declining prosperity of the Nation and the immense amount of unemployment apparent soon after Mr. Harding's inauguration at once engaged his attention. Naturally, being a Republican, he was dissatisfied with the tariff-for-revenue-only policy of the preceding administration. This tariff was bringing in revenue, but it was affording insufficient protection to the many millions of American workers ordinarily employed in gainful industry. More than 5,000,000 workers were without employment.

No matter how you attempt to account for this condition, one may not truthfully deny that every attempt to take protection out of the tariff has resulted in industrial depression and lack of employment. President Harding wanted a tariff that protected, a tariff that would start the great industrial machines to whirring again, a tariff that would put all the workers back to work, so that they could take care of themselves and their families. And he was successful in getting that kind of a tariff enacted into law. [Applause.]

We all know the result of that law. The American people entered into a different psychological state. They began to think and feel and act in terms of prosperity. And they have kept on doing so ever since. At the time of Harding's death our country was in a very prosperous condition. To-day America is not only the most prosperous country in the world, it is the most prosperous country upon which the sun has shone in 10,000 years of civilized history. America is worth to-day $400,000,000,000. Think on those figures. The mind can not grasp them. And this prosperity is not confined to a class. It percolates from the top to the bottom.

The American worker enjoys luxuries that no European king enjoyed 300 years ago. The best-dressed American worker of to-day has a greater number of suits than most of the European lords of three centuries back. He has or may have a larger library. And if we are to speak in terms of scientific knowledge, his education is capable of being much better. There is not a bright boy belonging to the American working class who can not obtain a collegiate education or its equivalent with little difficulty. There is no American man so humble in our time who is not virtually better off than the proudest of a few centuries ago.

Of course, Mr. Harding was not wholly responsible for this prosperity. Many economic factors are responsible for it. But if Mr. Harding had not taken the stand he did in regard to immigration and the tariff, this country, despite the economic factors entering into the situation, would never have known the prosperity that it enjoys to-day.

The proof of statesmanship is found in the effect of the policies which men favor. There are those who say that Mr. Harding was merely a man of his time. That sort of talk is mere nonsense. What would we think of a man who, in the old days when the only means of locomotion available was a horse, refused to use a horse because he had a dream of a steam-engine and a locomotive? A great man is one who uses his hour in the only fashion that it can be used, and does not waste it by idle dreaming.

What we need in public life more than anything else is men of common sense. The man who possesses in large measure this quality will accomplish more for his people than the man possessing the most brilliant gifts who is destitute of it. Mr. Harding was a man of admirable common sense. He was human through and through, and he did not ask to be other than human. As I see him, he was typically American. I believe that America will always be governed better by one who is typically American than by one who is not typical of his country, even though the latter may be regarded by history as the greater man. [Applause.]

President Coolidge once said, and it was a great saying, "We have staked America on the potential capacity of the average citizen." Mr. Harding stood for such, he believed in such. He was proud of prosperity of which everyone enjoys a share.

The time is passed in America when we are content to talk of a living wage; we have seen millions of workers pass from a condition in which they received a living wage to a condition in which they receive a wage high enough to buy not only the necessities, but many of the luxuries of existence; a wage high enough to enable them to save something, to buy automobiles, and send their sons and daughters to college.

To-day the world witnesses what the world never witnessed before, for it seems that the workers of America receive a wage which enables them to become an integral part of the economic power of the country to which they belong. It is a wonderful change. And we should never have witnessed and scarcely dreamed of it had it not been for the policies that President Harding sponsored.

Never before in the history of the country has there been a time when so many men were permanently employed at such remunerative wages. He lived to see the good results produced by his work and the great army of unemployed once again absorbed by American industries. This was at a time, too, when the introduction of new labor-saving machinery was making itself felt by displacing hand workers. I am confident that an immense amount of prosperity was largely due to the far-sighted policies of the Ohio statesman, my friend, Warren Gamaliel Harding.

It must be admitted that the restoration of the protective tariff, if it had not been accompanied by the new legislation restricting immigration, would have accomplished little more than a rebirth of industry. In course of time, with immigrants coming by the shipload from Europe, we might have had additional millions of unemployed workers on our hands.

The truth is that when Mr. Harding succeeded to the Presidency, there was a feeling of rejoicing from one end of the country to the other. People felt that we would be able to get back to a normal condition. It was known that Mr. Harding was by nature conservative, and the people of America believe in him and entrusted their country's welfare to his keeping. His success in restoring the country to normalcy, proved that the popular instinct was right.

Mr. Harding never did any preaching, but he called a disarmament conference to meet in Washington, and that conference, as is well known, did more to promote the cause of peace than anything else which has been accomplished since the armistice. The call for the conference brought renewed hope to the war weary and distracted world.

If Mr. Harding had never done anything during his term of office except to call the disarmament conference, he would still be deserving of high honor as a statesman. There is nothing more dreadful to contemplate than another war similar to the one which came to an end 10 years ago, a war in which all the leading nations were engaged. The last struggle came very near to giving civilization a death blow, and it is more than probable that another struggle of the same character, if fought upon the same scale, would end all the gains that have been made in the last 2,000 years.

Let us keep out of our heads the notion that any war will ever be fought which will end war. Every war sows the seeds of future wars. And let us get out and keep out of our heads the notion that any war will make the world safe for democracy or freedom or any other noble thing.

Wars always have had, and they always will have, exactly the opposite effect. They dry up the springs of liberalism in the human mind and heart; they make for everything which is reactionary in human character and life.

The progress of the war is produced not by the arts of war but by the arts of peace. And in calling a disarmament conference Mr. Harding exercised the highest art of statesmanship. No visionary was Mr. Harding. He was ever a realist. But when he saw an opportunity to make a magnificent gesture in the cause of peace, he made it; and the Nation and the world should honor him for the magnificence of that gesture.

Mr. Harding knew human nature. He knew how far it was possible to go in the promotion of a good cause without overstepping the boundaries of good sense. In calling the disarmament conference, he did what he could for peace. And in taking his stand on the subject of immigration, he did almost as much to stabilize the nations of Europe as he did to benefit the workers of his own country, as European statesmen are now frank to acknowledge.

I would not leave an impression in your minds, because I have spoken of Mr. Harding as a realist, that he did not possess high ideals. He did possess them. Mr. Harding was deeply religious and he belonged to a church. He did not attend church because he was conscious of no imperfections within himself; he went because he was conscious of such imperfection. We all go to confess that we have done the things we ought not to have done, and have left undone the things that we ought to have done, and such virtue as may exist in us comes largely from our frankness in confessing our faults. We hear altogether too much about the faults of others and too little of the blessings that come from their lives. Those who knew President Harding were aware that none was more kindly at heart or more desirous of doing good.

I do not say that Mr. Harding was a perfect man. There has been only one perfect man on this earth, and the one perfect man died, rejected and reviled, upon the cross. Mr. Harding was human, and he never professed to be other than human, but he was incapable of a despicable act. His faults, such as they were, were the faults of our common human nature.

I knew Mr. Harding for many years prior to his election as President, and I never knew a man who sought more earnestly to do good, or whose instincts were kindlier. It seems but yesterday, though it was on the 10th of January, 1921, that he called me to his home at Marion to offer me the position in his Cabinet which I was destined to fill. I hesitated about accepting it, because I was under contract with the Loyal Order of Moose at the time. But Mr. Harding not only urged me to accept the position as Secretary of Labor, he told me that my position in this fraternity would in no way interfere with my duties as a member of his Cabinet, and it was with this understanding that I finally accepted the appointment.

He told me that, as Secretary of Labor, I would get a picture of the industrial situation in the United States which could not be obtained otherwise. What he said has proved true. My outlook in life has increased many fold since I became a member of the President's Cabinet, and I am sure you will all agree with me that my official position has interfered in no way with my labors in fraternalism.

Mr. Harding was a friend and a champion of the common people. I want to emphasize this fact. It is one which has not been true of every American politician, statesman, or thinker. Only a short time ago an article appeared in one of the leading American magazines, by a prominent American historian, on "The Unknown Soldier." He said, "If instead of the great man we worship the little one, if instead of occupying our thoughts with the great and the fine we devote all our time and admiration to the petty, the commonplace, the plain and common, are we not likely ourselves to become more and more like the objects we worship?

"Why spend laborious nights in study to train our minds, why attempt to mold our characters to something higher than the mob, why strive for high thought and action, why dream of high endeavor, why strive to fit ourselves to lead, if, after all, we are still no better than the led, and the world's leaders and benefactors are really outranked by Sal the sandwich slinger, and Bill the stoker?"

There spoke the aristocratic mind. But Mr. Harding had scant sympathy with this type of mind. He agreed with the remark by Abraham Lincoln that "God must have loved the common people; he made so many of them." When President Harding spoke at the burial of American's Unknown Soldier in Arlington Cemetery he exemplified his love and affection for the common people by concluding his heartfelt tribute to the patriotic dead with the universal prayer of faith, "Our Father, which art in heaven."

Nothing could more fittingly reveal the simple faith and hope of this kindly and sympathetic man. Shall we condemn him for this attitude? Praise the aristocratic type of mind as much as you will, as much as it deserves, but what would it have been able to accomplish if it had not been for these common folk whom it affects to look down upon. President Harding did not agree with the ancient notion that a few were born to enjoy all the good things of life, and that the many were born only to hew wood and draw water without more than a mere subsistence in compensation for their toil.

America has justly been called the land of opportunity, and it has been called that not because it provides miraculously for the exceptional man, but because it gives the common man a chance to make the utmost of himself. It is a land of opportunity because we have come to see that in reality there is nothing common about the so-called common man. And the age in which we live has done the work of elevating the man whom the world used to call "common," so that he now appears in a different light. Mr. Harding's career entitled him to a position of admiration and respect because of his insistence on the virtue of the average citizen who labors for a living with his hands.

Among the utterances of Mr. Harding we find the following:

"Less government in business and more business in government."

"The worker's lowest wage must be enough for comfort, enough to make his house a home, enough to insure him that the struggle for existence will not crowd out the things worth existing for."

Speaking for the railroad workers, he said: "I want the man on the railroad to have a good wage. I want the man who holds the throttle of the train that speeds across the continent through the night to be a happy man. He can not be unless he is well paid."

In all his speeches, which involve the problem of labor, one finds the same attitude. He believed that the laborer is worthy of his hire. A world in which the employer is prosperous at the expense of the employee is one in which Mr. Harding never felt at home. One of his strongest reasons for believing in a protective tariff was his conviction that a protective tariff means high wages, at least in America; and you could not interest him by trying to show that free trade or a tariff for revenue only would reduce the price of goods.

Mr. Harding believed in a wage that would enable every worker to feel that he had a stake in his country, a stake so high that he would give his heartfelt devotion to its interest, and shed, if necessary, his last drop of blood in its defense.

He believed that a worker's wage ought to be high enough to enable him to purchase or build a home, and I am sure that he knew as well as the man who originated the remark, that nobody was willing to sacrifice his life in defense of a boarding house. He knew that the welfare of the country in the future will depend more and more on the welfare of the workers, and that if the workers are not happy the Nation is not likely to endure for any long stretch of time.

I am confident that the time is not distant when the people of this great country will come to know their late President for the person he was, and that they will then realize that Mr. Harding was a great man and a great President. Mr. Harding's nature was so kindly that many who professed friendship for him took advantage of his warm-hearted nature. This is the real explanation of any criticism that we hear in certain quarters to-day. There is no more despicable member of mankind than the man who takes advantage of another's kindness to advance himself into a high position and then abuse that confidence and trust of the one who sought so to honor him.

Mr. Harding died in office, as five other American Presidents have died, worn out by the manifold duties of that office. We know not what he might have accomplished for the people whom he loved if his life had been spared. But his record is irreproachable. He did much that the historians of the future will remember and praise. When the complete story of his administration is written the people of the country will know that they had a Chief Magistrate worthy of the highest honor and they will delight to honor him.

Mr. Harding came from one of the two American States which have long been known as the mothers of Presidents, and Ohio has reason to be proud of the one who was for long one of her favorite sons. He conferred honor upon his State and upon the Nation at large. He was a true gentleman and a loyal friend.

I am sure that no man appreciated more the noble qualities of the man whom we honor to-day than he who succeeded him as the Chief Magistrate of the Republic. President Coolidge has followed in the footsteps of President Harding, and the policies which he has advocated are in the main the policies of his predecessor. Mr. Harding during his term of office honored Mr. Coolidge by inviting him to attend the meetings of his Cabinet, an honor that I believe no other American President ever extended to a Vice President up to that time.

In Mr. Harding there was nothing mean, low, or grovelling. He was incapable of petty jealousies. He cared little who received the credit for achievements during his term of office so long as there were achievements to be recorded. He desired only to see the American people prosperous and contented, and we know that during his administration they were prosperous and contented to a degree greater than had ever been witnessed during the administration of any previous President.

I know of nothing sadder than the spectacle of a man dying before he has finished the work he has begun. The soldier who dies upon the battle field is spared the spectacle of his country's ignominy if the issues of the struggle go against her, but likewise he is forbidden to share in the triumph of the Nation if the issue be in her favor. Abraham Lincoln died in the hour of victory, but what son of America has not lamented that he did not live to witness the reunion of the dissevered sections of the Nation which he loved and labored to save.

Warren Harding lived to see the Nation well on the road back to the normalcy which he was anxious to see, but he should have lived a few years longer to witness the flowering of the new prosperity which he did so much to foster. But, as an English poet once wrote, "Man proposes, but God disposes." Few men are allowed to witness the larger harvests of their sowing. What one man sows, another man reaps, but the memories of a well-spent life are never completely lost; each succeeding generation delights in reviving them and honoring the man who has honored our common nature.

I have no fear that the people of America will forget what they owe to Mr. Harding. His fame will increase with the ages, the people will do justice to him and to his memory. He was a great man, and his greatness will be perceived by all. He died in office a martyr to duty, but he is destined to receive in the future his just need of praise.

In the light of passing years my personal and official contacts with Warren G. Harding make his name more illustrious and endearing to me. Friend of humanity, his active career was a radiant light of friendliness—a friendship of actions—a sympathy that helped rather than ended in mere sympathetic words. He possessed the virtues we look for in the careers of our heroes and public men and seldom find under the acid test.

He has suffered the test that comes with the goodness of a great heart. Patient unto the last, his faith in his fellow men never wavered—and in the clear spotless light of love he stood on the mount and glorified as few other men in history outside of Lincoln, the glory of the Golden Rule so often included in the platitudes of public utterances, but, alas, so seldom evidenced in official or personal action.

I can hear his cheery voice calling me "Jim" as he would a brother—he could place his hands on your shoulder and give you a benediction of fraternal affection without affectation. [Applause.]

I have been rereading a recent biography written in all the fervor of friendship which gives an accurate reflection of the love and administration of Warren G. Harding during the time which he lived and at the time he finished his earthly course. What would we not give to have a biography of Lincoln meaning and reflecting so accurately that sentiment and faith toward the great Emancipator at the time he was making history. The later so-called "critical analysis"—by self-appointed judges—of a place in history of great men is so befuddled with the ego of writers and the absence of any real feeling of the times in which an eminent man lived, that they seek first to tear down all the tattered ensigns of historical record and truth to establish some pet notions of their own. But their insidious and unfair estimates live only as long as the froth of the sensation lasts, for the deep waters of a big, broad, sympathetic, soulful life can not be clouded by mists of salacious suggestion and the viperous tongue of gossip, with which every eminent man has been assailed. [Prolonged applause.]

Gentlemen of the Columbus Breakfast Club, I am grateful for the opportunity you have given me to express the high regard in which I hold the memory of my dear friend, one of the finest men it was ever my privilege to know, the late Warren G. Harding. [Prolonged applause.]

PHILIPPINE AUTONOMY

Mr. WHEELER. Mr. President, I ask unanimous consent to have inserted in the CONGRESSIONAL RECORD a statement by Manuel L. Quezon, President of the Philippine Senate, with reference to opposition to Senate bill 2292 and Senate bill 2787, and editorials from American newspapers with reference to the same subject.

The PRESIDING OFFICER. Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

MEMORANDUM IN OPPOSITION TO S. 2292 AND S. 2787, BOTH PROPOSING TO CURTAIL THE AUTONOMY GRANTED BY THE CONGRESS OF THE UNITED STATES TO THE FILIPINO PEOPLE

By Manuel L. Quezon, President Philippine Senate

MAY 1, 1928.

There are pending on the floor of the Senate of the United States two bills affecting the Philippine Islands, S. 2292 and S. 2787. The first proposes to have the Congress of the United States appropriate $125,000 from the funds collected in the United States from internal revenue taxes levied upon articles and merchandise coming to this country from the Philippine Islands—now turned over in its entirety to the Philippine Treasury for general appropriation by the Philippine Legislature—and giving the Governor General authority to expend some for the employment of technical advisers and assistants without the necessity of further appropriation by the Philippine Legislature and without submitting appointments to the Philippine Senate; the other authorizes the Governor General to appoint governors for the so-called Mohammedan and non-Christian provinces without the consent of the Philippine Senate. As may be readily seen, these bills are reactionary in that they curtail the right of our legislature to appropriate and the power of the Philippine Senate to confirm appointments.

BOTH BILLS CONTRARY TO OFFICIAL PLEDGE AND TO POLICY OF REPUBLICAN AND DEMOCRATIC PARTIES

Enactment of these bills is not only contrary to the official pledge made by the Government of the United States to grant the Filipinos ever-increasing measures of self-government, with independence as the ultimate goal, but also to the oft-reiterated policy of both the Republican and Democratic parties as expressed not only in their respective platforms but by their respective leaders in authority. As for the Republican Party the utterances of Presidents McKinley, Roosevelt, and Taft, who have shaped the policy of that party with respect to the Philippines, are well known and I need not dwell upon them. It will suffice to quote Mr. Taft who, in a special report submitted by him when he was Secretary of War, said:

"That policy necessarily involves, in its ultimate conclusion, as the steps toward self-government become greater and greater, the ultimate independence of the islands; although, of course, if both the United States and the islands were to conclude, after complete self-government were possible, that it would be mutually beneficial to continue a governmental relation between them, like that between England and Australia there would be nothing inconsistent with the present policy in such a result."

As for the Democratic Party, its invariable policy has been to grant the Philippines their independence as soon as a stable government can be established therein. The Jones Act was enacted as a preliminary step for the granting of complete independence, and four or five years after that law was passed and the government established under its provisions had been in operation President Wilson, in a message to Congress, reported that a stable government had been established in the Philippines and recommended that independence be granted.

With these thoughts in mind the Filipinos can not but entertain the feeling that the present administration and Congress are giving no thought to the carrying out of these pledges and these policies. Not only that, but after 30 years of progressive steps toward self-government they have not only stood at a standstill, as they have, but would now turn the other way around, unmindful of the additional assurance made by President Harding to the Filipino people when he officially told them that "no backward step is contemplated, no diminution of your domestic control is to be sought."

SPECIFIC REASONS AGAINST S. 2292

ALREADY ESTABLISHED AGENCIES OF PHILIPPINE GOVERNMENT SUFFICIENT AID TO GOVERNOR GENERAL

Sponsors of S. 2292 urge its enactment on the ground that the Governor General needs expert advisers and assistants. The Philippine Legislature has always been ready to appropriate, and has, in fact, appropriated funds for expert advisers and assistants to the Governor General. There is, right now, a law which authorizes the Philippine Government to make special contracts and pay special salaries to chiefs and assistant chiefs of bureaus and other employees of the Philippine Government performing duties that require technical knowledge. The director of the bureau of education, Dr. Luther B. Bewley; the director of the bureau of science, Dr. William H. Brown; the director of the bureau of agriculture, Dr. Stanton Youngberg; the director of the bureau of forestry, Dr. Arthur F. Fisher; the director of the bureau of public works, Mr. Alpheus D. Williams, and several other Americans now engaged in the service of the Philippine government, who have been appointed by the Governor General, by and with the advice and consent of the senate, are drawing salaries higher than the salaries paid to Filipino directors of bureaus under a contract authorized and an appropriation made by the Philippine Legislature. And where it has been found necessary to carry on some special technical work for the Philippine government, the legislature has made the appropriation required for this purpose. I will cite one case: Four years ago we appropriated ₱100,000 ($50,000) for the purpose of bringing to the islands a committee of expert educators to make a survey of the educational institutions of the country; and a committee did come, headed by Dr. Paul Monroe, of Columbia University, with such other distinguished educators as Dr. Stephen Duggan, and others.

It is asserted that the Governor General has not been given by the legislature the personnel which he needs to perform his duties and exercise the powers of his office. In the first place, it should be noted that under the law the Governor General is charged with the preparation of the budget, and he has never, since the budget system has been established in the Philippines, asked for more personnel than he now has, and he has been granted by the legislature everything that he had asked for. In fact, he has a large force working directly under him in the executive offices. In the second place, the whole governmental machinery in the Philippine Islands, under the Jones Act and under the laws of the Philippines, which give the Governor General supervision and control of all the executive departments and offices of the Philippine government, is, in fact, available to the Governor General for any purpose whatsoever.

It is alleged that the Governor General needs assistants to supervise the provincial and municipal governments. There are two big bureaus under the control of the Governor General: The executive bureau, which is intrusted with this function, in the case of the provincial and municipal governments in the territories inhabited by Christian Filipinos; and the bureau of non-Christian tribes, which deals with the affairs of the Provinces and municipalities or townships in territories inhabited by Mohammedan and other non-Christian Filipinos.

PHILIPPINE LEGISLATURE HAS APPROPRIATED AND IS READY TO APPROPRIATE THE MONEY NEEDED FOR THIS PURPOSE

But if the Governor General really needs the aid of special assistants and advisers, the Philippine Legislature is ready to appropriate whatever amount is necessary for this purpose. As a matter of fact, at the last session—July 16-November 12, 1927—our legislature appropriated the sum of $75,000 for expenditures authorized by the Secretary of War, including the employment of technical advisers to the Philippine government, but the then Acting Governor General vetoed that appropriation, and now they come to Congress and ask you to do what we have already done, but which was frustrated by them.

May I not add in this connection that the Philippine Legislature voted this amount not because it is convinced of the necessity of providing the Governor General with assistants, because the already established agencies of our Government, as has already been shown, are sufficient aid to the Governor General in his task of administering the islands, but because they wanted to show, not only in word but in deed, their eager and sincere desire to cooperate. This friendly demonstration of eagerness for mutual understanding was brushed aside, and enactment by Congress of this measure, especially at this time, would seriously mar the sincere friendship and mutual cooperation which have already been demonstrated by my people to the new Governor General, and which, I am sure, it is the desire of both peoples to continue to grow rather than diminish.

May I not make the further observation that insistence of the passage of this bill has all the earmarks of a deliberate attempt to discredit the Philippine Legislature—to make it appear that it will not appropriate funds for services "badly needed" by the Philippine government, and therefore Congress has had to be called upon to do it. This may not be the real intent, but opponents of the Filipino people will surely make use of such intervention as this on the part of Congress, in matters of purely insular appropriation, to show why independence is altogether out of the question, and even local autonomy not to be thought of for generations to come. After the evidences given by my people of their very deep and enthusiastic interest in fostering education, sanitation, roads, agriculture, etc., it is, to say the least, and to use the mildest language, unfair to make them now appear as indifferent to, or unmindful of, these things.

SPECIFIC REASONS AGAINST S. 2787

Let me now consider the question of depriving the Philippine Senate of the power to confirm appointments of governors for the non-Christian population of the Philippines made by the Chief Executive. The mere enunciation of this idea ought to be repugnant to every Senator of the United States especially and to every American generally, for it destroys the principle of checks and balances upon which American democracy rests.

It is asserted that the Philippine Senate has not confirmed every appointment made by the Governor General. We have no apologies to make for this, for in every case that the senate has disapproved an appointment there has been sufficient reason, under our oath to perform conscientiously our constitutional duties, to disapprove the appointment. As regards the appointments rejected by the Philippine Senate, may I say that if they are compared with appointments made by the President of the United States and disapproved by the United States Senate, it will be found that the Philippine Senate has disapproved a less number of appointments than the United States Senate. This is true, even in the cases where the President and the majority of the Senate have been of the same political faith, to say nothing of the cases where they have not. Yet the President and the Senators are all Americans and answerable to the same authority, the American people; while in the Philippines, the Governor General is American, responsible to the President, and the senators are Filipinos, accountable to their own people.

ALL APPOINTMENTS OF AMERICANS AS GOVERNORS CONFIRMED BY PHILIPPINE SENATE

With reference, however, to appointments by the Governor General of Americans as governors of the non-Christian population of the Philippines, the Philippine Senate has confirmed every such appointment. The so-called non-Christian Provinces in the Philippine Islands are: The Mountain Province, the Province of Jolo; the Province of Lanao; the Province of Cotabato, and the Province of Bukidnon. The governors of the Mountain Province, Jolo, and Lanao are all Americans, and they have all been confirmed by the senate.

The only appointment made by the Governor General, of an American governor, which the Philippine Senate absolutely refused to confirm, was that of Governor Johnson of Lanao—a man plainly lacking the ability to perform the duties of the office. His successor, however, also an American, was confirmed by the senate.

The proponents of this bill argue that governors for the Provinces inhabited by non-Christian Filipinos should not be confirmed by the Philippine Senate is based, I presume, upon the alleged enmity existing between the Christian and Mohammedan Filipinos, or Moros. Americans who have been in Mindanao know that no such enmity exists; that this talk is a part of the old, persistent propaganda which aims at two unworthy objects to divide the Christian and non-Christian Filipinos (divide and rule), and to keep the island of Mindanao segregated from the rest of the archipelago, so that this island, where the best rubber lands are to be found, may be exploited by capitalists, men, of course Americans, who believe in good faith that such enmity exists.

COMMUNITY OF RACE AND INTERESTS LINK CHRISTIAN FILIPINOS AND MOROS

Sponsors of the measure declare that the Moros, or Mohammedan Filipinos, hate their Christian fellow countrymen because of their difference in religion. In the same breath they say that these same Moros prefer Americans, forgetting, apparently, that Americans are also Christians. They talk of fights that have taken place in the past between the Moros and the Christian Filipinos. That was a hundred years ago, when piracy was still practiced by some Moros.

But how about the war waged by the American Army against the Moros, during which thousands and thousands of Moros, at times including women and children, have been killed, as was the case when General Wood made an attack upon Mount Daho, in Jolo? Any sensible man can see that there is absolutely no reason why the Moro should prefer an American to a Christian Filipino, for, in the latter case, there is at least community of race, and, in some cases, of language, because the dialect spoken by the Moro is also spoken by the many Filipinos living in the southern islands.

THE PHILIPPINE LEGISLATURE HAS DONE AND IS DOING EVERYTHING FOR MOROS

The interest of the Philippine Legislature in the Moros and other non-Christian Filipinos has been demonstrated time and again by the fact that it has appropriated more money for education, sanitation, roads, and other public improvements for these people, than the former Philippine Commission ever did.

As a matter of fact, it was not until the Filipinos were permitted the highest degree of autonomy during the Harrison administration that a policy was adopted designed to bring about mutual assimilation, amity and friendship between Christian Filipinos and Moros. As a first step to the realization of that policy the military régime in Mindanao and Sulu was at once substituted with civil rule. No talk of strife, feud, or traditional hatred was indulged in. On the other hand, the spirit of friendship and amity was emphasized, as it should be. Soon after the inauguration of this policy the Moros became amenable to peace and order and a flourishing period of mutual friendship and assimilation ensued. Their leaders themselves were clamoring for public schools and other such blessings which the new order was more than ready to extend to them.

I desire to emphasize that it was not until 1914, during the period of Filipino autonomy under Governor General Harrison, that the first appropriation amounting to ₱294,523 (in dollars, half this amount), and later another appropriation of ₱1,000,000 for primary schools, followed later by other appropriations, were made. By 1919 there were 32,438 pupils in the public schools of Mindanao and Sulu. So successful was this policy of bringing the two peoples into brotherly relationship that when America entered the World War in 1917 it was not considered dangerous to withdraw not only the American soldiers stationed there but also the Philippine Scout garrisons with the exception of one battalion stationed at Pettit Barracks at Zamboanga.

One of the manifestations of this policy is the placing in the hands of the Moros themselves as much control of their local affairs as possible. Hundreds of them now work side by side with the Christian Filipino officials. To-day the positions of third member of the provincial board in the Moro Provinces of Lanao, Cotabato, and Sulu are occupied by Moros. The number of non-Christian Filipinos employed in lesser positions in the provincial, municipal, and municipal district governments have increased from year to year.

PASSAGE OF THESE BILLS WILL MAR FRIENDLY RELATIONS NOW EXISTING BETWEEN AMERICA AND THE PHILIPPINES

It would be most unfortunate and unjust if Congress should enact those measures. It is disappointing enough to the Filipino people not to have achieved their independence after 30 years of American occupation, when it was promised them from the very first day of your arrival in the islands. It is still more disappointing that, after these 30 years, they are not even allowed to manage their own domestic affairs, when the Cuban people, who had as much or less preparation for self-government as the Filipinos, are now enjoying their independence and listening to speeches by President Coolidge regarding equal rights of small and big nations, and how much better it is "for the people to make their own mistakes than to have some one else make their mistakes for them." What, then, would be the feeling

of the Filipino people if they were to see their present limited powers of government still further reduced?

May I not repeat that the enactment of these bills will have serious effect upon the friendly relations already existing between the new administration in the Philippines and the Filipino people which, I am sure, it is the desire of both peoples to enhance rather than diminish.

POTTENGER SANATORIUM,
Monrovia, Calif.

[From the Washington News, April 26, 1928]

GIVE THE FILIPINOS A CHANCE

A measure calculated to do lasting injury to the relations between the Philippines and the United States is about to come up on the floor of the Senate.

At present taxes amounting to approximately $700,000 a year are collected on goods entering the United States from the Philippines, the money going intact to the general government of the islands to be expended as it sees fit.

Various pending measures in Congress would change this. One bill would turn the entire amount over to the United States Treasury and give the spending authority to Congress. A second would let the Governor General direct the spending. A third—and this is the bill soon to come before the Senate—would turn the money over to the Philippine government as usual, but with a string tied to $125,000 a year to be used by the Governor General to pay civilian assistants.

To any such measure Filipino leaders object. Not that they oppose the Governor General being allowed $125,000 a year for this purpose, for they specifically do not. In fact, they claim they stand ready to vote that amount out of the funds at any time. They say they would even make the expenditure a permanent item in their budget if so desired. Nor, they contend, do they ask that the Governor General submit his appointments under this measure to the Philippine Legislature for ratification. Their opposition has nothing to do with any of these things, it seems, but with something both more important and less important than any of them, namely, their national pride.

If the United States wishes to take all of this money away from the Philippines, Manuel Quezon, president of the Philippine Senate, explains, he would not object. That is the United States privilege. But he does object to Congress withdrawing from the insular legislature a function previously granted and which it now enjoys. To do so, he urges, would constitute an unwarranted reflection and create trouble at a rather critical moment in Philippine-American relations.

For two or three years the Philippine Islands have suffered a decided stagnation due to friction between the Governor General and the island legislature. But when Colonel Stimson was appointed in the place of the late Governor General Wood he was accorded a hearty welcome on landing at Manila.

"If given a chance," Senator Quezon remarked at the time, "I think we are going to get along very well with the new Governor General. And I think we ought to be given the chance."

And so they should. National pride is a stupendous force, and it is always dangerous to overlook it in matters of this kind. To Congress it may seem a trivial thing how the money is appropriated just so it is appropriated, but to the Filipinos there is nothing trivial about it. To take the privilege out of their hands would be considered a slur which would engender much ill will at a time when friendly cooperation is vastly to everybody's interest. So it is to be hoped that Congress will weigh these things well before the roll call on the measure.

[From The Baltimore Sun, May 16, 1928]

AN INDEFENSIBLE INVASION

Since the passage of the Jones act, which in 1916 gave to the Philippines an organic law and charter of limited self-government, Congress has taken no step to restrict the degree of autonomy granted to our great Asiatic possession. Plenty of bills with this intention have been introduced, but they have always died in committee. Up to the present no attempt to reverse our settled policy of Filipino home rule has had a chance of passage.

But there has now been favorably reported to both House and Senate, and is at any day due for a vote by the latter body, legislation which would have far-reaching effect in curtailing the liberties which have been granted to the Filipino people. This is the Kiess-Willis bill "providing for the employment of certain civilian assistants in the office of the Governor General of the Philippine Islands and fixing salaries of certain officials."

From the standpoint of economy the provisions for large salary increases to the Governor General and other American officials in Manila are objectionable. It is absurd that the insular auditor, who looks over a budget of some $40,000,000, should receive a salary half as much again as that allowed the Comptroller General of the United States. But the section of the proposed legislation which is really intolerable is that which would amend the Jones law so as to give the Governor General an annual appropriation of $125,000, unsupervised by any legislative body, for the employment of an indefinite number of assistants and advisers.

Relative to the size of the national budget this would be comparable to giving the President of the United States an annual purse of some $9,000,000 with which to make appointments unregulated by control of any kind. And the Governor General of the Philippines is of a race alien to those he rules, and holds office by appointment from a distant capital. The proposal outrages the very essence of the system of democracy, which is that control of the executive purse strings should rest with the elected representatives of the governed people.

In resisting the firm establishment of this basic principle King Charles of England lost his head nearly 400 years ago. The same issue was one of the actuating causes of the American Revolution. Yet in the year 1928 it is seriously proposed that the Filipino people, who have for 12 years controlled their national budget successfully, shall lose this fundamental asset of self-government. The case against the Kiess-Willis bill becomes even stronger when it is realized that the Philippine Legislature has itself offered the appropriation of such moneys as the Governor General may need for expert advisers. At the last session a bill to this end was passed, to be vetoed for unexplained reasons by the Acting Governor General.

The money involved in the proposed appropriation would be taken out of duties on Philippine products entering this country, heretofore remitted to the Philippine Legislature. It would be proper for Congress to refuse to return this money to the islands, if it sees fit. But to turn over any portion of it as a private purse at the free and unhampered disposal of the American Governor General would be perversion of our national traditions.

[From the Sunday Star, Washington, D. C., May 20, 1928]

LEGISLATION ENDANGERS ISLAND AMITY, IS CLAIM—PHILIPPINE MEASURES IN CONGRESS MAY HANDICAP STIMSON, WHO HAS PROMOTED FRIENDSHIP, IT IS DECLARED

[NOTE.—The following discussion of the Philippines' view of pending congressional legislation affecting the islands' future presents an interesting viewpoint, and is published that further light may be shed on all phases of the island situation.]

By V. G. Bunuan, of the Philippine Commission of Independence

Never since the passage in 1916 of the Philippine organic act, commonly known as the Jones law, has there been so much activity in the Congress of the United States regarding the Philippines. But the American people are practically uninformed of what is transpiring in the Halls of Congress which affects the hate of 12,000,000 people inhabiting America's largest island possessions. It is to the interest of the American people, as well as it is to the Filipino, that they become better acquainted with the Philippines, especially at this juncture, when a new era of good will and mutual friendship has come about with the inauguration of Governor General Stimson as the new executive of the Philippine Archipelago.

There are about half a dozen bills now pending in Congress that concern the Philippine Islands, some, from the Filipino point of view, favorable, and some unfavorable to the Filipino people. The most important of these are the Brigham-Wainwright resolution authorizing a committee of Congress to make biennial visits to the Philippines; the Willis and Kiess bills curtailing the power of the Philippine Legislature to appropriate and the right of the Philippine Senate to confirm appointments; and the Timberlake resolution limiting the exportation of sugar to 500,000 long tons. All these bills, it may be said, are motivated by the sincere purpose of enhancing the welfare of the Filipino, and if some of them are objected to by the Filipino people it is because they are believed not conducive to the realization of such a purpose and of the permanence of the cordial relations inaugurated by the Stimson administration.

BRIGHAM-WAINWRIGHT RESOLUTION

The bill that has the approval of the Filipino people is the Brigham-Wainwright resolution providing for a biennial visit to the Philippines of a committee of Congress for the purpose of gathering information concerning the actual state of the government of the Philippine Islands and the economic and social condition of the Filipino people. Such a visit can not but be productive of good, for the greater the contact the closer the understanding between the two peoples. One of the saddest features of American-Filipino relations is the utter lack of knowledge on the part of the great mass of the American people regarding the Philippines. And Congress, which has the fate of 12,000,000 people in the hollow of its hands, is itself none too fully informed of Philippine affairs. One can readily see, therefore, why this bill should be enacted into law.

One of the measures to which the Filipinos are opposed is the Willis and Kiess bill, now on the floor of the Senate, one of the provisions of which would grant the Governor General of the Philippines authority to expend, without necessity of further appropriation by the Philippine Legislature, the sum of $125,000 for the employment of advisers and

assistants to his office, the money to be taken from internal-revenue collections in the United States levied on goods coming to this country from the Philippines, all of which collections are now turned over to the Philippine treasury for general appropriation by the Philippine Legislature.

SEE VIOLATION OF PLEDGE

Philippine opposition is not prompted by a lack of desire to furnish the Governor General with the necessary aid for the performance of his duties, as will be shown later. The Filipinos are opposed to it because it is a violation of America's pledge granting the Filipino people ever-increasing measures of self-government, with independence as its final goal, and because it is a violation of the underlying principles of democracy upon which this Nation is founded. That it is a violation of this policy is clear, because the bill prevents the Philippine Legislature appropriating the fund which it seeks to give to the Governor General directly. That it is a violation of the principles of democracy is also clear, because control of the purse strings of the Nation should rest with the law-making body and not with the executive, which in the case of the Philippines is not even elective.

And America would be forcing upon another people, if this bill became a law, that which the American people themselves would not attempt to do in their own country, for public opinion would not countenance an act, and Congress will not sanction it, which would place in the hands of the President of the United States any amount of money without appropriation first by Congress. The sum of $125,000 is approximately one-third of 1 per cent of the total expenditures of the central government of the Philippines, taking such expenditures to be $40,000,000, in round numbers. If the President of the United States were given a discretionary fund equivalent to one-third of 1 per cent of the expenditures of the Federal Government, estimating such expenditures to be $3,000,000,000 a year, he would have at his disposal, following the theory of this bill, $10,000,000.

WHERE THE MONEY GOES

The money which Congress is asked to give directly to the Governor General is for the employment of advisers and assistants to his office, who would act as his "eyes" and "ears" to detect the work of the administrative departments and offices over which, by our organic act and by laws passed by the Philippine Legislature, he has supervision and control. The power of supervision and control over all executive departments is vested in the President of the United States by the Constitution, but he has never felt the necessity of having "eyes" and "ears" to detect the work of these departments. Even if such help were necessary, he would never be permitted to have it, because there would then be established here a government based upon suspicion rather than upon confidence, which is the most important element in dealing with an alien race.

IS IT AMERICAN MONEY?

It is asserted that the fund from which the money to be given to the Governor General is American money, being as it is United States internal-revenue collections levied on Philippine goods coming to this country. This is true but not entirely so. In 1901 the Philippine Commission, in enacting legislation to raise revenues for the Philippine government, provided, among other taxes, for an export tax on Philippine exports. In 1902 the Congress of the United States exempted Philippine products admitted free of duty and consumed in the United States from the payment of this export tax. This provision of law benefited American consumers and manufacturers. It also decreased Philippine revenues.

To offset this decrease in the income of the Philippine government the American Congress, by another provision of the same act, directed that the internal-revenue taxes collected on Philippine products in the United States should be turned over to the Philippine treasury. The Underwood Tariff Act of 1913 abolished altogether the tax imposed on Philippine exports by the act of the Philippine Commission, and by the Philippine autonomy act of 1916 the imposition of any export tax by the Philippine Legislature is prohibited. Thus, the Congress of the United States, having definitely deprived the Philippine government of its income from all export taxes in existence for many years, considered it just and wise to continue the practice of giving the Philippines the taxes collected on Philippine products in the United States.

Yet we concede that this money belongs to America, and so if Congress wishes to take back that which, for the reasons above, she has for the last 28 years remitted to the Philippine government, that is her privilege. Being American money, we would very much prefer that it is spent by and for the American people. For to receive this gift, if it is a gift, with strings tied to it in the form of a free and unhampered disposal of a portion of it by the Governor General, constitutes an offense against the finer sentiments of a people with any pride and self-respect.

As said above, our opposition to this bill is not due to lack of desire to provide the Governor General with the necessary aid to help him administer the affairs of the islands. That this desire exists is fully demonstrated by the fact that the Philippine Legislature included in the appropriation bill for 1928 an item that was to be used for the same purpose for which this bill is desired enacted into law. The then Acting Governor General vetoed the item. And now Congress is urged to make use of the supreme authority that it has over the Philippines and do what the Filipinos have done and are again ready to do, despite the fact that the Philippine Legislature, in providing the money which this bill calls for, it was not and is not now convinced of the necessity of furnishing the Governor General with assistants.

CONTENTION OF ISLANDERS

The Filipinos have always contended that the already established agencies of the Philippine government are sufficient aid to the Governor General in his task of administering the islands. The Philippine Legislature appropriated a similar amount last year, because it wanted to show, not only in word but in deed, its eager and sincere desire to cooperate. This friendly demonstration of eagerness for mutual understanding was brushed aside. And enactment by Congress of this measure, especially at this time, would mar the sincere friendship and mutual cooperation which have already been demonstrated by the Filipino people to the new Governor General, and which I am sure it is the desire of both peoples to see attain robust growth rather than wither into useless decay.

HAS MACHINERY AT DISPOSAL

The Governor General has the entire governmental machinery at his disposal, from the secretaries of the departments which compose his cabinet to the smallest executive office. As a part of our governmental mechanism we have had and we now have experts in various lines, and the Philippine Legislature has always been ready to appropriate and has in fact appropriated funds for expert advisers and assistants to the Governor General. There is right now a law which authorizes the Philippine government to make special contracts and pay special salaries to chiefs and assistant chiefs of bureaus and other employees of the Philippine government performing duties that require technical knowledge.

The directors of the bureaus of science, education, agriculture, forestry, and public works are Americans, experts in their respective lines, now engaged with several other Americans in the service of the Philippine government by appointment of the Governor General, with the advice and consent of the Philippine Senate, and are drawing salaries higher than the salaries paid to Filipino directors of bureaus under a contract authorized and an appropriation made by the Philippine Legislature. And where it has been found necessary to carry on some special technical work for the Philippine government, the legislature has made the appropriation required for this purpose. I will cite one case: Four years ago we appropriated ₱100,000 ($50,000) for the purpose of bringing to the islands a committee of expert educators to make a survey of the educational institutions of the country; and a committee did come, headed by Dr. Paul Monroe, of Columbia University, with such other distinguished educators as Dr. Stephen Duggan, and others.

RIGHT CONTENDED FOR

It will be noted from the foregoing that all we want is to be permitted to continue exercising the right of appropriating the expenses of our own Government, which American democrary itself has implanted in the Philippines, a right for which 300 years ago Charles I lost his head and to preserve which the American Revolution was fought.

The other two bills to which the Filipinos are opposed are another Willis-Kiess bill which would remove the power of the Philippine Senate to confirm appointments of governors of the non-Christian Provinces, and the Timberlake bill which would limit the amount of sugar the Philippines may export to the United States free of duty.

With regard to the first, it need only to be said that, like the other bill, it curtails Filipino autonomy, and also disrupts the system of checks and balances which is so indispensable in a democracy. To the assertion that it is more desirable to appoint Americans rather than Filipinos as governors of the non-Christian Provinces of the Philippines it may be said that there have been just as good and efficient Filipino governors that have administered the affairs of these Provinces as there have been good and efficient American governors, just as there have been failures in both cases. But admitting for the sake of argument that it were true that it is more desirable to appoint American rather than Filipino governors for those Provinces, still the proposed legislation would not be justified, since the Philippine Senate has confirmed appointments made by the Governor General in favor of Americans as governors of said Provinces.

NONCHRISTIAN PROVINCES

The so-called non-Christian Provinces in the Philippine Islands are: The Mountain Province, the Province of Jolo, the Province of Lanao, the Province of Cotabato, and the Province of Bukidnon. The governors of the Mountain Province, Jolo, and Lanao are all Americans and they have all been confirmed by the Senate. The only appointment made by the Governor General of an American governor which the Philippine

Senate absolutely refused to confirm was that of Governor Johnson, of Lanao, a man plainly lacking the ability to perform the duties of the office. His successor, however, also an American, was confirmed by the Senate.

The interests of the Philippine Legislature in the Moros and other non-Christian Filipinos has been demonstrated time and again by the fact that it has appropriated more money for education, sanitation, roads, and other public improvements for these people than the former Philippine Commission ever did. As a matter of fact, it was not until the Filipinos were permitted the highest degree of autonomy during the Harrison administration that a policy was adopted designed to bring about mutual assimilation, amity, and friendship between Christian Filipinos and Moros. One of the manifestations of this policy is the placing in the hands of the Moros themselves as much control of their local affairs as possible. Hundreds of them now work side by side with the Christian Filipino officials.

With regard to the Timberlake bill, which limits sugar which we may export to the United States to 500,000 long tons, it may be stated that, inasmuch as America is holding the Philippines against the will of the Filipino people, she should, in fairness and justice to them, permit them to enjoy the unrestricted privileges of free trade which the American people now enjoy in their free-trade relationship with the Philippines. Even under the present arrangement all American goods are admitted free of duty to the Philippines, whereas not all Philippine goods are admitted free of duty in the United States.

Such is the situation of America's largest island possession, inhabited by 12,000,000 people, in the present session of the Congress of the United States. America, whose rule in the Philippines has always been guided by the most altruistic motives, will not now permit that the high regard with which she is held by the entire Filipino people be dimmed.

[From the Washington Daily News, May 19, 1928]

TWO BLOWS AT FILIPINO PRIDE

By William Philip Simms

Any day now certain Philippine bills may come to a vote before Congress, bills having an important bearing on the future of the islands.

One of the bills proposes to deduct $125,000 annually from the money which for years we have been turning over to the Philippine government for it to apportion, a bill implying a lack of confidence in that government.

Another provides for the appointment of governors of the non-Christian Provinces by the Governor General without the consent of the Philippine Senate, a slap in the face of the Christian Filipinos.

There are less than 400,000 Moros in the islands—traditionally Christian hating, as Mohammedans are everywhere. There are approximately 10,000,000 Christians. So there is no more logic in wresting the government of these backward Moros out of the hands of the advanced Filipinos at Manila than there would be in removing the American Indians from the control of Washington. Having given the Filipinos a measure of self-government, turning back the clock now would constitute an insufferable blow to their pride.

EVEN LESS EXCUSE

For the other measure there is even less excuse, if possible. The Philippine Legislature stands ready, we are told, to set aside $125,000 a year for the Governor General to hire civilian assistants, and no questions asked. In fact, the legislature has already appropriated money for this purpose, only to have the act vetoed by Acting Governor General Gilmore.

What real difference can it make to Washington whether the $125,000 comes from Peter or from Paul, just so the Governor General gets it with no strings attached? It is the same $125,000 in either case. But it does make a whale of a difference to the Filipinos because they glory in their self-government, which sentiment we, in this country, should be the first to understand and to honor.

For several years the Philippine government has been dangerously deadlocked. The American Governor General and the Filipino legislators locked horns and business in the islands has been at a standstill. Vast harm has resulted to the 12,000,000 inhabitants and to American business alike.

BRIGHTER OUTLOOK

Recently, however—since the arrival of Governor General Stimson, the late General Wood's successor—the outlook has brightened. Filipino leaders have gone out of their way to cooperate with the new régime in the belief that good will on their part would be reciprocated.

Congress must not return ill will for good. The first test is at hand. We may, or may not, quite understand all their anxiety, but the fact remains that the Filipinos would interpret the passage of these bills as an intentional rebuke, and a lack of confidence which they do not merit.

Filipino leaders have met Governor General Stimson more than half way. Their advances must not meet with rebuff. If they are so met, then the islands are in for a return of the deadlock and further years of stagnation which have blighted them so in the past. And in their train will come increased bitterness against American rule.

HOUSE BILL AND JOINT RESOLUTION REFERRED

The following bill and joint resolution were each read twice by their titles and referred as indicated below:

H. R. 13399. An act authorizing the Baltimore Gas Engineering Corporation, a Maryland corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Kanawha River at or near Dunbar, W. Va.; to the Committee on Commerce.

H. J. Res. 318. Joint resolution amending the joint resolution entitled "Joint resolution directing the Secretary of the Interior to withhold his approval of the adjustment of the Northern Pacific land grants, and for other purposes," approved June 5, 1924 (43 Stat. 461), as amended by the joint resolution approved March 3, 1927 (44 Stat. 1405); to the Committee on Public Lands and Surveys.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House disagreed to the amendments of the Senate to the bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes; agreed to the conference requested by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. WOOD, Mr. CRAMTON, and Mr. BYRNS were appointed managers on the part of the House at the conference.

The message also announced that the House had passed without amendment the following bills of the Senate:

S. 4450. An act authorizing the Ripley Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ripley, Ohio;

S. 4456. An act granting the consent of Congress to the boards of county commissioners of the counties of Escambia and Santa Rosa, in the State of Florida, to construct, maintain, and operate a free bridge across Santa Rosa Sound in the State of Florida;

S. 4457. An act authorizing the Northwest Florida Corporation, its successors and assigns, to construct, maintain, and operate a bridge across Perdido Bay, at or near Innerarity Point in Escambia County, Fla., to the mainland of Baldwin County, Ala.;

S. 4474. An act authorizing the South Carolina and the Georgia State Highway Departments to construct, maintain, and operate a toll bridge across the Savannah River at or near Burtons Ferry, near Sylvania, Ga.; and

S. 4504. An act granting the consent of Congress to the State of Arkansas, through its State highway department, to construct, maintain, and operate a toll bridge across White River at or near Augusta, Ark.

The message further announced that the House had agreed to the amendment of the Senate to each of the following bills:

H. R. 12877. An act authorizing the Los Olmos International Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande at or near Weslaco, Tex.; and

H. R. 13383. An act to provide for a five-year construction and maintenance program for the United States Bureau of Fisheries.

The message also announced that the House had agreed to the amendments of the Senate to each of the following bills:

H. R. 9194. An act authorizing the Secretary of the Interior to acquire land and erect a monument on the site of the battle between the Sioux and Pawnee Indian Tribes in Hitchcock County, Nebr., fought in the year 1873; and

H. R. 13563. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

COMPENSATION OF CIVIL-SERVICE EMPLOYEES—CONFERENCE REPORT

Mr. BROOKHART submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6518) to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the

District of Columbia and in the field services," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 5, 6, 7, 8, 9, 14, 15, 16, 17, 24, 25, 26, 27, 28, 29, 30, 31, 35, 36, and 37.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,400 and $2,500"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,000 and $3,100"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,600 and $3,700"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,040 and $2,100"; and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,400 and $2,500"; and the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,700 and $2,800"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,000 and $3,100"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,400 and $2,500"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,700 and $2,800"; and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,000 and $3,100"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,300 and $3,400"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,600 and $3,700"; and the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,900 and $4,000"; and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,400 and $2,500"; and the Senate agree to the same.

Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,700 and $2,800"; and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,000 and $3,100"; and the Senate agree to the same.

PORTER H. DALE,
SMITH W. BROOKHART,
JOHN J. BLAINE,
KENNETH MCKELLAR,
WALTER F. GEORGE,
Managers on the part of the Senate.

FREDERICK R. LEHLBACH,
ERNEST W. GIBSON,
JOE J. MANLOVE,
EMANUEL CELLER,
Managers on the part of the House.

Mr. BROOKHART. Mr. President, I ask unanimous consent for the consideration of the report.

Mr. DILL. Mr. President, has the report been printed?

Mr. BROOKHART. I think not, any more than the ordinary report.

Mr. DILL. Is there any way in which we can find out what the changes are?

Mr. BROOKHART. Yes; I can explain the report; but if it leads to debate I promised the Senator from California [Mr. JOHNSON] that I would withdraw consideration of the report.

Mr. BORAH. I wish the Senator would withdraw it—not that I want to debate it, but I do want some features of it explained.

Mr. BROOKHART. I think in a very few minutes I can explain the changes that were made.

Mr. JOHNSON. I suggest to the Senator, then, that he have the report printed, and then in the morning it can be taken up, because if it is to lead to discussion or debate I shall object to its immediate consideration.

Mr. DALE. Mr. President, I should like to state in this connection that this conference report has to be agreed to on the part of the Senate, and then it has to go to the House for their agreement; and time is very material in the matter.

Mr. JOHNSON. Mr. President, I should be very glad to expedite matters for these gentlemen, and will do so; but I want to say, because I believe that what has been said by the Senator is actuated by the fact that some suggestion has been made that the Congress adjourn next Tuesday, that I give notice now, so far as I am concerned and so far as those who act in concert with me are concerned, that the Congress shall not adjourn on Tuesday next but shall remain in session at least sufficiently long to do the public business.

Mr. DALE. Mr. President, I should like to state to the Senator from California that I realize that he has been very considerate all the way through this matter. I agree with him in what he has just stated; and, so far as I am concerned, I will vote to stay here until we get a vote on his bill.

Mr. JOHNSON. I thank the Senator.

Mr. BROOKHART. Perhaps in a moment or two I can explain satisfactorily to the Senator from Idaho the changes that were made.

Mr. JOHNSON. If it is not going to take any appreciable time, I will not object. I reserve the right to object, however, if it becomes obvious that time is going to be consumed to any extent in the consideration of the report.

The VICE PRESIDENT. The conference report is privileged over the bill of the Senator from California.

Mr. JOHNSON. That is quite so; but is it a privileged report before printing or before it has been laid before the Senate?

Mr. BROOKHART. It was laid before the Senate a little while ago, but I did not intend to move to take it up. If I can not keep my word about passing it without debate, I will gladly withdraw it and have it printed.

Mr. DILL. Mr. President, I hold in my hand the only print I have seen, in the Washington Daily News of yesterday. I do not know whether it is correct or not. If we had available some such print as this, we could tell very quickly what this conference report means.

Mr. BROOKHART. The Senator can tell better from that reprint than he could from a print of the bill, because it tabulates it. I think that is correct. This is the only general change that was made, and it is a general change that runs through the bill:

In the House bill in about half of the grades they crowded seven steps into five, cutting off the two lower ones. The Senate added two at the top, making seven, to correspond to the old law. On all of those we were compelled to recede one-half, one step that we put on at the top. That gives everybody two steps

up in advance except the last one, who gets only one step. In the rest of the grades the House had only stepped them up one step, and we put on one step at the top. We were compelled to take off that step, so that in those grades everybody will get one step advance except the one at the top, who gets no advance.

Then, on the charwomen and the clerical-mechanical grades, the House had advanced them 5 cents an hour. We advanced them 5 cents more. We were compelled to give up those advances. I will say that I regretted that more than any other part we had to give up, because I feel that those people are underpaid. However, they all get an advance of $10 a month under the House bill.

Those are the changes.

The VICE PRESIDENT. The Chair will state that House of Representatives Report No. 1845 is the report of the conference committee.

Mr. DILL. I have a copy of that, but that is not clear unless you have before you the House and Senate bills and compare them, and that takes some time. But the question I am most concerned about—the only question I have really been concerned about in this bill—is whether or not the poorly paid employees, the low-paid employees, will all get a substantial increase.

Mr. BROOKHART. They all get a substantial increase, every one of them. They are better taken care of than the highest-paid employees in the same steps.

Mr. DILL. They get an increase; but the print I have before me shows, in the custodial service, that all of those in grade 2 get an increase of $300 a year. I want to know whether that is true or not.

Mr. BROOKHART. That is not my recollection; but I can not remember the grades right offhand.

Mr. DILL. This shows that grade 2 has every step increased $300.

Mr. BROOKHART. I shall have to say that may not be correct in that print.

Mr. DILL. What is the smallest increase that those in grade 2 are going to get, any of them?

Mr. BROOKHART. I think $120 is the smallest increase that anybody gets.

Mr. DILL. How does the committee defend an increase of $120 for these people who are getting less than $1,200 a year, when in some of these higher grades they get three or four hundred dollars' increase?

Mr. BROOKHART. I will say that I do not try to defend it. It is the best we could do in the conference. We all agree, however, that the bill as it comes back here is better than the original House bill by a considerable amount.

Mr. DILL. In grade 3, according to this printed statement, they get an increase of $300 in some and $180 in others.

Mr. BROOKHART. What service is that?

Mr. DILL. That is the custodial service. They are the extremely poorly paid employees that I am talking about.

Mr. BROOKHART. I think the Senator is right on that grade.

Mr. DILL. On grade 2 of the custodian service?

Mr. BROOKHART. Yes.

Mr. DILL. The print in the News, which I have in my hand, gives such an increase.

Mr. BROOKHART. Those are the lowest-paid employees that got the biggest increases.

Mr. DILL. The point I want to get clear is this: Does every grade get this increase or is it possible for the personnel officer to juggle some of them out?

Mr. BROOKHART. The personnel officer would have no discretion under the bill as amended. They are advanced relatively from their present positions, and there is at least one step advance for everybody except the top step in those grades where there is but one step advance. In such instances the top step gets no advance.

Mr. DILL. I am not worrying about those people who are getting three or four thousand dollars a year. The ones I am concerned about are those that are getting less than $1,200 a year.

Mr. BROOKHART. They are the best taken care of of anybody. Even the charwomen get a $10-a-month advance. I did not think that was enough, and I do not yet.

Mr. DILL. I do not, either.

I have no further objection.

The VICE PRESIDENT. Is there objection to the consideration of the conference report? The Chair hears none.

The Senate proceeded to consider the report.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

EASEMENT ACROSS CONSTITUTION ISLAND, N. Y.

Mr. FLETCHER. From the Committee on Military Affairs, I ask unanimous consent to report back favorably, without amendment, Senate bill 4466, to authorize the Secretary of War to grant to the New York Central Railroad Co., its successors or assigns, a perpetual easement extending across Constitution Island on the West Point Military Reservation, N. Y., for railroad purposes, and I submit a report (No. 1284) thereon.

Mr. COPELAND. I ask unanimous consent for the immediate consideration of the bill just reported by the Senator from Florida. It widens the railroad's right of way, and has the approval of the Secretary of War and all the officials. It is important that we should have action on it now in order that work may be begun.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized to grant and convey to the New York Central Railroad Co., a corporation organized and existing under the laws of the State of New York, and other States, its successors or assigns, a perpetual easement over and upon a parcel of land 47 feet in width extending across Constitutional Island on the West Point Military Reservation, N. Y., in such location and under such conditions as the Secretary of War may approve, in connection with the four-tracking of its main line between Garrison and Cold Spring, N. Y.: *Provided*, That the land shall not be used for other than railroad purposes, and when the property shall cease to be so used it shall revert to the United States.

SEC. 2. The Secretary of War shall cause an appraisal to be made of the right of way hereby authorized to be granted, and the appraised value as determined by the Secretary of War shall be paid by the New York Central Railroad Co., the proceeds to be deposited in the Treasury of the United States to the credit of the Military Post Construction Fund.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RAILROAD RATES ON AGRICULTURAL PRODUCTS

Mr. WHEELER. Mr. President, I send to the desk a resolution, which I ask to have read, and I ask for its immediate consideration.

The VICE PRESIDENT. The resolution will be read.

Mr. JOHNSON. I want it understood that if the resolution leads to any debate I do not consent to it. I understand from the Senator from Montana that there is no objection from any of those who are interested.

The Chief Clerk read the resolution (S. Res. 250), as follows:

Senate Resolution 250

Whereas the farming industry in the United States is in a deplorable condition, resulting in the bankruptcy of thousands of farmers; and

Whereas permanent prosperity of American industry as a whole is dependent on the prosperity of the farming industry, representing 40 per cent of our population; and

Whereas no effort to bring about prosperity for the farmer can possibly succeed which does not seek to place the farming industry on an economic parity with other industries; and

Whereas the measures for agricultural relief, supported by the leading farm organizations of the country, have been defeated by the present administration; and

Whereas tables of freight rates compiled by the Interstate Commerce Commission in response to Senate Resolution 208 dealing with the relative rates on grain in the United States and in Canada give the following table of grain rates on page 2 of their report in Document No. 107 of the Seventieth Congress, first session—

Comparison of rates on wheat from points in North Dakota and Montana to Duluth with rates for like distances from points in western Canada to Fort William, Ontario

From—	To—	Miles	Rate
Fargo, N. Dak	Duluth, Minn	252	16.5
Devils Lake, N. Dak	do	384	19.5
Lydiatt, Manitoba	Fort William, Ontario	389	14
Bismarck, N. Dak	Duluth, Minn	446	23.5
Meadows, Manitoba	Fort William, Ontario	442	15
Glasgow, Mont	Duluth, Minn	779	35
Regina, Saskatchewan	Fort William, Ontario	776	20
Billings, Mont	Duluth, Minn	893	39.5
Morse, Saskatchewan	Fort William, Ontario	892	22
Bozeman, Mont	Duluth, Minn	1,033	42
Estuary, Saskatchewan	Fort William, Ontario	1,036	24

Comparison of rates on wheat from points in North Dakota and Montana to Duluth with rates for like distances from points in western Canada to Fort William, Ontario—Continued

From—	To—	Miles	Rate
Havre, Mont	Duluth, Minn	932	39.5
Cantuar, Saskatchewan	Fort William, Ontario	941	23
Helena, Mont	Duluth, Minn	1,131	44.5
Grassy Lake, Alberta	Fort William, Ontario	1,125	25
Kalispell, Mont	Duluth, Minn	1,195	48
Lethbridge, Alberta	Fort William, Ontario	1,177	25

And

Whereas according to this table the freight rates from Montana points to Duluth, Minn., average 18 cents per hundred pounds higher than the rates from corresponding Canadian shipping points; and

Whereas such difference in freight rates places the farmers of Montana at a disadvantage of 10 cents per bushel in competing with Canadian farmers; and

Whereas on Montana 1927 wheat crop of 79,702,000 bushels this differential in freight rates amounts to the sum of $7,970,200:

Resolved, That the Interstate Commerce Commission is requested (1) to make an investigation with a view of ascertaining whether rates similar to the Canadian rate on grain, livestock, and other agricultural products in the Northwest would be compensatory to American railroads operating in that territory, and, (2) if upon such investigation the rates similar to the Canadian rates are found to be compensatory, that the commission reduce said rates in the Northwest on said agricultural products so that the American farmer will be put on an equality with the Canadian farmer in this respect, and (3) to report to the Senate at the beginning of the next regular session of the Seventieth Congress the results of such investigation and any action of the commission in pursuance thereof.

Mr. WHEELER. This is one way to materially help the farmers of the Northwest. As pointed out in the resolution, the wheat farmers of Montana alone paid nearly $8,000,000 more in freight rates on their wheat crop in 1927 than they would have paid had they lived in Canada.

I have not the exact figures in reference to rates on other farm products, but my understanding is that they are lower than our rates, thereby giving the Canadian farmer a great advantage over the stockmen and grain farmers of our country.

The railroads of this country, in their present prosperous condition can, in my judgment, well afford to place the farmers of the Northwest on an equality with reference to freight rates with the farmers of Canada. They should do this voluntarily, and if they will not do it voluntarily, then the Interstate Commerce Commission should see that it is done.

Mr. WATSON. Mr. President, so far as the investigation of the freight rates on farm products is concerned, I shall not object, but I do very seriously object to the whereases of the resolution, and ask the Senator from Montana whether or not he will not consent to their elimination.

Mr. WHEELER. I will consent that they be eliminated.

Mr. WATSON. Then I have no objection to the resolution.

The resolution was agreed to, as modified.

FARM RELIEF—VETO MESSAGE

Mr. McNARY. Mr. President, I ask that the Chair lay before the Senate the veto of the President of the bill (S. 3555), to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce.

The VICE PRESIDENT. The Chair lays before the Senate the veto message of the President.

Mr. McNARY. I further ask unanimous consent that an additional reading of the message be dispensed with.

The VICE PRESIDENT. The message has already been read. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding?

Mr. McNARY. Mr. President, the Members of this body are weary and worn from an all-night session, and it is not my purpose to occupy more than a moment of time of the Senate.

In my judgment, the message of disapproval of the President sets forth no new reasons, it makes no additional discoveries, it presents no argument not heretofore made; indeed, it is bottomed upon misunderstandings which have always been the weapon of those who oppose legislation of this character.

I exceedingly regret the action of the President on account of the very earnest desire of the membership of Congress favorably to report and to enact some legislation that Congress thought would be beneficial to the farmers in their depressed condition. At this late hour it does not seem possible that any legislation can be had of this nature, or legislation of any kind that will tend to benefit agriculture.

About all that is left for the Senate to do is to vote upon the veto message. It is my hope that the Members of this body voting in the affirmative will be sufficient in numbers to override the veto. I have no illusions in that respect, but many of the Members of the Senate with whom I have discussed the matter, who have been strict adherents of farm relief, have expressed the desire they may exhaust every opportunity to bring about a situation better for the producers of the country.

With these observations and expressing the hope that no unusual delay will follow the request I have made, I submit the matter to the consideration of the Senate.

Mr. EDGE. Mr. President, does the Senator take the position that this bill, with the so-termed equalization fee eliminated, would not be of any benefit to the farmer?

Mr. McNARY. In the statements I have made here in the way of arguments and presentations of the matter, I have said I thought in some instances, and perhaps in some fashion, and possibly in a small way, the bill without the equalization fee would be of benefit. I may say, without divulging any secret, that when I was advised at the White House that a veto would follow the action of this body and the House, I said to the President that I would do what I could to bring back and pass through this body legislation of the character and type suggested by the Senator from New Jersey, but by the action of the veto it seems the President has even foreclosed that avenue, which might have benefited somewhat the farmers.

Mr. ROBINSON of Arkansas. Mr. President, I am pleased with the proposal that the Senate take this vote. We have come now to a real test of the strength of the farm-relief measure, familiarly known during the last few years as the McNary-Haugen bill.

It will be recalled that in a previous session of Congress a measure very similar to that now under consideration was passed by both houses, and vetoed by the President. The grounds upon which the adverse action was taken by the Executive were fully set forth in his message to the Congress. Every Senator and every Representative for that matter, fully understood the attitude and action of the Executive and by voting again to pass the bill implied readiness to overrule the veto. Throughout the period that has followed the war, agitation respecting the subject of farm relief has continued, and still goes on. From time to time measures have been presented, some have passed one House and failed in the other, this measure having repeatedly received favor in both Houses of the Congress.

Some Senators may remember that when the McNary-Haugen bill was first under consideration here, I suggested that a substantial, practical, and adequate measure of relief could be obtained through a modification of the tariff. A plan known as the export debenture plan was presented, voted upon by the Senate, it received favor, but was defeated. A prolonged study of the subject relating to agricultural conditions prevailing in America was made by a joint commission of the Congress just following the war period. It revealed in a report to the Congress an alarming state of depression in the farming business throughout the country.

There appears to be no doubt of the existence of necessity for legislative action. So far as I am advised, no student of the subject has disputed that conclusion. A singular and amazing spectacle is presented, namely, that everyone professing to have knowledge of the issue avowing the necessity for legislation, no substantial measure of relief has been enacted, and this session of the Congress is proceeding to adjourn with the basic industry of the Nation still going down, and reflecting its adversity into every other industry and business of our people.

The President and his Secretary of Commerce have defined a policy respecting the subject of the disposition of surplus agricultural products. Secretary Hoover, in repeated addresses, and in numerous magazine articles, has asserted that the correct way, the sound way, in which to cure existing evils, is to limit agricultural production to the demands of home markets.

These declarations of the Secretary of Commerce have apparently found response in the breast and the mind of the President. Their theory is that the great industry of agriculture should limit its resources and its activities in such a way that production shall always bear a definite relationship to home consumption, that the farmers of the Nation must never look to foreign markets for the disposition of a surplus, but must so restrict their acreage that, with the passing of the seasons, they shall have nothing to send abroad, nothing to sell to consumers in other countries.

This is to me a theory incomprehensible, particularly when it is asserted by one who champions the idea and policy of tariff for protection. Our balance of trade, according to the President

and Secretary Hoover, must be made to depend solely upon the returns from manufactured products sold abroad.

Everyone realizes that, considering the chances of flood and storm, drought and frost, a given acreage in one season will yield very much more or very much less than in another season. The policy that underlies this veto and policy means the disparagement, the doom, of the industry of agriculture.

Through all the contests, disputes, and legislative conflicts which have occurred about the subject during the last 10 years, only a single measure has survived, and that measure is the bill now before the Senate. It marks a radical departure from the present system for disposing of surplus agricultural crops. It is, in my judgment, in many respects an experiment. It is an economic adventure, if you please. But, considering the failure of all other important measures pertaining to the subject, considering the fact that it alone has risen to the surface time and time again, that it alone has survived the fierce forces of opposition which have arrayed themselves against any measure of relief for the agricultural producers of the Nation, the Congress is justified in taking the economic adventure involved in this measure.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point an editorial appearing in the New York World under date of Friday, May 25, 1928, entitled "Free trade for the farmer."

The VICE PRESIDENT. Without objection, it is so ordered.

The editorial is as follows:

[From the New York World, Friday, May 25, 1928]

FREE TRADE—FOR THE FARMER

If Mr. Coolidge had attempted less in his veto of the McNary-Haugen bill, he would have accomplished much more. But he tried to prove so much that he has laid himself wide open to the charge that his whole attitude is controlled by a powerful unconscious prejudice against the agricultural interest.

Had he been content to argue that the McNary-Haugen bill as written is unworkable in practice, his position would have been impregnable. Those sections of his message which describe the immense political and bureaucratic difficulties of operating this measure were all the justification he needed for vetoing it. There is no way of answering them except to argue that the officialdom which the bill proposes to set up would be wise, competent, and disinterested beyond any officialdom of which this country has any experience.

Mr. Coolidge should have rested on that. But he did not. He set out to prove that the bill is not only unworkable in practice but that it is unsound in its underlying principle. That was a bad mistake. For the underlying principle of this bill is the Republican principle of protection applied to agriculture. Here is the way Mr. Coolidge describes the bill:

"In its essentials, the objectionable plan proposed here is the stimulation of the price of agricultural commodities and products thereof by artificially controlling the surpluses, so that there will be an apparent scarcity on the market."

How does this "objectionable plan" differ in principle from the protective tariff? The McNary-Haugen people say the farmers produce so much wheat and corn and cotton, etc., that they can not get a good price for their products; therefore let the Government arrange to buy a big enough part of the crop to insure a good price to the farmer, and then let it get rid of the surplus which it has bought by selling it to the foreigner at any price it can get. Now, what is the principle of the protective tariff? It is to tax goods coming from abroad so as to limit their quantity, and thus keep the price obtained by American manufacturers high in the American market. The purpose of the two schemes is identical: they both aim to keep prices high at home by artificial governmental interference. The McNary-Haugen bill aims to do this for agriculture by dumping a surplus abroad. The Fordney-McCumber Act does it for industry by stopping the dumping of a surplus from abroad.

To argue that the one is "American" in principle and the other "repugnant to the spirit of our institutions" is sheer prejudice. To say that the McNary-Haugen bill "naïvely implies that the law of supply and demand can be legislatively distorted in the farmer's favor" is a poor argument indeed in the mouth of a high-tariff Republican. For what in the name of common sense is the tariff except an interference with the law of supply and demand? Would any one want a tariff if it didn't interfere with the law of supply and demand? What does a manufacturer mean when he asks for a tariff? He means that he wants to limit the supply that comes from Europe in order to get the full benefit for himself of the American consumers' demand. Interfering with the law of supply and demand is the essence of protection. That is all that protection is. That is the only reason anybody asks for it. That is the only reason it is profitable. It raises prices at home. That is why domestic manufacturers clamor for it. It creates an artificial scarcity. That is why they like it.

"Naïve!" Mr. Coolidge shouldn't have used that word to the farmers. Nothing could be more naïve than for a high protectionist to exclaim in horror at a proposal to interfere with the law of supply and demand by creating an artificial scarcity to raise domestic prices.

The arguments which Mr. Coolidge uses against the McNary-Haugen bill are the arguments of a free trader. But Mr. Coolidge is no free trader. No; that is not quite accurate. Mr. Coolidge is a free trader for the farmer and a high protectionist for the manufacturer. He has one set of principles for the manufacturer and a diametrically opposite set of principles for the farmer. That is not so inconsistent, however, as it seems. Mr. Coolidge and his administration, including Mr. Mellon and Mr. Hoover, are wholly responsive to the claims of industry. That is their whole horizon. They believe in the artificial stimulation by governmental interference of the price of what the manufacturer sells. And they believe in no artificial stimulation of the price of that which the manufacturer buys. He buys labor. He buys raw materials. Through his pay roll he buys food. In everything that the manufacturer buys Mr. Coolidge, Mr. Mellon, and Mr. Hoover want a free market with no artificial scarcity and no artificial stimulation. They are not consistent with the principles they profess. But they are wholly consistent with the material interests of the group they represent. Their principles are merely ways of pushing these interests.

The McNary-Haugen bill, in spite of its practical defects, presents the country with a very genuine choice. Either the governmental privileges which industry enjoys must be leveled down to create some kind of parity between agriculture and industry, or equivalent privileges must be extended to agriculture. A consistent protectionist, not blinded as Mr. Coolidge is by class interest, might object to the McNary-Haugen bill as practically unworkable, but he can not object to it in principle. And so, if he believes in protection, he ought to devote his energy to finding a workable way of doing what the McNary-Haugen bill attempts to do. But Mr. Coolidge does not want to extend the protective principle to agriculture. He wants free trade for the farmer. Well, if he wants free trade for the farmer, he ought to be willing to consider at least a little freer trade for the manufacturer.

Mr. LOCHER. Mr. President this bill—the McNary-Haugen equalization farm bill—was passed by the Senate a few days before I became a Member of this body. Later, it was passed by the House in a modified form. Still later, the differences were reconciled by the conferees, and a few days ago the President returned the bill to the Senate without his approval.

In 1924 both the Republican Party and the Democratic Party solemnly promised legislation to equalize agriculture with other industries. The Democratic Party promised—

to restore the farmer again to economic equality with other industrialists.

The Republican Party in national convention assembled pledged itself and its candidates, and declared in its platform—

in dealing with agriculture the Republican Party recognizes that we are faced with a fundamental national problem, and that the prosperity and welfare of the Nation as a whole is dependent upon the prosperity and welfare of our agricultural population. We recognize that agricultural activities are still struggling with adverse conditions that have brought deep distress. We pledge the party to take whatever steps are necessary to bring back a balanced condition between agriculture, industry, and labor.

In spite of the fact that it has controlled two Congresses elected since the pledge was made it has done nothing substantial to make the promise good.

A year ago the Congress passed a bill which was not approved by the President. This year a bill containing in a large measure the same provisions was passed and again was not approved by the President.

Apparently everybody except Congress knew that it would not be approved. The farmer has had many rebuffs in recent years, and the program seems to be to again pass the issue along to be legislated on by a new Congress.

The President in his messages and the Congress by its action for several years have recognized the necessity for farm equalization.

The farmer sells his products in a world market and buys what he needs in an artificially created and protected market. Most of his products sell at a low price, and for everything he buys he pays a high price. He pays the freight on everything he sells and on everything he buys. The result is that the farmer's dollar is not a 100-cent dollar.

Agriculture is our largest basic industry. One-third of our population is dependent upon agriculture for a living, but secures less than one-eighth of the income of the Nation.

Three million people have left the farm and gone to the cities from 1920 to 1927 and increased the army of the unemployed there.

Farm assets have declined many billions of dollars during the last six years. Hundreds of thousands of farmers during the past few years have lost their all through foreclosure or voluntary surrender.

In my own State the banks in the cities are in liquid condition and have ample funds, but when deposits are large it

does not necessarily mean that business is good, but does indicate that business has been good and that industry is not absorbing the money.

The banks in the towns and small cities dependent upon agriculture are frozen with farm assets. Nearly every bank owns from one to a half dozen farms. In the period of 10 years preceding December 1, 1926, the number of banks closed was an average of less than one and one-half per year. From December 1, 1926, to December 31, 1927, 19 State and national banks were closed in Ohio, ranging in resources from approximately $200,000 to $3,000,000 each. The State and national banking departments are nursing some 50 banks in my State this very day.

I know of an insurance company that does business in Ohio that for many years has invested some of its surplus funds in farm mortgages. This company now owns 1,800 farms. I know of another insurance company that has disposed of farm lands acquired by foreclosure and voluntary surrender during the year ending March 1, 1928, at a loss of more than $700,000.

Many bills are pending in the Congress seeking to solve the unemployment problem in the industrial centers. Only a few days ago the Senate passed a resolution authorizing the appointment of a committee of the Senate to investigate and study the unemployment problem in this country. The agricultural depression has become evident in the industrial centers and the cities.

When the purchasing power of the farmer continues to decline, industrial centers can not prosper for long periods of time. The result of depreciation and deflation of agriculture sooner or later means business depression in the industrial centers and cities, because of the large number of farmers and of their purchasing power.

The American Federation of Labor recently estimated that 5,000,000 men are in involuntary idleness—able, ready, and willing to work, but can not find employment. The Government does not owe the citizen a living, but it does owe men a right to earn a living.

The complaints of business men are heard on all sides.

All this is the inevitable outcome of the bad conditions continuing for a period of years among the farmers.

The farm problem is as vital, if not more so, to the industrial centers and the cities as it is to the farmer himself.

The Census Bureau reports that the farmers own nearly 25 per cent of all the automobiles in this country. When the purchasing power of the farmer declines to the extent that he can not buy new automobiles, the result is that the steel mills will make that many less tons of steel, the railroads will haul that many less carloads of freight, the manufacturer will make that many less cars, the dealer will do that much less business, and all along the line that many less hours of labor will be employed.

What is true of the automobile is true of everything the farmer buys when he has money.

If the farmers of Ohio were to have a gross income (not a profit) of only $1,000 more each in 1928 than they had in 1927, it would increase the purchasing power $256,000,000 of the 256,000 farmers in my State alone, practically every dollar of which would go to the cities and industrial centers. It would enable the farmer to buy more automobiles, more farm machinery, more paint, more lumber, more clothing, more of everything that the farmer buys when he has money. The result would be more employment in industrial centers and larger pay rolls in the cities.

Every interest that knocks at the door of the Congress gets relief, except agriculture. As stated on the floor of this Senate a few days ago, "When the farmer asks for bread, you give him a stone; when he asks for fish, you give him a serpent."

The veto of the McNary-Haugen bill leaves agriculture in practically the same situation as it was when Congress assembled. There seems to be no hope of making it a law. Farm depression continues.

Congress should not adjourn without further attempts to solve the question upon which rests not only the welfare of agriculture, but the prosperity of the Nation, either by adopting the export-debenture plan advocated by the National Grange or some other plan based on a principle that can be agreed upon.

In view of the fact that everyone recognizes the situation in reference to agriculture and unemployment, adjournment of Congress is not justified until every effort has been exhausted.

Now, Mr. President, in connection with these remarks I send to the clerk's desk and ask to have read an editorial from the May issue of the Ohio State Grange Monthly entitled "The fight will go on."

The VICE PRESIDENT. Without objection, the clerk will read, as requested.

The Chief Clerk read as follows:

THE FIGHT WILL GO ON

As this is written the chief topic in Congress is farm relief—wrongly named, for it should be termed "equality for agriculture."

At this time it seems improbable that any measure will be put into effect this year. Some of the measures have taken on a semipolitical aspect, with the result that work for them or against them is being measured by the political chances of some individuals rather than by the benefit for agriculture that the sponsors of them originally hoped for.

As time goes on the grange debenture plan is gaining more and more ground, and it seems likely that eventually this will be the measure adopted to give to agriculture the same benefits that are now being given industry, labor, and capital.

Fortunately the debenture plan has been kept clear of political entanglements. It is simple of operation. Its overhead-operation cost is small. It does not necessitate the setting up of cumbersome and costly machinery to operate. It is sound and workable, as is proven by the fact that many nations have used it. There is no question as to its constitutionality. It can be quickly put into operation after it is passed.

The farmer is not asking "favors"; he is asking the same brand of treatment that is given other industries. If by legislation and tariffs they are protected, so should he be.

The efforts to secure this equality will go on.

Mr. BROOKHART. Mr. President, this morning I received the following telegram:

DES MOINES, IOWA, *May 24, 1928.*

Senator SMITH W. BROOKHART:

At a meeting of the executive committee of the Iowa Farm Bureau Federation to-day a resolution was passed deploring the veto of the McNary-Haugen bill by President Coolidge. We expect you and all other members of the Iowa delegation in Congress to use every possible means within your power to call up and pass this bill over the President's veto. The fate of agriculture as well as of the Republican Party in the Middle West depends upon this action. We again commend you for your untiring efforts in the previous passage of this bill.

CHARLES E. HEARST,
President Iowa Farm Bureau Federation.

Mr. President, I think that telegram fairly represents the farmer sentiment of the Middle West; in fact, the farmer sentiment of the United States. I think the President has made the greatest mistake of his career in the veto of the McNary-Haugen bill. The principal ground upon which he bases that veto is the unconstitutionality of the equalization-fee provision for raising money with which to finance the export corporation. Twice the Congress has passed the bill containing the equalization-fee provision; twice the Congress has expressed the opinion by its actions that the equalization fee is constitutional. The President vetoed the previous bill, and then it came before him for consideration the second time. This raised an issue between the executive and the legislative departments of the Government. Neither the President nor the Congress has the power finally to decide the question. The one tribunal in the United States that can say finally as to whether or not the provision is constitutional is the Supreme Court of the United States. In all fairness I think, therefore, the bill should have been permitted to go before the Supreme Court for the final decision of that question.

The President in his message has conceded that many of the provisions of the bill correspond with his ideas. If the Supreme Court should have sustained his view, and the equalization feature had been removed from the bill, it is provided in the bill that the remainder of its provisions shall stand. It would, perhaps, be the law if there were no such provision. Under those circumstances the President would win, and would have secured, except as to some minor criticisms contained in his message, substantially the bill for which he has stood all the time, but he has arbitrarily chosen not to permit the one tribunal that can decide this question to have that opportunity.

I admit, Mr. President, that I do not believe in the theory that the Supreme Court should have that power over the other departments of the Government. I think the action of the Congress ought to settle the constitutionality of every law. The Congress represents the people, and the people make the Constitution; but whatever I may think of that proposition, it is the holding of the Supreme Court, assented to by the other departments of the Government, that the Supreme Court shall have the final decision as to constitutionality. If the court had sustained the equalization fee, and held it to be constitutional, then the President need not have been responsible for this policy, because the Constitution gives him the power and the right to permit this bill to become a law without his signature.

I remember an historic occasion when former President Cleveland permitted a tariff bill, notwithstanding he had denounced

it in the public press, to become a law under this provision of the Constitution. The responsibility for this policy would have been upon the farmers.

The equalization fee is not proposed to be taken out of the Treasury; it is imposed upon the farmers themselves; and it would in no way have prejudiced the judgment or the responsibility of the President if it had failed.

What are the specific points which are put forth in the veto? Briefly, first, the President refers to what he calls its price-fixing fallacy. The President has supported price-fixing schemes in the transportation act, which not only fixes the rates for the railroads themselves but fixes their valuation. That law also fixes a maximum rate of earning at 5¾ per cent upon this law-fixed value. That was similar to the provision which I proposed as a substitute for this bill. I conceded that it was a defect in this bill that no maximum price based upon cost of production and a cooperative return was provided. It should have been provided, and that would have made it better. But, Mr. President, President Coolidge has supported tariff measures that have no top limit upon the price that may be fixed under the tariff rates. So that objection is not valid from his standpoint and way of reasoning in economics. He has supported price-fixing plans in the Federal reserve banking system which controls the rates of discount and finally the rates of interest. Therefore, this objection coming from the President is not a valid objection.

Next he says the tax characteristics of the equalization fee are objectionable. But, Mr. President, again he has supported tariff tax fixing delegated to himself by the Congress through the Tariff Commission of the United States, and he has proceeded to act upon that authority and has levied taxes upon people through that authority, and those actions have been sustained by the Supreme Court of the United States.

Then he says the widespread bureaucracy which it would set up is another objection to this bill.

But, Mr. President, when did the President ever criticize the bureau that controls the railroads—the Interstate Commerce Commission? When did he ever criticize the bureau that controls the tariff—the Tariff Commission? When did he ever criticize the Federal Trade Commission, which is another bureau? When did he ever criticize the Bureau of the Budget or any other of the hundreds of bureaus under the Government? He points out no specific objection to any bureau until it is a bureau for the welfare of the farmers of the United States.

Then, again, he says, "The encouragement of profiteering and wasteful distribution by middlemen is another objection." I myself criticized the bill because it provides a protection for packers and other middlemen without any regulation of their profits; but, Mr. President, when did the President of the United States ever criticize the benefits to middlemen that accrue through tariff protection and which have perhaps added $4,000,000,000 to the cost of living in the United States? When did he ever criticize the high profits imposed by a Government-controlled banking system? From his standpoint his argument in this respect again is not valid. Then he cites as another objection the stimulation of overproduction.

But, Mr. President, I say to you that the per capita production of agricultural commodities in the United States is not increasing. The surplus problem is gradually becoming less acute year by year. We can pass the Boulder Dam bill and encourage agriculture in the section where that dam may be located; we can pass every reclamation project that is advocated in the Congress of the United States and increase agricultural production in those sections; we can enact an export corporation bill and because of the better prices again stimulate production to some extent, but with all of those things the per capita production of agriculture in the United States will continue to decrease and the surplus problem will go down instead of up. Besides, a surplus of agricultural products is not only desirable for the good of the whole United States but for the whole world, in which there is never a surplus. A fair consideration of the facts does not warrant the conclusion reached by the President in this respect.

Then he cites aid to our foreign agricultural competitors as his sixth and last objection. Let me ask in what way do we expect to aid our foreign competitors? That statement shows an entire misunderstanding of the operation of the bill. It shows that the President has no conception of the real problem of handling the surplus. Let us consider cotton, the largest item in that surplus. We produce 60 per cent or more of the cotton of the world in the United States, and we produce about 65 per cent of the exportable cotton of all the world. When that great percentage of cotton goes into the foreign markets we are in control in a reasonable degree of those foreign markets, the moment we finance and properly hold the exportable surplus of cotton. If we had the capital, which the equalization fee might give if it were constitutional, to buy up and to hold every year, if we had that capital we could buy the surplus and say to the world, "It cost us so much to produce, and we want a cooperative return of 5 per cent upon our capital," and the world would pay it and in the end there need not be one cent of loss upon the handling of this great item of agricultural surplus so vital to millions of farmers of the United States.

The situation as to wheat is not much different. Anyone who has studied the wheat situation will concede that the Canadian wheat pool, organized a few years ago, has stabilized the world market price of wheat and has increased it to a considerable and a substantial extent. If we had a similar pool in the United States—which this bill, if we had an equalization fee sustained, at least, would do—the United States and Canada together would control 55 per cent or more of the exportable wheat of all the world. With that big a percentage the two of them cooperating together would have almost an equal effect upon the world market as would be had by the United States alone in the control of cotton. Those are the two great agricultural products in the United States, the two great items of exportable surplus.

It is a little more difficult to handle the exportable surplus of livestock and livestock products, because they must be processed to be preserved; but with a proper regulation of the profits and a proper control of the corporations that do those things, we could still handle those products and could still get for the farmers of the United States their cost of production and their reasonable profit upon these products.

Therefore, Mr. President, a review of these considerations in this veto message finds that they are not sound. It finds that they are not a fair and full consideration of the farm problem as it exists in the United States; and I hope the Senate and the House will pass this bill over the veto by a substantial majority.

Mr. CARAWAY. Mr. President, I do not care to discuss at length the veto message. If one should talk about the ill temper displayed in its language, its bad taste, and its intemperate charges, and then be tempted to take into consideration the statement of the President, or whoever wrote the message, that the bill was also ill considered and illogical, we might be constrained to read the two statements that appear in this veto.

The fourth reason is:

> Its encouragement to profiteering and wasteful distribution by middlemen.

That appears on page 5 of the veto message in this language:

> As was pointed out in the veto last year, it seems almost incredible that the farmers of this country are being offered this scheme of legislative relief in which the only persons who are guaranteed to benefit are the exporters, packers, millers, canners, spinners, and other processors.

Bear in mind, now, the President there says that the spinners are guaranteed prosperity in this bill. That appears in his reason 4 on page 5.

On page 8 appears this statement:

> To take another illustration, our cotton-manufacturing industry, which now has some 18,400,000 spindles in the cotton-growing States and 16,400,000 in the New England States, has been in a precarious condition for several years. Further handicaps imposed upon it by this bill might spell its ruin.

You will observe that on page 5, in reason 4, he says that this bill guarantees prosperity to the spinners. Then on page 8 he says that this bill threatens to ruin the spinners.

If that be a fair illustration of the President's process of reasoning, I am not much impressed by his veto message. If in dealing with the great questions in the bill he can solemnly assert that it guarantees the prosperity of the spinners, and in almost the next paragraph he says it will destroy the spinners, it taxes too severely our credulity to accept both of those "reasons."

I am going to do the President the justice to believe that the only thing he added to this veto message was his name. I am not going to be so unkind as to believe that the man who has been twice President of these United States could be so inconsistent as to say in one breath that this bill guarantees—does not promote, but guarantees—the prosperity of the spinner, and therefore he appeals to the farmer not to lend himself to this scheme, which guarantees prosperity to the spinner but not to him, and in almost the next sentence says to the spinner, "I will veto this measure because it threatens to destroy you."

That is not any more inconsistent than many other alleged reasons that are given for vetoing the measure. To me it is

painful, Mr. President, that a third of the population of this country—that 29,000,000 people, who toil and sweat for their living—should have the relief they have asked for and prayed for and waited for through all the years denied to them by a veto message that crosses itself at right angles within five paragraphs.

I think even a President of the United States ought to be consistent. I have no reason to offer for so believing; yet, nevertheless, one feels that a high office ought to impel its occupant, when he deals with far-reaching measures, not to offer contradictory reasons for an official act.

Here are two great classes of people; the President says to one, "This bill ruins you, but makes the other prosperous," and then turns to the other and says to the very one he said would be prosperous, "The bill ruins you." In still more striking contrast he asserts that the bill would increase the cost of living in the industrial section. If it does, it does so by making the farmer get more for the things he produces; and then he asserts the bill will stimulate overproduction and, therefore, cheapen farm products.

I submit, Mr. President, that even the Senate ought not to be required to follow such reasoning. At least our intelligence ought not to be insulted by offering reasons that are inconsistent. There is not one of you that has a 5-year-old boy who, if he could not detect these inconsistencies, would not put that boy in a school for the feeble-minded. And yet, and yet, and yet, Mr. President, as I said a minute ago, with that logic and those mental gymnastics we are asked to sustain the President in the veto message, and in doing so deny to 30,000,000 American people the redress to which they are justly entitled.

There is a bid in that message for the support of the Senators from the New England States. I should like to say this much to them:

New England at one time was prosperous because her people were a commercial people. Her commerce passed long ago. New England then was prosperous because of her industry. She farmed the Government while people in other sections farmed their farms; and New England prospered because she did farm the Government, and I am not now falling out with her about it. She had tariffs and other advantages which legislated her into prosperity; and I do not now complain of that, but here is what I want to say to her:

We people—I am talking about the southern cotton growers—who live in the cotton-growing belt of this country, from our English ancestors—because most of us are Anglo-Saxons—love the soil. We were willing to produce raw material and share the profits with our New England friends, who manufactured or processed this raw material. We did not care so much if they got more than their share of the profits. We were content to follow this occupation so long as there were any profits left to us at all. We did not begrudge them the greater share of prosperity; but New England's prosperity now depends upon her industry, and that is largely the textile industry.

This bill was defeated a year or so ago. The President vetoed it, I think, on the 5th day of February of last year. Since that time, in my own State alone, we have moved four of the large textile mills and two large paper mills from New England to my section. They employ thousands of working people. We would have been willing for you to keep them, Mr. President, if you had been willing to share your prosperity with us; but every Member of both Houses of Congress except one from the New England States voted against farm relief.

The results were that that section of the country that had heretofore produced the raw material out of which New England's prosperity was woven was compelled to go into industry and become their competitor; and this veto message of the President, if it may be relied upon, says that now in the cotton-growing belt there are more than 2,000,000 more spindles than in all of New England.

If this measure shall go down in defeat, and if the cotton growers are compelled to turn industrialists, there is not any reason why it can not be done in a State like my own, for instance, where we have an inexhaustible supply of potential water power. Why, we fuss here about Muscle Shoals and Cove Creek. We have more power in one stream, twice over, than both of those will produce. We have an Anglo-Saxon population of 1,750,000 people, who are willing to work, not affected by agitators, not whipped by propaganda. They must find some industrial field into which they can go; and if a New England President will persist in denying this relief, if New England Members of the Senate and the House shall say, "We have no concern with your prosperity or your ruin," we have no other choice than to enter into competition with them, and then the survivor will be the fitter.

We have the raw material. We grow it. We have unlimited water power. We have the Anglo-Saxon, the best workingman that the earth ever saw; and if we can not farm we can turn industrialists.

Therefore, Mr. President, if a New England President and a New England controlled Senate and a New England controlled House of Representatives say to us, who grow cotton in the Southland, who love our soil, and would be glad for our children to follow in our footsteps—if we can not follow our chosen occupation because of a New England President's desire that industry and commerce alone shall receive governmental favor, and he shall be sustained by New England Senators and New England Representatives, then, I say, an industrial war now impends.

Mr. HARRISON. Mr. President, in addition to the inconsistencies quoted by the Senator and the many other contradictions embodied in the President's message I want to quote from that message to convince anyone that either the President, if he wrote the message, did not know what he was writing about or that the fellow who wrote it and gave it to the President did not know what he was writing about. Of course, I realize and Senators must appreciate that an allowance must be made for any gentleman who has been as busy writing veto messages as has the President in the last week. I think it is said that already there have come to us in the last week a dozen veto messages. Most of them have been overridden and those that have not been should have been.

Mr. President, it is the mystery of the week as to who did write this message. It is not the President's style; it is too much adorned with a punch that the President never knew to be a product of the President. Surely it was not written by the Secretary of Commerce, because if what is rumored in the cloakrooms and around everywhere is true the President is beginning to get a little bit cold toward the Secretary and the Secretary a wee bit cold toward the President. Of course, I am not in the counsels of the Republican leaders, but we hear it from every direction that the President's friends are getting ready to kick Hoover overboard and that he himself is to be nominated. How they are going to perform that operation we are not advised, but gentlemen who are close to the President are adepts at the game and know just how to perform that operation. It is said that because of their familiarity with the play that a rehearsal will take place at 2.10 in the morning at Kansas City on the third day of the convention. The operation will be performed the next day. No doubt these suggestions that are rampant throughout the country have trickled into the ears of the Secretary of Commerce, and no wonder he is growing cold and his real friends suspicious.

Then, too, perhaps he was not consulted because he knew too much about the subject matter, and the very fact that in his message the President employed this language shows that he did not consult Secretary Hoover with reference to it. Let me read to Senators what the President said. In this message he says:

> Many of the objections urged in my former veto message apply with equal force to the present bill. No good purpose would be served, however, by repeating them in detail.

That is quite true. Then he said:

> The bill now under consideration also includes objectionable features not found in the one of the last session.
>
> The present measure would authorize the board to insure cooperative associations against price decline and require the nonmembers as well as the members to bear the cost under the so-called "nonpremium insurance."

There was in the measure formerly vetoed by the President language identical with that in the one just vetoed. Not a word was changed, not a line was altered. Yet the President says that the insurance feature in this bill which he has just vetoed was not in the old bill. How he overlooked that, why his advisers advised him that way, is beyond me. Really, it is putting the President in a pretty bad light. Of course, the distinguished future keynoter of the Republican Party, who is close to the President, and who still wants to kick Hoover overboard and nominate the President—and maybe he and his friends will be able to accomplish that purpose at Kansas City—knows why the President was misled about that proposition. But it does seem to me that in a matter that is so important as this, one whose message is going to be printed and broadcast in ever paper in the country, many of which are partisan and approve it and say, "What a wonderful message it is," at least would have taken time to compare the two bills and study the estion.

I can not understand why he did not tell the fellow whom he had asked to write the message for him, if he asked anyone,

"Now, be careful not to make a mistake. Do not put me in a bad light in the country. Do not write something in there that I can not stand for. Do not put something in there that will make the farmers dislike me more than they dislike me now." Yet this mysterious person did not take that care. Maybe the Senator from Ohio can explain it, although he looks as though he can not.

There is another clause in this message that would make you think the President was to become a candidate, that he is at last yielding to the solicitation of such friends as my good friend the senior Senator from Ohio [Mr. FESS]. He employs this language, Senator.

Mr. McKELLAR. What page?

Mr. HARRISON. This is on page 3. My other reference was to page 8. Oh! The Vice President has come into the Chamber since I made the statement, and I am prompted to repeat what I just said with reference to this message on this subject. Of course, the Vice President is not interested in who should be nominated at Kansas City. [Laughter.] It is immaterial to the Vice President whether there is a movement on foot to kick Hoover overboard and nominate the President. It is immaterial to him, if they can not nominate the President, that they should nominate the Vice President as President. [Laughter.] But just for the delectation of the Vice President, who is now in the Chair—who happened to be out of the Chamber, temporarily—the President said in this message that for the first time "the insurance features were placed in this bill, that they were not in the other bill that he vetoed." I know that statement even humiliates the Vice President for he knows that in the conferences in his room day in and day out, and night in and night out, he went over the insurance features of this bill, that he pronounced them good and sound when it was vetoed the last time and he was familiar with them this time. That just shows that the Vice President is more familiar with what is in this measure and what was in the last one than either the President or Herbert Hoover.

Now, let me read this campaign paragraph in the President's message. It sounds as if he is gradually becoming a candidate. Oh, I know that some Senators say that it is impossible for the President to have himself nominated now, that he has declared himself so clearly and to the point, "that he does not choose to run," and that under no circumstances would he permit himself now to become the nominee of his party. Yet, notwithstanding that, there are other men of sense, like my friend from Ohio who insists still, up to this day, that the President will be renominated. I have not any doubt that at this moment I look into the benign countenances of Senators on the other side who, although they are pledged now to Mr. Hoover, are planning to desert him at the first opportunity and seek refuge elsewhere.

But others have said that if he permitted them to do it, the aroused people of this country would not sanction it, that it would be such a species of hypocrisy and such gross deception that an indignant public conscience would overwhelmingly condemn it. Yet let me read this campaign provision. You will not find anything like this in the speech my friend is going to make in Kansas City, because he knows the history of the Republican Party—he knows that the Republican Party has never stood for the principle enunciated here. He knows that the record that he has made in the Senate and House, and the records made by those of his colleagues who would have the President enthroned as a king forever, show they have not voted this way. But here is what he said. Of course, the fellow who wrote this message was not familiar with the history, traditions, principles, or record of the Republican Party. Listen to this, Senators:

> Incidentally, this taxation or fee would not be for purposes of revenue in the accepted sense but would simply yield a subsidy for the special benefit of particular groups of processors and exporters.

He underscores "subsidy." I imagine when he wrote that that he came down on his table with his fist, when he used the word "subsidy." He hates the word "subsidy." He spurns the word "subsidy."

> It would be a consumption or sales tax on the vital necessities of life, regulated not by the ability of the people to pay but only by the requirements and export losses of various trading intermediaries. It would be difficult indeed to conceive of a more flagrant case of the employment of all of the coercive powers of the Government for the profit of a small number of specially privileged groups.

That is the high language of the President. Yet his party has proclaimed, and he has proclaimed from the housetops, that he favors a high tariff, that he favors subsidies; that a certain class or special group in this country must be protected. Yes, lay the taxes for a special group who do not need it, a privileged class; yes, keeping the cost of living high to the amount of $4,000,000,000 on the American consumer through the retention of the present tariff rates. The President knows his party has done that, and with his advice, consent, and connivance, and yet he inveighs in this message against the very principle that he otherwise invokes.

Yes; he must be a candidate. Well, we will see. In only a few weeks the American people will know whether the President was sincere in his former utterances or playing gross deception with his party and fellow citizens. That is all I want to say.

Mr. BARKLEY. Mr. President, I do not know that I can add anything to what has already been said about this message, but inasmuch as I expect to vote to pass this bill over it I desire to give my reasons for the vote which I shall cast.

I do not presume any man in his right mind will controvert the statement that agriculture is the one prime and indispensable activity of mankind. We may by our artificial methods and by the exercise of our inventive genius build cities and large industrial communities, but they can not flourish or prosper without the aid of a prosperous agriculture. That government is an unjust government, that government is a partial government, that seeks to build up by any artificial stimulation the prosperity of one community at the expense of another, the prosperity of one industry at the expense of another, or which is willing to give advantages to one industry or one section of our country which are not vouchsafed to other sections of this Natiton.

If agriculture is the one indispensable activity of mankind, if the toiling farmer, who bends his back under the blistering summer sun in order that we may be clothed and fed, is the one indispensable man in all the world, then it ought logically to follow that he ought to be the most independent and self-reliant man in all the world.

Yet we are confronted with the fact that he not only is not the most self-reliant and most independent, but he is the one man who has been crushed between the upper and the nether millstones. He is the one man whom all economic law and all artificial stimulation injected into industry by the laws of government have made a victim; so much so that in the last 10 years the price of everything which he is required to buy in order that he may feed and clothe the world has been more than doubled; so much so that in the last eight years the value of his property has decreased more than $17,000,000,000 in the United States of America; so much so that the value of his products has decreased more than $13,000,000,000, so that the farmers of the United States to-day are $30,000,000,000 poorer than they were eight years ago, and that $30,000,000,000 represents more than the combined value of the 250,000 miles of railroad in the United States of America according to the valuation fixed by the Interstate Commerce Commission; so much so that in the last eight years his indebtedness has increased until to-day agriculture is loaded down with an indebtedness of more than $12,000,000,000; so much so that his taxes have increased in five years from a little more than $350,000,000 to more than $900,000,000.

And yet, we are told by those who charge Congress with being guilty of sophistry and an unjustifiable fallacy, that there is, in fact, no real agricultural problem confronting the people of the United States, and that in order that we may do for the farmer what I think may be admitted has been done for industry in other sections of our population, we are guilty of inexcusable demagogy in our effort even in a faint way to find some remedy for the evils under which he suffers.

The President urges many things in this message, which I have tried to read through with some continuity of thought, and which, as I have waded through it, reminds me of the direction given by a mountaineer to a preacher who was on foot in search of an old school friend.

Late in the afternoon he was hot and tired and thirsty. Passing up a little branch bottom he saw a man chopping wood in a front yard. He stopped and asked if he knew his old friend and he said he had heard of him. He said, "I would like to find him. Can you give me directions?" "Yes; I think I can; but you have traveled so far on foot that you are tired and evidently hungry and hot. Come in and drink a little cool water and rest a while and then I will direct you on your course." He went in the house, sat down a few moments and rested, washed his face and drank a cool draft of water from an old gourd, and then came out in the yard. The owner of the house came out and said, "I will give you your directions. Follow this branch for a mile and a quarter. That will bring you to a dogwood tree. When you arrive at the dogwood tree, turn to the left at an angle of about 45° and go half a mile, and that will bring to you to a sycamore stump. When you arrive at the sycamore stump, turn around the brow of a little hill about 2¾ miles and that will bring you to a black oak tree.

When you arrive there, turn off at an angle of about 30° and go 5 miles on the top of the mountain. That will bring you to a chestnut tree. When you arrive at the chestnut tree, holler three times as loud as you can; and if he does not answer, you are lost." [Laughter.]

We have been told in this message that the bill is unconstitutional. I remember when we had up the transportation act I made a speech against it in the House of Representatives. One of the grounds of my opposition was that that part of the transportation act which provided for a recapture of a part of the excess earnings of the railroads was unconstitutional. Of course, I do not mean by that illustration to put myself against the President of the United States as a constitutional lawyer, and particularly do I desire not to put myself against the Attorney General of the United States as a constitutional lawyer; but very often Members of the Congress, Attorneys General, and the President of the United States inveigh against the laws that are about to be enacted because they are unconstitutional, and the Supreme Court comes along later and reverses our opinion as to their constitutionality or unconstitutionality.

The President has said that we are about to pass a law that is economically unsound, filled with fallacy, because we are proposing to aid the European peasants, we are proposing to ship him our products in competition with his own. In other words, he says we are to help the European farmer by competing with him; and in the next breath he says the law is unconstitutional and unwise, because it gives the board the power to levy a tariff tax upon all agricultural products that may be shipped into the United States. Because it confers that legislative power upon the board he declares it unconstitutional, while at the same time he knows and we all know that the same power has been conferred upon the Tariff Commission and upon the President of the United States himself, which he has not often refused to exercise where it meant the raising of some tariff duty for the protection of some special interests rather than the lowering of the tariff duty for the benefit of all the people of our country.

The more I have read this message, the more I have felt that it was very much like an old clock my father borrowed once from a neighbor. He kept it a week and was unable to tell the time by it. At the end of the week he carried it home. He said to his neighbor, "I have had this clock a week and I can not tell what time it is by the clock. What is the rule by which you are guided in telling the time of day?" His neighbor said, "I owe you an apology. I should have explained it to you. Whenever both hands point toward 12 and the clock strikes 2, that means it is half past 4." [Laughter.]

Mr. President, we are told that this legislation is unwise because it is experimental, because we can not project our eyes far enough into the future to be absolutely certain how it may operate upon agriculture or upon the country at large. No great movement has ever been made in the progress of the human race that was not experimental. Our lives in every day of them are experimental. Each day and night we get new experiences, but we can only guide ourselves by the light of the past.

I recall reading a speech of Patrick Henry, the same Patrick Henry whose words inspired the Continental Army when he said "Give me liberty or give me death"; and yet, after eight years of the bloodshed which brought liberty to the 13 Colonies, and the convention was called which met at Philadelphia, presided over by George Washington, submitted to the 13 Colonies the Constitution for approval, and a convention was called in the State of Virginia to pass upon it, Patrick Henry made the speech of his life, in which he condemned the Constitution of the country and predicted that if a union were formed under that Constitution all the liberties that they had won in eight years of war would be lost to the people of the United States. Yet they adopted that Constitution, and we have lived under it for a century and a half, and we have become the greatest and most powerful Nation not only that now exists but the most powerful Nation that ever existed in all the history of the human race, and we have not yet lost our liberties.

I recall that when Congress was enacting the interstate commerce act men called it socialistic, said it was an invasion of State rights, that it took away from industry the right to work out its own salvation, that it was anarchistic and socialistic, the same kind of arguments that are now made against legislation in favor of agriculture. And yet the Interstate Commerce Commission is the one great commission in the country which has justified and vindicated itself from the very day of its existence until this hour, with one or two exceptions.

Mr. President, when in 1913 we were in the process of enacting the Federal reserve act, there were men who charged that it was experimental, that it was socialistic, that it was anarchistic, that it put the Government into business, that it robbed industry of initiative, and finance of the right to work out its own destiny under rules and regulations that it might fix for itself. And yet that statute has been on the books for 15 years, and there has never been a man of any party or any faith who has had the courage or the temerity to rise in his place in either branch of Congress and advocate the repeal of the Federal reserve act.

It may be true that this bill will be experimental, but if it is experimental it will be like all the other efforts of humanity to find a way out of depression, out of darkness, out of ignorance, out of intolerable conditions on to a firmer foundation of prosperity, intelligence, and civilization; and, if now and then we may find a mistake, we will have made it honestly, and it should be our province to correct that mistake when experience has shown its existence.

Mr. President, it is a strange spectacle that in the Congress of the United States or in any executive branch of our Government we find a friendly policy for every other class of people who have asked some form of beneficial recognition at the hand of their Government, but the farmer himself, who is the foundation and the background of all our industrial prosperity, all our intellectual superiority, all our inventive genius which has given to the world 85 per cent of the things which have changed the forms of life and the habits of thought, is to be the victim of our own logic.

It reminds me of a banquet held recently in the great metropolis of New York attended by a concourse of exceedingly wealthy men who had prospered during the year. They regaled themselves at the banquet given in their own honor and in honor of their success, and just as they were about to adjourn some man rose and said, "Mr. Toastmaster, we have enjoyed an abundance of prosperity this year, and we are celebrating it on the eve of Christmas. We ought not to forget that there are millions of poor in the city of New York, and we ought to do something for them." Whereupon a very prosperous gentleman rose in his place and said, "Mr. Toastmaster, I move that we give three cheers for the poor of New York." [Laughter.]

Mr. President, I hope with all my heart that the Congress of the United States will have not only the courage but the intelligence and the vision to vote for the bill and to pass it over the President's veto, and to announce to the American people that we stand for the welfare of all classes of our people who may suffer from economic or industrial injustice. If we do this I believe prosperity and happiness will come to a grateful people.

The VICE PRESIDENT. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding? The Clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. SHEPPARD (when Mr. MAYFIELD's name was called). If my colleague, the junior Senator from Texas [Mr. MAYFIELD], who is unavoidably absent, were present, he would vote "yea." He is properly paired.

Mr. MOSES (when his name was called). On this vote I am paired with the senior Senator from Washington [Mr. JONES] and the junior Senator from Idaho [Mr. GOODING], both of whom are absent by reason of illness. If I were free to vote, I should vote "nay," and if the Senators whom I have named were present and free to vote, they would vote "yea."

Mr. TYSON (when his name was called). The Senator from Texas [Mr. MAYFIELD] and I have a pair with the junior Senator from West Virginia [Mr. GOFF]. If the junior Senator from Texas were present he would vote "yea"; if I were permitted to vote I should vote "yea," and I am informed that the junior Senator from West Virginia would vote "nay."

The roll call was concluded.

Mr. NYE. Upon this question my colleague [Mr. FRAZIER], who is unavoidably absent, and the Senator from Louisiana [Mr. RANSDELL] are paired with the Senator from Maine [Mr. GOULD]. If my colleague were present, he would vote "yea," as would the Senator from Louisiana, and the Senator from Maine, if present, would vote "nay."

Mr. McMASTER. My colleague [Mr. NORBECK] and the junior Senator from Florida [Mr. TRAMMELL] have a pair with the Senator from Delaware [Mr. DU PONT] on this question. If my colleague and the Senator from Florida were present, and permitted to vote, they would vote "yea." The Senator from Delaware, if present, would vote "nay."

Mr. BROUSSARD. I wish to announce that my colleague [Mr. RANSDELL] is unavoidably absent. I ask that this statement may stand for the day.

The roll call resulted—yeas 50, nays 31, as follows:

YEAS—50

Ashurst	Blaine	Broussard	Copeland
Barkley	Bratton	Capper	Couzens
Black	Brookhart	Caraway	Cutting

Deneen	Kendrick	Overman	Steck
Dill	La Follette	Pine	Steiwer
George	Locher	Pittman	Stephens
Harris	McKellar	Robinson, Ark.	Thomas
Harrison	McMaster	Robinson, Ind.	Vandenberg
Hawes	McNary	Schall	Wagner
Hayden	Neely	Sheppard	Watson
Heflin	Norris	Shipstead	Wheeler
Howell	Nye	Simmons	
Johnson	Oddie	Smith	

NAYS—31

Bayard	Edwards	Keyes	Smoot
Bingham	Fess	King	Swanson
Blease	Fletcher	McLean	Tydings
Borah	Gerry	Metcalf	Walsh, Mass.
Bruce	Gillett	Phipps	Walsh, Mont.
Curtis	Glass	Reed, Pa.	Warren
Dale	Greene	Sackett	Waterman
Edge	Hale	Shortridge	

NOT VOTING—13

du Pont	Gould	Norbeck	Tyson
Frazier	Jones	Ransdell	
Goff	Mayfield	Reed, Mo.	
Gooding	Moses	Trammell	

The VICE PRESIDENT. The yeas are 50, the nays are 31. Two-thirds of the Senate not having voted in the affirmative, the bill fails to pass.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

The message also announced that the House had agreed to the amendments of the Senate to the joint resolution (H. J. Res. 140) to amend sections 1 and 2 of the act of March 3, 1891.

BOULDER DAM

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

Mr. JOHNSON. Mr. President, the unfinished business is now before the Senate, is it not?

The VICE PRESIDENT. The unfinished business is now before the Senate.

Mr. JOHNSON. Mr. President, the junior Senator from Arizona [Mr. HAYDEN] has waited with great anxiety to make a speech, and I will be delighted to hear him.

Mr. HAYDEN. Mr. President——

The VICE PRESIDENT. The Senator from Arizona.

Mr. HAYDEN. Mr. President, it may take me some time to explain the injustice the pending bill proposes to do to my State. If in the course of my remarks any public business should arise that requires the attention of the Senate, I should be glad to yield.

MISSISSIPPI AND WARRIOR RIVERS BARGE LINES

Mr. REED of Missouri. Mr. President——

Mr. HAYDEN. I yield to the Senator from Missouri.

Mr. REED of Missouri. With the permission of the Senator from Arizona, and not to take him off the floor, I desire to say that there is on the calendar a measure of very great importance, which I think can be disposed of in a few moments.

Mr. JOHNSON. I will inquire of the Senator if it is the bill about which he spoke to me?

Mr. REED of Missouri. Yes.

Mr. JOHNSON. I will ask the Senator not to press it tonight. The Senator is not certain as to the time it will occupy, is he?

Mr. REED of Missouri. I think it will not involve a particle of discussion. If it does, I will withdraw it.

Mr. JOHNSON. I shall not offer objection if it does not lead to discussion.

Mr. REED of Missouri. I do not think it will except a brief statement I desire to make.

I refer to the bill (H. R. 13512) to amend the act entitled "An act to create the Inland Waterways Corporation for the purpose of carrying out the mandate and purpose of Congress, as expressed in sections 201 and 500 of the transportation act, and for other purposes," approved June 3, 1924. The bill is designed to enable the Mississippi and Warrior Rivers Government barge lines to proceed with the work they have been carrying on, and to enlarge the powers of the Interstate Commerce Commission with reference to the making of joint rates between the railroads and the barge lines on the rivers.

Mr. KING. Mr. President, will the Senator yield?

Mr. REED of Missouri. I do.

Mr. KING. I think that in all fairness I should state to the Senator that if this is a bill to increase the powers of that organization and to appropriate more money for the purchase of additional barges it will provoke discussion.

Mr. REED of Missouri. It does not "increase the powers of that organization"—that is, there is no general increase—and I know of no increase. It does carry an appropriation of additional money.

Mr. KING. For the purchase of more barges?

Mr. REED of Missouri. Yes.

Mr. KING. It will provoke discussion, I will say to the Senator.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. REED of Missouri. Yes.

Mr. COPELAND. May I ask for what purpose the Senator rose? Was it to ask for the immediate consideration of the bill?

Mr. REED of Missouri. I was going to ask for its immediate consideration.

Mr. COPELAND. I am very sorry to say that I shall have to join with the Senator from Utah, for other reasons, in stating that there will be considerable discussion on the bill.

Mr. REED of Missouri. On this bill?

Mr. COPELAND. Yes.

Mr. BRUCE. Mr. President, if the Senator will permit me, I should like to say that I unite with the Senator from New York in his opposition to the bill.

Mr. FLETCHER. Mr. President, is that the bill which was reported from the Committee on Commerce a few days ago?

Mr. REED of Missouri. Yes.

Mr. FLETCHER. I am in favor of the bill, I will say to the Senator.

Mr. REED of Missouri. Mr. President, in view of my statement to the Senator from California, and in view of the statements which I have just heard, and which I have heard with the greatest regret, I, of course, will have to withdraw the request I was about to make; but I do hope that this great work is not going to be destroyed by the failure of the Senate to act at this session. I will say to the Senator from Utah that many points in his State enjoy a 20 per cent reduction in freight rates on many articles because of the existence of this service—a fact with which he may not be familiar.

Mr. KING. That would not influence me in my opposition to the bill if I believed it to be, as I do now, an improper piece of legislation.

Mr. COPELAND. Mr. President, I will explain in a word to the Senator the reason for my opposition. I am, in general, for this proposed legislation, and have long been so, but it so happens that very recently it was revealed to me that in the port of New York, not alone in the city of New York but in the New Jersey part of the port of New York, there is serious opposition to this bill for various reasons. I begged the Commerce Committee to permit this opposition to be fully heard one day last week in order that they might have their day in court and might have an opportunity to present their objections, but the committee insisted on reporting out the bill without that further hearing, and therefore I am under obligations to present, in due time, the objections presented by my constituents.

Mr. REED of Missouri. Without taking the time of the Senate——

Mr. LA FOLLETTE. Mr. President, will the Senator from Missouri yield?

Mr. REED of Missouri. Yes; I am obliged to yield the floor very soon, under my arrangement with the Senator from California; but I will yield to the Senator.

Mr. LA FOLLETTE. I am sure the Senator from New York wants to be fair to the committee, and I believe that the statement which he made is subject to a misinterpretation.

The committee held voluminous hearings upon this subject earlier in the winter, and when the bill came over from the House we had two protracted hearings; and the chairman stated that, so far as he was advised, every individual who asked to be heard was heard fully by the committee.

Mr. REED of Missouri. Mr. President, under my arrangement, I must yield the floor.

Mr. BLACK. Mr. President, will the Senator permit me to make one statement in connection with what he has said?

The PRESIDING OFFICER (Mr. BINGHAM in the chair). Does the Senator from Missouri yield to the Senator from Alabama?

Mr. REED of Missouri. Yes; and then I will yield the floor.

Mr. BLACK. I desire to say to the Senator that I trust he will keep up his activity in connection with this bill; and I desire to state that I will join him in an effort to remain here until the bill is acted upon.

Mr. REED of Missouri. I yield the floor because I must do it.

Mr. HEFLIN subsequently said: Mr. President, I desire to say that I heartily concur in what my colleague [Mr. BLACK] said about legislation for the barge line; and I wish to announce that I am ready to cooperate with him and the Senator from Missouri and others interested in obtaining the necessary legislation.

Mr. REED of Missouri subsequently said: Mr. President, a short time ago I sought to have the privilege of bringing before the Senate House bill 13512 to amend the inland waterways act in certain particulars. I have agreed with the Senator from California [Mr. JOHNSON] that I would not ask for the consideration of the bill at this time if it would involve debate, and it appeared that debate was about to be indulged in. For the information of the Senate, I should like to be permitted to say that I have been examining the testimony which was taken before the Committee on Commerce touching this bill. It has not as yet been printed, and therefore, is not available to the Senate generally, but I find in volume 2 that the opposition to the bill came from certain refiners, some of them from New York and some of them from Savannah. I believe there were also some beet-sugar gentlemen who objected on the ground that it would let sugar into their territory in which they wanted to have a particular advantage. The American Sugar Refining Co. appeared as one of the leading opponents, the argument being that if the freight rates on the Mississippi River were reduced there would be some competition come in that would affect their business.

I make that statement so that what follows may be understood.

These arguments in a discussion of the whole situation, were answered very lucidly by Mr. Brent, who has been for many years engaged in conducting business of the Mississippi and the Warrior lines. He is not with them now, as I understand. I ask permission to have printed in the RECORD Mr. Brent's statement, in order that it may be available when the bill shall again come forward.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

STATEMENT OF THEODORE BRENT

Senator FLETCHER. I would like to have Mr. Brent discuss the position of the Savannah people involved, as well as the position of the New York people.

Senator MCNARY. Tell us who you represent, Mr. Brent, and what position you occupy; and whether you are for or against the bill.

Mr. BRENT. I am the president of the Redwood Line (Inc.), a steamship company operating between New Orleans and California. I am also retained by certain river interests to forward this and other legislation favoring waterways.

I was for nine years, part of the time the operating, and then the traffic head, of the Government Barge Lines.

Senator MCNARY. Give the names of the people you represent for the record.

Mr. BRENT. I represent the upper river—Minnesota and St. Clair River Improvement Association of the State of Minnesota; the waterways division of the State of Illinois; I also represent the Lower River Association. I appear here also in behalf of certain Mississippi Valley concerns with which I am associated.

The discussions to which you have been listening are typical of the discussions that have been going on ever since the barge lines have been established, and what has gone on quite often before the Interstate Commerce Commission. The question of the extension of the service of these barge lines has been heard over and over and over again before the Interstate Commerce Commission. The propositions advanced here this morning have been argued at length, in brief form, and in oral argument before the commission in all the many cases in which the barge lines have appeared, in the last nine years, for the purpose of making effective the service which Congress intended should be operated under the Inland Waterways Corporation. The refiners at the present time are appearing before the Interstate Commerce Commission in opposition to the extension of routes in the Warrior section. I may say parenthetically that the Examiner of the Interstate Commerce Commission has granted everything that the barge line has asked for, although the commission has not yet passed on the matter.

There is so much idle talk about having water service and then arguing that the cheapness of water service should not be reflected to the public. Now, these are special pleas. They are special pleas of interested parties. Possibly their profits have been cut down, but the consumer has gotten the benefit. Savannah does not like it, probably, that New Orleans sells sugar in Atlanta in competition with Savannah. The rate by rail from Savannah to Atlanta is 31 cents. The rate by rail from New Orleans to Atlanta is 50 cents, and when the barge line came in the rate by rail and barge to Atlanta was made 32½ cents, within a cent and a half of the rate from Savannah; and the result was that New Orleans went in and began to meet the competition of Savannah, and the prices which had heretofore been made on sugar were reduced.

The best evidence that I know of it is that the Coca Cola Co., the largest buyers of sugar in the whole Southeast and one of the largest buyers in the country, now divides its business between Savannah and New Orleans, because it gets competitive prices and competitive sugars.

Anyone who comes here and tells you that this thing is being done at the expense of the taxpayers goes contrary to the record. The Inland Waterways Corporation has not used a dollar of Government money since 1924 to pay for operating losses, because there have been no operating losses.

The Inland Waterways Corporation maintains its service in three different sections for accounting purposes. The Warrior is separate, the lower Mississippi is separate, and the upper Mississippi is separate. The same thing is done by many railroad corporations. They maintain different parts of their system separately in their accounting, although they are all owned by the same interest, and the purpose back of it is that the weak lines may be supported by the strong lines. That is what has happened here. The Warrior has lost money, and I can tell you why. Because for eight years the Warrior section has been fighting the railroads to get the rates that the law permits to extend the benefit thereof to the public of the Southeast; and they fought, I may say, successfully, because the commission has ruled with them in every case; but in that period they have had to stand losses and more losses, because there was not traffic of the character which would pay the operating expenses. They were hauling the low-rate commodities, and no railroad could exist if it had to carry those lines alone.

These are the difficulties which face this institution that you have set up.

So far as the New York plea is concerned, it is fallacious. The barge line—and I know its statistics for the last eight years—has not put 10 carloads of sugar in the city of Cleveland in the last eight years; we can bring the evidence; it has not put enough sugar in Cincinnati to wad a shotgun, and Louisville did not amount to anything. It is true that sugar is being brought from California and also from New Orleans into Louisville and Cincinnati in considerable quantities to-day, but not by the Inland Waterways Corporation. It is being brought by a private barge line, which is operating its own barges, its own facilities, between New Orleans and Cincinnati. We are taking no sugar up there, and they have cut the rate materially below any rate which that barge line has ever carried for to Cincinnati and Louisville.

The differentials which the barge line maintains under all-rail rates were first set by the Railroad Administration under Government authority, were afterwards affirmed by opinions of the Interstate Commerce Commission, and have just been reaffirmed in every case in which that matter has been brought up to date.

Galveston has complained that it is being poorly treated through the operation of the Federal barge line—that is not a fair plea—in the method of making rates sanctioned and approved and authorized and ordered by the commission. Galveston gets the same savings in cents per hundred pounds that New Orleans or St. Louis or Memphis gets—identically the saving in cents per hundred pounds that the cities on the river get.

A third point I would like to bring out in connection with the operation of the barge line is that the railroads have been unwilling to compete on a proper basis of joint rates without being compelled to do so by the Interstate Commerce Commission. The thing which has caused loss to your enterprise—and this is your enterprise, a legitimate enterprise—caused infinite loss to your enterprise during the nine years of its struggle, is the fact that railroads, contrary to their pleas, have resisted. There is only one railroad company in the whole United States that has worked with the barge line. The balance of them have resisted and resisted, and every inch of ground that has been gained has been won as a result of months and years of struggle.

Senator SACKETT. What line is that?

Mr. BRENT. The Illinois Central Railroad is the only one that has ever played fair with the barge line in any way. The balance of them have not.

Senator SACKETT. What is this other steamship line that you spoke of?

Mr. BRENT. The American Barge Line, with headquarters at Louisville, owned by some Pittsburgh interests, and——

Senator SACKETT. Are you president of that?

Mr. BRENT. No, sir; I am president of the Redwood Steamship Line, which operates between New Orleans and San Francisco. The sugar which is coming from the Pacific coast is coming on steamship lines through the Panama Canal, which makes low rates to bring it where it can get in competition with eastern sugars. It is the tariff advantage my friend raised.

I am here to support this committee in every word, because the Government has been successful in attempting to do something of value. If left to private enterprise, it would take years of struggle to bring into force the things which have been accomplished.

Senator FLETCHER. With reference to the provision about sale and lease, do you think that the enterprise ought to be handled as a whole?

Mr. BRENT. Yes; I do.

Senator FLETCHER. You would favor striking out the words in line 24, page 4, "or any unit thereof"?

Mr. BRENT. Most emphatically, for the reason, and for the good and sufficient reason that this is an enterprise in which the weak ends are carried by the strong. That is the way railroads have been built up; and that is the way waterways have got to be built up. There are some weak lines coming on. The Missouri wants service; the upper river has just started; and if the lower river can maintain the service necessary to maintain the weak lines, that is the proper thing to do. Look at the Santa Fe system. For 20 years its lines within the States of Texas, California, and Colorado hardly paid operating expenses, hardly paid their overhead, and yet during all those years the business of those lines was being built up until to-day the Santa Fe has got $280,000,000 surplus in its treasury, and the lines in Texas have been built up. Therefore if you are going to do this thing it must be done in a businesslike way. Do not begin selling it off piecemeal, or you will destroy the propositions which are still struggling for a beginning.

Senator FLETCHER. I think you are right.

Senator VANDENBERG. I wish to read into the record a telegram I have just received from E. Wilson Cressey.

BAY CITY, MICH., *May 21, 1928.*

Hon. A. H. VANDENBERG,
Senate Chamber, Washington, D. C.:

Passage of the Denison bill will be a serious blow to the beet-sugar industry of Michigan by reason of barge rate restricting our market giving the New Orleans refiners an unfair advantage over this territory. Taxpayers at large should not be called on to pay for maintaining a transportation system which will benefit only small portion of the country.

E. WILSON CRESSEY.

Mr. BRENT. I would like to make a further remark in regard to these beet-sugar people. Every time we have put in new rates to any territory where sugar is sold they complain. All sugars sold in the eastern territory is on the basis of New Orleans price plus freight rate from New Orleans. Beet sugar may go into Detroit with a rate of 10 cents, yet that sugar is being sold in Detroit on the basis of the New Orleans price of refined sugar plus the barge-line rate from New Orleans to Detroit. Now, if we reduced the rate, put in a differential rate of water, of course, which reduces the selling price of beet sugar and does not pay the road anything—there is a beet-sugar factory just 15 miles out of Minneapolis which has a 10-cent rate to Minneapolis. The rail rate from New Orleans to Minneapolis is 30 cents. Prior to the coming in of the barge line all that beet sugar made and delivered in Minneapolis at a 10-cent rate was sold on a 70-cent rate. When the barge line came in and reduced it 10 cents, they made great complaint because they had to sell then not on a 70-cent rate but at a 60-cent rate; and when a further reduction in the barge-line rates was contemplated, through operations with their banks in Minneapolis they came out with the plea that they would have to stop operations, because they said they would have to take 3 cents more off sugar.

Senator SACKETT. One more question, please, about the ability of the Government-operated barge line to secure these joint rates with the rails compared with the ability of any private barge line to secure them. Is not the Government in very much better position to bring that about?

Mr. BRENT. You are mighty right they are. If it had not been for the Government all these years standing all these losses, you would not have had any joint rates.

Senator SACKETT. That is quite a vital matter affecting the private barge operations, is it not?

Mr. BRENT. Yes, sir.

Senator HARRIS. I would like to know whether the rate on wheat and corn from the Mississippi Valley to Savannah and Florida and Charleston would be reduced by this barge line.

Mr. BRENT. We have tried to put in joint rates from St. Louis and from Minneapolis, from New Orleans into the southeast for years, into south Georgia, into Florida, and we could not get a railroad that would join us.

Senator FLETCHER. And if this bill become law you can do it?

Mr. BRENT. Yes; immediately.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed a joint resolution (H. J. Res. 307) to preserve for development the potential water power and park facilities of the gorge and Great Falls of the Potomac River, in which it requested the concurrence of the Senate.

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 1822. An act to authorize the Secretary of War to transfer or loan aeronautical equipment to museums and educational institutions;

S. 2535. An act granting to the State of New Mexico certain lands for reimbursement of the counties of Grant, Luna, Hidalgo, and Santa Fe for interest paid on railroad-aid bonds, and for the payment of the principal of railroad-aid bonds issued by the town of Silver City and to reimburse said town for interest paid on said bonds, and for other purposes;

S. 3593. An act to authorize the leasing or sale of lands reserved for agency, schools, and other purposes on the Fort Peck Indian Reservation, Mont.;

S. 3620. An act granting certain land to the congregation of St. Joseph's Roman Catholic Church in the parish of East Baton Rouge, La.;

S. 3808. An act to authorize the construction of a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammany Parish, La.;

S. 4450. An act authorizing the Ripley Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ripley, Ohio;

S. 4456. An act granting the consent of Congress to the boards of county commissioners of the counties of Escambia and Santa Rosa, in the State of Florida, to construct, maintain, and operate a free bridge across Santa Rosa Sound in the State of Florida;

S. 4457. An act authorizing the Northwest Florida Corporation, its successors and assigns, to construct, maintain, and operate a bridge across Perdido Bay, at or near Innerarity Point in Escambia County, Fla., to the mainland of Baldwin County, Ala.;

S. 4474. An act authorizing the South Carolina and the Georgia State Highway Departments to construct, maintain, and operate a toll bridge across the Savannah River at or near Burtons Ferry, near Sylvania, Ga.;

S. 4504. An act granting the consent of Congress to the State of Arkansas, through its State highway department, to construct, maintain, and operate a toll bridge across White River at or near Augusta, Ark.;

H. R. 11134. An act to authorize appropriations for construction at military posts, and for other purposes; and

H. R. 12381. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

HOUSE JOINT RESOLUTION REFERRED

The joint resolution (H. J. Res. 307) to preserve for development the potential water power and park facilities of the gorge and Great Falls of the Potomac River, was read twice by its title and referred to the Committee on the District of Columbia.

READJUSTMENT OF PAY OF COMMISSIONED PERSONNEL OF ARMY, NAVY, ETC.

Mr. WAGNER. Mr. President——

Mr. HAYDEN. I yield to the Senator from New York.

Mr. WAGNER. From the Committee on Military Affairs, I ask unanimous consent to report back favorably House bill 12110, to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, as amended, and I submit a report (No. 1286) thereon. I ask unanimous consent for the immediate consideration of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. WAGNER. There is no objection to the bill.

Mr. CURTIS. Let it be read.

The PRESIDING OFFICER. The bill will be read.

The Chief Clerk read the bill, as follows:

Be it enacted, etc., That the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, as amended, is hereby further amended by striking out in paragraph 5 of section 1 of said act, relating to the pay of the fourth period, the following words appearing in lines 11, 12, and 13 of said paragraph (vol. 42, Stat. L. 626): "except those whose promotion is limited by law to this grade and who are not entitled under existing law to the pay and allowances of a higher grade."

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. CURTIS. Is this a unanimous report of the committee?

Mr. WAGNER. Yes.

Mr. REED of Pennsylvania. Mr. President, this bill will increase the salaries of a number of doctor captains who are in the medical administrative department, and who do not receive pay equal to that of other captains of the Army. The bill is disapproved by the Budget Bureau, but without reasons being stated for the disapproval. It seemed to all the members of the committee that it was fair. It will cost about $60,000 a year above the present pay-roll.

Mr. CURTIS. Is it a House bill or a Senate bill?

Mr. REED of Pennsylvania. It is a House bill.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

NORTHERN PACIFIC LAND GRANTS

Mr. KENDRICK. Mr. President——

Mr. HAYDEN. I yield to the Senator from Wyoming.

Mr. KENDRICK. I ask unanimous consent to report back favorably, from the Committee on Public Lands and Surveys, House Joint Resolution 318, amending the joint resolution entitled "Joint resolution directing the Secretary of the Interior to withhold his approval of the adjustment of the Northern Pacific land grants, and for other purposes," approved June 5, 1924 (43 Stat. 461), as amended by the joint resolution approved March 3, 1927 (44 Stat. 1405), and I submit a report (No. 1287) thereon. Because of its emergency character, I ask for the immediate consideration of the joint resolution.

The PRESIDING OFFICER. Is there objection?

Mr. CURTIS. Let it be read.

The PRESIDING OFFICER. The joint resolution will be read.

The Chief Clerk read the joint resolution, as follows:

Resolved, etc., That the joint resolution entitled "Joint resolution directing the Secretary of the Interior to withhold his approval of the adjustment of the Northern Pacific land grants, and for other purposes," approved June 5, 1924, as amended by joint resolution approved March 3, 1927, be, and the same is hereby, amended as follows:

"That wherein said joint resolution approved June 5, 1924, as amended by the said joint resolution approved March 3, 1927, there appears the word and figures June 1, 1928, the same shall be amended to read June 30, 1929."

SEC. 2. That the joint committee provided for in the above resolution approved June 5, 1924, shall have leave to report at any time by bill or otherwise.

Mr. CURTIS. Is this the unanimous report of the committee?

Mr. KENDRICK. It is a unanimous report.

Mr. CURTIS. Is it approved by the department?

Mr. KENDRICK. It is; yes.

Mr. CURTIS. I have no objection.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RANDOLPH-MACON ACADEMY, FRONT ROYAL, VA.

Mr. SHEPPARD. Mr. President——

Mr. HAYDEN. I yield to the Senator from Texas.

Mr. SHEPPARD. From the Committee on Military Affairs, I ask unanimous consent to report back favorably, without amendment, House bill 4963, for the relief of the Randolph-Macon Academy, Front Royal, Va., and I submit a report (No. 1288) thereon. I call the attention of the Senator from Virginia [Mr. SWANSON] to the bill.

Mr. SWANSON. I ask unanimous consent for the present consideration of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. CURTIS. What is it for?

Mr. SWANSON. I will make a statement about the bill.

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Virginia?

Mr. HAYDEN. I yield.

Mr. SWANSON. If there is any objection, I will withdraw it.

Mr. President, this academy had $5,000 worth of arms. An incendiary burned down all the buildings. The department say they investigated the matter, and they find that the arms had the ordinary care and protection. They recommend the passage of the bill. There is no objection to it.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Randolph-Macon Academy, Front Royal, Va., be, and it is hereby, relieved from all responsibility and accountability for certain ordnance property, to the value of $5,605.30, the property of the War Department, which was destroyed by fire while in the possession of the academy for training purposes, and the Secretary of War is directed to terminate all further accountability for said property.

The bill was reported to the Senate without amenment, ordered to a third reading, read the third time, and passed.

T. ABRAHAM HETRICK

Mr. SHEPPARD. From the Committee on Military Affairs, I ask unanimous consent to report back favorably, without amendment, House Bill 10714 for the relief of T. Abraham Hetrick, and I submit a report (No. 1289) thereon. I call the attention of the Senator from Virginia to this bill also.

Mr. SWANSON. I ask unanimous consent for the present consideration of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. KING. Let it be read. What is it for?

Mr. SWANSON. I can state the purpose of the bill quicker than it can be read. If there is any objection, I will withdraw it.

This is the case of an old man who enlisted during the Civil War from Pennsylvania. He now lives in Virginia. He fought at the battle of Sailors Creek on the 6th of April, 1865. The records show that a private by his name was wounded there. He was wounded, carried to Alexandria, carried home, and as he did not report a mistake was made, and he was reported as a deserter on the 25th of April. He is 88 years old. He is now dependent on his daughter. This bill simply enables him to have that record against him corrected. There are affidavits there that he was wounded three times and was a brave soldier. It simply corrects a mistake in calling him a deserter when he was wounded and carried to Alexandria and home.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers and dependents, T. Abraham Hetrick, who was a private of Company I, Forty-ninth Regiment Pennsylvania Volunteer Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of that organization on the 25th day of April, 1865: *Provided*, That no back pay, bounty, pension, or other allowance shall be held to have accrued prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FOREIGN LOANS FLOATED IN THE UNITED STATES

Mr. TYDINGS. Mr. President——

Mr. HAYDEN. I yield to the Senator from Maryland.

Mr. TYDINGS. Out of order, I ask unanimous consent to have inserted in the RECORD a table which I have prepared, at quite some labor, showing the population and military strength of the nations of the world, and the amounts of money, both government and corporate loans, which those nations owe to us.

I hope Senators will look at this table, if they have a few minutes, because I think they will find it interesting.

The PRESIDING OFFICER. Without objection, the table will be received and printed in the RECORD.

The table is as follows:

Table showing population, active army, reserve, and foreign loans floated in the United States—Prepared by Millard E. Tydings

Country	Population	Active army		Reserves			Military man power		
		Number	Per cent	Actually enrolled		Unorganized	Per cent enrolled [1]	Number	Per cent
				Number	Per cent				
Argentina	10,087,118								
Armenia	921,400								
Austria	6,535,365	32,704	0.05	(2)	(2)	500,000		532,704	8.1
Belgium	7,874,600	71,790	.90	689,683	8.80	314,417	9.70	1,075,890	13.6
Bolivia	2,155,000								
Brazil	30,635,605								
Bavaria	7,379,594								
Bulgaria	5,484,143	33,000	.60	(2)	(2)	667,000	.60	700,000	12.7
Chile	3,937,678								
China	400,000,000	1,450,000	.34						
Colombia	6,617,833								
Costa Rica	507,193								
Cuba	3,418,033								
Czechoslovakia	13,613,172	140,700	1.03	1,489,000	10.94	475,000	12.00	2,104,700	15.5
Denmark	3,419,056								
Dominican Republic	897,405								
Estonia	1,110,538								
Finland	3,495,000	29,700	.85	250,300	7.16	270,300	8.00	550,000	15.7
France	40,922,300	727,413	1.80	4,610,000	11.30	700,000	13.00	6,037,413	14.6
Germany	62,348,782	100,000	.16	(2)	(2)	8,600,000	.16	8,700,000	13.9
Australia	6,103,924	1,697	.03	49,646	.81	548,657	.84	600,000	9.8
Canada	9,504,700	3,499	.04	61,288	.65	785,213	.70	850,000	8.9
Great Britain	45,226,300	214,190	.47	309,251	.68	5,612,899	1.20	6,136,340	13.6
India	318,942,480	161,000	.05	76,481	.02	2,700,946	.07	2,938,427	.9
Irish Free State	2,972,802	13,564	.46	4,500	.15	342,290	.60	360,354	12.1

CONTRACTS ENTERED INTO BY SECRETARY OF WAR, ETC.

Mr. STECK. Mr. President——

Mr. HAYDEN. I yield to the Senator from Iowa.

Mr. STECK. Out of order, I ask unanimous consent to report back favorably, with an amendment, from the Committee on Military Affairs, House bill 12352, to require certain contracts entered into by the Secretary of War, or by officers authorized by him to make them, to be in writing, and for other purposes and I submit a report (No. 1290) thereon. As this is an emergency measure, I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. CURTIS. Let it be read.

The PRESIDING OFFICER. The bill will be read.

The Chief Clerk read the bill.

Mr. CURTIS. Is this a unanimous report of the committee?

Mr. STECK. It is a unanimous report of the committee.

Mr. CURTIS. Is the bill recommended by the department?

Mr. STECK. It is a department bill; yes, sir.

Mr. CURTIS. There is no objection to its consideration.

The Senate, as in Committee of the Whole, proceeded to consider the bill.

The PRESIDING OFFICER. The amendment of the committee will be stated.

The amendment was, on page 1, line 10, after the words "Secretary of War," to strike out the period and insert a colon and the following proviso: "*Provided*, That this act shall cease to be in effect after June 30, 1929," so as to make the bill read:

Be it enacted, etc., That hereafter whenever contracts in excess of $500 in amount which are not to be performed within sixty days are made on behalf of the Government by the Secretary of War, or by officers authorized by him to make them, such contracts shall be reduced to writing and signed by the contracting parties. In all other cases contracts shall be entered into under such regulations as may be prescribed by the Secretary of War: *Provided*, That this act shall cease to be in effect after June 30, 1929.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

FOREIGN MILITARY SERVICE OF AMERICAN CITIZENS OF FOREIGN BIRTH

Mr. REED of Pennsylvania. Mr. President——

Mr. HAYDEN. I yield to the Senator from Pennsylvania.

Mr. REED of Pennsylvania. From the Committee on Foreign Relations I ask unanimous consent to report back favorably, without amendment, House Joint Resolution 268, requesting the President to negotiate with the nations with which there is no such agreement treaties for the protection of American citizens of foreign birth, or parentage, from liability to military service in such nations.

This is a very brief joint resolution, which I know can be passed without any discussion. I ask that it be read.

The PRESIDING OFFICER. The joint resolution will be read.

The Chief Clerk read the joint resolution, as follows:

Resolved, etc., That the President be, and he is hereby, respectfully requested to endeavor as soon as possible to negotiate treaties with the remaining nations with which we have no such agreement, providing that persons born in the United States of foreign parentage, and naturalized American citizens shall not be held liable for military service or any other act of allegiance during a stay in the territory subject to the jurisdiction of any such nation while citizens of the United States of America under the laws thereof.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

NATIONAL RIFLE AND PISTOL MATCHES

Mr. BROOKHART. Mr. President——

Mr. HAYDEN. I yield to the Senator from Iowa.

Mr. BROOKHART. From the Committee on Military Affairs, I ask unanimous consent to report back favorably, in a modified form, the bill (H. R. 13446) to amend the national defense act, the national rifle match bill, and I submit a report (No. 1291) thereon. It passed the Senate and House, but was vetoed by the President for other reasons. I think this modified bill meets the President's objections.

I ask for the present consideration of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. CURTIS. Let it be read.

The PRESIDING OFFICER. The bill will be read.

The Chief Clerk read the bill, as follows:

Be it enacted, etc., That the act entitled "An act for the promotion of rifle practice throughout the United States," approved February 14, 1927 (44 Stat., p. 1095), which adds an additional paragraph to section 113 of the national defense act, is hereby amended to read as follows: "That there shall be held an annual competition, known as

the national matches, for the purpose of competing for a national trophy, medals, and other prizes to be provided, together with a small-arms firing school, which competition and school shall be held annually under such regulations as may be prescribed by the Secretary of War."

SEC. 2. The national matches contemplated in this act shall consist of rifle and pistol matches for the national trophy, medals, and other prizes mentioned in section 1 above, to be open to the Army, Navy, Marine Corps, National Guard, or Organized Militia of the several States, Territories, and District of Columbia, the Reserve Officers' Training Corps, and the citizens' military training camps, rifle clubs, and civilians, together with a small-arms firing school to be connected therewith and competitions for which trophies and medals are provided by the National Rifle Association of America; and for the cost and expenditures required for and incident to the conduct of the same, including the personal expenses of the members of the National Board for the Promotion of Rifle Practice, the sum necessary for the above-named purposes is hereby authorized to be appropriated annually as a part of the total sum appropriated for national defense: *Provided*, That no competitor shall be entitled to commutation of rations in excess of $1.50 per day, and when meals are furnished no greater expenses than that sum per man per day for the period the contest is in progress: *Provided further*, That in lieu of traveling expense and commutation of rations while traveling the sum of 5 cents per mile may be paid to civilian competitors, and such travel pay for the return trip may be paid in advance of the performance of the travel.

SEC. 3. For the incidental expenses of the National Board for the Promotion of Rifle Practice, including books, pamphlets, badges, trophies, prizes, and medals to be expended for such purposes, the sum of not more than $7,500 is hereby authorized to be appropriated annually.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PROSECUTION OF INDICTMENTS AGAINST EDWARD L. DOHENY AND ALBERT B. FALL

Mr. NYE. Mr. President——

Mr. HAYDEN. I yield to the Senator from North Dakota.

Mr. NYE. I send to the desk a Senate resolution, which I ask to have read, and will ask for its immediate consideration, being sure that there will be no objection.

The PRESIDING OFFICER. The resolution will be read.

The Chief Clerk read the resolution (S. Res. 252), as follows:

Senate Resolution 252

Whereas on November 30, 1921, Edward L. Doheny, who was at that time negotiating with Albert B. Fall, then Secretary of the Interior, for a lease or leases of oil lands within the naval oil reserves of the United States, caused to be transmitted to the said Albert B. Fall the sum of $100,000 in cash; and

Whereas during the month of May, 1922, Harry F. Sinclair, who had on April 7, 1922, secured largely through the activities of the said Albert B. Fall a valuable lease of oil lands in Naval Reserve No. 3, commonly known as "Teapot Dome Reserve," caused to be transmitted to Albert B. Fall the sum of $233,000 in Liberty bonds and subsequently transmitted or caused to be transmitted to Albert B. Fall additional sums in cash and Liberty bonds; and

Whereas indictments were in due course returned by the Federal grand jury of the District of Columbia, charging Edward L. Doheny and Albert B. Fall with the offense of bribery.; and

Whereas the Supreme Court of the United States, after a review of the evidence in civil cases, instituted against the said Doheny and Sinclair for the recovery of the said oil lands, has denounced the transaction of both Doheny and Sinclair as corrupt and fraudulent and has characterized Fall as a faithless public officer; and

Whereas the prosecution of these cases was initiated by the Senate through appropriate resolution upon the basis of evidence developed by investigations conducted by the Committee on Public Lands and Surveys; and

Whereas the acquittal of Doheny and Sinclair upon charges of criminal conspiracy does not in any way act as a bar to prevent prosecution of the pending indictments for bribery against Doheny and Fall; and

Whereas the public interest demands that every reasonable effort be made to bring to justice the individuals whom the Supreme Court has denounced as responsible for these corrupt and fraudulent transactions: Therefore be it

Resolved, That it is the sense of the Senate that the President of the United States should direct the special prosecutors selected by him in accordance with the Senate resolution of January 31, 1924, or such other special counsel as he may select, to prosecute vigorously the indictments for bribery against Edward L. Doheny and Albert B. Fall.

Mr. JOHNSON. Mr. President, I object to any more morning business being transacted.

The PRESIDING OFFICER. Objection is made. The resolution will be referred to the Committee on Public Lands and Surveys. The Senator from Arizona is entitled to the floor.

BOULDER DAM

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

Mr. HAYDEN. Mr. President, before I conclude my remarks on the Swing-Johnson Boulder Dam bill, I shall submit evidence to conclusively prove:

First. That one of the primary purposes of that measure is to have the United States furnish money to build a hydroelectric power plant at Boulder Dam which the city of Los Angeles and the other municipalities in southern California, that are now successfully engaged in the power business, are abundantly able to build for themselves.

Second. That Los Angeles and the other California municipalities not only desire to obtain the use of Federal funds at lower than the current rate of interest to build them a power plant at Boulder Dam, but they have a further financial interest in having the United States enter into the power business on the Colorado River because the power thus produced would be exempt from State taxation.

Third. That the States of Arizona and Nevada are equitably entitled to receive compensation for the use of their lands and their waters for the production of hydroelectric power, and that in many similar instances Congress has authorized the States to collect such revenues.

Fourth. That there is a vast difference between Federal ownership and public ownership of utilities such as power, and that the principle of public ownership in the case of Boulder Dam can be fully and completely maintained without authorizing the Government of the United States to go into the power business.

POWER—PITTMAN AMENDMENTS

I shall first proceed to discuss the committee amendments to this bill relating to compensation to the States of Arizona and Nevada for the use of their lands and waters by the Federal Government for the generation of hydroelectric power at the proposed Boulder Canyon Dam. These amendments were adopted by the Committee on Irrigation and Reclamation at the suggestion and earnest solicitation of the senior Senator from Nevada [Mr. PITTMAN]. His amendments are most valuable, because they recognize the principle that the States of Arizona and Nevada own the bed of the Colorado River, the fall of that river, and the water in that river where it forms their common boundary.

These are natural resources, in which the two States share equally. These natural resources are the property of the two States and not the property of the United States. The value of this property belongs to Arizona and Nevada and not to the United States. The economic rent which may be obtained from the development of this property, consisting of their lands and waters, should inure to Arizona and Nevada and not to the United States. When nature gave to Arizona and Nevada a mighty river, with great fall, and confined it within the narrow walls of a deep canyon, the two States acquired an asset which belongs to them and not to the United States or to any other State.

The legal principles upon which the statements I have just made are founded and embodied in a resolution prepared by the Senator from Nevada [Mr. PITTMAN] and adopted by the duly appointed Representatives of six of the seven States of the Colorado River Basin at a conference held in the city of Denver, Colo., last fall. The senior Senator from Nevada has very modestly asked that his resolution be printed in the CONGRESSIONAL RECORD. It is such an important document—it states the law with such clarity—that I now ask that the clerk read it for the better information of the Senate.

The PRESIDING OFFICER. Without objection, the clerk will read.

The legislative clerk read as follows:

Resolution offered by Senator KEY PITTMAN on behalf of the Nevada commission to the conference of governors and the commissioners of the Colorado Basin States in session at Denver, Colo., August 29, 1927.

Whereas it is the settled law of this country that the ownership of and dominion and sovereignty over lands covered by navigable waters within the limits of the several States of the Union belong to the respective States within which they are found, with the consequent right to use or dispose of any portion thereof, when that can be done without substan-

tial impairment of the interests of the public in the waters, and subject always to the paramount right of Congress to control their navigation so far as may be necessary for the regulation of commerce with foreign nations and among the States; and

Whereas it is the settled law of this country that subject to the settlement of controversies between them by interstate compact, or decision of the Supreme Court of the United States and subject always to the paramount right of Congress to control the navigation of navigable streams so far as may be necessary for the regulation of commerce with foreign nations and among the States, the exclusive sovereignty over all of the waters within the limits of the several States belongs to the respective States within which they are found, and the sovereignty over waters constituting the boundary between two States is equal in each of such respective States; and

Whereas it is the sense of this conference that the exercise by the United States Government of the delegated constitutional authority to control navigation for the regulation of interstate and foreign commerce does not confer upon such Government the use of waters for any other purposes which are not plainly adapted to that end, and does not divest the States of their sovereignty over such waters for any other public purpose that will not interfere with navigation: Therefore be it

Resolved, That it is the sense of this conference of governors and the duly authorized and appointed commissioners of the States of Arizona, California, Colorado, New Mexico, Nevada, Utah, and Wyoming, constituting the Colorado River Basin States, assembled at Denver, Colo., this 23d day of September, 1927, that—

The rights of the States under such settled law shall be maintained.

The States have a legal right to demand and receive compensation for the use of their lands and waters, except from the United States, for the use of such lands and waters to regulate interstate and foreign commerce.

The State or States upon whose land a dam and reservoir is built by the United States Government, or whose waters are used in connection with a dam built by the United States Government to generate hydroelectric energy are entited to the preferred right to acquire the hydroelectric energy so generated, or to acquire the use of such dam and reservoir for the generation of hydroelectric energy, upon undertaking to pay to the United States Government the charges that may be made for such hydroelectric energy or for the use of such dam and reservoir to amortize the Government investment, together with interest thereon, or in lieu thereof agree upon any other method of compensation for the use of their waters.

We, the undersigned committee, to which has been referred the foregoing resolution, as presented to the conference on August 29, 1927, by Senator KEY PITTMAN, having adopted certain amendments unanimously, which are now incorporated therein, we recommend that the resolution set out above be adopted.

KEY PITTMAN, *Nevada.*
FRANCIS C. WILSON, *New Mexico.*
WM. R. WALLACE, *Utah.*
CHARLES E. WINTER, *Wyoming.*
A. H. FAVOUR, *Arizona.*
DELPH E. CARPENTER, *Colorado.*

Adopted OCTOBER 4, 1927.

Mr. HAYDEN. Mr. President, I ask to have printed in the CONGRESSIONAL RECORD a copy of an address delivered by the senior Senator from Nevada [Mr. PITTMAN] at the Denver conference, in support of his resolution offered at the conference of governors at Denver, Colo., August 29, 1927.

The PRESIDING OFFICER (Mr. CAPPER in the chair). Is there objection? The Chair hears none, and it is so ordered.

The address is as follows:

ADDRESS OF SENATOR KEY PITTMAN, OF NEVADA, BEFORE THE SEVEN-STATE CONFERENCE AT DENVER, AUGUST 29, 1927

I am not a member of the Nevada commission, but Governor Balzar before returning to Nevada appointed me legal adviser to the commission.

On behalf of our commission I prepared a resolution, which I submit to the conference for their consideration and adoption or rejection.

I think this conference has done a great deal of good, whether it reaches a definite agreement or not. I think those of you, particularly from the upper States, deserve unlimited credit for the efforts you have put forth to bring about an agreement. I have not been present at but one, I believe, of the executive conferences. At the one I did attend they did not seem to have any ideas other than those that were present in the general sessions. It was expected, of course, that the same reasons and arguments occurred to them in private session. It was the hope of the conference, and particularly of the members of the conference of the upper-basin States, that some character of settlement be reached so that Arizona would become a party to the seven-State compact, and California would unconditionally ratify the compact, because there is no compact under the present condition of affairs. The States are now in exactly the same position that they were in 1920.

It is evident why this was sought. It was because there was immediate demand for development of the Colorado River in its lower reaches.

There is no doubt that the evidence submitted to the Committee of Reclamation of the United States Senate was absolutely conclusive as to one point—that was the destruction of the Imperial Valley of California is imminent.

There are two remedies—hold back the flood waters in impounding reservoirs or dredge the lower channels deep enough to carry the flood water within the banks of the river. The latter plan has been declared too expensive.

Congress is faced with a responsibility, and I think the whole Congress desires to act. Congress, however, is made up of human beings who come from the different States, and they have their own troubles.

We out here are the only States that have suffered greatly from the tendency to usurpation of power by the Federal Government. We suffered it first because we have long had reclamation under Government projects; because we have public lands. But now that there is a demand throughout the whole United States to harness the streams for hydroelectric energy, the question of the usurpation of these streams by the Federal Government touches them all.

The Congress of the United States was ready and willing at the last session, in my opinion, to construct the Boulder Dam and to build the all-American canal, except for one thing—a sufficient number of the Members of Congress did not believe that the terms of the Swing-Johnson bill were fair to the State of Arizona. It is strange indeed that a large body like Congress should be so solicitous about the protection of one State. It was not Arizona alone that concerned them, but it was the establishment of a precedent.

They were unwilling to punish a State by depriving it of its natural resources.

I supported the Swing-Johnson bill, and yet I could not and did not deny the legal contentions of the State of Arizona. I stated on the floor of the Senate that I thought that Arizona was entitled to have amendments to that bill.

I prepared an amendment and submitted it to the Senators and Representatives from California, and to their delegation which was sent on there by their governor, asserting that Nevada was entitled to compensation for the use of her waters and her land for the building of a dam that created hydroelectric power. The amendment I asked for was that Nevada have the prior right to purchase at cost 100,000 horsepower created at Boulder Dam. The Senators from California recognized the principle and agreed to the amendment. I asked only for 100,000 horsepower because the former Nevada commission appointed by my State opposed taking more. That demand was based upon the principle that we were entitled to compensation, but the measure of compensation was entirely wrong. It should have been half of the power, as I pointed out in my speech in the United States Senate when the bill was under consideration.

I may go further and say there was not a Senator on the floor who questioned the principle when the amendment was read on the floor of the Senate.

I realize that some of you may feel that the injection of this power question into this conference is injurious. Our delegation patiently waited a week while these various negotiations were carried on by the conference, but it is evident from the public statements made here that the settlement of the water and power question is indissolubly intermingled, and the whole history of this matter since 1920 discloses the same thing.

The representatives of Arizona publicly said here a few days ago, "Yes; if the agreement on the division of water is satisfactory to us, we will agree to it at this time with the understanding that there will be no disposal of power created by any dam for a longer period than one year without an agreement to which Arizona will be a party, determining the distribution of the power and the terms upon which it will be distributed."

They have not changed their position on that. And they should not change their position on that. They would be foolish if they did change their position on it. Why? Because the bill will be drawn as it was before, giving the Secretary of the Interior the authority to dispose of the power generated to whom he pleases and upon any terms he may fix, unless we agree here upon the principles that shall govern and the limitations that shall be incorporated in the bill. But it is contended that it is only a congressional matter, and that this conference has nothing to do with it. The Swing-Johnson bill recognizes the fact that it is a State matter. Why? Because there was a statement in there providing that the power should be disposed of by the Secretary of the Interior in accordance with an agreement to be entered into between Arizona and California and Nevada, but that agreement had to be entered into before the Secretary of the Interior had contracted for the disposal of the power. The Secretary of the Interior reported that he intended to contract for the disposal of it as soon as the bill was passed. California would get all the power if there was no agreement between the three States, so, of course, California would enter into no agreement.

What we want is an agreement that shall be incorporated in every bill affecting power created by Nevada waters, or in connection with a dam on Nevada land.

But Arizona's proposition does not mean development. It meant that there would not be a settlement that could result in the building of the dam, because Arizona said, "If the terms are satisfactory with regard to water, we will agree on them with the condition that there shall be no power sold, etc."

Do you think that the Congress of the United States would be so negligent as to appropriate possibly $120,000,000 when their only chance to get their money back would be from the sale of power, and that right to sell the power for a longer period than one year could be prevented by one State?

That would mean that there would be no dam built by the Government on the Colorado River. California wants a dam built on the Colorado River. Nevada wants a dam built on the Colorado River. We have our reasons for wanting a dam built on the Colorado River, but not under the terms of the Swing-Johnson bill.

Even if you reach a settlement on the division of water in the Colorado River, you will have to reach a settlement on the power question before Arizona will go into the seven-State compact. If Arizona does not go into the seven-State compact, according to your view of the matter, you are just as unprotected as you were in 1920; and she won't go into that compact unless the power question is satisfactorily settled.

We might just as well understand each other now, for there would be no use of our staying here two or three weeks unless Arizona withdrew her position on that proposition, or later on California would agree to the principles underlying the power proposition.

We have not, in my opinion, right at the present moment, very much chance, with the disposition I have seen manifested, to reach a conclusive agreement now. But this conference has done a lot of good. We have had the opportunity of hearing both sides. Both sides have doubtless been helped by it. And there is not very much difference as to the demands of those two States as to the division of the water of the Colorado.

I wish to say, however, that Congress is liable to put through a bill at their next session containing provisions that this conference may agree upon, or that the disinterested States may consider fair to the interested ones.

If such a bill is introduced in Congress and is opposed by one of these States, then the influence of such State will end. It was only because many in Congress believed that the bill was unfair to Arizona that there was no successful action on the matter.

The Congress of the United States is ignorant of our problems. There are 435 men in the House of Representatives of the United States. Four-fifths of them know nothing on earth about water—particularly those that live in the city and State of New York. They are too impatient to listen to a discussion on water. What is the result? If a bill is introduced and submitted by the administration, no matter how destructive it may be of the fundamental rights of the States, those men will vote with the administration because it is the safest thing to do. They will go to their constituencies and say, "I voted with the administration."

This impending legislation is about to establish a precedent. There is not a Western State, to my knowledge, but what has experienced encroachments upon their rights by the Federal Government. The different bureaus in charge are demanding or contending that it is the Federal Government that has control over the waters of the States and not the States. They are contending that they may disturb even the vested rights of citizens for the purpose of putting water on nonirrigated Indian lands, or upon Government projects; that such is the power of the Federal Government. Their attitude in all legislation relating to the use of waters disclosed that they do not think that the States have any right to a superior control over the waters. Mr. Hoover takes that view, and Mr. Work takes that view. Neither one of them are lawyers, but they are the men whose views will probably be accepted by the Congressmen I am telling you about as the will of the administration, unless we unite in opposing such a destructive program.

The question arises, if reclamation dams are built in the State shall the Government establish the policy of making a profit over and above the cost? Are we to remain silent while the United States Government, through its delegated authority to regulate navigation, assumes authority of the streams for all other purposes, although such additional authority has never been delegated by the States to the Federal Government?

What are you going to do in the upper States? Are you going to support the principle of State sovereignty over waters, or are you going to support the principle of Federal control? These questions will be voted upon in the next session of Congress, and we in the West will have a desperate fight if the Senators from the Western States are contending for different principles and policies.

A little question of four or five hundred thousand acre-feet of water as between these two States of Arizona and California is insignificant in comparison with the establishment of the principle of the exclusive sovereign rights of the States to the exclusive control of the waters of the States. You may not realize it now, but the time will come when you will, and it may then be too late to protect the States.

Sovereignty of the States means supreme control by the States. It originated in England. England originally had sovereignty over the waters in this country when she owned the Colonies. She had sovereignty over the water of the Colonies until the Revolution broke those ties. At that time there was not any Constitution of the United States. Our existing States became separate sovereignties. They confederated together for certain purposes, but each of the succeeding sovereign States succeeded to the sovereign rights of Great Britain. And everyone of those States was a sovereign State.

Many people think the Federal Government created the States. It was the States that created the Federal Government under the Constitution they established. The United States Constitution expressly states that only those rights and powers delegated to the agency called the United States Government shall be exercised by that Government and that all jurisdiction and authority not expressly delegated shall be reserved to the States exclusively. And the Supreme Court of the United States has said time and time again that every State comes into the Union on an equal footing with every other State; that the State of Mississippi's sovereignty over the waters of that State is equal to the sovereignty of the State of Delaware.

When you want to see what the control of the Federal Government is, just look and see what authority the States delegated to the United States Government, for all authority is in the States. The only authority delegated to the United States Government about or over the waters was the sole right to regulate interstate and foreign commerce. That is all. The Supreme Court of the United States has interpreted that clause, and in such interpretations has declared that the United States Government has the right to regulate the flow of rivers for such purpose, but for no other purpose whatsoever.

Is that what Mr. Work now conceives his power to be? Is that what Mr. Hoover conceives his power to be? Of course not. They conceive that the United States' right and power over navigation incidentally constitutes an appropriation of all of the waters for any and every other purpose, and that from that time on the States can not use any of such waters for any purpose, not even for drinking water, without the permission of the United States Government.

If their theory is right, the United States Government will do what it pleases with the waters of the several States. There can not be two supreme powers with regard to the same subject. If the United States Government has sovereignty over the waters of the State, then they can tie up the waters of the State. They can take the waters out of a State if they have sovereign power over that water. Of course, the United States Government does not have such sovereignty, as it was always in the States and never has been surrendered.

If the question of the benefits of power, as well as the benefits of irrigation and the benefits of domestic use, are all involved, we may not be able to agree at this time on the details of a decision, but in attempting to agree on any controversy you will make great headway if you can agree on the principles that underlie these negotiations.

Now we come to the question of hydroelectric power created by the construction of a dam. If the dam is built, even on the theory that it is for the purpose of improving navigation, we know that it is inevitable that it will create a very large amount of hydroelectric energy. And in that event would you imagine that the only value of the water was for navigation or irrigation or drinking?

Let us divide the water first it is urged—for what purpose—for navigation or irrigation or drinking? If you control something, you can use it for whatever purpose you see fit.

I say to you that the State of Nevada has the sovereign right to take every foot of water out of the Colorado River on its own soil, because it has exclusive sovereignty over such waters within its borders. There is an equal right for Arizona to do the same thing if she can use the water.

Now, then, if Nevada can not use this water for irrigation and, like Los Angeles, for drinking purposes because she is so unfortunate in those particulars, is she to be deprived of the right to the use of that water for another beneficial purpose, such as the creation of a project that will generate hydroelectric power? Why, no; that would be preposterous.

I do believe that unless there is more of the spirit of give and take manifested among the seven States that an agreement will be impossible.

Nevada is entitled to one-half of the power that may be generated by a Government dam on its land, or by the use of its waters after compensating the Government for its expenditure upon such dam. Arizona is entitled to the same for the same reasons.

That is not the announced policy of the Secretary of the Interior, but, of course, the Secretary of the Interior does not recognize the rights of the States at all in the water after the dam is built, or to any of the power generated with such waters.

Haven't the States a prior right? Their land is being used for dams by means of which the electric energy is generated—their water is being used to generate such electric energy for power. The land and water are assets of the State. Have they no prior rights over the Southern California Edison Co., which is distributing its electricity throughout the southern part of California? Would the States of

Arizona, Colorado, Utah, Wyoming, or New Mexico be willing to have their land and water used to create or generate electrical power to be sold by the Edison company or by some other company outside the State without any control over the matter? It won't be done. It can't be done. And no congress on earth would do that.

Did Congress recognize the sovereignty of the States over their waters at the time the Federal water power bill was enacted? It provided that the United States Government shall not grant any permit to use the public lands for the building of a power dam until the applicant has first obtained a permit from the State wherein the dam is to be built, to use its waters and land, and has otherwise complied with the laws of the State. But, of course, when the United States Government itself builds a dam it will build it and use it as Congress may authorize and direct in the act authorizing such construction.

Under the Federal power act we attempted to protect the States' rights, because we provided in that act that a municipality—that is, a city, or country, or State—shall have prior right to a permit to use the public lands for the building of dams and plants for the generation of hydroelectric power.

The Congress of the United States may pass a bill such as the Swing-Johnson bill, which does not provide any priority to any State and which does not provide for any State sovereignty over the waters of the State. A dam will be built at Boulder Canyon, and it may be built under the Federal water power act by private capital, or it may be built by the Government after long and expensive litigation, and it may be that when it is built it will be not only a Federal dam but a Federal institution in every sense of the word, with all of the water and power under the arbitrary control of some bureau of the United States Government.

When I see these States of Arizona and California with this vast quantity of water allotted to them by this agreement suggested by the four upper States—4,000,000 acre-feet each in comparison with the 300,000 acre-feet allotted to my own State, a State in size equal almost to either of them—when I think of it, that they, on account of the division of only one-fifth of what is allotted to them—one-tenth possibly of the whole amount involved—should threaten the enactment of a precedent that may destroy the most valuable assets that these States have—I want the people of these States to know the facts, and I want the Congress of the United States to know the facts, and this conference has done a magnificent thing in giving them the facts.

Now, I know the people of the western country are surely not going to endanger their sovereign rights by reason of selfishness manifested on the part of their Representatives.

The statement of the settled law of the country as to the rights of States with regard to water must be set out in the resolution, or the resolve that such rights shall be maintained will be meaningless. We recognize existing law; we do not create it by resolution, therefore the statement of existing law should be in the recital clauses rather than under the resolving clauses. The second resolve that "The States have a legal right to demand and receive compensation for the use of their lands and waters," is more easily applicable to individuals and corporations, because in such cases the State can unquestionably prevent construction until the State's demands are complied with.

Peculiar situations and conditions may arise if Congress authorizes the United States to build a dam under its delegated authority to regulate commerce. Whilst the declared purpose is to improve navigation, such a dam will inevitably increase the value of the water for domestic use, irrigation, power, and other purposes.

The United States Government is entitled to compensation for having added such incidental value to the State's water. The question is, What shall it be? What is equitable? What principles and policies should be established? To say that the State is entitled to compensation for use of lands and waters and that the United States is entitled to compensation for use of its dams and plants, is not sufficient in such case. These questions will be determined by Congress, and the method and amount of compensation fixed by the terms of the act authorizing the construction of such dams and appropriating the money therefor. What do the States desire written into such an act with regard to the amount and terms of compensation to be paid by the States for the use of the electric energy generated by the Government at such dam, or for the use of such dam by the State to generate electric energy?

The Government, after building the dam, will either build its own power plant and generate electric energy, or it will grant a permit to some one else to use the dam to generate electric energy. Unless the act provides a priority to the States, then others may purchase all such electric energy or contract for the use of the dam to the exclusion of the States. Again, unless the act states the measure of compensation, then the Secretary of the Interior may charge the State an exorbitant rate for the electric energy or the use of the dam and plant to create electric energy.

In the recital clause I have largely used the language found in the opinion of the Supreme Court of the United States. I have also attempted to confine the resolution to principles and policies that will inevitably affect the development of the Colorado River and its tributaries. Of course, the principles and policies will apply to all other similar developments throughout the United States and will undoubtedly have the support of other States.

Mr. HAYDEN. Mr. President, the senior Senator from Nevada [Mr. PITTMAN] presented to the Senate an argument in favor of the adoption of his amendments which is unanswerable. With that clearness of reasoning and that forcefulness of expression which has gained for him his well-deserved reputation as a most able advocate, the Senator from Nevada has, I am sure, now convinced a majority of the Senate that his position is correct. He conclusively demonstrated that the policy of compensating the States for the loss of taxes by reason of the adoption of a Federal conservation policy with respect to natural resources is not revolutionary. Upon the contrary, the payment of money by the Federal Government to the States in lieu of taxes has been done and is being done in many important instances. The precedents for the payments to Arizona and Nevada, as proposed in his amendments, are therefore well established.

The Senator from Nevada first referred to the act of May 23, 1908 (35 Stat. 260), which provides:

> That hereafter 25 per cent of all money received from each forest reserve during any fiscal year, including the year ending June 30, 1908, shall be paid at the end thereof by the Secretary of the Treasury to the State or Territory in which said reserve is situated, to be expended as the State or Territorial legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which the forest reserve is situated.

The Senator then gave the reasons which induced Congress to enact this legislation. He pointed out that after the passage of the act authorizing the President to create forest reserves, which, in the interest of all the American people and for the benefit of future generations, forever prevented vast areas of timber lands from passing into private ownership, nevertheless did a grave injustice to many communities, to counties, and to States. That which it was necessary for Congress to do in behalf of the national safety and the national welfare had an adverse effect in certain localities. Taking cognizance of these facts, Congress did not hesitate to correct this injustice by granting 25 per cent of the gross receipts from the national forests to the States wherein the same are located.

The Senator fortified his argument by stating that at the last session of Congress an act was passed to pay to several counties in Oregon a sum equal to the taxes they would have received if certain railroad-grant lands had not been included in a national forest. He thus proved that the policy is continuous and has never been abandoned since its inception.

Senator PITTMAN then read this provision from section 35 of the general oil leasing act of March 11, 1920 (41 Stat. 450), upon which his amendments are predicated:

> Thirty-seven and one-half per cent of the amounts derived from such bonuses, royalties, and rentals shall be paid by the Secretary of the Treasury after the expiration of each fiscal year to the State within the boundaries of which the leased lands or deposits are or were located, said moneys to be used by such State or subdivisions thereof for the construction and maintenance of public roads or for the support of public schools or other public educational institutions, as the legislature of the State may direct.

The Senator explained that prior to the passage of this act valuable oil lands were going into private ownership, which made them taxable by the States. A larger and a much wiser policy of national conservation required that the title to all parts of the public domain containing deposits of oil should be retained by the United States. To adopt this policy benefited the whole Nation, but every State where these great oil lands existed was proportionally damaged. Congress, realizing this injury to the States, did not wait for 17 years as in the case of the forest reserves, but, in the very act which withheld these oil lands from exploitation by private interests, gave to the States wherein they are located 37½ per cent of all amounts received from bonuses, royalties, and rentals.

The Senator from Nevada next directed attention to the Federal water power act of June 10, 1920 (41 Stat. 1070), which provided that:

> Thirty-seven and one-half per cent of the charges arising from licenses hereunder for the occupancy and use of national forests, national parks, public lands, and national monuments, from development within the boundaries of any State shall be paid by the Secretary of the Treasury to such State.

The Senator from Nevada carefully stated that this 37½ per cent of the license fees collected by the Federal Power

Commission represents only a payment to the States for the use of lands within their borders. The act contemplated that in the great majority of instances the power sites would be developed by private enterprise, and that in addition to any payments received from a share of the Federal license fees, each State could tax the franchise, the power plant, and every other improvement or asset, whether tangible or intangible, in the same manner as other values are taxed.

The Senator from Nevada did not fail to bring to the attention of the Senate that the Federal water power act recognizes the true principle, which I must say is deplorably absent from the Swing-Johnson bill, that the States are sovereign over their waters and that they own the bed and banks of navigable streams. Let me emphasize that fact as he did by reading a short paragraph from that act which is of supreme importance if State sovereignty is to be preserved from Federal aggression:

That each applicant for a license hereunder shall submit to the commission—

(b) Satisfactory evidence that the applicant has complied with the requirements of the laws of the State or States within which the proposed project is to be located with respect to bed and banks and to the appropriation, diversion, and use of water for power purposes, and with respect to the right to engage in the business of developing, transmitting, and distributing power, and in any other business necessary to effect the purposes of a license under this act.

This requirement that the laws of the State must first be complied with is in strict conformity and complete accord with the Pittman resolution adopted at the conference of governors in Denver on October 4, 1927, which has been read to the Senate at my request. The rights of the States are maintained by such a provision of law, which should be included in all legislation relating to water power.

The Senator concluded his speech, which had and kept the attention of the Senate, with a reference to the fact that the waters impounded by the proposed Boulder Dam will forever destroy all other use of a large area of land in Nevada and Arizona. In carrying out a great national policy, the lands to be flooded can never come into private ownership, can never be subjected to taxation. It is known that vast deposits of rock salt above Boulder Canyon will be covered over with water. These deposits, which are estimated to contain over 25,000,000 tons of rock salt, were once mined for fluxing purposes in smelting ore and might again prove to be of great value, but these values can never be realized.

In his testimony before the House Committee on Irrigation and Reclamation in 1924, Mr. Walter G. Clark, an engineer of New York City, said in answer to my question:

A dam at Black Canyon would submerge a large area of gold-bearing gravel, which, as sampled thus far, averages about 25 cents a cubic yard. A dam located at this point would cover values that could in all probability be recovered.

Mr. HAYDEN. About what do those values aggregate?

Mr. CLARK. If the whole area averages what it has assayed so far, 25 cents a cubic yard, it will run something like $64,000,000, gross value, of gold in the ground there.

Mr. HAYDEN. That is, in the claims filed on by Mr. G. Henry Stetson?

Mr. CLARK. I do not know whether his claims cover all of the values, as the prospecting has not extended over the entire area; but the drilling so far done and the samples so far submitted to me average 25 cents.

Mr. HAYDEN. Are those patented mining claims?

Mr. STETSON. No; none.

Mr. HAYDEN. You have merely done assessment work from year to year.

Mr. STETSON. Yes; assessment work.

Whether the placer deposits of gold to which Mr. Clark refers are as valuable as he testified, whether they could be mined by improved methods at a profit, I can not say. But whatever the values are, they will be irrevocably lost when the waters of the Black Canyon Reservoir cover them over. There are also other deposits of nonmetalliferous minerals in the same area in Arizona and Nevada, which might be developed and become subject to taxation, which will likewise be submerged. The same is true of some agricultural land which would otherwise be irrigated and placed in cultivation.

At the hearings on the Interior Department appropriation bill before the House Committee on Appropriations last December the Commissioner of the General Land Office made the following statement relative to mining claims within the area to be flooded by the Boulder or Black Canyon:

It has been determined that a total of 2,010 claims have been filed within the area to be examined. Additional claims are being filed, and it is probable that eventually action will have to be taken on about 3,000 claims.

Many of these mining claims are undoubtedly without merit, but between two and three thousand of them could not have been located unless some one believed that valuable minerals would be found. The expense of the filing fees and of the assessment work is a guaranty that some of these mineral locations were made in good faith.

I am citing these instances where taxable wealth will be destroyed by the waters of the Boulder or Black Canyon Reservoir merely to emphasize the statements made by Senator PITTMAN that Arizona and Nevada are asked to surrender something of real value which otherwise the people of those States would be permitted to enjoy.

All of the arguments so well made by the senior Senator from Nevada were in support of the following amendment appearing on page 6, lines 5 to 12:

If during the period of amortization the Secretary of the Interior shall receive revenues in excess of the amount necessary to meet the periodical payments to the United States as provided in the contract, or contracts, executed under this act, then, immediately after the settlement of such periodical payments, he shall pay to the State of Arizona 18¾ per cent of such excess revenues and to the State of Nevada 18¾ per cent of such excess revenues.

Coupled with it and as a part of the same general plan advocated by the Senator from Nevada, the bill contains a further amendment which he persuaded the Committee on Irrigation and Reclamation to accept. It is found on page 8, lines 7 to 15:

Contracts made pursuant to subdivision (a) of this section shall contain provisions whereby at the end of 15 years from the date of their execution and every 10 years thereafter, there shall be readjustment of the contract, upon the demand of either party thereto, either upward or downward as to price, as the Secretary of the Interior may find to be justified by competitive conditions at distributing points or competitive centers, and with provisions under which disputes or disagreements as to interpretations or performance of such contract shall be determined either by arbitration or court proceedings, the Secretary of the Interior being authorized to act for the United States in such readjustments or proceedings.

With his usual thoroughness, the senior Senator from Nevada followed up his proposal by bringing it to the attention of the proper committee of the House of Representatives.

I shall read an extract from a letter printed in the CONGRESSIONAL RECORD of March 24, 1928, addressed by the senior Senator from Nevada to the Hon. ADDISON T. SMITH, chairman of the Committee on Reclamation, House of Representatives, and dated March 22, 1928. The Senator from Nevada in that letter said in support of his amendment:

Some who are unfamiliar with the facts surrounding the initiation of this legislation and the conditions on the Colorado River have naturally inquired, Why should the States of Arizona and Nevada be granted any revenues? At the time that Congress had under consideration the oil leasing bill and it was proposed to pay to the State where the oil lands were leased by the Government 37½ per cent of the royalties received by the Government the question was asked, Why should the States receive any royalty paid to the Government? Congress in such act did pass such provision and did allow the State 37½ per cent of the royalties received, and answered such questions as follows:

Congress had the legal right to adopt a conservation policy. The Government owned the public lands in which the oil was located. Congress had authority to withdraw such lands from entry and acquisition by private owners. Congress did this. While it was a good policy, it injured the State in which the policy was put in force and effect because it withdrew forever from the possibility of taxation such lands and mineral resources. The State's ability to maintain through taxation the State government was thereby depreciated. States can not exist unless there is property to tax. Whilst there was no legal obligation on the part of Congress to grant any royalties to the States, they considered it just and right that it should be done to compensate to some extent the State for the loss of potential taxable property.

This amendment is based upon the same theory, and Congress is asked to extend to the States the same policy under this act.

The Senator from Nevada rendered a great service to his State, to my State, and to the country as a whole by his able and convincing presentation of this cause to the Senate. I say not only his own State of Nevada and her sister State of Arizona but to the entire Nation, because I am sure that the American people, even though the great majority of them live thousands of miles away from the scene of this proposed development, have no desire to do an injustice to any State, however small its population may be. In carrying out a national policy which contemplates the utilization of the water-power

resources of a great river like the Colorado they want to be fair when voting to bring about such a development of hydroelectric power. I have faith that those who speak for the American people in the United States Senate will not willingly or knowingly impose even a hardship upon the people of the States which the Senator from Nevada and I have the honor in part to represent.

It is my purpose to continue the argument so convincingly made by the Senator from Nevada in support of the principle that the States are entitled to compensation for the use of their lands and their waters in the event that the Federal Government shall engage in the business of generating and selling hydroelectric power. I shall begin where he left off. While I know that I can not in any manner improve upon what he has said, I hope that by presenting additional details to make certain that the principles which we both advocate shall be so clearly illustrated as to leave no doubt in the mind of any Senator that the States of Arizona and Nevada are asking only for their just dues.

The Senator from Nevada read to the Senate the provision of law which directs that 25 per cent of the gross receipts from the national forests shall be paid to the States. Let me add to what he has said by bringing to your attention a further act which provides that an additional 10 per cent shall be expended for forest roads and trails. These roads and trails would otherwise have to be built by the States or the counties in which the forest reserves are located, so that in reality they benefit to the extent of 35 per cent of the gross receipts from the national forests.

I quote from the act of March 4, 1913 (37 Stat. 843):

That hereafter an additional 10 per cent of all moneys received from the national forests during each fiscal year shall be available at the end thereof to be expended by the Secretary of Agriculture for the construction and maintenance of roads and trails within the national forests in the States from which such proceeds are derived; but the Secretary of Agriculture may, whenever practicable, in the construction and maintenance of such roads, secure the cooperation or aid of the proper State or Territorial authorities in the furtherance of any system of highways of which such roads may be made a part.

Mr. BORAH. Mr. President, would the Senator have any objection to yielding to me at this time to move an executive session?

Mr. HAYDEN. I am delighted to yield for that purpose.

EXECUTIVE SESSION

Mr. BORAH. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until to-morrow at 11 o'clock a. m.

The motion was agreed to; and (at 5 o'clock and 30 minutes p. m., Friday, May 25) the Senate took a recess until to-morrow, Saturday, May 26, 1928, at 11 o'clock a. m.

FRIENDSHIP, COMMERCE, AND CONSULAR RIGHTS WITH HONDURAS

In executive session this day the following treaty was ratified and, on motion of Mr. BORAH, the injunction of secrecy was removed therefrom:

To the Senate:

To the end that I may receive the advice and consent of the Senate to its ratification, I transmit herewith a treaty of friendship, commerce, and consular rights between the United States and Honduras, signed at Tegucigalpa on December 7, 1927.

CALVIN COOLIDGE.

THE WHITE HOUSE,
January 5, 1928.

The PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate to receive the advice of that body to ratification, if his judgment approve thereof, a treaty of friendship, commerce, and consular rights between the United States and Honduras, signed at Tegucigalpa on December 7, 1927.

Respectfully submitted.

FRANK B. KELLOGG.

DEPARTMENT OF STATE,
Washington, January 5, 1928.

The United States of America and the Republic of Honduras desirous of strengthening the bond of peace which happily prevails between them, by arrangements designed to promote friendly intercourse between their respective territories through provisions responsive to the spiritual, cultural, economic and commercial aspirations of the peoples thereof, have resolved to conclude a Treaty of Friendship, Commerce and Consular Rights and for that purpose have appointed as their plenipotentiaries:

The President of the United States of America, George T. Summerlin, Envoy Extraordinary and Minister Plenipotentiary of the United States of America, and

The President of the Republic of Honduras, Doctor Fausto Dávila, Minister for Foreign Affairs of the Republic of Honduras,

Who, having communicated to each other their full powers found to be in due form, have agreed upon the following Articles:

ARTICLE I

The nationals of each of the High Contracting Parties shall be permitted to enter, travel and reside in the territories of the other; to exercise liberty of conscience and freedom of worship; to engage in professional, scientific, religious, philanthropic, manufacturing and commercial work of every kind without interference; to carry on every form of commercial activity which is not forbidden by the local law; to own, erect or lease and occupy appropriate buildings and to lease lands for residential, scientific, religious, philanthropic, manufacturing, commercial and mortuary purposes; to employ agents of their choice, and generally to do anything incidental to or necessary for the enjoyment of any of the foregoing privileges upon the same terms as nationals of the State of residence or as nationals of the nation hereafter to be most favored by it, submitting themselves to all local laws and regulations duly established.

The nationals of either High Contracting Party within the territories of the other shall not be subjected to the payment of any internal charges or taxes other or higher than those that are exacted of and paid by its nationals.

The nationals of each High Contracting Party shall enjoy freedom of access to the courts of justice of the other on conforming to the local laws, as well for the prosecution as for the defense of their rights, and in all degrees of jurisdiction established by law.

The nationals of each High Contracting Party shall receive within the territories of the other, upon submitting to conditions imposed upon its nationals, the most constant protection and security for their persons and property, and shall enjoy in this respect that degree of protection that is required by international law. Their property shall not be taken without due process of law and without payment of just compensation.

Nothing contained in this Treaty shall be construed to affect existing statutes of either of the High Contracting Parties in relation to the immigration of aliens or the right of either of the High Contracting Parties to enact such statutes.

ARTICLE II

With respect to that form of protection granted by National, State or Provincial laws establishing civil liability for injuries or for death, and giving to relatives or heirs or dependents of an injured party a right of action or a pecuniary benefit, such relatives or heirs or dependents of the injured party, himself a national of either of the High Contracting Parties and within any of the territories of the other, shall regardless of their alienage or residence outside of the territory where the injury occurred, enjoy the same rights and privileges as are or may be granted to nationals, and under like conditions.

ARTICLE III

The dwellings, warehouses, manufactories, shops, and other places of business, and all premises thereto appertaining of the nationals of each of the High Contracting Parties in the territories of the other, used for any purposes set forth in Article I, shall be respected. It shall not be allowable to make a domiciliary visit to, or search of any such buildings and premises, or there to examine and inspect books, papers or accounts, except under the conditions and in conformity with the forms prescribed by the laws, ordinances and regulations for nationals.

ARTICLE IV

Where, on the death of any person holding real or other immovable property or interests therein within the territories of one High Contracting Party, such property or interests therein would, by the laws of the country or by a testamentary disposition, descend or pass to a national of the other High Contracting Party, whether resident or non-resident, were he not

disqualified by the laws of the country where such property or interests therein is or are situated, such national shall be allowed a term of three years in which to sell the same, this term to be reasonably prolonged if circumstances render it necessary, and withdraw the proceeds thereof, without restraint or interference, and exempt from any succession, probate or administrative duties or charges other than those which may be imposed in like cases upon the nationals of the country from which such proceeds may be drawn.

Nationals of either High Contracting Party may have full power to dispose of their personal property of every kind within the territories of the other, by testament, donation, or otherwise, and their heirs, legatees and donees, of whatsoever nationality, whether resident or nonresident, shall succeed to such personal property, and may take possession thereof, either by themselves or by others acting for them, and retain or dispose of the same at their pleasure subject to the payment of such duties or charges only as the nationals of the High Contracting Party within whose territories such property may be or belong shall be liable to pay in like cases.

ARTICLE V

The nationals of each of the High Contracting Parties in the exercise of the right of freedom of worship, within the territories of the other, as hereinabove provided, may, without annoyance or molestation of any kind by reason of their religious belief or otherwise, conduct services either within their own houses or within any appropriate buildings which they may be at liberty to erect and maintain in convenient situations, provided their teachings or practices are not contrary to public morals; and they may also be permitted to bury their dead according to their religious customs in suitable and convenient places established and maintained for the purpose, subject to the reasonable mortuary and sanitary laws and regulations of the place of burial.

ARTICLE VI

In the event of war between either High Contracting Party and a third State, such Party may draft for compulsory military service nationals of the other having a permanent residence within its territories and who have formally, according to its laws, declared an intention to adopt its nationality by naturalization, unless such individuals depart from the territories of said belligerent Party within sixty days after a declaration of war.

ARTICLE VII

Between the territories of the High Contracting Parties there shall be freedom of commerce and navigation. The nationals of each of the High Contracting Parties equally with those of the most favored nation, shall have liberty freely to come with their vessels and cargoes to all places, ports and waters of every kind within the territorial limits of the other which are or may be open to foreign commerce and navigation. Nothing in this Treaty shall be construed to restrict the right of either High Contracting Party to impose, on such terms as it may see fit, prohibitions or restrictions of a sanitary character designed to protect human, animal, or plant life, or regulations for the enforcement of police or revenue laws.

Each of the High Contracting Parties binds itself unconditionally to impose no higher or other duties or conditions and no prohibition on the importation of any article, the growth, produce or manufacture, of the territories of the other than are or shall be imposed on the importation of any like article, the growth, produce or manufacture of any other foreign country.

Each of the High Contracting Parties also binds itself unconditionally to impose no higher or other charges or other restrictions or prohibitions on goods exported to the territories of the other High Contracting Party than are imposed on goods exported to any other foreign country.

Any advantage of whatsoever kind which either High Contracting Party may extend to any article, the growth, produce, or manufacture of any other foreign country shall simultaneously and unconditionally, without request and without compensation, be extended to the like article the growth, produce or manufacture of the other High Contracting Party.

All articles which are or may be legally imported from foreign countries into ports of the United States or are or may be legally exported therefrom in vessels of the United States may likewise be imported into those ports or exported therefrom in Honduran vessels without being liable to any other or higher duties or charges whatsoever than if such articles were imported or exported in vessels of the United States; and, reciprocally, all articles which are or may be legally imported from foreign countries into the ports of Honduras or are or may be legally exported therefrom in Honduran vessels may likewise be imported into these ports or exported therefrom in vessels of the United States without being liable to any other or higher duties or charges whatsoever than if such articles were imported or exported in Honduran vessels.

In the same manner there shall be perfect reciprocal equality in relation to the flags of the two countries with regard to bounties, drawbacks, and other privileges of this nature of whatever denomination which may be allowed in the territories of each of the Contracting Parties, on goods imported or exported in national vessels so that such bounties, drawbacks and other privileges shall also and in like manner be allowed on goods imported or exported in vessels of the other country.

With respect to the amount and collection of duties on imports and exports of every kind, each of the two High Contracting Parties binds itself to give to the nationals, vessels and goods of the other the advantage of every favor, privilege or immunity which it shall have accorded to the nationals, vessels and goods of a third State, whether such favored State shall have been accorded such treatment gratuitously or in return for reciprocal compensatory treatment. Every such favor, privilege or immunity which shall hereafter be granted the nationals, vessels or goods of a third State shall simultaneously and unconditionally, without request and without compensation, be extended to the other High Contracting Party, for the benefit of itself, its nationals and vessels.

The stipulations of this article do not extend to the treatment which is accorded by the United States to the commerce of Cuba under the provisions of the Commercial Convention concluded by the United States and Cuba on December 11, 1902, or any other commercial convention which hereafter may be concluded by the United States with Cuba, or to the commerce of the United States with any of its dependencies and the Panama Canal Zone under existing or future laws, or to the treatment which Honduras accords, or may hereafter accord, to the commerce of Costa Rica, Guatemala, Nicaragua, Panama, and/or Salvador, so long as any special treatment accorded to the commerce of those countries or any of them by Honduras is not accorded to any other country.

ARTICLE VIII

The nationals and merchandise of each High Contracting Party within the territories of the other shall receive the same treatment as nationals and merchandise of the country with regard to internal taxes, transit duties, charges in respect to warehousing and other facilities and the amount of drawbacks and bounties.

ARTICLE IX

No duties of tonnage, harbor, pilotage, lighthouse, quarantine, or other similar or corresponding duties or charges of whatever denomination, levied in the name or for the profit of the Government, public functionaries, private individuals, corporations or establishments of any kind shall be imposed in the ports of the territories of either country upon the vessels of the other, which shall not equally, under the same conditions, be imposed on national vessels. Such equality of treatment shall apply reciprocally to the vessels of the two countries respectively from whatever place they may arrive and whatever may be their place of destination.

ARTICLE X

Merchant vessels and other privately owned vessels under the flag of either of the High Contracting Parties, and carrying the papers required by its national laws in proof of nationality shall, both within the territorial waters of the other High Contracting Party and on the high seas, be deemed to be the vessels of the Party whose flag is flown.

ARTICLE XI

Merchant vessels and other privately owned vessels under the flag of either of the High Contracting Parties shall be permitted to discharge portions of cargoes at any port open to foreign commerce in the territories of the other High Contracting Party, and to proceed with the remaining portions of such cargoes to any other ports of the same territories open to foreign commerce, without paying other or higher tonnage dues or port charges in such cases than would be paid by national vessels in like circumstances, and they shall be permitted to load in like manner at different ports in the same voyage outward, provided, however, that the coasting trade of the High Contracting Parties is exempt from the provisions of this Article and from the other provisions of this Treaty, and is to be regulated according to the laws of each High Contracting Party in relation thereto. It is agreed, however, that the nationals of either High Contracting Party shall within the territories of the other enjoy with respect to the coasting trade the most favored nation treatment, excepting that special treatment with respect to the coasting trade of Honduras may be granted by Honduras on condition of reciprocity to vessels of Costa Rica,

Guatemala, Nicaragua, Panama, and/or Salvador, so long as such special treatment is not accorded to vessels of any other country.

ARTICLE XII

Commercial travelers representing manufacturers, merchants and traders domiciled in the territories of either High Contracting Party shall on their entry into and sojourn in the territories of the other Party and on their departure therefrom be accorded the most favored nation treatment in respect of customs and other privileges and of all charges and taxes of whatever denomination applicable to them or to their samples.

If either High Contracting Party require the presentation of an authentic document establishing the identity and authority of a commercial traveler, a signed statement by the concern or concerns represented, certified by a consular officer of the country of destination shall be accepted as satisfactory.

ARTICLE XIII

Limited liability and other corporations and associations, whether or not for pecuniary profit, which have been or may hereafter be organized in accordance with and under the laws, National, State or Provincial, of either High Contracting Party and maintain a central office within the territories thereof, shall have their juridical status recognized by the other High Contracting Party provided that they pursue no aims within its territories contrary to its laws. They shall enjoy free access to the courts of law and equity, on conforming to the laws regulating the matter, as well for the prosecution as for the defense of rights in all the degrees of jurisdiction established by law.

The right of such corporations and associations of either High Contracting Party so recognized by the other to establish themselves within its territories, establish branch offices and fulfill their functions therein shall depend upon, and be governed solely by, the consent of such Party as expressed in its National, State, or Provincial laws. If such consent be given on the condition of reciprocity, the condition shall be deemed to relate to the provisions of the laws, National, State, or Provincial, under which the foreign corporation or association desiring to exercise such rights is organized.

ARTICLE XIV

The nationals of either High Contracting Party shall enjoy within the territories of the other reciprocally and upon compliance with the conditions there imposed, such rights and privileges as have been or may hereafter be accorded the nationals of any other State with respect to the organization of and participation in limited liability and other corporations and associations, for pecuniary profit or otherwise, including the rights of promotion, incorporation, purchase and ownership and sale of shares and the holding of executive or official positions therein. In the exercise of the foregoing rights and with respect to the regulation or procedure concerning the organization or conduct of such corporations or associations, such nationals shall be subjected to no condition less favorable than those which have been or may hereafter be imposed upon the nationals of the most favored nation. The rights of any of such corporations or associations as may be organized or controlled or participated in by the nationals of either High Contracting Party within the territories of the other to exercise any of their functions therein, shall be governed by the laws and regulations, National, State or Provincial, which are in force or may hereafter be established within the territories of the Party wherein they propose to engage in business.

The nationals of either High Contracting Party shall, moreover, enjoy within the territories of the other, reciprocally and upon compliance with the conditions there imposed, such rights and privileges as have been or may hereafter be accorded the nationals of any other State with respect to the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain of the other.

ARTICLE XV

There shall be complete freedom of transit through the territories including territorial waters of each High Contracting Party on the routes most convenient for international transit, by rail, navigable waterway, and canal, other than the Panama Canal and waterways and canals which constitute international boundaries, to persons and goods coming from or going through the territories of the other High Contracting Party, except such persons as may be forbidden admission into its territories or goods of which the importation may be prohibited by law. Persons and goods in transit shall not be subjected to any transit duty, or to any unnecessary delays or restrictions, and shall be given national treatment as regards charges, facilities, and all other matters.

Goods in transit must be entered at the proper customhouse, but they shall be exempt from all customs or other similar duties.

All charges imposed on transport in transit shall be reasonable, having regard to the conditions of the traffic.

ARTICLE XVI

Each of the High Contracting Parties agrees to receive from the other, consular officers in those of its ports, places and cities, where it may be convenient and which are open to consular representatives of any foreign country.

Consular officers of each of the High Contracting Parties shall after entering upon their duties, enjoy reciprocally in the territories of the other all the rights, privileges, exemptions and immunities which are enjoyed by officers of the same grade of the most favored nation. As official agents, such officers shall be entitled to the high consideration of all officials, national or local, with whom they have official intercourse in the State which receives them.

The Government of each of the High Contracting Parties shall furnish free of charge the necessary exequatur of such consular officers of the other as present a regular commission signed by the chief executive of the appointing State and under its great seal; and it shall issue to a subordinate or substitute consular officer duly appointed by an accepted superior consular officer with the approbation of his Government, or by any other competent officer of that Government, such documents as according to the laws of the respective countries shall be requisite for the exercise by the appointee of the consular function. On the exhibition of an exequatur, or other document issued in lieu thereof to such subordinate, such consular officer shall be permitted to enter upon his duties and to enjoy the rights, privileges and immunities granted by this Treaty.

ARTICLE XVII

Consular officers, nationals of the State by which they are appointed, shall be exempt from arrest except when charged with the commission of offenses locally designated as crimes other than misdemeanors and subjecting the individual guilty thereof to punishment. Such officers shall be exempt from military billetings, and from service of any military or naval, administrative or police character whatsoever.

In criminal cases the attendance at the trial by a consular officer as a witness may be demanded by the prosecution or defense. The demand shall be made with all possible regard for the consular dignity and the duties of the office; and there shall be compliance on the part of the consular officer.

Consular officers shall be subject to the jurisdiction of the courts in the State which receives them in civil cases, subject to the proviso, however, that when the officer is a national of the State which appoints him and is engaged in no private occupation for gain, his testimony shall be taken orally or in writing at his residence or office and with due regard for his convenience. The officer should, however, voluntarily give his testimony at the trial whenever it is possible to do so without serious interference with his official duties.

ARTICLE XVIII

Consular officers, including employees in a consulate, nationals of the State by which they are appointed other than those engaged in private occupations for gain within the State where they exercise their functions shall be exempt from all taxes, National, State, Provincial and Municipal, levied upon their persons or upon their property, except taxes levied on account of the possession or ownership of immovable property situated in, or income derived from property of any kind situated or belonging within the territories of the State within which they exercise their functions. All consular officers and employees, nationals of the State appointing them shall be exempt from the payment of taxes on the salary, fees, or wages received by them in compensation for their consular services.

Lands and buildings situated in the territories of either High Contracting Party, of which the other High Contracting Party is the legal or equitable owner and which are used exclusively for governmental purposes by that owner, shall be exempt from taxation of every kind, National, State, Provincial and Municipal, other than assessments levied for services or local public improvements by which the premises are benefited.

ARTICLE XIX

Consular officers may place over the outer door of their respective offices the arms of their State with an appropriate inscription designating the official office. Such officers may also hoist the flag of their country on their offices including those situated in the capitals of the two countries. They may likewise hoist such flag over any boat or vessel employed in the exercise of the consular function.

The consular offices and archives shall at all times be inviolable. They shall under no circumstances be subjected to invasion by any authorities of any character within the country where such offices are located. Nor shall the authorities under

any pretext make any examination or seizure of papers or other property deposited within a consular office. Consular offices shall not be used as places of asylum. No consular officers shall be required to produce official archives in court or testify as to their contents.

Upon the death, incapacity, or absence of a consular officer having no subordinate consular officer at his post, secretaries or chancellors, whose official character may have previously been made known to the Government of the State where the consular function was exercised, may temporarily exercise the consular function of the deceased or incapacitated or absent consular officer; and while so acting shall enjoy all the rights, prerogatives and immunities granted to the incumbent.

ARTICLE XX

Consular officers of either High Contracting Party may, within their respective consular districts, address the authorities, National, State, Provincial or Municipal, for the purpose of protecting the nationals of the State by which they are appointed in the enjoyment of their rights accruing by treaty or otherwise. Complaint may be made for the infraction of those rights. Failure upon the part of the proper authorities to grant redress or to accord protection may justify interposition through the diplomatic channel, and in the absence of a diplomatic representative, a consul general or the consular officer stationed at the capital may apply directly to the Government of the country.

ARTICLE XXI

Consular officers may, in pursuance of the laws of their own country, take, at any appropriate place within their respective districts, the depositions of any occupants of vessels of their own country, or of any national of, or of any person having permanent residence within the territories of, their own country. Such officers may draw up, attest, certify and authenticate unilateral acts, deeds, and testamentary dispositions of their countrymen, and also contracts to which a countryman is a party. They may draw up, attest, certify and authenticate written instruments of any kind purporting to express or embody the conveyance or encumbrance of property of any kind within the territory of the State by which such officers are appointed, and unilateral acts, deeds, testamentary dispositions and contracts relating to property situated, or business to be transacted within, the territories of the State by which they are appointed, embracing unilateral acts, deeds, testamentary dispositions or agreements executed solely by nationals of the State within which such officers exercise their functions.

Instruments and documents thus executed and copies and translations thereof, when duly authenticated under his official seal by the consular officer shall be received as evidence in the territories of the High Contracting Parties as original documents or authenticated copies, as the case may be, and shall have the same force and effect as if drawn by and executed before a notary or other public officer duly authorized in the country by which the consular officer was appointed; provided, always that such documents shall have been drawn and executed in conformity to the laws and regulations of the country where they are designed to take effect.

ARTICLE XXII

A consular officer shall have exclusive jurisdiction over controversies arising out of the internal order of private vessels of his country, and shall alone exercise jurisdiction in cases, wherever arising, between officers and crews, pertaining to the enforcement of discipline on board, provided the vessel and the persons charged with wrongdoing shall have entered a port within his consular district. Such an officer shall also have jurisdiction over issues concerning the adjustment of wages and the execution of contracts relating thereto provided the local laws so permit.

When an act committed on board of a private vessel under the flag of the State by which the consular officer has been appointed and within the territorial waters of the State to which he has been appointed constitutes a crime according to the laws of that State, subjecting the person guilty thereof to punishment as a criminal, the consular officer shall not exercise jurisdiction except in so far as he is permitted to do so by the local law.

A consular officer may freely invoke the assistance of the local police authorities in any matter pertaining to the maintenance of internal order on board of a vessel under the flag of his country within the territorial waters of the State to which he is appointed, and upon such a request the requisite assistance shall be given.

A consular officer may appear with the officers and crews of vessels under the flag of his country before the judicial authorities of the State to which he is appointed to render assistance as an interpreter or agent.

ARTICLE XXIII

In case of the death of a national of either High Contracting Party in the territory of the other without having in the territory of his decease any known heirs or testamentary executors by him appointed, the competent local authorities shall at once inform the nearest consular officer of the State of which the deceased was a national of the fact of his death, in order that necessary information may be forwarded to the parties interested.

In case of the death of a national of either of the High Contracting Parties without will or testament, in the territory of the other High Contracting Party, the consular officer of the State of which the deceased was a national and within whose district the deceased made his home at the time of his death, shall, so far as the laws of the country permit and pending the appointment of an administrator and until letters of administration have been granted, be deemed qualified to take charge of the property left by the decedent for the preservation and protection of the same. Such consular officer shall have the right to be appointed as administrator within the discretion of a tribunal or other agency controlling the administration of estates provided the laws of the place where the estate is administered so permit.

Whenever a consular officer accepts the office of administrator of the estate of a deceased countryman, he subjects himself as such to the jurisdiction of the tribunal or other agency making the appointment for all necessary purposes to the same extent as a national of the country where he was appointed.

ARTICLE XXIV

A consular officer of either High Contracting Party may in behalf of his non-resident countrymen receipt for their distributive shares derived from estates in process of probate or accruing under the provisions of so-called Workmen's Compensation Laws or other like statutes provided he remit any funds so received through the appropriate agencies of his Government to the proper distributees, and provided further that he furnish to the authority or agency making distribution through him reasonable evidence of such remission.

ARTICLE XXV

A consular officer of either High Contracting Party shall have the right to inspect within the ports of the other High Contracting Party within his consular district, the private vessels of any flag destined or about to clear for ports of the country appointing him in order to observe the sanitary conditions and measures taken on board such vessels, and to be enabled thereby to execute intelligently bills of health and other documents required by the laws of his country, and to inform his Government concerning the extent to which its sanitary regulations have been observed at ports of departure by vessels destined to its ports, with a view to facilitating entry of such vessels therein.

ARTICLE XXVI

Each of the High Contracting Parties agrees to permit the entry free of all duty and without examination of any kind, of all furniture, equipment and supplies intended for official use in the consular offices of the other, and to extend to such consular officers of the other and their families and suites as are its nationals, the privilege of entry free of duty of their baggage and all other personal property, whether accompanying the officer to his post or imported at any time during his incumbency thereof; provided, nevertheless, that no article, the importation of which is prohibited by the law of either of the High Contracting Parties, may be brought into its territories.

It is understood, however, that this privilege shall not be extended to consular officers who are engaged in any private occupation for gain in the countries to which they are accredited, save with respect to governmental supplies.

ARTICLE XXVII

All proceedings relative to the salvage of vessels of either High Contracting Party wrecked upon the coasts of the other shall be directed by the consular officer of the country to which the vessel belongs and within whose district the wreck may have occurred. Pending the arrival of such officer, who shall be immediately informed of the occurrence, the local authorities shall take all necessary measures for the protection of persons and the preservation of wrecked property. The local authorities shall not otherwise interfere than for the maintenance of order, the protection of the interests of the salvors, if these do not belong to the crews that have been wrecked and to carry into effect the arrangements made for the entry and exportation of the merchandise saved. It is understood that such merchandise is not to be subjected to any customhouse charges, unless it be intended for consumption in the country where the wreck may have taken place.

The intervention of the local authorities in these different cases shall occasion no expense of any kind, except such as may be caused by the operations of salvage and the preservation of the goods saved, together with such as would be incurred under similar circumstances by vessels of the nation.

ARTICLE XXVIII

Subject to any limitation or exception hereinabove set forth, or hereafter to be agreed upon the territories of the High Contracting Parties to which the provisions of this Treaty extend shall be understood to comprise all areas of land, water, and air over which the Parties respectively claim and exercise dominion as sovereign thereof, except the Panama Canal Zone.

ARTICLE XXIX

Except as provided in the third paragraph of this Article the present Treaty shall remain in full force for the term of ten years from the date of the exchange of ratifications, on which date it shall begin to take effect in all of its provisions.

If within one year before the expiration of the aforesaid period of ten years neither High Contracting Party notifies to the other an intention of modifying by change or omission, any of the provisions of any of the articles in this Treaty or of terminating it upon the expiration of the aforesaid period, the Treaty shall remain in full force and effect after the aforesaid period and until one year from such a time as either of the High Contracting Parties shall have notified to the other an intention of modifying or terminating the Treaty.

The fifth and sixth paragraphs of Article VII and Articles IX and XI shall remain in force for twelve months from the date of exchange of ratifications, and if not then terminated on ninety days' previous notice shall remain in force until either of the High Contracting Parties shall enact legislation inconsistent therewith when the same shall automatically lapse at the end of sixty days from such enactment, and on such lapse each High Contracting Party shall enjoy all the rights which it would have possessed had such paragraphs or articles not been embraced in the Treaty.

The present Treaty shall, from the date of the exchange of ratifications, be deemed to supplant, terminate and annul the Treaty of Friendship, Commerce and Navigation, concluded by the United States and Honduras on July 4, 1864.

ARTICLE XXX

The present Treaty shall be ratified, and the ratifications thereof shall be exchanged at Tegucigalpa as soon as possible.

In witness whereof the respective plenipotentiaries have signed the same and have affixed their seals thereto.

Done in duplicate, in the English and Spanish languages at Tegucigalpa, this seventh day of December, nineteen hundred and twenty-seven.

[SEAL] GEORGE T. SUMMERLIN
[SEAL] F. DAVILA

PREVENTION OF SMUGGLING OF ALCOHOLIC BEVERAGES INTO THE UNITED STATES FROM GREECE

In executive session this day the following convention was ratified and, on motion of Mr. BORAH, the injunction of secrecy was removed therefrom:

THE WHITE HOUSE, *April 28, 1928.*

TO THE SENATE:

To the end that I may receive the advice and consent of the Senate to ratification, I transmit herewith a convention to aid in the prevention of the smuggling of alcoholic beverages into the United States, concluded between the United States and Greece on April 25, 1928.

CALVIN COOLIDGE.

DEPARTMENT OF STATE,
Washington, April 27, 1928.

THE PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approve thereof, a convention to aid in the prevention of the smuggling of alcoholic beverages into the United States, concluded between the United States and Greece on April 25, 1928.

Respectfully submitted.

FRANK B. KELLOGG.

The United States of America and Greece, being desirous of avoiding any difficulties which might arise between them in connection with the laws in force in the United States on the subject of alcoholic beverages have decided to conclude a Convention for that purpose, and have appointed as their Plenipotentiaries:

The President of the United States of America: Frank B. Kellogg, Secretary of State of the United States, and

The President of the Hellenic Republic: Charalambos Simopoulos, Envoy Extraordinary and Minister Plenipotentiary of Greece at Washington,

Who, having communicated their full powers found in good and due form, have agreed as follows:

ARTICLE I

The High Contracting Parties respectively retain their rights and claims, without prejudice by reason of this agreement, with respect to the extent of their territorial jurisdiction.

ARTICLE II

The President of the Hellenic Republic agrees that Greece will raise no objection to the boarding of private vessels under the Greek flag outside the limits of territorial waters by the authorities of the United States, its territories or possessions in order that enquiries may be addressed to those on board and an examination be made of the ship's papers for the purpose of ascertaining whether the vessel or those on board are endeavoring to import or have imported alcoholic beverages into the United States, its territories or possessions in violation of the laws there in force. When such enquiries and examination show a reasonable ground for suspicion, a search of the vessel which shall have given ground for such suspicion, may be effected.

ARTICLE III

If there is reasonable cause for belief that the vessel has committed or is committing or attempting to commit an offense against the laws of the United States, its territories or possessions prohibiting the importation of alcoholic beverages, the vessel may be seized and taken into a port of the United States, its territories or possessions for adjudication in accordance with the pertinent provisions of law.

ARTICLE IV

The boarding referred to in Article II shall not be made at a greater distance from the coast of the United States, its territories or possessions then can be traversed in one hour by the vessel suspected of endeavoring to commit the offense. In cases, however, in which the liquor is intended to be conveyed to the United States, its territories or possessions by a vessel other than the one boarded and searched, it shall be the speed of the former vessel and not the speed of the vessel boarded, which shall determine the distance from the coast within which the action referred to in Article II may be taken.

ARTICLE V

No penalty or forfeiture under the laws of the United States shall be applicable or attach to alcoholic liquors or to vessels or persons by reason of the carriage of such liquors, when such liquors are listed as sea stores or cargo destined for a port foreign to the United States, its territories or possessions on board Greek vessels voyaging to or from ports of the United States, or its territories or possessions or passing through the territorial waters thereof, and such carriage shall be as now provided by law with respect to the transit of such liquors through the Panama Canal, provided that such liquors shall be kept under seal continuously while the vessel on which they are carried remains within said territorial waters and that no part of such liquors shall at any time or place be unladen within the United States, its territories or possessions.

ARTICLE VI

Any claim preferred in behalf of a Greek vessel for compensation on the grounds that it has suffered loss or injury through the improper or unreasonable exercise of the rights conferred by Article II of this Convention or on the ground that it has not been given the benefit of Article V shall be referred for the joint consideration of two persons, one of whom shall be nominated by each of the High Contracting Parties and whose decision shall be given effect if made in common accord.

When the said persons shall fail to agree, the claim shall be referred to an umpire selected by the two Governments; should the Governments fail to agree on the choice of an umpire, the claim shall be referred to the Permanent Court of Arbitration at The Hague, maintained under the Convention for the Pacific Settlement of International Disputes, signed at The Hague October 18, 1907. The Arbitral Tribunal shall be constituted in accordance with Article 87 (Chapter IV) and Article 59 (Chapter III) of that Convention. The proceedings shall be regulated by the provisions in the said Chapters III and IV (special regard being had to Articles 70 and 74, but excepting Articles 53 and 54) which the Tribunal may consider to be applicable and to be consistent with the provisions of this

Convention. The sums of money which may be awarded by the Tribunal on account of any claim shall be paid within eighteen months after the date of the final award without interest and without deduction, save as hereafter specified. Each Government shall bear its own expenses. The expenses of the Tribunal shall be defrayed by a ratable deduction of the amount of the sums awarded by it, at a rate of five per cent on such sums, or at such lower rate as may be agreed upon between the two Governments. The deficiency, if any, shall be defrayed in equal moieties by the two Governments.

ARTICLE VII

This Convention shall be ratified by the High Contracting Parties. It shall come into force on the day of the exchange of ratifications which shall take place at Washington as soon as possible and shall remain in force for one year.

Three months before the expiration of the said period of one year, either of the High Contracting Parties may give notice of its desire to propose modifications in the terms of the Convention.

If an agreement in regard to such modifications has not been reached before the expiration of the year, the Convention shall lapse at the end of said period.

If no notice is given on either side of the desire to proposed modifications, the Convention shall remain in force for another year, and so on automatically, but subject always in respect of each such period of a year to the right on either side to propose as provided above three months before the expiration of the said year, modifications in the Convention that they may deem expedient, and to the provision that if an agreement in regard to such modifications has not been reached before the expiration of the year, the Convention shall lapse at the end of said period.

In the event that either of the High Contracting Parties shall be prevented either by judicial decision or legislative action from giving full effect to the provisions of the present Convention the said Convention shall automatically lapse, and, on such lapse or whenever this Convention shall cease to be in force, each High Contracting Party shall enjoy all the rights which it would have possessed had this Convention not been concluded.

In witness whereof, the respective Plenipotentiaries have signed the present Convention in duplicate in the English and French languages and have hereunto affixed their seals.

Done at the city of Washington this twenty-fifth day of April, one thousand nine hundred and twenty-eight.

CH. SIMOPOULOS. [SEAL.]

FRIENDSHIP, COMMERCE, AND CONSULAR RIGHTS WITH LATVIA

In executive session this day the following treaty was ratified and, on motion of Mr. BORAH, the injunction of secrecy was removed therefrom:

THE WHITE HOUSE, *May 16, 1928.*

To the Senate:

With a view to receiving the advice and consent of the Senate to ratification, I transmit a treaty of friendship, commerce, and consular rights between the United States and Latvia, signed at Riga, on April 20, 1928.

The interpretative protocol accompanying the treaty is also transmitted, for the information of the Senate in its consideration of the treaty.

CALVIN COOLIDGE.

DEPARTMENT OF STATE, *May 14, 1928.*

The PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate, to receive the advice and consent of that body to ratification, if his judgment approve thereof, a treaty of friendship, commerce, and consular rights between the United States and Latvia, signed at Riga on April 20, 1928.

Accompanying the treaty is a protocol interpretative of provisions of articles 16, 17, and 19 of the treaty.

Respectfully submitted.

FRANK B. KELLOGG.

TREATY OF FRIENDSHIP, COMMERCE, AND CONSULAR RIGHTS BETWEEN THE UNITED STATES OF AMERICA AND LATVIA

The United States of America and the Republic of Latvia, desirous of strengthening the bond of peace which happily prevails between them, by arrangements designed to promote friendly intercourse between their respective territories through provisions responsive to the spiritual, cultural, economic and commercial aspirations of the peoples thereof, have resolved to conclude a Treaty of Friendship, Commerce and Consular Rights and for that purpose have appointed as their plenipotentaries:

The President of the United States of America:

FREDERICK W. B. COLEMAN, Envoy Extraordinary and Minister Plenipotentiary,

and

The President of the Republic of Latvia:

ANTONS BALODIS, Minister of Foreign Affairs,

Who, having communicated to each other their full powers found to be in due form, have agreed upon the following articles:

ARTICLE I

The nationals of each of the High Contracting Parties shall be permitted to enter, travel and reside in the territories of the other; to exercise liberty of conscience and freedom of worship; to engage in scientific, religious, philanthropic and commercial work of every kind without interference; to carry on every form of commercial activity which is not forbidden by the local law; to engage in every trade, vocation, manufacturing industry and profession, not reserved exclusively to nationals of the country; to own, erect or lease and occupy appropriate buildings and to lease lands for residential, scientific, religious, philanthropic, manufacturing, commercial and mortuary purposes; to employ agents of their choice, and generally to do anything incidental to or necessary for the enjoyment of any of the foregoing privileges upon the same terms as nationals of the State of residence or as nationals of the nation hereafter to be most favored by it, submitting themselves to all local laws and regulations duly established.

The nationals of either High Contracting Party within the territories of the other shall not be subjected to the payment of any internal charges or taxes other or higher than those that are exacted of and paid by its nationals.

The nationals of each High Contracting Party shall enjoy freedom of access to the courts of justice of the other on conforming to the local laws, as well for the prosecution as for the defense of their rights, and in all degrees of jurisdiction established by law.

The nationals of each High Contracting Party shall receive within the territories of the other, upon submitting to conditions imposed upon its nationals, the most constant protection and security for their persons and property, and shall enjoy in this respect that degree of protection that is required by international law. Their property shall not be taken without due process of law and without payment of just compensation.

Nothing contained in this Treaty shall be construed to affect existing statutes of either of the High Contracting Parties in relation to the immigration, admission or sojourn of aliens or the right of either of the High Contracting Parties to enact such statutes.

ARTICLE II

With respect to that form of protection granted by National, State or Provincial laws establishing civil liability for injuries or for death, and giving to relatives or heirs or dependents of an injured party a right of action or a pecuniary benefit, such relatives or heirs or dependents of the injured party, himself a national of either of the High Contracting Parties and within any of the territories of the other, shall regardless of their alienage or residence outside of the territory where the injury occurred, enjoy the same rights and privileges as are or may be granted to nationals, and under like conditions.

ARTICLE III

The dwellings, warehouses, manufactories, shops, and other places of business, and all premises thereto appertaining of the nationals of each of the High Contracting Parties in the territories of the other, used for any purposes set forth in Article I, shall be respected. It shall not be allowable to make a domiciliary visit to, or search of, any such buildings and premises, or there to examine and inspect books, papers or accounts, except under the conditions and in conformity with the forms prescribed by the laws, ordinances and regulations for nationals.

ARTICLE IV

Where, on the death of any person holding real or other immovable property or interests therein within the territories of one High Contracting Party, such property or interests therein would, by the laws of the country or by a testamentary disposition, descend or pass to a national of the other High Contracting Party, whether resident or non-resident, were he not disqualified by the laws of the country where such property or interests therein is or are situated, such national shall be allowed a term of three years in which to sell the same which term may be reasonably prolonged if circumstances render it necessary and withdraw the proceeds thereof, without restraint or interference, and exempt from any succession, probate or

administrative duties or charges other than those which may be imposed in like cases upon the nationals of the country from which such proceeds may be drawn.

Nationals of either High Contracting Party may have full power to dispose of their personal property of every kind within the territories of the other, by testament, donation, or otherwise, and their heirs, legatees and donees, of whatsoever nationality, whether resident or non-resident, shall succeed to such personal property, and may take possession thereof, either by themselves or by others acting for them, and retain or dispose of the same at their pleasure subject to the payment of such duties or charges only as the nationals of the High Contracting Party within whose territories such property may be or belong shall be liable to pay in like cases.

ARTICLE V

The nationals of each of the High Contracting Parties in the exercise of the rights of freedom of worship, within the territories of the other, as hereinabove provided, may, without annoyance or molestation of any kind by reason of their religious belief or otherwise, conduct services either within their own houses or within any appropriate buildings which they may be at liberty to erect and maintain in convenient situations, provided their teachings or practices are not contrary to public order or public morals; and they may also be permitted to bury their dead according to their religious customs in suitable and convenient places established and maintained for the purpose, subject to the reasonable mortuary and sanitary laws and regulations of the place of burial.

ARTICLE VI

In the event of war between either High Contracting Party and a third State, such Party may draft for compulsory military service nationals of the other having a permanent residence within its territories and who have formally, according to its laws, declared an intention to adopt its nationality by naturalization, unless such individuals depart from the territories of said belligerent Party within sixty days after a declaration of war.

ARTICLE VII

Between the territories of the High Contracting Parties there shall be freedom of commerce and navigation. The nationals of each of the High Contracting Parties equally with those of the most favored nation, shall have liberty freely to come with their vessels and cargoes to all places, ports and waters of every kind within the territorial limits of the other which are or may be open to foreign commerce and navigation.

Each of the High Contracting Parties binds itself unconditionally to impose no higher or other duties or conditions and no prohibition on the importation of any article, the growth, produce, or manufacture, of the territories of the other than are or shall be imposed on the importation of any like article, the growth, produce, or manufacture of any other foreign country.

Each of the High Contracting Parties also binds itself unconditionally to impose no higher or other charges or other restrictions or prohibitions on goods exported to the territories of the other High Contracting Party than are imposed on goods exported to any other foreign country.

Nothing in this Treaty shall be construed to restrict the right of either High Contracting Party to impose, on such terms as it may see fit, prohibitions or restrictions relating to national defense, public security and public order; prohibitions or restrictions of a sanitary character designed to protect human, animal or plant life; regulations for the enforcement of police or revenue laws.

Any advantage of whatsoever kind which either High Contracting Party may extend to any article, the growth, produce, or manufacture of any other foreign country shall simultaneously and unconditionally, without request and without compensation, be extended to the like article, the growth, produce, or manufacture of the other High Contracting Party.

All articles which are or may be legally imported from foreign countries into ports of the United States or are or may be legally exported therefrom in vessels of the United States may likewise be imported into these ports or exported therefrom in Latvian vessels, without being liable to any other or higher duties or charges whatsoever than if such articles were imported or exported in vessels of the United States; and, reciprocally, all articles which are or may be legally imported from foreign countries into the ports of Latvia or are or may be legally exported therefrom in Latvian vessels may likewise be imported into these ports or exported therefrom in vessels of the United States without being liable to any other or higher duties or charges whatsoever than if such articles were imported or exported in Latvian vessels.

In the same manner there shall be perfect reciprocal equality in relations to the flags of the two countries with regard to bounties, drawbacks, and other privileges of this nature of whatever denomination which may be allowed in the territories of each of the High Contracting Parties, on goods imported or exported in national vessels so that such bounties, drawbacks and other privileges shall also and in like manner be allowed on goods imported or exported in vessels of the other country.

With respect to the amount and collection of duties on imports and exports of every kind, each of the two High Contracting Parties binds itself to give to the nationals, vessels and goods of the other the advantage of every favor, privilege or immunity which it shall have accorded to the nationals, vessels and goods of a third State, and regardless of whether such favored State shall have been accorded such treatment gratuitously or in return for reciprocal compensatory treatment. Every such favor, privilege or immunity which shall hereafter be granted the nationals, vessels or goods of a third State shall simultaneously and unconditionally, without request and without compensation, be extended to the other High Contracting Party, for the benefit of itself, its nationals and vessels.

ARTICLE VIII

The stipulations of Article VII of this Treaty shall not extend

(*a*) To the treatment which either High Contracting Party shall accord to purely border traffic within a zone not exceeding ten miles (15 kilometers) wide on either side of its customs frontier;

(*b*) To the treatment which is accorded by the United States to the commerce of Cuba under the provisions of the Commercial Convention concluded by the United States and Cuba on December 11th, 1902, or any other commercial convention which hereafter may be concluded by the United States with Cuba, or to the commerce of the United States with any of its dependencies and the Panama Canal Zone under existing or future laws:

(c) To the customs preferences or other facilities of whatever nature which are or may be granted by Latvia in favor of Estonia, Finland, Lithuania or Russia and (or to the special privileges resulting to States in customs or economic union with Latvia so long as such preferences, facilities or special privileges are not accorded to any other State.

ARTICLE IX

The nationals and merchandise of each High Contracting Party within the territories of the other shall receive the same treatment as nationals and merchandise of the country with regard to internal taxes, transit duties, charges in respect to warehousing and other facilities and the amount of drawbacks and bounties.

ARTICLE X

No duties of tonnage, harbor, pilotage, lighthouse, quarantine, or other similar or corresponding duties or charges of whatever denomination, levied in the name or for the profit of the Government, public functionaries, private individuals, corporations or establishments of any kind shall be imposed in the ports of the territories of either country upon the vessels of the other, which shall not equally, under the same conditions, be imposed on national vessels. Such equality of treatment shall apply reciprocally to the vessels of the two countries respectively from whatever place they may arrive and whatever may be their place of destination.

ARTICLE XI

Merchant vessels and other privately owned vessels under the flag of either of the High Contracting Parties, and carrying the papers required by its national laws in proof of nationality shall, both within the territorial waters of the other High Contracting Party and on the high seas, be deemed to be the vessels of the Party whose flag is flown.

ARTICLE XII

Merchant vessels and other privately owned vessels under the flag of either of the High Contracting Parties shall be permitted to discharge portions of cargoes at any port open to foreign commerce in the territories of the other High Contracting Party, and to proceed with the remaining portions of such cargoes to any other ports of the same territories open to foreign commerce, without paying other or higher tonnage dues or port charges in such cases than would be paid by national vessels in like circumstances, and they shall be permitted to load in like manner at different ports in the same voyage outward, provided, however, that the coasting trade and the towing service of the United States and the Republic of Latvia are exempt from the provisions of this Article and from the other provisions of this Treaty, and are to be regulated according to the laws of the United States and the Republic of Latvia, respectively, in relation thereto. It is agreed, how-

ever, that the nationals of either High Contracting Party shall within the territories of the other enjoy with respect to the coasting trade and the towing service the most favored nation treatment.

The provisions of this Treaty relating to the mutual concession of national treatment in matters of navigation do not apply to special privileges reserved by either High Contracting Party for the fishing industry and for the national ship-building industry.

ARTICLE XIII

Limited liability and other corporations and associations, whether or not for pecuniary profit, which have been or may hereafter be organized in accordance with and under the laws, National, State or Provincial, of either High Contracting Party and maintain a central office within the territories thereof, shall have their juridical status recognized by the other High Contracting Party provided that they pursue no aims within its territories contrary to its laws. They shall enjoy free access to the courts of law and equity, on conforming to the laws regulating the matter, as well for the prosecution as for the defense of rights in all the degrees of jurisdiction established by law.

The right of such corporations and associations of either High Contracting Party so recognized by the other to establish themselves within its territories, establish branch offices and fulfill their functions therein shall depend upon, and be governed solely by, the consent of such Party as expressed in its National, State or Provincial laws and regulations.

ARTICLE XIV

The nationals of either High Contracting Party shall enjoy within the territories of the other, reciprocally and upon compliance with the conditions there imposed, such rights and privileges as have been or may hereafter be accorded the nationals of any other State with respect to the organization of and participation in limited liability and other corporations and associations, for pecuniary profit or otherwise, including the rights of promotion, incorporation, purchase and ownership and sale of shares and the holding of executive or official positions therein. In the exercise of the foregoing rights and with respect to the regulation or procedure concerning the organization or conduct of such corporations or associations, such nationals shall be subjected to no conditions less favorable than those which have been or may hereafter be imposed upon the nationals of the most favored nation. The rights of any such corporations or associations as may be organized or controlled or participated in by the nationals of either High Contracting Party within the territories of the other to exercise any of their functions therein, shall be governed by the laws and regulations, National, State or Provincial, which are in force or may hereafter be established within the territories of the Party wherein they propose to engage in business. The foregoing stipulations do not apply to the organization of and participation in political associations.

The nationals of either High Contracting Party shall, moreover, enjoy within the territories of the other, reciprocally and upon compliance with the conditions there imposed, such rights and privileges as have been or may hereafter be accorded the nationals of any other State with respect to the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain of the other.

ARTICLE XV

Commercial travelers representing manufacturers, merchants and traders domiciled in the territories of either High Contracting Party shall on their entry into and sojourn in the territories of the other Party and on their departure therefrom be accorded the most favored nation treatment in respect of customs and other privileges and of all charges and taxes of whatever denomination applicable to them or to their samples.

If either High Contracting Party require the presentation of an authentic document establishing the identity and authority of a commercial traveler, a signed statement by the concern or concerns represented, certified by a consular officer of the country of destination, shall be accepted as satisfactory.

ARTICLE XVI

There shall be complete freedom of transit through the territories including territorial waters of each High Contracting Party on the routes most convenient for international transit, by rail, navigable waterway, and canal, other than the Panama Canal and waterways and canals which constitute international boundaries, to persons and goods coming from, going to or passing through the territories of the other High Contracting Party, except such persons as may be forbidden admission into its territories or goods of which the importation may be prohibited by law or regulations. The measures of a general or particular character which either of the High Contracting Parties is obliged to take in case of an emergency affecting the safety of the State or the vital interests of the country may in exceptional cases and for as short a period as possible involve a deviation from the provisions of this paragraph; it being understood that the principle of freedom of transit must be observed to the utmost possible extent.

Persons and goods in transit shall not be subjected to any transit duty, or to any unnecessary delays or restrictions, or to any discrimination as regards charges, facilities or any other matters.

Goods in transit must be entered at the proper custom house, but they shall be exempt from all customs or other similar duties.

All charges imposed on transport in transit shall be reasonable, having regard to the conditions of the traffic.

ARTICLE XVII

Each of the High Contracting Parties agrees to receive from the other consular officers in those of its ports, places and cities, where it may be convenient and which are open to consular representatives of any foreign country.

Consular officers of each of the High Contracting Parties shall, after entering upon their duties, enjoy reciprocally in the territories of the other all the rights, privileges, exemptions and immunities which are enjoyed by officers of the same grade of the most favored nation. As official agents, such officers shall be entitled to the high consideration of all officials, national or local, with whom they have official intercourse in the State which receives them.

The Government of each of the High Contracting Parties shall furnish free of charge the necessary exequatur of such consular officers of the other as present a regular commission signed by the chief executive of the appointing State and under its great seal; and it shall issue to a subordinate or substitute consular officer duly appointed by an accepted superior consular officer with the approbation of his Government, or by any other competent officer of that Government, such documents as according to the laws of the respective countries shall be requisite for the exercise by the appointee of the consular function. On the exhibition of an exequatur, or other document issued in lieu thereof to such subordinate, such consular officer shall be permitted to enter upon his duties and to enjoy the rights, privileges and immunities granted by this Treaty.

ARTICLE XVIII

Consular officers, nationals of the State by which they are appointed, shall be exempt from arrest except when charged with the commission of offenses locally designated as crimes other than misdemeanors and subjecting the individual guilty thereof to punishment. Such officers shall be exempt from military billetings, and from service of any military or naval, administrative or police character whatsoever.

In criminal cases the attendance at the trial by a consular officer as a witness may be demanded by the prosecution or defense. The demand shall be made with all possible regard for the consular dignity and the duties of the office; and there shall be compliance on the part of the consular officer.

Consular officers shall be subject to the jurisdiction of the courts in the State which receives them in civil cases, subject to the proviso, however, that when the officer is a national of the State which appoints him and is engaged in no private occupation for gain, his testimony shall be taken orally or in writing at his residence or office and with due regard for his convenience. The officer should, however, voluntarily give his testimony at the trial whenever it is possible to do so without serious interference with his official duties.

ARTICLE XIX

Consular officers, including employees in a consulate, nationals of the State by which they are appointed other than those engaged in private occupations for gain within the State where they exercise their functions shall be exempt from all taxes, National, State, Provincial, and Municipal, levied upon their persons or upon their property, except taxes levied on account of the possession or ownership of immovable property situated in, or income derived from property of any kind situated or belonging within the territories of the State within which they exercise their functions. All consular officers and employees, nationals of the State appointing them shall be exempt from the payment of taxes on the salary, fees or wages received by them in compensation for their consular services.

Lands and buildings situated in the territories of either High Contracting Party, of which the other High Contracting Party is the legal or equitable owner and which are used exclusively for governmental purposes by that owner, shall be exempt from taxation of every kind, National, State, Provincial, and Municipal, other than assessments levied for services or local public improvements by which the premises are benefited.

ARTICLE XX

Consular officers may place over the outer door of their respective offices the arms of their State with an appropriate inscription designating the official office. Such officers may also hoist the flag of their country on their offices including those situated in the capitals of the two countries. They may likewise hoist such flag over any boat or vessel employed in the exercise of the consular function.

The consular offices and archives shall at all times be inviolable. They shall under no circumstances be subjected to invasion by any authorities of any character within the country where such offices are located. Nor shall the authorities under any pretext make any examination or seizure of papers or other property deposited within a consular office. Consular offices shall not be used as places of asylum. No consular officer shall be required to produce official archives in court or testify as to their contents.

Upon the death, incapacity, or absence of a consular officer having no subordinate consular officer at his post, secretaries or chancellors, whose official character may have previously been made known to the Government of the State where the consular function was exercised, may temporarily exercise the consular function of the deceased or incapacitated or absent consular officer; and while so acting shall enjoy all the rights, prerogatives and immunities granted to the incumbent.

ARTICLE XXI

Consular officers, nationals of the State by which they are appointed, may, within their respective consular districts, address the authorities, National, State, Provincial, or Municipal, for the purpose or protecting their countrymen in the enjoyment of their rights accruing by treaty or otherwise. Complaint may be made for the infraction of those rights. Failure upon the part of the proper authorities to grant redress or to accord protection may justify interposition through the diplomatic channel, and in the absence of a diplomatic representative, a consul general or the consular officer stationed at the capital may apply directly to the government of the country.

ARTICLE XXII

Consular officers may, in pursuance of the laws of their own country, take, at any appropriate place within their respective districts, the depositions of any occupants of vessels of their own country, or of any national of, or of any person having permanent residence within the territories of, their own country. Such officers may draw up, attest, certify and authenticate unilateral acts, deeds, and testamentary dispositions of their countrymen, and also contracts to which a countryman is a party. They may draw up, attest, certify and authenticate written instruments of any kind purporting to express or embody the conveyance or encumbrance of property of any kind within the territory of the State by which such officers are appointed, and unilateral acts, deeds, testamentary dispositions and contracts relating to property situated, or business to be transacted within, the territories of the State by which they are appointed, embracing unilateral acts, deeds, testamentary dispositions or agreements executed solely by nationals of the State within which such officers exercise their functions.

Instruments and documents thus executed and copies and translations thereof, when duly authenticated under his official seal by the consular officer shall be received as evidence in the territories of the High Contracting Parties as original documents or authenticated copies, as the case may be, and shall have the same force and effect as if drawn by and executed before a notary or other public officer duly authorized in the country by which the consular officer was appointed; provided, always, that such documents shall have been drawn and executed in conformity to the laws and regulations of the country where they are designed to take effect.

ARTICLE XXIII

A consular officer shall have exclusive jurisdiction over controversies arising out of the internal order of private vessels of his country, and shall alone exercise jurisdiction in cases, wherever arising, between officers and crews, pertaining to the enforcement of discipline on board, provided the vessel and the persons charged with wrongdoing shall have entered a port within his consular district. Such an officer shall also have jurisdiction over issues concerning the adjustment of wages and the execution of contracts relating thereto provided the local laws so permit.

When an act committed on board of a private vessel under the flag of the State by which the consular officer has been appointed and within the territorial waters of the State to which he has been appointed constitutes a crime according to the laws of that State, subjecting the person guilty thereof to punishment as a criminal, the consular officer shall not exercise jurisdiction except in so far as he is permitted to do so by the local law.

A consular officer may freely invoke the assistance of the local police authorities in any matter pertaining to the maintenance of internal order on board of a vessel under the flag of his country within the territorial waters of the State to which he is appointed, and upon such a request the requisite assistance shall be given.

A consular officer may appear with the officers and crews of vessels under the flag of his country before the judicial authorities of the State to which he is appointed to render assistance as an interpreter or agent.

ARTICLE XXIV

In case of the death of a national of either High Contracting Party in the territory of the other without having in the territory of his decease any known heirs or testamentary executors by him appointed, the competent local authorities shall at once inform the nearest consular officer of the State of which the deceased was a national of the fact of his death, in order that necessary information may be forwarded to the parties interested.

In case of the death of a national of either of the High Contracting Parties without will or testament, in the territory of the other High Contracting Party, the consular officer of the State of which the deceased was a national and within whose district the deceased made his home at the time of death, shall, so far as the laws of the country permit and pending the appointment of an administrator and until letters of administration have been granted, be deemed qualified to take charge of the property left by the decedent for the preservation and protection of the same. Such consular officer shall have the right to be appointed as administrator within the discretion of a tribunal or other agency controlling the administration of estates provided the laws of the place where the estate is administered so permit.

Whenever a consular officer accepts the office of administrator of the estate of a deceased countryman, he subjects himself as such to the jurisdiction of the tribunal or other agency making the appointment for all necessary purposes to the same extent as a national of the country where he was appointed.

ARTICLE XXV

A consular officer of either High Contracting Party may in behalf of his non-resident countrymen receipt for their distributive shares derived from estates in process of probate or accruing under the provisions of so-called Workmen's Compensation Laws or other like statutes provided he remit any funds so received through the appropriate agencies of his Government to the proper distributees, and provided further that he furnish to the authority or agency making distribution through him reasonable evidence of such remission.

ARTICLE XXVI

A consular officer of either High Contracting Party shall have the right to inspect within the ports of the other High Contracting Party within his consular district, the private vessels of any flag destined or about to clear for ports of the country appointing him in order to observe the sanitary conditions and measures taken on board such vessels, and to be enabled thereby to execute intelligently bills of health and other documents required by the laws of his country, and to inform his Government concerning the extent to which its sanitary regulations have been observed at ports of departure by vessels destined to its ports, with a view to facilitating entry of such vessels therein.

ARTICLE XXVII

Each of the High Contracting Parties agrees to permit the entry free of all duty of all furniture, equipment and supplies intended for official use in the consular offices of the other, and to extend to such consular officers of the other and their families and suites as are its nationals, the privilege of entry free of duty of their baggage and all other personal property accompanying the officer to his post; provided, nevertheless, that no article, the importation of which is prohibited by the law of either of the High Contracting Parties, may be brought into its territories. Personal property imported by consular officers, their families or suites during the incumbency of the officers in office shall be accorded the customs privileges and exemptions accorded to consular officers of the most favored nation.

It is understood, however, that the privileges of this Article shall not be extended to consular officers who are engaged in any private occupation for gain in the countries to which they are accredited, save with respect to governmental supplies.

ARTICLE XXVIII

All proceedings relative to the salvage of vessels of either High Contracting Party wrecked upon the coasts of the other

shall be directed by the consular officer of the country to which the vessel belongs and within whose district the wreck may have occurred. Pending the arrival of such officer, who shall be immediately informed of the occurrence, the local authorities shall take all necessary measures for the protection of persons and the preservation of wrecked property. The local authorities shall not otherwise interfere than for the maintenance of order, the protection of the interests of the salvors, if these do not belong to the crews that have been wrecked, and to carry into effect the arrangements made for the entry and exportation of the merchandise saved. It is understood that such merchandise is not to be subjected to any custom house charges, unless it be intended for consumption in the country where the wreck may have taken place.

The intervention of the local authorities in these different cases shall occasion no expense of any kind, except such as may be caused by the operations of salvage and the preservation of the goods saved, together with such as would be incurred under similar circumstances by vessels of the nation.

ARTICLE XXIX

Subject to any limitation or exception hereinabove set forth, or hereafter to be agreed upon, the territories of the High Contracting Parties to which the provisions of this Treaty extend shall be understood to comprise all areas of land, water, and air over which the Parties respectively claim and exercise dominion as sovereign thereof, except the Panama Canal Zone.

ARTICLE XXX

Except as provided in the third paragraph of this Article the present Treaty shall remain in full force for the term of ten years from the date of the exchange of ratifications, on which date it shall begin to take effect in all of its provisions.

If within one year before the expiration of the aforesaid period of ten years neither High Contracting Party notifies to the other an intention of modifying, by change or omission, any of the provisions of any of the articles in this Treaty or of terminating it upon the expiration of the aforesaid period, the Treaty shall remain in full force and effect after the aforesaid period and until one year from such a time as either of the High Contracting Parties shall have notified to the other an intention of modifying or terminating the Treaty.

The sixth and seventh paragraphs of Article VII and Articles X and XII shall remain in force for twelve months from the date of exchange of ratifications, and if not then terminated on ninety days' previous notice shall remain in force until either of the High Contracting Parties shall enact legislation inconsistent therewith when the same shall automatically lapse at the end of sixty days from such enactment, and on such lapse each High Contracting Party shall enjoy all the rights which it would have possessed had such paragraphs or articles not been embraced in the Treaty.

ARTICLE XXXI

The present Treaty shall be ratified, and the ratifications thereof shall be exchanged at Riga as soon as possible.

In witness whereof the respective Plenipotentiaries have signed the same and have affixed their seals hereto.

Done in duplicate, at Riga, this 20th day of April, 1928.

[SEAL.] F. W. B. COLEMAN. [SEAL.] A. BALODIS.

PROTOCOL ACCOMPANYING TREATY OF FRIENDSHIP, COMMERCE AND CONSULAR RIGHTS

At the moment of signing the Treaty of Friendship, Commerce and Consular Rights between the United States of America and the Republic of Latvia, the undersigned plenipotentiaries, duly authorized by their respective Governments, have agreed as follows:

1. The provisions of Article XVI do not prevent the High Contracting Parties from levying on traffic in transit dues intended solely to defray expenses of supervision and administration entailed by such transit, the rate of which shall correspond as nearly as possible with the expenses which such dues are intended to cover and shall not be higher than the rates charged on other traffic of the same class on the same routes.

2. Wherever the term "consular officer" is used in this Treaty it shall be understood to mean Consuls General, Consuls, Vice Consuls and Consular Agents to whom an exequatur or other document of recognition has been issued pursuant to the provisions of paragraph 3 of Article XVII.

3. In addition to consular officers, attachés, chancellors and secretaries, the number of employees to whom the privileges authorized by Article XIX shall be accorded shall not exceed five at any one post.

In witness whereof the undersigned Plenipotentiaries have signed the present Protocol and affixed thereto their respective seals.

Done in duplicate, at Riga, this 20th day of April, 1928.

[SEAL.] F. W. B. COLEMAN. [SEAL.] A. BALODIS.

NOMINATIONS

Executive nominations received by the Senate May 25 (legislative day of May 3), 1928

FOREIGN SERVICE

To be secretary in the Diplomatic Service

James L. Park, of Pennsylvania, now a Foreign Service officer, unclassified, and a vice consul of career, to be also a secretary in the Diplomatic Service of the United States of America.

UNITED STATES DISTRICT JUDGES

George C. Taylor, of Tennessee, to be United States district judge, Eastern District of Tennessee, vice Xenophon Hicks, appointed circuit judge.

Crate D. Bowen, of Florida, to be United States district judge, Southern District of Florida, vice Rhydon M. Call, deceased.

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY

SIGNAL CORPS

Maj. Leon Edward Ryder, Cavalry, with rank from April 24, 1928.

PROMOTIONS IN THE REGULAR ARMY

To be colonel

Lieut. Col. Edgar Simon Stayer, Quartermaster Corps, from May 17, 1928.

To be lieutenant colonels

Maj. Edward Lorenzo Hooper, Infantry, from May 17, 1928
Maj. Stanley Koch, Cavalry, from May 18, 1928.
Maj. Irving Joseph Phillipson, Infantry, from May 22, 1928.

To be majors

Capt. Richard Lawrence Creed, Cavalry, from May 17, 1928.
Capt. James Cobb Hutson, Coast Artillery Corps, from May 18, 1928.
Capt. John Frederick Ehlert, Infantry, from May 22, 1928.

To be captains

First Lieut. Willard Warren Scott, Coast Artillery Corps, from May 17, 1928.
First Lieut. Leonard Louis Davis, Coast Artillery Corps, from May 18, 1928.
First Lieut. Webster Fletcher Putnam, jr., Coast Artillery Corps, from May 22, 1928.

To be first lieutenants

Second Lieut. Cecil Ward Nist, Infantry, from May 17, 1928.
Second Lieut. Robert Chaffee Oliver, Field Artillery, from May 18, 1928.
Second Lieut. James Eugene Bernard McInerney, Infantry, from May 22, 1928.
Second Lieut. Francis Arthur Garrecht, jr., Field Artillery, from May 22, 1928.
Second Lieut. Frank Dorn, Field Artillery, from May 22, 1928.

POSTMASTERS

ARKANSAS

George W. Stanfield to be postmaster at Corning, Ark., in place of G. W. Stanfield. Incumbent's commission expired January 7, 1928.

CALIFORNIA

William N. Friend to be postmaster at Oakland, Calif., in place of J. F. Conners. Incumbent's commission expired March 7, 1928.

COLORADO

Henry M. Newkirk to be postmaster at Swink, Colo., in place of W. A. Reynolds. Incumbent's commission expired January 8, 1928.

CONNECTICUT

Thomas J. Crockett to be postmaster at Unionville, Conn., in place of R. E. Taft, resigned.

GEORGIA

Alva W. Haddock to be postmaster at Douglas, Ga., in place of L. S. Peterson, deceased.

KENTUCKY

Mollie L. Nolan to be postmaster at Harlan, Ky., in place of M. L. Nolan. Incumbent's commission expired February 12, 1927.

MARYLAND

John N. Bennett to be postmaster at Chestertown, Md., in place of J. N. Bennett. Incumbent's commission expired January 7, 1928.

Allan Urie to be postmaster at Rock Hall, Md., in place of Allan Urie. Incumbent's commission expired January 7, 1928.

John F. Mansfield to be postmaster at St. Michaels, Md., in place of J. F. Mansfield. Incumbent's commission expires June 3, 1928.

MICHIGAN

Nettie C. Grayson to be postmaster at Pellston, Mich., in place of A. G. Grayson, deceased.

MINNESOTA

Edne O. Thorson to be postmaster at Chatfield, Minn., in place of E. J. Sutherland. Incumbent's commission expires January 9, 1928.

George Leng to be postmaster at Grand Marais, Minn., in place of C. A. Toftey. Incumbent's commission expired February 3, 1927.

Ross Andrews to be postmaster at Meadowlands, Minn., in place of August Olson. Incumbent's commission expired January 9, 1928.

Elizabeth Paul to be postmaster at Wykoff, Minn., in place of Ralph Moody. Incumbent's commission expired April 26, 1928.

MISSISSIPPI

Emma E. Hale to be postmaster at Natchez, Miss., in place of H. D. Hale, deceased.

MONTANA

Carroll W. Marsh to be postmaster at Sheridan, Mont., in place of J. H. Hadzor. Incumbent's commission expired January 8, 1928.

NEBRASKA

Robert L. Hart to be postmaster at Cozad, Nebr., in place of R. L. Hart. Incumbent's commission expires May 26, 1928.

Jacob H. Jimerson to be postmaster at Liberty, Nebr., in place of J. H. Jimerson. Incumbent's commission expires June 4, 1928.

William M. Baskin to be postmaster at Stapleton, Nebr., in place of W. M. Baskin. Incumbent's commission expires June 4, 1928.

NEW JERSEY

Tobias V. Chieffo to be postmaster at Cliffside, N. J., in place of Henry Eisberg, jr. Incumbent's commission expired February 15, 1928.

OHIO

Lester J. Matson to be postmaster at Maynard, Ohio, in place of B. H. Murphy. Incumbent's commission expired August 4, 1926.

OKLAHOMA

Adrian J. Brown to be postmaster at Bixby, Okla., in place of A. J. Brown. Incumbent's commission expires June 4, 1928.

Maude S. Chambers to be postmaster at Jenks, Okla., in place of M. S. Chambers. Incumbent's commission expired January 14, 1928.

James A. Todd to be postmaster at Calumet, Okla., in place of S. A. Penn, resigned.

OREGON

Eugene Bedell to be postmaster at Alsea, Oreg., in place of C. O. Hendrix, resigned.

Lewis B. Baird to be postmaster at Bend, Oreg., in place of J. J. Hogan, deceased.

PENNSYLVANIA

Leroy W. Keisling to be postmaster at Valley View, Pa., in place of L. W. Keisling. Incumbent's commission expired February 19, 1928.

Wilferd R. Troxel to be postmaster at Aliquippa, Pa., in place of R. C. Simpson, removed.

TEXAS

John W. Stegall to be postmaster at Holliday, Tex., in place of J. W. Stegall. Incumbent's commission expires June 6, 1928.

VIRGINIA

Russell L. Davis to be postmaster at Rockymount, Va., in place of L. A. Hodges, resigned.

WASHINGTON

William Scales to be postmaster at Centralia, Wash., in place of H. L. Bras, resigned.

WISCONSIN

Milton V. Jones to be postmaster at New Holstein, Wis., in place of G. L. Leverens. Incumbent's commission expired January 7, 1928.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 25 (legislative day of May 3), 1928

MEMBER OF UNITED STATES SHIPPING BOARD

Samuel S. Sandberg.

MEMBER OF MISSISSIPPI RIVER FLOOD CONTROL BOARD

Carleton W. Sturtevant.

MEMBER OF UNITED STATES CUSTOMS COURT

Genevieve R. Cline,

POSTMASTERS

ARIZONA

June S. Haymond, Claypool.
Robert B. Anderson, Clifton.

George N. Turner, Toughkenamon.

TENNESSEE

Joseph W. Callis, Germantown.
Jesse B. McCasland, Goodlettsville.
Thomas W. Williams, Lucy.

TEXAS

Emil E. Fahrenkamp, Big Spring.

HOUSE OF REPRESENTATIVES

FRIDAY, *May 25, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Breathe on us, O breath of God, as we tarry in Thy holy presence. Life and time will pass by, but Thy love alone shall last forever. We would not allow ourselves to complain; waves of emotion course through our breasts as we think of Thy providence that leads us on to perfect happiness and to the dawn of everlasting life. As the old sun will pierce the thickest cloud, so clear and safe is the new light and the new life of this pain-throbbed world. The cross of the Master, bathed in the glory of a perfect day, turns the hearts of men. It draws to it the storm-beaten faces of earth, for its empire is the empire of the oppressed, the bereaved, and the broken-hearted. Put Thy hand upon the life and the destiny of our Republic. Keep it there until all hate is dissolved, all bigotry dies away, and all unjust scepters are broken. In the name of Jesus of Nazareth. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed, with amendments, in which the concurrence of the House of Representatives was requested, a bill of the following title:

H. R. 13873. An act making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H. R. 13873) entitled "An act making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes," asks a conference with the House of Representatives on the said bill and amendments thereto, and appoints Mr. WARREN, Mr. CURTIS, and Mr. OVERMAN to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House of Representatives to the bill (S. 1822) entitled "An act to authorize the Secretary of War to transfer or loan aeronautical equipment to museums and educational institutions."

The message further announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House of Representatives to the bill (S. J. Res. 46) entitled "Joint resolution providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 1) entitled "An act to reduce and equalize taxation, provide revenue, and for other purposes."

The message further announced that the Senate recedes from its amendment No. 54 to the bill (H. R. 1) entitled "An act to reduce and equalize taxation, provide revenue, and for other purposes."

The message also announced that the Senate having proceeded, in pursuance of the Constitution, to reconsider the bill (H. R. 5681) entitled "An act to provide a differential in pay for night work in the Postal Service," returned to the House of Representatives by the President of the United States, with his objections, and sent by the House of Representatives to the Senate with the message of the President returning the bill.

Resolved, That the bill do pass, two-thirds of the Senate agreeing to pass the same.

The message further announced that the Senate having proceeded, in pursuance of the Constitution, to reconsider the bill (H. R. 7900) entitled "An act granting allowances for rent, fuel, light, and equipment to postmasters of the fourth class, and for other purposes," returned to the House of Representatives by the President of the United States, with his objections, and sent by the House of Representatives to the Senate with the message of the President returning the bill.

Resolved, That the bill do pass, two-thirds of the Senate agreeing to pass the same.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6518) entitled "An act to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled 'An act to provide for the classification of civilian positions within the District of Columbia and in the field services.'"

SECOND DEFICIENCY APPROPRIATION BILL

Mr. WOOD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate; and, further, that the conferees be authorized to agree to any such amendments despite the provisions of section 2 of Rule XX.

The SPEAKER. The gentleman from Indiana asks unanimous consent to take from the Speaker's table the bill, H. R. 13873, the second deficiency appropriation bill, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate; and, further, that the conferees be authorized to agree to any such amendments despite the provisions of section 2 of Rule XX. The Clerk will report the bill.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. GARNER of Texas. Mr. Speaker, reserving the right to object, will not the gentleman from Indiana explain just what his request means?

Mr. WOOD. Mr. Speaker, the request is the ordinary request, with the exception of the last portion of it, which asks for additional authority that amendments may be agreed to, despite the provisions of section 2 of Rule XX, which means that we may agree to amendments of new matter without bringing the same back to the House. There is not anything so far of a controversial nature, and we are very nearly through with the conference, as a matter of fact.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER appointed the following conferees: Mr. WOOD, Mr. CRAMTON, Mr. BYRNS.

EXPLANATION OF A VOTE

Mr. HARRISON. Mr. Speaker, when the vote was taken yesterday on the bill referring to emergency officers' retirement, I was unavoidably absent from the House on an important engagement, without any idea that the bill would be called up for consideration before the House yesterday. I have always been an intense advocate of the measure, and if I had been here I would have voted in the affirmative.

Mr. WOODRUM. Mr. Speaker, on the bill just mentioned by my colleague, voted on yesterday, I was absent from the Chamber, and if had been here, I would have voted to sustain the President's veto.

PENSIONS

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 13563, an omnibus pension bill, with Senate amendments thereto, and agree to the Senate amendments.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to take from the Speaker's table the bill, H. R. 13563, an omnibus pension bill, with Senate amendments thereto and agree to the Senate amendments. The Clerk will report the title of the bill.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The Senate amendments were read.

The SPEAKER. The question is on agreeing to the Senate amendments.

The Senate amendments were agreed to.

HIGHER EDUCATION IN THE DISTRICT OF COLUMBIA

Mr. NELSON of Wisconsin. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the subject of higher education in the District of Columbia. I made some investigation about two universities, and I think they have suffered a great deal of harm, and I would like to present some data.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent to extend his remarks in the RECORD upon the subject of education in the District of Columbia. Is there objection?

There was no objection.

Mr. NELSON of Wisconsin. Mr. Speaker, during the closing weeks of the session I became greatly interested in higher education in the District of Columbia as affected by Senate bill 2366 on degree-conferring institutions.

The heads of two universities that give courses more or less in extension work appealed to me to assist them in the defense of their schools from destruction by this bill, themselves from character defamation in the press, and actual or threatened indictments before the courts.

An insidious propaganda carried on over a period of years against so-called "diploma mills" had weakened these institutions financially to such an extent as to nearly ruin them, and now by the provisions of this bill expressly directed at them their very existence is threatened.

It was made clear to me by evidence in abundance, partly presented with these remarks, but more fully printed in the hearings, that this propaganda had been carried on by a special assistant United States attorney acting with and for interested parties, who appear to me to be promoting under the pretense of reforming higher education in the District of Columbia—a mere smoke screen—the exploitation of themselves before the public and the promotion of their own selfish business interests. Anyone familiar with rivalries among higher schools and their various adherents can realize how ruthless this kind of warfare may at times become.

I had occasion several years ago to become personally acquainted with President Porter, of Potomac University. This is one of the higher schools carrying on university extension work. Because of his high character as a man, the good work he has been conducting for 24 years in preparing preachers for their sacred calling, and the injustice that was being perpetrated upon him by this bill, when appealed to for help, I felt myself under a moral obligation which I could not shirk, to appear before the Committee on the District of Columbia to offer an amendment to the pending measure that would preserve this school from annihilation. The bill required all university work for which any degree is conferred to be done in residence. Subsequently President Rapeer, of Research University, told me of the wrongs done the heads of this institution, wrongs which seemed to me so amazing as almost to stagger belief. This is another of such higher schools carrying on evening residence and correspondence work, more particularly for school-teachers and others who are unable to attend in residence except for vacation periods and final examinations. My interest, as a former superintendent of schools, becoming deeply aroused, I resolved to assist to the utmost these deserving and oppressed school men in the Nation's Capital who were carrying on their lawful vocations in a very worthy way. Accordingly, I outlined a plan of campaign which has so far met with singular success.

My first step was to confer with Senators CAPPER and COPELAND, of the District Committee of the Senate. This Senate committee had accepted an amendment which would have safeguarded these schools. But the amendment had failed of enactment in the Senate. It was reported to me that Senator COPELAND particularly opposed it. Knowing this high-minded Senator well I could not imagine why he should desire to destroy such a school as Potomac University. Accordingly, I conferred with him, told him of my knowledge of Doctor Porter, of the good work that he was carrying on, and of the high character of his teachers. The Senator assured me that he had not intended to destroy this school, suggested that I prepare and present to the House committee an amendment which would safeguard Potomac University, and said that he would withdraw his opposition to such a provision. I also conferred with Senator CAPPER, chairman of the Senate committee, who expressed a similar sentiment.

My next step was to secure a hearing before the House Committee on the District of Columbia. On the day I was appealed to for help by President Porter the Senate bill had been accepted without amendment by the House District Committee and ordered reported to the House. But the report had not been filed. I asked Chairman ZIHLMAN to defer final action until I could be heard. Being a very fairminded Member of Congress, he directed Mr. MCLEOD, chairman of the subcommittee, to postpone the filing of the House report until I could come before the next meeting of the committee to be heard on the amendment.

My next step was to present the cause of Potomac University to the busy Committee on the District of Columbia. I did so at three different hearings. At the first I explained my means of knowledge of Doctor Porter and of his university, giving details to be found in the hearings. I particularly pointed out that without an amendment such as I offered his school would be ruthlessly destroyed, his contracts with students would be impaired, and he himself would be branded before the public as the head of a "diploma mill" which had been driven out of the field of higher education in Washington by law. I called attention to the wrong that would be done not only to the president and to his good wife, who has been his assistant all these years, but also to the trustees and to teachers, comprising some of the best men in the country's teaching profession, students now enrolled in a number of about 350, and more than 600 graduates. The committee unanimously ordered a reopening of the hearing.

I next sent out a questionnaire to the students and graduates of this school whose addresses could be ascertained. The replies to this questionnaire were surprising. They are printed in the hearings fully, herewith only in part. One of these students, who had received a degree of doctor of divinity from Potomac, was present to explain and exemplify with the actual textbooks and other data the methods by which the instruction in extension was carried on and the safeguards thrown around the work to prevent fraud. There were in attendance at the hearings scores of representative men and women of standing in the city of Washington who came to testify to the high character of Doctor Porter himself.

It was agreed that at a third hearing the special assistant United States attorney, the leading spirit carrying on this prosecution—which if characterized correctly should be termed a persecution—was to be given a full opportunity to present whatever evidence she might have against this higher school of learning. She appeared, presented her case, making certain charges. These were refuted immediately, one by one, as they had been presented by her to the committee. As a result of that hearing and at the end of it the committee unanimously accepted the amendment I proposed exempting Potomac University and like schools doing extension work from being closed up. The words "in residence" were stricken out.

Subsequently I appeared before the committee to give it the result of my studies of the bill itself. My first impression had been very decidedly for any measure having as its purpose the destruction of educational "diploma mills." But when I came to understand unmistakably the kind of a measure that was being urged upon Congress by this special assistant United States attorney and her collaborators, a Rand-McNally book agent, who alleged that he was acting for the chamber of commerce, and the head of a law school whose interests had been or might be more or less affected by competition with these correspondence schools, I saw clearly that the bill had defects of the most serious character.

Most of the higher schools or universities of the District of Columbia were specifically and expressly exempted from its provisions. In fact, the two schools that would be seriously affected by the proposed law were Potomac University and Research University. If there were any so-called "diploma mills" in the District of Columbia they were of so vague and shadowy character that they largely vanished when I sought for them. The bill lodged power of the most extraordinary kind in a board of education whose qualifications might be anything or nothing, a board consisting of three women, several Gentiles, a Jew, and three negroes. The proposed law provides for drastic penalties—not only fines but also imprisonment—and the standards required of these schools to secure a license from this board of education, in addition to charter rights virtually nullified by this act, were so indefinite, so uncertain, and so arbitrary that no one could possibly fulfill them. The members of the board of education could not themselves know the extent of their powers, nor could the universities put under their authority know by any possible means what might be required of them.

As a lawyer familiar with the provisions of the Constitution of the United States, I saw that in spirit nearly a dozen safeguards thrown around the life, liberty, and property of our citizens by this sacred instrument had been utterly disregarded. Most assuredly, without the amendment I had proposed, these higher schools of learning would be a duplication of the Dart-

mouth College case which Webster and Marshall so gloriously defended. I, therefore, requested the head of the legislative reference bureau of the Library of Congress to prepare several briefs on the bill carefully reviewing the decisions in the leading cases before the Supreme Court of the United States. In the meantime I had conferred with leading attorneys of the House and with attorneys outside whose help I had enlisted. I also discussed the constitutional provisions violated by this bill with one of the foremost teachers of constitutional law in the schools of Washington.

All are of my opinion that the bill is unconstitutional in two respects: First, because of its arbitrary classification, it violates the fifth amendment, guaranteeing due process of law, and the fifteenth amendment, giving equal protection of the law to every citizen alike; and, second, the standards of guilt set up are so indefinite and uncertain as not to be ascertainable by the universities required to observe them. These studies, together with the briefs, were presented to the committee and are printed in the hearings. During the weeks that these hearings were going on other important events took place which are noteworthy.

This special assistant United States attorney, finding that I was asking for an amendment in behalf of correspondence schools, requested an interview. This was readily granted. I was interested in meeting her. I had now learned that she was the driving force, not only in carrying on propaganda through the newspapers against this school, in seeking fraud orders against this institution by the Post Office Department, but also in actually indicting the heads of Research University, its president and registrar, before the grand jury, and threatening indictment likewise of the heads of the Potomac University if they do not stop opposing her bill in Congress. She claims chief credit for the preparation of the bill itself, is the active lobbyist for it in personal interviews with Members, and its chief advocate before the committees of Congress. Indeed, she seems to have made it her principal work over a period of three or four years to destroy these correspondence schools—Potomac and Research Universities—hesitating at nothing.

She had not been in my office long before I was made aware of her peculiar standards of conduct as a public official. She began by replying to my inquiry, "What do you know of Doctor Porter?" by saying, "Doctor Porter is an unmitigated liar." I appealed to her, telling her what I knew of Doctor Porter, to consent to this reasonable amendment, stating that it had been agreed to by Senators COPELAND and CAPPER. But she declared that she would not do so. If it were adopted, she asserted, she would defeat the bill. She said many other things which gave me an insight into her hostile attitude toward these universities. She said she had requested a fraud order from the Post Office Department, which she expected soon to be issued. When she left my office I knew exactly the source of all this mischief, and realized that clothed with the official power of the office of the United States attorney, unless restrained by some cool-headed superior, she could do a world of harm to innocent people and to the cause of higher education in the District of Columbia.

I determined, therefore, at once to call on the Post Office Department to see at first hand this fraud order that she had requested and was expecting at any time. Having stated my purpose to the First Assistant Postmaster General, Mr. Bartlett, he took me to the legal division. By the chief of this department I was taken to the office of the chief inspector. There I was permitted to read the request of this special United States attorney for a fraud order, the questionnaire that had been sent out, the replies to the questionnaire, and the conclusion of the inspector approved by the Post Office Department.

There was not a sign of fraud. On the contrary, the evidence was complete that all who had anything to do with Potomac University were enthusiastically grateful to the school. The fraud order had been denied for more than a year; yet I was given to understand, as was the Committee on the District of Columbia, that a fraud order was expected at any time against Potomac University. Incidentally, may I say that she had also asked a fraud order against Research University, which had likewise been denied.

Although fraud-order documents are confidential I requested permission to have the one of Potomac University presented to the committee, which request was granted on condition that they were asked for by the chairman of the committee himself. The chairman made the request, and the evidence of fraud, not by the university but by this special assistant, is before the committee.

As a result of this experience I learned to what extremes this special assistant United States attorney would go to carry out her determination to destroy these correspondence universities. At the hearings I endeavored to confront her with the evidence that she had deliberately perpetrated a deception upon the committee and on Members of Congress like myself. I asked her if she did not know that her request for a fraud order had been denied, and tried to pin her down to a definite time so as to show that she must have known of the action of the Post Office Department for more than a year, but she blandly evaded my inquiries.

To checkmate her destructive activities further I found it necessary to confer with her immediate superiors, judges of the Supreme Court of the District of Columbia and the acting United States attorney. My immediate reason for this was that Doctor Porter had told me of her declared determination to have him indicted. She had caused subpœnas to be issued, after my appearance before the committee in his behalf, summoning trustees, the secretary of the university, and teachers to appear before her for examination, alleging that it was to be before the grand jury. One of these teachers was dead. His widow called up Doctor Porter to know the purpose of the summons. All of them informed Doctor Porter of the subpœnas served on them and assured him that they had nothing but good to say of Potomac University to this special assistant United States attorney and had told her so. But she, sitting at her own typewriter, asked them a lot of questions, the replies to which she typed in such forms as she preferred, and then ordered them to make affidavits to what she had put down. In the confusion of a room where there were many clerks at work, and because of her threat of criminal process, some of them put their signatures to the affidavits, but subsequently gave me full accounts of their relations to the school and of their being browbeaten by this special assistant United States attorney.

She had also sent a subpœna for Mrs. Reed, Doctor Porter's daughter, a teacher; and Mrs. Porter herself accompanied her daughter to the office of this special United States attorney. Here, in a conversation, which has been reduced to writing at my request, finding that she could get nothing out of these people to incriminate the school, she told them threateningly that as long as Doctor Porter insisted upon the amendment I offered to the pending bill she would hesitate at nothing. She told them that she would have them, mother and daughter, indicted with Doctor Porter unless he desisted from demanding the amendment.

She also told a trustee that as long as Doctor Porter opposed her bill by proposing the amendment I had offered, she would hesitate at nothing.

All of these conversations I have had reduced to writing and put into the hearings. They came in very usefully. When this special assistant attorney of the United States was called upon by the committee to state her case against Potomac University, she produced these garbled affidavits and other matter, and in anticipation of this we were able to refute her charges instantly and emphatically at the same hearing.

But as this representative of the United States district attorney's office had hitherto had access to the news columns of the Washington newspapers freely, and thus was able by one-sided reports pretended to be official to arouse a hostile public sentiment against alleged "diploma mills," mentioning particularly Potomac and Research Universities, it became necessary to restrain her publicity activities. This had become keenly necessary because she had not taken the witnesses subpœnaed before the grand jury but had got them in the manner just described to sign garbled statements which she herself had prepared, and having added various harmful matter to give them sensational color, these were given as news items to one of the leading newspapers and were published in a form most offensive to Potomac University under the flaring headline "Diploma mill."

Accordingly, following one of the hearings, I directed Doctor Price, with Mrs. Porter and other men and women of high standing, to go as a committee to the editors or publishers of these Washington newspapers and to show them personally the replies to the questionnaire that I had sent out, and Doctor Price himself to explain, as he had before the committee, the method of carrying on extension work and safeguarding all degrees granted by Potomac University. I assured this committee that these publishers would hear them gladly; that libel suits would do no good and were costly, but straightforward statements with evidence presented to the higher newspaper officials would prevent a repetition of such gross injustice as was exemplified by the last effort of this special assistant attorney to poison public opinion against Potomac University.

The committee did as I had suggested and reported a very favorable reception on the part of the publishers of Washington newspapers, who thanked them for coming and promised them a

square deal. This promise has since been faithfully kept. Indeed, the committee was told by one of the newspaper publishers that they themselves were familiar with the activities of this special assistant United States attorney. From such and similar reliable sources we learned how she had gotten her appointment by political pressure, of her being on the pay roll a year without doing anything, of her being "jacked up" for her inactivity, and of her utter incompetence as a lawyer in the trial of cases, and of her using this "diploma-mill" propaganda as a smoke screen for self-exploitation. One does not have to cross the Atlantic Ocean in an airplane to seek notoriety. Sometimes it is done even in Congress, but it is a vicious thing in the Department of Justice and should be stopped by the courts.

Because of the threat of this special assistant United States attorney to indict Doctor Porter, his wife, and daughter, as she had already indicted the heads of Research University, its president, and registrar, and because of the unethical method she was pursuing as a prosecutor, of trying her cases in the newspapers under the inflaming headline of "Diploma mills" instead of by an orderly procedure before the courts, where her efforts could be reviewed and rebuked by a sitting judge, I determined to confer directly with the heads themselves of this department of government, judges of the Supreme Court of the District of Columbia. Having served with the distinguished jurist, Chief Justice McCoy, when he was a Member of Congress on the Judiciary Committee, and in the trial of impeachment cases, I first sought an interview with him, but as he was ill he referred me, through his medical attendant, to one of the associate justices. At his invitation I called upon this learned and courteous judge and told him of my effort to amend the pending "diploma mill" bill. I pointed out to him how legislation was being confused with efforts to indict the heads of these schools before the court.

I proposed that either these indictments be gotten rid of before Congress enacted any legislation with reference to these institutions, or that Congress be permitted to enact legislation without complications being brought in through indictments. I asked this honorable judge, "Who is it that now has actual charge over the many inferior assistant prosecuting attorneys pending a vacancy in the office of United States attorney?"

I was told that the District Supreme Court, under a provision of the law, had authorized the first assistant to act pending appointment by the President. Judge Stafford introduced me to the acting district attorney, Mr. Rover, speaking of him in high terms. I repeated to this cool-headed, able, and fair-minded lawyer just what I had set forth to the honorable judge. I handed him also, as I had shown the judge, the newspaper published the day before—April 25, 1928—carrying the garbled statements under the glaring headline, "Diploma mill," attacking Potomac University. Both of these judicial-minded men deplored this sort of propaganda work, and Mr. Rover, the acting head of the United States district attorney's office, promised me that he would look into the matter and that I should soon hear from him. Accordingly, the next day I was informed over the telephone that that kind of procedure would be stopped; that Congress might go on with its work of legislation, and that there would be no further confusion by indictments until the legislation under consideration was disposed of.

At subsequent hearings the special assistant United States attorney, resentful because thus restrained, kept repeating to the committee that I had stopped her from carrying on any further investigations of Potomac University. On the contrary, I made no protest against her carrying on any legitimate investigations. My protest concerned her brow-beating threats of indictments, because an amendment to the "diploma mill" bill was sought by the heads of these schools. My protest concerned her abuse of official power to issue subpœnas in order to manufacture evidence against the schools in garbled form, not presenting these witnesses before a grand jury, but handing out untrue statements to the press. My protest concerned her extraordinary and indefensible efforts to promote or defeat legislation in the Halls of Congress, when she had deliberately failed to obey the mandate of the law itself and knew that she could never convict the persons she had indicted before any fair-minded jury.

Finally as Congress would soon adjourn, fearing that she might make use of her power in some unexpected manner, I introduced the heads of these two schools, Doctor Porter, Mrs. Porter, and their daughter, Mrs. Reed, with the pastor of their church and Mr. Saunders and his wife, Virginia H. Saunders, who has been indicted by this special assistant attorney, likewise with the pastor of their church, to the Speaker of the House, Mr. LONGWORTH, the acting United States attorney, Mr. Rover, and to the President's private secretary, Mr. Sanders.

This was necessary, in my judgment, in order that the heads of the three branches of our Government—the legislative, the judicial, and the executive—might see these people for themselves, look into their faces, and hear the account of the wrongs which they had suffered.. It was also necessary that these innocent victims of persecution by this special assistant United States attorney should be in a position to appeal to these officials directly should this misguided special assistant seek to do them further harm. This joint committee was well received by the heads of these departments of our Government, and the parties interested with the pastors of their respective churches went to their homes much reassured.

Subsequently I suggested also that a committee of Members of Congress familiar with the facts in the case of Mrs. Virginia H. Saunders go before the United States attorney and demand a trial for her. This also was done. There has now been a delay of more than a year, during which time Mrs. Saunders has suffered grievously, not only in her peace of mind but also financially. It is an awful thing to have an indictment hang over one's head for a long period of time. While all who know Mrs. Saunders are standing by her most loyally—and I have received many letters in high commendation of her character—yet until the pending indictment is disposed of her good name and even her liberty is under a cloud. I forbear here to speak of Dr. L. W. Rapeer, of Research University, and his wrongs, and of the outrageous personal attack that was made upon him, instigated by this special assistant United States attorney, but subsequently stricken from the record by the committee. These have been set forth by affidavits in some detail and are printed in the hearings. Suffice it here to say that Mrs. Saunders was indicted with Doctor Rapeer for using the mails to defraud in conducting Research University by the usual extension-work methods. Some entirely proper letters were apprehended that had been sent out, but it was simply assumed by this special assistant that the university is a fraud, and on that false presumption she has based all her official activities. What a perversion of the sacred American principle that every citizen is presumed innocent until proven guilty beyond a reasonable doubt before a jury of his peers!

Nearly every student mentioned in the indictment as having been defrauded has continued to carry on work at the university. Mrs. Saunders herself was a student working for her master's degree, for which she studied most industriously for more than a year. She had previously graduated from the University of Wisconsin. She paid for her instruction by doing clerical work and was subsequently promoted to the office of registrar. She has received only $100 from that school in compensation for several years of consecrated service. Her work has been largely a labor of love. Yet she has been indicted by this special assistant United States attorney for using the mails to defraud. Comment is unnecessary.

The indictment is to me on its face absurd, and it was so declared by one of the ablest lawyers in the District of Columbia. These indictments were clearly brought about in order to influence legislation. The trial of these cases has not been had, because there is nothing whatever to the indictment. No conviction is possible in a fair trial. The letters printed in the hearings are to me as conclusive on this point in the case of Research as of Potomac University. The excuse for not bringing the case to trial after more than a year's time is lack of judges. The District Supreme Court consists of six judges. That may be so, but why should these innocent heads of the Research University thus suffer under this grievous charge without being given the right of speedy trial, so sacredly guarded by the Constitution, to clear their good name and save this school from utter ruin?

The charge that these universities were carrying on a fraudulent business—using the mails to defraud innocent people—is so serious in character and so ruinous to the universities thus wrongfully assailed that I have requested statements to be made by the respective representatives of these schools which would be enlightening to the public and set them right before the world. In short, I have undertaken as a legislator, representing the legislative branch of the Government, to undo as far as possible the wrongs done these schools by this representative of the judicial department of the Government. And not only have I asked consent to make these facts public and to afford these victims of official tyranny and persecution an opportunity to defend themselves thus conspicuously before the country, but with permission granted by the Committee on the District of Columbia I have inserted in the RECORD the overwhelming evidence by sworn and unsworn testimony to verify conclusively to any fair mind the truth of all that the heads of these schools and myself have asserted concerning this so-called diploma mill bill, its selfish purposes, unfair and unconstitutional provisions, and dangerous powers.

This has been done in order that all people interested may know the facts, not only students who are anxious to carry on contracts for instruction by these schools, but more especially

that the good people of the city of Washington may know the truth behind this "diploma mill" hullabaloo that has alarmed them needlessly. I commend the careful reading of the hearings and the appended addresses to every friend of justice, truth, and the "square deal."

What should be done with this special assistant United States attorney who has wrought all this mischief and is guilty of such gross official misconduct is a matter that I have considered with much care. I regret the necessity to say deliberately that were she more than an inferior appointee I would unhesitatingly impeach her on my responsibility as a Representative in Congress; but as she is not an impeachable officer under the Constitution, I can do no more than hold her superiors responsible so far as they shall condone her official misconduct.

As Congress adjourned without enacting this badly constructed measure, viciously unconstitutional, as the publicity activities of interested parties back of this bill have been exposed successfully, and, finally, as no more indictments are likely to be forthcoming until those now pending have been disposed of, it is my hope that all the higher schools of learning in the District of Columbia will unite in the preparation of a constructive and just measure that shall not only prevent gross fraud, however practiced, but also protect honest schools from being ruthlessly injured and maybe destroyed by a selfish and sensational propaganda carried on against alleged "diploma mills." Every thoughtful person must surely realize that such a noisy propaganda is helpful to no school, but harmful to all. It gives to the higher schools of learning at the Nation's Capital—all doing good work in their respective spheres of activity—a bad name nationally. Every one of the higher schools of learning in the District of Columbia is in danger of being looked upon elsewhere, because of such sensational national broadcasting, as more or less a "diploma mill." Had this misguided and overzealous special assistant obeyed the plain, wise, and mandatory provision of the code itself, which provides that if any violation of charter rights occur, on complaint, the district attorney "shall" proceed by writ of quo warranto and such schools permanently enjoined, all of this harm which has been done to the cause of higher education in the city of Washington generally and to Potomac and Research Universities in particular, might have been avoided. But, then, of course, no one would have read in the newspapers of the Nation's Capital from time to time over a period of several years the name of this special assistant United States attorney!

I append to my remarks the following statements by representatives of Potomac University and Research University, with letters which speak eloquently for the preservation of these institutions, the one a philanthropy for preachers and the other one for educators. If these worthy men and women have not the time nor means to go to the universities, these universities will go to them. That is the ideal of true educational democracy! That is bringing the blessings of the light of learning to all the people! Why should these higher schools of learning be destroyed? Why should the heads of these institutions, who, at great sacrifice, are devoting their lives to this ideal, be so defamed? To me it has seemed most amazing, almost unbelievable, that such persecution could actually take place, not in Leningrad of the Soviet Union, but almost within the shadow of the Nation's Capitol, in the city of Washington, the land of liberty, by a representative of the Government itself, and in the name of justice. To paraphrase the words of a profound student of history, "Oh, justice, what wrongs are committed in thy name!"

HIGHER EDUCATION IN THE DISTRICT OF COLUMBIA

Mr. Speaker, I insert in the RECORD as a part of my remarks an address by the Rev. George W. Price, D. D., pastor of the First Baptist Church of Schenectady, N. Y. on "Potomac University and higher education":

Doctor PRICE. Ladies and gentlemen, it is a great privilege and pleasure to be afforded this opportunity of presenting to you, somewhat in detail, the result of my personal investigation of the Potomac University, of Washington, D. C., and my personal experiences with the officers and instructors of this splendid institution.

My first knowledge of and interst in Potomac University came to me in the fall of 1923, while a professor of homiletics and English Bible in the Practical Bible Training School, Binghamton, N. Y. An announcement concerning courses of study on the Bible came to me through the mails, announcing a series of subjects in which I was specially interested. Correspondence with the president, Dr. Ernest W. Porter, led to my enrollment for six courses of graduate work. This work was so splendidly planned, logically arranged, scientifically presented, and so surprisingly helpful that I began to commend the work of the university to both students and friends, and after my completing the work assigned, successfully passing the rigid and comprehensive examinations given, and submitting for approval a 46,000-word thesis, the degree of doctor of divinity was publicly conferred on me June 1, 1925.

At that time I came to know President Porter personally and intimately and since then have visited him in his home four different times, spending days and weeks in personal examination of the methods and work of Potomac covering the 24 years of her history and every phase of her activity. The result of investigation and experience has been a growing conviction that Potomac University is doing one of the finest pieces of constructive educational work which is being done anywhere, and that in her special field of university extension or extra mural work she is absolutely unexcelled.

My personal investigations also led me to examine the character of the work offered and done by other schools doing work in absentia and offering degrees for the same. The result was my utter amazement at the low type of work some of these schools are doing and the comparison with that of Potomac, but emphasized the fact that they could not be named in the same class as Potomac, whose work is all done in strict harmony with generally accepted academic tradition.

With this knowledge in hand, my keenest interest was aroused when I learned, in April, 1928, that a bill had been presented in the United States Senate touching the incorporation of degree-conferring institutions within the District of Columbia, where Potomac University has been located for almost a quarter of a century, and especially so, when I learned that the bill as proposed would affect some of the rights and privileges of Potomac University and would require that the work of the institution be done "in residence," thus precluding the possibility of recognizing and rewarding work done in absentia.

Realizing that this would curtail the privilege of extending Potomac's helpful ministry to thousands of men and women, especially ministers, now engaged in their fields of activity and hindered by the duties of their vocations, family ties, and financial inability from doing work in resident schools and so precluding the possibility of their continuing supervised studies of university grade, I went to Washington to aid in any possible way the amending of the bill so that its passing would not limit nor curtail the work Potomac University is doing so efficiently and effectively.

On my arrival in Washington April 30, 1928, I learned that the bill known as S. 2366, intended to amend subchapter 1 of chapter 18 of the Code of Laws for the District of Columbia, had been presented to the Senate and referred to the Committee on the District of Columbia. I learned also that when this bill was later tested by evidence deduced before the Committee on the District of Columbia of the House of Representatives, it was found to be very imperfectly drawn. And, while its object has received general approval, it is basically unconstitutional, which fact I do not purpose to discuss at this time, except merely to state, in passing, that it is a penal statute, yet sets up no standard of guilt; it is retroactive in operation, tending to destroy vested rights acquired by long-established schools without any just or righteous cause; and for no apparent reason it establishes two classifications of colleges and universities in the District. It places no burdens or restrictions whatsoever on one class while establishing for the other class a series of limitations which may or may not be met by the majority of the schools; and in the case of a few institutions of unquestionable merit the proposed legislation becomes absolutely prohibitive and confiscatory.

I learned also that the proponents of the bill brought before the committee "exhibits showing the grave necessity for some legislation to limit the incorporation of educational institutions in the District of Columbia." To this I accord most cheerful and hearty assent. But the bill contained certain provisions which, it developed during the progress of the hearings, could be used to bludgeon at least one excellent school out of its charter rights; and, in fact, destroy those vested rights guaranteed under the Constitution.

I learned further that during the progress of the hearings before the Senate Committee Dr. Ernest Warren Porter, the honored president of Potomac, appeared in behalf of the university. His views on the effect of the bill upon some long-established institutions were cordially received and he was invited by Senator CAPPER, chairman of the committee, to prepare and submit an amendment which would "prevent injury or injustice to reputable, honest correspondence schools." (S. Rept., p. 1.) Doctor Porter, the president of the board of education, and others agreed upon an amendment, which was accepted without change by the Senate committee. In this connection I will add that on May 4 the same amendment was adopted by the committee of the House of Representatives in order to protect the charter rights of the Potomac University.

Immediately thereafter the hearings opened before the House committee. It was soon apparent that an effort was being made by a certain minor official to exhibit Potomac in an unfavorable light. Intimidation of officers and friends of the school was even attempted, and the true intent and purpose of the legislation was quite neglected, as even a glance through the official "hearings" will reveal.

Having reached the limit of his own resources in opposing the bill, Doctor Porter went to the office of the Hon. JOHN M. NELSON, of Wisconsin, who for 20 years in Congress has stood out as one of the

foremost defenders and champions of equality, justice, and righteousness in that honorable body, and asked him as an honest, conscientious, God-fearing national legislator to personally consider this matter of pending legislation, make the most searching investigation of the Potomac University and her work, and when absolutely satisfied with the merit and trustworthiness of the institution and the righteousness of her cause to intercede in behalf of the many whose interests were affected.

President Porter assured Congressman NELSON that the university would stand the closest scrutiny and the most searching investigation. With this assurance, this noble Christian statesman set about collecting the evidence bearing on the question of university extension work by correspondence, the conditions prevailing among schools specializing in extramural work, the academic standing of Potomac University, the real need for such a university, and the actual contribution she is making to higher education throughout our country and Canada.

Questionnaires were sent, hundreds of letters written, students and graduates interviewed, and every means at his disposal used in getting accurate information. The result was perfectly overwhelming. Within a week hundreds of letters containing the strongest indorsements which could be placed in language poured into Congressman NELSON'S office from ministers, judges, lawyers, doctors, teachers, professors, college presidents, Government attachés, editors, and persons in almost every walk of life commending in the highest terms the work done, the educational standards maintained, the thoroughness of the methods used, the ability of the instructors, the practical value of the courses, and every one emphatically protesting against any legislation which would in any wise impair or handicap Potomac in her beneficent work.

It was my personal privilege to read, analyze, and arrange for publication in the congressional hearings and RECORD more than 300 of these letters, and in not one of them was there a single derogatory statement or sentence.

That you may intelligently conceive their character and strength, permit me to read a few of these selected at random but typical of those received. The first of these letters is from my very dear personal friend, Guy Livingstone Brown, B. A., M. A. (Potomac University), D. D. (Ottawa University), pastor of the First Baptist Church of Watertown, N. Y., who writes as follows under date of May 3, 1928:

Hon. JOHN M. NELSON,
Member House of Representatives,
Third District, Wisconsin, Washington, D. C.

MY DEAR MR. NELSON: I have your letter of April 24, inquiring as to my opinion of the standing of Potomac University, Washington. I am very happy to say that I am an alumnus of the university named, and take pleasure in recommending in the very highest terms the work of Doctor Porter and his faculty, especially in the extension work carried on by the university. Whatever assistance you can give will be greatly appreciated by the university staff and the student body now represented in all parts of the country.

Doctor Porter is a conservative, hard-working man with wide sympathy for students that are willing to do their part, although lacking funds to carry on.

In my opinion, Potomac University is doing just the type of work that should be done in our country, namely, in offering to students college training through extension work. I am a firm friend of this university and Doctor Porter, and sincerely trust that you may do your part in helping this splendid institution as you indicate you are willing to do in your letter.

I will consider it a privilege to be of help in any way possible.

Sincerely,

GUY L. BROWN.

The second letter is from a man of culture and refinement, who has had wide educational advantages, and who bears testimony to the method of instruction and value of the courses, the Rev. J. M. Persenius, B. A. (Augustana College), M. A. (Potomac University), pastor of Zion Lutheran Church, Kewanee, Ill., who writes under date of May 3, 1928, as follows:

"Your letter asking about Potomac University has been sent to me from Grand Forks, N. Dak., where I had my pastorate a few years ago, and I am glad to submit the following answer:

"I am a graduate (A. B.) from Augustana College, Rock Island, Ill.—a rank A1 institution—and also from the Augustana Theological Seminary (three years' course) at the same institution. It would have been easy for me to take the A. M. degree at Yale, Harvard, or any State universities in less than one year after that, but they all required more or less residence study, and I could not do that, because I had my pastorate and could not leave my work there. A fellow pastor recommended the Potomac University to me, and as I found a course there that I liked very much I took it up, and I must say that I have been very much benefited by the course.

"I can assure you that no degrees are granted there without the most rigid examinations, and the students have no way of cheating, because the examination questions must be answered before a schoolman or pastor or some other reliable person recognized by the university, and that person has to sit there and watch and testify in writing to the university what time the examination started, how many hours it took the student to answer the questions, etc., and then he takes the papers and sends them in.

"I have taken many examinations and answered many questions, but no examination has been more rigid than the one I took on my course at Potomac University. Nearly every question required that you must know the book you had studied in its smallest details, and the marks you received would have been higher for the same answers at most institutions.

"I hate any degree given without proper work done, but it seems to me that there should be at least one recognized institution in our country where the students could study in absentia and receive a well-deserved degree.

"If you could get your proposed amendment through, you would serve thousands who have the ability to develop themselves, but who can not leave their homes and occupations for residence study.

"For my part I will testify that the work done at Potomac University has been faithful and that no just public complaint can be made.

"Respectfully,

"J. M. PERSENIUS."

The Rev. James A. Fraser, B. D., Ph. D., pastor of the First Presbyterian Church, Baker, Oreg., another minister of splendid training and wide experience, pays his tribute to Potomac under date of May 1, 1928, in this language:

"MY DEAR SIR: I have your letter with reference to Potomac University, Washington, D. C., and also inclosed letter of Doctor Porter to you. I have carried on studies through Potomac for at least one year and one-half. I hold no degrees from Potomac, but that is not the fault of the institution. I did not have the time to give to their demands. The work completed was very, very satisfactory. I have studied in a number of schools and am a graduate of the Western Theological Seminary, Pittsburgh, Pa., with degrees of S. T. B. and B. D. (Presbyterian school). The work of Potomac which I carried on was as difficult and carefully supervised. Nothing was carelessly gone over. They insisted on the right kind of research in all departments. I wonder if the people at large really appreciate the extension institution. I know of hundreds of clergymen who are eager to do consistent work at home. They do not have the money to attend "in residence." Unfortunately, they have had no advantages in earlier years to proceed with an education as given by a university. Such men are deserving of no little consideration. There are many extension schools which ought to be wiped off the map. As of yore, the innocent must suffer for the guilty. All I know of Potomac is that the studies outlined for me were of the very best. The work was done faithfully. Doctor Porter and those with whom I worked were rigorous in their demands. No examination was written without the presence of some educator, who opened the paper and sat with the student as he wrote. As far as I am concerned, I do hope such an institution be given every consideration, as I feel it is doing a good work.

"Very sincerely,

"REV. JAMES A. FRASER.

"MAY 1, 1928."

The next message is from the Rev. H. F. Rhoad, M. A., D. D. (Lebanon Valley College), Ph. D. in religion (Potomac University), pastor of the State Street Church of the United Brethren in Christ, Harrisburg, Pa., who describes the method of instruction, pays his tribute to the faculty and the thoroughness of the work done in the following letter bearing the date of April 27, 1927:

"SIRS: In answer to your inquiry of April 24 concerning Potomac University, I am glad to give the following testimony as my honest conviction:

"For at least 10 years I had been trying to find a school that gives correspondence work that would be a credit to me when I got the degree. It is easy to find schools that you could get those degrees from for very little work, but this was not what I wanted. I therefore looked carefully into the work of Potomac University before I matriculated for work. I was favorably impressed with the following:

"First. Their plan for study. I have studied about 50 books in my course. The plan is such that in each book there is required a certain amount of recitation work that, to my mind, is very thorough and satisfactory. The method by which the examinations are given aside from the recitation work is fair. The questions are not sent to the student direct, but to a supervisor, who is known for his integrity and intelligence in the community. He is not allowed to open the questions until the applicant is ready for the test. With the test questions comes a printed form for the supervisor, on which he must testify that the test was taken honestly and the time that the student took in answering the questions. The supervisor mails the answers to the professor in charge of that study. This it seems to me is very satisfactory.

"Second. I was impressed with their faculty. They are scholarly men, who mean to uphold a high scholarly standard for the educational work of our country.

"Third. I want to give my testimony that the work was done faithfully as outlined in the course of study. The nature of the work is such that you simply can not rush through with it. I took a four years' course, but I had to spend seven years to do the work, and then had to utilize all my vacation times to get through with it. It is thorough.

"I hope that there may be an amendment so that schools of this sort may continue their work, for they are a great help. If I can be of any further service, it will be a delight for me to render it.

"Sincerely,

"H. F. RHOAD."

The Rev. R. Fletcher, M. A., B. D. (Yale); S. T. M. (Hartford Theological Seminary); pastor of the Congregational Church, West Cornwall, Conn., and a graduate of five well-known institutions of learning, gives the following testimony in his letter of May 1, 1928:

"DEAR SIR: Your letter has been forwarded to me at this address and I reply at once with pleasure to your request respecting the class of work done at the Potomac University, situated in Washington, D. C.

"I may say in passing that I am a graduate of the Paton College, England, of the Chicago Seminary, Chicago University, of Yale University, and of the Hartford Divinity School. I hold B. A., M. A., B. D., B. D., S. T. M. conferred by these schools of learning. I am now on the professional staff of Columbia University, serving in its extension department as adviser in the home-study work, and I have perfect knowledge of the value, requirements, and what makes for real efficiency in study of this order. I have also taken work in home study at the Potomac University and I can speak with first-hand knowledge of what this study demands, both of the student in his home, of the teacher who instructs, and of the institution through whose instrumentality both operate.

"And in my judgment the work done at the Potomac University is of a very high order—well planned, well conducted, and creditably staffed with instructors of reputed scholarship. The work is prosecuted on the most approved pedagogical lines. As in all such institutions, written matter is placed in the hands of the student equivalent to the lectures given in residence, supplemented by well-chosen textbooks and collateral reading, upon all of which the student is required to furnish written matter covering the accustomed quiz given in residence study. This written work of the student enables the instructor to see the progress made and correct errors in the work. Then a written examination, supervised by a competent person, approved by the university, who will sign a declaration that no help was given the student in the examination, is required on a set of questions covering the subject in hand, set by the authorities in the university. These examinations are as searching and thorough and pass marks as high as any given in Chicago or Yale Universities. There is no way by which any person can obtain pass marks in the Potomac University except on merit. The standard of the work is high and the student must honestly work to win credits in this school.

"Of President Porter I have formed a very high opinion. He is a fine educator and a man of commendable honor. I am sure he would not remain at the head of an institution that was below the standard of present-day requirements in education.

"Thank you, dear sir, for giving me a chance of saying what I can truthfully state on behalf of a deserving school. There are many in our land I would not take all the wealth of Washington and say of them what I have herein said of the Potomac University.

"Very sincerely yours,

"R. FLETCHER."

The next letter comes from the Hon. George P. Blackburn, M. A. (Potomac University, 1909), Paris, Tex., judge of the sixth judicial district court, who did work at Potomac in the early days of the institution, and speaks of its present value after more than two decades in his letter of May 13, 1928—

"DEAR MR. NELSON: I have the honor to acknowledge receipt of your letter in regard to the Capper bill, the Gibson bill, and Potomac University. Your request that I at once give you a plain and truthful statement of the work carried on by Potomac has my careful attention, as has also your request for me to say frankly whether I have any knowledge whatever of anything done by Doctor Porter or his colleagues of which there could be any just public complaint.

"In my opinion the work done by Potomac in its extension courses is honest, thorough, and in every respect worth while. This institution gives real instruction of high grade and requires real attainment on the part of its students before degrees or diplomas are granted.

"It was my good fortune to do some work under the direction of Doctor Porter and his faculty a long time ago; it was perhaps in 1906, or thereabouts. My circumstances were such that it was financially impossible for me to push my studies further in residence at that time. The work was splendid, in every way worth while, and I continue to profit from the courses prescribed to this good day. Since the time I had this work in Potomac it has been my good fortune to have conferred upon me the A. M. degree of two recognized institutions which do only work in residence; also the LL. B. from one of the oldest law schools in the South; and in addition spent two years as a professor in one of the growing universities on the west coast; in the light of this experience it seems to me that the courses given by Potomac are on a par with that required for similar honors by the older and endowed institutions.

"As throwing light upon my reasons for my high opinion of Potomac, it might not be amiss to say that I, in taking my courses in this school, overlooked one subject in some way or other. I went to Washington from Texas to receive my diploma. Upon my arrival there it developed that I lacked one subject of having completed the required course. The tuition had all been duly paid, and if this school had been a diploma mill it appears to me that Doctor Porter could have gracefully smiled, waived the one subject, and given me a diploma. He was sympathy itself, but he and the professor teaching that course required me to complete that extra course there in Washington (without one cent of expense to me) and to pass a written examination on the subject before the diploma was granted. This surely was not the action of one running a "diploma mill," but was rather that of a real school man with ideals to preserve, a real educator with high standards of his institution to be maintained.

"One of our most revered Texas educators, Dr. W. L. Mayo, the founder of our East Texas State Teachers' College at Commerce, Tex., was wont to recommend that his advanced students who were unable to continue their studies in residence should take courses under the guidance of the Potomac faculty. And Mayo was a man who hated sham, hypocrisy, and pretense in all its forms. I am sure that Potomac, in his estimation, did splendid work, or he would not have had this attitude toward the school. Prof. B. L. Phipps, one time professor in Mayo's school and later president of our Grayson College, himself took some work in Potomac and highly recommended the courses to his advanced students. Doctor Mayo is now, unhappily, deceased, and I have lost trace of good Professor Phipps, but Hon. SAM RAYBURN, one of our Texas Congressmen (and we think he is a good one, too) knows both of these great men, and I believe he will be with you in your fight for Potomac.

"In my opinion Potomac has a unique and necessary place in the broad field of education. I hope that in the event the bills of which you speak become law that Potomac will be suitably and fairly protected. Personally I boast of some acquaintanceship with Doctor Porter, and I believe him to be a real scholar, a good man, and an honorable gentleman.

"Please let me thank you for your efforts in Potomac's behalf. Our entire citizenship appreciate men like you in public life.

"Very sincerely yours,

"GEO. P. BLACKBURN,

"*District Judge, Sixth Judicial District of Texas.*"

Rev. Perry F. Haines, pastor of the Methodist Episcopal Church, Tidioute, Pa., presents a different viewpoint as he speaks of the practical values of the Potomac courses in his pastoral work in his letter of April 27, 1928:

"MY DEAR SIR: Your letter in regard to Potomac University and Dr. Ernest W. Porter, its president. In addition to what I will say I am inclosing a number of letters which I received from former students. I will greatly appreciate it if you will return the letters to me. I prize them highly, as I did not take up work with this school until I had thoroughly investigated it. These letters, along with some others, proved to me that Potomac was all and more than she claimed to be. Please notice that these letters are from college men who are teachers in colleges.

"Dr. Ernest Porter and Potomac University are a God's blessing to many men like myself who have not had the opportunity in early days to go away to school. As a young minister I saw my need of better preparation. I have studied with this school off and on since 1921. Owing to poor health I could not keep at my studies long enough to get my degree, and I want it understood that no one can get a degree from this school unless he works. In every subject I was in direct communication with my instructor. I am safe in saying not a paragraph of any book is missed, which you can not say about classroom work. I have tried both kinds of recitation.

"After a thorough study of any subject along with the research work outlined by each instructor, I then went to the principal of my own city school and was obliged to take an examination in the subject from questions sent to him by my instructor, which questions the professor nor myself never saw before.

"I never studied language in my early days, but under the capable instruction of Dr. P. E. Osborne, of Potomac, I learned the Greek language and am able to use my Greek Testament in my pulpit with greater ease than many of our men who have graduated from Garrett Biblical Institute, Drew Seminary, and many others. I was obliged to maintain an average of 90 per cent in all my Greek recitations or it was returned until I reached the proper grade. Had it been easy to get degrees from this school I would not have broken down from hard study and would have had my degree by now; as it is I have studied since 1921 and must take about a year's work before I will get my B. D. degree. This letter comes from one who knows exactly what he is talking about and exactly what Potomac University is doing for deserving men.

"I came to this charge six years ago at a salary of $1,400 a year. Potomac University has increased my efficiency or value to people that my salary has been raised to $2,600 in the six years. Dr. Ernest W. Porter and his school and instructors shall never receive anything but praise from me. They are doing far more than their catalogue claims.

"Sincerely yours,

"PERCY F. HAINES."

The next letter to be read comes from the Rev. James A. Leslie, B. A. (McGill University), B. D. (Potomac University), pastor of the Presbyterian Church, Ashcroft, British Columbia, Canada, and is a specimen of the tributes paid by Potomac's alumni in the Dominion. Mr. Leslie, who is now working for his M. A., writes as follows under date of April 30, 1928:

THE MANSE,
Ashcroft, British Columbia, April 30, 1928.

Hon. JOHN M. NELSON, M. C.,
United States Capitol, Washington, D. C.

SIR: Your letter with inclosure in connection with the work done in Potomac University duly received. In reply I may state that I took a course of study under the direction of the faculty of Potomac University. I had to analyze six books in literature, psychology, and theology. To take six written examinations under a personal examiner who sealed the papers and mailed them to the university. I also wrote a thesis of 5,000 words which entailed reading many more books than those prescribed by the president.

My collegiate work was taken at McGill University, and theology at the Presbyterian Church College, Vancouver, British Columbia.

I consider that the work which I did for Potomac University required as much application and thoroughness in study as when I was taking lectures and writing examinations at the above-mentioned institutions.

I heartily commend the good work which Potomac University is carrying on among those who desire to pursue their studies in extension.

I trust that President Porter and those associated with him in the work of the university will receive the cordial support of all lovers of liberal learning. I have the honor to be, sir,

Your obedient servant,

JAMES A. LESLIE, B. A., B. D.

The Rev. William H. Longsworth, M. A., 1914 (Potomac University), minister of the great First Congregational Church, Canton, Ohio, writes as follows under date of April 29, 1928:

FIRST CONGREGATIONAL CHURCH,
Canton, Ohio, April 29, 1928.

Mr. JOHN M. NELSON, M. C.,
Washington, D. C.

HONORED SIR: Your inquiry about Potomac University. I have taken work with Potomac on two occasions. I have considered the work most thorough and satisfactory. I hold a B. A. from Lafayette College, B. D. from Yale, and for years each winter have taken work in some college or university that I may keep up with my profession.

The work at Potomac I have felt more satisfactory than any other school. They demand hard work; your papers are returned severely criticized and often graded quite sharply.

Very sincerely yours,

W. H. LONGSWORTH.

The Rev. A. W. Climenhaga, B. A. (Taylor University); Ph. D. (Potomac University); dean of Messiah Bible College, Grantham, Pa., makes this strong comparison and pays this splendid tribute to Potomac in his letter of April 25, 1928:

"DEAR SIR: In my educational work I have taken resident work at John Fletcher College, Iowa; Taylor University, Indiana; University of Pennsylvania, Philadelphia, Pa.; and Columbia University, New York. I have taken extension work from Potomac University, Washington, D. C., and Chicago University, Chicago, Ill.

"I found Potomac work equal to any of these schools. In fact, I did harder work under the faculty of Potomac than I did in residence in the other universities for the same amount of credit. The examinations were carefully supervised. In no case did I know what the questions were until I was ready to write.

"I personally know eight other parties who have studied with Potomac University and I never learned of any unfair methods being used by Mr. Porter and the university faculty.

"Potomac University gives opportunity to many an individual who would otherwise be kept from a university training.

"Yours truly,

"Rev. A. W. CLIMENHAGA, Ph. D., *Dean.*"

The words of a graduate and instructor in Potomac are given in this letter of the Rev. Delos E. Abrams, S. T. D., pastor of the Southside Baptist Church, Hornell, N. Y., under date of April 27, 1928:

"DEAR SIR: Yours with reference to Potomac University is at hand. It opens a big question. I know that there is much opposition to the conferring of degrees by correspondence schools, but for the life of me I can not see that there is anything sacro-sanct about the place or the method of getting knowledge so long as it is obtained. The opponents of the correspondence method of instruction evidently think otherwise, though they will not admit it.

"I have been connected with Potomac University both as student and instructor, so somewhat of its standards are personally known. First, as a student. Having graduated from the theological department of one of our grade A universities I knew something of residence work and its standards. Potomac met my expectations as to scholastic requirements. Nothing was made easy for me, and I was never for an instant left with the impression that degrees could be obtained for anything other than work done. In my own work, which I stretched over a period of three years, I was required to write the equivalent of about five volumes of 300 pages each. So far as the quantity or the quality of work done, I am not ashamed of my degree from Potomac. It represents work honestly done.

"With reference to my work as instructor. I was given absolute freedom. It was my purpose to put the work on a par with that done in residence schools, and I was given every encouragement and assistance to this end. Some students objected and were dropped from the courses. One of my examination papers was submitted to a former professor of mine who had taught the same subjects. He said: 'If this is what you require of all your students, they are entitled to academic credit.' Well, it was. I tutored for a professor in one of our good colleges in this State. When the time came to examine the student he asked me to prepare the questions, which I did, using the same questions as were used with correspondence students. He told his student that she need answer only half the questions submitted.

"So far as I know the same standards were in effect in the other departments. This is the truth so far as I know it.

"I have the honor to remain, sincerely yours,

"DELOS E. ABRAMS."

Principal John B. Cook, M. S., LL. D., of Vermont Academy, Saxtons River, Vt., writes the following under date of April 26, 1928:

"MY DEAR MR. NELSON: I appreciate deeply your letter of April 24, and I am glad to respond by saying I have known of the work of Potomac University for a number of years. I have taken a number of courses through this school, and I can not understand why anyone should complain of the work being done.

"The courses I have taken have been the most complete and most satisfactory of any I have had, and I have done work with Bucknell University for master's degree and graduate work with the University of Pittsburgh, besides in my relations with other people doing graduate work through correspondence have come in contact with extension courses from the teachers' colleges of Pennsylvania and Chicago University, and the courses of Potomac University compare very favorably with these.

"I know there is a certain amount of jealousy on the part of schools requiring resident work, but it seems to me this is an opportunity which should not be denied ambitious men and women whose time must be given in a large measure to the support of themselves and their families. To my mind such work of such an institution is most commendable.

"This school requires a certain amount of ground to be covered and a certain grade of work to be done comparable to the best institutions of our country, but they give students unlimited time to cover the ground. This, as I see it, is a godsend to the men and women of our country who are anxious to succeed and to improve themselves in the educational field, but who can not leave the field in which they are engaged.

"Allow me to add I knew a lady, our dean of women at the academy, for a number of years who wanted to complete her work for an A. B. degree. She went over her record carefully with President Porter of Potomac University and found she could get her degree by taking less work in Chicago University, therefore went there to complete the same.

"Sincerely yours,

"JOHN B. COOK."

Dr. Romaine F. Bateman, Th. D., pastor of Trinity Baptist Church, Jersey City, N. J., makes the following significant comparisons and gives this convincing testimony in his communication of April 27, 1928:

"DEAR SIR: Your communication reached me to-day concerning the Potomac University, and I hasten to reply. I gladly submit the following statement:

"First, perhaps I should say that I have actively engaged in the cause of religious education for the past 12 years. I have held many responsibilities in connection with denominational and institutional educational enterprises. I am at present a member of two seminary faculties, one in New York and the other in Philadelphia. The above experience gives me a judgment which should be both practical and trustworthy.

"I have been a student of the Potomac University, and I have found the work they give to be of the highest standard. But for the fellowship of the classroom and campus, it equals the residential university. The textbooks were standard works and the accompanying

syllabi required good, hard work and the returned papers, well marked throughout with red pencil, showed a careful examination by the teacher. This means something for correspondence schools, as anyone familiar with them will know. The examinations were required to be taken under a competent and foreappointed supervisor, and the length of the courses were practically that of the resident university. The honest pursuing of the Potomac curriculum leads, beyond doubt, to high scholarship, and their graduates can stand with those of leading universities without suffering in comparison.

"There is another matter I should like to touch upon in this connection. I have made a special study in the last two years of classical and theological subjects taken in absentia, and I unhesitatingly put the Potomac course at the head of my grading. The course of study in absentia offered by Chicago University and Columbia University is not equal, in my mind, to the Potomac course. The two great universities named by me have purposely and cruelly limited their correspondence courses so that they might not encroach upon or replace their residential offerings. A leading university professor to whom I was speaking recently admitted that the issuing of degrees for correspondence work, even though done as well as in residence, would hurt the residential side of the universities just now. But this same professor told me that the time was near when degrees will be granted by the larger universities for work done extramurally, beginning with specialties and holding arts and theology as far off as possible.

"I have studied the systems used by the International Correspondence School and the La Salle Institute, and I feel that the Potomac is far ahead of any correspondence system for thorough instruction in every way.

"Finally, let me say that I freely write these lines as the firm conviction of my mind. I have never met Doctor Porter, but have merely corresponded with him. I have never completed any course with Potomac nor received any degree from them, nor do I anticipate any. Doctor Porter knows that I am interested in educational development and thus gave you my name.

"Trusting that the above will be useful in some measure and not a burden, and please remember that I shall always be happy to serve you in the good work you are doing for the education of all. You have my prayers and good wishes.

"Sincerely yours,

"R. F. BATEMAN."

Mr. Allan E. Shubert, manager of the Religious Press Association, Philadelphia, Pa., the outstanding advertising medium of religious periodicals in America, wrote Congressman NELSON (April 28, 1928) as follows:

"MY DEAR MR. NELSON: In response to your kind letter of April 24, I am very glad indeed to write assuringly as to the Potomac University of Washington, D. C.

"Through our various publications during a period of years we have directed literally hundreds of students to them for extension work. While their work is practically all carried on by the correspondence method, which occasionally fails to hold a student, even though the course be above reproach, we have had not a single unfavorable letter from any of these subscribers in reference to Potomac University. Several have gone out of their way to thank us for whatever part we have had in influencing them to enroll with the Potomac University.

"I am sure that you are making no mistake in pushing your amendment to the pending bill now before the House of Representatives. Anything that would hamper the progress of the Potomac University would be denying hundreds of eager adults the privilege of extending their education.

"All of those associated with the work here are sincerely appreciative of your efforts in this cause of fairness.

"Very truly yours,

"THE RELIGIOUS PRESS ASSOCIATION,
"ALLAN E. SHUBERT."

Rev. Ira Tapper Hawk, B. A. (Iowa University, 1899); B. D. (Yale University, 1905); pastor of the Rock Spring Presbyterian Church, Atlanta, Ga., whose striking testimonial is characteristic of this energetic pastor, writes as follows (April 30, 1928):

"MY DEAR SIR: Replying to your favor of the 24th instant, re Potomac University, let me assure you of my unqualified indorsement of the work accomplished through its correspondence courses. I have been taking the work for several years. On account of other duties and interests a course leading to the degree of Th. D. has not yet been completed. It has been my fault alone, for I have not completed the required subjects.

"When I first took up the work it was with the written agreement that if I was not satisfied with the work as being equal to that of Yale or any other standard university I might drop it at any time. I am an alumnus of Iowa University and of Yale Divinity School, and I assure you that the work has been as thorough as in either of these institutions.

"The one criticism that I have felt to hurl against the instruction of Potomac University is that I felt I had been doing so much work for the degree. I have written reams and reams of lessons in the course of my work. Still this has been of great profit to me. It has caused me to dig out of a prescribed textbook much more than I would have done in my ordinary private study. In consequence, it is noticeable that my preaching improves in direct proportion to my application to the correspondence studies.

"You have my sincere approval of your efforts to safeguard the good name of Potomac University. In case a fuller statement of work done is required I shall take pleasure in writing more at length.

"Most sincerely yours,

"I. T. HAWK,
"Iowa, 1899; Yale, 1905."

So I might go on reading almost ad infinitum from the more than 300 letters I have examined within the last few weeks, but I must close this line of testimony by reading the following night letter addressed to the Hon. F. N. ZIHLMAN, chairman of the Committee of the District of Columbia, before whom the hearings on the degree-conferring bill were held. The message follows:

BROOKLYN, N. Y., *April 25, 1928.*

Please give full consideration to the following letter Hon. JOHN M. NELSON, Member of Congress, third district Wisconsin, House of Representatives, Washington, D. C.:

"DEAR SIR: I acknowledge receipt of yours of the 24th instant in re Potomac University in connection with Senate bill No. 2366. In reply I want to say that I regard Potomac University as an institution whose graduates may well point to it with credit and pride. Likewise I unhesitatingly state it as my opinion that Doctor Portor, its president, is a man of highest type and ideals and one whose life is earnestly devoted toward aiding those to obtain an education where personal attendance is impossible. I have taken the complete law course of Potomac and found it very satisfactory and all that could be desired, and I am sure a comparison of the course and method of instruction with that of other institutions will show that it matches them if, indeed, it does not excel them. I heartily indorse every effort to stamp out fraudulent institutions, whether educational or otherwise. There seems to be a prejudice in certain channels against giving courses in absentia, but I fail to see any legitimate basic ground to warrant it if given by a reputable institution. If I am not in error, no less an eminent institution than the University of Wisconsin first inaugurated the plan which proved so successful that it was copied and adopted all over the Nation as well as abroad. None, I am sure, will question the integrity or judgment of the distinguished Chauncey M. Depew, and he it was who thought so much of the plan of extension courses that he headed, I believe, Intercontinental University, of Washington, D. C., and I recall having been written to by this institution to enroll in its extension courses. Again, the University of London, England, some time ago wrote me inviting registration in its extension department and such other.

"Creditable institutions as Columbia University, Chicago University, and the University of Indiana, as well as many others, have adopted the extension system of instruction and education, indeed they have written me inviting enrollment. Surely that is evidence enough and eloquent tribute to its need and usefulness, surrounded with proper safeguards, whereby fraudulent institutions will be suppressed. Such courses are beneficial to those who can not secure education by personal attendance, and these courses should be encouraged by all means rather than suppressed. Education and enlightenment should not be circumscribed, but should be made obtainable to all, to my way of thinking. The extent of an institution's usefulness should be gauged not by the size of its endowment and its splendid structures but by the nature and completeness of its courses and the methods of instruction employed. Knowledge, not money or bricks, should be the fundamental factor of consideration. I am proud of Potomac as my alma mater, and my earnest hope and prayer is that its existence will be continued to the end that its usefulness may continue forever. What Webster said of Dartmouth when a somewhat similar assault was made upon its existence is equally applicable here, 'She is a small college, but we love her.' With assurance of highest esteem,

"Yours very respectfully,

"J. G. M. BROUNE, LL. B."

After reading and carefully weighing this mass of positive evidence to the amazing work done by Potomac University, Congressman NELSON declared his conviction that Potomac University is to-day the foremost exponent of the university extension method of teaching in America, and that it exemplifies the highest type of extramural education in existence, and that he considered it his public duty as a legislator and friend of higher education to do all in his power to foster and encourage all such institutions of learning within the limit of the constitutional provisions relating to education.

Being thus overwhelmingly convinced of the worthiness of this institution, Congressman NELSON appeared before the House committee and asked a rehearing on the proposed bill in order that he might lay before them this mass of evidence and propose such amendments as would safeguard Potomac University and institutions of like character, and guarantee their freedom from interference in the prosecution and extension of their work. Such hearings were held on April 18 and

May 2 and 4, 1928, in the House Office Building, Washington, and are recorded in the official congressional hearings on H. R. 7951.

The result of Congressman NELSON'S convincing presentation of the evidence was the unanimous vote of the committee on May 4 to incorporate the amendment proposed in behalf of the Potomac University and report the amended bill favorably. However, on account of briefs being filed in Congress showing the bill to be unconstitutional, no further action was taken on it. The Potomac University goes forward, therefore, to a glorious future, and its friends may well look for increased usefulness of the institution in its chosen field of Christian education.

My attendance on and participation in the last two hearings before the House committee, together with my analysis and study of the letters received, has deepened certain convictions regarding the character and work of Potomac University which have been growing upon me during my acquaintance with the school. To the consideration of some of these I now invite your attention. For the sake of clarity I will state them in the form of propositions and read extracts from letters received within the past month bearing on the same.

I. THE POTOMAC UNIVERSITY IS TRUE TO THE FUNDAMENTAL TEACHINGS OF THE BIBLE

Potomac University is a positively Christian institution, standing foursquare for the Word of God, pledged to the infallible teachings of Jesus Christ and His prophets and apostles, and loyal to all the teachings of the Bible, which is the center of all her activities.

The school specializes in education along strictly evangelical lines for clergymen, church and Sunday-school workers, and directors of religious education by the university-extension method without the necessity of leaving one's usual employment.

The majority of students pursuing studies in the school are pastors who have come, in maturity of life, to realize the need of a more efficient personal ministry and for suitable preparation educationally to adequately enable them to meet the exigencies of an age of doubt. The trustees and faculty offer, as the valid doctrinal basis of the instruction, this formula:

God the Creator of the universe; a personal devil; man a product of direct creation; the fall of man through transgression; justification and salvation through faith in Christ, the only begotten Son of God; the miraculous birth of Christ, His sinless life, His vicarious death, His bodily resurrection, and His triumphal return; the Holy Spirit as the third person of the Trinity; and the Bible as the supernaturally inspired Word of God.

(The trustees, governors, officers, and faculty shall subscribe to this declaration before entering on their duties and annually thereafter.)

In the Potomac system of instruction the student is conducted through searching courses in the history, interpretation, and doctrine of the Bible; in Biblical and systematic theology; homiletics; religious pedagogy and Sunday-school methods; New Testament Greek; evangelism; Christian evidences; comparative religions; and missions. This theological instruction is supplemented by fundamental studies of a cultural nature, as: Biology, upon which we base our interpretations of life; psychology, the basis of teaching; economics, that we may know something about money, employment, unemployment, and the production, distribution, and consumption of wealth; sociology, the science of human relations; history, because we can not understand the present apart from the past; the English language and literature, that one may know the tongue in which he is to speak to his fellow men; and public speaking, that one may become an effective, pleasing pulpit orator.

The purpose of this program is twofold: First, that the student attain a practical working knowledge of the Bible and its doctrines on sound, orthodox, evangelical lines through a progressive presentation as given by the world's foremost Christian scholars; and, second, that the entire education of the student be so rounded and directed in proper channels that he become a safe guide in whatever field of Christian work he may engage. This educational doctrine has been thoroughly tested and its expediency amply proved during the past quarter of a century by its large enrollment, the words of approval from those who have studied with the school, and the benefits and progress of the students.

The Potomac system of instruction is unexcelled. This is the experience and the testimony of students and graduates. The school has provided the means for those who have to work in the vineyard of the Master to receive adequate preparation to become successful Christian workers, by a standardized system of teaching equal to all essential educational qualities, to residence work, the courses being based on biblically sound textbooks of the highest standard, systematically arranged and directed by correspondence under thoroughly trained teachers of wide experience and deep sympathies. They include great series of most exhausive analytical and research questions covering every detail of the textbooks and assigned collateral reading, and instructor's syllabi which must be mastered by the student and the recitation work successfully passed before the written examinations can be taken. Each part in the Potomac system of instruction must be mastered before the student is permitted to go on to the next. Thus the thoroughness of the work is safeguarded.

These study courses are thus designed to promote effective Christian work along strictly evangelical and orthodox lines, and are the contribution of the institution to adult education and the extension of the Kingdom of God. Proper academic recognition is accorded at the close of suitable courses of study, which acts in a twofold manner: First, as an incentive to earnest, intensive, and prolonged study along definitely prescribed lines; and, second, as a reward therefor, the university in such recognition marks out a definite standard of attainment in Christian scholarship for the graduate. Thus in a very real and true sense the Bible college with all its advantages is brought into the home of each student, and all of its instruction stands squarely on the impregnable rock of Holy Scripture.

Innumerable testimonials to this have come to the university in the letters of students and graduates. From these I have time to quote but two:

Rev. John J. Van Gorder, pastor of the First Baptist Church of Butler, Pa., writes: "This sane, constructive course is needed to-day as never before. I know of no school at present doing the work in this line that Potomac is doing"; and

Rev. S. A. Tamblyn, Fort Sumner, N. Mex. (April 28, 1928), says:

"Potomac University is one of the very few sound theological institutions requiring a high standard of work at present existing in the United States of America, and it would be a great loss to this country if it should cease to carry on its splendid work. And its president, Doctor Porter, with the other members of its faculty, comprise a force from the point of scholarship alone under which any man may well be proud to have studied. May God bless Potomac and may its shadow never grow less."

The second proposition I desire to enforce is the fact that—

II. THE POTOMAC UNIVERSITY FACULTY IS ONE OF SUPERIOR SCHOLARSHIP

When one contemplates the unusual courses offered in and aims of Potomac's system of instruction he naturally asks about the scholarship and ability of the instructors. Regarding the scholarship of the faculty, scores of testimonials have been given and students and graduates have but to recall the red or blue pencil marks and fractional percentage marks in their corrected research and examination papers to be reminded of the exactness with which their work was graded, while the realization of the facts that on the faculty are graduates of Yale, Taylor, Maryland, Illinois, Wesleyan, Colgate, and Potomac Universities; Ursinus, Davidson, Albright, and William Jewel Colleges; and Ursinus, Union (Richmond) Episcopal, Newton, Southern Baptist, Colgate, and the Seminary of the Reformed Church (Lancaster), and that these instructors came to Potomac with the practical experience gotten from years of teaching and imparting of knowledge to others, fully warrants such tribute as those given in the following extracts from letters received within the past month:

Gladys Potter Williams, professor Southern Illinois State Normal University, Carbondale, Ill., writes (April 26, 1928):

"I am hastening to say that I did more than 50 hours of work with the Potomac University and found the work exactly as represented. There was never any slighting of the courses planned. Doctor Porter was rigid in all of his requirements, as were his faculty. I felt that my studies were being pursued under the guidance of superior scholarship and that the faculty were very exacting in demanding a high grade of work."

The Rev. Charles G. Johnson, Ph. D., pastor of the Congregational Church, South Coventry, Conn., writes thus to Hon. JOHN M. NELSON:

"MY DEAR SIR: Your letter in regard to Potomac University came to my notice to-day (April 28, 1928). 'As a former student of the Northwestern University, Boston University, and having received the degree of Ph. B. from Taylor University, I wish to state that I gained more knowledge from the Potomac University course than the above institutions. I found the requirement high, the rating on examinations fair, and honest work demanded under supervision; also that the faculty and president were well qualified for their task. There is one thing it lacks, however, and that is adequate funds for its expansion. It is hoped that some day it may have larger means to meet its demands.'"

Charles M. Jones, supervising principal of the Taylor County high schools, Perry, Fla., says, under date of April 30, 1928:

"I am a graduate of Western Kentucky State Normal, Potomac University, and University of Chicago.

"I consider the services rendered at this institution (Potomac University) to be high grade and faithfully done."

Rev. Eric Herman Carlson, M. A., Ph. D., Lutheran Church, Villa Olivia, Porter, Ind. (May 5, 1928), says:

"I can not speak too highly of the inspiration received from my textbooks, from the written work, and from the comments and corrections by the Potomac University teachers. So great was the pleasure in this study and correspondence that when I finished the course in 1926 I felt as blue at parting with my teachers as if I had been in actual attendance. I would gladly have gone to Washington for my final examination had such request been made.

"My experience with the faculty of the Potomac University places the Potomac University on a level with any educational institution that

I have had the privilege to know. In written work, as carried on with questions and answers, there can be neither favoritism by the instructors nor bluffing by the students. Nor need there be a single hour wasted in waiting. In my case answers were mailed and within a few days were returned corrected. The beauty of it is that in correspondence work a student can concentrate on one subject until the final examination on that one subject is taken."

Several have paid their tributes to the work required by the faculty in language similar to that of the Rev. I. T. Hawk, of Atlanta, Ga. (April 30, 1928), which I repeat: "The one criticism that I have felt to hurl against the instruction of Potomac University is that I felt I had been doing so much work for the degree. I have written reams and reams of lessons in the course of my work. Still, this has been of great profit to me. It has caused me to dig out of a prescribed textbook much more than I would have done in my ordinary private study. In consequence, it is noticeable that my preaching improves in direct proportion to my application to the correspondence studies."

Rev. Alexander Laird, Litt. D., pastor of the First Presbyterian Church, Glassboro, N. J., writes as follows:

"I may say that in 1906 I took a very thorough and comprehensive course of study (correspondence) under the direction of Doctor Porter and his faculty for the degree in philosophy. I found their methods straightforward, their examinations of a searching and scholastic character."

Rev. P. E. Osborne, B. S., B. D., Ph. D., instructor in Potomac University, department of New Testament Greek, writes as follows:

"APRIL 28, 1928.

"My relations with Potomac University and President Porter in particular are such as to make me believe most thoroughly in the character of the work done under his direction as to its scholastic requirements, its honest and honorable support of high standards of education, the character and quality of the teaching, and the entire worth of the school to continue its granting of the degrees awarded for similar standards of scholarship by schools where the work is done in residence.

"As a member of its faculty for nine years, coming to it from other schools doing similar work, I have to say that it has the highest standards of any school with which I am familiar which do extension work, and, naturally, I am anxious to safeguard the standards of my own teaching by connection only with such a school. I know absolutely no reasons why its courses are not to be considered equivalent to the same work done in residence.

"P. E. OSBORNE,
"103 Ashley Street, Springfield, Mass."

Rev. R. G. Ulrich, a busy pastor in Lebanon, Pa., speaks of the helpfulness of his course and testifies thus to the work of his instructor:

"APRIL 30, 1928.

"Under the supervision of Potomac University I have been pursuing a course of study in New Testament Greek for somewhat over one year. All the work done has been by correspondence, according to their extension-department plan. I am happy to be able to testify that all my expectations relative to this course have been more than met. I have received most helpful training through this university. They have more than met all the promises made to prospective students. To state the results I have obtained very succinctly, I will say that with the training received and to the point of advancement I have reached I would be willing to enter a competitive examination on this subject with anyone trained anywhere."

Miss Kathleen M. Bull, A. B., a very successful teacher at Elmwood, Ill., gives a further testimony to the splendid work of this department when she says:

"APRIL 28, 1928.

"Concerning the character of work done by Potomac University, I am decidedly in favor of the amendment to safeguard its charter rights.

"In my Greek work with this institution I have been given much closer attention than ever by a busy professor at my resident college. I have understood the work more readily and, too, been required to do a higher standard of work. In my case the planning of the course to meet correspondence needs and the scholarship demanded in the student have been far above resident-college standard."

Walter R. Feser, a student in the Eastern Baptist Theological Seminary, Philadelphia, Pa., says:

"APRIL 28, 1928.

"During the years of 1925–26 I took courses of study with Potomac University in Greek, religious literature, psychology, and religious education. Standard textbooks were used, and when needed or desired supplementary information was given. The texts were carefully and thoroughly analyzed.

"Dr. P. E. Osborne, instructor in Greek, in his course with me, revealed himself as a capable instructor, thoroughly established in sound pedagogical principles and fully conversant with his subject. Due to the thoroughness of his work, I have been able to successfully follow an advanced course in New Testament Greek at the Eastern Baptist Theological Seminary. Examinations were conducted under most rigid supervision."

Miss Mary Olive Vaudry, of Lennoxville, Quebec, Canada, a splendidly trained and capable teacher, writes as follows, under date of May 3, 1928:

"It gives me much pleasure to reply to your letter of April 24, relating to Dr. Ernest W. Porter and Potomac University. I am a graduate of McGill University, Montreal, and received from that institution the B. A. and M. A. degrees. As I have chosen the teaching profession, it seemed an advantage to obtain the degree of Ph. D. also. After some correspondence with Doctor Porter and friends in Boston who knew of him and his work, I enrolled as a candidate for the Ph. D. degree nearly two years ago.

"So far I have found the course as stiff and thorough as any of the best universities that require personal attendance; also the work is done faithfully by the teaching staff."

Rev. H. F. Rhoad, Ph. D., says:

"I was impressed with their faculty. They are scholarly men, who mean to uphold a scholarly standard for the educational work of our country."

Rev. R. Fletcher, M. A., B. D., S. T. M., of West Cornwall, Conn., a graduate of Paton College, England; Chicago Seminary, Chicago University, Yale University, and Hartford Divinity School, and now on the professional staff of Columbia University, says:

"In my judgment the work done at the Potomac University is of a very high order, well planned, well conducted, and creditably staffed with instructors of reputed scholarship. The work is prosecuted on the most approved pedagogical lines."

The Rev. C. H. Monbleau, 10 Summit Street, Bristol, Conn., under date of April 27, 1928, says:

"My position with the school thus far has revealed that the members of the faculty are very faithful to their work and follow the courses minutely as outlined. They require a thorough knowledge of the subjects both during the written work sent them and the examinations."

Miss Loella M. Hobson, B. A., a teacher in the Frankfort Pilgrim College and Theological Seminary, Frankfort, Ind., writes as follows:

"I am glad as a student of Potomac University that I can testify to the high character of the work that is demanded by the instructors of that school.

"I have been a student in that school for three years. The work has been very exacting, thorough, and in some respects better work and more of it has been required by that school than some other schools that have a public rating and standing throughout the country. I have been a teacher in the public schools, also in the high school, and in more recent years in two colleges and I do not know of any better work being done than the work of like nature being done in this university. If any difference, the work is more faithfully done and of a higher order than one would suspect from the outline course of study. Without question it is helping many persons to get an education of a very high merit and the school should be safeguarded in its work."

From the many other tributes to the splendid scholarship of Potomac's faculty may I read but one other testimonial? Dr. Loren S. Minckley, M. A., B. D., Ph. D., head of the education department of Kingswood College, Kingswood, Ky., writes as follows under date of April 26, 1928:

"Having taken 30 hours' work in education with this institution for a doctor of philosophy degree we can say that we consider Dr. Porter and his faculty educators of the highest type. They are people who are very fair in their decisions, the work being done exactly as outlined in their catalogue. Sometimes we think, in fact, we know that the work is more thorough than some other universities which we have attended.

"We have taken 182 hours' work from standard institutions, which are as follows:

"'The Brockport State Normal and Training School of New York, University of Denver, Denver, Colo., and Kansas State University, Lawrence, Kans.

"'We consider the work done with Potomac University of equal value with that of any one of the above institutions, even with the old regent's system of New York State where we received our earliest and most lasting impressions.'

"Thus we bring to you some of the voluntary testimonials received from those who have come into closest contact with the members of the faculty and are therefore qualified to give fair and just appraisements of their scholarship and ability."

My third proposition is that—

III. THE POTOMAC UNIVERSITY SYSTEM OF INSTRUCTION IS THE EQUAL OF THE METHOD USED IN RESIDENCE IN THE BEST COLLEGES, UNIVERSITIES, AND SEMINARIES

Correspondence instruction is the great miracle of this century. A greater number of persons are studying by mail to-day than in all the residence institutions combined. For adults the system is ideal, because the average student will learn more in a given time by mail than in the resident class.

This statement is abundantly proven by the testimonials of scorces of persons in the various professions who have taken work in residence

in many of the best known and most highly rated institutions in our own and other countries, and have then taken postgraduate work in absentia with Potomac.

Believing that you would rather hear their actual statements than anything I may say of them, I pass at once to read some of the extracts which prove conclusively the truth of the proposition.

We introduce first the Rev. L. L. Gwalfney, S. T. D., editor of the Alabama Baptist, Birmingham, Ala., who writes as follows under date of April 28, 1928:

"I had five years in Richmond College (now the University of Richmond) and three years in the Southern Baptist Theological Seminary at Louisville in preparation for the ministry. But I declare to you that the year's work I did in the correspondence course of Potomac University was worth more to me than any single year I had as a resident student either in the University of Richmond or the Southern Baptist Theological Seminary of Louisville. It is with pleasure that I offer this sincere testimony if it is worth anything to you."

Dr. Lyman C. Pettit, pastor of the People's Presbyterian Church, Bridgeport, Conn., addresses the following letter to Congressman NELSON:

"ESTEEMED SIR: Replying to your letter of recent date in re Potomac University, permit me to say I spent 12 years in preparing for the Christian ministry in residence at preparatory school, college, and seminary, and when I came to pursue a course in absentia with Potomac University leading to the degree of S. T. D., I was greatly pleased with the high and practical standard of the course prescribed and the care and efficiency of Doctor Porter and his colleagues in directing the study and examinations. Neither in college nor seminary did I find the examinations necessitating a more thorough knowledge of the subjects than those with Potomac University. The rules governing the examinations are such that a self-respecting student has no cause for embarrassment. There is certainly a large field for the high standards of extension service in higher education and postgraduate work as conducted by Potomac University. Hoping to have given you the information sought, I am,

"Very truly yours,

"LYMAN C. PETTIT."

The Rev. T. P. Tribble, pastor of the New Antioch Baptist Church, of Chattahoochee, Ga., thus expresses his judgment of the work of Potomac:

"I have an A. B. degree from the University of Georgia; the master's degree in sociology from Oglethorpe University, as well as my master's degree in English from Potomac. I have also done work with University of Tennessee and the University of Chicago. My work at Potomac was on a par with the work that I have done at any of these places."

The Rev. E. J. Wolland, B. D., minister of St. Andrew's, St. Thomas, Ontario, and winner of the Calvin gold medal for honor work in theology in the Montreal Presbyterian College, says:

"I have been taking a course of study with the Potomac University for the past two years, and I have always found the work to be carried out most faithfully as outlined in their catalogue. I am a 1914 graduate of the Montreal Presbyterian College (which is affiliated with McGill University). I won the Calvin gold medal for honor work in theology and hold the B. D. degree from that same institution. The course of study given by the Potomac University is of a very high order, the examinations are conducted most carefully by qualified supervisors, and if I should be successful in carrying off the degree of Th. D. for which I am now working with them I shall feel that I have earned it by sheer hard work. The standard of the work demanded by the University of Potomac is equal, if not higher, than any of our best universities in Canada."

The Rev. James A. Fraser, B. D., Ph. D., pastor of the First Presbyterian Church, Baker, Oreg., says under date of May 1, 1928:

"I have studied in a number of schools, and am a graduate of the Western Theological Seminary, Pittsburgh, Pa., with degrees of S. T. B. and B. D. (Presbyterian School). The work of Potomac which I carried on was difficult and carefully supervised. Nothing was carelessly gone over. They insisted on the right kind of research in all departments."

Rev. William A. Sites, Latrobe, Pa. (B. D. graduate), says:

"In all of my scholastic work, which has covered a period of 20 years, I have never pursued a more thorough course."

Dr. W. E. Davis, pastor of the Baptist Church at Clifton Hill, Mo., writes as follows, under date of April 28, 1928:

"I want to say that the plans for work provided by Potomac University are as definite and extensive as those provided by the other universities for the same degree, with the exception that most institutions require that the student shall be in residence during a part of his work. After choosing my four minors for the work and they had been approved by the University, I began the study which extended over a period of four years and required three years of my effort. I found that each work had to be studied faithfully, and recitation work submitted on each guided by a syllabus submitted by the professor in charge. Then for the examination the questions were sent under seal to be opened only in the presence of the supervisor previously chosen by me and accepted by them when they were satisfied of his worthiness. The examination had to be written in his presence and at the one sitting. The paper was then turned to the supervisor, who sealed and forwarded it to the university. When the professor in charge had graded it the grade was sent to me. I certify on honor that each and every book of the full course was treated thus. In addition I was required to submit a 5,000-word dissertation at the middle half of my work and a 10,000-word thesis meeting the requirements of all institutions for a doctor's degree.

"While pursuing this course the faculty saw fit to strengthen some of their courses and one of them fell in my path. When I wrote seeking to hold them to their former acceptance they admitted that if I insisted they would be compelled to do so, but that they would be much better satisfied with my work if I would accept the strengthened program. I did it and continued my work, receiving my degree of Ph. D. in April, 1916. I was then at Clinton, Mo."

Prof. Elmer H. Webber, superintendent of schools at Mapleton, Me., a man of culture and wide experience, writes:

"Since receiving my A. M. degree from a Maine institution I have done advanced work in history under the direction of Potomac University. I have found the work as thorough and satisfactory as that done here in residence."

Rev. Hubert E. Cobb, Field's M. E. Church, North Olmsted, Ohio, says:

"I consider the work of Potomac University of a high order, and that it requires more mental effort than much of the resident college work."

Rev. J. E. Agans, pastor of the Church of God, Ossining, Ind., says:

"It is a pleasure to speak a word concerning Potomac University. I have just completed work with them for B. D. degree and can say that their standards are high and all things carried on in a very honorable way.

"I have a diploma from a Bible institute, Wilmington College, Wilmington, Ohio, and Lane Seminary, Cincinnati, Ohio, and I did no more consistent work in any or all of these institutions than I did in Potomac University."

Rev. A. W. Lindenmuth, Ph. D., pastor of St. Stephen's Evangelical Lutheran Church, Allentown, Pa., writes as follows:

"I am firmly convinced that the courses given and the work required by Potomac University stand second to none among educational institutions of our country, and in more than one case it ranks higher than that of any other institution."

Mr. N. A. Yeany, high-school teacher, Steelton, Pa., says:

"The course that I selected and the work assigned to me by correspondence (in Potomac University) was harder than any work I ever did in a classroom."

Dr. R. J. Murphy, pastor of the First Baptist Church, Johnson City, N. Y., another personal friend, writes:

"I am a seminary graduate and can honestly say that the work given by Potomac University is equal in value to the work given in resident seminary."

Miss Mabel J. Thomson, B. A., instructor in history in the Practical Bible Training School, Bible School Park, N. Y., says in her letter of April 27, 1928:

"I am very glad to make a statement regarding the work of the university. It was my privilege to see the work done by a teacher in our school which led to the degree of doctor of divinity. In every detail the work was faithfully done as outlined, and from my observation of the study courses, theses, and final examinations it seemed in every way more intensive and exhaustive in its scope than the work of the average college class. I have been taking a course myself since that time. It seems to me the work of this university is so valuable it should be safeguarded in every possible way."

Prof. Clinton J. Bushey, head of the department of biology and chemistry, Olivet College, Olivet, Ill., writes:

"At the present time I am enrolled as a member of the institution and the work expected of me is no way inferior to that expected in other institutions. Owing to the type of studies offered, there are necessarily methods used which can not be used in a school where residence is required. But this is no hindrance to the student who wants to get his studies. Residence does not guarantee scholarship, either."

Mr. David Levine, M. A., a successful teacher in East Orange, N. J., writes:

"In reference to the work carried on by Potomac University, I would very emphatically state that in my judgment the studies are equivalent in grade and character to any given at our larger universities where residence is required. May I here state that this is actual observation and contact through many courses taken in residence?"

Rev. Wallace H. Wotring, Ph. D., D. D., LL. D., pastor of St. John's Reformed Church, Nazareth, Pa., gives the following statement of his convictions borne of years of intimate personal relation with the university:

"I was graduated from Ursinus College and Theological Seminary and therefore received the best training that our denominational schools can give. It was after I had been in active service in life for a good many years that I took advantage of what Potomac had to offer. To me it was a new revelation and such a boon that I often wished that

men who can no more be resident post-graduate students knew of the thorough work done by this institution and thus bring themselves abreast of modern development in the field of knowledge. I have attended three institutions as a resident student in my day, and one of them granted me philosophic honors. None of them could be more thorough than Potomac, because it covers a subject like the shingles of a roof." (Written April 27, 1928.)

Rev. A. P. Logan, M. A., pastor of the Presbyterian Church of Bedford, Nova Scotia, writes as follows under date of April 30, 1928:

"It is untrue that degrees are issued by the Potomac University without proper work being done. I did the work and did it faithfully. I have passed a good many examinations and I saw no difference between the Potomac examinations and those of Dalhousie University, Pine Hill College, or Union Theological Seminary.

"I think the university is doing splendid work. I think that a person receives better mental training from that university than from the ordinary university because he is not rushed with his work and can therefore do it thoroughly.

"A. P. LOGAN,
"*M. A., Class of 1917.*"

Rev. J. E. Spencer, Ph. D., of Lake City, Iowa, writes:

"I am a graduate of Coe College, Cedar Rapids, Iowa, and of Omaha Theological Seminary, and have taken correspondence work with the University of Chicago before taking work at Potomac. My work with Potomac I consider on a par and in some ways excelled anything I got through other schools."

Rev. A. E. B. Blundon, B. A., Stittsville, N. Y., says:

"I have had the pleasure of attending four colleges and universities, both in Canada and in the United States, and as far as I can judge the work taken by me at Potomac University (by correspondence) compares with what I have taken in class at other institutions."

Melvin A. Saylor, M. D., of North Wales, Pa., says:

"For upward of 25 years I have taught in public schools, in colleges, and at present in a university. I am a graduate of arts and science, a class "A" medical school, and feel qualified to judge the standard of this institution. In my course I was strictly held to the work as outlined and I was compelled to complete it and submit a thesis before I received my degree, and I sincerely feel that it should receive and is deserving of support."

Ex-Judge Owen F. Renegar, A. B., LL. B. (Potomac University), lawyer of Oklahoma City, Okla., says:

"In regard thereto will say that it has been my pleasure to have been a student of Potomac University, and have taken considerable work with other institutions, and I prize my training, taken in extension with Potomac University, as the highest type of university culture."

Miss Ella A. Rust, B. D., of Worthington, Minn., says:

"The work required by the Potomac University is very thorough and must be done faithfully and well. The student is asked to finish satisfactorily every course as outlined by the school. If this work is not of a standard quality the student is asked to do it over again. To my knowledge no residence school is more strict in this regard than Potomac University, neither does any residence school require more work for degrees given. Students from other schools and I have compared our work."

The Rev. Herbert M. Pease, pastor of the First Baptist Church, Cooperstown, N. Y., a personal friend for more than a quarter of a century, writes:

"I have taken extension work with our regular theological seminary, but the work with Potomac was much more thorough in quality and more in quantity. I personally know two men who are on the teaching force, and both are able and conscientious men."

Dr. J. B. Cook, principal of Vermont Academy, Saxtons River, Vt., on April 28 made this significant comparison and declaration:

"The courses I have taken have been the most complete and most satisfactory of any I have had, and I have done work with Bucknell University for master's degree and graduate work with the University of Pittsburgh, besides, in my relations with other people doing graduate work through correspondence, have come in contact with extension courses from the Teachers College of Pennsylvania and Chicago Universities, and the courses of Potomac University compare very favorably with these."

Rev. S. A. Marks, pastor Baptist Church, Mexico, N. Y., writes:

"With regard to the standing of Potomac University, I consider that the courses and work of the university are the equal or peer of many of the universities or colleges which by their endowment are able to stand in the association. I have studied in McMaster University and in the Southern Baptist Theological Seminary, and feel that I can speak without prejudice when I say that the work of preparation, criticism, and examination are at least the equal of either. It requires a more thorough knowledge of the subject in hand to be able to pass the examinations required. It is a college through which a man on a poor field or with limited income may secure an honest, thorough, and constructive course of study."

Dr. William Liggett Dibble, minister of the First Congregational Church, Mason City, Iowa, writes as follows:

"When the Chicago Seminary discontinued its Ph. D. course, Doctor Gunsaulus advised me to get in touch with Dr. Ernest W. Porter and finish my reading under his direction. This I did, and read for about two years, and was greatly pleased—

"(a) By the books chosen.

"(b) By the outline of study furnished.

"(c) By the honesty of the work required."

"May 10, 1928."

Rev. Oliver E. Schaefer, pastor of the White Memorial Church, United Brethren in Christ, Buffalo, N. Y., writes this of his work with Potomac University:

"The character of the work compares very favorably with that done in the regular seminary which I attended. In the course on 'Problems of the Old Testament,' for example, there were 310 research questions to be written and corrected by the professor. The examination is taken under a selected examiner. In my case the examiner is the Rev. N. L. Linebaugh, B. D., of Buffalo, N. Y. He was approved by Potomac after an investigation of his educational record. The examinations are mailed to him and taken in his presence, then mailed to Potomac. I handle them only in his presence."

Rev. Isaac W. Grimes, B. A., B. D., S. T. D., Cambridge, Mass. (May 9, 1928), says:

"I was a resident student at Worcester Academy, Massachusetts, for four years; a resident student at Colby University, Waterville, Me., for four years; a resident student at Rochester Theological Seminary, New York, for three years, graduating from each of these, and then after 15 years of active service in the Christian ministry a brother clergyman who had taken a correspondence course of Potomac University spoke of it with such appreciation that after investigation I, too, enrolled, and I gladly testify to the value of the instruction received. I believe that the correspondence courses of Potomac University will compare favorably with those offered by recognized schools of learning and that the requirements for its degrees will meet the approval of the competent and the unprejudiced."

Thus I might go on reading extract after extract from students and graduates giving their mature, unbiased comparisons, but will close this part of the discussion by reading from the letter of Attorney J. G. M. Browne, LL. B., of 215 Montague Street, Brooklyn, N. Y., a member of the bar in most of the Federal courts in the eastern part of the United States and a member of the bar of the United States Supreme Court, whose splendid tribute closes with a sentiment which finds an echo in the heart of every student and alumnus of Potomac. He writes to Congressman NELSON as follows:

"I want to say that I regard Potomac University as an institution whose graduates may well point to it with credit and pride. Likewise I unhesitatingly state it as my opinion that Doctor Porter, its president, is a man of highest type and ideals and one whose life is earnestly devoted toward aiding those to obtain an education where personal attendance is impossible. I have taken the complete law course of Potomac, and found it very satisfactory and all that could be desired, and I am sure a comparison of the course and method of instruction with that of other institutions will show that it matches them if, indeed, it does not excel them. I am proud of Potomac as my alma mater, and my earnest hope and prayer is that its existence will be continued to the end that its usefulness may continue forever. What Webster said of Dartmouth when a somewhat similar assault was made upon its existence is equally applicable here: 'She is a small college, but we love her.'

"With assurances of highest esteem,

"J. G. M. BROWNE, LL. B."

During recent years such well known institutions as Chicago University, Columbia University, University of Wisconsin, Temple University, University of Washington, and many seminaries have introduced courses in absentia. Many students of these institutions have afterward taken work in Potomac and their testimony confirms the truth of my fourth proposition, viz:

IV. THE POTOMAC UNIVERSITY SYSTEM OF INSTRUCTION IS THE EQUAL OF THE METHODS USED BY THE BEST UNIVERSITY EXTENSION AND CORRESPONDENCE SCHOOLS

In the strictest sense Potomac is not merely a "correspondence school" as that expression generally describes the operations of many colleges giving instruction beyond the walls, but is actually giving university extension instruction equal in educative values to residence in the foremost institutions. It brings the Bible college and university into the home of the one unable to go to the resident institution. That celebrated statesman, Daniel Webster, is said to have declared, "My idea of an ideal college is Mark Hopkins on one end of a log and a student on the other." So Potomac University aims in her system of instruction to bring the ripest scholarship the best possible courses, the best standard texts and methods to the home of each student in such manner that each individual student will receive the entire attention of the instructor while pursuing his course.

The late President William Rainey Harper, of Chicago University, was one of the pioneers in the field of university extension, and in speaking of its value is said to have used this striking comparison:

"If I have 20 resident students in a class each one will receive one-twentieth of my attention, but if 20 pursue a course with me by correspondence each one will receive all of my attention." Potomac's system of instruction aims to fully realize this ideal, and the comparisons made by students who have pursued courses elsewhere and then have studied in Potomac, abundantly proves the proposition. Kindly give attention as I read a few of these recent testimonials.

The Rev. Joseph A. Davis, D. D., pastor of the Woodside Community Baptist Church, Woodside, N. Y., gives this striking testimony:

"I have done correspondence work in Columbia University as well as in Potomac University and others and consider Potomac University to be equal to any other school of which I know anything in its extension work."

The Rev. H. Ellis Lininger, pastor of the Congregational Church at Wisner, Nebr., and professor in the Omaha Bible Institute, says:

"I have done a great deal of correspondence study and helped in the planning of courses for other institutions, and the courses and work offered and demanded for credit by the institution in question (Potomac University) is of the highest type. The demand is high and the students must do faithful work to secure the credits offered."

Mr. X. P. Walton, Union Springs Academy, New York, writes under date of April 30, 1928:

"From my contact with Doctor Porter and other teachers of the school I should say that the work is very thorough and equal to that of any correspondence school of which I have any knowledge. The work is done faithfully as outlined in the course of study and the grading is on the same basis as any residence work would be."

Rev. F. E. Morrell, pastor of the Methodist Episcopal Church, Colman, S. Dak., says:

"Regarding Potomac University, desire to say that I believe Potomac University is up to the standard in all its departments. I have taken extension work through the years from different institutions, but with none which maintain a higher standard than Potomac."

Mr. George H. Cain, B. A. (Potomac 1913), teacher in the Cambridge High School, Mass., writes as follows:

"Looking back upon the years in which I have taken courses at various accredited institutions I can say, without hesitation, that I found more substantial worth in the work I was required to do in the correspondence courses of Potomac than I found in any other single institution."

Mrs. Sylvina A. Abbott, M. D., of Taunton, Mass., pays a beautiful tribute to the president of Potomac in giving her estimate of the school. She writes as follows:

"I can say only good of Potomac University and its president and founder, Ernest Warren Porter, whom I have personally known many years. I esteem him very highly, and can say of him as my late husband used to say of him, 'Porter is a real man.' His ambition has ever been to have Potomac University rank with the best schools, and I believe it should be so recognized."

Rev. LeRoy Halbert, Th. D., pastor of Mount Pleasant Baptist Church, Newark, N. J., writes, April 28, 1928:

"In reply to your inquiry about the work of Potomac University, allow me to say that in my mind it offers the highest grade nonresident work to be had when judged by the care which the instructors use in making criticisms and replies to students. Everything is 'bona fide' and according to their proposals in the catalogue. I greatly enjoyed my work with them and profited by it. I took up resident work at Drew Theological Seminary, where I secured my Th. D. degree. I think many of these mature men get more out of these courses than many young fellows do out of their resident courses, because Potomac students, though in nonresidence, have a serious purpose and should have the credit."

Rev. George S. Bowden, Ph. D., pastor of the Presbyterian Church, Parnassus, Pa., pays this fine tribute to Potomac in his letter of April 26, 1928:

"I took the doctor of philosophy course at the University of Potomac. I chose the course in preference to three other schools whose courses I examined.

"I considered it the best. It suited me better because it did not require me to be away from my field for resident study, as most schools require.

"The university prescribed the books I was to cover. They sent me lists of questions (the instructor's syllabus) on the text, and I was to answer these in notebooks. Then they sent a certain number of research questions, and the answers to these were to be sent in to the university. When each book was completed a list of questions for examination was sent to Prof. Clay C. Ruff, of the Slippery Rock State Teachers' College at Slippery Rock, Pa., and he gave the examination and returned the questions and answers.

"When the work was done I was required to submit two theses. The major on 'The Sermon on the Mount' and the minor on 'The effect of present-day fiction on morals,' the former of more than 10,000 words and the latter of more than 5,000 words. A copy of each I still have.

"I found them close in their grading, careful in their instructing, particular in all their work. It required three years of good hard work to complete the course, and I know of no school that could give a better course in philosophy.

"GEORGE S. BOWDEN."

Rev. John Essington Miles, Ph. D., pastor of the Tabernacle Baptist Church, Syracuse, N. Y., thus addresses Congressman NELSON:

"DEAR SIR: I thank you for your letter of the 24th instant, your interest in education, and the privilege of writing about Potomac University.

"From my first acquaintance with the institution and Doctor Porter I have found everything and everyone just as represented. I have never regretted taking the work prescribed, but rather felt that it was an excellent help in developing and maintaining studious habits.

"The work was carried on just about the same as the extension courses of larger universities. Although a graduate of McMaster University, Toronto, Ontario, I wanted to continue college work, and Potomac University offered what I needed.

"If I were not in the graduate seminar in Syracuse University, I probably would be continuing work with the Potomac University."

I crave your indulgence as I read the following splendid testimony of the Rev. C. A. Claypool, pastor of the Evangelical Church of Russell, Iowa, who not only gives a statement regarding the value of the work of Potomac to himself, and a comparison with that of other extension schools, but quotes a splendid tribute given by the presiding elder of his district. He says, in writing to Congressman NELSON:

"Allow me, first of all, to thank you for an opportunity to say something in behalf of this institution. Many men who, like myself, found it impossible to attend some resident school in their younger days, and who still find it impossible to do so because of family responsibilities, would find it impossible to get any special training were it not for such worth-while institutions as the one in question.

"I have had over eight years' work with various correspondence schools. I have investigated the work done by many others. I consider the work offered by Potomac University to be far superior to that of any other correspondence school of which I have knowledge.

"In the church of which I am a member all ministers are required to complete four years' work under a board of examiners appointed by the annual conference. All examinations given by this board are given under the personal supervision of the examiner in charge. The presiding elder of this district, a man who holds degrees of A. M. and B. D. from Drake University, investigated the work that I was doing with Potomac University, and upon his own initiative and without any request from anyone recommended that I be given full credit by the conference board of examiners for all work done. By way of explanation of his action he said to me: 'I am so well impressed with the type of work that Potomac University is offering that I am glad to make the recommendation.'"

The fifth proposition to which I invite your attention is the fact that:

V. THE POTOMAC UNIVERSITY CREDITS ARE ACCEPTED BY OTHER STANDARD INSTITUTIONS OF HIGHER EDUCATION

Combination and amalgation in business, centralization of power in government, and massing of great wealth in a few large and celebrated universities are characteristics of this century. Yet, with all this concentration of capital, the day of the small college is here, and here to stay. The small institution has ever been the link between poverty and fulfillment of ambition. Many of the Nation's great have come from farm and shop. Was it to the enormous, traditioned, wealthy universities that they took their limited means? No. They went to some smaller, less renowned institution where they found that they received the same high degree of learning that they would have received at the larger school, paying infinitely less money and missing only the superficial customs and traditions.

Sometimes the fact is forgotten that the acquirement of the necessary knowledge and the ability to use the knowledge acquired are the essential things, not the place of the acquirement, whether in the classroom or in one's own living room; nor the method, whether in residence or in absentia.

The essential thing when the question of credit is at stake is the necessary knowledge. Has the applicant for admission or the candidate for a degree done the work in conformity with academic tradition? Is he able to pass the required examinations? Is he adequately prepared to enter upon the courses desired?

These and like questions are conclusively answered by those who have presented Potomac credits to other standard institutions, as evidenced in the following and similar testimonies.

Dr. Daniel R. Hodgdon, counselor at law, 63 Wall Street, New York, writes to Congressman NELSON under date of April 29, 1928, as follows:

"I was graduated from Bates College, University of Maine; was a graduate student at Columbia University, and received my law degrees from New York University and New York Law School. Prior to this I was a teacher, and it became necessary to obtain certain courses of study to obtain a license to teach in the State of New Jersey. I

could not give up my work. I had a family to support. There was no other way to get these courses except through correspondence. I took the work at Potomac, completed the course, took the examination, and received credit from the State of New Jersey for this work. The courses were complete. The demands of Potomac University were very exacting, and I learned more from those individual courses than I learned in any one of any individual course which I took of like character from any of the other institutions which I attended."

Rev. E. A. Hadeen, A. B., B. D., of Beaver Falls, Pa., writes as follows:

"I became acquainted with the Potomac University in 1918, when I took a course of theology study. I finished my course of study and received my diploma in 1920. The following year I entered the Chicago Theological Seminary, presenting my credentials—among others the Potomac diploma, which was accepted with favor and was well spoken of.

"The course I am taking now is 'graduate theology,' and the courses are followed most strictly and the school is exacting the most faithful and punctilious work, even in regard to the examinations carried on under supervisors. These are ministers or educators."

Mr. H. C. Lyon, superintendent of the Ballinger city schools, Ballinger, Tex., says:

"My work at Potomac has been accepted by the accredited colleges here in Texas. I commend it and believe it to be wholesome and open and above board."

Among the many splendid letters from students and graduates in Canada is the following from the Rev. G. W. Faryon, B. D., of Winnipeg, Manitoba, who says:

"In reference to Potomac University, from whom I received the B. D. degree in 1920. No one who knows anything of correspondence work would question its value to those who for various reasons are unable to take the instruction they require in person.

"When conducted as my experience leads me to believe it is at Potomac, correspondence teaching is extremely valuable, for without an instructor at his elbow one has to apply himself as otherwise he would not be likely to do.

"Personally it took me something over four years to meet the requirements of Potomac, but satisfaction came at the end with the knowledge I obtained, which made it of real worth to me. At once the assembly and synods of my church (the Presbyterian Church of Canada) added the letters to my name in all of their records. No one questioned the fact that I had earned the degree. Having chosen my subject, Potomac supplied me with an outline or syllabus and list of books needed, so that I set myself to work, as I have said, for over four years, wrote the required papers, and at length obtained the degree (cum laude). My degree has been so well thought of that several made inquiry—hoping to obtain a degree for themselves—but found the requirements of Potomac were too exactive for them to fulfill."

The Rev. George A. Leichliter, M. A., pastor of the Prospect Avenue Baptist Church, of Buffalo, N. Y., tells of his experience in presenting his credits and of their acceptance. He says:

"May I state to you my unbounded satisfaction with the work done with Potomac University. During the years of 1915–16 I followed their course of study leading to the master of arts degree and found it equal to work done in any residence course I had ever taken. I have submitted the same on different occasions for credit on other courses followed and have found it quite acceptable in each case. It is my candid conviction that Potomac is offering a genuine opportunity to men who find residence work out of the question. The interest taken in the student is exceptional and the outlined courses are of a very high order."

Thus we see that the credits from Potomac are received and recognized by other standard institutions of higher education.

My next proposition is the fact that—

VI. THE POTOMAC UNIVERSITY EXAMINATIONS ARE PERSONALLY SUPERVISED

At no point is the excellence of the Potomac system of instruction more apparent than in the provisions made for the conduct of the examinations. Although the university catalogue states that "students who are not working for a degree have the privilege of omitting the examinations," it most emphatically declares that "no credit will be allowed toward a certificate, diploma, or degree unless the examinations have been written under personal supervision in all cases." No deviation is ever made under any circumstances from this rule.

The detail of the method will make clear the way in which personal contact is maintained with the individual student, and how the possibility of deception in connection with the examination is made quite impossible.

Provision is made whereby examinations may be taken at the university, or in cases where this is not convenient an educated, trustworthy person, a member of a learned profession, nominated by the student, who shall not be a member of the student's family, nor related to him, nor a costudent, may supervise examinations in behalf of the university if approved by the president. It is provided that "in nominating a supervisor of examinations the student shall give details of his education, his occupation, and his standing in his community as a person of honor and integrity."

When the supervisor thus nominated is approved by the president all test papers shall be forwarded to him whenever a student qualifies to sit for an examination. That is, when he shall have received a passing grade for the prescribed research work of a course, which constitutes the recitation, and takes the place of the oral work and lectures in the classroom of the resident institution.

Procedure in taking an examination away from the university: At the hour mutually agreed upon the student shall go to the office of the supervisor, who, having previously received the sealed paper from the university, will open the sealed envelope containing the test questions and deliver them to the student, at the same time marking on a slip inclosed the time of the beginning of the examination. He shall then sit with the student while he is writing the answers to the test questions. When the student has finished his test he shall return the test questions, together with his written answers, to the supervisor, who shall note on the examination cerificate the time when the test was completed, sign the certificate stating that he sat with the student during the writing of the examination, and that no help was given or received. The supervisor shall then place the test questions, student's answers, and examination certificate in an envelope, seal and personally mail the same to the instructor. The instructor in charge then certifies the grade earned to the university, and if 70 per cent is attained the student is credited with the course.

In illustration of the method of conducting examinations, I beg leave to submit the following statements from students and graduates:

Dr. Clifford E. Scouten, M. A., Ph. D., principal of the Millerton public schools, Millerton, N. Y., thus describes his experience in connection with his examinations at Potomac. He says:

"Potomac requires as much hard work per credit hour as any institution of which I know, and more than the average. The credits are allowed and the degrees granted only for residence work or for work done in extension under the supervision of some reputable and responsible educator. I have done work with three such supervisors, one a college professor, one a Baptist minister, and one a city superintendent of schools. Suitable evidence of at least one college degree and of integrity and standing in his community is required of the extension supervisor by the university. All examinations on which extension credit is based must be performed entirely in the presence of such supervisor, and this fact must be certified in writing for each examination, the certificate being signed by the supervisor of each course. The possibilities of fraud are much less than in the average college examination."

The Rev. Dallas F. Green, Ph. D., pastor of the First English Lutheran Church, Toledo, Ohio, writes as follows under date of April 28, 1928:

"I have taken work at Potomac. The university held me to every part of the program and every course as outlined.

"The work done is very exact—both recitation and examinations—and no examination on any particular subject can be taken unless the study of the text or subject satisfies the member of the faculty under whom the work is taken.

"The same holds true with the thesis work before graduation. The work is thorough and will not be approved unless every part of thesis as to manner and matter meets with the approval of the faculty."

The Rev. W. E. Davis, Ph. D., pastor of the Baptist Church of Clifton Hill, Mo., gives the following testimony in his letter of April 28, 1928:

"I want to say that the plans for work provided by Potomac University are as definite and extensive as those provided by the other universities for the same degree, with the exception that most institutions require that the student shall be in residence during a part of his work. After choosing my four minors for the work and they had been approved by the university, I began the study which extended over a period of four years and required three years of my effort. I found that each work had to be studied faithfully and recitation work submitted on each guided by a syllabus submitted by the professor in charge. Then for the examination the questions were sent under seal to be opened only in the presence of the supervisor previously chosen by me and accepted by them when they were satisfied of his worthiness. The examination had to be written in his presence and at one sitting. The paper was then turned to the supervisor, who sealed and forwarded it to the university. When the professor in charge had graded it the grade was sent to me. I certify on honor that each and every book of the full course was treated thus. In addition I was required to submit a 5,000-word dissertation at the middle half of my work and a 10,000-word thesis meeting the requirements of all institutions for a doctor's degree."

Rev. S. A. Tamblyn, Fort Sumner, N. Mex. (April 28, 1928), says:

"Having studied in colleges and universities abroad as well as in the United States of America, besides in such sound institutions in the theological realm as Xenia Seminary, I believe I am in a position to judge and express my opinion as to what Potomac University should be and is. Therefore I would say I have always found Potomac University stands for the very highest degree of work and demands

such of its students, and the work has to be done faithfully before either credits are given or degrees conferred. In fact, some of the very toughest examinations it has been my lot to take in any institution were taken under the direction of the faculty of Potomac. Furthermore, their very method of taking such examinations (provided one can not attend the institution for such) precludes any possibility of the student wrongly attaining the credits."

The Rev. James B. Muir, pastor of the First Presbyterian Church, Attica, Ind., writes thus:

"It has been my privilege to pursue a course of studies carried on by the Potomac University, under the direction of Doctor Porter and his colleagues on the faculty, for the past four years.

"A student may pursue the course of studies for their benefit merely.

"A residence at the university is not required of the student for graduation. But if a student is working for either a degree or a diploma, examinations are required to be written under the personal supervision of a supervisor previously nominated and appointed for the purpose, or they may be held at the university.

"A 'supervisor of examinations' shall be nominated by the student, who will receive the test papers from the university; sit with the student while he is writing the examination, and return the answers to the instructor with the certificate of having supervised the test in person."

Rev. Bernard A. Rust, pastor of the Baptist Church of Aurora, Iowa, speaks of the pleasure and profit received from his courses, and testifies to the method of their grading. He says:

"In reply to your letter regarding Potomac University permit me to say that the extension work which I have thus far pursued under their direction has proved very satisfactory as well as profitable.

"The work itself requires a great deal of good, honest study; and the giving of credit, it seems to me, is done on as sound a basis as is possible in correspondence work. The grading is done on the recitation work, which consists of written answers to hundreds of questions, as well as on the examinations which are taken under a supervisor who states each time over his own name that all has been done in an honorable and honest way.

"BERNARD A. RUST."

The Rev. Thomas Merryweather, pastor of the United Church, Oak Lake, Manitoba, says:

"My experience has been such as to justify the statement that the university is quite exacting in its requirements. My experience was that after documentary evidence had been furnished of standing attained in former colleges, recognition of such was obtained only after strict examination of records. I find that the work must be undertaken with thoroughness, and necessitates real application and much time. The examinations that I have taken were rigidly conducted, the conditions outlined in the course of study were followed in every detail; the papers were received directly by an accredited supervisor, whose professional standing, etc., was given before the university accepted his name in that connection. The written examinations were forwarded by this supervisor to the university, and the results, when they came to hand, indicated careful and conservative marking—at least that was my opinion. In short, whatever may be the standing of Potomac University as an institution of higher education, my impression is, and it is based on the year's experience, that whatever degree may be granted, it will be the result of real work, necessitating the expenditure of much time and concentration of energy."

Rev. Guy E. Mark, pastor of the Union Square Baptist Church, Somerville, Mass., says:

"I have been taking special studies with the Potomac University for about four years. Their standards are good and their requirements are fair. All examinations are safeguarded by the presence of a supervisor."

The letter of the Rev. L. M. Persenius, M. A., pastor of the Zion Lutheran Church, Kewanee, Ill., is so lucid and comprehensive that I read it as a summary of many other testimonials which can not be read on account of lack of time. He says:

"I can assure you that no degrees are granted there without the most rigid examinations, and the students have no way of cheating, because the examination questions must be answered before a schoolman or pastor, or some other reliable person recognized by the university, and that person has to sit there and watch and testify in writing to the university what time the examination started, how many hours it took the student to answer the questions, etc., and then he takes the papers and sends them in. I have taken many examinations and answered many questions, but no examination has been more rigid than the one I took on my course at Potomac University."

VII. POTOMAC UNIVERSITY HAS STOOD THE TEST OF THOROUGH INVESTIGATION

In support of this declaration I wish to introduce several characteristic testimonials. The first of these is a letter from the Rev. Richard H. Bosworth, A. M., Ph. D., S. T. D., of Burlington, Vt. Doctor Bosworth is now 80 years of age and is Potomac's oldest graduate. He says:

"It was only after careful inquiry that I enrolled as a student under Doctor Porter, and I have never regretted it. I received strong approval regarding it (Potomac University), especially from my college president, the Rev. Samuel Fallows, D. D., of the Illinois Wesleyan University."

The Rev. Isaac W. Grimes, S. T. D., a noted New England Baptist preacher, of Cambridge, Mass., contributes the letter with which the testimony in connection with this proposition is closed. He writes:

"I was a resident student at Worcester Academy, Massachusetts, for four years; a resident student at Colby University, Waterville, Me., for four years; a resident student at Rochester Theological Seminary, New York, for three years, graduating from each of these, and then, after 15 years of active service in the Christian ministry, a brother clergyman, who had taken a correspondence course of Potomac University, spoke of it with such appreciation that after investigation I, too, enrolled, and gladly testify to the value of the instruction received. I believe that the correspondence courses of Potomac University will compare favorably with those offered by recognized schools of learning, and that the requirements for its degrees will meet the approval of the competent and the unprejudiced."

The Rev. Vernon L. Shontz, minister of the First Baptist Church of Muscatine, Iowa, says:

"Before deciding to take up special work by correspondence in Potomac University I investigated the standing of the school and had a personal conference with Dr. Ernest W. Porter. If ever I find it possible to complete the work he has outlined, I shall never feel ashamed of the degree for which I am working."

Rev. A. E. Blundon, B. A. (Potomac University), Stittville, N. Y., says:

"Before I took up work with Potomac University I investigated the work of the institution through scores of people who were acquainted with the work there, many of whom were not at all connected with the institution; my conclusion justified my enrollment."

Rev. David Young, M. A., pastor of the Methodist Episcopal Church of Ogden, Iowa, says in his letter to Congressman NELSON:

"In reference to the work I did at Potomac University, may I say first of all that I spent five years in Alberta Theological College and the University of Alberta, Canada, prior to taking the Potomac course. Had it been possible to take work extramurally with either of these institutions, I should have done so. Not being able, I sought carefully for a correspondence school where I might take the work necessary for the master's degree in arts. After very careful investigation I found just such a school as I desired in Potomac University and majored in sociology."

The Rev. T. De Courcey Rayner, pastor of the Presbyterian Church of Wallacetown, Ontario, writes, April 28, 1928:

"My first knowledge of Potomac University and the courses it offered in university extension work for students, like myself, unable to continue the work in residence, came to me through an advertisement in the pages of the Presbyterian, a weekly organ of the Presbyterian Church, published in Philadelphia, Pa. As I was interested, I wrote to the editor making inquiries as to the standing of Potomac University, suggesting that so reputable a magazine would not carry the advertisement of any institution that was not a bona fide institution. The following reply from V. T. Smith, business manager of the Presbyterian Publishing Co., Philadelphia, was what decided me to enroll as student:

"'With regard to the Potomac University, Washington, D. C., we have investigated this institution to some extent, and as far as we can find it does not make any claims which it is unable to support. This institution should not be classed with the type that you find now and then from which a degree may be practically purchased, but real honest work is required in order to qualify.'

"In all my dealings with the university I have found this to be abundantly true, as one has to give evidence of academic standing prior to being permitted to enroll as a student in a course leading to a degree, and then has to do real honest hard work in order to begin to qualify for a bachelor's degree."

Miss Mary Olive Vaudry, M. A. (McGill University), of Lenoxville, Quebec, a very successful teacher, says in her letter of May 3, 1928:

"It gives me much pleasure to reply to your letter of April 24 relating to Dr. Ernest W. Porter and Potomac University. I am a graduate of McGill University, Montreal, and received from that institution the B. A. and M. A. degrees. As I have chosen the teaching profession, it seemed an advantage to obtain the degree of Ph. D. also. After some correspondence with Doctor Porter and friends in Boston who knew of him and his work, I enrolled as a candidate for the Ph. D. degree nearly two years ago. So far I have found the course as stiff and thorough as in any of the best universities that require personal attendance, also the work is done faithfully by the teaching staff."

VIII. THE POTOMAC UNIVERSITY IS A BLESSING TO THOSE UNABLE TO ATTEND RESIDENT INSTITUTIONS OF HIGHER LEARNING.

The records of earth will never adequately tell the blessing which has come into the lives of thousands of men and women through this noble institution. Men and women occupying positions of great

responsibility and influence point with grateful pride to Potomac as their alma mater. Teachers, professors, heads of departments, linguists, physicians, lawyers, judges, government attachés, and especially Christian workers, ministers, and missionaries, gratefully record their indebtedness to this great open door to educational opportunity.

This is especially true of hundreds of persons who, by no fault of their own, were deprived in early life of the advantages of higher education, and who in later life have come to realize their need for better equipment for their tasks, and yet are unable to attend college, university, or seminary because of family ties, financial inability, peculiar conditions, parental responsibilities, the duties of present vocations, or other hindering circumstances are unable to take further training in residence.

Think of the number of ministers in rural or country churches bound by the obligations of family support and utterly unable to leave the work on other fields for periods of study in residence, and yet are able to arrange their daily schedules so that an hour or two each day may be devoted to special cultural training of higher university grade under expert leadership and direction. The same possibility applies to the lawyer, teacher, and member in any profession, as well as the laborer, tradesman, scholar or man of affairs anywhere who desires to better equip himself for the filling of his place in the world's great field of need and opportunity, and of being the greatest possible channel of human and divine service.

Think of the lonely missionary, shut away from the centers of education and culture, yet capable and eager to have the very best educational equipment possible, and to be kept in constant mental contact with the leaders in thought from whom he may be separated by thousands of miles, and all of this in order that he may be the best possible representative of his Lord and Master.

Think also of those who have had educational advantages in the years of preparation for their life work, but have come to realize, after years of effective ministry and service, that their abilities would be greatly augmented if they could take further courses of study adapted to peculiar needs and conditions in their fields of labor or to bring them into fuller acquaintance with modern thought and methods, but are hindered from returning to their alma maters or going to other institutions for post-graduate work in residence.

To these Potomac University offers the supreme opportunity through her matchless university extension courses in absentia.

Personally, I scarcely dare to think of the added ability which might be mine if I had known Doctor Porter and Potomac University 20 years ago. I can never put into language a just appraisement of what they have meant to me and my work during the past four years, and my experience has been duplicated in the lives of many others, as is evidenced in extracts from letters received during the past month, a few of which I will now present.

Rev. William J. Marks, D. D., pastor of the Methodist Episcopal Church of Lansford, Pa., writes:

"The work taken with Potomac University has been of inestimable value to me in my life's work, that of the Christian ministry, and I have nothing but the highest praise for them in the great educational work they are doing."

Rev. Harry S. Hammann, pastor of the First Baptist Church, Florence, Colo., says:

"Potomac University is faithfully endeavoring to supply a great need. There are those who do not have the opportunity to pursue a resident course in continuing their education, yet they are desirous of carrying on their studies under expert supervision. Some may be interested only in obtaining a degree, whether it has been earned or not. There are many others who are interested in the work that is required, looking forward to the just reward of faithful study. This school caters to those of the higher motives."

Rev. R. S. Booy, rector of the Episcopal Church of Temiscaming, Quebec, Canada, chairman of the school board, writes:

"I am in receipt of your questionnaire regarding Potomac University and have much pleasure in adding my testimony as to the benefits which students enjoy by means of its correspondence course.

"To the genuine student, who, like myself, has neither the time nor the means of taking a residential course, Potomac provides a long-felt want.

"From my own experience I have no hesitation in saying that the work outlined in the course of study must be done faithfully or the student will suffer and fail. And as one who had done a considerable amount of work as an examiner in former days in England, I would say the marks awarded the papers sent in were absolutely just, and that the standard required was by no means easy to attain, but is quite on a par with the college exams there.

"I showed the course of studies to my bishop when he was staying with me, and he said they were very good."

The Rev. Charles H. C. Jackson, editor of the Evangelistic Messenger, Edmonston, Alberta, Canada, says, in his letter of May 2, 1928:

"Potomac is without doubt a real friend to those of us who are located great distances from it and who are desirous of pursuing an additional course of study."

Rev. Benjamin J. Johnson, Kenosha, Wis., says:

"Such a school as the Potomac University fulfills a great need in the educational field. Many good men would be deprived of higher learning were it not for the efforts of such a school."

Mr. W. R. G. Orwick, Miami, Fla., says:

"I can truthfully say that they are serving a great need in this country, as there are thousands like myself who are not able to go to a resident school to finish their education, but through this institution can fit themselves for whatever they wish."

Rev. William Wyman, Ph. D., Regent's Park United Church, St. Vital, Manitoba, Canada, says:

"I took the course of study leading to the Ph. D. with Potomac University and feel that the work was faithfully done and well looked after by that institution. I believe it is filling a need—that of supplying an opportunity for men like myself who wish to take up extension work while in active service of the ministry."

H. Stanley Witwer, B. S., B. Th., Ph. D., of Elverson, Pa., says:

"APRIL 28, 1928.

"Potomac University has been of tremendous value to me in completing my education."

Rev. A. H. Ericsson, of Littleton, N. H., said on April 27, 1928:

"To those of us who could not possibly go to a resident school because we lacked the funds and had families to answer for, Potomac University has been and is a real godsend, a blessing indeed."

Rev. W. B. Rogers, of the Church of the Star, Methodist, Hollywood, Calif., says:

"It was my pleasure to take work with Potomac University, and I regard it as one of the great benefits that has come to me. The faculty is worthy of the name of educators. The school is an asset to the country. No finer thing could be done by Congress than to help strengthen by its moral support such an institution as the Potomac University."

Rev. Wallace H. Wotring, D. D., LL. D., pastor of St. John's Reformed Church, Nazareth, Pa., writes:

"I was graduated from Ursinus College and Theological Seminary, and therefore received the best training that our denominational schools can give. It was after I had been in active service in life for a good many years that I took advantage of what Potomac had to offer. To me it was a new revelation and such a boon that I often wished that men who can no more be resident postgraduate students knew of the thorough work done by this institution, and thus bring themselves abreast of modern development in the field of knowledge."

Rev. Le Roy Halbert, Th. D., pastor of the Mount Pleasant Baptist Church, Newark, N. J., says:

"In reply to your inquiry about the work of Potomac University allow me to say that in my mind it offers the highest grade nonresident work to be had, when judged by the care which the instructors use in making criticisms and replies to the students. Everything is bona fide and according to their proposals in the catalogue. I greatly enjoyed my work with them and profited by it.

"To close Potomac would be a serious loss to many men who have entered the ministry too late to go into residence. I think many of these mature men get more out of these courses than many young fellows do out of their resident courses, because Potomac students, though in nonresidence, have a serious purpose and should have the credit."

Rev. Paul Wagner, minister of the Ninth Presbyterian Church, Troy, N. Y., writes:

"I would like to go on record as having said that I think the school as represented by Doctor Porter and his colleagues is a boon to mankind—the men who are placed in a position where their time will not allow them to get to a resident university or where they would not have time to spend attending such a college.

"I know that in my own case, though I am a quite recent addition to the school, that there is no possibility of getting any credit unless the work done as outlined is done sincerely and with application. The course that is given is outlined to cover a certain period of weeks, and this must be adhered to or there will be no credit given."

Rev. I. M. Bachman, Northampton, Pa. (April 28, 1928), says:

"Relative to the Potomac University, Washington, D. C. I took the Ph. D. degree in that institution some years ago, and in the three years I worked for it I can frankly say that I was greatly benefited by the course of studies. I could not afford to get this course by any other way but by correspondence, and I presume others are taking it for the same reason.

"A man who took the Ph. D. in university came to my study and, comparing what either of us had to do, he said, according to the books you had in the course, I am sure you got more out of it than by listening to lectures only and doing a little research work."

Rev. George L. Warnke, of Staunton, Ill., replies to Congressman NELSON as follows:

"I have taken courses with different schools but have never found any which cover the work in such a splendid manner as Potomac does. The school has been a blessing for our entire country. It has

especially an open door for the student who is not able to pay a Columbia, Princeton, Yale, etc., tuition for his education."

Rev. George G. Treanor, B. Th., minister of the Dresden Presbyterian Church, Dresden, Ontario, Canada, says:

"I am glad to give a word for Potomac. I am a candidate there for the doctor of theology degree, and the work I have done has been a wonderful help. I have found the work of the highest order and beneficial. I have felt all along that in earning the degree I would have a great deal more than the degree."

Rev. John E. Miles, Syracuse, N. Y., calls attention to the place Potomac is filling in developing and maintaining studious habits. He says:

"From my first acquaintance with the institution and Doctor Porter I have found everything and everyone just as represented. I have never regretted taking the work prescribed, but rather felt that it was an excellent help in developing and maintaining studious habits.

"The work was carried on just about the same as the extension courses of larger universities. Although a graduate of McMaster University, Toronto, Ontario, I wanted to continue college work, and Potomac University offered what I needed."

Missionary J. C. Kobes, of Toadlena, N. Mex., says:

"My experience would lead me to believe that Doctor Porter and those associated with him are endeavoring to furnish honest help to those who are unable to further their education through the usual resident channels."

Rev. Fred William Hubbard, of Paterson, N. J., writes:

"It gives me great pleasure to say that I found the courses not only interesting but extremely helpful which I took with the Potomac University. I highly recommend that this institution is fulfilling a big need toward aiding a person to do advanced work as well as undergraduate collegiate work."

Thus one might go on reading for hours the statements of those to whom this splendid institution has been and is a godsend. I must content myself, however, with but one other tribute which sums up the feeling and testimony of hundreds of Potomac students and graduates and expressed by the Rev. A. E. B. Blundon, pastor at Stittville, N. Y., in his letter of April 28, 1928, in which he says:

"Potomac University should be looked upon as a great asset to our educational forces and a blessing to the State and Nation."

IX. THE POTOMAC UNIVERSITY PRESIDENT, DR. ERNEST WARREN PORTER, IS A CAPABLE, EXPERIENCED, AND SUCCESSFUL EDUCATOR

In speaking of the scholastic attainments of Dr. Ernest Warren Porter, president and founder of Potomac University, the editors of "Who's Who in America," say: "Educated in Y. M. C. A. School of Modern Languages (Northeastern University), Boston, 1893; Law School, Boston, 1894–95; Kent College of Law, 1895–96; LL. B., Chicago Law School, 1897; D. C. L., 1898; Ph. B., Taylor University, Indiana, 1899; M. A., Amity College, 1909; admitted to bar, Illinois, 1896; District of Columbia, 1905; instructor Illinois College of Law, Chicago, 1897–98; instructor political and social science, history, private school, Boston, 1900–1903; president and professor Potomac University, Washington, D. C., since 1904." In 1914 Doctor Porter was made a Fellow (F. S. P.) of the Philologie Société (London); and in 1923 the same institution awarded him the degree of Ph. D.

These attainments together with his extensive experience as an instructor attest his capability and experience, while the tributes of the thousands trained under his direction attest his success as an instructor.

Regarding his character, those who know him best know him to be a man of broad culture, high ideals, deep sympathies, kindly disposition, and exemplary Christian deportment; beloved, respected, and trusted, as evidenced in the numerous personal testimonials which I have the honor and privilege of presenting.

May I, first of all, read extracts from a letter addressed to Congressman NELSON by the Rev. Gove G. Johnson, D. D., pastor of the National Baptist Memorial Church, Washington, D. C., of which Doctor Porter and wife are honored members. He says:

"Please allow me to express to you the esteem in which I hold Dr. Ernest W. Porter, president of Potomac University. I have for some years known Doctor Porter intimately and believe that he and his work are genuine."

I follow this with a tribute from the Pinkham Bible Class of the National Baptist Memorial, Washington, D. C.:

"The Pinkham Bible Class has on its rolls names of 104 men. On Sunday morning April 22, 1928, there were present 72. The followlowing paper was presented by one of the members and unanimously adopted by an enthusiastic vote:

"To whom it may concern: This paper is to give expression to the high esteem in which Dr. E. W. Porter is held by the members of the class. We commend him unhesitatingly as a man of the highest Christian integrity.

"E. W. MAY, *President.*
"WM. S. ANDERSON, *Secretary.*
"S. G. NOTTINGHAM, *Treasurer.*"

Rev. John E. Briggs, D. D., pastor Fifth Baptist Church, Washington, D. C. (April 24, 1928), says:

"In reference to Professor Porter, of Potomac University, I beg to say that I have known him for some years as a Bible teacher and one who is interested in religious work."

Mr. Robert H. Clark, member of National Baptist Memorial Church, Washington, D. C., says:

"I have known Dr. E. W. Porter, of the Potomac University, for a period of five years and have found him to be a man of the highest Christian integrity."

"DEAR SIR: My acquaintance with Dr. E. W. Porter began when I became a member of a Bible class of which he was the teacher. I soon recognized his ability as a teacher and became very much interested in his work. Holding him in high esteem, I sought a closer acquaintance with him, and that more intimate acquaintance has confirmed the judgment first formed and I have come to love him as a high-toned Christian gentleman.

"Respectfully yours,

"Rev. L. R. THORNHILL, *D. D.*"

Rev. George L. Gibbs, pastor First Baptist Church, North Braddock, Pa., says:

"I can speak only in terms of the highest commendation of Doctor Porter and his work through Potomac University. Besides, there could be no sounder man or more thorough student and teacher than Dr. George Boddis, one of his colleagues."

H. A. Stacy, of the Government engineering department, residing in Takoma Park, D. C., says, under date of April 26, 1928:

"I have been acquainted with Mr. Ernest W. Porter, president of the Potomac University, since 1911 and believe him to be a thoroughly earnest, honest, conscientious man, whose school is doing a similar good work in its line."

FIRST BAPTIST CHURCH,
Washington, D. C., April 24, 1928.
(Rev. Samuel Judson Porter, D. D., pastor)

Mr. Ernest W. Porter, Bible teacher and for many years teacher in Potomac University, is, in my judgment, a man of splendid character. I do not believe he would do anything unethical in connection with his work.

SAMUEL JUDSON PORTER.

Dr. Maurice E. Miller, Medical Science Building, Washington, D. C. (April 21, 1928), says:

"Mr. Ernest W. Porter, educator, Bible teacher, and church worker of this city, many years a teacher in Potomac University, is known to me as a man of strong Christian character."

Dr. William M. Sweet, 1801 I Street NW. (April 21, 1928), says:

"Ernest W. Porter is a Bible teacher of this city, whom I know as a man of strong Christian character."

The following splendid tribute was sent by Mr. C. F. Haden, chief of examining division 2 of the United States Patent Office:

"I have known Ernest W. Porter about 17 years and I have been quite closely associated with him part of that time, long enough and closely enough to know that Mr. Porter is honest, honorable, and conscientious and is conducting a legitimate business, and he has built up a deservedly honorable and widespread reputation both for himself and for his school. He should be encouraged and his school should be recommended, because good correspondence schools are needed and do an inestimable amount of good. They are a godsend to a large class of ambitious people who have been unable from one cause or other to get a liberal education in any other way."

Mr. William E. Dyre, McLachlen Building, Washington, D. C., attorney at law, under date of April 21, 1928, says:

"I am a native and also a life-long resident of the District of Columbia and attorney at law specializing in patent and trade-mark causes, the executive secretary of the patent, trade-mark, and copyright section of the American Bar Association, a member of the Board of Trade and various other local civic organizations.

"I have very little knowledge of the Potomac University of this city and am not conversant with its courses of instruction or methods, but I have a personal acquaintance with its president, Mr. Ernest W. Porter, extending over a period of 20 years and know him to be a man of high ideals, excellent moral character, and a Christian gentleman. He is a prominent member and officer of the National Memorial Baptist Church of this city, a man of integrity, whose daily life is characterized by a sincerity of purpose and a desire to merit the confidence of mankind to which I believe he is justly entitled.

"WILLIAM E. DYRE."

Miss Ruth Gray, Munsey Building, Washington, D. C. (April 21, 1928), says:

"I know Doctor Porter and each member of his family personally. I have worked for him and I have worked with him, and I know that the courses which are given through his university are above the average. I have copied many sets of lessons which have been sent out to their students, and I feel that his students are amply paid for every cent that has been received by Doctor Porter. His work entails an

expense which the fee that is asked for the same would hardly pay at times, yet this is all done for the sake of the students. I have always found Doctor Porter to be a gentleman in every respect. He is a capable man and a learned man. I feel positive that he would be a great help to any student to whom he might impart his knowledge.

"RUTH GRAY."

Rev. A. A. Swanson, B. D., of Russell, Pa., says:

"Permit me to lend a word in appreciation of Doctor Porter himself, who is a man of sincere motives and outstanding ability as an educator, and a friend to all who aspire to do better work for their Lord and Master."

Rev. Francis L. Beal, D. D., St. James' Rectory, West Somerville, Mass., says:

"Potomac is doing excellent work for higher education. I know President Porter to be a man of high integrity, broad learning, and large administrative ability."

Rev. C. L. Doyle, M. A., B. D., Ph. D., pastor First Baptist Church, Tiffin, Ohio, pays this splendid tribute to the integrity of Doctor Porter in his letter of April 27, 1928:

"Hon. JOHN M. NELSON, M. C.,

"United States Capitol, Washington, D. C.

"DEAR SIR: The one thing on which the Potomac University lays great stress is that a man must earn his degree by honest, hard work or he will not get it. And the courses of study are not light.

"I tried to get them to give me credit for work I had already done in subjects on their course, but there was 'nothing doing.' I had to study and pass the tests as required by their own teachers if I would receive recognition from their school. I had a disagreement with one of their professors because I thought he was unreasonable in his demands in requiring so much work on a certain subject. The professor stood his ground and the university backed him up. Result was, I lost all my credit for that subject and had to do the work over or shift to another subject of equal importance. If any man gets a degree from that school he earns it by honest, hard study and passing of severe tests."

Dr. Clifford E. Scouten, superintendent of schools, Millerton, N. Y., sends a similar tribute clothed in this language:

"I have found Doctor Porter a fine Christian gentleman and of unusually sensitive conscience. For example, he refused me credit for 12 hours of residence work of graduate grade, this work never having been applied on any degree. Several other universities were willing to accept this work toward a Ph. D., and about six credit hours taken under similar circumstances were accepted for graduate credit on my M. A. Doctor Porter based his refusal on the fact that the work in question was taken before I had received my B. A. degree, although the work was given as graduate work and was ordinarily open only to graduates."

Mr. William Douden, architect, Washington, D. C., says:

"Allow me to add a word in the interest of my friend, E. W. Porter, president of Potomac University.

"Our acquaintance has extended over a period of six years, and I have known him only as an honorable Christian gentleman of exceptional ability and good judgment.

"My acquaintance with the work of the Potomac University is somewhat limited, but what I do know is that it has met a need and demand for a methodical direction of home study along certain lines, with high ideals and without the least taint of commercialism."

Rev. H. J. Councilor, S. T. D., Calvary Baptist Church, Washington, D. C. (April 25, 1928), says:

"I have known Mr. Porter for 20 years or more and have been associated with him in religious work more or less intimately throughout these years. I am therefore happy to bear this testimony of my knowledge of his personal activities and interest in things worth while."

Howard S. Fisk, lieutenant, Supply Corps, United States Naval Reserve, past commander George Washington Post, No. 1, the American Legion, Washington, D. C., says in his letter of April 23, 1928:

"I wish to place myself on record in behalf of Mr. Ernest W. Porter, president of Potomac University, and to state that it has been my pleasure to have been acquainted with Mr. Porter for approximately 20 years and that I hold him in the highest esteem.

"During all the years of our friendship I have always found him to be honest, square, and upright, and his character above reproach. I have the utmost confidence in him, and have never heard any unfavorable criticism of Mr. Porter or his school. The fact that he has been established in his school work over 20 years is, to my mind, evidence enough of his business integrity and fair dealing.

"Mr. Porter is a man of excellent moral character and a student of many years, and one deeply interested in the educational field in which he is engaged. I therefore take pleasure in adding my testimonial as to Mr. Porter's character during these many years of our friendship, which still exists at the present time."

Rev. G. A. Leichliter, M. A., pastor of the Prospect Avenue Baptist Church, Buffalo, N. Y., under date of April 28, 1928, pays this splendid tribute which admirably expresses the esteem and appreciation of hundreds and thousands who delight to honor the worthy president of our beloved alma mater, Potomac University:

"I esteem Dr. E. W. Porter, the president, very highly, indeed. In all my dealings with him I have found all other considerations lost in the desire to have the student reach an honest and honorable goal. To me he is one of the very worth-while educators of our day and able to take his place in the ranks of the profession with honor."

X. THE POTOMAC UNIVERSITY IS WORTHY OF THE FULL CONFIDENCE AND SUPPORT OF THE PUBLIC

My remarks regarding this proposition shall be brief. No person who will carefully weigh the hundreds of expressions which have already been adduced in this address and reflects on the unusually high class of persons from which they come can possibly escape this conclusion.

Regarding the sincerity of the purpose and aim of the founder and promoters of Potomac University there can be no question. Regarding the character of the instruction imparted, clearest testimony has been given. All who have touched at any point the activities of the university commend it unreservedly. Potomac University is worthy of the fullest confidence and strongest support of the public at large, and for this I must sincerely plead.

The positive, active, moral support of every person interested in any manner, shape, or form of higher education must surely be given by all who honestly and conscientiously weigh the facts. But this is not enough. Potomac University must have the strongest possible financial backing if she is to measure up to her privileges and opportunities. The self-denial and self-sacrifice of her founder and president marks one of the greatest examples of giving up one's life and all for the realization of an unselfish, beneficent ideal that has ever come under my notice. If Potomac University is to be the blessing in the realm of higher education God means her to be and we sincerely desire her to be, we must see to it that adequate financial support shall be provided, and to this provision I invoke your earnest, prayerful consideration.

In support of my proposition and plea may I read the following brief extracts from the letters of others who share similar convictions?

Rev. O. H. Dorschel, B. A., B. D., pastor of the Salem Evangelical Reformed Church, Buffalo, N. Y., says:

"When I enrolled I was promised certain things along the lines of advancement in knowledge and can sincerely say that I received all promised and greater satisfaction than I anticipated."

The Rev. Joseph Wilson, jr., of Sherman, Tex., expresses the sentiment of those who best know Potomac. He says:

"In reply to your letter of inquiry concerning the work of Potomac University and its faculty, would say, so far as my knowledge goes, both the institution and the faculty are serving a noble purpose and are worthy of the full confidence of the public."

Rev. Antonio Perrotta, pastor Italian Baptist Church, Utica, N. Y. (May 8, 1928), says:

"I am a graduate of Colgate and Yale Universities and understand somewhat the methods used in these high schools of learning to impart proper instruction and intelligently educate the mind; hence I speak and write with a degree of intimate knowledge of such things.

"Having taken courses with Potomac, I can assure you that the imperative and absolute request of the faculty is to pursue the studies as they are outlined, and the promise and plan are plainly stated, that no credit is ever given unless the lessons are properly and correctly done. * * * I believe that Potomac University is worthy of respect and public support."

Prof. Charles M. Jones, principal of the Taylor County High School, Perry, Fla., says:

"I am a graduate of Western Kentucky State Normal, Potomac University, and University of Chicago. I consider the services rendered at this institution (Potomac University) to be high grade and faithfully done."

Rev. Hislop Dickson, M. A., B. D., pastor of the United Church, Oak River, Manitoba, writes under date of May 7, 1928:

"I have been studying with Potomac University for the degree of Th. D. for between three and four years and am only about half way through the course at present. My experience has been that they are thorough in their correspondence courses and businesslike in management.

"Another minister who completed this course a year or so ago informed me recently that he had done honest and faithful work with them and that he was highly pleased with their dealings with him.

"H. DICKSON."

Rev. John C. Cowell, jr., evangelist of Fayetteville, N. C., says:

"I count it a happy privilege to say a kind word for Potomac University. I have taken work with this institution and say unhesitatingly that I have found them to be upright and conscientious in all of their dealings. Their work is of high character, and when one is awarded a diploma from the school it is because they have earned it."

Rev. J. D. Spidell, B. A., M. A. (Potomac University), pastor of the Ludlow Street Baptist Church, West St. John, New Brunswick, Canada, says:

"I have nothing but highest praise for the work Potomac University is doing. The work of the university has all been thorough and honest."

Owen F. Renegar, B. A., LL. B., attorney at law, and former judge, Oklahoma City, Okla., writes:

"Will say that it has been my pleasure to have been a student of Potomac University and have taken considerable work with other institutions, and I prize my training taken in extension with Potomac University as the highest type of university culture."

In conclusion may I ask you to consider again the 10 propositions presented, together with the testimony produced:

I. Potomac University is true to the fundamentals of the Bible.

II. The Potomac University faculty is one of superior scholarship.

III. The Potomac University system of instruction is the equal of the method used in residence in the best colleges, universities, and seminaries.

IV. The Potomac University system of instruction is the equal of the method used by the best university extension and correspondence schools.

V. The Potomac University credits are accepted by other standard institutions of higher education.

VI. The Potomac University examinations are personally supervised.

VII. The Potomac University has stood the test of thorough investigation.

VIII. The Potomac University is a blessing to those unable to attend resident institutions.

IX. The Potomac University president, Dr. Ernest Warren Porter, is a capable, experienced, and successful educator: Therefore

X. The Potomac University is worthy of the full confidence and support of the public.

RESEARCH UNIVERSITY

STATEMENT BY ELMER J. BINFORD, TRUSTEE

Democracy depends for its growth and perpetuity on the education of its leaders. University education in America has its grave faults and has been following tradition quite blindly and not enough the needs of our people. Yet some of its most helpful critics have recently been university presidents, and a number of institutions and faculties are beginning to throw off the dead hand of precedent and to direct the forces of research and experimental investigation toward their own effectiveness. At the University of Wisconsin we have seen the inspiring example recently of the establishment of an educational experiment within the university in which some 250 young men are being trained for life in ways very different from those followed in the traditional institution, built in imitation of the old European universities and later getting standardized into subjects, "credits," "semester hours," "serving sentences" in classrooms for four years to get a degree, etc., to a point of formalism. President Bowman, of the University of Pittsburgh, expressed the new point of view recently in an interview:

"SELF RESEARCH AND EXPERIMENTAL SCHOOLS

"One of the first and most constructive things we did was to set up a research organization for a research of ourselves as a university. For years, in common with other universities, we have been making researches for others in medicine, physics, biology, chemistry, and industrial lines. It never occurred to us, however, that our own educational methods might profit by research. We who were in the business of dispensing knowledge were being guided not by knowledge but by tradition. We were deciding on precedent not on facts." (American Magazine for May, 1928.)

One of the first institutions to catch and embody this modern spirit is Research University here in the National Capital. Because for nearly a decade it has been somewhat different and has based its service as much as possible on an original adjustment of higher education to the needs of adults here and everywhere in the Nation it has received, of course, the usual criticism from the conservative. The recent attempt to get Congress to legislate and the consequent investigation by Congressman NELSON of this and other higher institutions here in the effort to discover the significance of this legislation (which would have put some of our local universities into the control of the school board and left others free, instead of providing a real board of higher education for all) has helped to bring out its national significance.

Out of this study has grown, I believe, an appreciation of Research University and a realization of the sacrifices made by its officers, who, against great odds, have since 1919 been building here for the city and the Nation a form of educational service that Congress and every other governmental agency should help to the limit of their powers. It is true that certain agencies have failed to help as they should in getting this institution widely recognized by other institutions, but the widespread recognition so far received and the remarkable support of its students and alumni should soon secure for it adequate endowment and general favor.

THE STORY OF RESEARCH UNIVERSITY

I have learned no more interesting and sympathy-provoking story than that of the rapid rise of Research University and of its struggles in this environment which should be the best in the world for it. As a professor in law schools, as a judge, and as a trustee of the institution, I have a basis for sound judgment of its worth and promise. Starting as the National School for Social Research in 1919, it incorporated as a university, in the only way possible in the District, early in 1920. Leading men and women in the city were its directors, one, in 1919, being Hon. CLYDE KELLY, of Pennsylvania, and another, in 1920, James T. Lloyd, later president of the local chamber of commerce and president of the local school board. Dr. Roy S. MacElwee, Director of the Bureau of Foreign and Domestic Commerce, was one of the incorporators, as was also a noted and very highly educated Harvard man, Dr. Edson L. Whitney, of the Bureau of Labor Statistics, who wrote the original charter.

A NEW TYPE OF UNIVERSITY

Dr. Louis Win Rapeer, the president and founder of the National School for Social Research, who was then a well-known research worker, educator, and author, had been president of another university, head of the department of education in another college, had taught in some 10 or more universities from one coast to the other, and had degrees from the University of Chicago (S. B.), the University of Minnesota (A. M.), and from Teachers College and Columbia University (Ph. D. and doctor's diploma in education), after graduating from the Indiana State Normal in 1902. He was recognized as one of the inventive and progressive leaders in the field of education and as a brilliant specialist and organizer in the science and development of education. He was not a professor of history, of English, nor of mathematics, attempting to create a new type of university, but was a distinguished professor of education, a specialist in the science of education, with many years of consecrated training, starting in 1897 in Indiana, and continuing summer and winter, day and night, up to the very top, a man well qualified to be the president of any university of the Nation or the director of any type of educational research. He did not want to be a routine director of a traditional university or public-school system. He had administered, observed, and studied many such attempts at education. Coming from experimental schools which he had developed or established and from the Federal Board for Vocational Education, where he had helped in the earliest researches on the rehabilitation of wounded soldiers, he was interested in creating here a unique institution that would produce a new and more effective type of adjustment to modern life for adults than was being secured.

He would gather together experts of the Government service and the District of Columbia, and in late afternoon and night classes and conferences they would study the process of education itself and make it reach more people, make it deal more with the problems which people face daily in their work and recreation, make it far cheaper for them than the costly universities that were doubling in expensiveness and becoming more exclusive, make it less of a begging institution than those universities that are constantly pleading with the rich or with State legislatures to hand them out millions to be spent as they choose, make its methods such as would be less of a pouring-in system, and make it the savior of thousands of teachers and superintendents and Government employees in offices who could not leave salaries and get away to college for a full year, but could take much of their work by correspondence, in vacations, and for those here in the District in night classes. The whole field of educating adults had hardly been studied by any agency. The possibilities of presenting to students the actual life situation by the case system of teaching and the problem method of training people to think on the actual problems of life—all this was an open field for research and consecrated devotion.

AHEAD OF THE TIMES

The task was one of pioneering. As Dr. Charles H. Lane, of the Federal Board for Vocational Education, well said in a recent letter to Congressman NELSON: "Doctor Rapeer was about 25 years ahead of his time in his plans for the institution. The fact of the matter is that he conducted the institution as would our leading educators if they were not bound down by academic traditions. * * * I should say that the Nation needs at least one experimental university at the National Capital." Moreover, the aim was not to lower standards but to raise them and to insure that students knew far more than usual on graduating. The new university was to have only small classes, below thirty, instead of the hundred or more common in big universities, and to put the hurdles high for all and pass no one who was not well qualified, and measured so by tests and a university council that for the higher degrees invited in disinterested experts to help examine candidates.

Every teacher was to be given freedom "to teach the thing as he saw it for the god of things as they are" and to lay aside the worry of the "big stick" and gossip, which is the bane of many college faculties. So the idea was new; the older universities had hundreds of alumni in the city; the interest of the faculty was in building the university instead of winning outside converts to a new idea. So explanatory propaganda was sorely needed and very hard to secure when the leader was giving some 15 hours a day to the task of internal construction and of getting students before endowment was available. Dr. John Dewey recently expressed the difficulty at Columbia University at the installation of Doctor Russell as dean of Teachers College: "The simple discovery that education is, first of all, a problem for study, for investigation and research and a problem so com-

plex and diversified as to demand prolonged and thorough training marks in itself an almost revolutionary departure from the older attitude."

But here we had scholarship, devotion, inventive genius, and persistent industry, coupled with a uniquely favorable outward environment. Hundreds of capable and well-trained men and women with the higher degrees were here available and glad to teach after 4.30 in the afternoon for half of the tuition of their respective classes, and many for nothing. No university located in a small town has such advantages available; and most "standards" created to apply to such colleges out in the country town are inapplicable here. Research University did not need the customary "eight full-time professors" of the traditional standards set up by some college associations since it had more than 80 part-time professors with qualifications superior to those possible to the small and struggling college. Instead of having the minimum of "25 students" it had over 800 in one college year. Instead of having to struggle for perhaps a half century to secure a suitable library there was available for the use of students here the greatest collection of books in the world, from the vast Library of Congress down to several thousand books of Doctor Rapeer's own library.

THE PLAN

Instead of having to beg for money to spend for buildings the plan was evolved of renting large down-town residences with very large rooms and high ceilings, renting out the top floor or floors as a dormitory for men, and of thus getting at very reduced or no rent the lower floor or floors for the university. Here at one swoop was eliminated one of the greatest agonies of many college presidents and faculties—practically selling their peace of mind to the rich to get buildings and yet more buildings. The principal buildings secured were, first, from the Red Cross at 1719 H Street, and later at 20 Jackson Place (on Lafayette Square for a campus and only a half block from the White House) an ideal center for Federal employees in evening classes and for others who might attend day classes. Instead of requiring much money for museums and equipment for natural sciences much of this matter was provided in our great public institutions here and by loan and gift from Government departments and others—one, for example, being geological specimens from the National Museum.

The ideal was to start with merely nominal tuition and gradually to reduce it by some means until it was practically nil, at least as "free" as at State universities, and to get endowment and help from Congress and others for this purpose. The old idea that a university must be seclusive and austere, with a "take it or leave it" attitude, was to be abandoned. Students were not merely to have education provided for them if they came but people were to be sought out, urged, and stimulated to "make the most of themselves." The ideal was to make two students grow where but one grew before in the National Capital and the Nation and to adopt for philanthropic purposes some of the persuasive methods of the great commercial schools run for profit. Education was to be made attractive and obviously worth while, closely related to actual human needs and under the guidance of men who were daily in contact with reality and were not mere bookworms and pedants.

With the recent great shower of letters of praise of the university received in response to the inquiry by Congressman NELSON, and which has been printed in part, also, in the House hearings of the District Committee, came a letter and a copy of an investigation of Research University made in 1921–22 by Dr. Charles W. Blessing, of Albany, N. Y., a man educated in the best universities of the Old and New Worlds and a professional educator. His story and survey of his findings there printed show Research to be one of the most promising and worthwhile institutions of the entire country, not merely in the city of Washington. (I should like to quote this survey in full, but refer to the volume of hearings.) Without entering into competition with other institutions here, the university has developed, first, this evening university work and has thus helped thousands forward with their education, and, second, has evolved the combination of correspondence and residence work which the older universities here have failed to initiate—a plan that gives as much as possible of the training by correspondence and the remainder in vacation residence. These are its two great fields for experimental development, not overlooking experimental development of new methods of teaching in colleges.

The extension work, partly because of Doctor Rapeer's specialty, education, for which he is well known, through his many books, articles, and pamphlets, appeals especially to schoolmen. Some thirty to fifty thousand school executives and teachers of the United States have for decades been failing to go forward with their professional training because family obligations, low salaries, the necessity for nearly year-round work, and the great expense of "going off to college" have prevented them from leaving their schools and giving up salaries for that "year of residence" which has become a veritable fetish among American colleges. Because some students needed a year in residence for natural-science work in university laboratories, because a year was the usual length of a course before the University of Chicago invented the four-quarter system, and because in the early days books were scarce, correspondence work was undeveloped, and Carnegie and other libraries were not widely scattered, the colleges of the country required a full year of residence, usually at one time, for any degree. This tradition has put up an obstacle, however, that has stopped the professional growth of thousands of school superintendents, principals, and teachers in this democratic country so much needing education. They are our "professionally retarded educators."

Schools are often somewhat "dead at the top" because correspondence and reasonably limited summer-residence work were not combined. "The laboratory of the schoolman is his school" is the new slogan. Most adults in school positions of responsibility have already had laboratory work in the natural sciences at some college. They need to be trained to study not so much books of theory in libraries far off from their work, nor chemistry or physics in a laboratory, but the many acute problems in their own school systems, where the children and teachers are. Half of the so-called professional education of such leaders by the old methods has probably missed fire and been wasted. Thus America is kept backward by reason of the lack of advancement of its school leaders, who in turn are retarded and discouraged by the traditionally long residence requirements of universities, especially for degrees above bachelor. Even where some universities, like Columbia, permit summer-residence credit toward degrees the summer session is usually but six weeks in length, and it thus takes about six years to make up 1 year of 36 weeks in residence; and where the summer quarter is 10 to 12 weeks long, as at the University of Chicago, the difficulty is that few superintendents and principals can get off for a full summer session, and several years are required, no matter how much progress has previously been made by correspondence. So the result is that there is a psychological and financial handicap on the professional growth and efficiency of those upon whom we must depend for the superior education of our children in this Nation to meet the increasing complexities and difficulties of life. Here is one extension problem to which Research University set itself early, and especially after 1924. It could insist on a full year of residence for all if this proved best, and does for those in the District.

EXTENSION CREDIT FOR DEGREE OF MASTER OF EDUCATION

It was soon learned, then, that for the master's degree, or that of master of education, all of the time—that is, a full year in residence—was required at many universities and that this was regarded as an inviolable tradition—that no work by correspondence could be counted toward this "fifth year of college."

A few progressive universities in the West had begun to meet this problem by use of the subterfuge of calling graduate correspondence work "projected study." But usually a person must get off a full year at one time to get a higher degree beyond the bachelor's degree; and the schoolman feels, in many cases, that he might as well give up and remain a plodder with the lower degree and training only. At great cost our president had worked himself through the Indiana State Normal School, graduating in 1902, after teaching several years, and then gradually through other of the best institutions to the highest degrees. But few had his health, industry, skill, and freedom (until 1908) from family and other burdens. He saw that for schoolmen (however it might be for natural scientists) it was folly to try to force them to put in all or even half of the time in residence; and that one or two short summer sessions were quite sufficient, after a long period of effective correspondence instruction and original research in the laboratory of the schools, to make schoolmen professionals instead of mere theorists. Research University therefore announced in a 1926 catalogue that the residence time would be lessened and that a large part of the work could be permitted by correspondence for the strictly professional degree of master of education.

But this plan was also unheralded. For, traditionally, universities gave no credit toward the master's degree for education by correspondence, even though the training was several times as effective and laborious as sitting in the typically large classes or writing the usual thesis, which was here abolished. The master of arts degree was especially under the taboo that required residence classwork only. Research University decided to avoid objection from the conservatives by giving only the professional degree of master of education and of reducing residence time below a half year for only professional degrees and to require a full year of university training by correspondence, no matter how long it took, and a full quarter, or two short terms of five or six weeks, here at the university for this degree. Of course, these are mature students with one or more years of residence in college and with teaching experience, and a number are over 50 years old. Thus we require 38 semester hours instead of the usual 24 semester hours and a master's thesis. The standard was indeed raised so high that no university, no matter how reactionary, could legitimately complain; but we have seen that one of the association officers, whose function it seems to be to help colleges to continue looking backward, has caused some trouble with the recognition secured by the university in 1921–22 with nearly a hundred colleges and universities and with many that have since accredited us. Sympathetic understanding is needed.

HELP NOT HINDRANCE

Of course, the full light of truth must be thrown upon such underminers of mutual good faith among educators and colleges; but such a process costs money; and my speech to you is one means available for

helping our institution to grow untrammeled and to continue its noble work instead of being injured by doubts subtly raised as to whether it is maintaining "standards" and is "accredited." It is blazing a trail; it is more than maintaining standards. Its graduates will have their place in the sun along with those from the oldest and the largest universities—with which many of its graduates and students very favorably compare it in the many letters to Congressman NELSON previously mentioned.

WHY STUDY BY CORRESPONDENCE?

By modern correspondence training the student has many decided advantages. He may do his work when convenient; he may utilize leisure hours; he may drop his work and take it up again; he has it constantly before him, stimulating him to go forward to the best of his ability in his cultural, business, or professional growth. He can hook up what he learns daily and weekly with his life work and can thus practice that most important psychological doctrine of "use or lose." He can constantly use and retain and work over and modify and re-create within himself what he learns. These and a hundred other advantages inhere in this rapidly growing service that will in the future reach a large proportion of our adult population by one of the most skilled forms of training ever devised and now in the process of rapid experimental improvement. Many other universities will adopt the plan within 50 years, but present schoolmen need present help.

The correspondence student must solve all problems, face all "cases," and recite on all questions, rather than on a small part, as in residence. He does not sit and listen to others recite and grow; he must do all the reciting and growing himself; and there is no way of evading the development—while anyone can sit in many university classes for years without contributing, growing, or doing much. A student, for example, is reported as having attended but twice in a year in a very large class, and yet as having "passed" and having received a degree. The stories of such "college fooling," with degrees passed out at the end of a period of years, are revolting to all friends of economy and national hardihood and ability. The really fraudulent universities to-day are the ones that must resort to enormous classes to teach all who apply, and that then give out degrees when the "sentence" of sitting in class is served. This is the very opposite of the process of correspondence work and, especially, of our system at Research University. The difference is almost that between having a book read to you in class and in writing the book yourself in private.

WHAT EDUCATORS THINK OF RESEARCH

Principal H. D. Vincent, of School 16, Troy, N. Y., says, for example, in one of the many letters to Congressman NELSON:

"I have three degrees earned elsewhere, and I know what work is like. The big criticism I have to offer in regard to Research University is that it requires so much that the wonder is that anyone ever finishes. The instruction is of a high order and faithfully done. More is required at Research University than is required at most institutions for the same credit. One assignment of your work is equal to about two weeks of work at State College for Teachers at Albany, according to what my friends say."

Superintendent of Schools L. J. Belt, of Wheatland, Wyo., says:

"I have attended day classes in five colleges and universities and can truthfully say that the course I am taking from Research gives me more of a conscious feeling of accomplishing something than almost any course I ever took."

Superintendent Cotton, of Derry, N. H., says:

"I am a college graduate, Colby, 1900, also of the University of Maine Law School, 1906, a member of the Massachusetts bar, 1906, Harvard University, 1927, with the degrees of A. B., LL. M., and Ed. M. (Master of Education). The educational philosophy on which Doctor Rapeer bases these courses is the best I have ever read * * *. The subject matter of the courses I am taking is sufficiently difficult to be called 'advanced' when compared to other courses I have previously taken * * *. A university at Washington so organized, to do work such as this, should be the pride of the Nation."

Please hear also from one of the first graduates of the 1921 class, who is now practicing her profession in New Haven near Yale University—Miss Alice M. Hopkins, A. B.:

"I was a student in this university from its opening until 1922 * * * and I am glad to be able to say that during this time the professors and instructors were all experts in their lines, and that the instruction was of high grade, equal to any I have since received in such universities as Columbia and in the teachers' courses offered at Yale University * * *. I feel that Doctor Rapeer's idea of a cooperative university, with an opportunity for everyone to get the education needed to advance him in his life work, at such hours and on such terms as would enable him to take advantage of it, is a great contribution in the field of experimental education for adults."

Superintendent William E. Melvin, of the Lordstown centralized schools, Warren, Ohio, also voices the judgment of the group from evidently long and intimate experience:

"I have attended three of the great universities of our land, namely, Ohio University, the University of Cincinnati, and the University of Colorado. I consider the instruction given by Research University absolutely on a par with these; and I have found Research even more exacting in the preparation of lessons."

There is the story; and there is the truth! And this seems to be the consensus of opinion among all those who know. And my temptation in selecting passages for this speech was to include many complete letters and hundreds of extracts from letters of resident and correspondence students. Many of these, however, have been printed in the hearings on the favorably reported bill and some appear below.

WHY THIS REFORM IN HIGHER EDUCATION?

"Well, why don't these schoolmen study regardless of degrees?" said a Senator at one of the hearings. The reasons, very simply and sufficiently, are: First, that degrees are required for professional advancement and increase of salary in a growing number of States; second, that students can now get a year or two of credit or more toward bachelors' degrees from most of the large accredited universities for correspondence work, and colleges yet do not see the need of increasing this credit; third, that the work for the "fifth year of college" is not essentially different from the fourth year and should be treated and accredited in much the same way; fourth, that a man who has completed a course of training is entitled to a symbol that indicates he has made certain achievements and has these abilities; fifth, that students are getting degrees for residence work in large classes of far inferior quality to correspondence work, and in examinations far less carefully safeguarded, as in the "honor system," so called, which Amherst has just abandoned; sixth, that since school boards can not always judge merit except by degrees, and since superior professional fitness is not always recognized, schoolmen and their teachers have not a sufficient incentive to lay out money and an immense amount of hard work in their leisure hours to engage in the correspondence training, although, of course, many do, to their great honor.

These and other factors combined tend to make education unattractive and seemingly impossible. The result is that very many of the school systems of the country are relatively "dead at the top" and partly dead within, because the teachers, superintendents, and principals are not growing as they should be. They are stagnating because of a stupid system which robs them of incentive and which forces them out of the schools. It gives the man of wealthy parents the advantage, and the man of wealthy parents usually does not go into teaching, although salaries of from $5,000 to $10,000 are now becoming common in this field, and some superintendents of schools are paid as much as $20,000 and have the most important responsibilities in this Republic. Moreover, not to grant degrees to deserving men and women for correspondence plus residence work is unjust and puts the cost of instruction and publicity too high to provide the service.

GREAT COST OF THE SERVICE

He who sells education must be a very great salesman, indeed; and he who gets people at a distance to take their scanty leisure and to give it over to hard work in correspondence study must be a "past master." He who buys an automobile, a radio, or a house buys immediate satisfaction and delight. He who purchases a correspondence course makes himself for a time a slave, and one who must command all of the forces of his nature to cause himself to labor, to write, to think, to persist, and to finish the work. There is the real reason why so many people fail to take or to complete correspondence courses! Without agents, "business methods," and high tuitions (to split with agents), such courses can not be provided on the scale and quality of those of Research University without very great personal sacrifices or much money in the form of gifts to make up deficits. That Research University is working out economical methods by experimental research for doing this great job for the Nation is to be highly commended and praised! Only little souls will fail to help it render this service to the Nation.

Thousands of letters come to the university each year. Each entails a cost of about 20 to 50 cents for a careful personal reply by an expert. Many letters are usually needed for each person. Out of these thousands of letters comes a personal acquaintance and awareness of the actual facts of life and of the educational needs in the field as they are that can be acquired in no other way. No one who has not read these thousands of letters for years and generalized wisely on the outstanding facts is competent to challenge the plans of work devised by those who are here giving their lives to this training. And no really professional expert on education will even dare to speak authoritatively on correspondence instruction, this field being as yet largely untouched by research, and genuine experts avoid dogmatic opinions on what they do not know. Yet here in the hearings we have heard dogmatic and silly assertions made by persons who are not educators, who are not college professors, who know nothing about the science and facts relating to this problem, and who do only harm to education and society.

Such testimony and such an "expert" as one who has, for example, been only a teacher of English in a college, speaking oracularly on correspondence work and university standards, bears out the witticism now going the rounds that such "an expert is an ordinary man away from home." What those in Congress need to do is to discover the real experts and to give them the best help and the greatest encour-

agement possible to go on and to discover how best to educate the American people. If large bodies of universities in associations must move slowly, let a few go forward. We must protect the men and women of Research University from the cynics and others who would hinder the most cordial recognition and acceptance of their acts by all universities. Any other course strikes at the very heart of American methods and ways of growth. We must give our universities freedom, as 36 States do, and not retard them by the "cancer of too much government" and standards out of touch with a changing reality.

GENERAL ACCREDITING

The more than a hundred colleges and universities and State departments of education that have recognized Research University in the past will be multiplied until there is none that does not credit it. And to those persons now students and to those who will be students in the next 50 years I say that it is far better to study with a live, small institution than a big, dead one; and that if you will stand by the university, as you have in this matter of the proposed unwise legislation, it will stand by you and will grow until it will be one of our best beacon lights of educational research and school improvement. Furthermore, I say that if a college, State department of education, or other agency questions legitimate credit for your achievements and full recognition of the university, let us know, and such matters will be immediately rectified or you will be given the privilege of going forward with Research University to the very highest degree, that of doctor of education, when you will be beholden to no other university or State department of education for accrediting.

These things are swayed now too much by custom and fashion and by gossip. The only person besides Congressman NELSON and Professor Loftis who has ever really investigated Research University at all thoroughly on the ground was Dr. Charles W. Blessing, and his conclusions are full of praise and encouragement. Dr. Charles H. Lane, Prof. Philip E. Bunker, and others who got their degrees as far back as 1921, are in high positions and should be justly proud of their degrees. I say to you alumni, let no one injure your pride in your own. You know that you did standard work and that you received standard recognition that others may refuse to accept at their cost. Thus would I speak to the graduates. Have the backbone ever to work for your alma mater, even if she doesn't live in a palace and doesn't beg for her income!

SERVICES OF REGISTRAR SAUNDERS

I suggested before how interestingly the work is organized and conducted. The registrar, Mrs. Virginia H. Saunders, a graduate of the University of Wisconsin in the class of 1902, has reared a family and has had a rich and varied experience. She studied in the evening classes of Research University for a year or so, getting her master's degree in 1926, and, not wanting to be a burden to her husband for her training, worked in the university office with other students for her tuition. Gradually the ideal opportunities for adult study opened out and appealed to her so much that she has for three years been giving her services without financial compensation to the university as registrar, and knows it more intimately than anyone except the president, who is the present guiding officer of the institution. She says that it is a constant surprise to her how great is the need of this training, how little this need is being met by other institutions, and how expert and worthy this service is of the most generous financial and moral support. I believe that this judgment is sound, as is also the judgment of her husband, who visits the university daily and cooperates with Mrs. Saunders in the contribution of her services to this worthy cause. I have talked with our faculty members, other trustees, and with students, and they are mature and far above the average, the kind of people who unselfishly are molding modern life and helping it to overcome its serious handicaps. And they all boost for Research.

REQUIREMENTS FOR DEGREES AND CREDITS

I have mentioned the evening and the summer classes in residence. The general credit requirement for these and for the extension work is the usual 120 semester hours for the bachelor's degree, and 30 more for those in residence, and 38 for those by correspondence and summer residence, for the master of education degree. Some of the best of those students who complete the work to the degree of master of education may be permitted, experimentally, to go forward to the doctorate in education. The president's interest is largely in this very advanced field and in getting hundreds of schoolmen to work on school problems that can be solved only by local experimental research.

The typical extension student is supposed to have had at least two years of college work in residence before he enrolls with Research University; and in this way he gets his natural sciences which, as stated, we do not teach by correspondence, excepting biology. We prefer also not to teach the foreign languages in this manner. We do not for good reasons require the foreign languages for degrees in education. When he comes during the summer session the student may be asked to enroll for some of his classes at another local university here also, for which he can receive residence credit at Research.

HOW STUDENTS WORK

When he completes the 36 sections of a year's course by extension, the student may take an examination before a local supervising examiner if he wants college or State credit. But if he wants a degree from Research University he must take further examination on these subjects when he comes for his residence work. No one can get a degree without residence work, and no one can get a degree without final oral and written examinations on all of the work counting toward that degree. For the degree of master of education there are five extension subjects and a term in residence beyond the bachelor's degree. For the bachelor's degree the requirement is the equivalent of 20 subjects in which classes recite three times a week for a college year, five subjects making the equivalent of 15 hours a week, the standard performance, if not achievement, that has become a custom in our colleges. An ideal course of 20 subjects is suggested to students for the four years of training. Yet all work is based and selected on intimate knowledge of the individual student and his needs. Every extension student sends in his photograph; and a very good idea of the quality of the extension students is gained by looking through the albums of portraits.

These men and women, as stated, are for the most part above 30 years old and are of a distinctly student and professional type. They are persons who have the character, persistence, and courage to study for themselves and to make sacrifices to get ahead. They are distinctly not of the type that is "sent to college," there to invent ways of "killing time and spending dad's money." The whole university is on a much higher plane than this, and is more like a cooperative graduate research-institute in the field of education.

The undergraduate work is divided among the three colleges of Commerce, Education, and Liberal Arts. The only division that goes higher than the bachelor's degree in these three lines now is that of the College of Education. No school of medicine, dentistry, law, or of other similar professions is offered. A school of religious education has been in operation but is not actively seeking new students. Our extension work is mainly for educators, not pastors.

Fundamental education in the social and natural sciences and higher specialized training in business, education, and the allied fields is provided; and good teachers are connected up with good students. Lesson papers are sent in to the university, out to the instructors, most of whom are in Washington, in to the university after being corrected, and out to the student after being supervised and recorded in the office. The system impresses me as being original, thorough, growing in efficiency, and eminently worth while. Certainly such a service has more promise of usefulness to the Nation than many an old-time university; and it should receive the first attention of discriminating philanthropists. It is remarkable how far the institution can make a little money go. Our main expense is for printing. The professors teach for 25 cents a lesson ("section") or less. Each subject, consisting of a year's work and giving six semester hours, or nine quarter hours, of college credit, now costs the student only $27 cash, or $30 in installments of ten to twenty dollars a month. Most students take from three to five subjects at a time. You can see that this leaves little money for university overhead and nothing for the ordinary magazine and newspaper advertising or the commissions of agents. We use no agents; but it may require agents and a higher tuition rate to make the system financially successful, because of the great difficulty of getting people to enroll for courses of work when the movies, the radio, the dances, and the autos are so seductively claiming so much of their leisure time and when our recognition is being secured over the entire area of the United States.

HARD INTELLECTUAL WORK AIDED

These forces and others are the chief foes of extension work and of night classes. The tendency is unfortunately toward easy living and flabby minds. While the standards of education are rising for many positions, those who want to rise must meet all of these dragons and slay them if they are to succeed in securing even part-time professional and cultural growth. Any institution that helps people in such work is worth an immeasurable amount to this Republic; and how any person can lay one stone in the way of Research is inconceivable. That any one or any group should belittle its service shows plain misunderstanding. Here we have a great educational reform and vision. Are we going to be so ignoble as not to catch the vision and to help forward these reforms, when every day brings new alarms showing the need of more superior education than we now have to meet the grave perplexities of modern life? No! Research University will soon be recognized as in the van of progress and as an aid to all colleges and individuals.

THE FUTURE

This is the type of institution which should be encouraged to grow and to provide its training for men and women who can not spend all of their time at college in residence. The solution of the problem of coordination in the District of Columbia is not one of giving the local school board more powers but very probably that of forming by statute a board of higher education that will assist all institutions of higher learning here and prevent abuses of the incorporating powers. Thus the District of Columbia could take a step in advance of any State in the Union. The Nation wants not less education but more education and more kinds of education; and it must promote, not hinder, experimentation and devotion to the public welfare.

EXCERPTS FROM LETTERS TO HON. JOHN M. NELSON, OF WISCONSIN, RELATIVE TO RESEARCH UNIVERSITY OF WASHINGTON, D. C., AND REPLIES OF STUDENTS, TRUSTEES, FACULTY, AND ALUMNI TO AN INQUIRY WITH ESPECIAL REFERENCE TO THE EXTENSION TRAINING BY CORRESPONDENCE

SUPERINTENDENCY UNION OF THE TOWNS OF
DIGHTON, FREETOWN, AND BERKLEY, MASS.,
May 6, 1928.

DEAR SIR: I have your letter of April 30 asking for my frank opinion of Research University.

My connection with the institution is briefly that of submitting to them from time to time material of constructive investigations that I am doing in connection with my regular work. It is precisely the same as work that I would otherwise do with Harvard under a course in individual research such as, in the Harvard catalogue, carry course numbers of over 100 in their respective departments. I need only say that, since I can do this work under the auspices of either Brown University or Harvard, as I might elect, the fact that I am working with Research University is due only to my finding, after experience with all three institutions, that Research University is in this respect the full equal in excellence of the other two; and, to me, preferable because I can adjust correspondence to my schedule better than I can monthly conferences that pass for residence.

Regarding credits, I can say nothing. In work of this sort no specified credit is prearranged at Harvard or Brown. When the work is completed such credit is given as the work is considered to merit. I have asked for no credit at Research because, in the first place, my work is not as yet finished; and, in the second place, I am not especially interested in credits, as I have already from Brown, Harvard, and Yale attendance acquired a fairly adequate supply of letters for ordinary purposes. My impression from general contact with Research is that credits from them would be harder to extract than from any institution with which I am familiar.

I may say, in passing, that this district encourages, almost to the point of compulsion, teacher study. My teachers are regularly working with Harvard, Boston University, Brown, and Teachers' College, Columbia, on summer and Saturday courses. I am expected to adjust salaries to the value of such courses. If I did not consider the work at Research of equal value, I should not accept such work for salary credit, let alone recommending it as I now am. I consider Research, on its merits, the full equal of resident work anywhere and also a unique service to educators in service that for many is an absolute necessity.

Sincerely yours,

EDWARD L. HILL,
Superintendent of Schools.

MILLERSBURG, OHIO, *May 3, 1928.*

Hon. JOHN M. NELSON, M. C.,
House of Representatives,
Washington, D. C.

Hon. JOHN M. NELSON, M. C.: I can faithfully and honestly say that the type and kind of work conducted by Research University of Washington, D. C., is of a high standard and is also well done. In quality the instruction of this institution is equal to the lecture method, recitation, research, or experimental work of institutions of university rank. In quantity the requirements exceed in most instances those of institutions which have all the work done in residence. I have done more work in this institution than any other that I have attended for the same number of credits. The credits are properly safeguarded by an examination in absentia on extension work and another examination at the institution in residence. The institution requires a portion of the work done in residence for those who are working for degrees. Many students go to the institution for conference periods on work at various intervals. This attendance requirement in residence and the giving of examination in residence at this time carefully safeguards the matter of examinations upon which credits are based.

* * * * * * *

I have my bachelor's degree from the College of Wooster, my master's degree from the University of Wisconsin, and have been superintendent of schools for 21 years, with additional 5 years of teaching. With this experience in educational work I am fully persuaded that Research University is making it possible for many a person who is limited in means and must be employed the major portion of his time to secure a higher education. I have worked my way through school from the beginning, with no financial help whatever; and the aid of such an institution of high standards and good efficiency, where work may be carried on partly in residence and partly in extension, makes it possible for me to work out my doctor's degree.

An institution of high standards of this type should be maintained to meet this need of a great number of such men who are at work in the schools of our Nation. In this way I feel that Research University is rendering a great service to our general educational program by giving up-to-date and efficient training to many superintendents and principals. The research work and the experimental work done by this institution are of an exceptionally high character and are worthy of due recognition.

* * * * * * *

Yours truly,

J. A. GERBERICH,
204 East Jackson Street, Millersburg, Ohio.

FEDERAL BOARD FOR VOCATIONAL EDUCATION,
Washington May 8, 1928.

MY DEAR MR. NELSON: On return to the office I find a circular letter from you under date of April 30, relative to Research University, located in this city.

At the time I was familiar with the work of Research University the instruction was of high standard and faithfully done. The faculty was composed of men who were then in the employ of various departments of the Federal Government. They were men who had had unusual academic preparation in our larger universities and were then doing notable work as employees of the Government.

The instruction in the institution at that time compared very favorably with the usual methods employed in our colleges and universities which carry on evening instruction.

The credit requirements were based upon the same credit requirements as are found at Chicago University and like institutions.

Credits in the institution were based on carefully safeguarded examinations and on residence and attendance here in Washington for those who were working for degrees.

I have no knowledge whatever of anything done by the president, registrar, trustees, or faculty of which there could be any legitimate public complaint. I am confident in saying that Doctor Rapeer was about 25 years ahead of his time in his plans for the institution. The fact of the matter is he conducted the institution as would our leading educators if they were not bound down by academic traditions.

I should say that the Nation needs at least one experimental university at the National Capital.

Very truly yours,

C. H. LANE,
Chief Agricultural Education Service.

WASHINGTON, D. C., *May 29, 1928.*

Hon. JOHN M. NELSON,
United States Capitol, Washington, D. C.

MY DEAR CONGRESSMAN NELSON: I have taught for 30 years in colleges and have for 7 years been a professor of education at Anderson College and a summer instructor at Furman University, South Carolina. For 20 years I taught at Berea College in Kentucky; and during my entire career I have specialized in education and allied subjects, especially in the supervision of teachers. The highest degree I could get at Berea was that of bachelor of science in education.

I had long known of Dr. L. W. Rapeer as a leader in education and an author of standard works for teachers; and one of my associates at Anderson College, Mr. Holliday, now president of Millersburg Woman's College, Kentucky, told me in recent years that he had studied in residence at Research University when he was president of a school in Virginia and that I could get exceptionally good training in residence and by correspondence with Research University and thus go forward to the degree of master of education, from which I had been kept by my need of money to support dependents. I taught summer and winter, except for a year off at Peabody College, when Berea paid my salary. Consequently, the opportunity to study for a degree that seemed necessary for promotion and change to better positions, seemed providential; and I gladly availed myself of the opportunity to investigate Research University.

The result was that I registered and have been studying, by correspondence, educational statistics, educational research, educational supervision, etc., and have learned that these graduate courses are exceptionally thorough and well organized. I did not know that they could be so educative and could take so much time and effort. Certainly anyone who completes a subject with Research University knows his subject better and is able to use it with more facility than most people in classes in colleges. During the past year I have taken an extension course in classes from Columbia University, and I find the level of training and methods on the same high plane. Of course, in correspondence work one must do every part of an assignment himself.

I have been in residence, also, at Research University and know that no one can get a degree there without being in residence and without meeting the very highest standards. If anyone who was doubtful would just take a course and go through the final and other examinations he would realize the effectiveness of this institution. Research University is meeting a great need of educators over the country and is helping many like myself from blind alleys.

Very truly yours,

M. ADELIA FOX.

THE NEW JERSEY STATE COUNCIL OF CHURCHES,
Dover, N. J., May 3, 1928.

Hon. JOHN M. NELSON, M. C.,
Washington, D. C.

MY DEAR SIR: It is with great concern for the future of educational research and of pedagogical progress that I write to urge upon the Congress the enactment of the amendment to safeguard the charter of Research University of Washington, D. C., Dr. Louis W. Rapeer, president. The history, work, influence, and prospects of this institution are unique.

I have taken many courses at a number of different institutions during my half century of life, and with none have I been better pleased than with the work which I have been doing with Research University.

New York State normal school, Temple University of Philadelphia, Drew Theological Seminary of New Jersey, and New York University are among the institutions at which I have studied. I am particularly interested in religious education, and I have taught several years in public and private schools. Research University has opened to me a new world of practical educational theory and practice. With all the emphasis at my command, I say that it should go on unhampered and unhindered.

I have worked harder at the courses here taken than with almost any taken in all my life. Doctor Rapeer takes great care to deal with each individual and does it in a way which is not possible in the crowded classrooms of the ordinary institution. One soon comes to feel that he is in close touch with the institution and that he is receiving personal and special attention. I can not tell you how much this means to the student, especially the graduate student.

Individual initiative is encouraged and each student gets at his instructors with his questions, problems, and ideas in a surer way than he can do in a crowd. The ordinary lecture method "stuffs" one with facts and ideas, but the Research University method develops research, reflection, judgment, and invention to an altogether unusual degree.

Research University students take their examinations at the university itself and under the eye of the officers. Examinations are as uniquely personal as is instruction. Students could not possibly get away with deception or tricks, as is very often the case in crowded examination halls. Of course, the class of students accepted for work at Research do not wish to "get away" with anything. The entire history of the institution and conduct of those connected with it is, I am sure, above question or reproach.

The United States certainly should have at its center such an institution as this. In the hands of Doctor Rapeer—a widely known teacher of teachers and author of educational works of great merit—the university is destined to play a large part in a field where original thought, personal development, and individual initiative are absolutely essential to progress. And the Capital City of our country is the precise place where that institution should be located.

The growing alumni of the university greatly appreciate your efforts in its behalf. In course of time we shall be able to help put it on a better footing as to endowment and equipment. It is comparatively young, but it is already highly useful and greatly needed. I searched for some time before deciding to take work here, but am more than pleased with my choice.

Yours respectfully,

JOHN H. EARLE, *Pastor.*

WASHINGTON, D. C., *May 10, 1928.*

DEAR SIR: I have a copy of your letter of April 30, 1928, requesting information concerning the work done by Research University.

I became a member of the faculty of Research University in the fall of 1922 and took charge of the chair of geology. I have the degrees of LL. B., LL. M., B. S., and M. A. In October, 1923, I was sent to the Pacific coast by the Interior Department and during most of the period I was in the West my connection with the university was severed.

Doctor Rapeer is a learned scholar and author, with many degrees from different universities. He has always been fully absorbed in his duties as teacher and administrator.

As my instruction proceeded I had occasion to handle classes in other subjects. Everything was splendidly organized, and all students were on tiptoe to bring their subjects up to the requirements. Doctor Rapeer filled all the character of a gentleman and a scholar at all times. No degree was ever sold, although offers were made to him at times of as high as a thousand dollars for a degree. There have been issued in all only about 50 degrees in the course of some eight years—about six degrees a year. The requirements for credits and degrees are stern, as I know by experience, having obtained my master of arts degree from this institution.

* * * * * * *

No degree is ever given without residence work being required, as in the best colleges.

I have been handling and marking examination papers in history since my return from the Pacific coast. They would pass criticism anywhere, and many of them show a high degree of critical knowledge. I have not had to mark any of them "deficient." A few get "A," most of them "B," and some of them "C," which is passing mark.

There can be no valid criticism made of any member of the faculty. They are all ladies and gentlemen and scholars.

There is, indeed, a crying need in the city of Washington for such an institution as Research University.

Very truly yours,

VICTOR L. DODGE,
2554 University Place.

THE PENNSYLVANIA STATE COLLEGE,
State College, Pa., May 9, 1928.

DEAR MR. NELSON: Thank you for the opportunity to answer your note of April 30, 1928.

I heartily oppose the bill giving the licensing of incorporated schools to the board of education, especially as it may affect Research University of Washington, D. C.

Its instruction is of high standard and faithfully done; its comparison with other and "old-time" methods of instruction is most favorable; its credits are equal to our own; its credits are based on carefully planned and equally safeguarded examinations and on a minimum residence requirement. Our Nation does need one such university at the National Capital of the caliber of Research. Nor can any legitimate public complaint be made of any of its officers or staff.

Personally, I can best indorse it by saying that I should be highly honored to be a coworker on its staff. To a teacher that means a lot.

Sincerely,

ROBERT E. FLANAGAN,
Instructor in Classical Languages.

ROCKSBORO APARTMENTS, APARTMENT 509,
1717 R Street NW., Washington, D. C., May 8, 1928.

MY DEAR MR. NELSON: It is with great pleasure that I take this opportunity to tell you of my very cordial and cooperative relations with Research University. After graduating from high school at Evansville, Ind., in June, 1926, I began to despair of going to college until I heard of Research University. Here Doctor Rapeer made it possible for me to go on with my school work by giving me employment in the university office, and in return for my work gave me my tuition, a room in the dormitory, and $5 a week. He also found a part-time job in a restaurant for me, so that I was practically self-supporting. Other students were offered similar opportunities, and at the time that I entered the university several students were working in the office.

I attended night classes from October 6, 1926, to July 15, 1927, and was much benefited by the courses. The personal guidance, encouragement, and instruction were very gratifying. Furthermore, the experience which I received while working in the university office helped me directly in obtaining a position with the State Department. The university went even so far as to lend me a typewriter with which to take the examination for this position.

Naturally, in the time I was with the university I became well acquainted with its officers, and especially with Mrs. Saunders and Doctor Rapeer. I found that they held high the standards of all work and quickly discouraged any backsliders or would-be diploma purchasers. They were always willing to help conscientious persons who were really looking for instruction and help, and the cordial attitude shown me was accorded them alike.

While with the university I made the personal acquaintance of several correspondence students who were doing residence work; they were all men of high moral standards, scholars, and gentlemen. None of them at any time so much as intimated that he was dissatisfied with the training he was receiving. In fact, before the news of the investigation by the district attorney's office got abroad not one of the correspondence students, to my knowledge, expressed dissatisfaction or doubt; on the contrary, the university has on hand "rafts" of letters praising and commending this phase of the university's work.

* * * * * * *

Since you have so whole-heartedly taken an interest in this matter, there is no need to go on further in telling what has been done by the enemies of the university. But in closing I wish to say that I am heartily in favor of an experimental institution such as is Research University and should be bitterly disappointed if an institution with such high standards and educational possibilities should go down, as an "innocent bystander" in a diploma-mill fracas. I believe that Research University is an institution of learning from the ground up.

I should be very glad to meet you personally and give you any additional information or answer any further questions which you would like to ask.

I thank you for what you have already done in the interest of education.

Very sincerely yours,

EDMUND BECKER.

VANDALIA CITY SCHOOLS,
Vandalia, Ill., May 7, 1928.

DEAR MR. NELSON: In reply to your letter, I beg to say that I have been doing work with Research University for nearly two years and have planned to spend this summer there. The instruction given by Research is equal to any I have ever received elsewhere. It is of high standard and faithfully done. The credit requirements are equal to those of other schools. Credits are based on carefully guarded examinations, and residence work is required for those wanting degrees.

* * * * * * *

I think the Nation needs such an experimental university at the National Capital. It would be a serious mistake to curtail the work of Research University. I have served as superintendent of city schools for 12 years and as county superintendent for 16 years, and have kept in close touch with school work during this time.

* * * * * * *

Yours truly,

F. E. CRAWFORD, *Superintendent.*

THE UTICA SAVINGS BANK,
Utica, Ohio, May 2, 1928.

DEAR SIR:

* * * * * * *

I have taken, by correspondence, several courses from this school in subjects relative to my own profession, which is banking. I can truthfully say that these courses have been of a very high type. As you know, many of the larger colleges and universities of the country offer correspondence courses for which they allow regular college credit. I chose Research because it seemed to offer the same courses at a much lower tuition charge. Now, after having taken the courses, I feel sure that the instruction which I received could not have been bettered anywhere.

Although I am a graduate of one of the large universities of the Middle West, I feel that there is much room for improvement in our American system of education. Research University fills a need which really exists, and, if permitted to carry on its present program, should accomplish much in solving the problems of part-time education. We are indeed fortunate in having a man of the caliber of Dr. Louis Rapeer, who is interested in working out these problems in what might be called an "experimental university."

Yours very truly,

WILBUR L. GRANDLE, *Cashier.*

RIO GRANDE COLLEGE,
Rio Grande, Ohio, May 16, 1928.

DEAR CONGRESSMAN NELSON:

* * * * * * *

I am at present enrolled in this university for work looking toward my doctor's degree. Having done work for my master's degree in our own State university—Ohio State University—I believe that I am in a position to be a judge of work done by Research University.

The Nation needs one experimental university at the National Capital, and I believe that Research University will give to men such as myself an opportunity to do research work while at the same time doing active work in the field.

* * * * * * *

Very truly yours,

W. A. LEWIS,
Dean Normal Department and Acting President.

CONTINENTAL PUBLIC SCHOOLS,
Continental, Ohio, May 5, 1928.

DEAR SIR: In answer to your letter of recent date relative to the work done at Research University, I am pleased to say that I have taken some work from this institution and regard the work of the very highest type. Every paper I turned in for correction was carefully marked by the instructor; even the omission of a comma was corrected. The examination was difficult which I took at the university, and it was carefully graded.

The president, Doctor Rapeer, was always truthful with me; he does not promise anything that he does not give, so far as I know. I was in Research University six weeks doing residence work, and I always found everything equal to that of any college or university of which I have had any acquaintance.

The correspondence work of this institution is of a higher quality than of other correspondence schools, in that no credit is given without actually being in the university to take the final examination.

* * * * * * *

I consider the work done at Research University of the very highest type. A visit to this university and Doctor Rapeer will convince the most doubting person.

Very truly yours,

JAMES A. ROGERS, *Superintendent.*

MILLERS FALLS, MASS., *May 10, 1928.*

Hon. JOHN M. NELSON,
Washington, D. C.

DEAR SIR:

* * * * * * *

The instruction seems to me to be of high standard and faithfully done. I am a graduate of the Massachusetts Agricultural College and am now doing graduate work there. I have studied at Columbia Teachers College summer session and taken correspondence courses from Chicago University. I see no reason to rate the work of President Rapeer below any of these.

As I understand, Research University attempts to be more liberal than most other schools of its grade in allowing credit for work done outside residence, and thereby is rendering a great service to many who have done good work but can not spare the time or expense for long residence. I have every reason to believe that high standing is always demanded and that satisfactory examinations and necessary residence are required.

* * * * * * *

With the enormous amount of material suitable for study gathered in Washington and constantly being increased, it seems to me that there is no place on earth more suitable for the location of an institution of university grade giving large place to research work. I should consider it an injury to the public welfare if Research University were discriminated against in any legislation or if it and other similar institutions in the District of Columbia were put under restrictions or any form of supervision or restraint not found necessary in other parts of the United States.

Respectfully,

D. F. CARPENTER,
Superintendent of Schools.

NORTH ARKANSAS ANNUAL CONFERENCE,
METHODIST EPISCOPAL CHURCH SOUTH,
Searcy, Ark., May 2, 1928.

DEAR SIR:

* * * * * * *

Something more than two years ago I began to study under the direction of Research University. Last summer I spent some time in resident study there. I belie that I am well acquainted with the methods of Research University and with the members of the faculty.

The instruction is of the highest standard and is very faithfully given. I have studied both by correspondence and resident study, and I am frank to say that I have received more actual benefit from the correspondence method. The credit requirements of Research are equal to any other college or university with which I am acquainted. The credits given are carefully safeguarded by strict examinations and resident study. I have never found the president, the registrar, the trustees, or anyone connected with the university slack in any respect in the management of the university or in granting credits. I have the fullest confidence in Research University and I am glad to recommend it at all times.

* * * * * * *

Yours very truly,

J. E. COOPER,
Pastor Methodist Episcopal Church.

AMERICAN BIBLE TRAINING SCHOOL,
Brooklyn, N. Y., May 4, 1928.

* * * * * * *

MY DEAR MR. NELSON: I have had opportunity to become acquainted with the standards maintained by this institution, and it is my opinion that their students will have to work rather longer and harder for degrees than in any other university of which I know. In addition to my own studies in Syracuse, Columbia, and New York Universities, I have made a study of methods in various institutions, so that I feel that I know whereof I speak.

The foundation principle of the instruction given by Research University is more sound pedagogically than are the principles followed in most schools for the training of teachers. The student is required to do much of his work in connection with actual teaching in the school where he is employed, submitting frequent reports by correspondence during the year, and during a vacation period each year going to Washington for an intensive review and seminar session at Research University. It is my earnest conviction that this type of teaching is much more effective than that usually given, in which the student is doing very little practical work during the period of his study. The ideal laboratory in which to train a teacher is a real school. Doctor Rapeer makes it possible for a student to gain the best values of correspondence and residence study in a curriculum well chosen and ably taught.

A member of our faculty, Prof. John H. Earle, who is a graduate of Drew Theological Seminary and who has studied in various other institutions, and has been teaching for many years, is now taking a professional course with Research University, and was recently in Washington

to attend one of the seminar periods required in his work. He is highly enthusiastic over the high standards and efficient methods of Research University, and I know he desires me to give it his heartiest indorsement.

Respectfully yours,

L. W. BARNARD, *President.*

SANTA MARIA, CALIF., *May 7, 1928.*

MY DEAR CONGRESSMAN NELSON: In reply to your recent inquiry regarding Research University at Washington, D. C., I am glad to say that the course which I take at the university is splendidly handled by the university. I have taken courses by correspondence with Eastern and Western universities; but no other university does such splendid service for its students as does Research University. Already I have planned several years' work ahead with this university. I may wish to take as much as 10 years of work with this school. I am now taking a very good course (special higher algebra) with Research University such as I can get at no other school by correspondence. Thus this university is doing a real service.

The instruction is of as high standard as that of other universities. The professor with whom I am taking my work does his work as faithfully, even more faithfully, than any other professor with whom I have ever taken correspondence. The credit requirements are fully equal to those of high-class universities. Their credits are safeguarded by examinations. * * *

* * * * * * *

Very truly yours,

CALVIN FUNK,
Mathematic Instructor, Junior College.

GRIMES, VA., *May 2, 1928.*

Hon. JOHN M. NELSON,
Washington, D. C.

SIR: In answer to your letter respecting the general worth of the services rendered to higher education by Research University, to avoid needless prolixity I am answering your questions specifically and also in consecutive order.

The instruction is of high standard. It is more than that, for it is sympathetic in tone, individual in method, most catholic in scope. The tolerance and open-mindedness evidenced by the comment appended to work done is stimulating and free from narrow prejudice. The projected, warmly human insight of Doctor Rapeer permeates the guiding notations so effectively that there is no hint of a mechanical relationship which (I have found through personal experience) exists between the student and the overgrown institution of learning.

The instruction compares favorably with that given by the extension department of the University of Chicago, the only other institution with which I have had relation, except in residence work. It is superior to that which I received in residence at the University of Virginia in this respect. The student is placed squarely upon his own initiative. He learns what his professor's viewpoint is after, not before, he answers a given hypothesis. Thus he can not hypocritically make his answer coincide with that of his teacher because such agreement is politic.

The credit requirements are about the same as are those of other institutions. In several courses I have found them to be rather higher.

My examinations have been written in the presence of the division superintendent of schools of my county seat.

If I obtain my degree in the future it will be on the condition of a stipulated amount of residence work in addition to that already completed by correspondence.

I know of no act upon the part of any officer, teacher, or trustee which should engender public complaint. The extent of my personal satisfaction with services received may be guaged by the fact that I am still enrolling for new courses upon the completion of old ones.

Very truly yours,

EDWIN H. SHEPARD.

BURNHAM PUBLIC SCHOOLS,
Burnham, Pa., May 14, 1928.

DEAR MR. NELSON: Research University has given me such careful attention and service as a student that I should be unfaithful if I were not to write a few lines in its behalf. I am now pursuing five courses in this university, and the results are beyond my expectation. I am sorry for one thing, and that is that I did not enroll 10 years ago. The work is up to date, thorough, and practical—just the kind that a superintendent needs.

I have gained more permanent knowledge from these courses than I could have got from crowded classes in college in the same amount of time. I have increased the efficiency of my school system by the application of this knowledge. I am now closing out the tenth term here, and Research University has helped to make it the best one. I am sold to the idea that a man can advance best right in his own work, his schools being his laboratory.

* * * * * * *

Respectfully yours,

ELMER E. SIPE,
Supervising Principal.

ATLANTA THEOLOGICAL SEMINARY,
Atlanta, Ga., May 3, 1928.

MY DEAR SIR: In reply to your letter of April 30, I take pleasure in stating that I think Research University has a vital mission and is doing splendid work. The instruction and credit requirements are equal to and above those of many colleges, and the students are compelled to work harder than those attending the lecture rooms of many other institutions.

The credits are based on carefully safeguarded examinations, and even on residence and attendance at the university for those who desire degrees. I have no knowledge of anything that could be complained of that was or is being done by the president, faculty, or trustees. Doctor Rapeer is a man of sterling qualities.

The course leading to the degree of bachelor of arts, which I pursued in the above institution, has been very helpful to me, as since graduating I have received my LL. B. degree and am admitted to practice law in the highest courts in Kentucky and Georgia and am teaching history and Greek in the Atlanta Theological Seminary, Atlanta, Ga., and will get graduate standing here in a standard university for my A. B.

Without my course at Research University this would have been impossible, although previous to taking my course at Research University I graduated from the Theological Seminary of the Reformed Church, Lancaster, Pa.

* * * * * * *

This institution makes it possible for energetic men and women to complete their education who would otherwise forever be deprived of that privilege. Why deprive some of the most energetic and worthy men and women in the country, who are crying out for an opportunity of this privilege? Is education to be commercialized and only for the few? Congress certainly should safeguard this institution, the status of the degrees, certificates, and credits of its former and present students.

GEORGE A. EHRGOOD, *Instructor.*

ALEXANDER HIGH SCHOOL,
Alexander, N. Y., May 4, 1928.

DEAR SIR: It gives me pleasure to speak a good word for Research University. I have done work in this university by correspondence. I have also done work in two of the best universities in this State. I know that the instruction given by Doctor Rapeer is of a standard as high as given in those universities and that the work is more faithfully done than in one of those where the honor system prevails.

I have always heard Doctor Rapeer praised as an educator. He is considered one of the great educators of our country.

Very truly yours,

FRED H. BOWKER, *principal.*

NEW CASTLE SENIOR HIGH SCHOOL,
New Castle, Ind., May 5, 1928.

MY DEAR CONGRESSMAN NELSON: I am pleased to give to you my truthful opinion relative to legislation concerning the Research University. My experience has been that the university has offered work of a high quality and has required more than some that I have been privileged to know as a student.

The integrity of the executive officers of the Research University is perfect, to the best of my knowledge. I sincerely feel that this school is needed, inasmuch as it offers educational opportunities to many that otherwise could not afford to get them. By all means, protect and defend an institution with such motives.

Yours truly,

GLENN O. HARRELL.

WASHINGTON HIGH SCHOOL,
Milwaukee, May 4, 1928.

DEAR MR. NELSON:

* * * * * * *

Allow me to say that after having done both residence and correspondence college work that I believe firmly that the work done by the Research University is on the par if not above any work that I have done. This institution is far from a "diploma mill." I have found through personal experience that you are given credit for just the work you have done and all papers are very carefully credited. I have never found any of the officers and faculty anything but the highest grade of men.

I believe that there is a great need for such an institution as Research University. The United States has many men and women who are looking for high-grade college work who find themselves financially unable to leave their present locations to go to college. Research University is giving such men and women an opportunity to get the high grade of work without leaving home. This is being done with a great deal of sacrifice on the part of those in charge, and I should hate very much to see anything done which would jeopardize their work.

* * * * * * *

Very truly yours,

R. J. BLAIR.

SUPERINTENDENT OF SCHOOLS OF ALLAMAKEE COUNTY,
Waukon, Iowa, May 3, 1928.

DEAR MR. NELSON: I have your letter of inquiry concerning Research University, Washington, D. C. I am taking five courses in the Research University and find the work first class in every respect and ranking very high. The texts used are the same as the ones used in the University of Iowa and the University of Minnesota, and I suppose the other universities.

* * * * * * *

Very truly yours,

W. L. PECK,
Superintendent of Schools.

OLYPHANT, PA., *May 7, 1928.*

DEAR SIR: If I can in any way aid Research University my service will be gladly given.

The instruction given by Research I believe to be "of high standard and faithfully given." * * * The credits received must be earned and examinations are carefully safeguarded. * * * It appears eminently fitting that there should be at the National Capital an experimental university of the character of Research University.

I can write of Research only as I know it through my personal work, and this, performed by correspondence, has been most satisfactory and beneficial.

* * * * * * *

Sincerely yours,

FLORA B. DAVID.

NEW YORK EDUCATION CO.,
Albany, N. Y., May 5, 1928.

DEAR SIR: Your letter of April 20 regarding the standing and services rendered by Research University is hereby acknowledged. The writer has been in personal touch with its president, Dr. Louis W. Rapeer, during its entire history. When Doctor Rapeer was a student at Columbia University, taking a postgraduate course for his Ph. D. degree it was my privilege and pleasure to know him intimately, and I can testify to his splendid ability as a student and research worker. He has probably done more experimental and research work individually than 9 out of 10 persons who have won the Ph. D. degree.

* * * * * * *

From time to time I visited his institution at Washington; spent several days investigating; and observed closely the work that this institution was then doing, and had nothing but words of praise and commendation for the entire plan and program of work carried out. You will find in this article my own personal views, and nothing has taken place since that time either to change my own opinion or warrant in any way the discrediting of the high quality of work that this institution offers to those who desire to take advantage of it.

Indeed, I know of hardly a single educator who has had such a vision as Doctor Rapeer who pushed ahead in spite of criticism and almost insurmountable obstructions and in spite of all of the opposition has done a most creditable piece of work. I regard all of the instruction that I personally witnessed of a high standard and faithfully and well done.

* * * * * * *

I regard the credit requirements of the institution equal and in some respects above those of similar institutions.

Doctor Rapeer has been a most scientific worker for more than a score of years, has broadened the curriculum to meet the needs of a great variety of mature students, and many can, like myself, testify to the exceptional quality of the instruction offered, to the safeguarding of degrees by rigid examinations and to the large, personal value received from all courses of study regularly pursued and completed.

* * * * * * *

Respectfully yours,

C. W. BLESSING,
Principal Public School No. 5 and
Former Editor of American Education.

LAIE, OAHU, HAWAII, *May 15, 1928.*

DEAR CONGRESSMAN NELSON: Your letter of April 30 asking for my views concerning Research University is at hand. I take pleasure in saying that I have made great strides in my progress as a teacher and principal ever since I have taken a course from this institution and that I have received much valuable information and guidance as regard my profession from them in the past two years. The success of the instruction given by this institution and the standard they uphold and the integrity of the same, I believe, compare favorably with that of other recognized universities of our country.

I believe that we who are out in the world engaging in the professions need a university of this kind, from which we can take courses adapted to our needs, or at which we may work for higher degrees. Dr. Louis W. Rapeer, the president of this institution, has been of great help to me in giving me wise and pertinent counseling and instruction.

* * * * * * *

Very truly yours,

CLINTO J. KANAHELE,
Principal of Laie Elementary School.

WASHINGTON, *D. C., May 5, 1928.*

DEAR SIR:

* * * * * * *

I found each subject in which I was interested to be conducted nearer to a common-sense method of instruction and training than was to be found elsewhere in the city. The services offered by the university seemed to supply the needs of people who desired to educate themselves. I found the services of the institution to be all they were represented to me to be, and I believe superior to services of the kind I have observed elsewhere.

I believe that Research University is a very useful institution, and its service has been made available for many who would not otherwise get the equivalent elsewhere.

Yours very respectfully,

J. Y. BLAKELY.

NORWOOD, PA., *May 9, 1928.*

DEAR SIR:

* * * * * * *

In reply thereto you are advised that Research University is experimenting in a work that is invaluable to those who have the desire to continue their education, but who lack the time or financial resources to attend the modern daytime university. The type of man to whom this university appeals particularly is the professional man. He can continue his work and yet use his spare time to fit himself for a still higher place in his profession. I believe you will find the majority of students who attend or who have attended this university are of that type.

* * * The instruction is of a high standard, its credits are based on rigid examinations, and its degrees are zealously guarded. In fact, I attended the University of South Carolina and Georgetown University Law School and I found Research University up to the standard of these universities.

It is with regret that I see the present trend of the larger universities to attempt to regulate education, or at least, higher education, by discrediting night classes. It has been my experience that the man who labors nightly over his books after a long day of toil is the man who really appreciates the value of an education.

* * * * * * *

Yours truly,

EDWIN L. LAYTON.

PITMAN HIGH SCHOOL,
Pitman, N. J., May 3, 1928.

MY DEAR SIR: It is almost impossible for a school superintendent to find time to take the courses that he should take and at the same time keep the many details of his school work well done.

In the courses offered by Research University the busy superintendent makes his schools the laboratory for his courses. What plan can be more nearly ideal for real help for the superintendent in doing his best for the schools?

Lectures are not always very helpful. But the courses with Research University are always helpful. Every student must work.

I know of nothing more needed by the superintendent than the opportunity to advance by using courses, partly by correspondence and partly by residence work. The courses at Research are at once helpful in one's school work and interesting too.

I took residence work at Research last summer. The examinations given to me were most comprehensive.

In my dealing with the university I have found its officers to be exacting, but fair. The work which Research University is doing for superintendents is, I think, a real service. I am planning to take residence work at Research again next summer.

Respectfully,

DANIEL W. DAVIS,
Supervising Principal.

KAPAA SCHOOL,
Kapaa, Kauai, Hawaii, May 10, 1928.

DEAR SIR: Permit me to state that I am now taking extension work in that institution under Dr. L. W. Rapeer. I met Doctor Rapeer in Washington in 1925. I have studied under his directions for three years. I have found the work superior and, moreover, an opportunity. The work compares favorably with lecture courses in any school. The supervision is of a high standard and faithfully done. The credit requirements are as high as they are in any other institution granting degrees.

Let me state that I attended Tufts College, in Massachusetts, for two years. I have taken a number of correspondence courses. I have given extension courses here in Hawaii under the direction of the Territorial Normal School of Honolulu. I feel that credits obtained from Research University are based on carefully guarded examinations. * * *

* * * * * * *

Yours very respectfully,

GEORGE S. RAYMOND.

GAINESVILLE, TEX., *May 30, 1928.*

DEAR SIR: This is in answer to yours of April 30 requesting information in regard to work done in Research University.

I consider this school the equal of any of the leading universities when it comes to the question of high standards of work and credits. The same rules prevail as to examinations, residence, and correspondence as are required in any accredited university. The courses offered by Research University are carefully prepared and ably conducted. Anyone who is conscientious in his study and who puts forth the necessary energy can obtain a high-class education in Research University. Anyone who has failed to learn in Research University will fail to learn in any university. In all my study and in all my association with Research University I have never seen anything that was in any way underhanded.

In my correspondence and in my residence work Doctor Rapeer was always kind, considerate, fair, and just in all his dealings with me. I have no knowledge and no reason whatever to believe that Doctor Rapeer or anyone connected with Research University has ever given cause for public complaint. I have no fault to find but much to commend.

I think that Research University fills a great public need. And I as one of its graduates feel that Congress should get behind this school and give it the moral and financial support it so justly deserves. Congress lends aid and prestige to many things of minor importance; now it can render a real service to every citizen by rallying to the call of Research University in its time of trial.

Wishing you success, I am,

Yours truly,

MRS. NELL M. COLE.

RESEARCH UNIVERSITY BLAZING A TRAIL

N. J. Quickstad, A. B., superintendent of schools, Mountain Iron, Minn.:

"I sincerely believe that the work that Research University is doing is of a very valuable sort, and is blazing a trail that will some day be followed by other institutions. The work that I have come in contact with in connection with the institution has been well organized and has been inspiring to one in the educational field. I believe that credits are based on carefully safeguarded examinations, and residence and attendance in Washington is required for degrees."

A. D. Horton, M. A., superintendent of schools, Weston, W. Va.:

"My impression is that the work is very thorough. From what I can see the credit requirements are as high as those of other schools with which I am familiar."

"As to the needs of such a school, I should state that there is a strong tendency to have our education familiarized into 'hours.' Research University is doing a good work in embodying definite attainments rather than length of time as the basis of crediting."

Claude M. Beitler, A. B., superintendent of schools, Cardington, Ohio:

"Doctor Rapeer in my opinion is offering a great opportunity for advancement to those who can afford neither time nor money to attend our other type of institution. I expect to continue my work toward an M. Ed. degree, which it would be impossible for me to obtain otherwise except by correspondence. I have been in touch with others who have completed courses under Doctor Rapeer, and they have been enthusiastic in commending work done and benefits received.

"As many of our State institutions are offering courses by correspondence, I can see no reason why Research University should be discriminated against. I feel quite sure that upon careful investigation you will find this work to be of high order and should be encouraged.

"An institution of this kind is a boon to many who have not had an opportunity to complete their college work or who would like to take advanced work and are unable to do so.

"I am a college graduate, and feel that the work offered here compares favorably with that I have taken in college. The standards are sufficiently high that one must do work of a high quality in order to meet their requirements."

CREDIT GIVEN AT FLAGSTAFF TEACHERS' COLLEGE

Miss May Hall, instructor, North Arizona State Teachers' College, Flagstaff, Ariz.:

"I will say, too, that my work at Research has been more difficult and inclusive than some work I have taken at other colleges. Their examinations are conducted in the same manner as other universities giving correspondence courses, and, of course, they do not grant degrees without the standard number of credits and without residence work, as well I know. At least, I was unable to get a degree there because I could not go for my residence work.

"I look forward to study at the Nation's Capital—and I'm all for Research. It has proved itself to be a fair and human institution of learning, one whose good works should be carefully guarded."

Walter B. Zimmerman, chaplain (captain), United States Army, Fort Bragg, N. C.:

"Because of my heavy duties the method of Research University is the only one which permits me to do the work I have in mind. I believe this institution has the facilities to direct this type of work in a successful manner. At least, my experiences have been satisfactory.

"Specifically answering your questions, I should say that the instruction is of high standard and faithfully done; that it compares favorably with that given by lecture methods and other methods for adult students who are mature in their thinking processes."

SUPERIOR TRAINING IN EDUCATIONAL RESEARCH

Carl Cotton, A. B. (Colby), LL. M. (University of Maine), Ed. M. (Harvard), superintendent of schools, Derry, N. H.:

"Last fall I had a problem concerning my local school system which I wished to solve. I found that a number of courses in research would be necessary in order for me to qualify myself in the technique of research work, as I had previously had only the equivalent of a three weeks' course in this work. A New Hampshire superintendent who had previously done work in Doctor Rapeer's department at Pennsylvania State College spoke to me favorably about him. I found some circulars descriptive of the work at Research University, and enrolled in some of the courses offered. I have been carrying on these courses all winter in my spare moments.

"The courses I am taking are more motor than the customary college lectures. I have averaged 20 to 30 typewritten pages per week during the past fall and winter. The authors of these courses have a very adroit way of questioning the student in such a manner that the problems pertaining to the courses have to be answered fully.

"The educational philosophy on which Doctor Rapeer bases these courses is the best I have ever read. The student is led to the proper sources of authority and guided in the selection of the best educational literature that is productive of a philosophy that is sensible and worthy of a wider application in modern educational practice. As a guide to this type of reading, the course has saved me many months of aimless search among the educational philosophers. It was just what I had been seeking.

"I believe that there is a real need for just such courses as these for field workers in education everywhere. I found the courses in Research quite difficult. They would be of little value to one who has no need of them. A student must have had a number of substantial courses in education in order to do this work and profit by it."

* * * * * * *

Glen O. Chenoweth, principal of schools, Lynn, Ind.:

"Permit me to say that the instruction of the school [Research University] is of high standard and faithfully done. The courses of instruction that I took from the university aided me more in my teaching work than that from other schools." * * *

MORE THAN FROM FIVE UNIVERSITIES

L. J. Belt, superintendent of schools, Wheatland, Wyo.:

"I really do not know very much about Research University, as I have only been taking one course and that is not finished yet. There is one thing that I do know, however, and that is that the courses are unusually well organized, that the questions are very searching, yet very interesting, and that working out the questions and assignments certainly develops thought power and results in mental development. I have attended day classes in five universities and colleges, and can truthfully say that the course I am taking from Research University gives me more of a conscious feeling of accomplishing something than almost any course I ever took."

GOOD WORK FOR PASTORS

Louis H. Losch, minister, Main Street Baptist Church, Oneonta, N. Y.:

"Relative to Research University, I should say that I have investigated same very thoroughly. * * * I have personally met Doctor Rapeer, president of the institution, and am very much impressed with his earnestness and his honest endeavor to make the courses in his institution of proper standing. * * * I am personally acquainted with those who have taken work there and know them to be very much satisfied with the standard of work." * * *

Rev. John E. Jackson, Castle Shannon, Pa.:

"The textbooks used are the latest and best. Suggestions are given as to the best methods of studying each subject. Correction of lessons

is faithfully done, and the suggestions and criticisms are very helpful to the student.

"The instruction of this university is distinctly individual; thus the faulty methods of each student are corrected. Anything which is not understood by the student is explained.

"Each lesson assignment must be worked out by the student and sent to the instructor for correction and criticism; thus there is no possibility of any evading of actual work and study, as is the case where the lecture method is used. * * *

"The wholesale methods of instruction used in many of our colleges can not be compared with carefully supervised home-study work for thoroughness."

"The past work of Research University for adult students throughout the Nation is sufficient justification for its continuance, and a distinct loss would result if this work were discontinued. Personally I am very much indebted to Research University for its part in leading me out into a wider knowledge in the field of religious education and assisting me to broaden my vision in this aspect of religious work."

Miss Mary C. Learn, Farner Apartments 5, Burlington, N. J.:

"I have done work in the teaching of mathematics by correspondence and I know I was required to use the best text and that all in all I gained just as much as I would have by attending in residence. The examination was very stiff. I began two other courses which were so heavy I couldn't go on with them with my other schoolroom duties. I think that I say a sufficient amount for that type of work and the credit the individual student deserves."

WILL ATTEND THIS SUMMER IN RESIDENCE

R. Carley, superintendent of schools, Sparta, Ill.:

"I have done a number of courses through correspondence in such universities as Chicago University. I find the work offered by the Research institution more searching and difficult of accomplishment than that of the class of schools mentioned.

"Research University is doing a much-needed service in advanced education and stands foursquare with any school within my knowledge doing a similar work.

"The fact that both Mrs. Carley and myself are coming for study to this institution June, July, and August of the present summer will give you my personal reaction as to the merit and integrity of this school."

* * * * * * *

Floyd Baggett, Marion, Ill.:

"Although I have never had any work from the university, I know that it fills a long-felt need for such schoolmen as myself—those that can not attend classes, but desire to increase their ability and training by correspondence.

"I should like to see Research University continue, as I want to take a course of training and because I feel it is doing a wonderful work!"

IT SAVES THOSE WHO DESERVE SAVING

Prof. Theo. W. Knote, head of the department of business administration, Virginia Polytechnic Institute, Blacksburg, Va.:

"Research University requires work in residence and examinations in residence before degrees are granted; and I think they are filling a need, especially for those at a distance who are unable to leave home on account of obligations there. It makes getting a degree possible for these men who would be prevented from getting it if they had to give up everything until they could spend a year or two in a large university."

"I look upon instruction by correspondence as one of the most wonderful developments of the age; and since the University of Chicago, Columbia, and other great universities give instruction and allow college credit for this kind of work, it certainly is sound. You can not push anyone up a ladder unless he is willing to climb a little himself, so the man worth while will get as much out of this long-range method as he will by a more direct method. * * *"

O. S. Amsler, principal, high school, Decatur, Ga.:

"In regard to his [Doctor Rapeer's] letter on my entrance requirements and subsequent work to obtain a doctor's degree at Research, there is nothing short of the well-arranged and well-directed work of other colleges. These requirements seem to be on an equal basis with those of other institutions of similar standing with which I am familiar."

* * * * * * *

Raymond L. Cortner, pastor First United Brethren Church, Berthoud, Colo.:

"It is my opinion that the universities doing correspondence work are of real value to the Nation. There are many people who would not receive higher education were it not for their services. I should say that the standard of instruction is reasonably high and is faithfully done, comparing very favorably with instruction given in other institutions.

"All but a few hours of my university work were done in residence, but since graduating I have taken some courses by correspondence from State universities and others, and I feel that the above statements are not overestimated.

E. G. Faulhaber, 622 West One hundred and seventy-ninth Street, New York City:

"This institution [Research University] is better than other institutions of its nearest kind. It brings out the facts to the students clearer, also the learning is of broader and longer study. The credits are more extensive and I believe they are above other colleges due to the fact the work is of larger volume."

"I firmly believe that in time to come when more people know of Research University, especially the poorer type, or I might say the people that have little means of financial help, that this institution will be overcrowded, as the people will then know the actual value of such a college."

Mrs. M. Rose Smith, Route 2, Castorland, N. Y.:

"I think that the university at Washington, D. C. [Research University], is doing meritorious work and helps one to rise professionally. * * * The credit requirements will equal those of our universities in New York State. I haven't completed my course in history * * *, but if the examinations are given by our superintendent of schools I do not think they could be anything but well safeguarded."

* * * * * * *

SURPRISED THAT ANYONE GETS THROUGH

H. D. Vincent, A. M., principal School 16, Troy, N. Y.:

"As to the nature of the course of instruction in this institution [Research University] I do not hesitate to say that it is of a very high order. I have three degrees earned elsewhere, and I know what work is like. The big criticism I have to offer in regard to Research University is that it requires so much that the wonder is that anybody ever finishes.

"The instruction surpasses in certain respects that done by the lecture method. * * * The student in a large class may get along without any preparation generally. He trusts to luck to pass the final. By the correspondence method he must do all of every lesson. Credit requirements are more rigid than in the ordinary college."

Miss Edna M. Davis, 18 West Cottage Avenue, Haddonfield, N. J.:

"I laid my previous training before President Rapeer and told him what I hoped to do. He planned a curriculum for me that he thought would fit my needs, and I enrolled and enthusiastically followed his helpful guidance. I was employed during the day, and had only my evenings to devote to my studies. When I had a little of real study I was too impatient to wait for a slow, night course, and stopped and went to Temple University, where I am now a student."

"The grades on my papers were always the same [B] and the instructors' comments highly flattering, as I felt. But since I have attended Temple I am more and more convinced that Research University marked on a par with other institutions as my marks are at the top of the class at Temple."

Miss Gladys Stein, 2202 Raspberry Street, Erie, Pa.:

"In answer to your letter concerning Research University I will say that I found the lessons sent out by this university to be very thorough and carefully worked out.

"I am a graduate of the Pennsylvania College of Music and of the New England Conservatory of Music, and I have found the work sent out by Research University to be of the same high standard as of these other schools."

Russell Colbert, Washington, Ind.:

"In my judgment, Congress should give every possible encouragement to Research University, of Washington, D. C. Any act which would restrict the work of this university in any way would be a serious mistake.

"Please do your utmost to prevent any unwise legislation along this line."

* * * * * * *

C. Louis Knight, Wharton School of Finance and Commerce, University of Pennsylvania, Philadelphia, Pa.:

"I should be inclined to oppose any legislation which purports to bring institutions of higher education under the control of a board of education. The fact that the personnel of such boards is often affected by political considerations, while, on the other hand, it is socially desirable that institutions of higher learning should be unhampered in their conduct by politics, makes such legislation highly dangerous and of the sort that should be vigorously opposed."

W. P. Clark, commercial department, high school, Point Pleasant, W. Va.:

"I have had no courses in this [Research] University. * * * I had some correspondence with President Rapeer several years ago relative to a course. * * * As far as I can judge, their program is an excellent one. * * * I do think the work of this university should be not hindered but fostered."

* * * * * * *

NO COMPLAINTS TO FEDERAL TRADE COMMISSION

John S. Biggs, Federal Trade Commission, Washington, D. C.:

"I am not sufficiently familiar with the work in the correspondence courses to state any facts or to express any views in regard to them, but the Federal Trade Commission has had frequent complaints against correspondence schools, and I was informed to-day by the legal division that no complaint has ever been filed against Research University. The division of trade practice conferences also informs me that Research

is one of the signers of an agreement as to trade practices by correspondence schools which has the approval of the commission."

Daniel B. Feyan, 1220 I Street NW., Washington, D. C.:

"My connection with this institution [Research University] embraced a two years' night course in a class of public speaking. The instruction rendered in this class and in other classes I observed was efficient, inspiring, and on a par with that of other institutions I formerly attended.

"I did not take any subjects taught by correspondence, although I heard the correspondence courses highly commended by people familiar with them.

"I strongly approve your endeavor to safeguard the credits and certificates obtained by former students of this school. I know from experience that the institution was attended by many capable, industrious students, whose painstaking efforts entitle them to proper recognition in the business and educational world."

"While the law should require efficient and well-organized schools and colleges in the District of Columbia, it is not to be taken for granted that they can not function without a large faculty and five or ten thousand students. Institutions of learning with small attendance but controlled by able teachers can achieve highly satisfactory results, and the legislation now pending in Congress should be governed by this consideration."

H. H. Harlan, A. B., Washington, D. C.:

"I consider the instruction given at this [Research] University of a high standard, faithfully done. I pursued also some correspondence work in accountancy, and the same high standard set for resident work was maintained in the correspondence work. I was compelled to take examination before some one selected, and he made statement that I received no assistance during the examination. The credit requirements are the equal of other institutions with which I am familiar. I attended the National University and received the degree of LL. M. The requirements in the work at the Research University along the line of the courses I studied were as exacting as the National University."

J. G. Willier, A. M., Odebolt, Iowa:

"While I was a student at Research University, in 1921–22, I found the work quite satisfactory and equal to that given in other colleges which I have attended. Appropriate tests and examinations were given, and I was required to earn the same amount of credit for a master's degree that had been asked of me at American University, which institution is regarded as being in good standing. I consider Research University as being worthy of being protected by appropriate legislation."

HIGH-CLASS PIONEERING

Frank Cushman, 200 New Jersey Avenue, Washington, D. C., Federal Board for Vocational Education:

"During the school year, 1922–23, I took a full program of work there [at Research University], attending classes five evenings per week for the full year.

"The general purpose of the institution made a very strong appeal to me. It seemed to me that Doctor Rapeer was a very progressive, forward-looking educator, who was not afraid to put into practice many new ideas in education which many college and university men were prevented, by academic traditions, from adopting, even though they personally believed in them.

"I am of the opinion that Research University at the time of my connection with it was a reputable institution and that it was meeting a real need in the field of higher education in Washington. I regarded Doctor Rapeer as an earnest, scholarly, and capable man. I know that I received real value from the courses in psychology and mental tests and measurements which I took under him as instructor. Another instructor for whom I had great respect and from whom I received instruction of great value to me was John O. Hall, Ph. D. (Columbia). The courses which I took in economics, sociology, statistical methods, psychology, etc., all called for attendance at lectures and recitations as well as class discussion, outside study, and written work. Doctor Hall and Doctor Rapeer were the two instructors under whom I did most of my work, but I had occasion to meet other instructors during the year and all of them impressed me as being men of a high type who knew their subjects."

Joseph A. d'Alessio, M. S., 29 Hollywood Avenue, Trenton, N. J.:

"The instruction given at Research University during the time I undertook their courses was of high standard and was all faithfully taught. The instruction, compared with that usually given by other colleges, is equal and, I personally believe, more educational and practical.

"The credit requirements are equal to those universities to which I have applied and matriculated. The credits are not only based on carefully safeguarded examinations but on attendance, class work, and research. Their courses have been a great service to me. I know their instruction is of the greatest usefulness to the teaching profession and our country."

"I wish I had more time to state just how Research trains its pupils—that its methods equal those I have undertaken in other colleges, and, furthermore, that the night classes at Research are as faithfully conducted as the day sessions of the recognized universities."

A GREAT CONTRIBUTION

Miss Alice M. Hopkins, A. B., 215 Whitney Avenue, New Haven, Conn.:

"I was a student in this university [Research] from its opening until 1922, a period of nearly three years, and I am glad to be able to say that during this time the professors and instructors were all experts in their lines, and the instruction given was of high grade, equal to any I have since received in such universities as Columbia and in the teachers' courses offered at Yale University."

"I feel that Doctor Rapeer's idea of a cooperative university, with an opportunity for everyone to get the education needed to advance him in his life work at such hours and on such terms as would enable him to take advantage of it, is a great contribution in the field of experimental education for adults."

Miss Willie O. Denson, 1245 Shepherd Street NW., Washington, D. C.:

"I have had both correspondence work and work in the night classes of this school [Research University], and I consider that I have been greatly benefited thereby. The instruction is of high standard, and the instructors are conscientious and faithful. As far as I know, the credit requirements are about the same as other universities. In order to obtain a degree a student is required to do some residence work."

* * * * * * *

Herbert F. Mitchell, Riverdale, Md.:

"I was for a time an instructor in mathematics in that school [Research University]. I should say that so far as I could see Doctor Rapeer was a faithful and tireless worker. * * * It seems to me that the work would measure up to the standard of George Washington University."

UNJUST TO DISCREDIT GRADUATES

Miss Elder Preston Summers, A. M., Washington, D. C.:

"I attended Research University during the session 1921–22, receiving the degree of master of arts. Previously I graduated with the degree of bachelor of arts from a Virginia college and George Washington University. * * * While at Research University I was instructed by an unusually well-trained faculty and did not observe anything which would be a discredit to the institution."

"The president, Doctor Rapeer, holds his degree of doctor of philosophy from Columbia University and is a noted educator and author. I believe that this criticism is due to competition among the students and faculties of the Catholic universities and others.

"I sincerely hope that the great injustice of discrediting the institution will not have to be borne by the hundreds of innocent and ambitious students who not only have spent their time but money in this school for the last 10 years. In this case they will make the greatest sacrifice, and it seems unreasonable that the law should have to take 10 years to uncover this error."

Paul Wernicke, Ph. D., 3600 South Dakota Avenue, Washington, D. C.:

"My connection with Research University, with regard to the standing of which you are inquiring, has been limited to teaching in their evening classes during the years 1921 to 1924.

"My classes were small ones in analytic geometry and calculus. The students were, on the whole, well qualified to take these subjects, and made good progress. They were put through regular collegiate examinations and graded according to standards of recognized schools, as, e. g., the engineering department of Washington University, St. Louis, where I formerly taught.

"Naturally, I did not become very thoroughly acquainted with the way in which the other work was conducted, but I was distinctly impressed with the ability and painstaking conscientiousness of the faculty. I should not hesitate a moment to declare them thoroughly competent to teach the collegiate and university subjects that were assigned to them and to turn out as well-prepared graduates as the average institution claiming a similar standard."

Mary J. Beers, 1739 I Street NW., Washington, D. C.:

"The instruction which I received at Research University was of a high standard, faithfully given, and most helpful.

"I took a course in short-story writing, and if I ever write anything worth while it will be due to the inspirations received from Doctor Rapeer."

* * * * * * *

EXCELLENT BUSINESS PREPARATION

J. Chris Wood, Treasury Department, 802 Chamber of Commerce Building, Pittsburgh, Pa.:

"I am glad to have the opportunity to tell you of my work at Research University and to express my hearty indorsement of the steps you have taken in its behalf.

"I completed a course in business administration in evening classes in this school. I have attended six different schools of college and university grade, due to residence in various parts of the country. In three of these schools I took university courses in evenings, and I believe that I am qualified by experience and the opportunities of comparison to say that the instruction at Research University and the credit requirements there are equal to those of other standard schools with

'accredited' standing. Examinations are conducted with care and integrity.

"The instructors whom I met there had previously taught in other universities, and were capable, conscientious men, taking pride in their work."

"It would seem manifestly unfair to permit certain interests, by the proposed bill, thus indirectly to penalize the men and women who have expended time, effort, and money in pursuit of an education and to whom only evening classes are available. Putting obstacles in the way of honest effort toward self-improvement and nullifying past achievements is not constructive or beneficial legislation."

* * * * * * *

Robert C. Hillsdale, attorney at law, 16 East Forty-third Street, New York City:

"I am personally acquainted with Doctor Rapeer by reason of the fact that I have had professional relations with him and was also an instructor in business law in his institution several years ago. I certainly do think that we should not suffer honest efforts along the lines of this institution to be destroyed in any such attack as you indicate."

L. R. Turner, 2910 Eighteenth Street NW., Washington, D. C.:

"The course [accounting] required hard study, and the instructors gave us nothing we did not earn. This can be proved by the fact that only a few graduated compared with the large number who enrolled.

"I never took any correspondence courses from the school, so could not say anything about that side of the school's work, but I could not bring myself to think that Research University maintained a double standard of requirements."

Miss Elizabeth Hoke, 3611 Fourteenth Street NW., Washington, D. C.:

"I took a late afternoon class in short-story writing and found the class, the hour, and the ground covered very much to my liking. The instruction was of a high standard and faithfully done. The course was varied and was made extremely interesting; more, it was inspiring. Doctor Rapeer's range is so wide that it is a privilege to hear his lectures."

OLD COLLEGES TROUBLED IT

E. L. Sechrist, A. B., associate apiculturist, Bureau of Entomology, United States Department of Agriculture, Washington, D. C.:

"I am glad to have the opportunity of saying a word in behalf of Research University, from which I received a bachelor's degree in 1921–22. I had done more than two years of college work previous to coming to Washington in 1917. Finding it worth while, even at the age of 50, to continue the work, I did evening work at Research, choosing it because of its convenience for me.

"The instructors were excellent and the work all that could be desired. * * * All the instruction I received there was of high standard and faithfully done. * * * Doctor Rapeer has had a difficult task. The idea, I am certain, is excellent. And it gave excellent instruction to those whose time and means made it difficult for them to carry on work at schools of regular character. Being such a school—that is, carried on along cooperative lines—the old-line colleges did all in their power to discredit it and make trouble for it, so that Doctor Rapeer had difficulties that were unjust. * * *

* * * * * * *

WORKED FOR TUITION

Miss Helen R. Hegarty, 5112 Connecticut Avenue, Washington, D. C.:

"I was a student at Research University only for a short time * * * during which time I was given tuition in exchange for secretarial work done for Doctor Rapeer. * * * I should say that the instruction was of a high standard. In comparison with lecture and other methods employed in colleges, its system is peculiarly adapted to the class of persons attending Research University—that is, adults pursuing a vocation in the day and endeavoring to further their education in the evening. * * * The credit requirements, so far as I was able to observe, are equal to these of other institutions, are based on careful examinations, and for candidates for degrees on residence and attendance here. * * * I do think Research University fills a need well met for those who are striving to obtain higher education while necessarily employed in the day."

Miss Laura E. Ferguson, A. B., apartment 18, 1345 Taylor Street, San Francisco, Calif.:

"It is a pleasure to inform you that in June, 1924, I was granted an A. B. degree from that institution [Research University]. I was then a resident of Washington, D. C., and personally attended all classes.

"I considered the instruction of extraordinarily high standard, comparing most favorably with that received in other universities. The credit requirements were equal to those of other institutions which I had attended. Credits were based on carefully safeguarded examinations."

* * * * * * *

STRONG WORDS FROM FOUNDERS

L. H. Weir, director National Study of Municipal and County Parks, 315 Fourth Avenue, New York City:

"In the beginning of this institution, back in 1919–20, I served on the original board of governors up to a time I had to reside in the far West, when I resigned. I was deeply interested in the project of President Rapeer and felt very strongly at the time that there was a real need for such an institution, and the fact that it has been in continuous existence since then, serving large numbers of people, confirms my judgment of the importance of its founding."

"Aside from the question of the work of this university, however, it appeals to me to be a very strange proceeding, indeed, to think of placing the licensing of incorporated schools, especially higher institutions of learning, under the control of the local Board of Education, which is primarily concerned with primary and secondary education.

"I regret exceedingly that I am not familiar enough with the actual work of the university during the past eight years to answer your questions, but I sincerely hope that nothing will be done to jeopardize its existence."

Edson L. Whitney, Ph. D., LL. D., 3411 Oakwood Terrace, Washington, D. C.:

"Relative to your letter of inquiry concerning Research University, I drew up the charter, or articles of association, forming that institution, and for two years was the secretary of its board of trustees, dean of graduate students, and an instructor in the institution. During the first year I served without pay and during the second year nearly so. Among the first board of trustees were an officer of the W. C. C. S., the director of one of the bureaus of the Department of Commerce, and a man who shortly afterwards became president of the Board of Education of the District of Columbia. The other trustees were equally as honorable, though not so well known, one being a prominent member of the Bureau of Standards, another a woman educator of the city, besides Doctor Rapeer, a graduate of the Universities of Chicago, Minnesota, and Columbia, and myself, a Harvard Ph. D.

"I am well acquainted with Mr. Tufts, who is probably more responsible for the introduction of the bill to regulate colleges than anyone outside of Congress. I have talked with him several times on this subject. I agree with him that 'diploma mills' should be closed, but I protest against closing an institution because it is new or poor or does not have an endowment or a library or scientific apparatus, when those behind the movement are working honestly in the interest of higher education. Degrees should represent a certain standard and should not be given for mere attendance. There are universities in this country and in Europe that are mere examining institutions and give degrees on the completion of satisfactory work, and I have yet to hear degrees thus granted by the University of London or the University of the State of New York questioned by anyone."

"As to putting the control of new institutions into the hands of the Board of Education, that seems improper. I have heard that not long ago a high officer of one university, a wife of an official of a second university, and a person closely connected with a third university of this city sat on the Board of Education here. I have heard it said that the board is dominated by the universities here. Under those circumstances it would seem a hard thing to place a candidate for the right to grant degrees in the hands of such a board."

Samuel Henri Con'e, Ph. D., Villa Monteray, Wilmington, Del.:

"I am in receipt of your letter of April 30, and it is a pleasure to answer the question you ask:

"'Are the credit requirements equal to or above those of the institutions with which you are familiar?'

"The credit requirements of Research University are equal to any institution I have ever attended, and its requirement for degree work is above any institution I have ever attended."

A. J. Pacini, director Pacini Laboratories, 9 South Clinton Street, Chicago, Ill.:

"A more thorough form of instruction has never in my experience been presented by any university with which I am familiar."

Ethel Hayes Gilbertson, Washington, D. C.:

"I am glad indeed for this opportunity of speaking a word in behalf of Research University. I wish that I were able to express all that the privilege of attending Research University has meant to me, culturally and materially. I consider that privilege one of the most worth while in my life."

Basile G. d'Ouakil, professor of French literature, Fordham University, N. Y.:

"I can speak with but the greatest respect and esteem of the men who composed the faculty of Research University."

Mrs. Mary C. Wadkins, B. Ed., tobacco experiment station, 205 North Adams Street, Quincy, Fla.:

"I wish to say that I am heartily in favor of any legislation that will safeguard Research University, its faculty, officers, and past and present students. I have found it a very high-class institution and one doing a most unique and wonderful service. The Nation's Capital is, indeed, in need of one experimental school in higher education. Let Research stand and do its bit for the great teaching profession and the Nation.

"I have found the work at Research of the very highest class. The instruction was of the best and ranks well with the Alabama Polytechnic Institute, Auburn, Ala. I am familiar with this institution.

"My examinations at Research were carefully given, and I took them within the institution. I am holding a degree in education. My record will show my residence work there, which safeguards my credits. From the above, you may know that I have no criticism for Research, its president, registrar, trustees, or officers."

"It is my wish that Research may yet become a greater institution and rank with the best without question. I am willing to do my bit to make it so."

Fernely Britt, Olmsted, Ill.:

"I wish to say that my work with Research University has been satisfactory. * * * They are more strict about their subjects than any other school I have taken work with * * *."

James B. Howell, Cedarville, N. J.:

"The way Research University conducts its correspondence courses is better than any other that I have heard of, and I can see no reason why its diplomas are not as good as those of resident universities. I have taken resident courses and correspondence courses, and wish to say that the correspondence courses are a necessity and their value can not be estimated nor realized. The cost of correspondence courses should be kept as low as possible, because the student who takes a correspondence course is not usually supplied with cash or he would attend a resident college. The diplomas should be as nearly equal as possible; anyone who is attaining practical knowledge with theoretical knowledge is attaining more than one who is only attaining either practical or theoretical knowledge. * * *"

J. E. Birch, Willows, Calif.:

"From what dealings I have had with it [Research University] I feel that it is deserving of much credit and is performing a real service to many who are striving for higher education. So far as I am able to judge, the requirements of Research University are as high as those of any other school I have had work with."

C. L. Muir, 1628 Clackames Street, Portland, Oreg.:

"I feel that the work is superior in many respects to classroom and lecture methods and is carefully and faithfully carried out on the part of the school * * *. The methods of examining correspondence students are exactly the same as those of the University of Oregon and Washington."

"I hold Doctor Rapeer in high esteem, both personally and professionally. As a teacher he is second to none; and the memories of his able lectures are still vivid in my mind. His school certainly deserves the support of all broad-minded men."

William O. Melvin, superintendent Lordstown Centralized Schools, Warren Ohio:

"I have attended three of the great universities of our land, namely, Ohio University, the University of Cincinnati, and the University of Colorado. I consider the instruction given by Research University absolutely on a par with these; and I have found Research University even more exacting in the preparation of lessons."

Maude R. Cavanagh, Ph. D., Rockford, Ill.:

"Your letter of April 30 has just reached me, and I hasten to thank you for your interest in Research University.

"I studied there for over four years, and consider the instruction I received of high character and the requirements as rigid as those in other schools of graduate rank. The credits I gained there were based on written and oral examinations conducted as examinations usually are in colleges. I resided in Washington during my years at Research, and know of no disregard of the rule of residence."

LEAVE TO ADDRESS THE HOUSE

Mr. O'CONNOR of New York. Mr. Speaker, I ask unanimous consent that at the conclusion of the special order to-day, I may be permitted to address the House for five minutes.

The SPEAKER. Is there objection?

Mr. KNUTSON. Mr. Speaker, reserving the right to object, on what subject?

Mr. O'CONNOR of New York. On the Dale retirement bill.

The SPEAKER. Is there objection?

There was no objection.

PRESERVATION OF FISHERIES

Mr. WHITE of Maine. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 13383) to provide for a five-year construction and maintenance program for the United States Bureau of Fisheries, with a Senate amendment thereto, and agree to the Senate amendment.

The SPEAKER. The gentleman from Maine asks unanimous consent to take from the Speaker's table the bill H. R. 13383, with a Senate amendment thereto, and agree to the Senate amendment.

The Clerk will report the bill and the Senate amendment.

The Clerk read the title of the bill and the Senate amendment.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

GREAT FALLS OF THE POTOMAC

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent for the present consideration of House Joint Resolution 307, to preserve for development the potential water power and park facilities of the gorge and Great Falls of the Potomac River, which I send to the desk and ask to have read.

The Clerk read as follows:

That in order to preserve for development, in whatever manner Congress may ultimately find most desirable, the natural resources in water, potential water power, and park and recreational facilities afforded by the falls and gorge of the Potomac River near the National Capital, the Federal Power Commission be, and hereby is, authorized and directed to refuse to issue any permit, preliminary or final, to any private interest for the development of water power in the Potomac River between the mouth of Rock Creek and a point 4 miles upstream from the present intake for the water supply of Washington, until further action of Congress, after consideration of such joint report or separate reports as may be made by the National Capital Park and Planning Commission and the Federal Power Commission as to the best utilization of the said area for the public benefit.

With the following committee amendments:

Page 1, line 8, strike out the words "authorized and," and in line 9 strike out the words "to refuse" and insert the word "not."

The SPEAKER. Is there objection?

Mr. SNELL. Mr. Speaker, reserving the right to object, will the gentleman explain the resolution.

Mr. CRAMTON. Mr. Speaker, the only purpose of this resolution is to hold the Potomac situation in statu quo until Congress decides what to do with the gorge and Great Falls of the Potomac, either as to park development or the development of water power. This resolution asks the Water Power Commission to hold the whole in abeyance.

Mr. EDWARDS. From what committee does this come?

Mr. CRAMTON. It comes unanimously from the Committee on the District of Columbia.

Mr. TILSON. And there is some danger of permits being granted in respect to it?

Mr. CRAMTON. There is pending an application for a permit that would endanger the situation for park development in which I am chiefly interested.

Mr. MOORE of Virginia. I understand that this resolution, if adopted, would not interfere with the construction of a bridge?

Mr. CRAMTON. It does not. It is only directed to the power commission.

Mr. LAGUARDIA. The gentleman from Michigan is very alert in these matters. This should be the first step in the direction of providing that the Federal Power Commission shall grant no licenses until a survey shall be made of the whole country and the potential power ascertained.

Mr. CRAMTON. I do not ask for that this morning.

Mr. LAGUARDIA. I wish you did.

The SPEAKER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The House joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

FARM RELIEF

Mr. DOUGHTON. Mr. Speaker, I ask unanimous consent that my colleague, Mr. HAMMER, may extend his remarks in the RECORD by printing his own letter written on the subject of farm relief.

The SPEAKER. Is there objection?

There was no objection.

Mr. HAMMER. Mr. Speaker, under the permission to extend remarks in the RECORD, I include the following letter in reply to Prof. J. L. Burgess, botanist, North Carolina Department of Agriculture, Raleigh, N. C.

I have known Professor Burgess many years. He is not only one of the State's profoundest scholars in his profession, but is also a sincere, conscientious friend of the farmer. I regret to disagree with him.

The following is my reply to his letter, which is not herewith inserted for the reason that under the rules of the House I am not permitted to do so. Statement of my position in reply to Professor Burgess:

Prof. J. L. BURGESS,
Botanist, North Carolina Department of Agriculture,
Raleigh, N. C.

DEAR SIR: I have read your letter of April 26 inclosing a copy of your letter of April 4 to Senator BROOKHART very carefully and after giving them mature consideration I am convinced that your objections

to the McNary-Haugen bill are based on misinformation and misconceptions, not only concerning the purposes of the bill and its plan of operations but also as to the actual provisions included in the text of the measure. For your information I am inclosing a copy of the bill in the final form reported to the House of Representatives by the Committee on Agriculture, together with a copy of a report of the Agricultural Committee and speeches which I made last year. I also made a speech on farm relief the year before. I do want to call your attention, however, to some of the misconceptions concerning this legislation which are contained in your letters.

You said that it "does not promise the farmer any relief" and that "the only beneficiaries of the bill are the middlemen and the manufacturers that use farm products." To read the bill is sufficient to show that the whole measure is plainly drafted for the benefit primarily of the farmers. The very first section, which declares the policy of Congress in this legislation, is all directed primarily to the good of agriculture. The purpose of Congress is declared to be to preserve advantageous markets, to prevent undue price depression of farm products, to minimize speculation and waste in marketing, to further the organization of producers, etc.

Section 3 of the bill requires the Federal Farm Board in mandatory language to keep advised concerning "crop prices, prospects, supply and demand at home and abroad, etc.," in order that it may advise producers concerning the production, distribution, and marketing of any farm commodity "in order that they may secure the maximum benefits under this act." A still further mandate is placed on the board to advise producers concerning development of suitable plans of planting and breeding "so that burdensome crop surpluses may be avoided or minimized, in order that they may secure such benefits." It is the producer who will receive the maximum benefits of this legislation. That is a clear statement of purpose written into the act itself again and again. It is a well-established legal principle that the courts in interpreting an act give prime consideration to the intent and purpose declared in such act. Hence, the board may be restrained in the courts from violation of these purposes.

Section 4 requires the board to set up an advisory council representative of the producers with authority to confer and advise with the board and to represent the producers "concerning matters within the jurisdiction of the board." Amendments inserted by the House provide that nominations for membership on these advisory councils may be submitted not only by farm organizations but by the governors and heads of departments of agriculture of the various States.

A further amendment inserted by the House requires the board before beginning or terminating an operating agreement or equalization fee to submit its findings to the appropriate commodity advisory council and the board is forbidden to act unless the council, representing producers, agrees that the board's findings were correct and in accord with all the facts which should be considered.

Section 5, which provides for loans out of the revolving fund of $400,000,000, specifically limits these loans "to any cooperative association or corporations created and controlled by one or more cooperative associations," thus restricting all of the benefits of the loaning features of the bill to the farmers' own organization.

Section 8, which provides for the establishment of clearing house and terminal marketing associations, specifically restricts membership in such associations to "cooperative associations or corporations created or controlled by one or more cooperative associations."

Under section 9 of the bill the board is required by specific mandatory language to conduct investigations to determine whether or not there is a surplus, whenever requested to do so by the commodity advisory council—which represents the producers—or "upon request of leading cooperative associations or other organizations of producers of any agricultural commodity."

This process might be continued further, but these references to the language of the bill itself show plainly that the real intent of the bill is to benefit the farmers and not the middlemen.

You also refer in your letter to the board as "irresponsible." The text of the bill does not bear out this charge. The Federal farm board which is to be created is appointed by the President, subject to the consent of the Senate; hence to get appointed in the first place these members must be acceptable to the Senate of the United States as well as to the President. Moreover, they must be regionally appointed, one member from each of the 12 land-bank districts, which render them more responsive to their constituents in their districts. Still, further, they can be removed by the President for cause. It is not more irresponsible than any other Federal board, department, or Government agencies which have been set up since the founding of our Government. It would not be nearly so irresponsible as the Interstate Commerce Commission which is not regionally constituted. That the members of the board would "eventually belong to no political party in particular," and therefore to create such a board would be "unforgivable," I can not agree, because this is not a political but an economic problem.

Your statement that this bill places in the hands of the Federal farm board the "lives and fortunes of the entire American people" is entirely unjustified and refuted by a study of the bill itself. There is not a line or clause of the bill which gives the board or any other agency control over the lives of anybody, much less of the entire American people. The same may be said concerning control of the fortunes, unless you mean by this the economic welfare rather than, in the monetary sense, the accumulation of wealth.

The board, however, does not even have control over the economic welfare of the entire American people by any means, except in an indirect sense. It does have the power to give assistance to the farmers' own organizations whereby they can dispose of their crop surpluses to better advantage and bring the farmers a higher price for what they have to sell by promoting orderly marketing. The power to render this assistance to the farmers the board does have and should have if agriculture is to be restored to a permanent basis of prosperity.

Your principal fears concerning this bill seem to arise out of misconceptions as to how it might operate. To summarize these, you apparently fear that the Federal Farm Board, the President, and the Secretary of Agriculture will all be in favor of the measure and by virtue thereof gain control "of the statistical forces of the United States" and thus "declare a surplus when there is no surplus" and that the "board will secretly conspire with foreign spinners as well as the middle men in this country to beat down the price of farm products in this country by declaring a surplus and enriching themselves at the expense of the farmer through the equalization fee paid by the farmers in order to guarantee the middleman a profit." This indeed would be a fearful picture if true, but the provisions of the bill do not justify such fears.

If the President, the Secretary of Agriculture, and every member of the board were in favor of the bill as you predict, then it appears to be a strange conclusion to reach that the board would set about to do the very things which would violate the chief purposes of the measure. Such reasoning is just the reverse of that of farm leaders who are supporting the measure. They do not fear a board and an administration which will sincerely try to carry out the purposes and provisions of this bill. That is what they want done. They would fear rather that the board might fail to carry out this legislation. That is why the advisory councils are set up to confer with the board and to represent the farmers' interest.

In the next place the mere fact that the President and Secretary of Agriculture and other members of the board would be in favor of this bill—even assuming that this were true—does not necessarily mean that they would have in their charge "the entire statistical force of the United States." Every individual State has its own department of agriculture and its corps of agricultural statisticians which gather and disseminate agricultural information. These agencies would not be entirely uninformed concerning the amounts of crops produced from year to year. Furthermore, great corporations representing the middlemen also maintain private statistical organizations to gather information concerning crop produced and crop surpluses. A still further safeguard which has been hereinbefore mentioned requires the board to get the approval of its findings by the commodity advisory councils representing the producers. Your fears that the board by its mere declaration of a surplus could make the world believe for any reasonable length of time that such surpluses existed when in reality there was a shortage could hardly be realized. Even if the board were to attempt such folly, it would soon be checkmated by the information given to the world by other agencies both public and private.

The fear that the board could declare a surplus when in reality a shortage existed and thus beat down farm prices below their real value is entirely unfounded. Prices are not determined by the mere statements of Government agencies or any other agencies as to surplus or deficiency of production except as these correspond to a reasonably accurate statement of the facts. Prices are determined by supply and demand in the markets and other economic factors which are involved. Moreover, it is hardly probable that the producers through their councils would approve such findings.

Furthermore, you seem to assume that all the board is going to do is to declare a surplus or declare a deficit. The fact is the bill itself requires that whenever the board, after investigation, finds there is a surplus and announces this fact it is required by mandatory language in the bill itself to "arrange for marketing any part of the commodity by means of marketing agreements with the cooperative associations engaged in handling the commodity or cooperatives created and controlled by one or more such cooperative associations." In other words, the board can not declare a surplus and then sit idly by and let prices go to smash. Quite the contrary, the declaration of a surplus is merely the acknowledgment of a condition already in existence and this declaration is merely a preliminary step whereby operations through cooperative associations are made possible so as to prevent an undue depression of prices. The board through agreements with those cooperatives will furnish them with sufficient funds, first by loans and later by the collection of an equalization fee, to acquire control of the surplus, withhold it from market in a period of oversupply, and dispose of it

later in periods of undersupply, thus preventing depression of prices below the real value of the product, which would otherwise be the case if the surplus were dumped on the market within two or three months, as is done now.

In these operations of the board the middlemen would not be guaranteed a profit at the expense of the farmers as you state in your letter. In the first place, according to the bill as it is now drafted, the equalization fee would not be collected from the individual farmer but from the middlemen—cotton ginners, millers, meat packers, etc. The chances are that the middlemen would not be able to pass it back to the producer or on to the consumer, except in some instances, but they would have to absorb part if not all of it in their overhead expenses.

There are so many middlemen, between the farmer and consumer, that the fee would be absorbed in the marketing process between the farmer and the consumer. Nevertheless even though the farmer should pay the entire amount of the fee, the benefits to him in increased prices would much more than repay the small amount of the fee. It is a well-known fact in economics that the existence of a small surplus on the market depresses the price for the entire supply. By the collection of a small equalization fee upon each unit of the commodity entering into commerce, a fund is secured with which to withhold this relatively small surplus from the market and thus prevent the depression of the price for the bulk of the crop offered for sale. Surely no farmer would object to paying a cent a pound as an equalization fee on cotton if thereby he could secure for his entire crop an average increase in the price of 5 cents per pound. For example, in the months of September, October, and November, only 75 or 80 per cent of the cotton is moved to market. The average farm price received by the producers for those months in 1926 was 13.2 cents per pound and the average for October and November was 11.3 cents per pound. During those three months only about 24 per cent of the total yearly consumption of cotton is consumed on the average. Several months later in the months of June, July, and August of 1927, the price of cotton had risen to an average of 15.8 cents per pound. The next three months it averaged 21.1 cents per pound. If the McNary-Haugen bill had been in operation the Federal Farm Board could have authorized the cotton cooperatives to remove the surplus from the market in the fall of 1926, thus checking the disastrous break in prices to the producers, and by means of a small equalization fee, the surplus could have been carried over into the next year at a considerably enhanced price thus enabling the farmer to get a higher return for his cotton, stabilizing the price at a more profitable level, and distributing the expense equitably upon each marketable unit of the commodity, since all would get their proportionate share of the benefits.

As a matter of fact the fee will not be collected direct from the farmer but from the middlemen. The effect of the measure will be to reduce the spread between the producers and consumers and to stabilize farm prices at a higher level without adding unnecessarily to the retail cost to the consumer.

Who are the principal enemies of this measure? They are the middlemen, that is, some but not all of the cotton spinners, the flour millers, and others who have made profits at the expense of both the farmer and the consumer. On the other hand, there is overwhelming support from the farmers and other leaders in favor of this measure. No other measure has been proposed which has gained such widespread support among the farmers and despite bitter assaults and misrepresentations, the McNary-Haugen bill has gained rapidly in favor and successfully withstood the fire of criticism for the past three or four years. If this measure were drafted primarily for the benefit of the middlemen or if the effects of this operation would result primarily in the enrichment of the middlemen, then it seems strange that they are the principal opponents of this legislation. Surely the acute thinkers, the trained economists, and the brilliant legal talent employed by some of the great industrial corporations of middlemen would have perceived ere this these exclusive benefits alleged to be in their behalf. Quite the contrary, it is from the middlemen that the chief opposition of this bill is directed. I believe this is one of the best answers to the charge that the bill is primarily for the benefit of the middlemen.

The only way in which the board can operate through the middlemen is by means of the emergency provision of the bill, which authorizes the board to arrange for the disposal of surpluses through other agencies than the cooperatives. This, however, is merely an emergency provision to enable the board to deal with the surpluses in the event the cooperatives should find themselves unable to handle the surpluses. This provision is safeguarded by various provisions of the bill:

First. It is to be resorted to only when the board finds that the cooperative associations are unable to handle the surpluses;

Second. The commodity advisory councils are authorized to represent the interest of the producers to the board in all its operations;

Third. The conditions which must be found by the board before the operating period can be declared and marketing agreement entered into are definitely provided for in the bill;

Fourth. The marketing agreements and the operations of the board therein are subject to restraint by the courts if the fundamental policies for the benefits of agriculture as outlined in section 1 of the bill are violated;

Fifth. This is a discretionary and not a mandatory provision;

Sixth. It is a safety provision to be used as a last resort whenever the cooperatives are not able to cooperate with the board in disposing of the surplus; and

Seventh. The board must secure the approval of its findings by the advisory councils which represent the producers.

You ask how this organization will be financed when there is no equalization fee to draw from, and you state that this measure will cost the Government one-half billion dollars annually, whether there is any surplus or not. The bill provides an appropriation of $500,000 to pay the administrative expenses of the board. The expenses of disposing of the surplus are to be paid out of the equalization fee collected on each unit of the commodity and not out of the Federal Treasury. The equalization fee can be collected only under conditions specified definitely in the bill, and the findings of the board must have the approval of the commodity advisory councils representing the producers, as I have already explained. Thus the board's expenses will be borne out of the annual appropriation of $500,000, just as the expenses of any other Federal board are met, and the expenses of handling the surplus will be borne by the commodity and can only be incurred under definitely specified conditions.

I do not share your prediction that the surplus in farm products "is not likely to worry this country very much longer." Concerning your statements that there is no longer a surplus of cotton, that the wheat surplus is diminishing, and that we now export not more than 1 per cent of our production of corn, I wish to point out the production of cotton in 1927 was curtailed primarily because of the disastrously low prices received in 1926, and that we always have a large surplus of cotton for export. According to the data published in Crops and Markets, December, 1927, by the United States Department of Agriculture, the production of wheat in 1927 was 871,000,000 bushels, compared with 831,000,000 bushels in 1926; the production of corn in 1927 was 2,700,000,000 bushels, compared with 2,600,000,000 bushels in 1926.

Neither can I agree with you that the "laws of supply and demand, aided, it may be, in some instances by a protective tariff, will entirely solve the surplus farm-product question of the American farmer." The agricultural depression has continued now for seven years, yet neither the laws of supply and demand nor the protective tariff have restored agriculture from its ruinous condition. I believe the farmers are entitled to legislative assistance by the Federal Government to place agriculture on a prosperous basis, just as this has been done for other groups by the Government.

The McNary-Haugen bill is a real farm-relief measure, which will enable the farmers through their cooperative associations to handle agricultural surpluses so as to stabilize prices at a more profitable level without Government subsidies, without putting the Government in business, and without placing an undue burden on the consumers.

Very sincerely,

W. C. HAMMER.

OLD-AGE PENSIONS

Mr. SIROVICH. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill which I introduced on the subject of old-age pensions.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. SIROVICH. Mr. Speaker, ladies, and gentlemen, the other day all the newspapers of New York City gave space to the story of four wrecked cast-offs in Brooklyn, voluntarily putting an end to their misery by choosing the convenient road of suicide.

One aged couple did it through the aid of gas tubes. According to the newspaper story, they owed three months' rent.

During their days of productivity each of these broken splints of human driftwood undoubtedly gave a full share toward the creation of the wealth of our country, but either missed the opportunity to save or perhaps circumstances and reverses did not allow them to put away a little for subsistence during the bleak and hoary days of old age. They starved.

All around them bustling society continued on its busy way and these unfortunates found themselves alone and unable to continue to carry on so as to keep the soul in their withered bodies.

They found it more convenient to make use of the gas tube, and they went.

Thousands of us read this story at our breakfast tables, and a great many thousands perhaps did not even read the story, just glanced at the headlines and either turned to the sporting page or read the latest news of presidential possibilities.

Perhaps there were a few of us who, reading of these suicides, paused for a moment and brought to mind the immortal lines of Hood, somewhat paraphrased:

Oh, for the rarity
Of Christian charity
Under the sun,
Is it not pitiful
In a whole city full
Home they had none.

The stories of these suicides followed on the heels of the recent report made by P. Tecumseh Sherman, of the National Civic Federation, in its so-called study of the extent of old-age dependence, stating that the extent of such dependence is really not at all serious, and that in its investigations in four States the federation found only 200 aged people destitute.

I wonder whether the reports of the federation included the four Brooklyn hapless ones.

Reading the story of these old derelicts on the ocean of life, I thought of the unfair, unjust, and un-American report of the National Civic Federation regarding our old, feeble, and worn-out workers, who labored in the quarries of American industry, but who through no fault of their own found themselves penniless, friendless, and homeless in their old age, denied the just rewards and the social fruit of their period of productivity in this the great civilized era of machine age. The aborigines of North America were more considerate. They took their aged and incapacitated and hied them far away from the village and there put an end to their misery and continued suffering.

That was humane.

Particularly was it thoughtful on the part of the red man when we realize that he subsisted on hunting, trapping, and fishing, and lived from hand to mouth. He had no banks; he had no reserve fund; he levied no taxes on those who could and should pay; he had no national reserve; he did not spend fortunes on educational systems and institutions; he established no hospitals, nor even penitentiaries, prisons, nor electric chairs.

The male hunted and fished; the squaw grew the corn and in her crude way milled it, prepared the food, and carried the papoose. When the warrior was no longer able to hunt and to fish, and when the squaw was no longer able to plant and to do the work around the tepee, the charitable offsprings who had not learnt to put away for a rainy day did a most humane thing.

What a shame and disgrace it is, however, to our civilization, when, after taxing ourselves for institutions and efforts of public welfare of almost every description, we forget those aged industrial veterans who worked and helped create the wealth of the Nation—forget the weary old men and women, sapped of strength to continue to work and to create.

Thomas Paine insisted that "society owed the youth his opportunity to enter the world of industry fairly equipped to cope and to carry on, and to the aged, the means to pass out of life decently and peacefully."

We are somewhat reconciled to our duty to our youth by the establishment of educational institutions to equip them mentally. While this effort on our part is praiseworthy, there is, however, a selfish motive in arming the industrial soldier more effectively so that he can more ably create and build.

Our old and feeble are still subject to charity, because, perhaps, we do not look forward for any material profit from them any more.

Old people are known to strive to hang onto life as tenaciously as possible under all circumstances. When four old people in one borough commit suicide in one day there is obviously something more serious facing them than what the National Civic Federation seemed to convey. These people evidently have found life unbearable in old age under the present prospects of inability to find employment and with the poorhouse or public charities as the only alternatives to a life of unbearable wretchedness.

I am convinced that the adoption of the bill which I introduced in Congress providing for Federal aid to States adopting old-age pension laws would prevent innumerable tragedies.

Forty-two nations of the civilized world have already adopted various forms of government pensions to their aged and infirm. Our country, rich and affluent, munificent and broad-hearted, renowned for its institutions of public welfare and general good, is still generations behind in its care for those who have reached the twilight of life and who need care and who should have our support.

Men and women in the office and in the workshop and in the street all agree that government care of the aged is a governmental duty. The newspapers of the country, indeed all influential newspapers, should give space to this cause and help bring about our realization of our paramount duty to help and blot out the crying shame of our criminal negligence.

To determine the extent of old-age dependency in the United States, I introduced the following joint resolution on April 19, 1928:

Whereas over 40 civilized nations of the world have introduced and developed in conformity with their separate needs, scientific and comprehensive methods of taking care of their aged dependents, in the form of old-age pension or insurance systems; and

Whereas the United States shares the unenviable distinction of being associated with China and India as the only large countries in the world having no modern adequate provision for their aged and dependent poor; and

Whereas the United States, as a Government and a people, has uniformly shown its high regard for human rights by placing them not on a parity with property rights but above it when the call of humanity demands; and

Whereas this attitude has been given practical expression in various forms of national and humane legislation such as workmen's compensation and employees' liability, Sheppard-Towner maternity bill, vocational education bill, etc.; and

Whereas the tendencies of our modern industrial civilization are such as to render it difficult for those suffering from the infirmities of age to secure a wage sufficient for their needs and to maintain body and soul together; and

Whereas investigation has shown that there exists a close association between old age and dependency, or destitution, and that conditions creating dependency are such as are often beyond the power of the individual to meet or to provide against; and

Whereas the honest and industrious workingman who, by his labor, has added to the wealth of the Nation, and who, through no fault of his own, but by reason of impaired health or strength due to age, is deprived of his earning power, is entitled to consideration other than as an object of charity; and

Whereas the almshouse and outdoor poor-relief systems in force in the United States represent an antiquated as well as costly method of helping the aged, and the taint of charity serves to embitter the declining years of thousands of worthy and respectable old men and women whose only crime is old age and poverty; and

Whereas the home is the highest and finest product of civilization, yea indeed the foundation of society and government, no sacrifice should be considered too great to preserve it; and

Whereas the almshouse method of poor relief serves to break up the home and thus runs counter to man's greatest need in the last few remaining years left him by his Maker; and

Whereas in the last 10 years the importance of old-age pensions as a substitute for other systems of relief now in force has been recognized in the United States by the adoption of such laws in six States and the Territory of Alaska; and

Whereas since 1907, 17 investigating commissions have been appointed to study and report their findings as to the advisability of adopting old-age pension legislation and as to the various methods of old-age relief in operation in other States and foreign countries; and

Whereas these investigations have resulted in general agreement as to the urgent need of legislation of a broader and more humane kind in behalf of the dependent aged; and

Whereas the question of old-age pensions and the appropriate legislation in each State is conditioned by different factors, and the local differential must be taken into consideration; and

Whereas such investigations are being continued and new ones are being inaugurated, involving considerable duplication of effort: Now, therefore be it

Resolved, etc., That an old-age security commission be created to consist of 15 members and to be constituted as follows: That the President of the Senate be, and hereby is, empowered to appoint four United States Senators; that the Speaker of the House of Representatives be, and hereby is, empowered to appoint four Members of the House of Representatives; that the President of the United States be, and hereby is, empowered to appoint seven members to consist as follows: Two representative employers of labor, two representatives of organized labor, and three public-spirited citizens; that the members are to serve without pay excepting for legitimate expenses incurred while transacting the business of the commission; that the commission is authorized to employ the proper experts and investigators and to secure all other necessary assistance to enable them to compile a complete report appertaining to the subject of old-age dependency in the United States; and be it further

Resolved, That the commission be authorized to report within two years from the passage of this resolution on (1) the extent of old-age dependency in the United States, (2) existing systems of relief for the aged in the various States, (3) the nature and workings of the old-age pension legislation adopted in this country, (4) the methods of old-age provision in vogue in the various foreign countries, and (5) the probable costs involved in the various forms of old-age pension systems; and be it further

Resolved, That the commission be empowered to subpœna persons, records, documents, data, and such other information as may be deemed

necessary to aid the commission in the ascertainment of the facts; and be it finally

Resolved, That the commission be allotted $75,000 to enable them to make a complete and thorough investigation upon every phase of old-age dependency in the United States.

The need for this joint resolution can be readily realized and appreciated by the membership of this historic body when they will read the following article I wrote to the editor of the New York Times:

To the EDITOR OF THE NEW YORK TIMES:

Permit me to call the attention of your readers to the statement carried in Friday's Times, in which P. Tecumseh Sherman, of the National Civic Federation, was quoted to the effect that State old-age pensions are "a discredited experiment." Mr. Sherman, of course, knows that this is not quite true, since something like 35 nations to-day are caring for their dependent aged through systems of old-age pensions or insurance. Since the World War 14 additional countries adopted such plans, and only a month ago France, the most thrifty and individualistic nation, enacted one of the most comprehensive systems of social insurance. This record is hardly "discrediting."

Mr. Sherman's contentions that somehow the United States alone can escape sound State or Federal provision for the aged are based solely on the conclusions drawn by himself of the findings of the recent report of the National Civic Federation conducted under his general direction. The conclusions of that report have become so discredited everywhere that one is surprised to find Mr. Sherman bringing them up again. The very facts contained in that report repudiate Mr. Sherman's conclusions.

In a recent article in the New Republic Dr. I. M. Rubinow, one of the leading authorities in this field, showed that in spite of the fact that the cases selected by the civic federation's investigators were not at all representative of the general working population, since it included more than twice the normal percentage of manufacturers, merchants, professional persons, etc., and aside from the fact that the enumerators excluded entirely the aged already provided for in public and private relief institutions, the federation's own investigations showed that—

(1) Twenty-five per cent of the men and 34 per cent of the women over 65 years of age own no property at all.

(2) Forty per cent have no income from work or business and some 17 per cent have neither property nor income.

(3) Over 25 per cent, by their own admission, are totally unable to work, and 30 per cent are able to do only light work which added to the disqualification of age makes them practically unavailable for industry. The comparatively high percentage of those still able to work (about 45 per cent) is probably largely due to the peculiar occupational distribution, the excessive representation of professional and commercial groups.

(4) Many of those who were forced to retire are, in addition, afflicted by chronic illness, rheumatism, invalidity due to accident, etc.

(5) Of the total number, some 60 per cent receive no aid, and 40 per cent are assisted primarily by children and to some extent by other relatives and friends. The number of those supported by public charity is very small, less than 1.5 per cent. That, of course, is largely explained by the failure to include any old people maintained in institutions.

It is in order to clarify the atmosphere in this controversy that on April 19 I introduced in Congress Joint Resolution 278, providing for the creation of an impartial United States commission to study the entire subject from every angle. The commission is to be made up of 4 Senators, 4 Congressmen, 2 representatives each of employers and organized labor, and 3 public-spirited citizens to be appointed by the President of the United States. An appropriation of $75,000 is asked in that bill. This commission would not only prove of immense value to all persons interested in the subject, but would, once for all, settle scientifically and properly this mooted question.

In view of the fact that about the same time as my resolution was introduced Representative JOHNSON of Washington introduced another resolution appropriating from $25,000 to $50,000 for a commission to study the destruction of fish in certain dams and rivers, I feel it would be comparatively cheap to invest a similar sum in the study of the conditions of and proposed remedies for our destitute and dependent aged, who have given their lives to our industries and to our welfare. If Mr. Sherman and his supporters are really sincerely desirous of the actual facts in the case I hope they will do everything possible to help the establishment of such a commission.

Mr. Sherman's present remedies along the lines of poor relief and the adoption of industrial pension plans by private corporations can hardly meet the present needs. The poor-relief system stands indicted beyond redemption. Industrial pension plans with their long periods of service requirements can never meet the present emergency, since only a small percentage of workers stay with one corporation long enough to qualify for these benefits, and only large industrial establishments can afford to undertake such provisions.

It is true that the contributory-insurance plan is spreading abroad. Side by side with this system, however, there is everywhere in existence a noncontributory system of pensions supported entirely by taxation which aims to alleviate the immediate needs. Plans along the same lines are urged by the advocates of humane care for the aged in the United States, since the old men and women now destitute can hardly be expected to make contributions for their own support. The American Association for Old Age Security, the leading organization promoting this subject, is working toward this entire program.

If, as Mr. Sherman suggests, the poor-law system, which in essence dates back to the period of Queen Elizabeth, is not archaic, then by the same logic the stagecoach in these days of trans-Atlantic flying remains the most up-to-date method of transportation.

There can be no doubt that old-age dependency and its relief is for the great interest of the public. As a Nation we spare no pains to get at the bottom of hog cholera and the boll weevil. The fate of superannuated human beings is equally important. A number of reasons exist as to why a study of this subject is desirable. In the first place, there is a serious lack of knowledge as to why old-age dependency exists in the United States. The problem of unemployment is one of the pressing problems of the day. Another tendency which is daily aggravating the gravity of this subject is the lengthening life span, a product of our better knowledge of sanitation and practice of hygiene.

The other is the reducing age limit at which workers are barred from employment by many great employment agencies.

All these factors need to be reckoned carefully before we will be in a position to take up intelligently suggestions of old-age relief.

There ought to be a careful assembling of all information available upon these and related points throughout the Nation.

It is a type of census work appropriate for the Federal Government of the United States.

Four million men and women have been denied the right to work in our country due to physical defects. In the coal fields of Pennsylvania, Virginia, Ohio, and Illinois more than 100,000 men have been forced into idleness. Tremendous suffering, destitution, and privation are found among old fathers and mothers who have contributed their all on the altar of service to make our Nation the greatest and most prosperous in all the world.

The twentieth century of civilization will be known as the great machine age in which most of the industrial work upon farms and elsewhere is being perfected and done through the medium of machinery.

To-day when a man or woman needs work at the age of 45, he or she has great difficulty in finding anyone to give them employment.

Imagine therefore what happens when an old mother or father at the age of 65 or 70 tries to find employment in the great industries of our Nation.

We need a commission to inquire into the subject of old-age pensions, to make old age secure until the curtain of life falls upon our aged citizens. Social responsibility for the aged in Europe is widely recognized. The countries of Europe take care of their aged as a collective responsibility, not necessarily through State monopoly or State bureaucracy but through collective associated activities.

Between 1890 and 1914, a period of 24 years, 14 countries enacted old-age pension legislation.

Since the beginning of the war, a period of 14 years, an additional 14 countries enacted legislation of this character.

The credit of having enacted the first old-age pension law in the world relongs to the world's oldest Republic, Iceland, which celebrates its one thousandth anniversary in 1930. Iceland's foster state, Denmark, enacted an old-age pension law in 1891. New Zealand, a country recognized as having a very equitable distribution of wealth, enacted an old-age pension law in 1898. Other countries, both rich and poor, among European and England's dominions made their first essays in such legislation between 1906 and 1913. Great Britain, Belgium, and Canada have, during the last decade, approved the principle of old-age pensions.

Some years ago I visited an institution for the aged. The superintendent was showing me through, and as we were passing a side corridor something strange attracted my attention. I noticed a white-haired, stooped old man approach a feeble old lady. He put his arms gracefully around her waist and kissed her tenderly. I looked on bewildered.

When we reached the office I frankly asked the superintendent whether romance and love could still be found among the inmates of his institution. The superintendent smiled and explained that there was little danger of elopements among the inmates and that he had no difficulty in maintaining a proper morale.

After a brief explanation, he informed me that the old man was the husband of the lady he embraced. The institution, un-

fortunately, he went on to say, had made no provisions for the maintenance of married couples together; that husbands and wives had to be kept in separate quarters and that the display of affection I had witnessed was a daily occurrence whenever such couples met in the corridor.

This particular couple had been married 54 years. They had nine children, of whom four were still living. All of these had large families and, because of their small earnings, were unable to help their parents.

MANY PITIFUL TRAGEDIES

About the time of this visit I had the privilege of participating actively in the framing of widows' pensions and child-welfare legislation for the orphans and dependent children of the State of New York. Instead of the earlier method of placing dependent, fatherless children in orphan asylums, compelling the mother, heart-broken and alone, to eke out an existence as best she could, we are now providing, through our child welfare law, for the maintenance of these children by the mother in her own home.

In New York City alone we have taken care of 40,000 mothers and orphans, at an expense of $7,000,000 per year. Experience has shown that this law has not only prevented many pitiful tragedies and the pauperization of the children, but that the actual cost to the taxpayer to support a child in its own home with its mother is less than maintaining such a child in an institution.

As I thought over the touching incident of the aged couple I saw in the institution for the aged, I reflected that while we have the wisdom to see the social, moral, economic, and humane advantages of maintaining the home for the child, we have somehow ignored or entirely forgotten our aged parents, who have kept an independent home for themselves and who contemplate life in an institution with dread and horror.

A TERRIFYING OUTLOOK

How terrifying must it be for such people to be forced to spend their final days abandoned as inmates of an isolated, cold, barren, four-walled room in a charitable institution.

Indeed, it is time that we began to consider this situation seriously. The difficulties to be faced in old age are fast growing harder. Most of our people to-day no longer work in some little business for themselves as they used to, but are more and more coming to depend upon their daily job for their daily bread and sustenance.

Furthermore, through our progress in public health and sanitation, we have made it possible for a greater number of people to reach old age. The number of the aged is increasing relatively as well as absolutely. In 1870 the aged population numbered a little over 1,000,000. To-day the number is approximately 5,500,000. Twenty-five years ago the aged constituted less than 3 per cent of the total population. To-day they comprise nearly 5 per cent.

On the other hand, modern industry finds less and less room for older workers. Practically all railroad corporations and numerous industrial concerns to-day deny new and permanent employment to a skilled workman after 45 years of age and to an unskilled workman after 35 years of age. Even municipal and State employment is now refused in most of our Eastern States to persons over 45 or 50.

As a result of these changed conditions, it is now conservatively estimated that at least 1,800,000 aged persons are dependent, in the sense that they have not accumulated a sufficient income to provide them even with the barest necessities. Thus, there is a crying need for some constructive solution of this poignant problem.

Our present methods of relief for the aged are extremely antiquated—indeed, a blot upon our civilization.

1. The "poor laws" in our States are practically all modeled after the old British poor-law system. In the main, this system has existed with little change for over 300 years. Indeed, in many of our States the poor-relief systems are still almost identical with the Elizabethan law of 1601.

Shameful as it may seem in this twentieth century, the poorhouses in the United States are "catchall" institutions. There are rarely strict regulations as to admission and discharge of inmates, and there is always a heterogeneous assemblage in these homes. They include the young and the old, the feebleminded and epileptic, prostitutes and abandoned babes, inebriates and worn-out toilers. They are the homes of both the veterans of labor and the veterans of dissipation—derelicts and driftwood from every form of social, industrial, and economic life.

The inmates are given mostly coarse and unpalatable food. A study conducted by the Pennsylvania Commission on Old Age Pensions showed the following annual food rations served to inmates and supervisors in one almshouse of the better class:

	Per inmate	Per steward
Butter	7½ pounds	30 pounds.
Eggs	38	200.
Chicken	1 ounce	10 pounds.
Milk	23 quarts	101 quarts.

2. To a great extent the private charitable organizations represent no improvement over the public poorhouse. The stigma attached to such relief agencies need hardly be discussed. They are the last refuge of the very helpless poor. Furthermore, the management of these institutions is extremely wasteful. This was shown by a recent study made in Boston, where less than 900 aged persons were taken care of by 151 different charitable organizations, while each of 54 of these aged was receiving his pittance from five and more agencies.

3. The number of aged persons relieved and cared for by the pension plans of industrial concerns and fraternal and trade union associations is negligible. Few of these are established on a sound financial basis, and most of them represent only good-will promises.

The history of private pension systems, laudable and ambitious as were their intentions and purposes when founded, is strewn with wrecked pension plans and not one of these forms of relief can be depended upon to offer any enduring solution of the great problem.

The most comprehensive study of industrial pensions recently published by the Pennsylvania Old Age Pension Commission shows that these take care of only from 5 to 6 per cent of the needy aged. The Pennsylvania commission after a complete study of the financial side of the industrial-pension plans concludes:

> The large majority of the pension systems now in operation are so constructed as to preclude any hope of their ever becoming effective instruments in solving the growing problem of old-age dependency to any considerable degree.

The fraternal and trade-union pension plans are on the whole not more actuarily sound than the industrial plans.

That the present method of poor relief is not only out of date but economically wasteful is evident from the following:

A recent study entitled "The cost of American almshouses," made by the United States Department of Labor in 1925, shows that the maintenance cost per inmate in almshouses throughout the country ranges from $293.89 a year in 16 institutions to $508.13 a year in 787 institutions.

The Pennsylvania Commission on Old Age Assistance, in its report submitted to the 1925 Pennsylvania Legislature, showed that for the present cost of an almshouse inmate in that State three persons could be supported on a pension in their own homes. A survey recently made by the same commission of the pension system in operation in Montana discloses that in 12 out of 22 Montana county almshouses the cost per inmate is five times higher than the average pension paid in the same counties. At the same time every applicant preferred the meager pension to the more expensive and presumably better care provided in the county poorhouses.

UNITED STATES LAGS

Indeed, the backwardness of the United States in this measure of social justice to its aged toilers, despite its tremendous wealth, is conspicuously shown by the following statement in the recently published legislative report of the Pennsylvania Commission on Old Age Pensions. Says the commission:

> Our studies of pension plans in foreign countries show that during the last quarter century practically every civilized nation in the world has either already adopted a carefully worked out system of old age provision or is contemplating such in the near future. About 6,500,000 persons are now already protected with one form or another of modern insurance or pension provisions against the economic hazard of old age.
>
> Indeed, of the populous countries still remaining without any form of constructive care for the aged only China, India, and the United States are left. Of the industrially developed nations the United States as a unit stands alone in its isolation in still applying early seventeenth century methods to twentieth century problems.

The Dominion of Canada, which, until recently, was the only other English-speaking country besides the United States without a pension plan, finally deserted our fold last March and adopted a federal pension plan.

Is it not time for the richest nation on earth to accord to its fathers and mothers at least the same measure of security and comfort as is given to-day even by the poorest of nations, such as Ireland, Belgium, Rumania, Jugoslavia?

Is it not obvious that when two out of every five persons reaching old age in this great Nation become dependent upon

others for support that the cause of dependency lies not with themselves, but with the social and economic conditions over which they have little or no control? Therefore society is obligated to come to their help when they no longer can eke out a livelihood out of their own toil.

APPEAL TO CONGRESS

Once the conditions are made sufficiently known, I am convinced that the American people, who have never failed to respond to a humanitarian cause, will demand that justice be done, and that our old men and women who contributed during their long lives much to the Nation's progress will be enabled at least to spend their declining days in some measure of comfort and happiness, in an honorable and self-respecting manner in their own homes, amid hallowed surroundings and among those near and dear to them.

Therefore, in cooperation with the recently organized American Association for Old-Age Security, which is made up of representative leaders of every religious denomination, social workers, and representatives of capital and labor, I have prepared a bill for consideration by this Congress as the first step in the movement for the bettering of this class of unfortunates.

In my humble opinion, it is our duty to care for and relieve those who have fallen by the wayside through no fault of their own—victims of social and economic injustice. This can be done only most efficiently and most economically through the agency of progressive, up-to-date, humane legislation based upon the lessons of many years of sociological observation and research.

To realize the principle of old-age security in the United States, in conjunction with Prof. Joseph Chamberlain, of Columbia University, Mr. Abraham Epstein, secretary of the American Association for Old-Age Security, as well as other distinguished citizens of our country, I prepared a bill called the "old age security bill," which I think will stand the test of the constitutionality of the United States Supreme Court, and that I sincerely hope may be adopted by the Seventy-first Congress as an onward and forward step in the civilization of our Nation in which once and for all it will arraign itself with all civilized nations of the world that have approved the principle of old-age pensions. This bill of mine reads as follows:

Be it enacted, etc., That this act shall be known and may be cited as the United States old age security act."

SEC. 2. Definitions: When used in this act—

(a) "Bureau" shall mean the old age security bureau;

(b) "State authority" shall mean the State authority charged with cooperating with the commission;

(c) "Assisted person" shall mean a person entitled to receive assistance under a State plan approved by the bureau;

(d) The masculine shall include the feminine.

SEC. 3. Authorization and appropriation: There is hereby authorized to be appropriated annually, out of any money in the Treasury not otherwise appropriated, the sum of $, to be apportioned among the States as provided herein, to aid them in giving assistance to aged persons under the conditions of this act.

SEC. 4. Allotment not to be used for lands: No portion of any money allotted under the act for the benefit of any State shall be applied to the purchase, rental, erection, repair of any building, or for equipment, or for the purchase or rental of any lands.

SEC. 5. Money to be spent by State: All money allotted under this act to any State shall be expended under the supervision of the State authority.

SEC. 6. Acceptance of act by State: In order to receive the benefit of this act, any State shall through its legislature—

(a) Accept the provisions of this act;

(b) Empower and designate a State board or officer as the State authority to prepare the plan herein provided for, to cooperate with the bureau, and to supervise the expenditure of the funds;

(c) Appoint the State treasurer as custodian of any allotment paid it under this act, who shall receive and provide for the proper custody and disbursement of all money so paid.

SEC. 7. (1) There is hereby created in the Department of Labor a bureau to be known as the old age security bureau.

(2) The bureau shall be in charge of a director to be appointed by the Secretary of Labor.

(3) There is hereby authorized to be employed by the bureau, chief clerk and such special agents, assistants, clerks, and other employees at such rates of compensation and in such numbers as Congress may from time to time provide by appropriations.

(4) There shall be an acting commission to the bureau which shall consist of the director of the bureau, the Director of the Veterans' Bureau and three persons appointed by the President for terms of four years and until their successors are appointed and have qualified. The three appointed members shall be persons who have had experience in social work and they shall be paid their expenses when on the business of the commission.

SEC. 8. Duties of bureau: It shall be the duty of the bureau to carry out the provisions of this act and to that end—

(a) To make the necessary rules and regulations;

(b) To examine plans submitted by a State authority for the disbursement of an allotment to the State under this act and to approve such plans and any changes thereof;

(c) To make necessary investigations of the administration of any plan approved by it;

(d) To cooperate with State authorities and other agencies, public and private, for the purpose of improving the administration of old-age assistance, and of studying the problem of old age in the United States;

(e) To withhold from any State the payment of any allotment or installment thereof, when it decides that the money allotted is not being expended as provided in the plan;

(f) To certify to the Treasurer of the United States the amount of allotment to any State;

(g) To take any other action necessary to carry out the purpose of this act.

SEC. 9. Appeal to President or Secretary: When any allotment or any installment thereof is withheld by the bureau, the State affected may appeal to the Secretary of Labor, and from his decision to the President of the United States, who may either affirm or reverse the action by the bureau or the Secretary as he may judge proper. The bureau on receiving notice of the opinion of the Secretary or of the President shall take action to accord with it.

SEC. 10. Contents of plan: The bureau shall not approve any plan submitted by the State authority which does not provide that—

(1) An old person entitled to relief under it:

(a) Has been a citizen of the United States for at least 20 years and resident of the State for a period of years determined by the State law providing old-age assistance; and

(b) Is 70 years old or over; and

(c) Does not possess real and/or personal property of a value in excess of $5,000; and

(d) Has no child or other person responsible under the law of the State for his support and able to support him; and

(e) Has not disposed of any property during the five years prior to his application for relief, unless the State authority has, under a power granted by the State statute, waived this requirement; and

(f) Has been decided by the State authority to be of good moral character.

(2) There shall not be charged against the allotment made under this act more than one-third of the total sum paid to aged persons under the plan, except that payment made in excess of $1 a day to any such person shall not be taken into account.

(3) So much of any sum paid as assistance, which shall be equivalent to the share paid from the allotment under this act, shall be a lien on the estate of the assisted person and upon his death shall be collected by the State and reported to the bureau provided in this act.

SEC. 11. Changes in plan: The State authority may at any time submit proposed changes in the plan to the bureau, which may approve such changes if they are in accord with the provisions of this act.

SEC. 12. Report by State authority: (1) The State authority shall annually on or before the 1st day of May of each year, or as soon thereafter as possible, submit to the bureau a statement—

(a) Of the amount of the appropriation made by the State for the period of the ensuing fiscal year for the purpose of assistance without including any part of the expenses of administration; and

(b) An estimate of the sum which must be contributed by any political subdivision of the State during such year for the purpose of assistance without including any part of the expenses of administration; and

(c) A statement of the amount collected, if any, from the estate of any assisted person for which the State is accountable to the United States under section 9, subsection (2); and

(d) An estimate of the amount unexpended of any allotment made from appropriation under this act for the current year.

(2) (a) The bureau shall compute annually the amount of allotment to be given such State at one-half of the sum of (a) and (b) of subsection (1) of this section, after deducting from such one-half the sum of (d) and (c) of such subsection.

(b) If the amount of assistance to any aged person under the plan be at a rate in excess of $1 a day, then only so much of the appropriations by the State and the political subdivisions thereof shall be taken as a basis for computation, which when added to the Federal allotment will provide assistance at a rate of $1 a day.

(c) If the sum of all allotments be in excess of the appropriations for the purpose, then the allotment to each State shall be diminished in the same percentage as the total allotments in excess of the appropriation bear to the total of the appropriation.

(3) The State authority shall report at such date to the bureau, in respect to the administration of the plan, and shall make such other reports at such time as may be fixed by the bureau.

(4) Each State authority as soon as possible after the 30th day of June of each year shall notify the bureau of the exact amount unex-

pended of its allotment for the year ending on such 30th day of June, and the bureau shall adjust the allotment to each State in accordance therewith.

SEC. 13. Notification to Treasurer: The bureau shall annually notify the Treasurer of the United States of the States whose plans have been accepted and are in force and the amount of the allotment made to each State. The Treasurer shall thereupon pay to the treasurer of each such State the sum so allotted in quarterly installments, beginning the 1st of July of each year unless he is notified by the bureau to withhold or change the amount of any allotment, in which case he shall act in accordance with such notification.

SEC. 14. Action of Comptroller General: The Comptroller General is authorized and directed to allow credit in the accounts of the Treasury of the United States for payment of allotments in the amount notified him by the commission.

SEC. 15. This act shall be incorporated into the Code of Laws of the United States of America as chapter 5, title 29: Labor; and the sections shall be numbered in said code consecutively, sections 51 to 67, inclusive.

SEC. 16. Chapter 5 of title 29: Labor, of the Code of Laws of the United States of America is renumbered chapter 6; section 51 is renumbered section 82, and section 52 is renumbered section 83.

NANCY HART

Mr. BRAND of Georgia. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill H. R. 7452 and include some excerpts from a few histories concerning Nancy Hart.

The SPEAKER. The Chair is not inclined to recognize the gentleman to insert historical excerpts in the RECORD.

Mr. BRAND of Georgia. May I have a minute to give a reason for making the request?

The SPEAKER. Certainly.

Mr. BRAND of Georgia. This woman is of Revolutionary fame. Not only the young people of the counties of Elbert and Hart in Georgia but also the D. A. R. associations of the State would like to have a brief statement made of her history and character and her activities during the Revolutionary War.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. BRAND of Georgia. Mr. Speaker, under the leave to extend my remarks in the RECORD upon the bill referred to I include the following:

Under the terms of the above-stated bill the Secretary of War is authorized to erect at some suitable point at Alfords Bridge, which crosses the Savannah River in the county of Hart, State of Georgia, on the national highway between the States of Georgia and South Carolina, a tablet or marker to commemorate the memory of Nancy Hart, the county of Hart and the city of Hartwell being named in her honor.

Subsequently I introduced another bill which authorizes the Secretary of War to erect a tablet or marker to be located at the home place of Nancy Hart, in Elbert County, State of Georgia, on War Woman's Creek, being near Dyes and Wills Ferries, at what was then known as Fish Dam Ford on Broad River, to commemorate the memory of Nancy Hart and to indicate where she lived during the American Revolution.

In Memorials of Dixieland, by Lucian Lamar Knight, M. A., LL. D., the author writes:

It was during the troublous days of Toryism in upper Georgia that Nancy Hart performed the courageous feat which has since carried her name to the ends of Christendom. There is perhaps no exploit in our annals richer in the thrilling elements of the drama. It was staged in a little cabin of the backwoods.

The Hart family, into which she married, an aristocratic one, gave a wife to the illustrious Henry Clay, while it flowered again in the great Thomas Hart Benton, of Missouri. Her own maiden name was Nancy Morgan, a name which honorably connects her with one of the best families of the Old Dominion. She has left us no mound to bedew with our tears, to bedeck with our garlands; but she has left us an immortal memory.

In the Women of the Revolution, by Elizabeth F. Ellett, written in 1848, the authoress writes:

At the commencement of the Revolutionary War a large district in the State of Georgia, extending in one direction from Newsons Ponds to Cherokee Corner near Athens and in the other from the Savannah River to Ogeechee River and Shoulderbone, had been already organized into a country which received the name of Wilkes, in honor of the distinguished English politician. At the commencement of hostilities so great a majority of the people of this country espoused the Whig cause that it received from the Tories the name of the "Hornet's Nest." In a portion of this district, near Dye's and Webb's ferries on Broad River, now in Elbert County, was a stream known as "War Woman's Creek," a name derived from the character of an individual who lived near the entrance of the stream into the river.

This person was Nancy Hart, a woman entirely uneducated and ignorant of all the conventional civilities of life, but a zealous lover of liberty and of the "liberty boys," as she called the Whigs.

On the occasion of an excursion from the British camp at Augusta a party of loyalists penetrated into the interior, and, having savagely massacred Colonel Dooly in bed in his own house, proceeded up the country with the design of perpetrating further atrocities. On their way a detachment of five from the party diverged to the east and crossed Broad River to examine the neighborhood and pay a visit to their old acquaintance Nancy Hart. When they arrived at her cabin they unceremoniously entered it, although receiving from her no welcome but a scowl, and informed her that they had come to learn the truth of a story in circulation that she had secreted a noted rebel from a company of "king's men" who were pursuing him, and who, but for her interference, would have caught and hung him. Nancy undauntedly avowed her agency in the fugitive's escape. She had, she said, at first heard the tramp of a horse and then saw a man on horseback approaching her cabin at his utmost speed.

As soon as she recognized him to be a Whig flying from pursuit, she let down the bars in front of her cabin and motioned him to pass through both doors, front and rear, of her single-roomed house—to take to the swamp, and secure himself as well as he could. This he did without loss of time; and she then put up the bars, entered the cabin, closed the doors, and went about her usual employments. Presently some Tories rode up to the bars, calling vociferously for her. She muffled up her head and face, and opening the door, inquired why they disturbed a sick, lone woman. They said they had traced a man they wanted to catch near to her house, and asked if anyone on horseback had passed that way. She answered no, but she saw some one on a sorrel horse turn out of the path into the woods some 200 or 300 yards back. "That must be the fellow," said the Tories; and asking her direction as to the way he took, they turned about and went off, "well fooled," concluded Nancy, "in an opposite course to that of my Whig boy; when, if they had not been so lofty minded, but had looked on the ground inside the bars, they would have seen his horse's tracks up to that door, as plain as you can see the tracks on this here floor, and out of t'other door down the path to the swamp."

This bold story did not much please the Tory party, but they would not wreak their revenge upon the woman who so unscrupulously avowed the cheat she had put upon the pursuers of a rebel. They contented themselves with ordering her to prepare them something to eat. She replied that she never fed traitors and king's men if she could help it—the villains having put it out of her power to feed even her own family and friends by stealing and killing all her poultry and pigs "except that one old gobbler you see in the yard." "Well, and that you shall cook for us," said one who appeared to be a leader of the party; and raising his musket he shot down the turkey, which another of them brought into the house and handed to Mrs. Hart to be cleaned and cooked without delay. She stormed in protest, but seeming at last disposed to make a merit of necessity, began with alacrity the arrangements for cooking, assisted by her daughter, a little girl 10 or 12 years old, and sometimes by one of the party, with whom she seemed in a tolerably good humor—now and then exchanging rude jests with him. The Tories, pleased with her freedom, invited her to partake of the liquor they had brought with them—an invitation which was accepted with jocose thanks.

The spring—of which every settlement has one near by—was just at the edge of the swamp, and a short distance within the swamp was hid among the trees a high snag-topped stump, on which was placed a conch shell. This rude trumpet was used by the family to convey information, by variations in its notes, to Mr. Hart or his neighbors who might be at work in a field, or "clearing," just beyond the swamp, to let them know that the "Britishers" or Tories were about, that the master was wanted at the cabin, or that he was to keep close, or "make tracks" for another swamp. Pending the operation of cooking the turkey, Nancy had sent her daughter, Sukey, to the spring for water, with directions to blow the conch for her father in such a way as should inform him there were Tories in the cabin, and that he was to "keep close" with his three neighbors who were with him until he should again hear the conch.

The party had become merry over their jug, and sat down to feast upon the slaughtered gobbler. They had cautiously stacked their arms where they were in view and within reach; and Mrs. Hart, assiduous in her attentions upon the table and to her guests, occasionally passed between the men and their muskets. Water was called for; and our heroine having contrived that there should be none in the cabin, Sukey was a second time dispatched to the spring, with instructions to blow such a signal on the conch as should call up Mr. Hart and his neighbors immediately. Meanwhile, Nancy had managed, by slipping out one of the pieces of pine which forms a "chinking" between the logs of a cabin, to open a space through which she was able to pass to the outside two of the five guns. She was detected in the act of putting out the third. The whole party sprang to their feet, when quick as thought Nancy brought the piece she held to her shoulder, declaring she would kill the first man who approached her. All were terror struck, for Nancy's obliquity of sight caused each to imagine himself her destined

victim. At length one of them made a movement to advance upon her, and true to her threat she fired and shot him dead. Seizing another musket she leveled it instantly, keeping the others at bay. By this time Sukey had returned from the spring, and taking up the remaining gun she carried it out of the house, saying to her mother, "Daddy and them will soon be here."

This information much increased the alarm of the Tories, who perceived the importance of recovering their arms immediately; but each one hesitated, in the confident belief that Mrs. Hart had one eye on him at least for a mark. They proposed a general rush. No time was to be lost by the bold woman; she fired again, and brought down another of the enemy. Sukey had another musket in readiness, which her mother took, and posting herself in the doorway, called upon the party to surrender "their Tory carcasses to a Whig woman." They agreed to surrender, and proposed to "shake hands upon the strength of it." But the victor, unwilling to trust their word, kept them in their places for a few minutes, till her husband and his neighbors came up to the door. They were about to shoot down the Tories, but Mrs. Hart stopped them, saying they had surrendered to her; and her spirit being up to boiling heat, she swore that "shooting was too good for them." This hint was enough; the dead man was dragged out of the house; and the wounded Tory and the others were bound, taken out beyond the bars and hung.

In Gov. George R. Gilmore's History of Georgia, 1855, he says:

Nancy Hart was one of the North Carolina emigrants. She was a tall, muscular, red-headed, cross-eyed woman. In the contest between the Whigs and Tories, in the Revolutionary War, she proved herself every inch a Whig.

Nancy Hart's confident courage stirred into patriotic action many vacillating, British-fearing men of the times. When the Whigs of upper Georgia were flying from the murdering and plundering of the Tories and their superiors, she stood her ground, ever disposed and ready to defend herself and hers from her country's foes.

The restless temper and fearless spirit which had urged Nancy Hart to fight for liberty made her the best backwoods woman after the war ended. She traced the bee to its tree and the deer to its lair among snakes and wild beasts with unequaled success.

I was a Member of Congress in 1828–29. General Jackson's successful election to the Presidency put the ambitious Members all agog to attract his favorable notice. One of the means used was proposing to fill the vacant niches in the rotunda with paintings descriptive of the Battle of New Orleans and his other great victories. I prepared a resolution, as an addition or substitute, to fill one niche with a painting of Nancy Hart wading Broad River, her clothes tucked up under one arm, a musket under the other, and three Tories ahead, on her way to the camp of the Whigs to deliver them up to the tender mercies of Col. Elijah Clark.

In The Life and Times of William H. Crawford, by J. E. D. Shipp, A. B., 1909, he says:

On the north side of Broad River at a point about 12 miles from the present city of Elberton, Ga., and 14 from historic Petersburg, in what is now Elbert County, was situated the log house in which Benjamin Hart and his wife, Nancy Morgan Hart, lived at the commencement of the Revolution.

The State records show that Benjamin Hart drew 400 acres of land on Broad River, and afterwards another body of land in Burke County. He was a brother to the celebrated Col. Thomas Hart, of Kentucky, who was father of the wife of Henry Clay.

Nancy Hart, alone with six boys—Morgan, John, Thomas, Benjamin, Lemuel, and Mark, and her two girls, Sally and Keziah—presents a unique case of patriotic fervor, courage, and independence of character unparalleled in history. Rough, unmanageable, 6 feet tall, spare, big-boned, and exceedingly strong, she was high spirited, energetic, and shrewd, and delighted in her prowess and physical strength. The Whigs all loved her—she was hospitable and kind to them. The Liberty Boys called her "Aunt Nancy." The Tories feared and hated her unrelentingly.

When Gen. Elijah Clark moved the women and children away from Broad River settlement to a place of safety in Kentucky most of them were anxious to go, but Nancy refused, and remained along with her children after her Whig neighbors had departed. Her life was in constant danger, but she was resolute, and inspired the Tories with a wholesome dread, and for a long dismal period she stood her ground. Her house was a meeting place for her husband's company. She aided as a spy and kept him informed of the movements of the enemy.

One day very near her dwelling "Aunt Nancy" met a Tory. She engaged in conversation with him, and after a while diverted his attention and seized his gun. There was a lively wrestle over the weapon, but her superior strength gained the mastery, and she marched him down the river a mile and a half to a fort known as the Old Block House and turned him over as a prisoner of war to its commander. All through Georgia and the Carolinas Nancy soon became famous. Her courage and confidence rekindled the smouldering sparks of liberty in hearts that were weary and ready to faint.

Hart County is the only one in Georgia named for a woman, and the town of Hartford, which in 1810 was the county seat of Pulaski County and likewise the city of Hartwell in Hart County, were also named in her honor. Many of her descendants reside in Georgia, and treasure with pardonable pride her virtues, and fondly relate the traditions of her great name.

In Historical Collections of Georgia by the Rev. George White, M. A., 1855, he says:

One among the most remarkable women that any country has ever produced resided in Elbert.

The clouds of war gathered, and burst with a dreadful explosion in this State. Nancy's spirit rose with the tempest. She declared and proved herself a friend to her country, ready "to do or die."

On one occasion, when information as to what was transpiring on the Carolina side of the river was anxiously desired by the troops on the Georgia side, no one could be induced to cross the river to obtain it. Nancy promptly offered to discharge the perilous duty. Alone, the dauntless heroine made her way to the Savannah River; but finding no mode of transport across, she procured a few logs, and, tying them together with a grapevine, constructed a raft, upon which she crossed, obtained the desired intelligence, returned, and communicated it to the Georgia troops.

Once more, when Augusta was in possession of the British, the American troops in Wilkes, then under the command of Col. Elijah Clarke, were very anxious to know something of the intentions of the British. Nancy assumed the garments of a man, pushed on to Augusta, went boldly into the British camp, pretending to be crazy, and by this means was enabled to obtain much useful information, which she hastened to lay before the commander, Colonel Clarke.

In the story of Georgia and Georgia people by George Gillman Smith, D. D., 1900, he says:

In her old age the governor says she became a shouting Methodist and was recognized by all as a good woman. She married an uncle of Thomas Hart Benton, the famous Senator, and the sterling old statesman was always proud of his connection with her. It is certain she was a woman of substance and family and integrity, and her family was among the best.

THE REVENUE BILL

Mr. HAWLEY. Mr. Speaker, in connection with the filing of the conference report on the revenue bill H. R. 1, I ask unanimous consent that the conferees be given until midnight in which to file a statement.

The SPEAKER. The gentleman from Oregon asks unanimous consent that the conferees on the part of the House on the bill H. R. 1 be given until midnight to file a statement. Is there objection?

There was no objection.

LEAVE TO PRINT

Mr. SUTHERLAND. Mr. Speaker, I ask unanimous consent for 10 days after adjournment in which to extend my remarks in the RECORD. Or I will modify that request and ask that I be given until the last issue of the RECORD.

The SPEAKER. The gentleman from Alaska asks unanimous consent to extend in the RECORD his remarks, extending until the last issue of the RECORD. Is there objection?

There was no objection.

BRIDGE ACROSS THE OHIO RIVER NEAR RIPLEY, OHIO

Mr. DENISON. Mr. Speaker, by authority of the Commirtee on Interstate and Foreign Commerce I ask unanimous consent to take from the Speaker's table the bill (S. 4450) authorizing the Ripley Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ripley, Ohio, and ask for its consideration.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Senate bill was read.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

The similar House bill, H. R. 13591, was laid on the table.

BRIDGE ACROSS THE SANTA ROSA SOUND IN FLORIDA

Mr. DENISON. Mr. Speaker, by the same authority I call up the bill (S. 4456) granting the consent of Congress to the boards of county commissioners of the counties of Escambia and Santa Rosa, in the State of Florida, to construct, maintain, and operate a free bridge across the Santa Rosa Sound in the State of Florida, and ask for its consideration.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.
The Senate bill was read.
The SPEAKER. The question is on the third reading of the bill.
The bill was ordered to be read a third time, was read the third time, and passed.
A motion to reconsider the last vote was laid on the table.
A similar House bill, H. R. 13177, was laid on the table.

BRIDGE ACROSS PERDIDO BAY, FLORIDA AND ALABAMA

Mr. DENISON. Mr. Speaker, I also call up Senate bill 4457, authorizing the Northwest Florida Corporation, its successors and assigns, to construct, maintain, and operate a bridge across Perdido Bay, at or near Innerarity Point in Escambia County, Fla., to the mainland of Baldwin County, Ala., and ask for its consideration.
The SPEAKER. Is there objection?
There was no objection.
The SPEAKER. The Clerk will report the bill.
The Senate bill was read.
The SPEAKER. The question is on the third reading of the bill.
The bill was ordered to be read a third time, was read the third time, and passed.
A motion to reconsider the last vote was laid on the table.
A similar House bill was laid on the table.

BRIDGE ACROSS THE SAVANNAH RIVER

Mr. DENISON. Mr. Speaker, by authority of the Committee on Interstate and Foreign Commerce, I call up Senate bill 4474, authorizing the South Carolina and the Georgia State Highway Departments to construct, maintain, and operate a toll bridge across the Savannah River at or near Burtons Ferry, near Sylvania, Ga.
The SPEAKER. The gentleman from Illinois calls up a Senate bill which the Clerk will report.
The Clerk read the bill.
The bill was ordered to be read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.
A similar House bill (H. R. 13267) was laid on the table.

BRIDGE ACROSS WHITE RIVER

Mr. DENISON. Mr. Speaker, I call up Senate bill 4504, granting the consent of Congress to the State of Arkansas, through its State highway department, to construct, maintain, and operate a toll bridge across White River at or near Augusta, Ark., and ask for its immediate consideration, a similar bill having been reported and being on the calendar.
The SPEAKER. The gentleman from Illinois calls up a bill, which the Clerk will report.
The Clerk read the bill.
The bill was ordered to be read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.
A similar House bill (H. R. 13689) was laid on the table.

BRIDGE ACROSS THE RIO GRANDE

Mr. DENISON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table H. R. 12877, authorizing the Los Olmos International Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande at or near Weslaco, Tex., and agree to the Senate amendment, the amendment being merely a correction of the date of an act of Congress.
The SPEAKER. The gentleman from Illinois asks unanimous consent to take from the Speaker's table House bill 12877, with a Senate amendment, and agree to the Senate amendment. Is there objection?
There was no objection.
The SPEAKER. The Clerk will report the bill and the Senate amendment.
The Clerk read the title of the bill.
The Clerk read the Senate amendment.
The Senate amendment was agreed to.

JENNIE K. HUNT

Mr. MACGREGOR. Mr. Speaker, I present a privileged resolution from the Committee on Accounts.
The SPEAKER. The gentleman from New York presents a resolution, which the Clerk will report.
The Clerk read as follows:

House Resolution 183

Resolved, That there shall be paid out of the contingent fund of the House to Jennie K. Hunt, clerk to the late Hon. A. E. B. Stephens, of Ohio, an amount equal to one month's salary.

With the following committee amendment:

Strike out, in lines 3 and 4, the words "an amount equal to one month's salary" and insert in lieu thereof "$150 for services subsequent to his death."

The committee amendment was agreed to.
The resolution was agreed to.

KATE GILBERT

Mr. MACGREGOR. Mr. Speaker, I present another privileged resolution from the Committee on Accounts.
The SPEAKER. The gentleman from New York presents a resolution, which the Clerk will report.
The Clerk read as follows:

House Resolution 220

Resolved, That the Clerk of the House is authorized to pay, out of the contingent fund of the House, a sum not exceeding $500 to Kate Gilbert to reimburse her for expenses incident to the last illness and funeral of William R. Palmer, late an employee of the House of Representatives on the soldiers' roll.

The resolution was agreed to.

NORA B. BEATTIE

Mr. MACGREGOR. Mr. Speaker, I present another privileged resolution from the Committee on Accounts.
The SPEAKER. The gentleman from New York presents a resolution which the Clerk will report.
The Clerk read as follows:

House Resolution 210

Resolved, That there shall be paid out of the contingent fund of the House, to Nora B. Beattie, widow of David Beattie, late an employee of the House, a sum equal to six months' salary and an additional sum of $250 to cover the funeral expenses and the expenses of his last illness.

The resolution was agreed to.

EXTRA SERVICES IN ENROLLING ROOM

Mr. MACGREGOR. Mr. Speaker, I ask unanimous consent for the present consideration of a resolution which I have sent to the Clerk's desk.
The SPEAKER. The gentleman from New York asks unanimous consent for the present consideration of a resolution which the Clerk will report.
The Clerk read as follows:

House Resolution 224

Resolved, That there shall be paid out of the contingent fund of the House during the remainder of the session not exceeding $100 for additional clerical services in the Enrolling Room.

The SPEAKER. Is there objection?
Mr. GARNER of Texas. Mr. Speaker, reserving the right to object, has this resolution been considered by the full committee?
Mr. MACGREGOR. It has not, but it is the usual resolution passed at the end of a session and the resolution simply provides $100 for extra services.
Mr. GARNER of Texas. It is satisfactory to the entire subcommittee that considered it?
Mr. MACGREGOR. It is asked for by the Clerk of the House.
Mr. GARNER of Texas. Has the gentleman consulted any Democrat on his committee about this resolution?
Mr. MACGREGOR. I confess I have not, because it is the usual resolution passed at the end of a session for extra services in the enrolling room to take care of the mass of work which comes in at the close of a session. The Clerk of the House handed it to me and asked me to take care of it.
The SPEAKER. Is there objection?
There was no objection.
The resolution was agreed to.

DISABLED EMERGENCY OFFICERS' BILL

Mr. SIMMONS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the Emergency Officers' retirement bill.
The SPEAKER. Without objection it is so ordered.
There was no objection.
Mr. SIMMONS. Mr. Speaker, pursuant to permission granted me by the House to extend my remarks on the disabled emergency officers' bill, I offer the following for printing in the CONGRESSIONAL RECORD:
On May 11 the disabled emergency officers' bill passed the House and went to the President.
On May 12 the vice chairman of the national legislative committee of the American Legion issued a bulletin on the bill and sent it throughout the United States.

The American Legion officials to whom this and other bulletins were sent are entitled to know the truth. These bulletins contain a number of inaccurate and misleading statements that ought not to go unchallenged, although time will not permit the discussion of all of them with their unjust and untrue inferences. The CONGRESSIONAL RECORD, giving the debates fully, answers the personal charges against those of us who opposed this measure. We are content to leave that record as our answer. But leaving out the personal charges, let us consider facts.

This statement is made:

> Not a former World War enlisted man in the Congress worked or spoke against the bill.

Surely he who wrote this bulletin knew that the gentleman from Mississippi [Mr. RANKIN] controlled the time against the bill and that he "worked and spoke against" it. Surely he also knew that Mr. RANKIN's service during the World War was as an enlisted man. Surely he knew that the gentleman from South Dakota [Mr. JOHNSON], the gentleman from Missouri [Mr. MILLIGAN], the gentleman from Michigan [Mr. VINCENT], and myself all served as enlisted men before becoming commissioned officers. Then, why this obvious misstatement of fact?

Again the statement is made:

> The following veterans spoke abainst the bill:
> ROBERT G. SIMMONS, of Nebraska;
> BIRD J. VINCENT, of Michigan;
> JACOB L. MILLIGAN, of Missouri; and
> JOHN E. RANKIN, of Mississippi.

That statement is true. But why did they leave out of that list the gentleman from South Dakota [ROYAL JOHNSON]? True, they mention later on that he offered a substitute for the bill. They do not carry him in the list of those for the bill nor in the list of those against it. Neither do they quote his statement about this bill on the floor of the House that—

> I do not believe we could justify the law without amending it to cure the objections to which I have referred.

All of us who favored amendments were branded as enemies of the bill. The gentleman from Ohio [Mr. FITZGERALD], proponent of the bill, stated that he would "resist every amendment" and that there "is not any merit" in any of them. ROYAL JOHNSON, wearer of the croix de guerre and the distinguished-service cross, disabled emergency officer, member of the American Legion, chairman of the Veterans' Committee of the House—why was he not placed among the list of those veterans who opposed the bill? Was it because they dislike to acknowledge to the service men of the Nation that ROYAL JOHNSON, outstanding veteran of the House, refused to support this bill? There seems no other answer.

Then again, there is this statement:

> In addition to these veterans, the following nonveterans spoke against it:
> FINIS J. GARRETT, of Tennessee, minority leader;
> JOHN Q. TILSON, of Connecticut; majority leader;
> W. FRANK JAMES, of Michigan;
> GEORGE HUDDLESTON, of Alabama;
> OLGER B. BURTNESS, of North Dakota; and
> CHARLES C. KEARNS, of Ohio.

True it is, that these men all spoke against the bill, but why should Mr. TILSON, Mr. JAMES, and Mr. HUDDLESTON be classed as "nonveterans"? The membership of the House knows, and surely he who wrote this bulletin knew, that all three of those men have served America in time of war as soldiers. Mr. TILSON was a second lieutenant, Sixth United States Infantry, during the Spanish-American War. He was a lieutenant colonel Second Connecticut Infantry and served on the Mexican border during that trouble. He holds now a commission as colonel, Ordnance Department Reserve.

Mr. JAMES served as a private, Company F, Thirty-fourth Michigan Infantry, during the Spanish-American War.

Mr. HUDDLESTON served as a private in Company K, First Alabama Infantry, during the Spanish-American War.

Likewise, speaking against the bill and not mentioned at all in this bulletin, was the gentleman from New York [Mr. GRIFFIN]. He served as captain of Company F, Sixty-ninth Infantry, New York Volunteers, during the Spanish-American War and has had National Guard service both before and since. Also opposed to this bill was the gentleman from Michigan [Mr. MICHENER], who served throughout the Spanish-American War with Company B, Thirty-first Michigan Volunteer Infantry. Why should the service of these men who fought for America in the war with Spain be ignored and why should they be either entirely omitted or classed as nonveterans in the discussion of this bill? Is the American Legion now to ignore the service of those who fought in the war with Spain as they ignore and discriminate against their officers in this bill?

When I spoke to the House on May 10 I quoted from a number of bulletins sent out by the national legislative committee of the American Legion on this bill. Across the top of each of the bulletins on the first page in large letters is printed these words, "Give this wide publicity." Surely the proponents of this measure should not criticize my using their publicity in the debate here, and yet the inference is left again that giving "publicity" in the Congress is not the sort of "wide publicity" that the author of these bulletins desired or intended.

The bulletin stated that the President had until May 24 to approve or veto the bill and that—

> a Legion delegation will call upon him and urge his approval of the measure.

That they had a perfect right to do, and did do, and no one criticized them for it.

The bulletin continued:

> The opponents have announced their intention to work for a presidential veto. They can not endure a defeat in the open.

If it is proper, and I grant you that it is, that the proponents of this measure urge its approval by the President, wherein was it wrong for those of us who opposed it to urge its veto?

In the bulletin of the national legislative committee of the American Legion for May 5, 1928, the statement is made:

> There are 53 legionnaires in the House and only 3 of them are actively working against the bill, while 3 more will probably vote against it. So, on this basis, the legionnaires in the House are about 10 to 1 for the bill.

What was the fact about the vote? Forty-five World War veterans of the House voted on the question as to whether or not the bill should pass over the President's veto. On that vote, which was the only record vote, 27 voted for the bill, 18 were against it—exactly 3 to 2 and not 10 to 1 as the Legion had been told. Here let it be noted that had the nonveteran voted as did the veteran in the House, the bill would not have passed over the President's veto. Who were the 18 World War men who voted against the bill?

Mr. GIBSON, of Vermont, who served as captain of Infantry in the American Expeditionary Force, is, at present, colonel in the Vermont National Guard and has been commander of his home post of the American Legion. Much has been said about a subcommittee report in 1924 for this bill that I signed. Colonel Gibson also signed that report and by voting "no," three of the four Members who in 1924 signed the report for the bill were finally recorded against it.

Mr. JONES, of Texas, who served as an enlisted man in the Tank Corps.

Mr. VINCENT, of Michigan, served as first lieutenant of Infantry, Sixth Division.

Mr. WAINWRIGHT, of New York, lieutenant colonel, division inspector, Twenty-seventh Division; Assistant Secretary of War, 1921–1923.

Mr. SPEAKS, of Ohio, enlisted man, National Guard, in 1878; major in Spanish-American War; colonel, Ohio National Guard; brigadier general, Mexican border and World War, Thirty-seventh Division.

Mr. CHASE, of Pennsylvania, enlisted man, Air Service, sergeant major, Third A. I. C.; former post commander and department commander, American Legion, in Pennsylvania, 1925.

Mr. JOHNSON, of South Dakota, whose splendid record I have already given.

Mr. RANKIN, of Mississippi, who served as a private, Field Artillery.

Mr. MILLIGAN, of Missouri, captain, Infantry; member of the Paris caucus from which came the American Legion. He also signed the subcommittee report for the bill in 1924.

Mr. WATRES, of Pennsylvania, major of Infantry, Twenty-eighth Division.

Mr. WOODRUFF, of Michigan, enlisted man, Thirty-third Michigan Infantry, Spanish-American War; major, Infantry, World War, Eighty-sixth Division. He, with ROYAL JOHNSON, started the investigation of the war frauds. Mr. WOODRUFF, while not actually voting, stated to the House that he would have voted "no" had he been present.

Mr. HILL, of Alabama, first lieutenant of Infantry, Seventeenth and Seventy-first Infantry, Eleventh Division. Former post commander of American Legion.

Mr. UPDIKE, of Indiana, private, Sixth Regiment, United States Marines, wounded five times.

Mr. THURSTON, of Iowa, veteran of the Spanish-American War, Philippine insurrection, and World War.

Mr. FROTHINGHAM, of Massachusetts, major, The Adjutant General's Department, former commander home post of American

Legion; committee chairman at St. Louis caucus, American Legion; speaker of the house and Lieutenant Governor of Massachusetts.

Mr. ANDREW, of Massachusetts, French ambulance service, 1915–1917; major and lieutenant colonel, ambulance service, American Expeditionary Forces, 1917–1919; first vice commander American Legion in Massachusetts and former commander home post of the American Legion.

Mr. BACON, of New York, Plattsburg Training Camp; Mexican border; major, Field Artillery, World War, now a colonel (reserve), Field Artillery. Has the distinguished-service medal. I was in the balloon division of the Air Service.

Of the World War Veterans' Legislation Committee voting, 8 were against and 9 for the bill. Of the veterans on that committee who voted, 5 were against the bill, 4 for it.

Of the Spanish-American War veterans of the House, 11 were against the bill and 5 for it.

Those voting for were Mr. CRAIL, of California; Mr. MOORMAN, of Kentucky; Mr. SELVIG, of Minnesota, Mr. DYER, of Missouri; and Mr. LEAVITT, of Montana. Those voting "no" were Mr. HUDDLESTON, of Alabama; Mr. FREEMAN and Mr. TILSON, of Connecticut; Mr. THURSTON, of Iowa; Mr. MICHENER and Mr. JAMES, of Michigan; Mr. WAINWRIGHT, of New York; Mr. SPEAKS, of Ohio; and Mr. HULL of Tennessee. Mr. GRIFFIN, of New York, spoke against the bill, but was absent on this vote. Mr. WOODRUFF, of Michigan, while not voting, stated he would have voted "no" had be been present.

The bill is now a law. This résumé of the vote is to enable those who care to know the facts to have them easily accessible. The list of veterans used here is believed accurate. The Spanish-American list was furnished by the Veterans' Committee of the House. The World War list is furnished by the American Legion.

VOCATIONAL REHABILITATION OF DISABLED RESIDENTS OF THE DISTRICT OF COLUMBIA

Mr. SUMMERS of Washington. Mr. Speaker, I ask unanimous consent for the present consideration of H. R. 13251, a bill to provide for the vocational rehabilitation of disabled residents of the District of Columbia, and for other purposes, with an amendment. This bill has been unanimously reported by the committee and is on the calendar.

The SPEAKER. The gentleman from Washington asks unanimous consent for the present consideration in the House as in Committee of the Whole of a bill which the Clerk will report.

Mr. SNELL. Mr. Speaker, is this a unanimous consent request?

The SPEAKER. It is.

Mr. SNELL. Mr. Speaker, perhaps we had better have a short statement from the gentleman from Washington.

The SPEAKER. The Chair has directed the reading of the bill so the House may be informed.

The Clerk read the bill, as follows:

Be it enacted, etc., That on and after July 1, 1928, the Federal Board for Vocational Education is authorized and directed to provide for the vocational rehabilitation and return to employment of any disabled resident of the District of Columbia.

SEC. 2. For the purposes of this act (1) the term "disabled resident of the District of Columbia" means any bona fide resident in the District of Columbia who, by reason of a physical defect or infirmity, whether congenital or acquired by accident, injury, or disease, is or may be expected to become totally or partially incapacitated for remunerative occupation; and (2) the term "vocation rehabilitation" means the rendering of any such disabled resident fit to engage in a remunerative occupation.

SEC. 3. (a) The United States Public Health Service is authorized and directed to cooperate with the Federal Board for Vocational Education in carrying out the provisions of this act, and the board may, in carrying out such provisions, obtain the cooperation of (1) any other establishment in the executive branch of the Government; (2) any department or agency of the government of the District of Columbia; (3) any State, Territory, or political subdivision thereof; or (4) any private agency or person.

(b) The Federal Board for Vocational Education and the United States Employees' Compensation Commission are authorized and directed to formulate a plan of cooperation for the vocational rehabilitation of civil employees of the United States disabled while in the performance of duty and who reside in the District of Columbia, and such board may, in carrying out the provisions of this act, in so far as it applies to such civil employees, carry out such plan.

SEC. 4. The board is authorized to prescribe such rules and regulations as may be necessary or appropriate to carry out the provisions of this act.

SEC. 5. The Federal Board for Vocational Education is authorized to make such expenditures (including expenditures for personal services at the seat of Government and elsewhere, for printing and binding, for traveling and subsistence expenses, for the payment of tuition to schools, for the compensation of tutors, for the purchase of prosthetic appliances and instructional supplies and equipment, and for the payment of necessary expenses of persons undergoing vocational rehabilitation) as may be necessary to carry out the provisions of this act.

SEC. 6. For the purpose of carrying out the provisions of this act there is authorized to be appropriated to the Federal Board for Vocational Education a sum not to exceed $20,000 for each fiscal year; except that for the fiscal year ending June 30, 1929, there is authorized to be appropriated the sum of $16,000, of which not more than $8,000 shall be expended for salaries.

SEC. 7. The board shall submit to Congress on or before the first day of each regular session a report of all rehabilitation service provided and of all expenditures made under this act during the preceding fiscal year.

With the following committee amendment:

On page 3, in line 14, strike out "$20,000" and insert "$15,000."
In line 16, strike out "$16,000" and insert "$12,000."
In line 17, strike out "$8,000" and insert "$6,000."

Mr. SNELL. Mr. Speaker, I think the gentleman from Washington [Mr. SUMMERS] should make a statement about this before the unanimous-consent stage has been passed. I would like to know if this goes any further than what we are already doing in the States at the present time, and also what the provision is about the District paying its normal share of 50 per cent, the same as is done by the States.

Mr. SUMMERS of Washington. I will say that this bill is meant to parallel the Federal act which we passed in 1920 and which is now cooperating in 41 States. I trust the seven other States will be cooperating soon. The bill as written did not provide for cooperation financially by the District of Columbia, but I am submitting an amendment putting it on exactly the same basis as that enjoyed by the States; that is, a 50-50 basis.

I would like to say that during the seven or eight years that this work has been done over the country there have been some thousands of rehabilitated cripples, that have cost on the average $255 for taking them off of the street corner selling shoestrings and putting them into gainful employment. In Buffalo, N. Y., for instance, out of 369 cases 52 per cent of them are earning as much or more money after rehabilitation as they did before. There is a great saving to the community beside the humanitarian element, that, of course, is the most appealing.

Mr. SNELL. As I understand it, then, it simply puts the District in exactly the same position as the States that are taking advantage of this legislation and nothing more?

Mr. SUMMERS of Washington. That is correct.

The SPEAKER. Is there objection?

Mr. COLLINS. I object.

Mr. SUMMERS of Washington. Will the gentleman withhold his objection?

Mr. COLLINS. Yes; I will withhold it.

Mr. SUMMERS of Washington. May I call attention to the fact that Mississippi is doing exactly this work, and one of the best reports that comes in is from the State of Mississippi? It is quoted in the hearings. This is merely to take the man who is a hopeless cripple and instead of putting him on charity or in an almshouse give him an opportunity to earn a living for himself and family. There are 277 of such cases in the District of Columbia, with 686 dependents. Surely the gentleman will not object to our doing this work, which is being done in 41 States by the same cooperation with the Federal Government, and which has made such a wonderful showing.

Mr. CRAMTON. Will the gentleman yield?

Mr. SUMMERS of Washington. Yes.

Mr. CRAMTON. I wonder if the gentleman from Mississippi is aware of the amendment which the gentleman from Washington is to offer, which requires the same cooperation financially by the District as the States have to give.

Mr. COLLINS. I have that in mind, and I also have in mind the fact that the Federal Government contributes $9,000,000 to the support of the District.

Mr. SUMMERS of Washington. It will not contribute any more with this bill enacted into law, I want to say to the gentleman; and besides, a large number of these people are not taxpayers in the District but Federal employees who come from my State and yours, and so on, all over the country.

Mr. CRAMTON. This contribution is just what we are making now to Michigan and Mississippi. We are making this contribution now to Michigan and Mississippi and other States.

Mr. LOWREY. Will the gentleman yield to me if he has the floor?

Mr. SUMMERS of Washington. Yes; I yield.

Mr. LOWREY. I want to say, as the ranking minority member of the committee that is reporting this bill, we studied it very carefully. It is not adding practically anything to the amount we give the District, and I do not think we have reported out any bill that was backed by better authority or more justifiable or one that would cause more sadness if the bill was killed.

Mr. COLLINS. Mr. Speaker, I withdraw my objection.

Mr. SUMMERS of Washington. I thank the gentleman from Mississippi. That rehabilitation is more permanently beneficial for the individual, for the family, and for the community at large than is relief, is an accepted fact.

Dr. Richard Cabot says in The Social Workers' Goal:

> We have begun to recognize that the "unemployed" as they march in procession may represent a considerable percentage of the "unemployable or of the professionally unemployed," while many others just as badly off but less vocal escape our notice.
>
> So with the physically handicapped. Unless we make a house-to-house canvass, as was done in the Cleveland survey, the group that presents themselves at an agency organized to help may represent the more vocal plagent fraction and often those hardest to help, not the whole number nor those most capable of being aided.
>
> * * * * * * *
>
> And so we write rash volumes about the criminal or the unchaste woman, forgetting that our knowledge is based only on the certainly small and probably unrepresentative fraction who get caught because they have not the skill nor luck to escape detection.

ONE HUNDRED AND TWELVE THOUSAND INJURED ANNUALLY

The law we passed in 1920 covers all injured persons, whether on the farm or in the cities, but does not apply to the District of Columbia; but after listening to reports of the Rehabilitation Board in my subcommittee on independent offices of the Appropriations Committee and learning of the wonderful work that was being accomplished, it appeared to me that the same benefits ought to be brought to the disabled in the District of Columbia. So this bill was introduced. It is appalling, the number of accidents that are occurring over the country—1 death from accident every six minutes in the United States; 63 deaths from industrial accidents per 105,000 persons permanently disabled by industrial accidents annually, with a grand total of about 112,000 permanently disabled from industrial accidents and public accidents combined in the country. Not all of these require the assistance of the Federal or State governments or the public in rehabilitating them and taking care of them, but it is estimated that about 50,000 of them do require such assistance.

I think I can not give you a better idea of the effectiveness of the work that is being done than to tell you something about what an investigation of the results of the past five or six years shows. I am going to quote to you from the report from Buffalo, N. Y. From 1921 to 1925 there were 369 rehabilitants in the district of Buffalo, N. Y., of whom 146, or 40 per cent, are now working on an increased wage and 46, or 13 per cent, are working at the same wage as before the accident, while 32, or 9 per cent, are now working at a decreased wage and 46, or 12 per cent, are out of the district, probably employed; 8, or 2 per cent, are out of the district, probably not employed; 18, or 5 per cent, are convalescing; 15, or 4 per cent, are dead; 12, or 3 per cent, are not employed; and 46, or 12 per cent, not found, making a total of 369.

Here is an interesting statement. The average weekly wage at the time of disablement of the persons rehabilitated in 1924 was $23.20, whereas after rehabilitation their wage was $25.28 per week. Of the group rehabilitated, 87 per cent had no earning power during the period of disablement, while 6 per cent had never worked prior to rehabilitation. Again, after rehabilitation the average weekly wage of the group that had never worked until rehabilitated was $19.30.

There is an equally favorable showing made by Mississippi, Montana, Michigan, and different parts of the country. There are 41 States of the Union cooperating with the Federal Government in this work. Here is an interesting table from Wisconsin for the five-year period from 1921 to 1926, showing the total number of disabled persons rehabilitated, 1,036; total gross annual earnings after rehabilitation, $499,208.09. The total gross annual earnings after rehabilitation, $1,159,948.18; the per capita annual earnings before rehabilitation, $481.85, and the per capita annual earnings after rehabilitation, $1,119.64. The percentage of increase of earnings was 232 per cent over the amount that they were receiving before their injuries. The per capita cost of rehabilitation was $242.37. The per capita cost in all of the States where work is done over the country is $255 for rehabilitating a single case, which is less than the cost of maintaining an individual in the poorhouse or almshouse for one year. Rehabilitating them is a single-year cost, whereas the maintenance cost would extend for a lifetime of probably 20 to 40 years. We may, therefore, reasonably conclude that the total cost of rehabilitation is from 2½ to 5 per cent of the total cost of maintenance.

MISSISSIPPI SHOWS BRILLIANT RESULTS

Since the beginning of rehabilitation work in Mississippi 914 crippled persons who were totally or partially dependent for support on relatives, friends, or the community, are now happy, self-sustaining, productive citizens because of rehabilitation service.

During the first year after training these disabled persons earned more than seven times the amount appropriated by the State for their training.

The crippled persons trained in Mississippi are engaged in 81 different kinds of employment.

The average length of training period for men was five months, for women seven months.

The average cost per case for men was $131.92, for women $123.94.

In many cases the disabled person earns in one month more than it has cost the State and Federal Governments to train him.

Among the cases given hospital treatment were 15 young men and women who had never walked but had to crawl. All are now able to stand erect and walk with crutches.

Six hundred and fifteen disabled persons, at the present time, are applicants for aid.

A SUCCESS IN MONTANA

In most instances applicants for training are unemployed and have no income. All of the bureau's beneficiaries rehabilitated the past year were in that plight. Following a period of training their average wage or salary is now $95 a month. Most of them have expectations of making much more than this within a short time. Among our successful trainees is a young married man afflicted with paralysis, who was taught linotype operation. He was married, quite helpless, and without funds. Now he receives $155 a month as operator on a weekly newspaper. Another man, similarly afflicted and with a large family to support, was given instruction in shoe repairing. To-day he operates his own shop and earns a good living for himself and his dependents.

SHAVES WITHOUT HANDS

Let me give you the details of one pupil as related to my committee by Mr. Cummings, of the Federal Vocational Board. This man was in a poorhouse when the rehabilitation division contacted him. He had lost both hands between the wrist and elbow in trying to hop a freight train. The county commissioners did not know what to do with him, so they put him in the poorhouse. The rehabilitation division talked to the man and found that, although illiterate, he was intelligent and was interested in raising chickens.

The authority was granted by the commissioners for the rehabilitation division to take him out and train him. We equipped him with two Dorrance hooks. That is an apparatus with straps over the shoulders, and by moving the shoulders the man performs the different operations. It is an uncanny arrangement. He was equipped with those, put on a poultry farm, and taught the poultry business by being on the job. He was uneducated; he could not go to school. He learned it by actual employment and training on the job. When I saw him some two years ago he was in charge of a flock of 5,000 white leghorn hens at the State tuberculosis sanatorium. He lived in a little bungalow on the grounds, and that morning he shaved himself with a safety razor and used his knife and fork at the table just about as well as I use them. He is making now $200 a year. The State of Montana is paying him $200 a year and giving him a home to live in, whereas before it was costing the State of Montana $40 a month to keep him in the poorhouse. He is now about 27 years old, so that at $40 a month for 30 years he probably would have cost them close to $15,000.

So something may be done for a man even though he is seriously disabled.

This is the humanitarian economic work we want to do in the District of Columbia.

The SPEAKER. Is there objection to the request of the gentleman from Washington [Mr. SUMMERS]?

There was no objection.

The committee amendments were agreed to.

Mr. SUMMERS of Washington. Mr. Speaker, I offer an amendment.

The SPEAKER. The gentleman from Washington offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SUMMERS of Washington: On page 3, at the end of line 17, strike out the period, insert a colon, and add the following: "*Provided*, That no such appropriations of Federal funds shall be available for expenditure except when matched by equal appropriations of District of Columbia funds which are hereby authorized."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

INTERPARLIAMENTARY UNION

Mr. BURTON. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 13930) to authorize an appropriation for the American group of the Interparliamentary Union.

The SPEAKER. The gentleman from Ohio asks unanimous consent for the present consideration of the bill which the Clerk will report.

The Clerk read the bill as follows:

Be it enacted, etc., That in order to assist in meeting the annual expenses of the American group of the Interparliamentary Union for the fiscal year beginning July 1, 1928, there is hereby authorized to be appropriated the sum of $10,000, or so much thereof as may be necessary, such appropriation to be disbursed on vouchers to be approved by the president and the executive secretary of the American group.

The SPEAKER. Is there objection?

Mr. GARNER of Texas. Reserving the right to object, I would like to ask the gentleman from Ohio if this is a unanimous report from the Committee on Foreign Affairs?

Mr. BURTON. It is.

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. BURTON a motion to reconsider the vote was laid on the table.

NIGHT DIFFERENTIAL PAY BILL

Mr. RATHBONE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the post office night differential bill.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. RATHBONE. Mr. Speaker, it is with regret that I feel constrained to vote to override the presidential veto of the measure before us, known as the night differential bill. I am not convinced by the reasons advanced by the Chief Executive and feel it my duty to vote according to my own convictions, which are that this is a highly just and salutary measure and ought to be enacted into law.

For years I have believed in and championed the principle of this bill and I can not repudiate it now merely because the President's views and my own differ.

Every day of the year there is an average of over 70,000,000 pieces of mail deposited in the post offices of the United States. The slogan of the Postal Service is "Keep the mails moving," and from the time a letter, parcel, or newspaper is deposited in the mail box until it is delivered to the addressee, it is the aim and the practice of the postal employees to keep that mail continually moving toward its destination.

Because over 75 per cent of all mail is deposited after 4 o'clock in the afternoon, post-office clerks are required to work far into the night in order that every piece may be properly routed and dispatched on the first train, boat, or airplane, that will take it to its destination.

These men who perform this night work are the expert distributors, who must have a thorough practical working knowledge of intricate schemes of distribution involving a mass of train schedules, types of services on different trains, and the connecting or junction points of intersecting lines. They are required to know these facts instantly in reference to anywhere from 3,000 to 10,000 post offices. To acquire this knowledge and to keep it current with the continual changes they must put in many hours of study and practice upon their own time.

They are examined at least once yearly upon their knowledge of these schemes and must attain a proficiency of at least 95 or 98 per cent correctness. Upon their proficiency in these examinations as well as upon their daily work depend their chances for promotion in the automatic salary grades or their retention in the grade to which they have attained.

In many of the larger offices also they work under a system by which a record is kept of the weight of the mail which each clerk handles, and every clerk whose record is below the average for his crew, is admonished and speeded up, which automatically increases the average, thus compelling these men into a ceaseless competition that taxes not only their physical strength but places an unwarranted mental and nervous strain upon them.

In spite of the known extra fatigue occasioned by night work and the highly exacting nature of the work, and also in spite of the time and study that must be devoted to distribution schemes outside of working hours, these men receive no extra compensation or consideration for the disadvantages and discomforts of night work, but must work a minimum of eight hours nightly.

Postal Service is a 24-hour service, and its regularity and celerity are essential to our modern social, civic, commercial, and industrial world. There must, therefore, always be night work in the Postal Service. That it can be materially reduced there is no doubt, but it can not be eliminated. It should be reduced to the absolute minimum. When that is done, those men who are still compelled to work unnatural hours should receive consideration for the extra fatigue, for being deprived of participation in the normal social and civic activities of their communities.

Private industry recognizes the hardships of night work, and almost invariably makes compensation for it in increased wages or shorter hours or both. The Government itself, in the Government Printing Office and in the navy yards and arsenals, pays a higher rate for night work than for day work. During the war, the War Labor Board, a Government agency, in its awards took cognizance of the hardship of night work and invariably granted a differential in favor of the night worker.

Night work should, in my judgment, receive a greater compensation than that given to work by day because it involves a greater strain in all ways upon the employee. It involves a loss of sleep and work during hours when sleep is most beneficial and natural. Workers employed at night are invariably deprived of sunlight, one of the essentials of health. The danger of eye strain from close application to work is intensified at night by insufficient and improper lighting of work rooms or by the glare of excessive or unshaded light, which may be as injurious to the eyes as insufficient illumination. Night work and late overtime hours prevent the workers from taking advantage of most of the educational opportunities offered by enlightened communities. For these and other reasons night work is and should be almost universally regarded as far more irksome, undesirable, and unwholesome than day work.

In 1922 Postmaster General Work, and in 1924 Postmaster General New called attention to the need for legislation which would tend to equalize day and night work by providing for a higher rate of pay for the latter.

Postal employees are human beings with the same desires for normal, social, and fraternal activities and with the same love for their families and yearning for their companionship as other American citizens. But because they are engaged in this great and highly essential public service to which they have dedicated their lives, they must forego, for many years, the normal companionship of their children, and any participation in the social, fraternal, or civic activities of their respective communities.

The Government should be a model employer and should insist upon American standards of employment in its service.

I shall, therefore, cast my vote for this bill, the objections of the President to the contrary notwithstanding. I believe that the enactment of this measure will be acclaimed as an act of justice and humanity by the American people.

FOUR YEARS OF RESTRICTED IMMIGRATION

Mr. HOLADAY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on immigration and deportation.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. HOLADAY. Mr. Speaker, on the 28th of February, 1924, in urging the passage of a restrictive immigration law, I said:

OUR DUTY TO AMERICA

It is our duty to allay and prevent race prejudice and to offer every opportunity and facility for our foreign born to fall into step with America. No greater service can be performed for our foreign born than to restrict immigration for the next few years, and thus give those that are now here a better opportunity to become assimilated.

This is the opportunity for Congress to preserve America and her uplifting influences, not only for the benefit of America but for the benefit of the entire world.

On May 26, 1924, a Republican Congress passed and a Republican President signed America's first permanent "restrictive immigration law." This act became effective July 1, 1924, and is known as the "Immigration Act of 1924." Three years and

eleven months have elapsed, a sufficient length of time to permit of a fair estimate of the effect of this law.

For a hundred years prior to July 1, 1924, immigrants in an ever-increasing stream had poured into America. The numbers by 10-year periods are as follows:

1821–1830	143,439
1831–1840	599,125
1841–1850	1,653,275
1851–1860	2,571,036
1861–1870	2,377,279
1871–1880	2,812,191
1881–1890	5,246,613
1891–1900	3,687,564
1901–1910	8,795,386
1911–1920	5,735,811
1921–1924	2,344,599
1925	294,314
1926	304,488
1927	335,175
1928 (estimated)	320,000
Total	37,220,295

The figures for the first 11 months of the current fiscal year ending June 30, 1928, indicate that immigration for 1928 will fall slightly below the immigration of 1927.

An analysis of the 335,175 immigrant aliens admitted to the United States during 1927 is interesting.

They came from—

Europe	168,368
Canada and Newfoundland	84,580
Mexico	67,721
Others, total	14,506
Total	335,175

	Admitted	Departed
21 years and under	129,325	6,286
22–44 years	176,938	50,917
Over 45 years	28,912	16,163
Total	335,175	73,366

The net immigration gain in foreign-born population for 1924, the last year preceding the enactment of the 1924 immigration law, was 630,107, while for the following three years under the operation of the law the average net gain in foreign-born population has been 230,284. If we take into account the average death rate and the number deported we find that the net gain in foreign-born population is about 100,000 annually instead of 1,000,000 annually, as it was in 1913 and 1914.

The "1924 immigration law" does not apply the quota to the countries of the Western Hemisphere.

It may be noted that of the 335,171 immigrant aliens entering the United States in 1927, approximately 85,000 came from Canada and 67,000 from Mexico.

Immigration from Canada presents no difficult problems, but the character of the immigrants entering from Mexico presents a problem, the successful solution of which may perhaps be effected only by extending the provision of the quota law to Mexico.

The struggle for self-preservation is not, as many appear to believe, confined to aliens seeking to enter the country, nor to aliens who, having gained lodgment by unfair means, resist all efforts to dislodge them, but is shared by Americans and aliens alike who have a right to be and remain here in unimpaired enjoyment of the blessings which this country has to offer. Were we indefinitely and without limitation or discrimination to share these blessings with those who wish to come and whom we do not need, and with the aliens already here who violate our hospitality, we would sooner or later be no better off than the supplicants; in short, we would eventually have no need of immigration laws, since the inducements to come here would cease to exist. The welfare of the millions making up our own country must be held steadfastly paramount. It is not nearly so cruel, if cruelty it be, to reject the ones who threaten our well-being as it would be to subject those in our midst who are healthy, happy, prosperous, and law-abiding to the danger of unfair competition, the result of unrestricted immigration and its attending train of lowered living standards and other devitalizing processes.

ALIEN CRIMINAL DEPORTATION

On February 11, 1925, speaking in support of the alien criminal deportation bill, I said:

We believe that no provision in this bill will work the least hardship on any worthy and law-abiding alien who is legally in the United States. We believe that it will be a positive benefit to aliens and equally beneficial to every citizen of the United States, both foreign and native born. This statement has been fully justified by the records of the Bureau of Immigration for the last three years.

In 1927 the number of aliens deported was 12,055, and the number subject to deportation, permitted to depart voluntarily, was 14,619. Included in this 26,674 undesirable aliens were many hundreds of insane, feeble-minded, prostitutes, narcotic peddlers, criminals of every class, and persons afflicted with loathsome or dangerous contagious diseases.

The Bureau of Immigration has attempted to work in cooperation with the penal and public health boards of the various States, and has been successful in this effort in every State except New York. It is the practice for the proper boards of the various States to notify the Bureau of Immigration when an alien convict is released for parole, so that the Government can take immediate steps to deport him.

At the time of the passage of the immigration act of 1924 there was great opposition on the part of many "foreign-born organizations," but with almost four years of beneficial operation of the law we are happy to learn that opposition to the restricted immigration principle has been greatly allayed.

The foreign born themselves realize that they have been tremendously benefited by restricted immigration.

Since 1924 the policy of the Bureau of Immigration has been to discourage married men from immigrating to the United States unless accompanied by their families.

The present law permits an American citizen to bring into this country outside of the quota his wife and unmarried children under 18 years of age.

An alien, if well qualified and desirous of embracing American opportunities to the fullest extent, may become an American citizen upon five years' residence in the United States. By July 1, 1929, every alien who entered the United States prior to the enactment of the 1924 law will have had the opportunity of becoming an American citizen, and as such bringing to America his wife and children.

The problem of "reuniting families" will therefore solve itself by July 1, 1929, without any further amendment of the present immigration law.

With a system of inspection in Europe and restricted numbers we have been able to better detect and prevent the entry of many undesirable aliens, and thus our country has been benefited not only by the entry of fewer aliens but those that have entered have been of a better and more desirable class.

I believe the "restrictive immigration law of 1924" to be the most important and beneficial measure that has been enacted by the American Congress within the last 50 years.

Its maintenance as the bulwark of American wages, living standards, social conditions, and political liberty becomes the sacred duty of every American citizen, be that citizen native or foreign born.

MONUMENT ON SITE OF BATTLE BETWEEN SIOUX AND PAWNEE INDIANS

Mr. LUCE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 9194) authorizing the Secretary of the Interior to acquire land and erect a monument on the site of the battle between the Sioux and Pawnee Indian Tribes in Hitchcock County, Nebr., fought in the year 1873, and concur in the Senate amendment.

The SPEAKER. The gentleman from Massachusetts ask unanimous consent to take from the Speaker's table the bill (H. R. 9194) and concur in the Senate amendment. The Clerk will report the bill.

The Clerk read the bill, with the Senate amendment.

The SPEAKER. Is there objection?

Mr. CRAMTON. Reserving the right to object, I have studied the Senate amendment as it appears in the RECORD, and it seems to me that it should be amended in two respects. If the amendments commend themselves to the gentleman from Massachusetts, he can adopt them, or perhaps he would like to have it passed over for the present so that he can study them.

Mr. SHALLENBERGER. If the gentleman from Michigan will permit——

Mr. CRAMTON. As the amendment is printed in the RECORD it says the title to the land "deemed appropriated," and it should be the land "deemed appropriate." It may be a misprint in the RECORD. It should provide, since they strike out the donation of a site, after the word "Nebraska" it should say "the acquisition of the site" which would mean acquisition of the site without expense to the Federal Government.

Mr. SHALLENBERGER. When the bill came before the Senate it provided that the title should be in Nebraska instead of the Federal Government.

Mr. CRAMTON. I think that is all right. I have been advised that the word "appropriate" is correct in the bill. Now, the only suggestion I have is that the bill specifically provide that the acquisition of the site shall be without expense to the Federal Government, and that can be easily done by inserting, after the word "Nebraska," "the acquisition of the site."

Mr. SHALLENBERGER. The time is getting so short and that will make it necessary for the bill to go back to the Senate. There will be no question about the title.

Mr. CRAMTON. I have perfect confidence in the gentleman from Nebraska. Can the gentleman from Nebraska assure us that the site is to be furnished without any expense to the Federal Government?

Mr. SHALLENBERGER. I can.

Mr. CRAMTON. That satisfies me.

The SPEAKER. Is there objection?

There was no objection.

The Senate amendment was agreed to.

FORT DEFIANCE, OHIO

Mr. LUCE. Mr. Speaker, I present a conference report on Senate Joint Resolution 82, relating to Fort Defiance, Ohio, for printing.

MUSCLE SHOALS

Mr. MORIN. Mr. Speaker, I call up the conference report on Senate Joint Resolution 46 and ask unanimous consent that the statement be read instead of the report.

The SPEAKER. The gentleman from Pennsylvania calls up the conference report on Senate Joint Resolution 46, and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

Mr. BYRNS. Reserving the right to object, I want to ask the gentleman from Pennsylvania a question. There are some Members like myself who are very much opposed to the conference report. Is it the gentleman's purpose to allow us a reasonable time in which to express our views?

Mr. MORIN. I have been informed by gentlemen who controlled the time in opposition in the House that they did not wish to debate it. I will be glad to yield time out of the hour to any Member who wants to express his views.

Mr. FROTHINGHAM. We are entitled to a certain amount of time.

Mr. MORIN. Yes, and I will give gentlemen a reasonable time out of the hour.

Mr. LINTHICUM. Will the gentleman yield me five minutes?

Mr. MORIN. I will.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the statement.

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the title of the joint resolution, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the text of the joint resolution, and agree to the same with an amendment as follows:

In lieu of the language put in by the House insert the following:

"That for the purpose of maintaining and operating the properties now owned by the United States in the vicinity of Muscle Shoals, Ala., in the interest of the national defense and for agricultural and industrial development, and to aid navigation and the control of destructive flood waters in the Tennessee River and Mississippi River Basins, there is hereby created a body corporate by the name of the "Muscle Shoals Corporation of the United States" (hereinafter referred to as the corporation). The board of directors first appointed shall be deemed the incorporators and the incorporation shall be held to have been effected from the date of the first meeting of the board. This act may be cited as the 'Muscle Shoals act of 1928.'

"SEC. 2. (a) The board of directors of the corporation (hereinafter referred to as the board) shall be composed of three members, not more than two of whom shall be members of the same political party, to be appointed by the President, by and with the advice and consent of the Senate. The board shall organize by electing a chairman, vice chairman, and other officers, agents, and employees, and shall proceed to carry out the provisions of this act.

"(b) The terms of office of the members first taking office after the approval of this act shall expire as designated by the President at the time of nomination, one at the end of the second year, one at the end of the fourth year, and one at the end of the sixth year, after the date of approval of this act. A successor to a member of the board shall be appointed in the same manner as the original members and shall have a term of office expiring six years from the date of the expiration of the term for which his predecessor was appointed.

"(c) Any member appointed to fill a vacancy in the board occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

"(d) Vacancies in the board so long as there shall be two members in office shall not impair the powers of the board to execute the functions of the corporation, and two of the members in office shall constitute a quorum for the transaction of the business of the board.

"(e) Each of the members of the board shall be a citizen of the United States, and shall receive compensation at the rate of $50 per day for each day that he shall be actually engaged in the performance of the duties vested in the board, to be paid by the corporation as current expenses, not to exceed, however, 150 days for the first year after the date of the approval of this act, and not to exceed 100 days in any year thereafter. Members of the board shall be reimbursed by the corporation for actual expenses (including traveling and subsistence expenses) incurred by them while in the performance of the duties vested in the board by this act.

"(f) No director shall have any financial interest in any public-utility corporation engaged in the business of distributing and selling power to the public nor in any corporation engaged in the manufacture, selling, or distribution of fixed nitrogen, or any ingredients thereof, nor shall any member have any interest in any business that may be adversely affected by the success of the Muscle Shoals project as a producer of concentrated fertilizers.

"(g) The board shall direct the exercise of all the powers of the corporation.

"(h) All members of the board shall be persons that profess a belief in the feasibility and wisdom, having in view the national defense and the encouragement of interstate commerce, of producing fixed nitrogen under this act of such kinds and at such prices as to induce the reasonable expectation that the farmers will buy said products, and that by reason thereof the corporation may be a self-sustaining and continuing success.

"SEC. 3. (a) The chief executive officer of the corporation shall be a general manager, who shall be responsible to the board for the efficient conduct of the business of the corporation. The board shall appoint the general manager, and shall select a man for such appointment who has demonstrated his capacity as a business executive. The general manager shall be appointed to hold office for 10 years, but he may be removed by the board for cause, and his term of office shall end upon repeal of this act, or by amendment thereof expressly providing for the termination of his office. Should the office of general manager become vacant for any reason, the board shall appoint his successor as herein provided.

"(b) The general manager shall appoint, with this advice and consent of the board, two assistant managers who shall be responsible to him, and through him, to the board. One of the assistant managers shall be a man possessed of knowledge, training, and experience to render him competent and expert in the production of fixed nitrogen. The other assistant manager shall be a man trained and experienced in the field of production and distribution of hydroelectric power. The general manager may at any time, for cause, remove any assistant manager, and appoint his successor as above provided. He shall immediately thereafter make a report of such action to the board, giving in detail the reason therefor. He shall employ, with the approval of the board, all other agents, clerks, attorneys, employees, and laborers.

"(c) The combined salaries of the general manager and the assistant managers shall not exceed the sum of $50,000 per annum, to be apportioned and fixed by the board.

"SEC. 4. Except as otherwise specifically provided in this act, the corporation—

"(a) Shall have succession in its corporate name.

"(b) May sue and be sued in its corporate name, but only for the enforcement of contracts and the defense of property.

"(c) May adopt and use a corporate seal, which shall be judicially noticed.

"(d) May make contracts, but only as herein authorized.

"(e) May adopt, amend, and repeal by-laws.

"(f) May purchase or lease and hold such personal property as it deems necessary or convenient in the transaction of its business and may dispose of any such personal property held by it.

"(g) May appoint such officers, employees, attorneys, and agents as are necessary for the transaction of its business, fix their compensation, define generally their duties, require bonds of them and fix the penalties thereof, and dismiss at pleasure any such officer, employee, attorney, or agent, and provide a system of organization to fix responsibility and promote efficiency.

"(h) The board shall require that the general manager and the two assistant managers, the secretary and the treasurer, the bookkeeper or bookkeepers, and such other administrative and executive officers as the board may see fit to include, shall execute and file before entering upon their several offices good and sufficient surety bonds, in such amount and with such surety as the board shall approve.

"(i) Shall have all such powers as may be necessary or appropriate for the exercise of the powers herein specifically conferred upon the corporation, including the right to exercise the power of eminent domain.

"SEC. 5. The board is hereby authorized and directed—

"(a) To operate existing plants for experimental purposes, to construct, maintain, and operate experimental plants at or near Muscle Shoals for the manufacture of fertilizer or any of the ingredients comprising fertilizer for experimental purposes.

"(b) To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants. Such contracts may provide either for outright purchase by the Government or only for the payment of carrying charges on special materials manufactured at the Government's request for its program;

"(c) To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce;

"(d) To cooperate with national, State, district, or county experimental stations or demonstration farms, for the use of new forms of fertilizer or fertilizer practices during the initial or experimental period of their introduction;

"(e) The board shall manufacture fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen. The fixed nitrogen provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops.

"(f) Under the authority of this act the board may donate not exceeding 1 per cent of the total product of the plant or plants operated by it to be fairly and equitably distributed through the agency of county demonstration agents, agricultural colleges, or otherwise as the board may direct for experimentation, education, and introduction of the use of such products in cooperation with practical farmers so as to obtain information as to the value, effect, and best methods of use of same.

"(g) The board is authorized to make alterations, modifications, or improvements in existing plants and facilities.

"(h) To establish, maintain, and operate laboratories and experimental plants, and to undertake experiments for the purpose of enabling the corporation to furnish nitrogen products for military and agricultural purposes in the most economical manner and at the highest standard of efficiency.

"(i) The board shall have power to request the assistance and advice of any officer, agent, or employee of any executive department or of any independent office of the United States, to enable the corporation the better to carry out its powers successfully, and the President shall, if in his opinion the public interest, service, and economy so require, direct that such assistance, advice, and service be rendered to the corporation, and any individual that may be by the President directed to render such assistance, advice, and service shall be thereafter subject to the orders, rules, and regulations of the board and of the general manager.

"(j) Upon the requisition of the Secretary of War or the Secretary of the Navy to manufacture for and sell at cost to the United States explosives or their nitrogenous content.

"(k) Upon the requisition of the Secretary of War the corporation shall allot and deliver without charge to the War Department so much power as shall be necessary in the judgment of said department for use in operation of all locks, lifts, or other facilities in aid of navigation.

"(l) To produce, distribute, and sell electric power, as herein particularly specified.

"(m) No products of the corporation shall be sold for use outside of the United States, her Territories and possessions, except to the United States Government for the use of its Army and Navy or to its allies in case of war.

"SEC. 6. In order to enable the corporation to exercise the powers vested in it by this act—

"(a) The exclusive use, possession, and control of the United States nitrate plants Nos. 1 and 2, located, respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings connected therewith, all tools and machinery, equipment, accessories, and materials belonging thereto, and all laboratories and plants used as auxiliaries thereto; the fixed-nitrogen research laboratory, the Waco limestone quarry, in Alabama, and Dam No. 2, located at Muscle Shoals, its power house, and all hydroelectric and operating appurtenances (except the locks), and all machinery, lands, and buildings in connection therewith, and all appurtenances thereof are hereby intrusted to the corporation for the purposes of this act.

"(b) The President of the United States is authorized to provide for the transfer to the corporation of the use, possession, and control of such other real or personal property of the United States as he may from time to time deem necessary and proper for the purposes of the corporation as herein stated.

"SEC. 7. (a) The corporation shall maintain its principal office in the immediate vicinity of Muscle Shoals, Ala. The corporation shall be held to be an inhabitant and resident of the northern judicial district of Alabama within the meaning of the laws of the United States relating to venue of civil suits.

"(b) The corporation shall at all times maintain complete and accurate books of accounts.

"SEC. 8. (a) The board shall file with the President and with the Congress, in December of each year, a financial statement and a complete report as to the business of the corporation covering the preceding fiscal year. This report shall include the total number of employees and the names, salaries, and duties of those receiving compensation at the rate of more than $2,500 a year.

"(b) The board shall require a careful and scrutinizing audit and accounting by the General Accounting Office during each governmental fiscal year of operation under this act, and said audit shall be open to inspection to the public at all times and copies thereof shall be filed in the principal office of the Muscle Shoals Corporation at Muscle Shoals in the State of Alabama. Once during each fiscal year the President of the United States shall have power, and it shall be his duty, upon the written request of at least two members of the board, to appoint a firm of certified public accountants of his own choice and selection which shall have free and open access to all books, accounts, plants, warehouses, offices, and all other places, and records, belonging to or under the control of or used by the corporation in connection with the business authorized by this act. And the expenses of such audit so directed by the President shall be paid by the board and charged as part of the operating expenses of the corporation.

"SEC. 9. The board is hereby empowered and authorized to sell the surplus power not used in its operations and for operation of locks and other works generated at said steam plant and said dam to States, counties, municipalities, corporations, partnerships, or individuals, according to the policies hereinafter set forth; and to carry out said authority the board is authorized to enter into contracts for such sale for a term not exceeding 10 years. And in the sale of such current by the board it shall give preference to States, counties, or municipalities purchasing said current for distribution to citizens and customers.

"SEC. 10. It is hereby declared to be the policy of the Government to distribute the surplus power generated at Muscle Shoals equitably among the States within transmission distance of Muscle Shoals.

"SEC. 11. In order to place the board upon a fair basis for making such contracts and for receiving bids for the sale of such power it is hereby expressly authorized, either from appropriations made by Congress or from funds secured from the sale of such power, to construct, lease, or authorize the construction of transmission lines within transmission distance in any direction from said Dam No. 2 and said steam plant: *Provided*, That if any State, county, municipality, or other public or cooperative organization of citizens or farmers, not organized or doing business for profit, but for the purpose of supplying electricity to its own citizens or members, or any two or more of such municipalities or organizations, shall construct or agree to construct a transmission line to Muscle Shoals, the board is hereby authorized and directed to contract with such State, county, municipality, or other organization, or two or more of them, for the sale of electricity for a term not exceeding 15 years, and in any such case the board shall give to such State, county, municipality, or other organization ample time to fully comply with any local law now in existence or hereafter enacted providing for the necessary legal authority for such

State, county, municipality, or other organization to contract with the board for such power: *And provided further*, That any surplus power not so sold as above provided to States, counties, municipalities, or other said organizations, before the board shall sell the same to any person or corporation engaged in the distribution and resale of electricity for profit, it shall require said person or corporation to agree that any resale of such electric power by said person or corporation shall be sold to the ultimate consumer of such electric power at a price that shall not exceed an amount fixed as reasonable, just, and fair by the Federal Power Commission; and in case of any such sale if an amount is charged the ultimate consumer which is in excess of the price so deemed to be just, reasonable, and fair by the Federal Power Commission, the contract for such sale between the board and such distributor of electricity shall be declared null and void and the same shall be canceled by the board.

"SEC. 12. The net proceeds derived by the board from the sale of power and any of the products manufactured by the corporation, after deducting the cost of operation, maintenance, depreciation, and an amount deemed by the board as necessary to withhold as operating capital, shall be paid into the Treasury of the United States at the end of each calendar year.

"SEC. 13. The Secretary of War is hereby empowered and directed to complete Dam No. 2 at Muscle Shoals, Ala., and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals, by installing in Dam No. 2 the additional power units according to the plans and specifications of said dam, and the additional power unit in the steam plant at nitrate plant No. 2: *Provided*, That the Secretary of War shall not install the additional power unit in said steam plant until, after investigation, he shall be satisfied that the foundation of said steam plant is sufficiently stable or has been made sufficiently stable to sustain the additional weight made necessary by such installation.

"SEC. 14. It is hereby declared to be the policy of the Government to utilize the Muscle Shoals properties for the fixation of nitrogen for agricultural purposes in time of peace.

"SEC. 15. The Secretary of War is hereby authorized, with appropriations hereafter to be made available by the Congress, to construct, either directly or by contract to the lowest responsible bidder, after due advertisement, a dam in and across Clinch River in the State of Tennessee, which has by long usage become known and designated as the Cove Creek Dam, according to the latest and most approved designs of the Chief of Engineers, including its power house and hydroelectric installations and equipment for the generation of at least 200,000 horsepower, in order that the waters of the said Clinch River may be impounded and stored above said dam for the purpose of increasing and regulating the flow of the Clinch River and the Tennessee River below, so that the maximum amount of primary power may be developed at Dam No. 2 and at any and all other dams below the said Cove Creek Dam.

"SEC. 16. In order to enable and empower the Secretary of War to carry out the authority hereby conferred, in the most economical and efficient manner, he is hereby authorized and empowered in the exercise of the powers of national defense in aid of navigation, and in the control of the flood waters of the Tennessee and Mississippi Rivers, constituting channels of interstate commerce, to exercise the right of eminent domain and to condemn all lands, easements, rights of way, and other area necessary in order to obtain a site for said Cove Creek Dam, and the flowage rights for the reservoir of water above said dam and to negotiate and conclude contracts with States, counties, municipalities, and all State agencies and with railroads, railroad corporations, common carriers, and all public utility commissions and any other person, firm, or corporation, for the relocation of railroad tracks, highways, highway bridges, mills, ferries, electric-light plants, and any and all other properties, enterprises, and projects whose removal may be necessary in order to carry out the provisions of this act. When said Cove Creek Dam and transportation facilities and power house shall have been completed, the possession, use, and control thereof shall be entrusted to the corporation for use and operation in connection with the general Muscle Shoals project and to promote flood control and navigation in the Tennessee River and in the Clinch River.

"SEC. 17. The corporation as an instrumentality and agency of the Government of the United States for the purpose of executing its constitutional powers, shall have access to the Patent Office of the United States for the purpose of studying, ascertaining, and copying all methods, formulæ, and scientific information (not including access to pending applications for patents) necessary to enable the corporation to use and employ the most efficacious and economical process for the production of fixed nitrogen, or any essential ingredient thereof, and any patentee whose patent rights may have been thus in any way copied, used, or employed, by the exercise of this authority by the corporation, shall have as the exclusive remedy a cause of action to be instituted and prosecuted on the equity side of the appropriate district court of the United States for the recovery of reasonable compensation. The Commissioner of Patents shall furnish to the corporation, at its request and without payment of fees, copies of documents on file in his office.

"SEC. 18. The Government of the United States hereby reserves the right, in case of war, or national emergency declared by Congress, to take possession of all or any part of the property described or referred to in this act for the purpose of manufacturing explosives or for other war purposes; but, if this right is exercised by the Government, it shall pay the reasonable and fair damages that may be suffered by any party whose contract, for the purchase of electric power or fixed nitrogen or its ingredients, is thereby violated after the amount of the damages have been fixed by the United States Court of Claims in proceedings instituted and conducted for that purpose under rules prescribed by the court.

"SEC. 19. (a) All general penal statutes relating to the larceny, embezzlement, conversion, or to the improper handling, retention, use, or disposal of public moneys or property of the United States, shall apply to the moneys and property of the corporation and to moneys and properties of the United States intrusted to the corporation.

"(b) Any person who, with intent to defraud the corporation, or to deceive any director or officer of the corporation or any officer or employee of the United States (1) makes any false entry in any book of the corporation, or (2) makes any false report or statement for the corporation, shall, upon conviction thereof, be fined not more than $10,000 or imprisoned not more than five years, or both.

"(c) Any person who shall receive any compensation, rebate, or reward, or shall enter into any conspiracy, collusion, or agreement, express or implied, with intent to defraud the corporation or wrongfully and unlawfully to defeat its purposes, shall, on conviction thereof, be fined not more than $5,000 or imprisoned not more than five years, or both.

"SEC. 20. In order that the board may not be delayed in carrying out the program authorized herein the sum of $10,000,000 is hereby authorized to be appropriated for that purpose from the Treasury of the United States, of which not to exceed $2,000,000 shall be made available with which to begin construction of Cove Creek Dam during the calendar year 1929.

"SEC. 21. That all appropriations necessary to carry out the provisions of this act are hereby authorized.

"SEC. 22. That all acts or parts of acts in conflict herewith are hereby repealed.

"SEC. 23. That this act shall take effect immediately.

"SEC. 24. The right to alter, amend, or repeal this act is hereby expressly declared and reserved."

And the House agree to the same.

JOHN M. MORIN,
W. FRANK JAMES,
B. CARROLL REECE,
PERCY E. QUIN,
WILLIAM C. WRIGHT,
Managers on the part of the House.

CHAS. L. MCNARY,
G. W. NORRIS,
E. D. SMITH,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes, submit the following detailed statement in explanation of the effect of the action agreed upon and recommended in the conference report:

As amended by the House there were three major differences in the provisions of the resolution as it was passed by the Senate and as it was passed by the House. These were, first, whether the Government property at Muscle Shoals should be operated by the Secretary of War and Secretary of Agriculture, or whether it should be operated by a Government corporation; second, whether Cove Creek Dam should be constructed; and, third, what should be the character of the products to be manufactured. On the first two differences the Senate conferees receded, accepting the House language, with such amendments as necessary to provide for a board of directors with a member-

ship of three instead of five, while on the third difference the House conferees reached an agreement by a compromise that brings into conformity with the resolution as it passed the House the Senate provisions for the construction, operation, and maintenance of experimental plants at Muscle Shoals, the manufacture of nitrogen in such form as shall make it immediately available and practical for use by farmers in application to soil and crops, and to arrange with farmers and farm organizations for the practical use of the products of the plants at Muscle Shoals, as well as to cooperate with all existing agricultural experiment stations.

An amendment to the section concerning patent rights designed to speed up any possible court action was also agreed to.

In short, the joint resolution as agreed to by your conferees provides for a Government corporation authorized and directed to conduct experiments in the production and use of nitrogenous products, to sell surplus electric power, and the Secretary of War is authorized to construct Cove Creek Dam for the benefit of navigation, flood control, and the generation of electric power.

An authorization for an appropriation of $10,000,000 is carried in the resolution, with a provision that not to exceed $2,000,000 of this amount is to be used to begin work at Cove Creek during the year 1929.

JOHN M. MORIN,
W. FRANK JAMES,
B. CARROLL REECE,
PERCY E. QUIN,
WILLIAM C. WRIGHT,
Managers on the part of the House.

Mr. MORIN. Mr. Speaker, this report as now agreed to by the conferees conforms to the wishes of the House as expressed in its vote when the bill was before the committee.

The joint resolution (S. J. Res. 46) providing for the operation of the Government properties at and near Muscle Shoals as agreed to in conference, provides for the organization of a corporation to organize and operate the project by the construction, maintenance, and production of fixed nitrogen or its by-products, including fertilizer, for the sale of surplus power. The resolution also provides that the Secretary of War shall proceed with the construction of Cove Creek Dam.

As amended by the House there were three major differences in the provisions of the resolution as it was passed by the Senate and as it was passed by the House.

The first difference, whether or not the Government property at Muscle Shoals should be operated by the Secretary of War and Secretary of Agriculture, or whether it should be operated by a Government corporation, the conferees agreed to the House language with reference to same, with such amendments as are necessary to reduce the number of directers from five to three.

On the second difference, whether Cove Creek Dam should be constructed, the Senate conferees agreed to accept the House language providing for the construction of Cove Creek Dam by the Secretary of War.

The third point of difference, the characters of the products to be manufactured, was settled by compromise, the Senate conferees agreeing to accept, in modified form, the language of the House with new language added, providing for the manufacture of fixed nitrogen in such form as shall make it immediately available for application to soil and crops, confining the manufacture of fertilizer to experiments as provided originally in the Norris resolution, but only at Muscle Shoals.

Section by section the resolution provides the following:

Sections 1, 2, 3, and 4 provide for the organization of the corporation, detailing the number of directors to be named, their tenure of office and qualifications, the executive officers and their duties in the administration of the affairs, and details as well the general powers of the corporation and the salaries to be paid the various officers. These sections are taken from sections 1, 2, 3, 5, and 6 of the resolution as passed by the House, with such amendments as are necessary in reducing the number of directors from five to three.

Section 4 of the House amendment to the resolution, authorizing capital stock for the corporation, and part of section 6, detailing the policy as to distribution and sale of surplus power as carried in the House amendment, are not used in the conference resolution.

Section 5 of the conference resolution is divided into a number of lettered paragraphs detailing the activities of the corporation in the operation of experimental plants at or near Muscle Shoals for the manufacture of fertilizer for experimental purposes.

Paragraph (a) concerns the operation of existing plants for experimental purposes. This paragraph is a modification of the language of paragraph (A) of section 2 of the Senate resolution.

Paragraph (b) concerns the acquisition of fertilizers or fertilizer materials from commercial producers that may be needed in developing the experiments. The wording of this paragraph is the same as paragraph (B) of section 2 of the Senate bill.

Paragraphs (c) and (d) provide for arrangement with farmers and farm organizations for the practical use of new forms of fertilizers and cooperation with national, State, district, or county experiment stations. The wording of these two paragraphs is a modification of the language of paragraphs (c) and (d) of section 2 of the Senate bill.

Paragraph (e) provides for the manufacture of fixed nitrogen in such form as shall make it immediately available for application to soil and crops. This paragraph is a modified form of paragraph (e) of section 8 of the House amendment with new language added.

Paragraph (f) provides for the donation of not exceeding 1 per cent of the product for use by various experimental agencies so as to obtain information as to the value, effect, and best methods for use. It is a modified form of the language of paragraph (f) of section 8 of the House amendment.

Paragraph (g) provides for any changes or improvements in existing plants. It is part of the language of paragraph (f) of section 2 of the Senate resolution.

Paragraph (h) provides for the establishment and operation of laboratories and experimental plants. It is the language of paragraph (f) of section 8 of the House amendment.

Paragraph (i) gives the board authority to request assistance and advice from other Government agencies. It is the language of paragraph (g) of section 8 of the House amendment.

Paragraph (j) provides for the sale and cost to the Secretary of War and the Secretary of the Navy of explosives or their nitrogenous content. It is the language of paragraph (c) of section 8 of the House amendment.

Paragraph (k) provides for the delivery of power necessary to operate all locks, lifts, or other facilities in aid of navigation. It is the language of paragraph (d) of section 8 of the House amendment.

Paragraph (l) provides for the production, distribution, and sale of electric power. It is the language of paragraph (e) of section 8 of the House amendment.

Paragraph (m) provides that no product shall be sold outside of the United States except to the United States Government. This language is taken from paragraph (b) of section 8 of the House amendment.

Section 6 details the properties of the Government to be turned over to the corporation and how they shall be transferred. This is the language of section 9 of the House amendment.

Section 7 provides for the location of the principal office of the corporation and the maintenance of complete and accurate records. It is the language of section 10 of the House amendment.

Section 8 provides for reports and audits to be filed with the President and with Congress in December of each year. It is the language of section 11 of the House amendment.

Sections 9, 10, and 11 detail the method for the sale of surplus power. These sections provide for the sale of power to States, counties, municipalities, or other organizations, with a maximum rate to be fixed by the Federal Power Commission. It is the language of sections 6, 7, and 8, with necessary modifications, of the Senate resolution.

Section 12 is new language providing for the deposit of funds of the corporation in the Treasury of the United States at the end of each calendar year.

Section 13 provides for the completion of Dam No. 2. It is the language of section 1 of the Senate resolution.

Section 14 declares the policy of the Government for the utilization of Muscle Shoals. It is the first three lines of section 7 of the House amendment with an amendment.

Sections 15 and 16 provide for the construction of Cove Creek Dam by the Secretary of War. It is the language of sections 17 and 18 of the House amendment.

Section 17 outlines the use of patent rights by the corporation. It is the language of section 19 of the House amendment with an amendment agreed to in conference designed to speed up any possible court action.

Section 18 provides for the use of the property by the Government during war. It is the language of section 12 of the House amendment.

Section 19 provides the penalties incident to any improper conduct in the operation of the project. It is the language of section 20 of the House amendment with an amendment.

Section 20 authorizes the appropriation of $10,000,000 to carry out the program, including not to exceed $2,000,000 to begin the construction of Cove Creek Dam during the calendar year 1929. It is the language of section 11 of the Senate resolution with an amendment.

Sections 21, 22, 23, and 24 are the usual miscellaneous provisions to make the act effective and is the language of sections 21, 22, 23, and 24 of the House amendment.

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. MORIN. Yes.

Mr. SNELL. Do I understand that it provides in the bill that we are to build a complete fertilizer plant at Muscle Shoals, but only use it for experimental purposes?

Mr. MORIN. No; we are to use whatever plants we have there for experimental purposes.

Mr. SNELL. And there is no fertilizer plant, as I understand it, at Muscle Shoals.

Mr. MORIN. We are authorized to complete any plants there that we need for experimentation in the matter of fertilizer.

Mr. SNELL. And how much will it cost to build a fertilizer plant at Muscle Shoals?

Mr. MORIN. A complete plant?

Mr. SNELL. Yes.

Mr. MORIN. I do not know.

Mr. ALMON. Mr. Speaker, if the gentleman will permit, in answer to the gentleman from New York, the plant is already in existence—plant No. 2—with which the Government corporations can make fixed nitrogen.

Mr. SNELL. That is what I understood. You have a plant there at the present time for the manufacture of fixed nitrogen?

Mr. ALMON. Yes; in order to make fertilizer for experimental purposes, and to teach the farmers and the fertilizer industry better methods of making fertilizer. Of course, they may have to build a plant, but they can now with existing facilities make fixed nitrogen, as provided for in this bill.

Mr. SNELL. The conference report, as I understand it, provides for making finished fertilizer?

Mr. ALMON. Yes; for experimental purposes.

Mr. SNELL. But you would have to have a complete plant in order to do that.

Mr. ALMON. That probably would not cost much.

Mr. SNELL. Could the gentleman tell us what that will cost?

Mr. ALMON. I do not suppose anybody knows. No estimate has been made on that.

Mr. SNELL. And there is no limit to the authorization heretofore, and what I might say is necessary for experimental purposes, the gentleman might not agree with.

Mr. ALMON. That is to be determined by the board of directors who will be appointed by the President.

Mr. SNELL. And there is really no limit to that?

Mr. ALMON. I do not think there ought to be.

Mr. SNELL. And are they to sell the fertilizer for experimental purposes or are they to give it away?

Mr. ALMON. There is a provision here for giving away 1 per cent for experimental purposes.

Mr. SNELL. The original bill provided for 5 per cent.

Mr. ALMON. It is 1 per cent in the conference report.

Mr. FROTHINGHAM. But 15 per cent in the other bill.

Mr. ALMON. But that is dead, and there is no use talking about that now.

Mr. FROTHINGHAM. I do not know whether it is dead or not.

Mr. WILLIAM E. HULL. Are you going to manufacture fertilizer and sell to the trade in opposition to the fertilizer companies?

Mr. ALMON. No. This is satisfactory to the fertilizer industry, as far as I know.

Mr. NEWTON. The House adopted certain amendments taking fertilizer out of the bill, and, as I understand it, the conference report puts fertilizer back in the bill, but limits it to experimental purposes. The Senate bill, when it came over to the House, provided for this experimentation to be conducted not only at Muscle Shoals but at other portions of the country.

Mr. MORIN. It is confined to Muscle Shoals and Government property.

Mr. Speaker, I yield three minutes to the gentleman from South Carolina [Mr. McMILLAN].

Mr. McMILLAN. Mr. Speaker and gentlemen of the House, I am only going to take a very few moments to discuss the conference report of this bill, because I am fully aware of the fact that the House has already given a great deal of consideration and thought to this question.

You will recall the fight I made here on this floor a week or 10 days ago in respect to this bill, taking the position that the Congress should confine the operations of the Muscle Shoals plant to the provisions of law under the act of 1916, which provided for the manufacture of nitrates for explosives in time of war and nitrates for agricultural purposes in times of peace. I am glad that the House agreed with my position at that time by adopting a series of amendments I offered providing for the manufacture of fixed nitrogen for national defense and agricultural purposes.

I am delighted on this occasion to observe that the conferees of the Senate and House have come in with a report providing for the manufacture of fixed nitrogen in times of peace for the benefit of the agricultural interest of America. Heretofore American farmers have been paying, as I pointed out in my remarks when this bill was up before the House for consideration, a royalty to foreign countries of $12 per ton for nitrates, amounting approximately to $10,000,000 annually. This report therefore, if adopted, and the bill becomes a law, unquestionably means the saving of many millions of dollars annually to the American farmers.

Nitrates is one of the necessary ingredients for explosives. It is absolutely essential in the event of war, and this country should unquestionably be prepared at all times to produce sufficient quantities for national-defense purposes, and it is only the part of wisdom, as I see it, that the national defense act of 1916 contains such provisions with respect to the plant at Muscle Shoals for the production of nitrates. In peace times it is perfectly proper, from my point of view, for this great plant to manufacture fixed nitrogen for agricultural purposes, because the machinery for such manufacture is available, nor is such production in competition with private industry, whether it be for fertilizer purposes or otherwise, because, as I have already stated, practically all of our nitrates is imported from foreign countries.

The manufacture of fertilizer under the bill is confined only to experimental purposes, which I concede to be a very fine thing from an agricultural standpoint, as well as for the interest of the fertilizer industry, because any experiment that is found to be successful and beneficial as a fertilizer will be mutually helpful to the farmer and to fertilizer concerns.

The question has been raised here with reference to the interpretation of paragraph E, under section 5 of the report, which relates to the manufacture of fixed nitrogen and its practical application to soil and crops, some of the Members taking the position that the provisions found in this paragraph give authority to the corporation to manufacture a complete fertilizer. Such construction, with due deference to their opinion, I believe, is a mistaken one, for the reason that pure nitrogen can not be successfully used when applied to a plant or crops, and the words, "in combination with such other ingredients," mentioned in the paragraph merely intends to serve as a "filler" or a "base" to preserve and make available the nitrates as a fertilizer. Furthermore, the report definitely confines the manufacture of fertilizer for experimental purposes only and therefore it follows, it seems to me, that should the corporation undertake to manufacture a complete fertilizer for sale such action would be in direct conflict with both the explicit terms and spirit of the act as well as initiating an activity in competition with private industry to which I am unalterably opposed.

It will be observed also that section 14 of the conference report definitely declares the policy of the Government to utilize the Muscle Shoals property for the fixation of nitrogen for agricultural purposes in times of peace. This expressed policy as outlined in section 14 leaves no doubt in my mind the definite intent of Congress with respect to this question.

I hope the House will adopt the conference report which has just been favorably acted upon by the Senate, and put through this Muscle Shoals problem. It has been, as every one will agree, a matter that has been pending in this Congress for years. We have spent already $140,000,000 toward this project for national defense and agricultural purposes, and it is my opinion that this bill in its present form will meet with the approval of a great majority of the people of our country. [Applause.]

Mr. MORIN. Mr. Speaker, I yield 10 minutes to the gentleman from Tennessee [Mr. BYRNS].

The SPEAKER. The gentleman from Tennessee is recognized for 10 minutes.

Mr. BYRNS. Mr. Speaker, under all the circumstances it is perhaps futile to undertake to defeat this conference report. I have been amazed at the disposition of the House, for with practically no debate and with no real deliberate consideration of this important legislation it has passed a bill and is now about to adopt a conference report which invades the sovereignty of a State of this Union and establishes a precedent which will enable the Federal Government in the future to enter any

sovereign State without its consent and take possession of its greatest and most valuable power site, utilize it for its own purposes, without regard to the sovereign rights of the State to regulate and control any power that may be generated at that power site, without regard to the right of the State to exercise its taxable power, and, above all, to provide for the erection of a transmission line which will carry every kilowatt of that power from the State where it is generated to another State for sale or disposition in that other State.

That is the proposition that confronts you. This report does not provide for commercial fertilizer, and in verification of that statement I call attention to the statement made by the gentleman from Michigan [Mr. JAMES] the other day, and the statement made by the gentleman from Alabama [Mr. HILL], when the amendment submitted by the gentleman from South Carolina [Mr. MCMILLAN] was pending, to strike from the bill the proposal to manufacture complete fertilizer. On that occasion they both vehemently declared on the floor of this House that the action of the committee and of the House in adopting the amendment had robbed the bill of its fertilizer feature, and that it would not provide fertilizer for the farmer. The gentleman from Pennsylvania [Mr. MORIN] has just told you that this report conforms to the action taken by the House at that time.

Mr. DAVIS. Mr. Speaker, will the gentleman yield?

Mr. BYRNS. Yes; I yield for a brief question.

Mr. DAVIS. Is it not conclusive evidence that this bill is of no benefit to the farmer in its present form—the fact that the Fertilizer Trust is now satisfied with the bill?

Mr. BYRNS. Yes. I think the gentleman is clearly correct. That it will give to the farmer cheaper fertilizer or will bring about competition in the sales of fertilizer will not be seriously claimed by anyone supporting this conference report.

Mr. BEEDY. Mr. Speaker, will the gentleman yield?

Mr. BYRNS. For only a brief question.

Mr. BEEDY. This conference report, under section 5, paragraph (e), on page 4 of the printed conference report, carries this language:

> The fixed nitrogen provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops.

Mr. BYRNS. I can not yield to the gentleman further. This provides for complete fertilizer for experimental purposes only. It provides for the fixation of nitrogen. But what can the farmer do with nitrogen? It will have to be sold to some mixing concern.

What is the present situation? The bill has been stripped of every pretense that enabled those who advocated it to claim that the additional power at Cove Creek was necessary in order to furnish fertilizer to the farmer. They said that was the reason why they were invading the sovereignty of the State of Tennessee and taking away from it in perpetuity the rights to which the State is legally entitled. Now it is stripped of those features, and therefore the bill stands before you in all its nakedness as a power bill and a clear purpose to erect a dam costing millions of dollars within the State without its consent, and over 300 miles from Muscle Shoals, for the purpose of generating power and carrying that power by a transmission line into Alabama for sale by the Government. The taxpayers of Tennessee are to have no right to a voice in its disposition, nor are they to be permitted to share in its benefits.

Gentlemen, I repeat to you that there was never a grosser usurpation of the rights of the States. What the Government is seeking to do in this instance in Tennessee the Government may seek to do in your State at some future time.

As I have had occasion to say heretofore, the fundamental reasons for my opposition to this bill is that it is an outrageous violation of the legal rights of my State. It is estimated that 120,000 horsepower will be generated at Cove Creek for at least seven and one-half months in the year. Not a kilowatt of this power is to be used in the State for the benefit of its industries. It is to be carried 310 miles to Alabama on a transmission line built at public expense and then disposed of by the Federal Government. The State of Tennessee is to have no voice in the regulations, control, or disposition of this power, nor is it to get any revenue therefrom, notwithstanding over 54,000 acres of land will be flooded and taken out of the taxable values of the State and the county in which it is located.

Oh, the gentleman from Alabama said:

> Pass this bill now, and then later on we will enact a law to cure that.

The State of Tennessee is to be deprived in perpetuity of this great power site which to her is worth at least $50,000,000, according to the statement made by Henry Ford several years ago. In other words, what the gentleman from Alabama meant was to take it from Tennessee and give it to Alabama, and then, as he said, "We will pass a law to prevent it."

That is what you are being asked to do to-day. That is what the passage of this conference report means.

I believe the President will veto it. I hope he will. But let me tell you this, that if he does not veto it, the State of Tennessee is not going to sit supinely by and see her constitutional rights taken away from her until the courts of the country have passed upon the question, even though it will involve the State in expensive and prolonged litigation, drawn out perhaps for years.

Why this proposition now to make fertilizer for experimental purposes? The proposition heretofore was to manufacture fertilizer in time of peace. For the last 12 years you have stated that you would give cheaper fertilizer to the farmer. What will you say to the farmer when you go back and say you passed a bill for experimental purposes only; that you have not passed a fertilizer bill, but a power bill, for the benefit of certain interests? What is the farmer going to say to you—the farmer whom you have assured for years that you were going to give him commercial fertilizer at Muscle Shoals, when he learns that the promises repeatedly made have not been kept and that you are more interested in passing a power bill than you are in the effort to give him cheaper fertilizer, as was intended by the act of 1916?

Mr. BEEDY. Mr. Speaker, will the gentleman yield?

Mr. BYRNS. Not now. I know that this bill provides for the manufacture of fixed nitrogen; but the gentleman from Maine knows and this House knows, that the farmer can not use fixed nitrogen. The gentleman knows that there are ingredients which the farmer has not got, and with which it must be mixed for fertilizer purposes, and if the farmer had such ingredients he has not the knowledge or experience to enable him to mix them. As my friend from Tennessee [Mr. DAVIS] has said, it is no wonder that the fertilizer interests have withdrawn opposition to this bill as it now stands.

If this bill would produce fertilizer for the farmer, do you suppose some here would be advocating the passage of this report? No. They would be here fighting it just as they fought it the other day, but since the teeth have been drawn, since they know the farmers are not going to get fertilizer, and since they know the provision which the gentleman from Maine read will not bring about competition, they are asking you to adopt this report because they are not interested in the question of power. [Applause.]

The SPEAKER. The time of the gentleman from Tennessee has expired.

Mr. MORIN. Mr. Speaker, I yield five minutes to the gentleman from Georgia [Mr. WRIGHT].

Mr. WRIGHT. Mr. Speaker, there has been a great ado made about this legislation on the part of the State of Tennessee with regard to sovereign State rights. I would be one of the last men in the world to invade the sovereign rights of a State; but what is the situation here? This Cove Creek Dam site in Tennessee, I presume, has been there about 6,000 years. The State of Tennessee, her citizens, and no private enterprise has ever developed it. As a matter of fact, it is not a water-power proposition per se. If a dam should be constructed at Cove Creek there will only be generated there primary power of some 8,000 or 9,000 horsepower. That is the great power my friend BYRNS is talking about being taken out of Tennessee and transmitted to Muscle Shoals.

Mr. BYRNS. Will my friend yield?

Mr. WRIGHT. Certainly.

Mr. BYRNS. Is it not a fact that according to the reports and estimates, 120,000 horsepower can be generated at Cove Creek for at least eight and a half months in the year?

Mr. WRIGHT. At the time of flood season; yes.

Mr. BYRNS. I said for at least eight and a half months in the year.

Mr. WRIGHT. I am talking about primary power, which is the only kind you can depend on the year around. Now, what would happen if this Cove Creek Dam should be constructed? A great reservoir would be created there which would store the water in time of the flood season and in the low-water period it could be released so as to practically double the primary power, not only at Muscle Shoals but at every dam which might be built on the Clinch River and the Tennessee River below Cove Creek. Gentlemen, that is the greatest boon that could be given to the State of Tennessee.

It is a thing which she has refused to do herself, which private enterprise has failed to do, and it is a thing which the Government is now proposing to do for the State and her people. Yet gentlemen stand here talking about the Government robbing the State of Tennessee. [Applause.] Gentlemen, it means more

industrial development in the State of Tennessee than anything that could happen to the State. The Government will expend from $20,000,000 to $35,000,000, without one cent of it being contributed by the State of Tennessee, except the proportion of the taxes which would be paid by Tennessee to the Federal Government. In all of the Tennessee Valley it would mean development in an industrial way, and the dams which would follow the construction of this Cove Creek Dam would mean that their primary power would be practically doubled. Not only that, but Tennessee is interested in flood control as well as the people below Tennessee, and the estimates of the engineers show that the construction of this Cove Creek Dam alone will lessen the flood danger in Tennessee 15 per cent. In addition, you must understand that if the Cove Creek Dam is constructed there will be other dams built along the Clinch and Tennessee Rivers, not by the Government but by private enterprise, which will aid in the control of floods and will make navigation possible on the Tennessee River, the very thing Tennessee has so long clamored for. The dams which may be built below Cove Creek would, of course, have to contribute to the Government for the just proportion of the amount of benefits.

Now, my friend BYRNS says fertilizer has been taken out of this bill. I confess, gentlemen, from my viewpoint it is a disappointment so far as fertilizer is concerned, but, gentlemen, let him get in his mind the fact that there is still a lot of fixed nitrogen in this bill, a thing which the farmer can use and which is a very important thing in the manufacture of fertilizer. It is one of the three elements used in making plant food, and it carries with it the same chemical ingredients of nitrate of soda.

Mr. BEEDY. Will the gentleman yield?

Mr. WRIGHT. Yes.

Mr. BEEDY. I think there should be some explanation as to subsection (e), on page 4. Either fertilizer is in the bill or it is not.

Mr. WRIGHT. The bill provides for the manufacture of fixed nitrogen.

Mr. BEEDY. Certainly; and the language is:

> The fixed nitrogen provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops.

Mr. WRIGHT. Absolutely. My friend has said that it can not be used. It can be hydrated by applying water and oil to it so that the farmer himself can scatter it.

The SPEAKER. The time of the gentleman from Georgia has expired.

Mr. MORIN. Mr. Speaker, I yield five minutes to the gentleman from Maryland [Mr. LINTHICUM].

Mr. LINTHICUM. Mr. Speaker, the Muscle Shoals conference report before us to-day is much modified and to many perhaps easier to digest, but it still maintains that principle to which I am unalterably opposed, that is, that of launching the Government in private business. If we propose to socialize the manufacture of nitrates, fertilizers, and power, then we had just as well begin to socialize other industries of the land which are bound to follow in its wake.

This conference report and the Muscle Shoals bill which will be the outcome thereof is but the camel's nose under the tent. You tell me this is for the manufacture of fertilizers for experimental use only, but I say to you that when the Government constructs a fertilizer plant which is authorized under this act it will not long limit itself or this corporation which is formed by this bill to the manufacture of fertilizer solely for experimental purposes.

It is well known to the Members of this House that when the legislative camel gets his head under the tent, subsequent legislative enactments enable him to pass in with his whole body. You tell me this bill limits the manufacture of fertilizer for experimental purposes only. If that be the case, then I must confess I do not understand that section of paragraph E, page 4, of the report which says:

> The fixed nitrogen provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops.

Certainly this authority, unless some construction of other portions of the bill prevent, would give the right to manufacture fertilizer. It is certainly on its face subject to liberal construction and unlimited manufacture.

You propose to turn over to the corporation formed in this bill the sum of $10,000,000 in cold cash, together with the entire Muscle Shoals property of $140,000,000, and then to make the measure heaping and running over, you transfer to them the million and three hundred thousand dollars revenue which the Government is now deriving from the property. A massive corporation, indeed, operating upon Government funds. The board of directors is to be composed of three members, who are each to receive $50 per day, but are not to serve more than 150 days in any one year. They are not to have any interest in any corporation which manufactures or distributes power; manufactures nitrogen or any of the ingredients thereof.

How can they have had any experience and not have obtained any financial interest in any business comparable to that of which they are to be directors? The corporation is not limited to the number of employees, except that the salaries of the general manager and the two assistant managers shall not exceed the sum of $50,000 per annum.

This corporation is to be augmented, according to section 15, by the construction, through the Secretary of War, of a dam across Clinch River in the State of Tennessee, commonly called Cove Creek Dam, and for this, in addition to the money provided for the corporation and that invested in property of over $150,000,000, the Congress is expected to appropriate additional funds for the construction of this dam, and this Cove Creek Dam is to have $2,000,000 to begin construction at once.

It is not so much the fertilizer or the nitrates nor even the power of which I am speaking, but it is the fact that the National Government is to launch into business upon a tremendous scale incompatible with the policies of our Government and certainly never contemplated by the framers of our Constitution. I think I speak for the people of my native State of Maryland when I say that we are unalterably opposed to any such action on the part of the Government.

Mr. SCHAFER. Will the gentleman yield?

Mr. LINTHICUM. Certainly.

Mr. SCHAFER. The gentleman is not opposed to the Government entering into the dispensary business if the existing prohibition laws are modified, is he? [Laughter and applause.]

Mr. LINTHICUM. I am in favor of the Government controlling alcoholic liquors, whether it is done by the dispensary system or otherwise as is done in Quebec, because I think that is a matter which is in the interest of all the people, is a police power, but this is not. [Applause.]

It is a sad commentary indeed that because we have expended millions of dollars on Muscle Shoals for war purposes that we should now be compelled to expend this vast sum of money in addition upon a venturous proposition. The property is susceptible of producing a very large income in time of peace and to be utilized for the manufacture of nitrates needed in time of war. Step by step the National Government seems to be entering into business. Numerous officers and job holders are being added to the Government pay roll. Government bureaus are being created to take care of new enterprises, new appropriations, new allocations of funds. Millions of dollars are being appropriated to finance various projects contemplated by the different sections of the country. Yesterday and again to-day we discuss the Boulder Dam proposition upon which there is no consensus of opinion as to its advisability, and yet the Government is asked to appropriate $125,000,000 for that project, which it is proposed to repay in 50 years, but there is room for reasonable doubt and certainly strong arguments that it can never be repaid, and that the Government will be mulched for many millions in addition to the $125,000,000. Then there is to come later the Columbia Basin project, which would require many millions, and the proponents of the McNary-Haugen bill have not yet been killed off in spite of the meat-ax veto of President Coolidge. Where are we to terminate? What is the answer to all the demands upon the National Government? The Treasury of the United States is not filled by any miracle nor by the printing press nor the engraver's method, but it is filled by taxation taken from the pockets of the humblest citizens as well as the princely merchant. The more appropriations we make the heavier the tax and the harder the strain on our citizens. I sincerely trust, Mr. Speaker, we will vote down this conference report, and let us return to those things more in conformity with proper legislation. [Applause.]

Mr. MORIN. Mr. Speaker, I yield five minutes to the gentleman from Georgia [Mr. CRISP]. [Applause.]

Mr. CRISP. Mr. Speaker and gentlemen of the House, I am for this conference report. [Applause.] Two propositions are involved, the manufacture of nitrates and the development of power, and the whole history of the use of this Muscle Shoals project for eight years has not been creditable to the Congress. [Applause.]

Briefly, the Muscle Shoals situation is this: In 1916 Congress passed a law to develop Muscle Shoals for the purpose (as the law stated) of furnishing nitrates for national-defense pur-

poses in time of war and nitrogen and other useful products to aid agriculture in time of peace. From the cessation of hostilities until now, Congress has been endeavoring to make some useful disposition of Muscle Shoals. Six or seven years ago it was proposed to manufacture nitrogen there, and the fertilizer interests all fought it, saying nitrogen could not be economically manufactured there. The power interests joined them and fought it, saying there was no need to develop power as there were not sufficient industries to consume it. About four years ago, when Ford offered to lease it and operate it, both fertilizer and power interests fought that plan. Since then the Government has endeavored to obtain a private lease for its development and has utterly failed. The fertilizer interests were urged to submit a bid for the plant to manufacture nitrogen and refused to do so.

The situation now is simply this: Government operation or continuance of present conditions. The taxpayers have invested about $150,000,000 at Muscle Shoals, and it is costing them about $250,000 a year for maintenance and protection of the idle and deteriorating plants. The Government is now in business there generating power which is being sold to the Alabama Power Co. at 2.6 mills a kilowatt, and they in turn are selling it to consumers at from 6 to 14 cents a kilowatt. Of course, this is a very profitable and highly agreeable arrangement for the power interests.

To-day the farmers are paying $12.53 a ton export tax to Chile on Chilean nitrate and paying freight on about 1,600 pounds of worthless filler to each ton of nitrate shipped from Chile, leaving only 400 pounds of nitrogen or plant food per ton. This, to my mind, is an unjust burden on the farmers, when nitrate can be manufactured at Muscle Shoals and sold to the farmers at less than half they are now paying. I prefer for the great mass of the people to get some benefit of our investment there rather than the power interests.

The opponents argue that only the farmers near Muscle Shoals can get the benefit on account of freight rates, and that it discriminates against those who can not pay cash. This same discrimination exists against the farmers now by reason of the vast difference made by the fertilizer companies between their cash and credit prices. Fertilizer manufactured at Muscle Shoals is to be 60 per cent plant food instead of from 15 to 20 per cent plant food. Unquestionably, if the farmers save the freight on worthless filler, the Muscle Shoals product can be shipped to a much larger area than the low-grade fertilizers of to-day can be economically shipped, and no one can question that Muscle Shoals is nearer to the farmers than Chile.

I think the fertilizer plants are unnecessarily alarmed, because most of them are simply mixing plants and they buy their ingredients. If they can buy them cheaper at Muscle Shoals than they buy them to-day, they can still do business, though, of course, they will have to reduce their sale price to the farmers, and I am sincerely in favor of this, for I know of no class of people needing financial and governmental assistance more than the farmers. The Government has aided about every other industry, and I think it time for them to help the farmers.

When the first Senate resolution, No. 46, came over from the Senate, neither of these interests opposed it. It provided for the manufacture of only fixed nitrates. It provided for the sale of power under certain conditions. Cove Creek Dam, which would practically double the horsepower of the project, was not in the bill. With Cove Creek in, more surplus power would be for sale in competition with the power companies. The House amended the bill and made it a real, workable bill to manufacture fertilizer and power, and since I have been in Congress for 15 years, I have never seen such propaganda against any bill as there has been against this one.

Now, what does this conference report do? It does not go as far as I would like. I think this bill is satisfactory to the fertilizer people, for it does not propose to manufacture and sell a complete fertilizer. It provides only for the manufacture of one element or one ingredient of fertilizer—nitrates. You gentlemen who are not familiar with fertilizer, I apprehend, do not understand it. A complete fertilizer is a mixture of three plant foods—phosphoric acid, ammonia or nitrates, and potash. To-day the fertilizer companies get their potash from Alsace-Lorraine. They get their nitrates from Chile, from blood and tankage from the packers, from fish scraps, or from cottonseed meal, and a very few companies manufacture phosphoric acid from phosphoric rock. The great majority of the fertilizer companies purchase these three elements of plant food and mix them with sand, ground rock, and other worthless filler, and sell as a complete fertilizer.

Under this bill only one element of the complete fertilizer will be manufactured—nitrate. To-day the fertilizer companies are getting hundreds of thousands of tons of nitrate from Chile and paying $12.53 export duty on every ton of nitrate imported into the United States, which the farmer when he buys their product is compelled to pay the Chilean Government.

Under this bill fertilizer companies can buy their nitrate from the Muscle Shoals corporation instead of Chile, and they will use it as one element for mixing a complete fertilizer, and it is not competing with them in business. I hope and believe that as they can buy this nitrate cheaper they will reduce the price of complete fertilizer to the farmer after mixing it and making a complete fertilizer. I am for the bill for the reason that it is a step in the right direction. [Applause.] If the fertilizer companies do not give the farmers the benefit of a lower price on this one ingredient, the most expensive element in fertilizer, I hope Congress will take further steps and amend the law and authorize the manufacture and sale of a complete fertilizer.

You gentlemen from the West who are supporting the Boulder Dam should appreciate that the inclusion of Cove Creek Dam is identical with your proposition. I appreciate the position of the gentlemen from Tennessee who, actuated by the highest motives, are standing up for what they believe to be the sovereign rights of their State, but there are other interests opposing it because they do not want to double the power which will come in competition with the private power companies. But you gentlemen supporting the Boulder Dam should appreciate that this is an identical proposition with yours—Cove Creek provides for this dam as an aid to navigation. It is a key dam that will open up a 150 or 200 miles of river navigation. It doubles the power to be generated at Muscle Shoals and reduces the flood danger to Chattanooga 15 per cent seeking to accomplish exactly what the friends of the Boulder Dam say it will accomplish if built—protect the Imperial Valley from flood, aid navigation, and generate power.

I am going to vote for this bill. [Applause.] That is all I care to say; the report is in the right direction, and I hope it will be adopted. [Applause.]

Mr. MORIN. Mr. Speaker, I yield five minutes to the gentleman from Tennessee [Mr. BROWNING].

Mr. BROWNING. Mr. Speaker, boiled down to its final analysis, the House need not be deceived as to the primary purpose of this project. The primary purpose is a power project, because there is plenty of power at Muscle Shoals now to manufacture all the nitrate that they need and all they will ever produce by it. But the people of Tennessee have a principle involved that is not involved in Boulder Dam, because the Boulder Dam bill provides that when you amortize the expense connected with it each State has its equitable right to the property and improvements there, and the Government has no further financial interest in it. But when we asked for that, when we from Tennessee sought to amortize the expense of Cove Creek Dam and all the transmission lines and improvements connected with it—the same rights that they have guaranteed to the project at Boulder Dam—we were accused of trying to steal something. You gentlemen who vote to give at Boulder Dam—you who vote to give back to the States the property after amortizing the bonds that are used to construct it, have no right to question us, because we ask that the same thing be done for Tennessee.

The gentleman from Georgia, Judge WRIGHT, insists that they are conferring a great favor on Tennessee. Well, we are not willing to have such favors forced upon us. Remember, gentlemen, that Cove Creek in Tennessee is 300 miles above Muscle Shoals, and all the power goes down into Alabama, over this transmission line, not only from this dam but from the other eight or nine dams below it in Tennessee, and that our State is being robbed of its sovereign rights in this power and is denied the benefits of any development within its borders. In other words, it is hereby proposed to decree that God Almighty made a mistake in giving any natural resources to Tennessee; it was intended to give it all to Alabama.

The gentleman from Georgia, Judge WRIGHT, a good friend of mine, admits that Tennessee has some rights, but he says, "Let us build the dam and take over the power for the Government, and then determine later what the State rights are, and that we can reserve them." It reminds me of the time when I reserved title to a biscuit that I had in my hand and then gave it to my bird-dog pup.

The SPEAKER. The time of the gentleman from Tennessee has expired. The question is on agreeing to the conference report.

Mr. MORIN. Mr. Speaker, I yield one minute to the gentleman from Alabama. [Mr. ALMON].

Mr. ALMON. Mr. Speaker, I just want to take this time to say that I am in favor of this report and trust that it will be adopted.

I, of course, preferred the original bill which provided for the manufacture and sale by the Government corporation of a

complete concentrated fertilizer, but this is the best bill that we can get at this time. If it is approved by the President, as I sincerely hope it will be, future Congresses can make such amendments as may be found necessary. This bill will at least make a start and put the plants into operation and provide for a sale of the power which is now running to waste. The bill authorizes the manufacture and sale by the Government of fixed nitrogen in such form and with such ingredients as shall make the nitrogen immediately available and practical for use by the farmers by application to soil and crops just as nitrate of soda is used. Fertilizer of this kind made at Niagara Falls by the American Cyanamid Co. is now selling for 7 cents per pound. The Government should make and sell it at Muscle Shoals for not more than 6 cents per pound, thereby saving the farmers at least 15 cents per pound for their nitrogen which is the principal ingredient in all fertilizer. They can then buy the phosphoric acid if they like and do their own mixing and in that way they should be able to save something like one-half of their fertilizer bill. In addition to this, the Government corporation should be able to sell the power that is now running to waste at Wilson Dam. A recent communication I received from the United States district engineer at Muscle Shoals shows that there is now 245 horsepower available and that the Alabama Power Co. is taking a little less than 10 per cent and the balance is running to waste. If the power that is going to waste were sold at even 2 mills per kilowatt it would amount to $7,158 per day.

I trust that all of you gentleman who are interested in agriculture will vote for the adoption of this conference report, and from what I can learn I believe it will be adopted by a good majority. [Applause.]

Mr. MORIN. Mr. Speaker, I yield three minutes to the gentleman from Massachusetts [Mr. FROTHINGHAM].

Mr. FROTHINGHAM. Mr. Speaker, I think the House ought to realize what it is doing on this conference report and also realize that as far as speed goes, the Government is receiving for Muscle Shoals now nearly a million dollars a year, so that there is no immediate need for rushing headlong into legislation which has not been digested, and this certainly has not been digested. Whether it is easier to digest it with the fertilizer out of it or not, I do not know, but the bill still has the same grave objections from my point of view that it had when we were considering it in the House. It not only establishes a corporation with a capital of $10,000,000, which is just a beginner, but it is a matter that might perfectly well be turned over to a department of the Government to experiment with for fertilizer purposes. It also provides that the Government shall construct a dam at Cove Creek, which will cost $37,000,000, if I am correctly advised. Beyond that, it still leaves in the bill the right for this huge Government monopoly to go into the Patent Office of the United States and take cognizance of any patent that happens to be registered there.

Mr. McSWAIN. Will the gentleman not admit that so far as patents are concerned, that is the law and has been since 1910? Any Government agency since 1910 has had that right. That is in the law.

Mr. FROTHINGHAM. And that is why it is unfair competition with a private corporation which can not do that, and if any of these patents happened to have been owned by a foreigner, of course it is absolutely illegal to do such a thing.

Mr. McSWAIN. The Bethlehem Steel Co. was glad to use that power when it was making guns for the United States.

Mr. FROTHINGHAM. I don't know anything about that, but in time of war all things are different.

Mr. WAINRIGHT. Did not the gentleman vote for the Madden bill which provided for the construction of the Cove Creek Dam?

Mr. FROTHINGHAM. Yes; with objections. I voted against the Cove Creek Dam. It is one thing to allow private investment to go into this sort of thing, and another thing to put public money in there in the form of a Government corporation.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken.

Mr. BYRNS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BYRNS. This conference report has been adopted in the Senate. Would it be in order to move to recommit the conference report to the committee of conference with instructions?

The SPEAKER. The report must be voted either up or down in its entirety.

Mr. HULL of Tennessee. Mr. Speaker, I understood the gentleman from Pennsylvania agreed to yield me three minutes.

Mr. MORIN. I was about to yield three minutes to the gentleman when the House was dividing on the question.

The SPEAKER. The question has been submitted to the House and the Chair does not see how he can stop the division at this time. The question is on agreeing to the conference report.

The House divided.

Mr. LINTHICUM. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 211, nays 147, answered "present" 1, not voting 71, as follows:

[Roll No. 87]

So the conference report was agreed to.

Mr. CHINDBLOM. Mr. Speaker, before the pairs are announced I wish to inquire if the gentleman from Alabama [Mr. BANKHEAD] voted?

The SPEAKER pro tempore (Mr. DICKINSON of Iowa). He is not recorded.

Mr. CHINDBLOM. I have a pair with the gentleman from Alabama, and I ask leave to withdraw by vote of "no" and vote "present." Mr. BANKHEAD would vote for the conference report if he were present.

The Clerk announced the following pairs:

Mr. Bankhead (for) with Mr. Chindblom (against).
Mr. Smith (for) with Mr. Eaton (against).
Mr. Spearing (for) with Mr. Corning (against).
Mr. Clancy (for) with Mr. W. T. Fitzgerald (against).
Mr. Bowling (for) with Mr. Garrett of Tennessee (against).
Mr. Wilson of Mississippi (for) with Mr. Drane (against).
Mr. Hare (for) with Mr. Deal (against).
Mr. Hammer (for) with Mr. Golder (against).

Until further notice:

Mr. Begg with Mr. Oldfield.
Mr. Temple with Mr. Connally of Texas.
Mr. Robsion of Kentucky with Mr. Bulwinkle.
Mr. Butler with Mr. Hudspeth.
Mr. England with Mr. Quayle.
Mr. Fort with Mr. Zihlman.
Mr. Wurzbach with Mr. Blanton.
Mr. Underhill with Mr. Sullivan.
Mr. Purnell with Mr. Connery.
Mr. Reid of Illinois with Mr. Mooney.
Mr. Zihlman with Mr. Jones.
Mr. Bacon with Mrs. Norton of New Jersey.
Mr. Curry with Mr. Sears of Florida.
Mr. Kendall with Mr. O'Connell.
Mr. Boles with Mr. Whitehead.
Mr. White of Kansas with Mr. Underwood.
Mr. Beck of Wisconsin with Mr. Yon.
Mr. Hughes with Mr. Carley.
Mr. Vincent of Michigan with Mr. Kunz.
Mr. Bowman with Mr. Dickstein.
Mr. Anthony with Mr. Johnson of Oklahoma.
Mr. Menges with Mr. Sabath.
Mr. Carter with Mr. Bloom.

Mr. DOUGLASS of Massachusetts. Mr. Speaker, my colleague, Mr. CONNERY, is absent on account of illness in his family. If he were present he would vote "aye."

The result of the vote was announced as above recorded.

On motion of Mr. MORIN, a motion to reconsider the last vote was laid on the table.

EXTENSION OF REMARKS

OPERATION OF RETIREMENT LAW AND NEEDED AMENDMENTS

Mr. MEAD. Mr. Speaker, from the time the original retirement law became effective on August 20, 1920, to the end of the fiscal year of June 30, 1927, 19,802 civil-service employees have been placed upon the retirement rolls. Of this number 15,480 were retired on account of age and 4,322 on account of disability. The total number of employees on June 30, 1927, who had reached retirement age but had received an extension of service, was 5,497.

The following table shows the number of employees retired each fiscal year, the number of annuitants on the roll and the number of deaths at the end of each fiscal year:

Fiscal year ending—	Total number retired	Annuitants on roll at end of year	Number of deaths on retired roll
June 30, 1921	6,763	6,471	274
June 30, 1922	1,714	7,576	614
June 30, 1923	2,521	9,332	745
June 30, 1924	2,082	10,548	833
June 30, 1925	2,084	11,689	943
June 30, 1926	1,873	12,529	962
June 30, 1927	2,765	14,119	1,110
Total	19,802		5,481

In considering retirement legislation it might be well at this time to keep in mind a few fundamental principles on which it is believed all can agree. Primarily the original purpose of enacting retirement legislation in 1920 was, first, to relieve the Government service of superannuated employees, by retiring them and putting in their places younger and more efficient workers, thus getting the work done more economically. The second purpose of the law was to make provision for the few remaining years of life left to the faithful old Government workers, when the time comes, that will come to all of us some day, when their tasks must be given over to younger hands. The law provided that if an employee was fairly efficient and willing to remain in the service of the United States, he might, upon reaching the age fixed for the retirement of his group, receive an extension of employment for a term of two years upon the approval of the Civil Service Commission; and at the end of the two years he may, by similar approval, be continued for another two years, and so on. After August 20, 1930, however, no employee shall be continued in the civil service of the United States beyond the age fixed for his retirement for more than four years.

Has the retirement law accomplished the important purposes of relieving the Government service of old and worn-out workers, and of providing the simple comforts of life for these workers when they are forced to retire? All the evidence before us shows that it has not. And that is why Congress is now making an effort to amend the law, so that it may reasonably achieve the worthy purposes sought when the original law was enacted. Let us briefly examine the causes of this failure, in order that we may better understand what is needed to correct the situation.

The principal reason, in my opinion, why the law has failed to fully accomplish the desired result is because of the amount of annuity paid. The original law of 1920 provided for a maximum of $720 a year. This was in effect until July 3, 1926, when the act was amended to provide a maximum annuity of $1,000. But these figures are misleading for the reason that less than 20 per cent of those on the retired roll receive the maximum of $1,000 per annum. The actual average annuity received by those on the retired roll is much below that figure. The following table shows what the average has been at the end of each fiscal year since the law has been in operation:

Fiscal year ending—	
June 30, 1921	$568.44
June 30, 1922	564.48
June 30, 1923	551.64
June 30, 1924	546.30
June 30, 1925	544.64
June 30, 1926	545.57
June 30, 1927	721.00

In other words, when the law provided a maximum of $720 a year, the actual average received by the retired employees was only $545. Now, under the present law with a maximum of $1,000, the average annuity paid is $721, or only $60 a month. Obviously no Government worker is going to retire and try to exist on this pittance, if he can get the Civil Service Commission and the head of his department to approve his continuance in the service. Naturally, if the head of a department has a spark of humanity in his breast, he is not going to throw out an old and faithful employee to struggle along on an annuity of $60 a month, or less, if the employee can still perform his work, after a fashion, in the Government service.

Hence the retirement law because of the low amount of annuity paid, up to the present time, has failed to relieve the Government service of superannuated employees to the extent desired. This is evidenced by the fact that 5,479 employees who were past the retirement age fixed for their respective groups were on extensions on June 30, 1927. From the time the law went into effect until June 30, 1927, 9,530 employees reaching retirement age have been granted a two-year extension; and during that same period 3,271 have been granted two two-year (four years) extensions beyond the retirement age. These extensions apply to all, the 62-year group, the 65-year group and the 70-year group. Nor are the extensions limited to four years. Up to May 15, 1928, 1,308 employees had received third continuances in the service, meaning that they are working six years beyond retirement age. Four hundred and eighteen employees have received four extensions of two years each, while a few are now on their fifth extension. And after August of this year, there will be many more in the third, fourth and fifth extension groups, owing to the fact that many received their first extension when the law went into effect August 20, 1920.

Until August 20, 1930, the law puts no limit on the number of continuances an employee may receive after reaching retirement age. After that date, however, extensions of service are limited to four years in two two-year periods. Thus when the original law was enacted, Congress provided a period of 10 years when there was no limit on continuances and making

it possible for an employee to work far beyond his retirement age. It is only reasonable to assume that those who were responsible for the enactment of the original retirement law in 1920 provided for this 10-year period with the thought that in the meantime Congress would amend the law so that a Government worker reaching the age fixed in the law could retire on an annuity sufficient to provide against want in the declining years of his life. This 10-year period is nearly at an end; and it is the duty of Congress to take action so that the law may accomplish its logical purpose of relieving the Government service of superannuation, and at the same time deal justly and fairly with the old workers who must step out, by providing an annuity which will insure reasonable comforts during the few remaining years of their life.

One step was taken in this direction when, on July 3, 1926, Congress amended the retirement law to provide a maximum annuity of $1,000, under which those now retired receive an average of about $721 per annum. The time has arrived when we should take the next step of providing a maximum of $1,200. Even with that maximum, under the bill now before Congress the average annuity will be less than $900. No stronger appeal should be needed for the proposed amendments to the retirement law than our sense of justice and decency in providing for those who have retired or will soon retire after a life of service to their Government. At the best the annuity proposed in this bill will provide only for the urgent necessities of life under present conditions. As it is now under existing law, retirement too often does not mean relief from toil for the aged, but merely that they must step out of a Government position for which they are fitted, if able to work at all, and go out into the world to seek some other sort of employment to supplement the meager annuity received under present conditions. And they can not always find such work, even if they are capable of a few years more of toil.

The situation now is quite similar to that existing on April 5, 1926, when the House Civil Service Committee reported a retirement bill (H. R. 7) providing for a maximum annuity of $1,200, with optional retirement, after 30 years of service, at certain specified ages for each group. In submitting the report on that bill Chairman LEHLBACH concisely and forcefully summed up the situation regarding retirement legislation; and it applies with equal force and logic to the present retirement bill before Congress. He stated:

> The Government is committed to the policy of retirement. Whatever the cost may be, it must be met. The evidence demonstrates that the existing plan is inadequate to secure both to the employees and to the Government the full measure of anticipated benefits. Hence the Government is not receiving full value for its money. By enacting into law the provisions of this bill the present deficiencies will substantially be corrected and the additional expenditure will make productive the total cost. This is true economy. This question must be met. Postponement will merely result in more widespread and intense insistence upon a reformation of the system. Nothing is ever settled until it is settled right. The wise course is to settle the retirement problem now and thereupon insist that it stay settled.

The best illustration of the need of an amendment to the present retirement act can be found in the statement made in support of the amendment by Henry H. Strickland, secretary of the Railway Mail Association:

> The number of railway postal clerks on the retired roll on June 30, 1927, was 1,132 out of a personnel of 20,550 in the Railway Mail Service. The percentage of retirements among this group of employees is higher than in any other branch of the Government service, due to the strenuous character of their work. A railway mail clerk stands on the swaying floor of a rapidly moving mail car and works continuously from 12 to 16 hours without rest. It is work that calls for extreme physical endurance and requires mental alertness at all times in the rapid distribution and dispatch of the mails en route. A railway mail clerk is always fighting against time; making every effort to complete the distribution of the mail before reaching the terminal of his run, in order that it may be dispatched to connecting trains without delay.
>
> Because of the strenuous and hazardous nature of their employment, the retirement age of railway mail clerks was fixed at 62 years of age, three years lower than other groups of postal workers. Not only does the nature of the work cause a high percentage of retirements for age but the percentage of disability retirements are also higher than in any other group of Government employees. Approximately 260 railway mail clerks have been retired on account of total disability since the retirement law become effective in August, 1920. Under conditions of this kind, it is obvious why railway mail clerks are in need of an amendment to the retirement law that will permit them to retire after 30 years of service, even if they can not exercise this option until they reach the age of 60.

BENEFIT TO FARMERS IN MUSCLE SHOALS BILL

Mr. McSWAIN. Mr. Speaker, two groups in the House seem confused about the bill just adopted by both the Senate and the House after conference, relating to Muscle Shoals. Those that have had primarily in mind the object of protecting the fertilizer industry seem to fear that subsection "e" of section 5 as the same passed the House, will make it possible for the corporation to manufacture a "complete fertilizer." They derive this fear from the language to the effect that nitrogen to be manufactured shall be "in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops." They fear that these words "in combination with such other ingredients" will authorize the corporation to combine the nitrogen produced with phosphoric acid and with potash and thus have a complete fertilizer. I respectively submit that the language, in view of the history of the legislation and in view of the other language in the bill, should not be given such broad interpretation. The House adopted the amendments offered by the gentleman from South Carolina [Mr. McMILLAN], striking out the authority to manufacture fertilizers and striking out the authority to construct a fertilizer factory to manufacture phosphoric acid. When the bill went to the conference, as the Norris bill had authority to manufacture fertilizers, the conferees included in their first report authority to manufacture fertilizers.

It was in the power of the conference to do this under the rules. But when the matter came up before the Senate when it came to consider the conference report, it became manifest that the Senate would probably take the House view and would refuse to approve the conference report because it retained the power to manufacture a complete fertilizer. Therefore a motion was made by the proponents of the bill to recommit the same to conference, and upon such conference the authority to manufacture fertilizers as such for sale to the public was stricken out and the bill confined to the fixation of atmospheric nitrogen.

Mr. Speaker, the language "in combination with such other ingredients" does not necessarily mean in combination with other plant foods. Nitrates are a most important and highly valuable plant food, but power or highly concentrated nitrates would not be useful and serviceable to practical farmers. It is necessary that such highly concentrated nitrates should, as it were, be "diluted," and should be combined with other chemical elements used as "carriers" to which the nitrates are "fixed." For instance, nitrate of soda as it comes to this country, is suitable and available for practical use by the farmers in application to the soil and crops. It is true that most frequently it is combined by mixing the same with phosphoric acid and potash. But it is possible to use the same separately and independently of the other two mentioned. In the case of Chilean nitrates, the nitrates are "fixed" to sodium. It is chemically called "sodium nitrate." It is also fixed and combined with certain other minerals, because Chilean nitrates are only about 15 per cent pure nitrogen. In the case of cyanamide, which is about 24 per cent pure nitrogen, the nitrogen is fixed to and in combination with calcium, which is the base of limestone.

Chemists will tell you that numerous other minerals may be used as carriers to which the nitrates may be "fixed," and the corporation will adopt just such carriers as appears most practicable for that purpose. Consequently, the language "in combination with such other ingredients" is obliged to mean in combination with such other minerals as under the circumstances will constitute a useful and beneficial "carrier," so as to make the "nitrates available" when mixed with the soil and placed near the plants.

Mr. Speaker, in this connection I wish to give credit to the services rendered by the gentleman from South Carolina [Mr. McMILLAN] in connection with this matter. It was upon his motion that the word "fertilizers" was originally stricken from the bill, and many seemed to think at the time that such action was fatal to the project to use Muscle Shoals power for the benefit of agriculture. But I never thought so, and stated to the friends of the bill that, in my judgment, the motion of Mr. McMILLAN, in view of the numerous forces fighting the bill, might ultimately prove useful in the final passage of the bill. It is now manifest that if the bill could have passed the House as reported by the committee it probably never could have passed the Senate. Furthermore, after the adoption of the amendments offered by Mr. McMILLAN, he generously supported the bill in every other respect and urged and appealed to his friends to support it. Then, when the conference report came up for consideration to-day, Mr. McMILLAN spoke en-

thusiastically for the bill as reported by the conference. It is manifest to anyone understanding the true situation that the power given to the Muscle Shoals corporation to manufacture nitrates will not prove harmful in the least to the fertilizer manufacturers in this country and may indirectly prove beneficial to them.

The reason is this: The fertilizer manufacturers do not manufacture nitrogen but buy the greater part of the same from Chile and buy the rest either from Canada or from the small producers of sulphate of ammonia in this country. The fish scrap and meat trimmings are relatively insignificant.

Mr. Speaker, the net result of this bill is to help set free the American people from the monopoly that Chile has upon the natural resources of nitrogen. We are annually paying a direct tribute in the form of an export duty of nearly $9,000,000 to the Chilean Government. We are paying over $40,000,000 a year to the producers and shippers of Chilean nitrates. We almost entirely depend upon Chilean nitrates for our ammunition in the event of war. We could not afford to continue thus dependent. For that reason the Government established the great nitrogen fixing plant at Muscle Shoals. That plant can fix perhaps 50,000 tons of pure nitrogen every year, and the cost will be not over 6 cents a pound. We are now paying Chile about $60 a ton for nitrate of soda, which is about 15 per cent pure nitrogen. That means that we pay $60 for about 300 pounds of nitrogen, and that means we are paying about 20 cents a pound. The American Cyanamid Co. is fixing nitrogen at Niagara Falls at about 6 cents a pound. We can fix nitrogen at Muscle Shoals certainly as cheap as 6 cents a pound and perhaps less. If we succeed in fixing it at 5 cents a pound, then our nitrogen will cost us just one-fourth of what we are now paying for same. In other words, instead of paying to the Chilean Government and Chilean producers and shippers about $50,000,000 a year for nitrates, we can get the same at Muscle Shoals for about $12,500,000, or a saving to the American farmer of about $37,500,000. But in addition to that we will save perhaps $15,000,000 more in freight, and thus a total saving of $50,000,000 a year to the American farmers is worth while.

BENEFITS TO FARMERS

Mr. Speaker, the necessity for taking some action at Muscle Shoals is imperative. Talk about economy and common sense, the present condition of affairs at Muscle Shoals is a huge waste and a foolish mismanagement. The reports for the last few months show that the Alabama Power Co. took less than 10 per cent of the available power at the Wilson Dam. The other 90 per cent of the power was worth at the contract price about $8,000 per day. If we could get a reasonable and fair contract price, which should be twice as much as the Alabama Power Co. now pays, then our net revenues from the power being generated at Muscle Shoals would be over $3,000,000 a year. However, the net revenue last year was less than $1,000,000. Hence under the present condition of affairs at Muscle Shoals, we are losing $2,000,000 a year, the farmers are losing $50,000,000 a year on the costs of fertilizers, and the national defense is imperiled and endangered by having the source of our ammunition 6,000 miles away, separated by an ocean on which hostile fleets float, and connected by the Panama Canal, whose locks might be destroyed by a few bombs dropped by an enemy airplane.

Mr. Speaker, I am sure the farmers will derive great benefit from this bill if the President will approve it, or if he should veto it, if we shall be able to pass it over his veto. However, the key to the situation will be in the appointment by the President of the three directors and in the confirmation of those directors by the Senate. But assuming that nitrates shall be manufactured to the limit of the capacity of the plant at a cost of even 6 or 7 cents a pound, pure nitrogen, I am sure that it will prove a saving of forty or fifty million dollars a year to the farmers.

It has been contended by some persons in objection to the bill that the fertilizer manufacturers only will derive any advantage from this bill, because, it is said, they alone will be able to buy and handle the nitrates manufactured at Muscle Shoals and that they will combine these nitrates with phosphoric acid manufactured by themselves and with potash imported from Germany and that they will continue to charge the farmers a price for these finished and complete fertilizers made by agreement among themselves. But, Mr. Speaker, I do not believe that that is possible, and I do not believe that any such result can follow. I have been assured and still believe it to be true that if the $5 a ton tariff duty on sulphate of ammonia should be removed by eliminating that item in the tariff law, that the farmers would get the direct benefit of same. Furthermore, there is certainly enough competition among manufacturers of fertilizers to insure that the price of finished fertilizers will be reduced on account of the reduced cost of nitrates. The fertilizer manufacturers know that the farmers will know the price that they are paying for nitrates. The farmers also know what potash and phosphoric acid cost. Therefore, the farmers can easily tell whether or not the manufacturers are charging a reasonable price as a result of the reduced cost of nitrates. Furthermore, some of the fertilizer manufacturers are bound to compete for business against other manufacturers and will be bound to reduce the price in order to get more trade, and they can afford to reduce the price considerably on account of the reduced cost of nitrates.

But Mr. Speaker, the greatest benefit to the farmer is the fact that he can buy the nitrates himself. The bill as it passed the House provided that the nitrates should be sold first to the farmers, giving the farmers the preference, and then to farmers cooperative associations, and then to States and counties for resale to farmers, and those groups being satisfied, might sell to fertilizer manufacturers, mixers, and merchants. But the farmer that is able to buy a carload of nitrates at Muscle Shoals which will be equal to two carloads of Chilean nitrates, and will be equal to three carloads of ordinary furnished fertilizers, can buy such nitrates for use by himself on his own farm. Furthermore, groups of farmers can combine and buy a carload for their own use. Furthermore, States and counties can do as the State of South Carolina now does, buy many carloads of fertilizer ingredients and mix them and resell them to farmers at cost. Thus, the American Nation for purposes of national defense, and the American farmers will get rid of the monopoly of the Chilean Government and the Chilean producers. That monopoly has been hanging like a millstone around the necks of the American farmers. Furthermore, if the President signs the bill, and if Congress appropriates the money to build the dam at Cove Creek, the power at Muscle Shoals will be doubled, and thus the ability to turn out nitrates can be doubled without prohibitive cost. Furthermore, there will be still vast quantities of power for distribution among the neighboring States, and some of the power can and probably will be distributed through the power systems, and thus affect the power supply in several of the South Atlantic States. Thus, this great development at Muscle Shoals will prove a blessing to the whole southeast section of our Nation.

BENEFITS TO TENNESSEE

But, Mr. Speaker, that State which will receive the most direct and immediate benefits from this bill will be the State of Tennessee. Senators from Tennessee and several of the Representatives in the House have vigorously fought the bill because it contains the provision to build the great reservoir at Cove Creek. It is denied by them that the Government has the right to build that reservoir. I submit that such proposition can not be sustained. The Federal Constitution and laws made in pursuance thereof are supreme in every State, and the Federal Government need not ask the permission of a State to exercise that power in a State. Now, undoubtedly, the Federal Government has a right to increase the efficiency of its national defense project at Muscle Shoals by building the Cove Creek Dam. Undoubtedly the Federal Government has the right, under the exercise of the interstate commerce clause of the Constitution, to improve navigation in the Tennessee River. Undoubtedly the Federal Government itself must decide upon the manner and means by which it will improve such navigation. If the Federal Government decides that to build the Cove Creek Reservoir will be a benefit to navigation in the Tennessee River and in the Clinch River there is no constitutional power in the State of Tennessee to deny it and to prevent it. Furthermore, undoubtedly the Federal Government has the right and duty to exercise flood control as an incident to the control of interstate commerce. Excessive floods on the one hand, and excessive low water on the other, seriously impede interstate commerce on navigable rivers. The high waters prevent navigation and destroy the boats, barges, locks, and wharves, which are the instruments of navigation. Furthermore, the low water makes navigation impossible. Therefore, to impound the waters and release them gradually, thus rendering the volume of water more uniform, is a great aid to navigation.

Now, these are all exercises of Federal power, and the Federal Government must decide when and how and in what manner it will exercise such power. Therefore the oft-repeated statement that the Federal Government has no power to go into a State over the protest of its representatives in Congress in order to exercise a Federal power, such as is to be exercised here, is contrary to our constitutional system.

Mr. Speaker, let me illustrate just the point at issue in this case so far as the State of Tennessee is concerned. Suppose it should be adjudged by the Federal Government, either by

Congress or by any executive department, that the establishment of a great navy yard near the mouth of the Mississippi River was essential to the national defense. Suppose this navy yard involved the use of the waters of the Mississippi River, though still permitting interstate commerce to pass and repass. Suppose the State of Louisiana should say: "You shall not build this navy yard within my borders unless you agree that the same shall be subject to taxation and that I shall have joint control over the waters of the river and that at some time in the future you will surrender that navy yard to me." That would be a parallel case. Suppose, again, that the proper agency of the Federal Government decided that a magnificent fortress and munition factory and arsenal should be built in the State of Pennsylvania on and by the waters of either the Susquehanna River or the Delaware River. Suppose the State of Pennsylvania should say: "You shall not build this fortification for the national defense and this munition factory in order to make the fortification serviceable and this arsenal in order to use the munitions unless you agree to pay taxes on the property and to permit a joint control of the waters of the river alongside of your establishment and agree that at the end of a fixed time the title of the whole project shall pass to the State of Pennsylvania." The case is parallel.

The Federal Government decides, so far as Congress is concerned, that the Cove Creek Dam is essential to both the national defense and to interstate commerce, and the State of Tennessee can not raise its prohibitive finger and prevent the exercise of a Federal power conferred by the Constitution. That question was settled when the State of Tennessee entered the Federal Government, and accepted the Constitution with its supremacy, and agreed that the Federal Government should be the agent of the people of Tennessee as well as the agent of the people of all the States for promoting the national defense and of regulating interstate commerce.

But, Mr. Speaker, it is argued that for the Federal Government to build the Cove Creek Dam and to inundate about 85 square miles of land, to condemn homes and churches and cemeteries, to overflow roads and railroads and require their relocation is in excess of the powers of the Federal Government. It must be remembered, however, Mr. Speaker, that the Federal Government will pay for the land that it overflows, and will doubtless pay well for same. The right of eminent domain exists and must exist in every government. The Federal Government has the right of eminent domain in order to execute its constitutional powers. However, the very persons that raised this protest against inundating homes and creating a great inland lake admit that the dam should be built by some one, and admit that it will be a great blessing to the State and people of Tennessee when it is built. It is furthermore admitted that the State of Tennessee itself will never build this dam. Therefore, unless the Federal Government builds it, it must be built by some private corporation. If it is built by some private corporation, then the State of Tennessee must lend to that private corporation its governmental power of eminent domain in order to acquire title by condemnation to the land that will be overflowed by the waters.

When this private corporation builds the dam and overflows the land, then it will still be the same 85 square miles of water, overflowing the same homes and the same churches and the same cemeteries and the same roads and the same railroads. The private corporation will exercise the same ruthless power over the property rights of the individual that the Federal Government will exercise. The private corporation must pay the property owners just as the Federal Government must pay them. Therefore I ask what difference does it make to the people of Tennessee and the people living within the area to be flooded by the reservoir whether that power is exercised by the Federal Government or by some private corporation operating for profit? If the people of Tennessee will pause for a moment to think they will realize that the Federal Government will treat them more generously than a private corporation will treat them. The able representatives of the State of Tennessee in Congress will be able to influence the Federal Government to exercise a very liberal and exceedingly generous treatment of property owners in the Cove Creek Reservoir area. Doubtless the Federal Government will pay more for the land than a private corporation would. The private corporation will be very economical, because it is private money and it must earn dividends for its stockholders. If the private corporation builds the Cove Creek Dam, then one ninety-fifth part of the whole area of the State of Tennessee will be the exclusive private property of that corporation for all time to come, and will be a private corporation owning a great inland lake. The citizens of Tennessee might find signs posted around that lake such as were posted around Reelfoot Lake in the same State about 30 years ago. The people of Tennessee will find that a private corporation will exercise monopolistic power in order to earn the greatest power from this reservoir. So, I repeat, that the people of Tennessee should pause and think and realize that those of her representatives that see the advantages to be derived by her from the construction of the Cove Creek Dam by the Federal Government are far superior to the advantages to be derived by its construction by a private corporation, are right.

Again, Mr. Speaker, the bill as it now stands requires no contribution from such persons as may build the seven dams that can be built on the Clinch River and the Tennessee River below the Cove Creek Dam. Those dams will be practically doubled in value. Therefore, if the Government builds the Cove Creek Dam, private capital will hurry to build the other seven dams below. The river will be made navigable at all seasons of the year. The bill requires no contribution from those who build the dams below, toward the expenses of building the Cove Creek Dam. Therefore, with navigation and millions of horsepower, the Tennessee River Valley will begin to develop immediately and will soon become a thriving and prosperous section—a beehive of industry from the Cove Creek Dam to the Alabama line, and extending back a distance of 100 miles on each side of the river.

Therefore, Mr. Speaker, the quickest way to have a wonderful wave of development along the Tennessee Valley is for the people of Tennessee to get behind this building of Cove Creek Dam by the Federal Government. If the President should veto the bill, let the people of Tennessee pass resolutions calling upon both Houses of Congress to override the President's veto, so that this great development in Tennessee may commence. The advantage to the people of Tennessee will be a thousand times more than the little taxes to be derived from the land as it now stands, or even from any private corporation that might build a dam. Because the private corporation will operate the dam selfishly for its own interests, and will compel, under the Federal water power act, those who build the dams lower down the river to contribute to the expenses of the Cove Creek Dam, this contribution will virtually offset the increase of power at those lower dams.

The result is that private capital will not be so much encouraged to build those lower dams. The result will be to greatly retard their building, and thus retard the development of the Tennessee River Valley. But if they get behind the Cove Creek project and this bill and help enact this bill into law, then the hum will soon be heard in the Tennessee River Valley. Lands will immediately begin to increase in value; industries will be seeking sites upon which to locate; mineral lands hitherto of little value will jump in price; inaccessible deposits of coal and of phosphate rock will immediately come into contact with the commerce of the world; phosphate rock will float upon the navigable waters of the river down to the Muscle Shoals plant, where private capital will be permitted and encouraged to manufacture phosphoric acid to mix with the Government-made nitrogen and sell to the farmers as cheap fertilizers. These industries in the Tennessee Valley will be worth to the people of Tennessee in a few years hundreds of millions of dollars. The State of Tennessee will tax all these industries and derive enormous revenue therefrom. So, by cooperation with the Federal Government, by encouraging the Federal Government to exercise its great constitutional powers of national defense and of improving navigable rivers, the people of Tennessee will hasten the coming of a glorious day of prosperity and wealth, long dreamed of but never before realized, and whose realization will be long delayed unless complete cooperation is had with the Federal Government in this great Cove Creek project.

Mr. Speaker, some Members of Congress have based their objection to the bill to make reasonable and proper use of the Muscle Shoals project upon the ground that under section 11 the rights of the States are invaded in that if the electric power be sold to any person, firm, or corporation engaged in the sale of electricity for profit, the corporation shall require such purchasing and selling utility company to agree that the retail price to the public shall be at a price not to exceed what is fixed as reasonable, just, and fair by the Federal Power Commission. It is forcibly and fairly argued that this provision is an invasion of the reserved powers of the States, and with that proposal I agree; and, if I thought that the provision were constitutional and could be enforced over the heads of the regulatory and rate-making bodies of the States, I too would vote against the bill on that ground. But I am convinced that the objectionable provision is unconstitutional, and will be so declared by the courts. It will be remembered that the bill reported to the House by the Committee on Military Affairs contains no such provision. When the Norris bill was referred to our committee it was quickly discerned that there was such a provision in it, and I made objection to the same

at that time on several grounds, and a brief extract from the hearings had before that committee and appearing at page 499, the hearing having been held on March 17, 1928, will show the position that I took.

Mr. McSWAIN. Exactly; but it is subject to a proviso that requires a contract on the part of the purchaser of the power, whether State or municipality, not to charge a rate in excess of what will be fixed by the Federal Power Commission. In my judgment, under the circumstances, expressed by Mr. QUIN, the Supreme Court will hold this unconstitutional and void, as in violation of the fourteenth amendment, as denying to the power companies the right to equal protection of the laws, and will upset all of that paragraph.

Senator NORRIS. I have never yet heard its constitutionality questioned. I can not understand what there is about it that is unconstitutional. We have the property; we have the electricity, and we authorize the Secretary of War to sell it under the conditions named in the law. What is wrong?

Mr. McSWAIN. Here is the argument. Suppose he sells it and imposes a condition, and then the buyer goes to retail the power at a rate lower than the Alabama Power Co. is now selling it for and in direct competition with that company. The Alabama Power Co. will come in and say that that is an unequal exercise of governmental power, which deprives it of this horsepower without due process of law, and denies it equal protection of the law of the Federal Government, under the fourteenth amendment, and it is therefore null and void.

The proviso having gone out, the power to exercise—to make a contract—goes with it. The contract must be exercised subject to the proviso.

I believe that this objectionable feature in the bill will defeat the very purpose of those who have advocated it. It was eloquently and enthusiastically advocated by some Members from the near-by States within transmission distance of the Muscle Shoals plant that this provision should be in the law in order to protect the people of those States from the excessive and unreasonable charges that such corporations as the Alabama Power Co. might fix for their service and electric power. The implication from the argument was that the public utility commissions of some of those States are subservient to the Power Trust, or, at least, to certain power companies operating within their respective States. Of course, that is a matter that I know nothing about, but upon general principles I am opposed to conferring power upon any Federal body to regulate rates and other matters within a State. If the State utility commissions are now subservient, it is within the power of the people of the States to change the personnel of these bodies.

I prefer to have my rights passed upon by agencies and officers of the State rather than by some bureau in Washington. The personnel of the bureau in Washington is nonelective and in fact enjoys a virtual life tenure. Of course, the power commission is nominally made up of the Secretary of War, the Secretary of the Interior, and the Secretary of Agriculture. But these gentlemen have so many other duties that they are mere nominal commissioners, and we all know that the actual work and decisions are controlled by an executive director, a single person. This same person has held the office of executive director since the establishment of the commission after the passage of the law itself on June 10, 1920. Those that expect relief from any rate fixing by the Federal Power Commission are thus exchanging their own State commissions, made up of three or more persons, either elected by the people of the States or elected by the State legislatures, or appointed by the governors, subject to removal, for a commission in Washington made up of three Cabinet members, all too busy to see after details, and therefore everything is left to a single continuing executive officer. It seems to me that the chances are altogether in favor of fairer rates and better prices for the people when appealing to their several State rate-making bodies. Furthermore, the chances are that the rates prescribed by the Federal Power Commission will be higher than those fixed by the State utility commissions. At any rate, I think that the provision is utterly vain, useless, and may be harmful. But, believing the objectionable clause to be unconstitutional, I could support the bill as a whole, due to its other highly important, and in fact, imperative features.

We are so urgently in need of an abundant domestic supply of nitrates for both national defense and for agriculture that I was constrained to approve the bill as amended and as reported to the House by the conferees. Legislation is a compromise and no single legislator can get everything that he wants, and in order to get part of what he wants, he ofttimes must accept something that he does not want. If a legislator occupies a purely negative attitude, always seeking for and finding some excuse to vote against a measure, he will never be able to accomplish any constructive service for his constituents and his country.

Again, Mr. Speaker, it has been strenuously and earnestly argued that the provision authorizing the construction by the United States of the Cove Creek Dam for the promotion of national defense and in aid of navigation and flood control would be a contravention of the policy set out in the Federal water power act of June 10, 1920. It is insisted that said Federal water power act recognizes a joint interest and joint control as between the Federal Government and the State Government, through whose borders the navigable stream passes. It is true that under the Federal water power act if a private corporation desires to build a power dam in and across a navigable stream, it must first obtain the preliminary permit and then the license of the Federal Power Commission, and, that being obtained, it must next obtain the permission and authority of the States. This permission of the State is necessary for several reasons. First, the corporation itself must either be chartered by the State, or if it be a foreign corporation, it must receive the permit of the State to do business within its borders.

In the next place, it must recognize that the State itself has a certain interest in the stream and that the State and the citizens of the State have the right to use the stream as a means of transportation. Furthermore, if the corporation must exercise the power of condemnation, and it is practically certain that no power development could ever be made without the right of condemnation on the part of the power company, it is necessary that the State lend to such corporation the right to exercise its own power of eminent domain. But it must not be overlooked that we have here been dealing with the improvement and development by a private corporation of a power property in a navigable stream and within a State.

But Mr. Speaker, when the Federal Government itself comes to deal with the development and improvement of a navigable stream, for the execution of its own constitutional functions, it need not consult the State. If it must consult the State, then the State might refuse its consent, and if the State could refuse its consent to the Federal Government to exercise its constitutional powers, the State might completely paralyze and thus destroy the Federal Government. The Federal water power act itself recognizes such a project as is contemplated by the dam to be constructed at Cove Creek. The following definition is given in the Federal water power act:

"Government dam" means a dam or other work constructed or owned by the United States for Government purposes with or without contribution from others.

Again anticipating just such a situation as has arisen at Cove Creek in Tennessee, the Federal water power act contains the following provision in subsection D of section 4:

Whenever the contemplated improvement is, in the judgment of the commission, desirable and justified in the public interest for the purpose of improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, a finding to that effect shall be made by the commission and shall become a part of the records of the commission: *Provided further,* That in case the commission shall find that any Government dam may be advantageously used by the United States for public purposes in addition to navigation, no license therefor shall be issued until two years after it shall have reported to Congress the facts and conditions relating thereto.

Again the Federal water power act contemplates the construction of reservoirs by the Federal Government and contains the following right of assessment against any person that might construct a dam below such reservoir and that might be benefited thereby:

Whenever such reservoir or other improvement is constructed by the United States the commission shall assess similar charges against any licensee directly benefited thereby, and any amount so assessed shall be paid into the Treasury of the United States, to be reserved and appropriated as a part of the special fund for headwater improvements as provided in section 17 hereof.

Fortunately for the State of Tennessee the bill as the same passed Congress does not require any contribution by any of the seven dams that may be built below Cove Creek (and all would be doubled in value thereby) to contribute anything to the cost of building Cove Creek Dam. The reason for this is that it is the duty of the Federal Government to improve navigation and to exercise flood control. Therefore it is proposed by the bill that passed Congress to charge up the total cost of constructing the Cove Creek Dam to flood control and navigation and to such benefits as the Government dams at Wilson Dam and at Dam No. 3, when built, would receive, and to give the seven owners of the dams below Cove Creek the benefit and advantage of such improvement in the power to be developed at such dams and not to charge to the owners

of such dams any cost of contribution whatsoever. That is an enormous advantage to the State of Tennessee.

Consequently the proposition that there was contemplated a joint authority to license and a joint control as between both the Federal Government and the State government when the Federal Government itself constructs the dam or reservoir for public purposes is unwarranted and unfounded in either the Constitution itself or in the Federal water power act.

MONUMENT TO ALBERT GALLATIN

Mr. CELLER. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

MAY 17, 1928.

To the EDITOR:

The last Congress authorized the erection of a monument to Albert Gallatin at the north entrance of the Treasury Building. Ten thousand dollars was appropriated for the pedestal, but the statue was to be paid out of a fund to be raised by public subscription.

The passage of the bill was hailed with delight. I, personally, argued for its favorable consideration on the floor of the House. At last Gallatin, great Secretary of the Treasury, under Presidents Jefferson and Madison, was to come into his own. A grateful country was to give well-deserved honor to the memory of her adopted son—"adopted" because Gallatin had been born in Switzerland. He was a "citizen by choice." Alexander Hamilton, another great Secretary of the Treasury, another "citizen by choice" because of his birth in the West Indies, had already been signally honored by the erection of a statue at the south entrance. Gallatin, at the north entrance of the Treasury Building, was to be a companion piece.

How fitting it is that these two statesmen, although opposed in political principle and doctrine but who nevertheless united to place the financial credit of the Union upon the strongest basis, should now be remembered by memorials, each gracing the opposite entrances of the famous building housing the department in which they rendered yeoman service! Even so, England has honored Fox and Pitt as they rest side by side in Westminster Abbey. Senator WALSH pointed out that they lie so close that it has been beautifully said:

"The mighty chiefs sleep side by side.
Drop upon Fox's grave the tear—
'Twill trickle on his rival's bier."

But almost a year has gone by since the passage of the Gallatin resolution. Popular subscription has not brought forth the money for the monument. It seems as though the passage of the bill were a mere "Beau Geste."

No great public interest has been aroused, although Mr. Perry Belmont tried earnestly to interest certain people in the project. He now heads the list of subscriptions with $1,000. Frazier, who sculptured the Hamilton Monument, has now been tentatively selected for the Gallatin figure.

Of course, Gallatin's fame does not bite into our history like Hamilton's. He did not meet an untimely death by fighting a duel with Burr. That duel has made Hamilton a sort of legendary character, but Gallatin's achievements are as worthy as Hamilton's. He held the portfolio of the Treasury longer than any other man. He fashioned the financial policy of the young Government for 12 years, for the two terms of Jefferson and for the first term of Madison, and well into the second. It was his ingenuity and skill that prevented financial chaos during the War of 1812. He had been a Member of Congress and later a United States Senator, and was among the first to advocate the abolition of slavery.

He also achieved greatness in the field of diplomacy, where he remained for 16 years, even during the administration of John Quincy Adams, to whom he was opposed politically. In the thirteenth year of his service in the Cabinet as Secretary of the Treasury, Madison sent him to St. Petersburg to enlist the interest of the Czar in connection with peace with Great Britain. His mission ended with the treaty of Ghent. He became minister to France and then minister to Great Britain. He later became a successful banker and founded the National City Bank of New York. When he was 80 years of age he was again offered the office of Secretary of the Treasury. In 1830 he became one of the prime movers in the establishment of what was then known as the University of the City of New York, now New York University. A year later he became its first president.

We are indeed ungrateful if we do not erect the monument that Congress authorized. We are prone to castigate public characters, living and dead, for their errors. Here is an opportunity to honor a real peace-time hero, a statesman to the nth degree, whose life was dedicated to his country's service.

The statute will cost $40,000, $20,000 of which is to be raised in New York and $20,000 in Pennsylvania. I ask all patriotic New Yorkers to contribute.

Grover Cleveland, I believe, said of monuments erected to certain men, that he would rather have it said, "Why was not a statue erected to him?" than "Why was a statue erected to him?" A statue to Gallatin will never be questioned. It will always be applauded.

Contributions should be sent to Col. Thomas H. Birch, 6 East Seventy-sixth Street, New York City, or to my office, room 466 A, House Office Building, Washington, D. C.

Representative EMANUEL CELLER,
Tenth Congressional District, Brooklyn, N. Y.

ARMY HOUSING PROGRAM

Mr. JAMES. Mr. Speaker, during the first session of the Seventieth Congress, which is coming to a conclusion to-day, the Army housing program has been carried forward in what I think we should all consider a highly satisfactory manner. The bills H. R. 13825 and H. R. 11469, which have just passed the House, carry an authorization for a total of $14,809,260. This amount, together with other authorizations passed during the present session and already approved by the President, provides housing for the following personnel of the Army:

Officers	941
Noncommissioned officers	1,160
Enlisted men	9,877
Patients in hospitals	664
Nurses	264

Including the amount which is carried in these bills—which now go to the Senate for action—Congress has authorized since the beginning of the present Army housing program, in March of 1926, a total of $53,026,285 for Army housing construction. Of this amount, $20,839,975 has already been appropriated by Congress. The Secretary of War has been authorized to enter into contracts for an additional $4,585,100. Of the remainder, $12,791,950 has been authorized and is awaiting appropriation, and of the balance $14,200,260 is in H. R. 13825 and $609,000 is in H. R. 11469. Both of the last bills have just passed the House.

This $53,026,285 will provide housing for the following Army personnel:

Officers	1,190
Noncommissioned officers	1,355
Enlisted men	25,413
Patients in hospitals	1,897
Nurses	311

The above statement indicates that the money so far authorized has been for the purpose of providing quarters and hospital accommodations for the officers and enlisted men of the Army and their families, and it will readily be seen that splendid progress is being made in this work. Until these needs for quarters are very fully met, little or no progress can be made with those features of the Army housing program which include stables, warehouses, administration buildings, school buildings, and other necessary structures and buildings that go to make up an Army post.

It is interesting to note that the money included in the above authorizations has been distributed to meet the needs at 53 Army posts, including stations, not only in all parts of the United States but in Porto Rico, the Canal Zone, and Hawaii. Just what has been done for each one of these 53 stations is found in the following detailed statement for each post.

1. ALBROOK FIELD, CANAL ZONE

The following amounts are provided for this station:

Barracks to accommodate 650 enlisted men	$560,000
Quarters to accommodate 90 noncommissioned officers	539,000
Quarters to accommodate 70 officers	778,000
Dispensary	30,000

This is a new flying field which is being developed on the Pacific side of the Canal Zone, and it will be the station of a wing headquarters and a pursuit group.

2. CORUNDU, CANAL ZONE

The following amounts are provided for this station:

Barracks to accommodate 500 enlisted men	$357,500

This is also a new station in the Canal Zone which will be garrisoned by troops of the Field Artillery.

3. FRANCE FIELD, CANAL ZONE

The following amounts are provided for this station:

Barracks to accommodate 370 enlisted men	$360,000
Quarters to accommodate 57 noncommissioned officers	390,000
Quarters to accommodate 50 officers	500,200
Dispensary	30,000

France Field is on the Atlantic side of the Canal Zone and is being completed under the five-year Air Corps program. This station is now partially developed, but there is a shortage of quarters for officers and noncommissioned officers. The amounts herein authorized will provide permanent barracks for the enlisted men assigned to this station.

4. FORT KAMEHAMEHA, HAWAIIAN DEPARTMENT

The following amounts are provided for this station:

Barracks to accommodate 65 enlisted men	$35,000

The permanent quarters at this station prior to the inauguration of the Army housing program accommodated:

Enlisted men	1,061
Noncommissioned officers	29
Officers	40

This station is the headquarters of the harbor defenses of Pearl Harbor, and is garrisoned primarily by troops of the Coast Artillery Corps. It is on land near this post where a new flying field will be developed under the five-year Air Corps program. The authority to acquire the land for this flying field was contained in a bill which recently passed Congress.

5. SCHOFIELD BARRACKS, HAWAIIAN DEPARTMENT

The following amounts are provided for this station:

Barracks to accommodate 1,150 enlisted men	$830,000
Quarters to accommodate 43 noncommissioned officers	172,000
Quarters to accommodate 27 officers	300,000
Hospital of 400 beds	900,000
Quarters to accommodate 28 nurses	65,000

Schofield Barracks is one of the largest posts in the Army, and is the station of the Hawaiian Division, which is composed of troops of all arms of the line of the Army. The permanent quarters which existed at this station prior to the inauguration of the Army housing program accommodated:

Enlisted men	7,000
Noncommissioned officers	38
Officers	275

6. WHEELER FIELD, HAWAIIAN DEPARTMENT

The following amounts are provided for this station:

Barracks to accommodate 432 enlisted men	$504,000
Quarters to accommodate 88 noncommissioned officers	411,600
Quarters to accommodate 58 officers	816,000
Dispensary	40,000

This is a new flying field, and the above funds provide for the first permanent construction at this field. They are sufficient to complete the requirements for barracks, noncommissioned officers' quarters, and hospitalization for this station. An additional $458,000 is required to complete the housing program at this station. It was at Wheeler Field that Maitland and Hegenberger and the Dole flyers landed after their flight across the Pacific Ocean from Oakland, Calif. At that time the field was so limited in area that their plane could not have taken off with a proper degree of safety with a full load. This condition, however, will be rectified before the construction program at this field is completed. I arrived in Honolulu shortly after the completion of the Maitland flight, and I had the privilege of flying over the islands in that historic plane. It afforded me a wonderful opportunity to get a bird's-eye view of our defense system there.

7. SAN JUAN, PORTO RICO

The following amounts are provided for this station:

Barracks to accommodate 270 enlisted men	$20,000
Quarters to accommodate 5 noncommissioned officers	30,000
Quarters to accommodate 24 officers	240,000
Alteration of a hospital	10,000

Porto Rico is the station of the Sixty-fifth Infantry and some other auxiliary troops. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated:

Enlisted men	1,006
Noncommissioned officers	4
Officers	6

The necessity for completing the housing requirements for officers and noncommissioned officers and their families in Porto Rico is very great, as it is in all of our other tropical possessions. Where it is hot the year around our people who are used to colder climates should be quartered in suitable and comfortable buildings. An additional $449,000 is still needed to complete the housing program in Porto Rico.

8. ABERDEEN PROVING GROUND, MARYLAND

The following amount is provided for this station:

Hospital to accommodate 12 patients	$60,000

This is the proving ground for the Ordnance Department of the Army. The garrison at this station consists of officers and enlisted men of the Ordnance Department and some of the auxiliary services.

The above amount will complete the hospital requirements for this station and make ample provision for the accommodation of the medical enlisted personnel, but an additional $294,500 is needed to complete the housing program.

9. ALCATRAZ ISLAND, CALIF.

The following amounts are provided for this station:

Complete the utility building	$15,000

This is the station of the Pacific branch of the United States disciplinary barracks. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated:

Enlisted men	350
Noncommissioned officers	11
Officers	6

Approximately $201,500 is still needed to complete the housing program on this island.

10. FORT BENJAMIN HARRISON, IND.

The following amounts are provided for this station:

Quarters to accommodate 8 noncommissioned officers	$54,000
Service club	50,000
Barracks to accommodate 447 enlisted men	400,000

This is the station of the Eleventh Infantry and the Third Field Artillery and some troops of other branches. A school for bakers and cooks is also located at this station. The permanent quarters at this station prior to the inauguration of the present Army housing program accommodated:

Enlisted men	900
Noncommissioned officers	8
Officers	48

11. FORT BENNING, GA.

The following amounts are provided for this station:

Barracks to accommodate 2,485 enlisted men	$1,490,000
102 sets of noncommissioned officers' quarters	656,000
38 sets of officers' quarters	484,000
Complete hospital for 250 patients	315,000
Quarters to accommodate 24 nurses	65,000
Dispensary	60,000

These amounts will complete the hospital requirements and the nurses' quarters. This is the station of the Infantry School, the largest special service school in the Army. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated:

Noncommissioned officers	10
Officers	71
Patients in hospital	102

At Fort Benning I was very much impressed with how much the troops have done for themselves in the way of providing quarters for themselves in addition to those authorized by Coogress. In fact, during my 25,000-mile inspection trip I was forcibly struck by the fact that the Army is resourceful and the officers and men, as well as their families, have the happy faculty of making themselves comfortable even under the most adverse conditions.

12. FORT BLISS, TEX.

The following amounts are provided for this section:

Quarters to accommodate 75 noncommissioned officers	450,000

This is the station of the headquarters and a large part of the First Cavalary Division and various auxiliary troops. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated—

Enlisted men	1,132
Noncommissioned officers	8
Officers	110

13. BOLLING FIELD, WASHINGTON, D. C.

The following amounts are provided for this station:

Barracks to accommodate 300 enlisted men	$240,000

There is also carried in the bill which just passed the House an authorization of $666,000 to acquire real estate adjacent to Bolling Field for the necessary extension and development of this flying field. This is a new flying field and these funds will provide the first permanent construction at this post.

14. FORT BRAGG, N. C.

The following amounts are provided for this station:

Barracks to accommodate 1,440 enlisted men	$1,118,000
Quarters to accommodate 46 noncommissioned officers	291,000
Quarters to accommodate 56 officers	780,000
Quarters to accommodate 25 nurses	60,000
Hospital ward to accommodate 30 patients	100,000

This is a large training area for the Field Artillery and is the station of the headquarters of the Thirteenth Field Artillery Brigade as well as troops of some of the auxiliary arms of the service. It is a new station that is being developed since the World War. No permanent quarters existed at this station prior to the inauguration of the present Army housing program.

15. CARLISLE BARRACKS, PA.

The following amount is provided for this station:

Mess hall and kitchen	$110,000

Carlisle Barracks is the station of the Medical Field Service School and also of the First Medical Regiment. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated—

Enlisted men	449
Noncommissioned officers	2
Officers	36

An additional $330,000 will complete the housing program at this station.

16. CHANUTE FIELD, ILL.

The following amounts are provided for this station:

Barracks to accommodate 163 enlisted men	$150,000
Quarters to accommodate 5 officers	70,000

This is a new flying field, and these funds provide the first permanent construction at this post. This is the station of the Air Corps Technical School, and is one of the very important stations to be developed in carrying out the five-year Air Corps program. It is at this school where both officers and enlisted men are instructed in photography and various mechanical and electrical specialties.

17. CRISSY FIELD, CALIF.

The following amounts are provided for this station:

Barracks to accommodate 165 enlisted men	$158,400
Quarters to accommodate 20 noncommissioned officers	144,000
Quarters to accommodate 10 officers	150,000

Crissy Field is located at the Presidio of San Francisco, Calif., and is the station of the Third Division Air Service. The permanent quarters which existed at this post prior to the inauguration of the present Army housing program accommodated:

Enlisted men	160
Noncommissioned officers	11
Officers	25

Approximately $194,000 is still needed to complete the housing program at Crissy Field.

18. CAMP DEVENS, MASS.

The following amounts are provided for this station:

Barracks to accommodate 970 enlisted men	$800,000
Quarters to accommodate 21 noncommissioned officers	136,000
Quarters to accommodate 23 officers	314,000
Hospital of 105 beds	400,000

This is a new post, which is being developed since the World War. It is the station of the Thirteenth Infantry and troops of some of the auxiliary arms of the service, and is a large training center for civilian components of the Army. The above amounts will complete the requirements for barracks, noncommissioned officers' quarters, and hospitalization, but an additional $285,000 is needed to fully complete the housing program. No permanent quarters existed at this post prior to the inauguration of the present Army housing program.

19. FORT DOUGLAS, UTAH

The following amounts are provided for this station:

Quarters to accommodate 8 noncommissioned officers	$54,000
Quarters to accommodate 6 officers	75,000

These amounts will complete the requirements for noncommissioned officers and officers at this station and another $68,000 will complete the housing program. This is the station of the headquarters of the Sixth Infantry Brigade and some other troops of the auxiliary arms of the service. The permanent quarters which existed at this post prior to the inauguration of the present Army housing program accommodated:

Enlisted men	1,269
Noncommissioned officers	12
Officers	40

20. EDGEWOOD ARSENAL, MD.

The following amount is provided for this station:

Quarters to accommodate 10 officers	$90,000

This completes the requirements for officers' quarters at this post, and an additional $281,500 will complete the housing program. This is the station of the Chemical Warfare Depot, the Chemical Warfare Service School, and the headquarters of the First Gas Regiment, as well as some detachments of other branches of the service. The permanent quarters which existed at this post prior to the inauguration of the present Army housing program accommodated:

Officers	79
Noncommissioned officers	8
Patients in hospital	160

21. ERIE ORDNANCE DEPOT, OHIO

The following amounts are provided for this station:

Barracks to accommodate 50 enlisted men	$47,000
Hospital to accommodate 15 patients	75,000

This is an Ordnance Department post and adjoins Camp Perry, Ohio, and the hospital there is used for persons attending the national rifle matches and those attending training camps at Camp Perry. The permanent hospital accommodations must be such to permit of the treatment of the seriously sick and injured.

The above amounts will fully meet these requirements, but an additional $31,000 is needed to complete the housing program.

22. FORT HUMPHREYS, VA.

The following amounts are provided for this station:

Barracks to accommodate 935 enlisted men	$740,000
Quarters to accommodate 72 noncommissioned officers	454,000

These amounts will complete the requirements for barracks and noncommissioned officers' quarters at this post. This is a new post which is being developed since the World War. It is the station of the Engineer Special Service School. There was no permanent construction at this station prior to the inauguration of the present Army housing program. I might state, however, that semipermanent quarters for some officers exist at this station which will not require replacement for a number of years.

23. FORT JAY, N. Y.

The following amounts are provided for this station:

Hospital to accommodate 100 patients	$400,000
Barracks to accommodate 1,571 enlisted men	1,686,000

These amounts will complete the requirements for barracks and hospitalization at this post. This is the station of the headquarters of the Second Corps Area and the Sixteenth Infantry and some troops of the auxiliary arms. It is also the station of the United States Disciplinary Barracks. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated:

Noncommissioned officers	46
Officers	100

24. LANGLEY FIELD, VA.

The following amounts are provided for this station:

Barracks to accommodate 798 enlisted men	$764,160
Quarters to accommodate 80 noncommissioned officers	516,000
Quarters to accommodate 32 officers	480,000
Hospital to accommodate 55 patients	175,000

The bill which has just passed the House also authorized $200,000 for the construction of a sea wall and fill. This is the station of the Air Corps Tactical School, second wing headquarters, Nineteenth Airship Company, Fifty-eighth Service Squadron, and the headquarters of the second bombardment group, as well as other special troops. The permanent quarters at this station will house:

Enlisted men	17
Noncommissioned officers	22
Officers	98

25. FORT LEAVENWORTH, KANS.

The following amounts are provided for this station:

Hospital ward to accommodate 22 patients	$75,000

This completes the requirements for hospitalization at this post, but an additional $312,300 is still needed to complete the housing program. Fort Leavenworth is the station of the Command and General Staff School and of certain special and technical troops. It is to the Command and General Staff School where officers of all branches of the Army are sent after completing the courses in their special service schools for instruction in the duties of the commanders and staff officers of the division and other large military organizations which are composed of troops of all arms. The permanent quarters which existed at this post prior to the inauguration of the present Army housing program accommodated:

Enlisted men	951
Noncommissioned officers	52
Officers	375

26. UNITED STATES DISCIPLINARY BARRACKS, FORT LEAVENWORTH, KANS.

The following amount is provided for this station:

Hospital to accommodate 140 patients	$125,000

This completes the housing program at this post. This is the station of the United States Disciplinary Barracks. The permanent quarters which existed at this post prior to the inauguration of the present Army housing program accommodated:

Enlisted men	485
Officers	30
Noncommissioned officers	46

27. FORT LEONARD WOOD, MD.

The following amounts are provided for this station:

Barracks to accommodate 1,242 enlisted men	$1,010,000
Quarters to accommodate 32 noncommissioned officers	200,000
Quarters to accommodate 34 officers	460,000
Hospital to accommodate 75 patients	300,000
Quarters to accommodate 17 nurses	40,000

This post was known as Camp Meade during and following the World War. Its name has recently been changed in honor

of the distinguished soldier who died only a short time ago. It it a new post which is being developed since the World War, and besides being the station of the Tank School and the headquarters of an Infantry brigade it is a large training area for civilian components of the Army. There were no permanent quarters at this station prior to the inauguration of the present Army housing program.

28. LETTERMAN GENERAL HOSPITAL, CALIF.

The following amounts are provided for this station:

Hospital ward to accommodate 174 patients	$200,000
Quarters to accommodate 18 nurses	70,000

This is the beginning of a development program for this general hospital. The permanent quarters which existed at this hospital prior to the inauguration of the present Army housing program accommodate:

Noncommissioned officers	6
Officers	9
Patients	750

29. FORT LEWIS, WASH.

The following amounts are provided for this station:

Barracks to accommodate 2,083 enlisted men	$1,650,000
Quarters to accommodate 30 noncommissioned officers	191,000
Quarters to accommodate 25 officers	337,000
Quarters to accommodate 9 nurses	32,000
Hospital to accommodate 87 patients	350,000

These amounts will complete the requirements for barracks, nurses' quarters, and hospitalization at this post. This is a new post and no permanent quarters existed there prior to the inauguration of the present Army housing program. This is the station of the headquarters of the Third Division and certain special and tactical troops. It is also a large training center for civilian components of the Army.

30. MARCH FIELD, CALIF.

The following amounts are provided for this station:

Barracks to accommodate 688 enlisted men	$550,000
Quarters to accommodate 39 noncommissioned officers	250,800
Quarters to accommodate 60 officers	750,000
Hospital to accommodate 45 patients	150,000

The above amounts will complete the requirements for barracks at this point. This is a new flying field which is being utilized temporarily as one part of the Primary Flying School for the Air Corps. Under existing plans this section of the Primary Flying School will ultimately be transferred to the new flying field at San Antonio, and March Field will then become a station for tactical units of the Air Corps and certain special and tactical troops. There were no permanent quarters at this station prior to the inauguration of the present Army housing program.

31. MARSHALL FIELD, KANS.

The following amounts are provided for this station:

Barracks to accommodate 132 enlisted men	$125,000
Quarters to accommodate 20 noncommissioned officers	144,000
Quarters to accommodate 20 officers	300,000

This is the station of the Second Cavalry Division Air Service. It is located at Fort Riley, Kans. It is a new flying field and no permanent construction existed at this field prior to the inauguration of the present Army housing program. An additional $275,000 will complete the housing program at this field.

32. MAXWELL FIELD, ALA.

The following amounts are provided for this station:

Barracks to accommodate 162 enlisted men	$130,000
Quarters to accommodate 13 noncommissioned officers	70,000
Quarters to accommodate 23 officers	340,000

This is the station of the Fourth Division Air Service and certain special and technical troops. It is a new flying field and no permanent construction existed at this post prior to the inauguration of the present Army housing program.

33. CAMP M'CLELLAN, ALA.

The following amounts are provided for this station:

Barracks to accommodate 349 enlisted men	$300,000
Quarters to accommodate 7 noncommissioned officers	48,000
Quarters to accommodate 18 officers	225,000
Hospital to accommodate 30 patients	100,000

The above amounts will complete the requirements for officers' quarters and hospitalization at this camp, but an additional $335,500 is needed to complete the housing program. Camp McClellan was originally purchased as a Field Artillery training area for the National Guard. In addition to being the station of Infantry troops, it is utilized as a training center for civilian components of the Army. No permanent construction existed at this camp prior to the inauguration of the present Army housing program.

34. FORT M'PHERSON, GA.

The following amount is provided for this station:

Completion of the hospital	$150,000

This is the station of the headquarters of the Fourth Corps Area and of the Seventeenth Infantry and of certain special and technical troops. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated:

Enlisted men	714
Noncommissioned officers	8
Officers	64

An additional $269,500 is still needed to complete the housing program.

35. MITCHEL FIELD, N. Y.

The following amounts are provided for this station:

Barracks to accommodate 705 enlisted men	$567,000
Quarters to accommodate 50 noncommissioned officers	336,000
Quarters to accommodate 44 officers	660,000
Hospital to accommodate 36 patients	150,000

The above amounts will complete the requirements for barracks and hospitalization at this post. This is the station of the First Division Air Service and other tactical units of the Air Corps and some special and technical troops. It is a new flying field and there was no permanent construction at the post prior to the inauguration of the present Army housing program.

36. FORT MONMOUTH, N. J.

The following amounts are provided for this station:

Barracks to accommodate 860 enlisted men	$555,000
Quarters to accommodate 18 noncommissioned officers	115,000
Quarters to accommodate 52 officers	672,000
Hospital of 27 patients	100,000

The above amounts will complete the requirements for barracks and hospitalization at this station. This is the station of the Signal Corps Special Service School. It is a new station that has been developed since the World War and no permanent construction existed there prior to the inauguration of the present Army housing program.

37. FORT MONROE, VA.

The following amount is provided for this station:

Quarters to accommodate 36 officers	$468,000

This is the station of the headquarters of the Third Coast Artillery District, the harbor defenses of Chesapeake Bay, and of the Coast Artillery Special Service School. The permanent construction which existed at Fort Monroe prior to the inauguration of the present Army housing program accommodated:

Enlisted men	1,234
Noncommissioned officers	81
Officers	119

An additional $274,000 is still needed to complete the housing program.

38. CAMP NORMOYLE, TEX.

The following amount is provided for this station:

Barracks to accommodate 206 enlisted men	$180,000

This is the station of a large quartermaster depot and of the Third Motor Repair Battalion and of some special and technical troops. It is a new station, which is being developed since the World War, and no permanent construction existed there prior to the inauguration of the present Army housing program.

39. PLATTSBURG BARRACKS, N. Y.

The following amounts are provided for this station:

Barracks to accommodate 54 enlisted men	$45,000
An addition to the post hospital to accommodate 12 patients	55,000

This is the station of the Twenty-sixth Infantry and some special and technical troops.

The above amount completes the hospital requirements at this station. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated:

Enlisted men	910
Noncommissioned officers	22
Officers	43
Patients in the hospital	36

40. PRESIDIO OF SAN FRANCISCO, CALIF.

The following amount is provided for this station:

For a chapel	$40,000

This completes the housing program for this post.

The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated:

Enlisted men	3,030
Noncommissioned officers	137
Officers	120

At the Presidio is located the headquarters of the Ninth Corps Area, the Thirtieth Infantry, and their military activities.

41. RARITAN ARSENAL, N. J.

The following amounts are provided for this station:

Quarters to accommodate 7 noncommissioned officers	$42,000
Hospital to accommodate 10 patients	50,000

This is an ordnance post. The amount authorized above will complete the hospital requirements and will give appropriate housing for the medical enlisted personnel, but an additional $362,500 is needed to complete the housing program at this post.

This is a new station and the funds here authorized will provide the first permanent quarters.

42. FORT RILEY, KANS.

The following amounts are provided for this station:

Quarters to accommodate 21 noncommissioned officers	$125,000
Quarters to accommodate 41 officers	523,000

This will complete the noncommissioned officers' quarters requirements at this station.

This is the station of the Cavalry Special Service School.

The permanent quarters which existed at Fort Riley prior to the inauguration of the present Army housing program accommodated:

Elisted men	2,319
Noncommissioned officers	54
Officers	132

43. ROCKWELL FIELD, CALIF.

The following amounts are provided for this station:

Barracks to accommodate 300 enlisted men	$240,000
Quarters to accommodate 28 noncommissioned officers	186,000
Quarters to accommodate 26 officers	350,000

This is the station of an Air Corps depot and of tactical and technical troops of the Air Corps.

The permanent quarters which existed at this flying field prior to the inauguration of the present Army housing program accommodated:

Officers	4
Patients in the hospital	46

44. FORT SAM HOUSTON, TEX.

The following amounts are provided for this station:

Quarters to accommodate 23 noncommissioned officers	$150,000
Quarters to accommodate 18 officers	250,000
Barracks to accommodate 2,679 enlisted men	2,170,000
Post signal communication central building	30,000

The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated:

Enlisted men	2,732
Noncommissioned officers	22
Officers	145

Fort San Houston is one of our largest military posts. It is the station of the headquarters of the Eighth Corps Area, of the Second Division, and of many other military activities.

45. SAN ANTONIO PRIMARY TRAINING SCHOOL, SAN ANTONIO, TEX.

The following amounts are provided for this station:

Barracks to accommodate 1,300 enlisted men	$2,371,950
214 sets of noncommissioned officers' quarters	1,141,200
246 sets of officers' quarters	3,170,000
Hospital of 90 beds	200,000
Magazine (explosive)	15,000
Quartermaster warehouse	90,000
Garage for Government transportation	80,000
Quartermaster maintenance building	20,000
Fire house	15,000
Guardhouse	30,000
Post exchange	45,000
Theater and gymnasium	60,000
Incinerator	5,000
Railroad spur and tracks	39,700
Telephone and telegraph lines in conduit	68,375
Bakery	10,000
Chapel and school	50,000
Enlisted men's club	60,000
Officers' mess	60,000

This is a new station, the site for which has just been acquired in accordance with authority granted by this present Congress. It is to be the station of the Primary Flying School, the two parts of which are now located at Brooks Field, Tex., and March Field, Calif. If the air space above this field is found to be sufficient, it will also be the station of the Advanced Flying School.

46. SCOTT FIELD, ILL.

The following amounts are provided for this station:

Quarters to accommodate 21 noncommissioned officers	$150,000
Barracks for 100 men	100,000

This is a new field and the funds here authorized provide for the first permanent construction.

This is the station of the Air Corps Balloon and Airship School and of some special and technical troops.

47. SELFRIDGE FIELD, MICH.

The following amounts are provided for this station:

Barracks to accommodate 700 enlisted men	$570,000
Quarters to accommodate 78 noncommissioned officers	510,400
Quarters to accommodate 56 officers	787,000
Hospital of 30 beds	100,000

This completes the barrack and hospital requirements of this station. This is a new flying field and the funds authorized above provided the first permanent construction.

This is the station of the first pursuit group and of some other tactical organizations of the Air Corps.

48. FORT SILL, OKLA.

The following amount is provided for this station:

Quarters to accommodate 6 officers	$72,000

The permanent construction which existed at this post prior to the inauguration of the present Army housing program accommodated:

Enlisted men	1,426
Officers	66
Noncommissioned officers	40
Patients in hospital	60

This is the station of the Field Artillery Special Service School, the First Field Artillery, and certain special and technical troops.

49. FORT SLOCUM, N. Y.

The following amounts are provided for this station:

Barracks to accommodate 525 enlisted men	$426,000
Quarters to accommodate 4 officers	54,000

An additional $452,000 will complete the housing program at this post.

The permanent construction which existed at this post prior to the inauguration of the present Army housing program accommodated:

Enlisted men	1,389
Noncommissioned officers	8
Officers	32

50. FORT SNELLING, MINN.

The following amount is provided for this station:

Quarters to accommodate 4 officers	$54,000

This completes the housing program at this post.

The permanent quarters at Fort Snelling prior to the inauguration of the present Army housing program accommodated:

Enlisted men	1,501
Noncommissioned officers	45
Officers	59

Fort Snelling is the station of the Third Infantry and is a training area for civilian components of the Army.

51. FORT WADSWORTH, N. Y.

The following amounts are provided for this post:

Barracks to accommodate 767 enlisted men	$625,000
Quarters to accommodate 5 noncommissioned officers	30,000

The permanent construction which existed at this post prior to the inauguration of the present Army housing program accommodated:

Noncommissioned officers	18
Officers	14

An additional $253,300 is still needed to complete the housing program at this post. Fort Wadsworth is the station of the headquarters of the First Infantry Brigade, of a part of the Sixteenth Infantry, and of some special and technical troops. It is a part of the harbor defenses of southern New York.

52. WALTER REED GENERAL HOSPITAL, ARMY MEDICAL CENTER, WASHINGTON, D. C.

The following amounts are provided for this hospital:

Quarters to accommodate 190 nurses	$660,000
Continuation of work on new hospital	310,000

The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated:

Enlisted men	225
Noncommissioned officers	2
Officers	17

The building program which is progressing so splendidly at Walter Reed is well known to all Members of the House. It is a wonderful hospital and deserving of the fine plant which is being built there.

53. WEST POINT, N. Y.

The following amounts are provided for this station:

Cadet barracks	$185,000
Quarters to accommodate 72 officers	600,000
Quarters to accommodate 25 noncommissioned officers	150,000
Veterinary hospital	25,000
Alteration of West Academic Building	50,000

The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated:

Cadets (2 per room)	875
Enlisted men	1,060
Noncommissioned officers	119
Officers	156
Patients in hospital	116

Construction for West Point has been carried on for several years as a separate building program for that post alone. It is now, and will hereafter be, carried on as a part of the housing program for the Army.

I have related in considerable detail just what we have been doing for Army housing. I want the Members of the House and I want the country generally to know that we are fully alive to these needs and that we are meeting the requirements in a very satisfactory manner.

During the last year I personally spent many weeks investigating these needs, and I think I have a very good understanding of what they are. I traveled over 25,000 miles, and I saw the conditions in Panama and Hawaii, as well as in most parts of the continental limits of the United States. On this trip I devoted my time and study especially to Army housing, and I can assure the Members of the House that every dollar of this money which we are authorizing is going for a good and a necessary purpose and only to those places where it is most needed.

A considerable portion of the amounts carried in each authorization bill is for the Air Corps. This is necessary for two reasons: First, the Air Corps is in almost every case located at a new station, which was acquired during or since the war, and where no permanent construction exists; and secondly, because of the requirements of the five-year Air Corps program. However, it should be noted that construction is being provided for the other branches of the Army in such a way as to carry on a well-balanced program for the entire Army. The Air Corps is catching up with the older branches. In my judgment, the program should go forward so as to complete it for all branches at about the same time, in the meantime keeping in mind the most urgent needs and meeting them as they arise.

In conclusion I want to commend to the House the splendid spirit in which the members of the Military Affairs Committee are working out this housing problem and to assure the Members of the House that in this work the committee has found a splendid spirit of cooperation on the part of the War Department and the Army, as well as on the part of the Bureau of the Budget. In fact, I think I am only giving expression to the feeling of all the members of the committee when I say we especially appreciate the very splendid cooperation which the Director of the Bureau of the Budget has given to our committee in all matters.

THE WELSH PEOPLE IN AMERICA

Mr. KENT. Mr. Speaker, in the great experiment in self-government first undertaken by European peoples upon the Western Hemisphere no race of people was more ambitious or potent than the Welsh race. An unconquerable spirit existed among the Welsh people for many centuries. The early conquerors of the British Isles and their successors drove the original Welsh people back in the furthermost hilly recesses of Wales. From that time until the present the Welsh people have always contended that although from a governmental standpoint they may have been subdued, yet in spirit they were never conquered and so the Welsh people have always retained a marked individuality far different from that of any other race. An air of mysticism has always prevailed over the great Welsh people. Restless to an extent, they followed the flag of the British Empire. They colonized many of the outermost recesses of the British Empire and carried English customs and civilization wherever they went.

The new experiment in America attracted many adventurous and patriotic souls who were thrilled with the attempt of Europeans to colonize America, not for purposes of aggrandizement for European nations, but in the endeavor to set up a nation eventually which would have for its ultimate object the expression of free peoples who wanted to build a government which would derive its powers from the consent of the governed.

The early Welsh people in America and their activities can be traced to a time preceding the landing of the *Mayflower*. They divided themselves into three great waves of immigration. The first, or New England wave started in July, 1621, under the leadership of Stephen Hopkins, an ancestor of a signer of the Declaration of Independence by one of the same name. The second wave began with the landing of the ship *Lyon*, in 1632. Their leader was Edward Garfield, and to him the martyred President traced his ancestry. To these settlers is given the credit of financial strength and support of Harvard College, now one of our greatest universities. The Rev. Josiah Moody, one of the colony, gave 60 pounds sterling annually for the support of that college, but because of the pressure of other business refused to become its president. In this period came the world-renowned Roger Williams, a great factor in civic, political, and moral life, the founder of the first free school in America. The third wave was in 1682, the leader of this branch being our own great Pennsylvanian, William Penn, together with Evan Davis. They settled in Chester, Bucks, Lancaster, Berks, and Montgomery Counties in Pennsylvania.

In Virginia numerous prominent Welshmen settled and impressed themselves upon the governmental life of that great State which has always been called "Mother of Presidents." Chief among the great Welshmen of America was Thomas Jefferson, Secretary of State, Ambassador to France, and for two terms President of the United States.

In his veins flowed blood which was almost exclusively Welsh. He foresaw that the infant Republic of the West, our own America, might tend to monarchial influences. Almost alone and single-handed he penned those mighty papers of State and newspaper articles which eventually aroused the great spirit of the new American people to loftier ideals of self-government. As a young man he himself penned the Declaration of Independence. He saw the Government of the United States drifting into the hands of those who believed that a certain class only should take part in the Government of the country. He saw those in power usurping more privilege and power. He heard serious expression given, and hope entertained that the President of the United States eventually might be given the power to appoint the governors of the several States. Slowly but certainly the Government was drifting into the hands of the powerful financial interests of the Nation. Thomas Jefferson carefully and studiously marshaled the forces of liberalism and showed the people the way whereby they could take control of their own Government and work out their own destinies in accordance with the great experiment which they had undertaken in the first great waves of Welsh immigration. The people responded. Thomas Jefferson eventually became President and founded his own great political party, which endures to the present day. It is the only great political organization in the history of the world which has existed that length of time. His influence therefore is marked indelibly upon the political, social, and economic structures of our country.

And so the great Welsh people, through Roger Williams, have shown the way to religious reform, and as founder of the first public school, has helped to blaze the way toward universal free education. Through William Penn and others who have founded the great Welsh settlements around Philadelphia, they have shown the way to religious liberty and constructive achievement in the founding of governments. Through Thomas Jefferson and his Welsh leaders and followers they have shown the way to the peoples of all times, whereby they may work out their destinies in self-governing republics. Through Robert Morris and William Williams they have shown the way to financially constructive achievement. Welshmen were the first to discover iron, coal, copper, and slate in America. Gabriel Thomas, the first to discover iron ore, and yet in its infancy, had remarked that he had found runs of water having the same color as those which issued from the coal mines in Wales. He is supposed to have been the first to find out the sources of Pennsylvania's great industries. Slate was discovered by William Roberts of Trout Creek, near Slatington, Pa., in the year 1844. In Bangor, Pa., in 1865, Robert M. Jones, fresh from the Civil War, discovered Bangor slate, founded Bangor, and was its first chief burgess.

In every branch of America's mining and manufacturing industries the Welsh people have shown marked success and have been pioneers in the development of our resources.

Therefore with this great historical background we are assured that the peoples of Welsh descent will constantly move forward in the development of those interests of a political, educational, economic, and social nature which look to a realization of the highest American ideals.

LEAVE TO ADDRESS THE HOUSE

Mr. KVALE. Mr. Speaker, I ask unanimous consent that to-morrow, at the conclusion of the remarks of the gentleman

from Michigan [Mr. CRAMTON], I may be given 10 minutes in which to address the House.

The SPEAKER. The gentleman from Minnesota asks unanimous consent that to-morrow, following the remarks of the gentleman from Michigan [Mr. CRAMTON], he may have 10 minutes in which to address the House. Is there objection?

There was no objection.

EXAMINATION OF VESSELS CARRYING EXPORT CATTLE, SWINE, ETC.

Mr. HAUGEN. Mr. Speaker, I call up House Joint Resolution 140 and move to concur in the Senate amendments.

The SPEAKER. The gentleman from Iowa asks unanimous consent to call up House Joint Resolution 140, with Senate amendments, and agree to the Senate amendments. The Clerk will report the House joint resolution.

The Clerk read as follows:

Joint resolution (H. J. Res. 140) to amend sections 1 and 2 of the act of March 3, 1891.

The SPEAKER. The Clerk will report the Senate amendments.

The Senate amendments were read.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

Mr. CHINDBLOM. The gentleman from Texas [Mr. GARNER] is not here to make his usual inquiries about the committee having been first consulted.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the Senate amendments.

The Senate amendments were agreed to.

COAT OF ARMS OF THE STATE OF OKLAHOMA

Mr. McKEOWN. Mr. Speaker, I ask unanimous consent to speak for one minute.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. McKEOWN. Mr. Speaker, and Members of the House, I want to call your attention to the fact that the great seal or coat of arms of the State of Oklahoma has at last been placed in the ceiling of the House Chamber, and now shines above the Speaker's stand. [Applause.]

ADDRESS OF HON. RENICK W. DUNLAP

Mr. LANKFORD. Mr. Speaker, I ask unanimous consent to extend my remarks by including an address delivered in my district by the Assistant Secretary of Agriculture.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

Mr. SCHAFER. On what subject?

Mr. LANKFORD. On the subject of farm relief.

The SPEAKER. Is there objection?

There was no objection.

Mr. LANKFORD. Mr. Speaker, under leave to extend my remarks in the RECORD I include the following address of Hon. Renick W. Dunlap, Assistant Secretary of Agriculture, delivered upon the occasion of a joint luncheon of the Brunswick Board of Trade and the Young Men's Club of Brunswick, with farmers as invited guests, at Brunswick, Ga., Monday, April 16, 1928:

Mr. Zelmenovitz, Mr. Heintzman, ladies, members of the Young Men's Club, and business men of Brunswick and vicinity—and when I say "business men" I include such farmers as may be in this assembly—for to-day, in order to be successful farmers, we must also be successful business men:

I was delighted to receive an invitation to come South. We spent three very happy years in the South, not many miles from Brunswick; and we are delighted to have the opportunity of coming back to that place where we enjoyed ourselves so much. While we have never visited this immediate vicinity, we have been in Georgia—and about this county to some extent, and we know something of your community and of your problems.

Before I forget it, Mrs. Dunlap asked me if I would not publicly thank you folks for the wonderful hospitality you have shown us since we arrived a day or two ago, and to especially thank the Young Men's Club and the ladies of the community for the beautiful flowers which she received. Mrs. Dunlap does not often speak in public, and this recalls to my mind a story I heard on the ladies not long ago, which illustrates, I think, that they do talk in private: A friend of a gentleman passed away, and this gentleman was met down the street the next day by another friend, who said, "Jim, what was John's last word?" Jim replied, "John didn't have any last word; his wife was with him to the last." So I want to assure you that, while Mrs. Dunlap does not talk in public, she makes up for it in private, as, no doubt, some of these ladies have observed.

There is another reason why I am glad to be here to-day, and that is because you business men of this community have seen fit to gather here with farmers as your guests to discuss the great subject of agriculture. I can remember very well the time—and I am not as old as my appearance would indicate—when farmers and business men didn't mix any more than oil and water mix. I can remember when I left my father's farm for college—for our State university—I was dubbed a hayseed, a shorthorn, a mossback, and other similar endearing terms. I probably looked the part—redheaded, freckled, probably wore boots and other raiment that corresponded with the boots. Farm boys then were not considered the equal of the city boys, and we didn't mix; in fact, it has been only in the last few years that farmers and city folks have really gotten together in a social and business way.

My friend Heintzman referred to the fact that I held public office in Ohio several years ago. It is true that I was State food commissioner from 1907 to 1911 and also held other State offices. It was necessary while serving the public as a State official to live in the capital city, and having lived there for a number of years I got acquainted with a good many city people. My term of office was a good many years ago—before the days of many automobiles and radios; at a time when the country folks and the city folks were not so well acquainted as they now are. Well, we were living in the capital city of Ohio. The ladies in the north end of the city where we lived organized a mother's club, and Mrs. Dunlap was invited to become a member and accepted the invitation. I do not know whether you have such clubs in Brunswick or not, but I suggest to the fathers if you do not that you encourage these clubs. I find that they beat card clubs all to pieces. It was the custom of this club to invite the daddies to attend a meeting about once a month. Consequently, it gave me the opportunity of getting acquainted with a good many city men and women, and I observed that they usually talked quite a little about farms and farming and they would tell they once lived on a farm, or their father or mother or some of their ancestors lived on a farm, and they would relate how they enjoyed the country and farm life, and that they expected to own a farm some day.

I have observed that those people who are raised in the country usually have a desire to get back to the soil. I have often heard it said that the boy leaves the farm, but the farm never leaves the boy. I presume many of you town folks have the idea in the back of your head that some day you will come back to the place where you were brought up, purchase the old farm, and go into the business of farming. Some of you are now what we might call agriculturists. That is, you make your money in the city and spend it in the country. You know we farmers do the opposite. We make our money in the country and spend it in town. Well, it was a custom in this mother's club for each mother to entertain in turn, but it so happened that I was on the ticket for reelection in Ohio at one of those very few times in the history of the State when the State went Democratic, and as a consequence I was relieved of my official duties and we went back to our farm before the time arrived for Mrs. Dunlap to entertain the mother's club. But we did not want to be slackers, so we invited the crowd down to the farm, and they all came. We had 100 per cent attendance.

As a means of entertaining our guests we decided to find out what they really did know about farming. In one of the large rooms in the old home we set a long table, putting farm articles on it, such as wheat, corn, oats, barley, and field seed, clover, alfalfa, timothy, and alsike, and samples of hay of various varieties, and over at the side we had a crate with some Duroc pigs in it, and in another crate we had some Langshan chickens. We numbered all of these products and handed cards with corresponding numbers to our guests. We turned them loose and told them that the one who made the highest grade would get a prize.

It was rather interesting to read some of these replies. For instance, we asked them to name the breed of the pigs, and most of them said they were Rhode Island Reds, and they had their ages from 3 weeks to 3 years, and the weights were correspondingly ridiculous. In naming the breed of chickens, most of them said they were Shires or Clydesdales—well, they didn't miss that so much for these breeds of horses and Langshan chickens both have feathers on their legs. After they finished in the house they meandered out into the barnyard, and there they saw some little mule colts running along with their mothers. They looked at the colts with a great deal of curiosity, and then asked where their mothers were. I pointed to the mares standing at one side of the lot and said, "There they are." "Well," said our guests, "we may not know very much about chickens, pigs, etc., but we do know that these little mule colts have got to have mules for mothers." Well, we found out all the "rubes" didn't live in the country.

It is said in those days that when we farmers went to town we would blow out the gas instead of turning it out, but to-day we "step on it" when we go to town. I want to tell you it is a mighty fine thing to find business men interested in agriculture. We know, however, you business men are not particularly in love with us and that you do not like us any better than you do anyone else, but you are interested in us because you know it is business for you to

be interested in us. You know that we supply all your food and clothing, and that we also supply material for industries of this country which employ one-half the industrial workers, and you probably know that there is invested in farms in the United States more capital than is invested in manufacturing, mining, quarrying, and railroading combined.

You probably know that about one-eighth of the freight tonnage is supplied by the farmer, and about one-half of the total exports come from our farms, and the farmers of America pay about one-fifth of the taxes. I know our railroad friends sometimes make a great deal of complaint about paying taxes, and they do pay quite a lot of taxes. Some one has estimated that they pay in taxes about $700 a minute—$11 every time the watch ticks. Yet the farmers of the United States furnish those who spend our tax money about $26 every time the watch ticks.

Another matter of much importance to the urban citizen is that the country supplies quite a large number of excellent boys and girls for city consumption. I think if you will go into any of our great industrial centers and trace the history of the successful business and professional men, you will find that a very large percentage of them were brought up in the country, either on farms or in small towns.

You business men perhaps know that on our 6,000,000 farms there are invested $12,000,000,000 in farm buildings and that these buildings last on an average 40 years. Consequently, the farmers of the United States are investing $275,000,000 each year in the replacement of buildings, which is quite a sum of money to distribute among manufacturers of building materials, and, furthermore, if the farmer has at the end of the year a surplus of funds over and above that needed for living expenses, he will erect some new buildings, and that means additional business for the cities. You business men also know there are about $3,600,000,000 invested in farm machinery on these farms, and that on an average this machinery lasts 10 years. Therefore, the farmers are spending each year $360,000,000 for the replacement of worn-out machinery, and, if they can afford to do so, they will buy new machinery, and you fellows in the city are glad to furnish it.

You also know that only about 10 per cent of the farms of this country have running water in the homes, leaving about 90 per cent yet to be equipped. You know that only about 10 or 12 per cent of farmhouses have gas and electricity. There are only about 12 or 15 per cent of farmers that have tractors to operate their farms, and a very few have trucks. You are all interested, regardless of your business or profession, in having agriculture prosperous.

I dropped into a drug store on Fifth Avenue, New York, one day and saw a little flapper standing behind the counter dispensing cosmetics, stuff supposed to make the ladies look beautiful, and I said to her, "Young lady, are you interested in the farmer?" Well, she thought I was crazy, I guess, for she said, "No; why should I be interested in the farmer? I am a New Yorker. I would not know what a farm or a farmer looked like!" I asked, "To whom do you sell this stuff that you are dispensing?" and she replied, "Mostly to stenographers." So I went across the street to a lawyer's office, and I said to the young lady stenographer, "Are you interested in the farmer?" She replied, "No; why should I be interested in the farmer? Those hayseeds do not interest me in the least. I work for a lawyer whose main client is the First National Bank." Then I visited the lawyer and said to him, "Are you interested in the farmer?" "No," he replied; "I am not interested in the farmer. The only client I have is the First National Bank on Fifth Avenue." Then I went over to the First National Bank, and I said to its president, "Are you interested in the farmer?" He replied, "Most assuredly." I said, "How many farmers have you as customers?" He replied, "Not a single one; but I have customers who sell their products to the farmer."

One of our best customers is a manufacturer of steel products; he makes wire, fence, roofing, and many other articles the farmer uses and I know if the farmer is not successful he will not purchase the products made by our customer; therefore, this bank is very much concerned in the welfare of the farmer. Our railroad customers are also very much interested in the farmer, for if they do not have freight to transport over their railroads, there is less income for them. This little girl in the drug store, of course, did not realize that her job depended to some extent, at least, on the success of the farmer. She did not know that if the farmer did not buy the goods made by the manufacturer that the bank would not have the manufacturer as a customer, and the bank without a customer would not need a lawyer. And the lawyer without a client would not need a stenographer, and a stenographer without a job would not have the wherewithal to buy the cosmetics from the little girl behind the counter at the corner drug store, and with no customers for cosmetics there would be no cosmetics sold, and the little flapper, who thought she was not interested in the farmer, would be compelled to look elsewhere for her pay envelope.

Those of us who are farmers know that the farmer has been having a pretty difficult time of it during the past few years. We know he has not been getting the income that he should from his capital invested and labor expended. While it has been said on a great many occasions that agriculture is the foundation of all prosperity, and that if the farmer is not successful, industry will not prosper, yet it is generally admitted that industry has been successful during the past few years, while at the same time agriculture has been depressed.

Is it not true that industry would have been more successful had agriculture been having a reasonable income? And, my friends, I believe the time is almost here, if it has not already arrived, when industry needs the farmer as a better customer than he has been during the past few years, if industry is to continue prosperous.

CAUSES OF AGRICULTURAL DEPRESSION

When we become ill we call a doctor, and if we are seriously ill we get the best medical advice available. We do not accept the advice of a quack, or any doctor who is not an expert. The first thing the doctor does is to make a diagnosis of our case—that is, he finds out what is wrong and what caused us to be ill. After a thorough examination and he is satisfied he knows what is wrong with us, he prescribes a certain treatment or remedy to perfect a cure and will also tell us what we must do to prevent a recurrence of our trouble.

We know that it takes longer to cure certain diseases than others. If we have a headache we can usually be relieved within a few hours. If we have the grippe it may take a week or two to recover; typhoid fever, six weeks or two months; and from some other diseases a much longer time is required to fully recover.

Agriculture became ill in the year 1921 and has been complaining more or less since that time. This great industry was not permitted, as we are, to select its own physician. Unfortunately, we had a large number of volunteer doctors, many of them quacks, who prescribed for agriculture without making a diagnosis. Many of these volunteer doctors knew very little, if anything, about farming. They saw an opportunity of getting before the public and receiving some free publicity. As a consequence, many remedies have been suggested, some of which, if applied, would have made the patient "Agriculture" worse instead of better. Fortunately, agriculture has not been compelled to swallow some of the impractical, or, I might say, patent medicines which have been prescribed.

I do not want to leave the impression with you, in discussing this very important matter, that I consider myself an expert in diagnosing and prescribing for agriculture. The only excuse I have for discussing this matter with you is that I have been a farmer all of my life. Practically everything I own is to-day invested in farm land, livestock, and farm equipment. Furthermore, I am an official in the great Department of Agriculture, which is endeavoring to help agriculture. This being open season for suggestions I venture to offer a program, feeling certain that if it does not help the patient it will certainly not injure it.

It is very apparent to all that the primary cause for the disease with which agriculture is now affected was the World War. The farmers of the United States were urged, if not commanded, to produce food products to the limit of their capacity and endurance. This they did willingly, and we all know they were well compensated for their efforts. The sudden closing of the war immediately brought serious troubles to agriculture. The European market was closed largely for the reason that Europe was broke and could not buy. The farmers acquired the habit of producing surplus crops and did not stop when the war closed, and as a consequence a large surplus accumulated, which naturally resulted in the bottom falling out of the prices of agricultural products. While prices of agricultural products declined, costs necessary to produce them did not. Labor costs did not decline, neither did the cost of farm machinery and other articles farmers buy. Taxes increased by leaps and bounds. From 1913 to 1916 it took only about 11.2 per cent of the net income from the farm to pay the farm taxes, but in 1920 and 1921 it took six times the net income from the farm to pay the taxes.

In 1921 and 1922 it took 77.7 per cent of the net income to pay taxes, and in 1926 it took 30.4 per cent. This increased tax is due to the increase in State and local expenditures. Statistics show that the national debt in 1919 was $25,482,000,000, but in November, 1927, it was reduced to $18,000,000,000. On the other hand, the debt of the States increased between 1913 and 1925 from $3,188,000,000 to $10,261,000,000, and during those years there were issued, each and every year, an average of $1,300,000,000 worth of tax-exempt securities—or putting this in the form of percentage, we find that while the Federal taxes decreased 39 per cent, State taxes increased 37 per cent, and the local subdivision taxes increased 56 per cent.

A further examination shows that new and improved machinery has been an important factor in causing agricultural trouble. New and improved machinery displaced during the past 10 years about 5,000,000 horses and mules. This means that about 20,000,000 acres of land, which heretofore has been used to maintain these 5,000,000 animals, is now used to produce food products which go on the market and increase the surplus. We also find that by the use of this machinery we are producing three times as much per agricultural worker as we did in 1850 and we are producing more than twice as much per agricultural worker as we did in 1870. We are producing 14 bushels more of oats, 17 bushels more of wheat, 17 bushels more of corn, and 39 bushels more of potatoes per acre than we did in 1880. Some folks are very much alarmed because so many folks are leaving the country and going to

town. This does not worry me in the least. In fact, I think a greater migration from country to city will be necessary before we have a balanced production.

With the aid of modern machinery the cotton farmer, for example, operating on a large scale, such as they do in the States of Texas and Oklahoma, is able to produce cotton at about one-half the cost required to produce this product on a small scale, as is the practice in some of the Southeastern States. We also find that by the use of the combine and other large machinery on comparatively cheap land in western Kansas and other Western States the farmers are able to produce wheat and sell it at a very much lower price and still make a profit than are the farmers in the Middle West and the East who operate on higher-priced land and in a smaller way.

Another factor, which may not be the best thing for country life, but nevertheless is coming to pass, is the very much enlarged farming operations. It has been demonstrated in many instances that the larger units can be operated much more economically than the smaller ones. We find that corporations are being formed and large areas are being acquired for the purpose of farming on an extensive scale. I personally know of a corporation in my own State, organized a number of years ago, that has been quite successful. I had a report from one of the stockholders of this corporation last January, and he stated that they had recently declared a 30 per cent dividend and had money left in the treasury. This is as good a dividend as is sometimes paid by some of the industrial and financial corporations about which we often complain. I know of another large farm in my own State, some 2,500 acres, which cleared over and above all expenses $30,000 last year. I might add that in both of these instances which I have cited, and other farmers who have succeeded, use the best business methods.

Another cause of agricultural troubles is that the habits of our people are changing. For example, we are consuming 10 per cent less meat than we did two decades ago; the consumption of wheat flour decreased 20 per cent in the last 24 years; corn meal, 75 per cent; we are using less clothing, very much less made of wool and cotton and perhaps more made of wood and silk.

The last cause of our agricultural depression which I shall mention is our reclamation policy. We have continued to remove water from certain lands and put water on other lands at Government expense and thereby brought into cultivation thousands and hundreds of thousands of acres and thus added millions of bushels and pounds of farm products to the already troublesome surplus.

I have enumerated some of the causes for our agricultural ills. It is always easy to tell about our troubles and to criticise and complain, but it is not such an easy matter to offer practical solutions for our troubles. I would not be fair to you if I did not prescribe a treatment. The remedies I propose are not sensational; they will not be found on the first page of the paper. My remedies will not cure overnight. I believe agriculture has a disease which will take a long time to cure. My prescription would read about as follows:

1. Cease opening new lands for settlement.

2. Encourage, through Federal appropriations, further study in agricultural research.

3. Find new uses for agricultural products.

4. Discover, if possible, use for those agricultural products which are now wasted.

5. Further study of concentrated fertilizers and their application.

6. Cure and prevention of diseases among livestock and plants.

7. Better quarantine service to prevent introduction from foreign countries of diseased plants and animals. Had our quarantine service been started earlier, many insects and diseases upon which we are now spending millions of dollars for control and eradication would not have been present, such as the Egyptian moth, European corn borer, and hundreds of other pests.

8. More attention to farm machinery.

9. The Federal Government should give all the help possible in solving the farmer's marketing problem, not with the idea of requiring the consumer to pay more for his food but rather in helping the farmer to get more of the consumer's dollar than he is now receiving.

10. Assist in teaching the farmer to produce not more food products but to produce more economically. The Government should preserve the American market for the American farmer. This can be done in only one way—that is, by a proper tariff.

11. An adjustment of taxes. The farmer is now paying more than his share of taxes, and this adjustment can only be made with the help of the urban citizens.

12. Marginal or submarginal land on which people may now be living, endeavoring to eke out an existence, might be purchased by the Federal Government and this land put into forests or used for grazing or left lying idle until such time as the population increases and additional land is needed to provide food to feed our people.

Before closing I want to say something about this immediate locality. If I am not misinformed your community and your State have in the past devoted a large portion of your acreage to the production of cotton. The boll weevil and the increased acreage have forced a lot of the farmers to do something else besides raise cotton. Back in 1921 we were raising 31,000,000 acres of cotton, while in 1926, almost 50,000,000 acres.

Now, I am not sure but that this has been a blessing rather than a detriment to your State. I believe as soon as your farmers begin to diversify and grow a variety of crops and begin to use more livestock they are going to be better off. I think you have a slogan in this community or in this part of the State which was started some time ago, "The sow, the hen, the cow." That is a fine combination. I can not for the life of me, and could not when I lived in the South, understand why the South continues to import so much of the dairy products that are consumed in the South. When I lived in Florida, I know there were thousands of pounds of butter sent into that State, and many, many thousands of gallons of milk each day went into that State. Why not produce your own dairy products? It is entirely possible for you to do so.

Your farmers are now diversifying quite a little. I notice that you are raising quite a little more tobacco than you did a few years ago. You are growing a good many vegetables now, and from the observations I have made since arriving in this community you have the soil and the climate here to grow as good vegetables as can be grown anywhere, and you have this advantage—which you, perhaps, have not overlooked—that you are near the market. This marketing problem is a very serious one to most farmers beyond the Mississippi River; but you are right at the market, and you can get your produce in the market almost overnight, if not overnight. Now, there is one thing that you folks will have to change your minds on a little, I believe, if you are going to grow vegetables. You will have to get a little different attitude on the tariff, and I believe you do have a different attitude than you used to have.

I was amused last year at having a delegation from Florida wait upon me and ask me if I would not intercede with the Tariff Commission to assist them in getting the tariff on tomatoes raised. I said, "I supposed you were free-traders and did not believe in the tariff." "Well," they said, "we will have to have tariff or we will have to quit raising tomatoes, because the Mexicans can send them in so much cheaper than we can raise them. They are driving us out of business."

You have a practice here in the South of burning off your flat woods which, I believe, is a great detriment to your country. The burning not only prevents reforestation but it also destroys those materials which make "humus," an ingredient which is so greatly needed in most of the southern soils. Furthermore, fire destroys bird and other animal life. Had this burning not been practiced during the past hundred years, I am sure you would find to-day that this soil would be well supplied with humus.

Additional forests are greatly needed. We are to-day consuming timber four times faster than we are producing it, and every acre we put back into forests we are sure, when we harvest the timber, it will command a good price. There is no danger of having a surplus of timber as there is of having a surplus of cotton and wheat.

I am particularly pleased to know that many city men are getting into the business of farming. These men are finding that farming is a business which requires as much business judgment and attention as any business in which they may have been previously engaged, whether it is the building of railroads, skyscrapers, running a bank, a store, or any other business. The more our city friends become interested in farming, the better it will be for agriculture. We must recognize that the farmer is to-day less than one-third of the total population, and that he is, because of his numbers, almost compelled to accept what the cities give.

You may conclude from my remarks that the outlook for the farmer of the future is rather dark. I do not want to leave this impression. On the other hand, I firmly believe that agricultural conditions are slowly improving and that farming again will be as good a business as it ever was. I expect to see the purchasing power of a farmer's dollar at par in the very near future. I am certain our Federal Government is going to do all it can to help the farmer. I said recently, and I repeat it to-day, that I believe now is the best time within the last 30 years to buy good land. I do not mean to say that land will not go lower in some instances. But certainly good land can now be bought for much less than it is worth. With the prices for farm products at a high level land is worth now as much as it was before the war. And yet it can be bought at a much lower figure.

I have already talked longer than I should. I told Colonel Huston that when I was through he should give me a signal. I have not heard the signal. Perhaps he is asleep. If so, he is not sleeping with his cut-out open. Before each and everybody else goes to sleep, I will stop. When we get to discussing our business and our hobbies we sometimes do not know when to stop. I think a little story along this line in conclusion would be appropriate. A little boy asked his daddy if Edison made the first talking machine. His father said, "No; God made the first talking machine, but Edison made the first one you could turn off."

GENERAL LEAVE TO PRINT ON MUSCLE SHOALS

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that all Members may have five legislative days in which to file remarks on the Muscle Shoals conference report.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

PERMISSION TO ADDRESS THE HOUSE

The SPEAKER. Under the special order of the House the Chair recognizes the gentleman from Colorado [Mr. WHITE] for 15 minutes.

Mr. WHITE of Colorado. Mr. Speaker and Members of the House, in consideration of the widespread controversy among our people as to the wisdom of the prohibition laws, and the integrity of their administration generally, and the comments recently made by Members of the Congress in relation to the vicious and unlawful assault by Federal prohibition officers to kill Jacob H. Hanson, the secretary of the Elks Lodge of Niagara Falls, N. Y., while he was lawfully driving his car along a public highway, I deem it my duty to bring before this House a like vicious and unlawful assault to kill a citizen of my own State by a Federal prohibition officer within 48 hours prior to the assault on Hanson.

Prompted by the great sacrifice of human life, by the widespread and continued disregard of the constitutional and inherent rights of our people, by the wholesale violation of the prohibition laws, by the making of criminals by the hundreds of thousands each year, and by the undermining of the character of our people and the foundation principles of our Government, all in the attempted administration of the prohibition laws, I am persuaded that nothing less than a broad and thorough investigation of the entire subject can satisfy the people or discover a remedy for the disorder.

Therefore to that end I introduced House Resolution 217, covering the subject, and under the consent granted me to revise and extend my remarks in the RECORD I here insert that resolution:

House Resolution 217, Seventieth Congress, first session

IN THE HOUSE OF REPRESENTATIVES,

May 21, 1928.

Mr. WHITE of Colorado submitted the following resolution, which was referred to the Committee on Rules and ordered to be printed:

Whereas on the night of May 4, 1928, and within 48 hours prior to the vicious and unlawful assault to kill Jacob D. Hanson, the secretary of the Elks Lodge of Niagara Falls, N. Y., in relation to which a resolution is now pending before this House, Henry Wiltfang, a young man under the age of 21 years, a resident of the county of Weld, in the State of Colorado, was unlawfully assaulted and three times fired upon by Joseph R. Calloway, a Federal prohibition agent, then accompanied by Cecil Roberts, a policeman of the city of Greeley, in the State of Colorado, while he, the said Henry Wiltfang, was peacefully and lawfully traveling alone in his automobile along the public street in said city of Greeley; and although the boy was not wounded one of the bullets discharged from the gun of said prohibition agent grazed his leg and another passed close to his head; and

Whereas said prohibition agent failed to make any report to any superior officer in relation to said shooting or at all; and

Whereas thereafter when the facts in relation to said shooting slowly became known in the community complaint was made to the Federal prohibition director for the district in which said shooting occurred, and while admitting that the Federal prohibition officer fired the shots at the boy as aforesaid, and that no report thereof had been made, said prohibition director declared that a report was unnecessary, "since no one was injured, no liquor was found, and no arrest was made," and that said shooting was not in violation of any order of the Bureau of Prohibition; and

Whereas since the records of the Prohibition Bureau disclose that since the Volstead Act became effective several hundred persons have been killed in alleged efforts to enforce the law, and from other sources it is learned that thousands of other persons have been fired upon and many wounded; and

Whereas Federal judges report that approximately 85 per cent of all cases filed in their courts grow out of alleged violations of the Volstead Act, and the records disclose that each year the United States courts alone are called upon to deal with approximately 60,000 criminal cases growing out of the alleged violation of said prohibition law, and each year impose from five to six thousand years' imprisonment for alleged violations thereof; and

Whereas the many courts in the several States of the Union and in the District of Columbia having jurisdiction of infractions of the same law are likewise crowded, and the number of cases filed and prosecuted therein and the years of imprisonment imposed for the violation of said law are augmented many times; and

Whereas the great sacrifice of human life, the widespread and continued violation of the constitutional and inherent rights of our citizens, the wholesale violation of the prohibition law, the making of criminals by the hundreds of thousands each year because of the violation of this one law is undermining the character of our people and the foundation principles of our Government, and a remedy for the disorder must be discovered and applied: Therefore be it

Resolved, That a committee of five members of the House be appointed by the Speaker thereof, and they are hereby empowered and directed to inquire into and report upon the matters and things hereinafter designated during the five-year period immediately preceding July 1, 1928, to wit:

(1) The cost in money directly or indirectly of the administration of the prohibition law, including appropriations directly and indirectly made therefor, court costs, officers, juries and witness fees in the United States and the District of Columbia and the several States of the Union, and all municipalities therein having a population of 2,000 or more.

(2) To ascertain the number of arrests that have been made during the aforesaid period by Federal, State, county, and municipal authorities for the alleged violation of the prohibition law and for drunkenness; the number of cases filed in the Federal and State courts during said period for the violation of said law, separately designating the criminal from the civil violations; the punishment imposed; the number of cases pending at the commencement of and filed during each year, and what disposition was made thereof; the name and residence of each Federal officer and other person killed or wounded in the alleged attempt to enforce the prohibition laws.

(3) To ascertain and report upon the general attitude and policy of Federal and State prohibition officers and others called to their assistance in the alleged enforcement of the prohibition law, and especially whether in doing so they themselves observe or violate the law or evade the constitutitonal and legal rights of the people to be secure in their person and property, and against unreasonable search and seizure, and to report especially upon the shooting of Jacob D. Hanson and the assault upon Henry Wiltfang, hereinbefore mentioned, and upon any and all acts, doings, matters and things which in the opinion of the committee may have a material bearing upon the administration of the prohibition law and its effect upon the people, and as to the feasibility of its successful enforcement, and as to the wisdom of repealing, modifying, or amending it.

(4) That the said committee is hereby authorized to sit and perform its duties at such times and places as it deems necessary or proper, and to require the attendance of witnesses by subpœnas or otherwise; to require the production of books, papers, and documents; and to employ counsel, experts, and other assistants, and stenographers, at a cost not exceeding $1.25 per printed page. The chairman of the committee, or any member thereof, may administer oaths to witnesses and sign subpœnas for witnesses; and every person duly summoned before said committee, or any subcommittee thereof, who refuses or fails to obey the process of said committee, or appears and refuses to answer questions pertinent to said investigation, shall be punished as prescribed by law. The expenses of said investigation shall be paid from the contingent fund of the House, on vouchers of the committee or subcommittee, signed by the chairman and approved by the Committee on Accounts.

The committee, or any subcommittee thereof, is authorized to sit during the sessions or the recesses of the House, and until otherwise ordered by the House.

I recognize that society has the right to be protected against the depredations of criminals, and I believe in the enforcement of the laws. I also recognize that in the enforcement of laws the procedure prescribed therefor must be observed if orderly government is to continue.

If in the ardent desire to enforce laws the fundamental principles and safeguards of liberty are disregarded, government itself becomes an outlaw and if the practice is long continued anarchy inevitably follows.

Our Constitution and laws enacted in pursuance thereof prescribe the procedure by which alone government may be lawfully administered. In other words, the law is made master of all, and public officials, whose duty it is to enforce the law, are only its servants and must obey its mandates or else themselves be classed as criminals.

Government may not lawfully invade the rights of anyone unless it is done in accordance with these laws.

However, it is a matter of common knowledge that in the efforts to enforce the prohibition laws other laws are disregarded with impunity and enforcing officials are frequently nothing more than petty tyrants whose actions are no less reprehensible than those from which our forefathers suffered and eventually freed themselves.

Just now word comes from my State of an incident of this character—and there are many of like nature—which should, and I believe will when fully known, shock the conscience of the Nation.

On the night of May 4 Henry Wiltfang, a boy of the age of 20 years, a resident of Weld County in the State of Colorado, was peacefully and lawfully driving along a street in the city of Greeley when Joseph R. Calloway, a Federal prohibition agent,

accompanied by Cecil Roberts, a Greeley policeman, fired three shots at him.

These officers say they were lying in wait for the purpose of capturing a supposed bootlegger, and seeing the boy approach drove along beside him within 2 feet of his car for a distance of about 200 feet and stated that they were officers and commanded him to stop, and that the boy's sole response was to accelerate the speed of his car, whereupon the shots were fired.

The boy claims that the officers did not disclose their identity until after the shots were fired. The prohibition officer claims that he shot into the street, between his own car and the one in which the boy was traveling. The boy denies this and says one of the bullets grazed his leg and another passed near his head. The bullet holes in the car show that one of the shots passed through the side of the car, another entered the hood of the car, and where the third shot lodged is unknown.

Fortunately the boy was not injured. He was, however, unquestionably, for an instant, in the very jaws of death. How would you feel toward your country had this boy been your son?

America may not disregard the laws herself through her officers and retain the respect and love of right-thinking people. That respect for law essential to government is turned to contempt when the Government becomes the lawbreaker.

Let us concede, but not admit, that the assaulting parties stated they were officers and called upon the boy to stop, and at the time believed him to be a bootlegger. This would in nowise justify their actions in the premises.

The boy believed the officers were holdups, and possessing that belief had the right to flee, and in doing so violated no law. The officers suspected him of being a bootlegger, but that falls far short of investing them with the lawful right to barrage him with leaden shot.

Is it possible that the American people and their Representatives in Congress will long permit or tolerate the killing of American citizens, or the shooting at them, because they are suspected of having or even have intoxicating liquors in their possession? Is this the value that this Christian Nation places upon human life? I can not believe so. On the contrary, I believe that the people, justice loving as they are, are awakening to the necessity of the enactment of reasonable and just laws that the people will respect and love to obey, and will place the enforcement of such laws in the hands of men and women possessed of character and common sense.

It may be wise and prudent, perhaps, for a citizen to stop when commanded to do so by one claiming to be an officer, but I submit that if he does not stop no officer has the right to kill him, or attempt to kill him, unless he knows that a felony has been committed and has reasonable grounds to and does believe that the party who fails to stop when so commanded is the perpetrator of the felony and that there is no reasonable way of apprehending him except by the use of such drastic means.

But even if the facts were different and this boy actually had intoxicating liquor in his car or in his possession, his attempted assassination can not be justified.

No pretense is made that either of these officers had a warrant for the arrest of the young man, and the offenses covered by the Volstead Act are not felonies within the meaning of that law but are misdemeanors.

Furthermore, the facts of this case disclose another evil far too common upon which the light of publicity must be thrown to effectuate a remedy. It is the failure to make reports to the Government of firings upon citizens, the stopping and searching of their cars, their places of business and homes by officers, except when some one is shot or injured, or arrests are made or liquor is found.

Thus in the instant case no report was made, and when the facts finally became known and inquiry was made of the officer that fired the shots as to why he had made no report of the incident, he merely said, "Well, no one was shot," and the Federal prohibition director of the State declared that no report of the shooting was necessary, "since no one was injured, no liquor was found, and no arrest was made."

The people of America want to be law-abiding—want laws that are sensible and reasonable—and believe in the enforcement of such laws; but they will ever demand that laws be enforced according to the course of procedure and not otherwise.

If in the enforcement of one law other laws are violated by enforcing officers, then what may we expect other than the conditions that exist to-day throughout the country—universal disregard for law. This is essentially true because officers who violate a law in attempting to enforce another law are themselves inciting others to violate the laws.

The foundation of free government is the inherent right of the people to life, liberty, and property, and the people of the United States have never invested either the Federal or State Governments with power to take away such rights except as provided by law.

The indignation of the Nation will be aroused, but it will be the indignation of virtuous, loyal, and affectionate people crying out against the tyranny which violates every provision of the Constitution made to secure and protect such rights in an effort to enforce one unreasonable, ridiculous, and absurd law.

I appeal to you to hearken unto this righteous indignation before it advances to that declaration expressed in Ex parte Milligan, Seventy-first United States 107, at page 126, by Mr. Justice Davis, of the United States Supreme Court, where he said that—

> A country preserved at the sacrifice of all the cardinal principles of liberty is not worth the cost of preservation.

However, the evils and wrongs involved will not be eliminated by the character of individuals intrusted with the enforcement of such laws or by the apparel in which they may be clothed. The evils and wrongs attending the enforcement of the prohibition laws flow naturally from such laws themselves. These laws are based upon a wrong conception of man's nature and can not be successfully enforced because of a fundamental defect in the law which I will bring to your attention presently.

There is a vast distinction, my countrymen, between such crimes as murder, rape, robbery, burglary, arson, theft, and like crimes, on the one hand, and the crimes created by the Volstead Act on the other, which has a tremendous effect upon the enforcement or nonenforcement of the two classes of laws.

In the former class there is an inherent immoral element in the crime facts. The doer of the criminal acts in such classes of crimes invades the natural and inherent rights of the one he attacks or acts against.

Everyone has the natural right to life, to property, and to security of person and home, but the killer, the robber, the rapist, the thief, and the perpetrator of like crimes invades that natural right and deprives the other of that which is his own.

This is not the case, however, under the Volstead Act. The facts constituting the crimes created thereby have no element of immorality in them. In other words, there is no inherent evil element in the crime facts, and in doing them there is no invasion of the natural or inherent rights of another.

The fundamental distinction between the character of crimes is that in those in which there is an element of immorality in the crime facts, the conscience of all, with few exceptions, automatically reacts against the doing of the things prohibited, while in those crimes wherein there is no element of immorality in the crime facts, the conscience of all, with few exceptions, fails to automatically react against the doing of the things prohibited.

The result is that laws covering the former class of crimes are usually observed and are enforceable, while those relating to the latter class are usually not observed and are nonenforceable. Thus it is that when people know or gain knowledge of the commission of a murder, a rape, a robbery, a burglary, or theft, or similar crimes, they quickly report the same, and even earnestly aid in the apprehension and punishment of the perpetrator of the crime.

This, however, is not the case when the acts constitute violations of the prohibition law, for the simple reason that the conscience of those that have knowledge of such violations of that law does not automatically react against the facts that constitute the crime. Their sense of justness and the fitness of things does not automatically tell them that an immoral thing has taken place, and in fact it has not. For while you may by legislation make innocent facts criminal, you can not by legislation make innocent facts immoral.

Neither the manufacture, sale, transportation, nor possession of intoxicating liquors embody elements of immorality within themselves. In other words, any of the facts may be done without the slightest injury to anyone. Therefore, any law which prohibits the doing of these things, not the regulation thereof, lacks the essential elements to make it effective.

I shall now proceed to a brief consideration of the workings of the prohibition law to further demonstrate its lack of wisdom and value as a legislative measure.

The annual report of the Commissioner of Prohibition for the fiscal year ended June 30, 1927, shows that Federal prohibition agents made 64,986 arrests, seized 7,137 automobiles and 353 boats; that 51,945 criminal prohibition cases against individuals were handled in the Federal courts; that 36,546 persons were convicted, upon whom 4,777 years of imprisonment were imposed and $5,575,225.48 in fines assessed.

The same report shows that Federal prohibition agents during the same fiscal year captured over 208,000 intoxicating-liquor manufacturing devices consisting of thousands of stills,

distilleries, still worms, and fermenters. The report also shows that during the same period the Federal prohibition agents seized 29,170,831.35 gallons of intoxicating liquors, consisting of approximately one and one-half million gallons of spirits, over 5,000,000 gallons of malt, and over 21,000,000 gallons of mash, and hundreds of thousands of gallons of wine, cider, and pomace.

The World's Almanac and Book of Facts for 1928 shows that during the calendar year of 1927 there were upon the dockets of the Federal courts over 61,000 criminal cases for the violation of the prohibition laws, in which those courts imposed 5,202 years of imprisonment and assessed fines in the sum of $5,646,709. It also shows that during the calendar year of 1926 there were upon the dockets of the Federal courts over 60,000 criminal cases for the violation of the prohibition laws, in which those courts imposed 5,666 years of imprisonment and assessed fines in the sum of $7,949,357, and that Federal prohibition agents captured 161,979 liquor-manufacturing devices.

I submit herewith a table showing some of the workings of the national prohibition act from its effective date to the end of the calendar year 1927:

Arrests for violation of the national prohibition act made by Federal prohibition officers since the effective date of that act

Jan. 17 to June 30, 1920	10,548
1921	34,175
1922	42,223
1923	66,936
1924	68,161
1925	62,747
1926	58,391
1927	64,986

The above summaries, it will be observed, do not include arrests and convictions by State authority for prohibition offenses.

Convictions under the national prohibition act in the Federal courts

1920	4,315
1921	17,962
1922	22,749
1923	34,069
1924	37,181
1925	38,498
1926	41,154
1927	36,546

The above summaries, it will be observed, do not include arrests and convictions by State authority for prohibition offenses.

Seizures of illicit distillers, stills, still worms, and fermenters

1920 (stills only)	14,337
1921	95,933
1922	111,155
1923	158,132
1924	159,176
1925	172,537
1926	161,979
1927	208,073

The above summaries do not include seizures of illicit distilleries and distilling apparatus by State authority.

Sentences imposed by Federal courts for violation of prohibition act

	Aggregate years
1920	[1]
1921	[1]
1922	1,552
1923	2,241
1924	3,187
1925	4,569
1926	5,666
1927	5,202

The above summaries do not include sentences imposed by State, county, and municipal courts.

The facts disclosed are startling, but should we add thereto the number of arrests made, the cases prosecuted, convictions had, the years of imprisonment imposed, the amount of fines assessed, the instruments of illicit manufacturing captured by State authorities each year for violation of the prohibition laws in every State of the Union, including the District of Columbia, the conditions would be appalling.

We have the word of Albert Levitt, a professed prohibitionist and formerly special assistant to the Attorney General of the United States, that—

> The situation in the several States was and is infinitely worse than the Federal situation. Local enforcement is with very rare exceptions very insincere. This is due to the fact that practically all the local enforcement officers are themselves wet. This is as true of the so-called dry States as of the wet ones. It is nothing unusual to find that the sheriff was himself a bootlegger or in quiet partnership with those who are. Chiefs of police and commissioners of public safety give "wet parties." Prosecuting attorneys are bravely vociferous against some petty offenders against the Volstead Act, and especially so if the latter are Italians, Poles, or Scandinavians. But the big offenders, the prosperous business men of the community, the fraternal clubs, and the political organizations are allowed to violate the law with impunity. Police officers are drunk on duty. Judges impose a light fine on some bootlegger brought before them for sentence and then retire to their "chambers" to drink the liquor which the same bootlegger has sold to them.

In the city of Detroit, where city, county, State, and Federal law-enforcement officers are charged with the task of preventing traffic in liquor, it is found as the result of a thorough investigation made by the Detroit News and reported May 1, 1928, that the business of selling intoxicating liquors has grown in that city until it is second in volume only to the automobile industry, and is estimated to employ 50,000 persons, with an output valued at $215,000,000. The Buffalo Courier, commenting upon this condition in Detroit, says:

> Doubtless comparable figures could be obtained in any city situate as Detroit is, in a border or coast district, where rum runners ply their trade.

In July, 1926, Gen. Lincoln C. Andrews, then in charge of prohibition enforcement, reported that 875 members of his force, being approximately 25 per cent of them, had been discharged for malfeasance in office, consisting of extortion, bribery, collusion, conspiracy, intoxication, perjury, illegal disposition of liquor, specific violations of the prohibition laws, and other reprehensible conduct.

Moreover, since this report there has been little, if any, cessation of misconduct on the part of either Federal or State officials in the attempted enforcement of this absurd law. The press is filled from day to day with acts of official misconduct upon the part of both State and Federal officials in their attempt to enforce this same law. This is equally true as to violations of this law by nonofficials and should be obvious to the least observing that prohibition is producing official and private hypocrisy and general disregard for all law and breaking down the character of the American people by its false pretenses.

The inequality of enforcement is another thing to which I object. Those of influence go free, while those of no influence are persecuted. The rich are free to get and drink as they please, while the poor walk the narrow entrance to the penitentiaries. If a shabby cottage is suspected of liquor, closed doors are no bar to the prohibition officer; he breaks down the doors. But if the home of wealth is suspected of the same thing, the bright lights reflected from within seem to blind the eyes of the officer so he can not even see the address.

It is the unthinkable hypocrisy in connection with this law and its enforcement and the intolerance of its sponsors that is eating out the heart of our civilization.

Much is said on the one hand relative to the enormous cost of prohibition and on the other as to the savings that are effected thereby, but should we concede the correctness of either or both of these contentions it can in no wise lessen the necessity for a modification of the Volstead Act.

The saving of men is of far greater value and importance than the saving of dollars and may not be measured by the money standard.

No civilization can long continue when through and by one law hundreds of thousands of its men and women are each year becoming inmates of penal institutions. Especially is this true when these persons are made criminals for the doing of things which only yesterday were unattended by any criminality.

The magnitude of such loss to our civilization may be partially appreciated when you consider that the Federal courts alone have been and are making criminals at the rate of 35,000 a year and that the average age of criminals is now only about 24 years. Add to this the great number of splendid young men and women who are daily being sent to penal institutions for the violation of this one law by the many State courts throughout our land and you realize that the loss to our civilization is appalling, for no people can long survive such a drain.

Moreover, the descendants of these criminals during the memory of man will be under the handicap placed upon their ancestors for the doing of things that were before the enactment of this law perfectly innocent and the doing of which was common among men.

The prohibitionists say we are merely trying to put an entering wedge into the law to bring back the saloons, when they know full well that we have no such purpose in view. On the contrary, our purpose is to amend our laws, so that we can have decent and respectable government instead of national hypocrisy, debauchery, and tyranny.

The Anti-Saloon League, however, and its associated organizations call us nullifiers of the Constitution because we seek to amend a statutory law in accordance with the provisions of the Constitution. The inherent and constitutional right was never

[1] No record.

surrendered and remains in the people to abolish, change, or modify any law or constitutional provision when they see fit so to do. To exercise this power is a patriotic duty if and when either laws or constitutional provisions are unwise and prove ineffective.

Our opponents contend that no valid amendment can be made to the Volstead Act because it would be in conflict with the Constitution. If this were true—and they honestly believe that it is true—why should they worry? The Supreme Court would declare it unconstitutional and our efforts in that behalf would then prove abortive.

Champions of prohibition remind us that the brewery interests once boasted that they ran the country from the White House down, while overlooking the fact that the Anti-Saloon League and its associated organizations are now trying to do the same thing. They point out that 40 years ago the liquor interests started putting their thumb mark on politicians, and forget that the witch burners of the prohibition forces are now even more zealously jabbing their awls into our present-day statesmen with the hope of finding "witch marks" that will justify their political execution in the fires of fanaticism. They charge that formerly the liquor interests sent their smartest men as delegates to all political conventions; that they wrote platforms and boasted of it in their trade papers; that they succeeded in penetrating the ranks of all parties in all States until finally the brewers could elect or defeat an entire administration and did; that they card-indexed every man in public life from alderman to governor and from governor to President; that they could and usually did defeat almost any man who harbored the slightest thought of curtailing the "personal right" of the saloon.

Granting that this be so, for the sake of argument, wherein, we ask, has prohibition improved these very conditions? We find that the Anti-Saloon League and its associates now send their smartest men to political conventions; nor are their "trade papers"—which are usually religious publications supposedly of a nonpolitical nature—silent of their conquests or modest in the face of victory, but boasting, vaunting, and threatening phrases pervade their columns. They have now succeeded in penetrating the ranks of all parties in all States, and finally can and do elect or defeat candidates and tickets in many States.

They have not only "card indexed" every man in public life but have sought to photograph and finger-print him as well. Regardless of what a man's qualifications for office, his ability, his reputation, or his integrity may or may not be, but let him utter the shibboleth, "I am for prohibition," and the hosts of the Anti-Saloon League rally to his standard like swarming bees to a new queen. On the other hand, should he evince any indications of questioning either the propriety, wisdom, or social value of any of the prohibition laws or the methods of enforcing them, these same hosts with even more vigor rise to smite him and efface his name from the memory of man. They consign him to the limbo of the socially undesirable; they classify him as a criminal and as a dangerous enemy of society; they resurrect that all but forgotten "bogey" of Civil War days, the word "nullification," and hurl it at his head with mingled imprecations and insults.

Prohibition and temperance can not exist in the same place at the same time. Where one is the other can not be.

I am for temperance.

I believe in the highest and widest liberty of the individual under the law.

I believe in the right of the people to amend any law which is oppressive or ineffective.

I believe in observance of law, but I believe in repealing bad laws and making good ones.

Specifically, I believe in the modification of the Volstead Act—

Because of the official failure to enforce its impossible provisions and because of the individual disregard of an oppressive enactment.

Because it has been and is the most demoralizing and corrupting force in American history.

Because it has produced official and private hypocrisy and general disregard for all law.

Because it does not prohibit.

Because it is making hypocrites of adults and secret drinkers of the youth of America.

Because it is breaking down the character of the American people by its false pretenses.

Because it has brought upon our people a horde of petty tyrants who, under authority of a bad law, are making outrageous invasions of the rights of citizens of this Republic.

We can not have temperance while the whole land is filled with illicitly manufactured and illicitly distributed intoxicating liquors.

We can not have respect for any law while the mass of the people are guilty of or accessory to the violation of one law.

The issue is not, then, one against a pretended prohibition but is one of honesty, public integrity, and personal morals against the hypocrisy and debauchery which threatens the oncoming generation with ruin.

I call upon all citizens who desire to maintain respect for law and who desire to cure the appalling conditions which have come upon all the communities of the United States because of the defiance of law to join in an effort for national decency. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Colorado has again expired. Under the previous order of the House, the gentleman from New York [Mr. O'CONNOR] is recognized for five minutes.

THE DALE RETIREMENT BILL

Mr. O'CONNOR of New York. Mr. Speaker, ladies and gentlemen of the House, in the Brooklyn Daily Eagle of yesterday, May 24, there appeared the following news article:

THANK LIVINGSTON

Jacob A. Livingston, Republican leader of Kings County, to-day received a telegram of thanks from Federal employees in the Customs Service, post office, and navy yard for his assistance in lining up Congressmen on the passage by the House yesterday of a rule that will permit their retirement bill to come before the lower branch in the present congressional session. The bill, which has passed the Senate, would change the retirement age from 70 to 60 years and increase pensions from $1,000 to $1,200.

This represents the proverbial limit in giving credit where no credit in the slightest degree is due. It must be subtle satire or unadulterated gall. Mr. Livingston had no more to do with obtaining a rule from the Rules Committee, of which I am a member, than the Shah of Persia. He was never heard of in connection with the legislation for which many of us have fought these long years.

Why, he has not got one Republican Congressman in his whole county to whom he could appeal. Whom has he been lining up? Democrats? There are not any others he knows. And his influence with Democratic Members is just about as strong as the President's strength with the farmers. Under his type of leadership as opposed to that of his able Democratic opponent, Mr. John H. McCooey, Kings County has become one of the greatest Democratic counties in the Empire State. It is therefore difficult to imagine how any Government employee could be deluded into believing for one moment that Mr. Livingston had the slightest connection with the progress of this legislation.

The representatives of the Government employees who have been active in behalf of this measure know who its friends have been. They know at whose doors they have knocked and received support. They also know who has been delaying this legislation for years.

It is not unknown to them on which side of the table in the Rules Committee their fight has been waged. The world knows the entire Democratic Delegation in Congress from New York has taken a leading part in that fight. As a member of that delegation, knowing what happened in the Rules Committee, although not permitted by certain rules of courtesy to disclose it, I can not let Mr. Livingston or any other Republican claim credit for the belated action on this measure. It should pass this House immediately so that our Federal employees may be able when they retire to at least live in some semblance of comfort. [Applause.]

BOULDER DAM

Mr. SMITH. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 5773, with Mr. LEHLBACH in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the committee rose the gentleman from Utah [Mr. LEATHERWOOD] had the floor and yielded in order that the gentleman from Idaho might move that the committee rise. The gentleman from Utah is entitled to the floor and is recognized for five minutes.

Mr. LEATHERWOOD. Mr. Chairman and members of the committee: I can not refrain from adding a word of commendation to the paragraph now under consideration. I am quite sure the committee does not realize the great benefit that the

taxpayers of the country are going to receive through the improved navigation on the Colorado River. [Laughter].

In my minority report I have tried to point out some of the benefits to be derived, but yet I was somewhat hazy as to whether they were as great as I imagined. On Wednesday all doubt was dispelled when a gentleman of the committee portrayed to the House this wonderful reservoir that will be formed by the dam, which will be 76 miles long and navigable. It is a wonderful reservoir and before I describe it to you I want to say that some one has remarked recently that navigation on the Colorado River begins nowhere and ends nowhere. I think this is a mistake. I conceive that possibly some of the grapefruit produced on the beautiful Yuma Mesa under the administration of my good friend, Col. Benjamin Franklin Fly may be transported over the turbid waters of this great river. They may load a flatboat with them and with a powerful tug they may succeed in pushing them up to the location of this dam where they will meet the first great aid of navigation, namely a dam across the river 550 feet above water level. There with a great electric hoist they will lift up this cargo of grapefruit into the beautiful reservoir back of this dam, 76 miles long and on either side the walls rising to sheer heights of 5,000 feet or more.

After transporting them over this beautiful lake with perpendicular walls on either side, with the limitless desert extending on either side for more than 300 miles, inhabited only by Gila monsters and rattlesnakes, they will reach the upper end of the lake, where the Hopi Indians will perhaps suspend their snake dances. Then each Indian will be supplied with a rope 5,000 feet long and a basket which they will lower down to the scow, and there at the end of navigation they will unload the grapefruit and then pull them up to the rim of this great canyon.

Then me-thinks the Hopi Indian runners will take the baskets of grapefruit and cross the desert with the hope that they will find a wandering cattleman or a sheep wagon and be able to dispose of one or two of the grapefruit, after going two or three hundred miles from the rim of the canyon.

O Mr. Taxpayer, you do not realize what we are going to give you; we are going to give you the most wonderful river for navigation that the country has ever known. [Laughter and applause.]

Mr. ARENTZ. Mr. Chairman, I ask unanimous consent to return to section 5 for the purpose of offering two amendments which I have sent to the desk.

The CHAIRMAN. The gentleman from Nevada asks unanimous consent to return to section 5. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the first amendment.

The Clerk read as follows:

Amendment offered by Mr. ARENTZ: Page 8 of the bill, after the word "application," the last word in the committee amendment heretofore agreed to insert the following: "The rights covered by such purposes shall be taken by such State within six months after notice by the Secretary of the Interior and be paid for on the same terms and conditions as may be provided in other similar contracts made by said Secretary."

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment by Mr. ARENTZ: Section 5, paragraph (b), page 8, line 11, insert after the word "utilize" the following: "Such water and appurtenant works and privileges necessary for the generation and distribution of hydroelectric energy or."

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. DAVENPORT. Mr. Chairman, there are several amendments at the Clerk's desk which I will offer.

The Clerk read as follows:

Page 9, section 6, line 21, strike out the words "or alternatively to enter into contracts of lease for the use of water for the generation of electrical energy."

Mr. DAVENPORT. Mr. Chairman and gentlemen of the House, you will observe that there are three alternatives in section 6. In the first place, the Government or Secretary of the Interior may construct the power plant and operate it; second, the Government may construct the power plant and the unit or units of the plant may be leased and privately operated. In the third place, the Secretary of the Interior or the Government may lease the water, in which case, under all the circumstances, a private corporation at Boulder Canyon would construct the power house.

This amendment does nothing at all except strike out the third alternative, so that the Government, which has constructed the dam, shall also construct the power house—not operate it—construct the power house which is contiguous to the dam, and which could be built at the same time as the dam, with the same organization, equipment, and overhead, and therefore more economically than if a private corporation stepped in and built the power house. Everyone agrees that several power stations can not be built in any feasible way in the canyon. It is a narrow canyon and high. The Government is to build the dam anyway. If a private corporation under the third alternative should come in and build a power house, you would have two organizations, two entire sets of equipment, with work going on at the same time, which is just as impracticable as it possibly can be, and I think nearly everyone agrees to that who has ever been in the canyon. In the second place, if it is true that it can be built more economically by one organization than by two, then it can also be built more economically, because the Government can get the money for building the power house more cheaply than a private corporation can, and the burden on the region will not be so great, so far as capitalization used to construct the power plant is concerned. In the third place, if the Government actually owns and constructs the power house, its arm can reach farther for the protection of the consumer. Again, it seems to me incredible that the House of Representatives should allow a private corporation to build the power house when there is no provision in the bill whatever for the recapture of the power house. So from every important standpoint it seems to me wise that the Government, which builds the dam, should also build the power house. This does not in any way contravene the view of the President of the United States or anybody else that the Government should not engage in business, because the second alternative still leaves it entirely possible for any private corporation or municipal corporation to enter into this power station, in a unit or in units of it, and operate the plant.

Mr. NEWTON. Mr. Chairman, will the gentleman yield?

Mr. DAVENPORT. Yes.

Mr. NEWTON. If the Government constructs the power house, will the power house then be adapted to whoever might contract with the Government for the generation and distribution of power? Would they not be more apt to contract on advantageous terms if they constructed the power house?

Mr. DAVENPORT. Well, in the first place, everybody agrees that there should be one power house in there, and there is no reason to suppose that the engineers of the Government, who have had so much experience in building power houses, particularly the great power house at Muscle Shoals, would build it in such a way that it would not be practical for use by these private or municipal corporations. I think the same skill will be used by the Government engineers which they have used elsewhere.

Mr. LAGUARDIA. And of course there are not 57 varieties of power houses.

Mr. DAVENPORT. No. There is every reason to believe we should get a modern and high-grade power house built by our own Government engineers. I move the adoption of this amendment.

Mr. SWING. Mr. Chairman, I feel I ought to make a statement in connection with this amendment. I am in accord with much of the statement of the gentleman from New York [Mr. DAVENPORT]. In all probability, if the bill remains the way it is, the Government engineers will find it the economical and proper thing to do when they build the dam to build the power plant. However, this bill has been indorsed by the Secretary of the Interior. It has received the approval of the President in its present form and it has received the approval of the committee in its present form. I do not feel that the Government ought to have taken away from it the option of working out upon the ground what will prove to be the greatest undertaking any organization of our Government has been authorized to do. Therefore, I feel compelled to support the bill in the form in which it has been reported.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word. This amendment is offered by a friend of the project and a student of the subject. My colleague from New York [Mr. DAVENPORT] has given the subject of hydroelectric power as much study as any Member of the House. When he offers an amendment, let me say to the gentleman from California [Mr. SWING], he offers it in good faith, and in the few remarks he made he pointed out so clearly that the very vital of this undertaking, one of the chief purposes of building this dam, is to construct a power plant by the Government to be used for the purpose of conserving and utilizing a tremendous water power for the best advantage of all concerned. Bear in

mind the vicious, the disgraceful, venal propaganda that has been carried on for the last few years by the Power Trust to keep the Government from developing this great project. With that in mind, looking at the provisions of this bill, for the Government to build this great project to correct the defects of nature, to utilize this great force and harness this power, will you permit the Power Trust to come in, build the plant, and get advantage of it all? We have had experience in New York City. Profit, if you please, by our sad experience. We built subways costing $400,000,000 more than is involved in this bill. We turned over that precious property to an operating company, and the people of New York have been suffering ever since. We are unable to recapture our own property and our own investment, and are being exploited with our own property. I appeal to the gentleman from California [Mr. SWING] not to oppose this amendment. Every opponent of this bill will vote against this amendment. If you are sincere in establishing a precedent in this bill, if you are sincere in utilizing this great force for the benefit of all the people in that region of the country, if you believe in what you say, for God's sake stand by this amendment. Otherwise your bill will not carry out the purposes desired. [Applause.]

Mr. BLACK of New York. Mr. Chairman, I rise in opposition to the pro forma amendment. I want to add to what the gentleman from New York [Mr. LAGUARDIA] has said, and pay my small tribute to the gentleman from New York [Mr. DAVENPORT] who has offered this amendment. I agree with the gentleman from New York [Mr. LAGUARDIA] that there is no one in this House who has given more time and conscientious thought to this hydroelectric problem than has the gentleman from New York [Mr. DAVENPORT].

I hope that my colleagues from New York will support the gentleman on this amendment. This amendment will make this bill ironclad and copper riveted in the public interest. We do not want to pass the bill and turn this project over to the very people that some people think this bill is aimed at, and I trust the friends of this bill will see fit to accept the amendment.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. MONTAGUE. Mr. Chairman, I did not hear the amendment. Can we have it reported, if agreeable to the committee?

The CHAIRMAN. Without objection, the amendment will again be read.

There was no objection.

The amendment was again read.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. CROSSER. Mr. Chairman, I would like to be recognized if I can.

The CHAIRMAN. The House is dividing on the amendment.

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The Clerk will report the next amendment offered by the gentleman from New York [Mr. DAVENPORT].

The Clerk read as follows:

On page 9, line 24, after the word "compact," insert the words "on condition that if two or more such contracts be entered into provision shall be made for operation of the plant under a joint agreement upon terms approved by the Secretary of the Interior for the purpose of providing for the most economical utilization of the available energy."

Mr. DAVENPORT. Mr. Chairman, the gentleman in charge of the bill tells me he is willing to accept the amendment.

Mr. SWING. I am of the belief that the amendment follows logically the one just adopted.

Mr. NEWTON. Mr. Chairman, may we have an explanation in a word or two? This is a very important amendment.

Mr. DAVENPORT. Mr. Chairman, I did not give the explanation because the sponsor of the bill said he would accept the amendment and I did not want to take the time. I am glad, however, to explain.

You will notice that under the second alternative the Government will build the plant, but that unit or units of it may be leased. If the power plant is to be operated efficiently, it must be susceptible of being operated as a single unit. It must be possible for the generators to be operated in synchronism. Now, picture this plant leased to separate entities not sympathetic with each other. In order to get the best results it is necessary to operate with the generators of a great power plant as you would play upon the keys of a great organ.

Mr. LEATHERWOOD. In the event that unit or units are to be leased, do your amendments provide any priority as to preference rights of lease?

Mr. DAVENPORT. My amendment provides that if the leasing plan is followed, and there are two or more contracts, there shall be a joint agreement in connection with the contract under the control of the Secretary of the Interior, so that the whole battery of generators can be employed and developed to the fullest advantage for the development of power.

Mr. LEATHERWOOD. But have any municipalities the first right to lease?

Mr. DAVENPORT. What does the gentleman from Idaho—the chairman of the committee—have to say about that?

Mr. SMITH. Yes. The bill provides that.

Mr. DAVENPORT. Have I explained sufficiently for the gentleman from Minnesota [Mr. NEWTON]?

Mr. NEWTON. Yes.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York.

The amendment was agreed to.

The CHAIRMAN. The gentleman from New York offers another amendment, which the Clerk will report.

The Clerk read as follows:

Page 9, line 23, strike out the words "within a State which has approved the said Colorado River compact, in either of which events" and insert in lieu thereof the following: "in case of the execution of such contract."

Mr. DAVENPORT. This third amendment simply straightens out the English of the paragraph after these other amendments are put in.

Mr. LEATHERWOOD. We could not hear that. I would like to have the amendment again read.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

Page 9, line 23, strike out the words "within a State which has approved the said Colorado River compact, in either of which events" and insert in lieu thereof "in case of the execution of such contract."

Mr. LEATHERWOOD. Will the proponent of the amendment yield for a question?

Mr. DAVENPORT. Yes.

Mr. LEATHERWOOD. What is the purpose of this?

Mr. DAVENPORT. The striking out of the words "within a State which has approved the said Colorado River compact" is at the suggestion of the sponsor of the bill. I yield to him.

Mr. SWING. Under the amendment to the bill just adopted the Government will build the plant. Whether it will operate it or not will be determined later. It is provided that in case the governmental authority builds the plant it will regulate the contract.

Mr. LEATHERWOOD. What is the purpose of providing that the States shall have approved the compact?

Mr. SWING. I have no objection to its going out. Does the gentleman want it in?

Mr. LEATHERWOOD. I can not speak for the States.

Mr. HOCH. As I read the amendment in the RECORD, it did not strike out the words referred to.

Mr. DAVENPORT. The only reason for striking them out now is that the preceding amendments have passed and now the words referred to are not necessary.

Mr. HOCH. I did not understand the purpose of striking out the words "within a State which has approved the said Colorado River compact." That has nothing to do with the amendment that has been agreed to.

Mr. ARENTZ. Mr. Chairman, I offer an amendment to strike out these words that do not occur in the amendment offered last night on adjournment. I propose to amend the amendment.

Mr. DAVENPORT. I have no objection at all. I put those words in at the suggestion of the sponsor of the bill.

Mr. ARENTZ. So as to satisfy everybody, why not take them out?

Mr. DAVENPORT. All right.

The CHAIRMAN. Without objection, the gentleman from New York modifies his amendment in the manner indicated.

There was no objection.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Mr. DAVENPORT offers the following amendment: On page 9, line 24, strike out the words "in either of which events," and insert in lieu thereof "in case of the execution of such contracts."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. DAVENPORT. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The gentleman from New York offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DAVENPORT: On page 10, line 3, after the words "shall apply," insert new paragraphs as follows:

"As a condition to the lease of the said plant or any unit or units thereof, and as a condition to the sale of electrical energy therefrom, every lessee and every purchaser, if the United States operates the plant, shall agree that the property of such lessee or purchaser, used and useful in connection therewith, shall be valued, whether by the agencies of the States or of the United States, and whether for regulation of rates or for taxation or for State or municipal acquisition and use, at its fair value, not to exceed the net investment of the said lessee or purchaser, and said net investment shall be ascertained in accordance with the provisions of the Federal water power act and the regulations of the Federal Power Commission.

"Every lease and every contract for the sale of power shall provide that the resale price thereof, with the transformation, transmission, and distribution of such energy, extending to sale to the ultimate consumer, shall be subject to the regulation and control of said Federal Power Commission or of the appropriate authorities of any State or States in which such power is transmitted, distributed, sold, or used, according to the respective jurisdictions of the said Federal Power Commission or said State authority, as provided in sections 19 and/or 20 of the Federal water power act."

Mr. DAVENPORT. Is an explanation of this amendment requested?

Mr. LEATHERWOOD. I think an explanation should be made.

Mr. DAVENPORT. This amendment insures actual prudent investment as one of the contract terms with the lessee or the purchaser of power. We are having just at this time a great deal of trouble in this country in keeping well established the old American rule of actual prudent investment in public utility valuations. The State of Massachusetts, for example, is disturbed over the Worcester Electric Lighting case. The State of Massachusetts has always looked upon actual prudent investment as a sound rule of determining the rate base. It happens there are certain judicial decisions which have to do more with judicial economics than with constitutionality or legality, which have been interpreted to mean that another rule, reproduction new or going concern value, may be established for public utilities, and the State of Massachusetts in this Worcester Electric Lighting case finds that no longer can it assure itself of actual prudent investment as a valuation basis for rate making. The city of New York in the Interborough Rapid Transit case is similarly troubled. In the State of Massachusetts the tendency of public opinion is that in the case of a new public utility enterprise or the extension or expansion of an old enterprise, there shall be put into the license agreement a contract provision with respect to actual prudent investment, so that instead of simply invoking the police power of the Constitution there may be, for a new enterprise, where no vested rights are involved, a clear declaration of the ancient and sound rule of public utility economics with respect to actual prudent investment. Not only the police power but the contract power of the Constitution must in the future be employed in the interest of the consumer.

Mr. MOORE of Virginia. The gentleman, as I understand it, proposes by his amendment to divest the question as to what shall constitute the basis of the value of the doubts that he has referred to which have troubled the courts and also the Supreme Court.

Mr. DAVENPORT. That is the idea.

Mr. LAGUARDIA. And to establish a fair and equitable formula?

Mr. DAVENPORT. Exactly.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SWING. Mr. Chairman, I move that all debate on this section and all amendments thereto close in five minutes.

The motion was agreed to.

Mr. MACGREGOR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MACGREGOR: Page 10, line 22, at the end of the paragraph, insert:

"No liability of any kind shall attach to or rest upon the United States resulting from the construction of said dam or reservoir."

Mr. MACGREGOR. Mr. Chairman, some time in 1950, or thereabouts, I expect to open the morning paper and receive the news that the Boulder Canyon Dam has busted; that a couple of thousand lives have been lost; that this immense wealth, hoped to be created by this dam, has been lost, involving a money loss of many millions of dollars.

Mr. LEATHERWOOD. Will the gentleman yield?

Mr. MACGREGOR. Yes.

Mr. LEATHERWOOD. I think the gentleman may rest assured that the dam will not be completed by that time. [Laughter.]

Mr. SWING. Will the gentleman yield?

Mr. MACGREGOR. Yes.

Mr. SWING. As I understand the wording of the gentleman's amendment, it provides that no liability shall attach to the building of the dam, but the gentleman's debate is on what the result will be after the dam has broken.

May I ask you this question. Does not your amendment go so far that it would preclude the payment of any damages for flowage rights; would it not go so far as to prevent, under the amendment already adopted by the committee, paying any revenue to Arizona and Nevada?

Mr. MACGREGOR. I am offering this amendment for the purpose of calling attention to the danger. I am concerned about the claims that are going to come for the losses when the dam breaks.

This dam is four times as high as Niagara Falls from bed rock; 120 feet higher than the Washington Monument.

Mr. SMITH. It is unfortunate the gentleman is not more accurate in his statement. The Washington Monument is 555 feet.

Mr. MACGREGOR. And your dam is 675 feet from bedrock.

Mr. SMITH. The Washington Monument is 555 feet from the ground to the top, and this dam is 550 feet.

Mr. MACGREGOR. It is 675 feet from bedrock.

Mr. SWING. Will not the gentleman also start the Washington Monument at bedrock?

Mr. MACGREGOR. Anyway, the proposition involved here is that you have a dam which is at least 125 feet higher than any dam ever constructed in the history of the world.

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. MACGREGOR. Certainly.

Mr. DOUGLAS of Arizona. It is 292 feet higher than any dam ever constructed in the history of the world.

Mr. MACGREGOR. Yes. This territory is subject to earthquakes.

Mr. SMITH. In the interest of accuracy——

Mr. MACGREGOR. Wait a minute. I am trying to have a little say here. [Laughter.] This territory is subject to earthquake.

Mr. EVANS of California. How does the gentleman know that?

Mr. MACGREGOR. By the statements of the facts here. You have it in the testimony here that there are earthquakes, and every time there is an earthquake in this section the rock goes into this Boulder Canyon by the ton.

Mr. SWING. In the interest of accuracy, will not the gentleman do me the honor, after he is through, to read my speech in which I quote Doctor Ransome, the eminent geologist of the United States Government, in which he states there has been no movement along the fault planes since the time civilized man came to the North American continent. [Laughter and applause.]

Mr. MACGREGOR. Then somebody must be prevaricating. [Laughter.]

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. MACGREGOR. Certainly.

Mr. DOUGLAS of Arizona. I think I can straighten this whole discussion out by simply explaining what an earthquake is. An earthquake need not necessarily result from movement along a fault plane. An earthquake is vibration as a result of movement either within a specific region or as a result of vibrations from movements elsewhere. The fact that there may not have been any movement on any of the fault planes which Doctor Ransome points out in his report is no evidence whatsoever that there has not been an earthquake at the Boulder Dam site.

Mr. MACGREGOR. Mr. W. G. Clark, a consulting engineer of New York City, said that there had been several earthquakes in this Boulder Dam region.

Mr. WILLIAM E. HULL. If the gentleman will permit, I have been at the Boulder Dam site and I would like to know if any earthquake ever affected the rocks there now. No earthquake could ever stir them up.

Mr. MACGREGOR. It is stated here that the earthquakes piled up tons of rock.

Mr. WILLIAM E. HULL. I do not see how it would be possible to blow them up.

Mr. MacGREGOR. Then the gentleman has not been there at the time they were torn up.

Mr. Chairman, I desire to state a few of the reasons why I am opposed to the Boulder Dam project.

I am opposed to the Government going into the power business.

I am opposed to any more reclamation propositions at the present time. The farmers are crying for relief from overproduction, but still we go on reclaiming more lands for agricultural production. The reclamation enterprises of the Government have not been eminently successful. Public moneys in many instances have been wasted.

I am opposed to constructing a dam that will constitute a menace. The proposed dam would be at least 675 feet high from the bedrock. That is four times as high as Niagara Falls. It is 120 feet taller than the Washington Monument.

The reservoir created by it would hold seven hundred times as much water as the St. Francis Dam in California that recently gave way, resulting in such a tremendous loss of life and property. It is appalling to think what destruction would follow in the wake of such a wall of water as would follow the breaking of the proposed dam. The territory is subject to earthquakes.

I am opposed to it because it is discriminatory legislation.

I look upon this matter purely as a local proposition and believe that the people of the locality should pay for it in any event. It is another instance of the Federal Government paying for everything and adding to the ever-increasing bureaucracy.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. CROSSER. Mr. Chairman and members of the committee, it is strange why men who have lived under popular government are opposed to the rightful and lawful demand that the public's property, the Nation's natural resources, including water power, shall be used for the benefit of the public, for the equal advantage of all the people, and not for the special benefit of any one or few. Certainly one can find amusement in the illogical arguments presented to justify giving to a few people a special privilege in what belongs to all of the people.

Surely, however, those who still believe in the Declaration of Independence must be surprised when they observe Members of Congress apologizing for voting to have the Government keep and use, for the equal benefit of all of the people, those resources which, according to both law and morals, belong to the public as a whole.

All of the clamor on the part of private persons for the privilege of controlling and exploiting, for their own benefit, the public's natural resources is evidence of selfish desire for the largest possible portion of what is jointly produced by the action of labor, capital, and the force of nature itself.

Rarely, if ever, do men dispute or quarrel about what is the best mechanical means or method of producing wealth. The controversy is always in regard to how much they should have as their share of what is produced.

Every true economist recognizes, therefore, that in the science of political economy the most important subject is the economics of distribution, sometimes vaguely referred to as the wage question.

The many measures presented to Congress for the increase in the pay of different classes of Federal employees show clearly that the problem of just distribution is a very important one. Indeed, ever since I became of voting age I have realized that not only the welfare of those who work but, in fact, the ultimate safety of the Nation as a whole depends upon the establishment of justice in the distribution of what is jointly produced by the action of labor, the resources of nature and of capital.

Let me say, before proceeding further, that while I have been a Member of Congress I have supported every measure for the increase of the wages of Government employees. I have done so gladly. I know, however, that such measures constitute no fundamental and final remedy for the injustice suffered by the class of people known as employees.

Many men in public life, however, easily acquire reputations as "friends of the people" by merely voting, now and then, for small increases in wages. All, however, might have voted for such increases without being in fact genuine supporters of justice to the producers of the Nation.

Many men have voted for wage increases, and yet at heart they feel that a few men were designed by the Creator to govern everybody else, and they think that all the rest of the people should be humbly thankful for whatever the few are willing to let them have. Nevertheless, many good people, sincerely desiring greater opportunities and justice for the employee class, are misled because defenders of special privilege and autocracy may at times have rightly voted for moderate increases in the wages of Federal employees and are therefore called "friends of labor."

Note, however, how eagerly these same men strive to give to private individuals that great and valuable natural resource known as Muscle Shoals. Observe the frantic efforts to prevent the passage of the bill now before the House providing for the building of Boulder Dam, which would safeguard 60,000 people against death by floods; provide water needed for household purposes by the 1,800,000 people of southern California, provide for watering 400,000 acres of arid land and which would make possible the development of water power to the extent of more than 1,000,000 horsepower by which electric current can be generated and sold very cheaply to the people of southern California and without loss to the Government.

By building a dam 550 feet high at Boulder Canyon, the width of which at the bottom would be only 300 feet and the width across the top of which would be only 1,300 feet, the Government can create a reservoir large enough to hold 40,000 square miles of water, a foot deep. If it were necessary and desirable, the reservoir would hold the whole Colorado River flow for one and a half years without letting a drop of water pass the dam. It seems almost unbelievable that men would interfere with the enjoyment of such blessings by the people in order to prevent the recognition and approval of the principle that to all the people, as a matter of right, belong the values and benefits produced, by the public's natural resources, in excess of what results from individual effort or assistance. Yet there are men, who because of their desire for possession and control of nature's bounties, are willing to have thousands of their fellow men suffer death by floods; willing to deny drinking water to other millions of their fellows; willing to have almost one-half a million acres of land lie parched, useless, and idle; and are not only willing but eager to deny millions of people the benefit of cheap power and light in order that they may have a monopoly of the water power, and therefore be able to compel the people to pay an exorbitant price for power and light.

Yes, my friends, we observe men support perhaps grudgingly, but, nevertheless, they occasionally support wage increases. These same men, however, eagerly strive to give to private persons the great resources of nature.

The monopoly, by private persons, of the natural resources and the concentration of the ownership of industrial land gives such private persons the power, to a great extent, to dictate, without regard to justice, the wages of employees and also to place unreasonable prices on many kinds of service and goods.

Consider, for example, the sale of electric current for power and light developed by the water power at Niagara Falls. On the American side of the falls the water power is under the control of private owners. On the Canadian side of the same falls the water power is controlled directly by the Government of Ontario. The consumer on the American side of the river, however, pays approximately three times as much as does the consumer on the Canadian side of the river. Why this very great difference in the price paid by the users of electricity developed by water power at the same falls and in power houses only a few hundred yards apart? Comparatively little labor of any kind is required in connection with the generation of electric current from water power and, therefore, the common excuse of higher labor cost can not be advanced to explain the very high price of electric current on the American side of the falls.

The true explanation is that, on the Canadian side of the Niagara, the people receive, in cheaper electric current, the benefit of what nature itself provides, whereas, on the American side of Niagara, private persons collect huge profits from the sale of electric current, produced at practically the same place by the same force of nature. It was necessary to build power houses on both sides of the falls. Private persons built the power plant on the American side and the public built the power plant on the Canadian side. The price charged for electric current should be and is enough to pay the interest on the cost of building the power plants, both in the case of the publicly owned and operated plant of Ontario and in the case of the privately owned plant on the American side of the river.

The private owners of the American plant, however, place a high money value on the privilege of controlling the power which nature produces by the waterfall at Niagara, and then they demand from the consumers of electric current a price high enough to pay a profit on the value which the private owners have put on the privilege of controlling the power which nature itself provides. Is it morally right that one or a few men should have, in what nature itself gives, a greater share than other members of the community?

Oh, but you say private owners would be willing to sell electric current at a price sufficient to pay a reasonable profit on the money; that is, capital necessary to build the power plant and buy equipment. In order to prove how much you are mistaken I suggest that you offer private operators that proposition and then note their protests. Political economists agree that the proper remuneration to capital is the market rate of interest. I know of no private operators of public utilities or natural resources who would be satisfied with interest on the capital necessary to furnish the improvements required to operate a public utility or natural resource.

The analysis which I have given as to the rightful distribution of the benefits furnished by the force of nature at Niagara Falls applies with equal force to the cases of Muscle Shoals, to Boulder Dam, and to water power wherever it may be. Not only does the principle which I have stated apply to all the water power of the Nation, but it is equally true as to every natural resource and as to every advantage which is due to the force of nature.

It is a well-recognized fact that no wealth can be produced except by using the earth or some of its resources. The fewer, therefore, the number who control the natural resources of the country the more surely can such few arbitrarily determine the price of what is produced and also the compensation to be paid to the labor required to utilize such resources for the production of goods or service for sale to the public.

The sure safeguard against unsound and dangerous schemes for regulating business is the insistence upon only what is sound and just by those speaking for the business world. When business men, craftsmen, professional men, or others demand what is not right and just, mankind finally becomes hostile to them and refuses them even what is clearly justice.

It is well, then, to consider what is properly the field of private business and what means of production should be owned and operated by the public.

Wherever competition is clearly possible in the production or distribution of goods or service, private business is the proper agency to be employed. Where, however, the agency required to serve the public must use public property and have the exclusive right to serve the public, or in other words, must have a monopoly of the particular business in question, then the public, acting through its officials, is the proper agency to be employed.

Where we have competition, one producer or dealer, because of his desire for business, makes a price which prevents the demand by others, in the same kind of business for an exorbitant price for what they sell. In the case of a public utility, however, in which a monopoly of the business is proper and necessary, private individuals actuated by the desire for profit can not justly or safely be given that exclusive right or monopoly of the business.

Return for a moment to consider the effect of the private ownership of natural resources and the concentration of the ownership of land desirable for industrial purposes. Is it not clear that, if we continue such a policy, men can grant to employees an increase in pay and then take it back from the public by increasing the price of what they sell? Do not forget that the employees referred to, constitute a part of the public and that all the different groups of employees constitute practically the whole public.

We should, therefore, assure the public ownership and operation of the natural resources and monopolies and thus in the case of water, for example, assure cheap power to manufacturers and cheap light to business houses and to domestic consumers.

Then, too, instead of increasing men's taxes because they build mills and factories and make other improvements, we should reduce their taxes. If we must add a penalty to taxes, it should be added to the taxes of men who fail or refuse to make use of land adapted to industry. We should not, by increasing his taxes, discourage the man who by using his land produces more goods and also creates a demand for labor. New demands for labor would lessen the competition for employment at other work places and would finally abolish unemployment, and therefore increase wages. If workmen were all employed and well paid, they could and would buy freely, and so create a good market for all kinds of goods and thus stimulate production, and therefore benefit both the employers and employees of the country. The increase in production would also lessen the price of merchandise to the public. Those only would receive less who had speculated on the rise in the value of their property because of other men's industry and enterprise in improving their neighboring property.

If we should adopt the policy I have briefly suggested, then we would before long have no unemployment problem and no wage problem. If Government employees were then not paid fair salaries, they could be sure of finding employment at better pay with private business. The Government then, in order to keep its trained employees, would raise their wages to a reasonable standard. Moreover, their increases in pay would not, as now, be continually taken from them by increases in prices for the necessaries of life.

The noblest service public men can render to the people is to help to establish justice. Surely we do not help to establish justice when we advocate giving to a few men a special interest in the people's valuable resources and thus enable them year after year to take tribute from the people for the use of their own property. I, too, favor economy, but I am for the true economy, which means the avoidance of waste. It is the worst kind of extravagance to give to a privileged few the people's treasure, which, if used for the benefit of all, would reduce the cost of living to all. It is false economy to hold down the wages of Government employees while we give away water power which, if used for the benefit of the people, would mean cheap light to millions, reduced factory costs for employers, and therefore lower-priced goods for the public.

My friends, let us keep the valuable resources that belong to the people of the Nation, and let us use for the benefit of the public what belongs to the public. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The amendment was rejected.

The Clerk read as follows:

SEC. 7. That the Secretary of the Interior may, in his discretion, when repayments to the United States of all money advanced, with interest, shall have been made, transfer the title to said canal and appurtenant structures to the districts or other agencies of the United States having a beneficial interest therein in proportion to their respective capital investments under such form of organization as may be acceptable to him. The said districts or other agencies shall have the privilege at any time of utilizing by contract or otherwise such power possibilities as may exist upon said canal, in proportion to their respective contributions or obligations toward the capital cost of said canal and appurtenant structures from and including the diversion works to the point where each respective power plant may be located. The net proceeds from any power development on said canal shall be paid into the fund and credited to said districts or other agencies on their said contracts, in proportion to their rights to develop power, until the districts or other agencies using said canal shall have paid thereby and under any contract or otherwise an amount of money equivalent to the operation and maintenance expense and cost of construction thereof.

The following committee amendment was read:

Page 11, line 2, strike out the word "of" and insert the word "in."

The committee amendment was agreed to.

Mr. LANKFORD. Mr. Chairman, I move to strike out the last word. Mr. Chairman and gentlemen of the committee, I am in favor of this bill. The bill at first appears to involve many difficult questions, but to my mind it finally has resolved itself into one question, and that is the question of who shall build a dam at Boulder Canyon on the Colorado River.

To my mind there is no doubt about the proposition that there will be built at or near Boulder on the Colorado River a great dam. That dam will either be built by the Government under the terms of this bill or it will be built by private capital.

All agree that it is necessary to build a dam on the Colorado River in order to control the flood menace of the Imperial Valley. The very people who oppose the building of the dam under the terms of this bill advocate and are willing for a dam to be built there to control the flood situation.

Those who oppose the construction of this dam admit that there should be such a dam built as may be necessary to assist and help in the irrigation of that fertile valley near the Colorado River. So it is settled that Boulder Dam will be built.

This case narrows itself down to a proposition of whether that dam shall be built under the terms of this bill or be built by private capital. If Mr. SWING was only seeking to pass a bill for flood control, there would be no real controversy about it. If he was seeking to build a dam for irrigation purposes, there would be no serious contention about the construction of the dam.

Then why does this controversy arise? What brings about the bitter contest? The suggestion that there be built by a governmental agency a dam which will produce power and which will pay for itself lashes the great power interests into a frenzy of apparent indignation.

Why not let the Government under the terms of this bill build the dam? I am convinced that that dam built in accordance

with the terms of this bill will be paid for by the people as set out in the bill. The Government will be fully protected and the people retain this great asset?

The CHAIRMAN. The time of the gentleman has expired.

Mr. LANKFORD. I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LANKFORD. If the dam is built under the terms of this bill and electrical energy is sold, the consumers will eventually pay for that great dam, and when they pay for it the dam will still belong to the American people.

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. LANKFORD. I can not; I have only 10 minutes. If the gentleman has any questions and will submit them in writing I will answer them later when I have more time at my disposal. [Laughter.]

If the private interests build the dam they will charge such a rate for the electrical energy as to make the consuming public pay for the dam in a little while, and then the corporation which has built the dam will still own it. They will continue to charge that amount for the electrical energy and make the consuming public pay for it in full again and again and again every few years, as time rolls on.

All kinds of arguments are being made against the construction of the dam. One faulty argument is that if you build a dam under the terms of this bill it will bring about the production of a large amount of cotton in the Imperial Valley, thereby causing an overproduction and consequently low prices. The construction of a flood-control dam used for irrigation purposes will produce just as much cotton in the Imperial Valley as a dam built under this bill. The construction of a dam by private interests which they are willing to build will bring about the production of the same amount of cotton that the construction of the dam under the terms of this bill will bring about.

Mr. Chairman, my people are cotton growers, and having their welfare at heart and not wanting them to be misled, and not wanting southern Members of Congress misled on this proposition, I wish to discuss rather fully the cotton-production phase of this proposition.

From time to time we have heard suggestions from those who are opposing the Boulder Dam and the all-American canal that the construction of this great project would mean an increased production of cotton along the lower Colorado River, and particularly in Imperial Valley. We are told that our people of the South should oppose the measure on this ground: That if the Boulder Dam and the all-American canal should not be built, then the South is saved this competition. In 1927 the Alabama Press Association, after its members had been told that the Boulder Dam project would mean enormous competition in the production of cotton, passed a resolution opposing the project upon that ground. Let us see about the matter.

Along about 1910 cotton was introduced into Imperial Valley and was found to be quite successful. At the same time, it was introduced into the Imperial Valley on the Mexican side of the international line and was found to be equally successful, but with the decided advantage of unusually cheap labor, the labor consisting mostly of orientals and native Mexicans. The reports indicate that in the five-year period of 1922 to 1927 more than 4,400 Chinese laborers alone were imported into this section of Mexico.

During the stimulus of the war cotton planting increased on both sides of the line very materially until in 1920 there was slightly more than 100,000 acres in cotton in Imperial Valley, Calif., and almost 200,000 in Mexico.

After the war, however, cotton production on the American side, because of the cost of labor, cost of irrigation water, and other items, reduced the acreage materially from year to year, so that in 1924 the acreage in Imperial Valley, Calif., had dropped to 75,801; in 1925, to 47,253; in 1926, to 23,693; and the acreage in 1927 was only 20,300 out of some 400,000 acres in general crops.

On the Mexican side we find a slight reduction in 1924, or 170,126 acres in cotton; in 1925, 197,430 acres; in 1926, 145,348 acres; and in 1927, 112,015 acres.

During the year 1925 there was ginned in the Imperial Valley, Calif., 10,500 bales, as against 84,331 bales immediately across the line in Mexico. In 1926 there were ginned in Imperial Valley, Calif., 6,838 bales, as against 84,842 bales across the line in Mexico.

A report of December 31 last, as published in the Glexico Chronico, a newspaper published in Imperial Valley, indicates that for the present season up to that date there had been ginned in Mexico 25,206 bales, as against 2,733 bales for Imperial Valley, Calif.

In 1920 there were 22 cotton gins in operation in Imperial Valley, Calif., and in 1927 there were only 4.

These figures all indicate that cotton production in Mexico is somewhat of an established fact, but in Imperial Valley, Calif., it never has been a serious factor, and is very much on the decline. The reason for this is obvious. Imperial Valley has a 12 months' growing season; they irrigate their crops every month in the year; they have long, hot summers, and sunshine practically all of the time. This condition is ideal for the growing of fruits and winter vegetables and for growing two or more crops per year on the same parcel of ground. With these conditions, with the long summers and the abundant sunshine, catalyzed crops of high value can be as easily produced as crops of lower value.

The lands are reclaimed from the desert, which requires a considerable expenditure of money. Therefore land values are reasonably high; labor cost in that region is necessarily high; and since all moisture must be artificially applied, a great deal of money is necessarily expended for irrigation works and irrigation service, and yet the land will produce little, if any, more cotton per season than will a similar area of land in the Southern States, where the expense of production is only a fraction of the cost in Imperial Valley.

Mr. R. B. Vail, president of the Alabama Press Association, visited the Imperial Valley in November, 1927, for the express purpose of obtaining first-hand information on this subject, and the Los Angeles Examiner of November 26, 1927, contained a news story following an interview with Mr. Vail, wherein we take it Mr. Vail is correctly quoted.

Mr. Vail in his interview with the correspondent of the Examiner at the Rosslyn Hotel in Los Angeles, and on various occasions and to numerous persons since, has repeatedly called attention to the false propaganda circulated throughout the South that realization of the Boulder Dam project would mean southwestern cotton competition. He has invariably declared that there is no foundation for any fear of competition from cotton growers as a result of the Boulder Dam and that the deliberate purpose to deceive is the only reason for the circulation of such false propaganda.

Mr. Vail declares his purpose to prevent, so far as possible, these false reports and newspaper items doing a rank injustice to the cause of those seeking the passage of legislation to authorize the construction of Boulder Dam. He points out that there is no likelihood of any bulk production of cotton in the Southwest that might damage the cotton interest of the South.

Mr. Chairman, Mr. Vail and all the rest of us who have visited southern California found that the lands in Imperial Valley which would be irrigated as a result of this dam are entirely too valuable and too expensive to be used in the production of cotton with the expensive labor of southern California. This land is extremely fertile and is very valuable for the production, from January to January, of cantaloupes and all other forms of vegetables and fruits. The farmers of this valley can not pay for their lands, pay for their labor, and for all their water and produce cotton at a price below 40 or 50 cents a pound except on very small areas of land temporarily not used for fruits or vegetables.

Following his visit to California, Mr. Vail reported his findings to the association of which he was president, and in January, 1928, the Alabama Press Association, by resolution, again spoke upon this subject, rescinding their former resolution and stating that there appeared to be no reason for them to oppose the legislation because of danger to the cotton growers of the South.

In an article published in the Macon Telegraph on Sunday, January 1, 1928, and also in the Journal-Herald, of Waycross, Ga., Mr. Nelson M. Shipp told of his trip to the Imperial Valley and to that portion of Mexico watered now by the Colorado River. He gave it as his opinion, after a month of careful first-hand investigation, that this region is not now and never will become a cotton competitor of the South.

Mr. Chairman, I visited this section last summer and I fully agree with Mr. Shipp and all others who have given an impartial first-hand study of this problem that there is no chance of cotton competition by the West as against the South. Cotton is planted in the Imperial Valley as a side crop or to wash the alkali out of the soil through irrigation. Cotton is not the money crop of the West, and no amount of irrigation will make it such. Mr. Shipp pointed out that Georgia produces some wheat, but will never become a wheat competitor of the West, and while the West produces some cotton it will never be in sufficient quantities to injure the price of cotton grown in the South.

Mr. Chairman, while the building of the Boulder Dam in connection with the all-American canal will stabilize and make dependable the water supply for irrigation purposes in the Imperial Valley and will make possible the irrigation in time of some additional lands of the same general character, at the same time the construction of this project will make possible a definite limitation on expansion of uses of water in Mexico where cotton farming is now and has been for some time past the principal crop. The failure to construct these works means continued expansion of the Mexican production, as at the present time Imperial Valley is of necessity at the lower end of the canal, which first supplies Mexico with water. In order to take water through Mexico it was necessary to enter into a contract with that country whereby one-half of the water should be left there for use. Under this contract Mexico has the perfect right to double its present use, and she has the lands sufficient to increase her production four times.

It is an irony of circumstances that a small Orient is being built up in Mexico on our border supported by the great white staple of the South, which, in turn, is produced on a paternalistic basis with irrigation water transported for miles at a large cost by reluctant American farmers. Under an old concession from Diaz the American farmers of the Imperial Valley ran their main-line irrigation canal 60 miles through Mexico, with the agreement that lands in Mexico should be entitled to one-half of all the water flowing through the canal. For every acre irrigated in the United States the Mexicans were due water for an acre in Mexico. Years have passed, and the present finds some 200,000 acres in Mexico irrigated from this water supply as against some 400,000 acres in the United States. Applications from Mexico for irrigation, including the lands now being supplied, have grown to over 400,000 acres. The charge on the American side for the water has gradually increased, whereas the Mexican charge remains at a low arbitrary figure. Thus farming in Mexico is not based on natural and ordinary laws that should figure in competition, but Chinese coolies are growing cotton at the expense of American taxpayers in the West.

As a result of our studies we find that, instead of the Boulder Dam project increasing cotton production, it will limit the same, and such cotton as is produced will not be produced on unfair-competition grounds.

With the Imperial Valley producing, in 1926, 6,838 bales of cotton as against 17,750,000 produced in the United States, and with cotton production becoming less annually, it is only a fair conclusion that the cotton interests of the South can not be injured by the developments which will take place in that community under the Boulder Dam project and, indeed, their injury, if any, will be found in the failure to build rather than in the building of the same.

Mr. Chairman, the most criminally vicious propaganda ever conceived by the mind of man is that which, steeped in misrepresentation, leads the common people into warfare upon each other while the selfish, moneyed interests further their own designs of ensnaring, pilfering, robbing, and finally murdering both factions of the people whom they have plunged into the awful conflict. The Power Trust by its unscrupulous methods can make an argument, at least plausible on the surface, in behalf of any of its schemes to further ensnare the great consuming public. It can prove that a pig is a pig when it wants it to be a pig, or a puppy when it suits their purpose for it to be a puppy. "The devil can quote scripture for his purpose."

The power interests want to build and own Boulder Dam and do not want the improvements made under the provisions of the Swing-Johnson bill. In order to accomplish this purpose, by means of false propaganda, it is attempting to array the farmers of the South against the farmers of the West. It is succeeding temporarily, but the people will eventually know the truth, and the truth will make them free.

Mr. Chairman, it is the solemn sworn duty of Members of Congress to ascertain the truth about this matter and tell their folks of the fallacy of some of the alleged arguments that are going the rounds. I repeat, the power interests wish to plunge the farmers of the South into a bitter conflict with the people of the West and reap a rich harvest as a result of the conflict.

This selfish interest, which values the farmers of both the South and West only in terms of the money it can squeeze out of them, is telling the people of the South that the people of the West are getting the advantage, and the same group are telling the people of the West that the people of the South are about to overreach the West. An attempt is being made to deceive both groups and make them bitter enemies of each other. The people of the West are being warned that the South, by the proper solution of the Muscle Shoals problem, will be given an advantage to the detriment of the great western part of our country. The good people of the South are told that by the construction of Boulder Dam the people of the West will gain a great advantage and the people of the South will suffer as a result.

Mr. Chairman, I resent the efforts that are being made to mislead the people of the South and of the West. The peoples of these two great sections have a common cause in their efforts to save the two great power properties at Muscle Shoals and Boulder Canyon. To my mind, the time is at hand for the people of the West to join hands with the people of the South in a common fight for the rights of both sections.

With this belief firmly established in my mind, I have remained on the Committee on Irrigation and Reclamation of the House, not for the purpose of helping the West and only the West or the South and only the South, but for the purpose of endeavoring to legislate for our whole Nation. I would not have remained on the committee had I not found myself in full accord with my colleagues in their efforts in behalf of the West. I would not remain on this great committee as an obstructionist. Rather would I be a constructionist.

I realize that heretofore this committee has done much more for the West than for the South. All the while, though, I have hoped for a new day in the reclamation program of this country. There is much drainage and reclamation of waste lands awaiting governmental aid in the South, and I firmly believe that a great reclamation program is under way for that great section of our country. As a member of my committee I had the honor recently of reporting out the Crisp reclamation bill. This splendid bill by my colleague from Georgia goes much further than has ever been gone before in the matter of reclamation for the South. We have the support of governmental officials who have never before fought for such a program for the South. I believe that we will pass the Crisp reclamation bill in the near future and that it will prove to be the beginning of a program which will prove most beneficial to all the Southland. I am truly grateful to my colleagues on the committee and to other western Members for the splendid support they have given Congressman CRISP and myself in our fight for a reclamation program for the South. I now know that my efforts in behalf of the good people of the West have not been in vain, and I feel that they will continue to give to us their valuable support in our efforts for our people of the South. I am happy to have been permitted to serve on this splendid committee with the good people of the West and other sections and I am truly glad to see the first dawn of a most excellent reclamation program of the South. Our cause is just and I confidently believe that this first dawn will brighten and that it will soon be daylight everwhere.

Mr. Chairman, to my mind the Muscle Shoals and Boulder Canyon Dam propositions are identical in many respects. Both, if properly handled, means cheaper electrical energy for all the people. The Power Trusts are striving to grab both and use them to exploit the people rather than for their benefit. The cry against the Government in business is made as to both. I do not believe in our giving away the people's property in order to get the Government out of business.

The Government is already in business at Muscle Shoals. What shall we do? Shall we give away the plant, costing the taxpayers hundreds of millions of dollars, in order to get out of business? Shall we give away all Government property in order to get the Government out of business? Shall we give away the fabulously valuable oil properties, public lands, and timber properties of the Government in order to get the Government out of business? Shall we stop the United States mail system and deliver it to private interest in order that postal and parcel-post charges may be doubled several times in order to get the Government out of business? Shall we give away all Government-owned ships to get the Government out of business? Shall Congress cancel all foreign debts in order to get the Government out of business, and to enable the international bankers to collect greater interest on safer loans?

Shall we close down the rural-credit system and put an end to all Government aid to road improvements to get the Government out of business? In short, shall Congress tax the common people unto death to buy and improve great properties needed for governmental purposes, and then give these properties to the big rich in order to get the Government out of business? Shall we stop the regional-banking system to get the Government out of business?

Everyone will readily agree that the answer to these questions is "no"—a thousand times "no." Then, there is but one answer to the demand that the Government give away Muscle Shoals in order to get out of business or that we give to the power interests the great asset of Boulder Canyon, and that is an emphatic "no!"

We, as Members of Congress, are engaged in the greatest business on earth; that of governing the greatest people on

earth. The Government can not get out of business and continue to be a government. The Government is in business on every hand by day and by night for other folks; why not for the farmers and the consuming public? In effect, it is urged that it would be treasonous for the Government to engage in any business that would in the least lessen the profits of either those who sell to the masses or who buy their products at a sacrifice, but that it would be an act of the highest patriotism to perpetuate the Government in the business of helping others make additional profits out of the common people.

It is the same old story of attempting to help others on the theory that part of their profits may eventually ooze through their pockets and in some mysterious way help the farmers and the ultimate consumers. Plenty of people are willing to help the farmers and consumers if they, at the same time, help other people more. They are not willing to help the farmers and consumers if it interferes in the least with any other business.

Many, many there are who want to get the Government out of business and want to get themselves in business by grabbing our great national assets, such as our oil properties, timber and mining lands, power sites, improved and unimproved, such as Boulder Dam and Muscle Shoals, and in fact all properties of whatever nature. The Power Trust and the National Fertilizer Association would be delighted to get the Government out of business at Muscle Shoals by the Government practically giving this great God-given asset to the combined power and fertilizer interests.

These selfish interests either want Muscle Shoals and Boulder Canyon donated to them or operated for their special benefit. They would much prefer that this great plant at Muscle Shoals, paid for with the people's money and erected on a site specially prepared by the great I Am, be closed down and rot to the ground rather than for it to be operated in behalf of the farmers and ultimate consumers of electrical energy.

I am opposed to the Government's going into business as a general proposition. I believe in private initiative. The fullest protection should be given to any individual, firm, or corporation who initiates something worth while. The individual who produces something good where nothing existed before is a benefactor, and I for one will go the limit in his behalf. If the Power Trust ever prove to my satisfaction that they, the Power Trust, builded and created the rivers, the canyons, the mountains, and the waterfalls, and caused the clouds and the rainfall that makes the rivers flow with liquid power, then I will vote for them to have the earth and fullness thereof, but so long as I believe that God created these things for his children, and so long as I represent my people, I shall vote to render unto the great common people the things that are theirs and to the power interest the things that are theirs.

I do not believe in the Government's going into the business of manufacturing knives or cloth or building houses. Neither would I advocate the Government building factories and entering business in competition with other businesses where the people who builded the factory in the first instance created a factory, factory site, and everything connected therewith, if it was also necessary for the Government to go into the market and build everything from the ground. At Muscle Shoals the Government already has a most expensive plant and the Almighty gave us a most wonderful power site. At Boulder Canyon we have a power site unequaled in the world. The Government is not building power sites at either of these locations. God builded them for the people. Shall we give them to those who wish to exploit the people?

We have already used the people's money at Muscle Shoals to improve that great asset. Shall we now donate that property to the power interest or shall we retain it for all the people? The people of the great West say to us that they need so much the power and water that will be created and impounded by Boulder Dam, and the site is so valuable that if the Government will, in effect, loan them the money to build that great dam, they, the people of that country, will pay back within a reasonable time the loan, principal and interest in full, and be glad for the United States to still own the great property for the use of the whole people. The power interest say, "No; we are not willing for the Government to build that great dam; we will build it and make the people pay for it, and we will still keep the great property, and we will make the people pay for it again and again forever as we resell it every few years while we continue to own it."

Objections have been urged to the Government's constructing Boulder Dam. It is contended that this would be putting the Government in business and thus depriving the power interest of equal protection under the law. The Power Trust claims to be asking for equal rights and not for special privileges. There is only one canyon of the Colorado, and the syndicate or corporation that ever gets possession of that great asset will enjoy not only a special privilege, but the only privilege of possessing the greatest power site, with the greatest possibilities of all the earth. There is no other similar site for anyone else. The ownership of this great asset by any one group of persons will be most assuredly a special privilege. Equal rights to all in this instance can only be maintained by the ownership of all.

The Power Trust, by virtue of the ownership of Boulder Dam, would have not only the greatest power site on earth but also would have a strangle hold on the irrigation of the most fertile valley of all the earth and would hold the key to the floodgates of destruction and complete annihilation of the property and lives of all the people of Imperial Valley. It would hold in the hollow of its hands the domestic supply of water and thus the very lives and existence of the people of Los Angeles and a large part of southern California, and would be exercising the function of the President and the United States Senate in the handling of an international problem of tremendous importance.

In addition to all of these tremendous powers the Power Trust would have welded one more mighty link in the chain of Power Trust slavery by which it is seeking to bind all the people of this great Nation.

Ah, Mr. Chairman, let us retain Muscle Shoals and let us build Boulder Dam, and preserve all our great national assets for all our people. Muscle Shoals and Boulder Dam under Government operation mean cheaper power to the ultimate consumer, and cheaper and better fertilizer to the farmers. Shall we vote for the people, or shall we vote for the greatest trust of all time? Our action in these matters will show where we stand. The power interests do not desire Government operation of these two properties for two reasons. In the first place, the power people want the great profits which they can squeeze out of the people by their operation of these two properties.

Then, again, they know full well that Government operation of these sites in the manufacture of fertilizer and electrical energy means much cheaper power and fertilizers, not only for those who buy from these sites but for all the folks.

Unfortunately, Arizona and Utah are objecting to the construction of Boulder Dam. They seem to fear they will lose some of their rights if the dam is built under the terms of the Swing-Johnson bill. If the Power Trust gets this property it would not only rob the States of Arizona and Utah, but would further ensnare all the people of this great Republic.

The argument is made that the utilities commissions of the various States have ample power to control the great power interest. Unfortunately this is not true. There are many reasons why the State commissions are almost helpless. I can not argue this angle at this time. It would require hours to tell the real truth about the transfer of State rights and the loss of the people incident thereto. Anyone familiar with the Esch-Cummings Railway Act knows what I have in mind. I fought that bill, but the efforts of myself and others were of no effect.

We must begin to protect the people while we own these great assets. If we lease we must secure ironclad contracts of unimpeachable terms, or we will lose the great inheritance our people justly own. No public-utility concern should be permitted to demand from the people a return on any value except for actual prudent investments. We may not be able to achieve this great right as to properties already owned by power interests. We certainly owe it to our people to protect them as to future transactions. But in my limited time I can not further discuss this great problem of rates, and so forth.

Mr. Chairman, the Boulder Dam problem is one of the most interesting ever presented to the Congress. There is only one Boulder Canyon. There is only one Colorado River, and only one Grand Canyon of the Colorado. The whole picture is most interesting, and I wish I had for a few brief hours the gift to put in words what God hath wrought in His great masterpiece—the Colorado from the mountains through the canyon to the sea.

Oh, that it was given to man this side of heaven to picture its beauty, tell of its mission, grasp its power, and see as God sees its offerings to the ages. All humanity can not fathom it for a single second of time, neither can all wisdom tell the history of a single grain of its sands. It extends from eternity to eternity as God's own. I have stood for hours gazing into its mighty canyon, 12 to 14 miles wide and a mile deep, into which it seems that the Great Builder has grouped all the beauty of all the earth. I am sure I shall never see any other scene in this life half so impressive except the starry heavens, and that nothing beyond the grave will excell it but God's own glory and the splendor of life without end, eternal and in the heavens.

Mr. Chairman, I can never feel that this great handiwork should become the property right of the few rather than the birthright of all. But the greater the cause of conflict, the greater the battle. Those who desire this great asset for their own selfish interest are in the fight to the finish and care not for the wounded and dying, just so they are driving toward their objective. They are fighting to the finish and seeking to cause us to make war against each other.

The Power Trust by insidious, deceptive propaganda is attempting to prod the people of the South, of the West, and of the whole Nation into a mighty, riotous conflict, in the awful darkness of misguided prejudice, where the common people will face certain ignominious defeat, with friend defeating friend, farmer destroying farmer, and brother killing brother, while the archconspirators of the fratricidal conflict grabs the two greatest assets of the American people.

The all-wise Father of us all gave to the American people these two great assets—the great Colorado and the wonderful Tennessee Rivers. Shall we as Representatives of our great people donate these God-given properties to the power interest to become an all-powerful force for the enslaving of the people whom God intended them to serve, or shall they remain unto the people, now and forever, a covenant of deliverance?

Let us protect property rights by retaining for all the people the property which God gave to all.

This is not a nation of property but of people. As legislators let us battle for rights of property only as the agency by which and through which there is preserved and strengthened every God-given right of the whole people.

The CHAIRMAN. The time of the gentleman from Georgia has expired. The Clerk will read.

The Clerk read as follows:

SEC. 8. (a) All appropriations of water from the Colorado River, incident to or resulting from the construction, use, and operation of the works herein authorized, shall be made and perfected in and in conformity with the laws of those States which may or shall have approved the Colorado River compact ratified in section 12 of this act.

(b) The United States, its permittees, licensees, and contractees, and all users and appropriators of water stored, diverted, carried, and/or distributed by the reservoir, canals, and other works herein authorized, shall observe and be subject to and controlled by said Colorado River compact in the construction, management, and operation of said reservoir, canals, and other works and the storage, diversion, delivery, and use of water for the generation of power, irrigation, and other purposes, anything in this act to the contrary notwithstanding, and all permits, licensees, and contracts shall so provide.

(c) Also the United States, in constructing, managing, and operating the dam, reservoir, canals, and other works herein authorized, including the appropriation, delivery, and use of water for the generation of power, irrigation, or other uses, and all users of water thus delivered and all users and appropriators of waters stored by said reservoir and/or carried by said canal, including all permittees and licensees of the United States or any of its agencies, shall observe and be subject to and controlled, anything to the contrary herein notwithstanding, by the terms of such compact, if any, between the States of Arizona, California, and Nevada, for the equitable division of the benefits, including power, arising from the use of water accruing to said States, subsidiary to and consistent with said Colorado River compact, which may be negotiated and approved by said States and to which Congress shall give its consent and approval on or before June 1, 1928; and the terms of any such compact concluded between said States and approved and consented to by Congress after said date: *Provided,* That in the latter case such compact shall be subject to all contracts, if any, made by the Secretary of the Interior under section 5 hereof prior to the date of such approval and consent by Congress.

(d) Nothing in this act shall be deemed to waive any of the rights or powers reserved or granted to the United States by paragraph 7 of section 20 of the act providing for the admission of Arizona, approved June 20, 1910, and by the tenth paragraph of Article XX of the constitution of Arizona, but the Secretary of the Interior is authorized on behalf of the United States to exercise such of said rights and powers as may be necessary or convenient for the construction and use of the works herein authorized and for carrying out the purposes of this act.

With the following committee amendment:

Page 12, line 23, after the word "Nevada," insert the words "or any two thereof."

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The Clerk read as follows:

Page 13, line 9, strike out the period, insert a colon, and the following: *"Provided further,* That in the event no such compact is entered into prior to June 1, 1928, then there shall be reserved for acquisition by the States of Arizona and Nevada, their respective agents, licensees, or assignees, at the switchboard, at the plant or plants operated through the use of water impounded by said dam for each, electrical energy equivalent to 15 per cent of the total electrical energy made available by the use of such impounded water, to be contracted for by said respective States, or their agents, licensees, or assignees, within six months after notice by the Secretary of the Interior, and to be paid for as and when said electrical energy is ready for delivery. If said plant or plants are operated by the Government, then said electrical energy shall be delivered on the terms and charges provided in the general regulations for delivery of electrical energy at the switchboard to municipal corporations and political subdivisions."

Mr. SWING. Mr. Chairman, the committee amendment just reported by the Clerk has been recalled by the committee, and we wish to have that amendment voted down.

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was rejected.

Mr. SWING. Mr. Chairman, on page 13, line 3, there is found the date June 1, 1928, the time limit to permit Arizona, Nevada, and California to reach a three-State compact. That time is too close. I move to amend by striking out that date and inserting "January 1, 1929." I hope we may reach an agreement by that time.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. SWING: Page 13, line 3, strike out "June 1, 1928," and insert "January 1, 1929."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

SEC. 9. That all lands of the United States found by the Secretary of the Interior to be practicable of irrigation and reclamation by the irrigation works authorized herein shall be withdrawn from public entry. Thereafter, at the direction of the Secretary of the Interior, such lands shall be opened to entry, in tracts varying in size but not exceeding 160 acres, as may be determined by the Secretary of the Interior, in accordance with the provisions of the reclamation law, and any such entryman shall pay an equitable share in accordance with the benefits received, as determined by the said Secretary, of the construction cost of said canal and appurtenant structures; said payments to be made in such installments and at such times as may be specified by the Secretary of the Interior, in accordance with the provisions of the said reclamation law, and shall constitute revenue from said project and be covered into the fund herein provided for: *Provided,* That all persons who have served in the United States Army, Navy, or Marine Corps during the war with Germany, the war with Spain, or in the suppression of the insurrection in the Philippines, and who have been honorably separated or discharged therefrom or placed in the Regular Army or Navy Reserve, shall have the exclusive preference right for a period of three months to enter said lands, subject, however, to the provisions of subsection c of section 4, act of December 5, 1924 (43 Stat. L. 702); and also, so far as practicable, preference shall be given to said persons in all construction work authorized by this act: *Provided further,* That in the event such an entry shall be relinquished at any time prior to actual residence upon the land by the entryman for not less than one year, lands so relinquished shall not be subject to entry for a period of 60 days after the filing and notation of the relinquishment in the local land office, and after the expiration of said 60-day period such lands shall be open to entry, subject to the preference in this section provided.

Mr. BURTNESS. Mr. Chairman, I move to strike out the last word. This section has to do with the withdrawal of lands from entry by the Secretary of the Interior, but following the provision for the withdrawal, it provides further that thereafter, at the direction of the Secretary of the Interior, such lands shall be open to entry in tracts varying in size, and so forth. I am interested in not seeing a large increase of agricultural lands put to use at a time when one of the difficulties with agriculture is the surplus of crops now being raised. Could the gentleman in charge of the bill tell me what is contemplated with reference to the time when the lands will be thrown open subject to entry under the reclamation act?

Mr. SWING. It would be impossible to reclaim a single acre of this land under 10 years from the time that this bill becomes a law, because it will take that long to construct the works herein authorized. Thereafter, in my opinion, there will be no land reclaimed until Congress sees fit to authorize a reclamation project and authorize appropriations for and the distribution of the systems which are included in this bill.

Mr. BURTNESS. That was the general understanding I had, but I am glad to get the assurance of the gentleman from

California with reference to it. Can it be safely said, in the gentleman's opinion, that in so far as the actual putting of more agricultural land into use is concerned, there is no chance of that being done in less than 10 years and possibly not for 15 or 20 years?

Mr. SWING. That is correct.

Mr. SMITH. Even then the Congress will have to authorize the works.

Mr. BURTNESS. That would be reclamation project?

Mr. SMITH. Yes.

Mr. BURTNESS. There is no limitation in the bill as to when the Secretary of the Interior could throw the lands open to entry.

Mr. SMITH. Under the present policy they do not open the land to entry until the water is upon the land.

Mr. ARENTZ. The land will not grow anything without water.

Mr. BURTNESS. But have we any assurance that as soon as the works now contemplated by the bill are available, every interest in that country will not come to Congress with a view of having reclamation projects done at the earliest possible date and start a tremendous propaganda for the development of this entire section, regardless of what the agricultural situation may be at the time?

Mr. ARENTZ. As long as we have the gentleman from Michigan [Mr. CRAMTON], the gentleman from New York [Mr. SNELL], and the gentleman from Connecticut [Mr. TILSON], who have made definite statements on the floor that reclamation must cease for the time being, we are not apt to have anything new in the way of reclamation for several years to come.

Mr. BURTNESS. I am glad to have that assurance. It would be a big mistake to make large agricultural development possible at this time. Your statements will make it much easier for me to vote for the bill.

Mr. DOUGLAS of Arizona. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from North Dakota has expired. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

Mr. CRAMTON. Mr. Chairman, I offer an amendment on page 14, line 17, to strike out "160 acres" and insert in lieu thereof "80 acres."

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 14, line 17, strike out "160" and insert in lieu thereof "80."

Mr. CRAMTON. Mr. Chairman, in connection with that, I wish to say that I offer the amendment in part in order to get the information I desire, and with satisfactory assurances I may not urge the amendment. But in that country, southern California and Arizona, 40 acres is oftentimes sufficient, and 80 acres almost always is all that one settler can take care of; and to permit 160 acres when 40 acres is sufficient is simply giving to the bill an element of land speculation and defeating the purpose of reclamation, that of getting actual settlers on the land.

Now, can the gentleman tell me something about what is meant by "tracts varying in size"? Will there be much of it in 160-acre tracts?

Mr. SWING. I will say to the gentleman that a soil survey has been made of the public lands which are withdrawn by section 9, and it is found that most of the land is intensely fertile. There is a limited area, however, which is spotted with alkali, and on that it would require more than on other land to support an average family.

The intention of the Secretary of the Interior is to have the land platted when occasion arises for it to be opened and the land divided into tracts of sufficient size to support an average family. The majority of the plats will be 40 acres, and some 80 acres, and others 160 acres.

Mr. CRAMTON. With that explanation, Mr. Chairman, I will withdraw my amendment.

The CHAIRMAN. Without objection, the amendment will be withdrawn.

There was no objection.

Mr. CRAMTON. I have been absent from the Chamber in a conference committee, and while I am on my feet I may say that I have noted that section 7, the paragraph which permits such portions of the structures to be transferred to districts or other agencies in the United States having a beneficial interest therein, my understanding is that the gentleman's theory is that that means a governmental agency?

Mr. SWING. Yes; a governmental agency.

Mr. CRAMTON. Not a private agency?

Mr. SWING. No.

Mr. CRAMTON. There will be no opportunity for turning these works over to a private corporation?

Mr. SWING. None that I know of.

Mr. CRAMTON. The gentleman's understanding of the language is to that effect?

Mr. SWING. Yes.

Mr. CRAMTON. Mr. Chairman, I will ask unanimous consent to return to page 11 for the purpose of offering an amendment, to insert, after the word "other," in line 2, the words "governmental or public."

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to return to section 7 for the purpose of offering an amendment. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Michigan [Mr. CRAMTON].

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 11, line 2, after the word "other," insert the words "governmental or public."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Michigan.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 13. This act shall be deemed a supplement to the reclamation law, which said reclamation law shall govern the construction, operation, and management of the works herein authorized, except as otherwise herein provided.

Mr. DOUGLAS of Arizona. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DOUGLAS of Arizona: Page 19, after section 13, insert a new section as follows:

"SEC. 13. No construction shall be commenced until there shall have been negotiated with the Republic of Mexico a treaty relative to the allocation of the waters of the Colorado River to Mexico, and relative to a restriction of the amount of water to which Mexico shall acquire title, and until such treaty shall have been ratified and approved by the Senate of the United States and the proper ratifying authority of the Republic of Mexico."

Mr. LAGUARDIA. Mr. Chairman, I make a point of order on that.

The CHAIRMAN. The point of order is overruled. This is a limitation on the power of the Secretary.

Mr. LAGUARDIA. Mr. Chairman, this is an appropriation bill.

The CHAIRMAN. The gentleman from Arizona is recognized.

Mr. DOUGLAS of Arizona. Mr. Chairman and gentlemen of the committee, this amendment is one of the most important ones that can be added to the bill, if the interests of the United States are to be protected.

There is now no treaty with the Republic of Mexico relative to the allocation of the waters of the Colorado River. All of the minimum flow of the Colorado River has been appropriated. Mexico can therefore apply to beneficial use and acquire title to no more of the waters of the Colorado River unless there be constructed a dam. Am I correct in this? I am sure I am. I shall quote Dr. Elwood Mead, who appeared before the Committee on Irrigation and Reclamation on May 16, 1928, in which the following colloquy occurred. I said:

Mr. DOUGLAS. Of course all of the minimum flow of the Colorado has been appropriated.

Doctor Mead replied:

Now you are coming into a thing.

I said:

That is a legal question. The courts will have to determine; but approximately that is true.

Doctor MEAD. Yes.

So that the first point in my argument is approximately true. Inasmuch as the minimum flow has been appropriated, title to additional waters can not now be acquired in Mexico.

What will be the situation if the dam be constructed? On page 23, of the ninth volume of the Weymouth report, upon which this bill is predicated, there is the statement that a minimum of 10,010,000 acre-feet of water must be discharged from Boulder Dam in order that there be developed the power upon which the financial set-up of the Director of the Bureau of Reclamation is predicated. Doctor Mead did not deny this. I refer you again to the hearings before the Committee on Irrigation and Reclamation of May 16, 1928. So it is estab-

lished that there must be withdrawn from the dam 10,010,000 acre-feet of water to develop power. If that amount of water be decreased then the whole financial program is upset and the project ceases to become, even admitting the dogmatic statements of the proponents, financially solvent.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. DOUGLAS of Arizona. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. The gentleman from Arizona asks unanimous consent to proceed for five additional minutes. Is there objection?

There was no objection.

Mr. DOUGLAS of Arizona. How much of the 10,000,000 acre-feet of water can be applied to beneficial use within the United States? Not more than 5,000,000 acre-feet under existing projects, and including the construction of the Boulder Dam. The proof of that is that in the Senate bill there is an amendment which limits California to 4,600,000 acre-feet of water.

The only other State that can use any water is Arizona. The amount of land under reclamation and irrigation in Arizona to-day through the use of waters from the Colorado is practically negligible. So the statement that not more than 5,000,000 acre-feet of water can be used in this country is accurate. That means that there are 5,000,000 surplus acre-feet of water which must be disposed of. That surplus may be disposed of in one of two places, either in the Salton Sea or Mexico. It can not be disposed of in the Salton Sea. I refer the committee to page 271 and page 272 of the hearings on H. R. 5773, in which the committee will find a contract between the Imperial irrigation district and the Southern Pacific Railroad, which limits the stage to which the Imperial irrigation district can permit the surface of the Salton Sea to rise. I refer the gentlemen of this committee to the report of the United States Geological Survey, made by Mr. George F. Holbrook, the assistant engineer of the United States Geological Survey, dated July 18, 1927, in which he says, and this is a quotation:

> The contract between the Southern Pacific Co. and the Imperial irrigation district, granting a flowage right of way to the district, will be an impediment that will have to be removed before the irrigation district can waste any more water into the Salton Sea at present.

Then he goes on to state what the evaporation is. This water can not be disposed of in the Salton Sea because to do so would result in a violation of that contract. In the second place, to do so would result in a gradual inundation of the Imperial Valley.

Dr. Elwood Mead, in his testimony before the committee on May 16, 1928, in reply to my question as to what was to be the disposition of the 10,010,000 acre-feet, replied:

> Well, the water goes to meet the needs of the land already irrigated and the lands proposed to be irrigated in Arizona and California, and the rest of it goes down to Mexico.

The CHAIRMAN. The time of the gentleman from Arizona has again expired.

Mr. DOUGLAS of Arizona. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. The gentleman from Arizona asks unanimous consent to proceed for five additional minutes. Is there objection?

There was no objection.

Mr. DOUGLAS of Arizona. In other words, Dr. Elwood Mead himself testified that the water had to go to Mexico.

Now, let us see what Mr. Herbert Hoover said on page 614 of the hearings, United States Senate, Colorado River Basin, 1925:

> I think if we stabilize the river at all it will be likely to increase the flow into Mexico during the low-water season.

Then he went on to say that water could be held back in a dam if there were storage capacity, but the minute the water is held back then power is not developed and the project ceases to become a financially solvent one.

Mr. WINTER. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. WINTER. If the water does proceed down the river to Mexico it will improve navigation, will it not?

Mr. DOUGLAS of Arizona. I will come to that point, Judge, in just a second. I am glad the gentleman has asked the question.

The Federal Power Commission in its letter to the chairman of the committee, dated March 24, 1924—this is not the letter of the Secretary of the Interior dated March 17, 1924—stated very explicitly, "The regulation of the Colorado River to the extent proposed by the Boulder Canyon Dam will produce in the lower river a minimum discharge far in excess of present irrigation requirements in the United States. The surplus waters will pass into Mexico and will undoubtedly be put to use for irrigation there."

Mr. COHEN. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. COHEN. May I ask, is that land in Mexico suitable for raising cotton?

Mr. DOUGLAS of Arizona. I am coming to that in a moment. So that it is established that the surplus waters, at least 5,000,000 acre-feet, must flow into Mexico.

Now, how is it to be applied to beneficial use there? Dr. Elwood Mead, before the Committee on Irrigation on May 16, 1928, admitted there were at least 600,000 acres of land owned by one company on the delta to which water could be very easily, very speedily, and cheaply and immediately applied. He said, "I think I can make a stronger statement for a treaty than you can."

In addition to this 600,000 acres there are approximately 500,000 acres not owned by this company and more on the east bank of the Colorado. Let me explain that the delta is broad and flat and that water can be applied to beneficial use very easily, very quickly, and very cheaply, and that Dr. Elwood Mead has admitted this to be the case.

There is one further statement I want to make about this phase of the matter. The 5,000,000 acre-feet of water that flows to Mexico is ample to irrigate a minimum of 1,000,000 acres of land. Bear this in mind.

Now, what is to be grown on the delta of the Colorado? I have heard the statement that the crops grown are not competitive, but I refer the members of the committee to a pamphlet written by the California Development Association in 1926, in which it is stated that cotton will be the chief crop on the delta. Now, you can call this Power Trust propaganda if you choose, but it is the truth. This pamphlet further stated that the yield per acre on the delta was one bale to the acre.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. DOUGLAS of Arizona. Mr. Chairman, I ask unanimous consent to proceed for an additional five minutes.

Mr. SWING. Mr. Chairman, I want to be fair with my opponent, and I think I have been fair. There are men here at great inconvenience to themselves who expect to take a train from town but are waiting to vote upon this measure, which is considered to be of national importance.

Mr. DOUGLAS of Arizona. Agreed; and if this question of Mexico is not one of national importance, I do not know what is.

Mr. SWING. I wonder if the gentleman can not close in two minutes?

Mr. DOUGLAS of Arizona. I shall close just as rapidly as I possibly can.

Mr. SWING. I would not object to the gentleman having two minutes, but I must object to five minutes.

The CHAIRMAN. Objection is heard. The Clerk will read.

Mr. DOUGLAS of Arizona. I beg the Chair's pardon.

The CHAIRMAN. There is an amendment pending.

Mr. FRENCH. Mr. Chairman, I want five minutes at some time on this proposition. I do not want to get ahead of the gentleman from Arizona [Mr. DOUGLAS], but at some time I would like about five minutes on the matter.

Mr. DOUGLAS of Arizona. Mr. Chairman, I ask unanimous consent to proceed for an additional two minutes.

The CHAIRMAN. Without objection, the gentleman is recognized for two additional minutes.

There was no objection.

Mr. DOUGLAS of Arizona. I have conclusive evidence that the yield per acre in the Salt River Valley and on the Yuma project in Arizona is four-tenths of a bale per acre.

This 5,000,000 acre-feet of water is going to be applied to beneficial use in Mexico. It is going to bring in at least 1,000,000 acres of land, and as a result of this, members of the committee, you are going to find approximately 800,000 bales of cotton, if not more, brought upon the market. I submit to the members of the committee and to the Members of the House if you pass the amendment you will be protecting not only the seven States of the Colorado River Basin against the day when they can use this water but you will also be protecting the cotton growers of the South who have been pleading for relief. You can not give them relief and at the same time reject this amendment and take away such relief.

Mr. SMITH. Mr. Chairman, may I ask the gentleman a question? Was the gentleman here when the gentleman from

Alabama [Mr. BANKHEAD] discussed the very proposition he has mentioned?

Mr. DOUGLAS of Arizona. I was, sir.

Mr. SMITH. Did the gentleman hear the report which he made after being out there personally, and also the report made by an expert who went out there?

Mr. DOUGLAS of Arizona. Not an expert, Mr. Chairman, and not Mr. BANKHEAD.

Mr. SWING. Mr. Chairman, we have had during the consideration of this bill repeated and various proposals made with reference to tying up this project to some immovable proposition. We have had it proposed to refer the matter to the Department of War, we have had it proposed to refer it to the Department of Justice, and now, and most extraordinary of all, it is proposed to leave the project in the hands of Mexico, so that Mexico could prevent the project from being begun until she sees fit to sign a treaty. Why should we leave this matter, which is so vital and so necessary to the lives and property of citizens of the United States to the decision of Mexico? Why should we leave the time when this work is to begin to be determined and fixed by a foreign country which is adversely interested in having the project constructed? [Applause.]

Mr. FRENCH. Mr. Chairman, it is a matter of the greatest concern whether or not in passing this bill we propose something that in another 15 or 25 years will be a source of possible international dispute between this country and Mexico.

If I understood the gentleman from Arizona [Mr. DOUGLAS], the power to be developed at Boulder Dam will require a flow of 10,000,000 acre-feet, and of this amount 5,000,000 acre-feet will not be used within the United States during the near future. Economic demand will not justify it.

This surplus water, I understand, will flow across the boundary line into Mexico. There, in all probability, it will be used for reclamation of arid lands that can produce citrus fruits, cotton, and a variety of other products. These lands will be settled with people. Improvements will be made. Homes will be established and wealth will be added from year to year.

But we are told that such development will be at the peril of the people of Mexico; that the water used will be water that we have stored and are letting run away pending the day we shall want to apply it to our own lands. We are told that when that day will arrive we may turn the water into our canals, irrigate lands within the United States, and in doing so withdraw, if necessary, all surplus water created by Boulder Dam and flowing into Mexico. We are told we may do this even though it mean the turning back into desert of the lands below the boundary line.

Gentlemen, if the condition shall come that I have outlined as to use of surplus water in the Republic of Mexico, I submit that after such use, citizens of the United States will not be able to refuse continuation of that supply of water by diverting it to lands north of the boundary line. Mexico will not concede that right, and in spite of fine theories upon the part of some who assert our right, my judgment is it will not be done.

If the right of the United States prevail it will be because the United States will be more powerful than Mexico. If we can avoid such a situation we want to do it. I would like to ask the gentleman from Arizona whether or not in another 15 or 25 years, in his judgment, the economic situation within Arizona and California and the area below where Boulder Dam will be built will be such as probably to justify the use of 5,000,000 acre-feet of water that he says can not now be used because of the economic conditions within the United States.

Mr. DOUGLAS of Arizona. I will be glad to answer the gentleman.

Mr. FRENCH. Can the gentleman answer briefly?

Mr. DOUGLAS of Arizona. Fifteen years from now the 5,000,000 acre-feet of water will be appropriated in Mexico and we will never be able to get it back unless we go to war. [Applause.]

Mr. FRENCH. Does the gentleman believe that after 15 or 25 years there are areas within the United States where the water could be used economically and would be used if we did not now develop Boulder Dam and turn the water into Mexico?

Mr. DOUGLAS of Arizona. If the water was available I will say that within 50 years or some time in the future that water would be of extreme value to the seven States.

Mr. FRENCH. Let me ask the gentleman from California [Mr. SWING] the same question. Does he think that within the next 15 or 50 years there will be a demand for the 5,000,000 acre-feet of surplus water within the United States?

Mr. SWING. There will be. There is no such thing as an international water right and every Secretary of State who has passed on it—and there have been three or four who have done so—have held that Mexico acquires no water rights by use of water in that country pending the time that we get ready to use it ourselves.

Mr. FRENCH. May I ask this question? Does the gentleman think that within about 15 years Mexico probably will be able to use the 5,000,000 acre-feet of surplus water if we do not use it within that time?

Mr. SWING. Mexico will try to use all she can, but she can not get it except through a diversion in the United States which the United States can always control. I have a statement by Senator HAYDEN, in which he brings out by the examination of Mr. Stabler, of the Geological Survey, that below the boundary line there is no place where a diversion dam could be put in—that there is no rock bank on either side to which a dam could be tied, and that diversion would be impossible, because if you put in a dam in Mexico the water would go around either end of it, and therefore the diversion must be in the United States, and the United States would control it.

Mr. DOUGLAS of Arizona. Then why did you go below the boundary line in 1905 and divert the water?

Mr. SWING. They did it with disastrous results, and they will never do it again. That was a warning that should and would prevent them from doing it again. [Applause.]

Mr. DOUGLAS of Arizona. It is now revetted with ample rock.

Mr. FRENCH. Does the gentleman recognize that the 5,000,000 feet of water that some times we hope to utilize in the United States will be appropriated by lands in Mexico; and if so, how will we recover the water when it is being utilized by Mexico for reclamation purposes?

Mr. SWING. Again, I say that there is no such thing as Mexico's appropriation of the waters of the Colorado River in the sense that we use the word "appropriation" in the United States; namely, the initiation of water rights. Judson Harmon, one of the great Attorney Generals, stated it to be fundamental that Mexico at no time had any legal claim to the water that arose in and flowed through the United States, no matter whether it had been put to a prior beneficial use in Mexico or not.

The CHAIRMAN. The time of the gentleman from Idaho has expired.

Mr. FRENCH. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SMITH. May I invite the gentleman's attention to the following words on the first page of the bill:

> Providing for storage and delivery of the waters thereof for reclamation of public lands and other beneficial uses within the United States.

Mr. DOUGLAS of Arizona. How can you hold water back; how can you legislate against the law of gravity? You may have it in the bill, but you can not enforce it.

Mr. OLIVER of Alabama. Will the gentleman yield?

Mr. FRENCH. I yield.

Mr. OLIVER of Alabama. The gentleman has raised a very interesting legal question. Yet I do not think anyone will dispute the soundness of this statement, that if the Government of the United States should build the dam as proposed, and by reason of the building of the dam the flow of the stream is greatly increased, as stated by the gentleman from Arizona, and such increased flow can be withheld or released and in such quantity and at such times as the Government may determine, then the increased flow would be artificial, and any use of such increased flow would be permissive and could and will not give to such user any right to the use of such increased flow which could not be withdrawn and disused by the Government without violating any right, legal or moral, of such permissive user.

The case is quite different when the normal flow of the stream has been appropriated from where it is sought to claim the benefit of an increased flow by reason of permission from the Government which in the exercise of a sovereign right has caused an increased flow, which it can control, regulate, and withdraw at pleasure.

Mr. FRENCH. Mr. Chairman, I shall decline to yield further until I may make a short statement. The very plan that is proposed and the order of development under this bill produce a situation of profound gravity. It does not seem to me that it has been met or answered by the proponents of the bill. I recognize the general theory that my colleague from Alabama [Mr. OLIVER] has advanced, a theory that is advanced also by the proponents of the bill upon this side of the House, but if we do not utilize the water within the United States that we may provide be developed and stored, and if we

permit a condition to go on for years until the surplus water will be utilized for the reclamation of a half million or a million acres of land in Mexico for a period of 10 or 15 or 20 years, then in the conscience of the forum of the world the right of the United States to recover those waters will be challenged.

The doctrine that right to water attaches by use will be urged, and, after so long a time, I doubt that the world would approve the United States' withdrawing water from areas in Mexico that at that time will be supplying life to lands where there will be homes and people, gardens and orchards, schools and churches. It seems to me that that problem ought to be met and met now. [Applause.]

Mr. SMITH. Mr. Chairman, will the gentleman yield. The problem referred to is met in the bill.

Mr. FRENCH. The gentleman interrupts to say that the problem is met in the bill. I do not believe it is. I do not believe anyone in defense of the bill has met that question directly and has shown how we can recover the water other than upon the general theory laid down by my friend from Alabama [Mr. OLIVER], and which I say after a lapse of years of use will not stand before the conscience of the world.

Mr. SMITH. Mr. Chairman, the situation which the gentleman portrays is all an argument in favor of the early consideration of this bill for the reason that the people who own the land in Mexico along the border, and most of it is owned by American citizens, are placing that land under cultivation just as rapidly as possible, at the rate, it is stated, of nearly 30,000 acres a year. They already have over 200,000 acres under cultivation there, and there are 600,000 acres more susceptible of irrigation. They are eager to get this additional land under cultivation so that they can assert their claim to the water, because they have used it. The owners of this land want action on the bill delayed.

Mr. FRENCH. Oh, my colleague is referring to the normal flow, and already the surplus water has been taken very largely in Mexico. I am now concerned with the artificial flow that this project will create, over and above any present use. A surplus flow that ought to be used within the United States.

The CHAIRMAN. The time of the gentleman from Idaho has expired. The question is on the amendment offered by the gentleman from Arizona.

The question was taken; and on a division (demanded by Mr. DOUGLAS of Arizona) there were—ayes 53, noes 62.

Mr. DOUGLAS of Arizona. Mr. Chairman, I demand tellers.

Tellers were ordered; and the Chair appointed Mr. DOUGLAS of Arizona and Mr. SMITH to act as tellers.

The committee again divided; and the tellers reported—ayes 62, noes 106.

So the amendment was rejected.

The Clerk read as follows:

SEC. 14. The Secretary of the Interior is authorized and directed to make investigation and public reports of the feasibility of projects for irrigation, generation of electric power, and other purposes in the States of Arizona, Colorado, New Mexico, Utah, and Wyoming for the purpose of making such information available to said States and to the Congress, and of formulating a comprehensive scheme of headwater control and the improvement and utilization of the water of the Colorado River and its tributaries. The sum of $250,000 is hereby authorized to be appropriated from said Colorado River Dam fund, created by section 2 of this act, for such purposes.

Mr. MOORE of Virginia. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Virginia: Page 19, line 14, after the section add a new section, as follows:

"The Secretary of the Interior shall annually submit to Congress a report of the transactions had in and pertaining to the administration of this act."

Mr. SWING. Mr. Chairman, I am very glad to accept that amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia.

The amendment was agreed to.

Mr. TAYLOR of Colorado. Mr. Chairman, I ask unanimous consent to return to section 5 for the purpose of offering a brief amendment.

The CHAIRMAN. Is there objection?

Mr. LEATHERWOOD. Mr. Chairman, reserving the right to object, on what subject?

Mr. TAYLOR of Colorado. It is a clarifying amendment.

Mr. DOUGLAS of Arizona. Mr. Chairman, I reserve the right to object.

The CHAIRMAN. The Clerk will report the proposed amendment.

The Clerk read as follows:

Amendment offered by Mr. TAYLOR of Colorado: Page 6, line 22, after the word "service" strike out the period and insert: "and shall conform to paragraph (a) of section 4 of this act."

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMITH. Mr. Chairman, I offer the following committee amendment as a new section.

The CHAIRMAN. The gentleman from Idaho offers an amendment, which the Clerk will report.

The Clerk read as follows:

After the amendment of the gentleman from Virginia [Mr. MOORE], just adopted, insert a new section as follows——

Mr. DOUGLAS of Arizona (interrupting the reading). Mr. Chairman, is this amendment to section 15?

The CHAIRMAN. It is proposed as a new section.

Mr. DOUGLAS of Arizona. I have an amendment which I desire to offer to section 15.

The CHAIRMAN. To the section 15 that is made up of the Moore amendment, or to section 15 providing for the title of the act?

Mr. DOUGLAS of Arizona. I understood from the Chair that this was to be section 16.

The CHAIRMAN. Yes; inasmuch as a new section 15 has just been adopted. The Clerk will report the amendment offered by the gentleman from Idaho.

The Clerk read as follows:

Amendment offered by Mr. SMITH: After the amendment just adopted, offered by Mr. MOORE of Virginia, insert a new section to be known as section 16, to read as follows: "Nothing in this act shall be construed as a denial or recognition of any right in the Republic of Mexico to use the waters of the Colorado River system."

Mr. LEATHERWOOD. Is that the exact language?

Mr. SMITH. Yes.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk concluded the reading of the bill.

Mr. JOHNSON of Washington. Mr. Chairman, I ask unanimous consent to return to page 2 for the purpose of perfecting the text.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to return to section 1 for the purpose of offering a perfecting amendment. Is there objection to the gentleman's request?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Washington.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Washington:

Page 2, line 11, after the word "*Provided*," insert the word "*further*," so that it will read "*Provided further*."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. DOUGLAS of Arizona. Mr. Chairman, I rise simply to say this, that I believe this bill is unsound in every way; it is rotten to the core. I am going to offer a motion to recommit the bill to the Committee on Irrigation and Reclamation.

Mr. SMITH. Mr. Chairman, I move that the committee rise and report the bill to the House.

The CHAIRMAN. Without objection, before the committee rises, the Clerk will be authorized to make such changes in the numbering of the sections as are made necessary by the amendments that have been agreed to.

There was no objection.

The CHAIRMAN. Under the rule the committee will now rise and the bill will be reported by the committee to the House.

Accordingly the committee rose; and the Speaker having resumed the Chair, Mr. LEHLBACH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

Mr. DOUGLAS of Arizona. Mr. Speaker, I move to recommit the bill H. R. 5773 to the Committee on Irrigation and Reclamation, and on that I move the previous question.

The SPEAKER. The Clerk will report the motion submitted by the gentleman from Arizona.

The Clerk read as follows:

Mr. DOUGLAS of Arizona moves to recommit the bill H. R. 5773 to the Committee on Irrigation and Reclamation.

The SPEAKER. On that the gentleman from Arizona moves the previous question.

The previous question was ordered.

The SPEAKER. The question is: "Shall the bill be recommitted"?

The question was taken, and the Speaker announced that the noes appeared to have it.

Mr. DOUGLAS of Arizona. Mr. Speaker, I demand the yeas and nays.

The SPEAKER. The yeas and nays are demanded. As many as are in favor of taking the vote by yeas and nays will rise and stand until they are counted. [After counting.] Sixty-five Members have arisen; a sufficient number.

The yeas and nays were ordered.

The SPEAKER. As many as favor the motion to recommit will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 137, nays 219, answered "present," 2, not voting 73, as follows:

[Roll No. 88]

YEAS—137

Ackerman	Dominick	Kiess	Rogers

Connery	James	Robsion, Ky.	
Corning	Johnson, Ind.	Sabath	
Deal	Johnson, Okla.	Sears, Fla.	
De Rouen	Jones	Spearing	

So the motion to recommit was rejected.

The Clerk announced the following additional pairs:

On this vote:

Mr. England (for) with Mr. Spearing (against).
Mr. W. T. Fitzgerald (for) with Mr. Reid of Illinois (against).
Mr. Eaton (for) with Mr. Clancy (against).
Mr. Snell (for) with Mr. Bankhead (against).
Mr. Temple (for) with Mr. Wurzbach (against).
Mr. Frothingham (for) with Mr. James (against).
Mr. Whitehead (for) with Mr. O'Connell (against).
Mr. Corning (for) with Mr. Robsion of Kentucky (against).
Mr. Hare (for) with Mr. De Rouen (against).

Until further notice:

Mr. Begg (for) with Mr. Oldfield (against).
Mr. Butler (for) with Mr. Hudspeth (against).
Mr. Yates (for) with Mr. Sullivan (against).
Mr. Golder (for) with Mr. Drane (against).
Mr. Knutson (for) with Mr. Garrett of Tennessee (against).
Mr. Purnell (for) with Mr. Kunz (against).
Mr. Wyant (for) with Mr. Peery (against).
Mr. Anthony (for) with Mr. Sears of Florida (against).
Mr. Estep (for) with Mr. Carley (against).
Mr. Zihlman (for) with Mr. Deal (against).
Mr. Vincent of Michigan (for) with Mr. Connery (against).
Mr. Bowman (for) with Mr. Hammer (against).
Mr. Guyer (for) with Mr. Jones (against).
Mr. Kendall (for) with Mrs. Norton (against).
Mr. Peavey (for) with Mr. Quayle (against).
Mr. Updike (for) with Mr. Johnson of Oklahoma (against).
Mr. White of Kansas (for) with Mr. Underwood (against).
Mr. Strother (for) with Mr. Yon (against).
Mr. Menges (for) with Mr. Fisher (against).
Mr. Palmer (for) with Mr. Bulwinkle (against).
Mr. Johnson of Indiana (for) with Mr. Connally of Texas (against).
Mr. Hughes (for) with Mr. Blanton (against).
Mr. Doutrich (for) with Mr. Dickstein (against).
Mr. Burdick (for) with Mr. Kerr (against).
Mr. Boies (for) with Mr. Sabath (against).
Mr. Beck of Wisconsin (for) with Mr. McSweeney (against).

Mr. FROTHINGHAM. Mr. Speaker, on this matter I am paired with the gentleman from Michigan, Mr. JAMES, so I withdraw my vote. If he were here, he would vote "nay" and I would vote "aye."

Mr. DOUGLASS of Massachusetts. Mr. Speaker, my colleague Mr. CONNERY, of Massachusetts, is absent on account of illness in his family. If he were present, he would vote "nay."

Mr. SNELL. Mr. Speaker, I voted "aye," but I have a pair with the gentleman from Alabama, Mr. BANKHEAD. I desire to withdraw my vote and answer "present."

Mr. KNUTSON. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. KNUTSON. I was not in the Hall when my name was called.

The SPEAKER. The gentleman does not qualify.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

Mr. LEATHERWOOD. Mr. Speaker, I demand the yeas and nays.

The SPEAKER. The gentleman from Utah demands the yeas and nays. As many as favor ordering the yeas and nays will rise and stand until counted. [After counting.] Four Members have risen, not a sufficient number.

So the yeas and nays were refused.

The question was taken, and the bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SMITH, a motion to reconsider the vote whereby the bill was passed was laid on the table.

CONFERENCE REPORT—THE REVENUE BILL

Mr. HAWLEY. Mr. Speaker, I present a conference report on H. R. 1, an act to reduce and equalize taxation, provide revenue, and for other purposes, for printing under the rule.

CONFERENCE REPORT—POSTAL RATES

Mr. GRIEST. Mr. Speaker, I present a conference report on House bill 12030, to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes, for printing under the rule.

BOULDER DAM

Mr. TUCKER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the Boulder Dam bill.

The SPEAKER. Without objection, it is so ordered.

Mr. TUCKER. Mr. Speaker, the building of the Boulder Dam at Boulder Canyon is one of the most stupendous projects contemplated by man that has ever been undertaken in the world. It stirs the imagination and stimulates the pride of every American who loves his country and who is a believer in the genius of the American people. A dam whose object is to impound 26,000,000 acre-feet of water, 550 feet high, and carrying with it the hope of great benefits to thousands must appeal to every patriotic citizen of America. It is said to be a national project by some because of the height of the dam, the amount of water impounded, and the variety of its utilities; but it can not be a national project, however great or expensive the project, unless its purposes naturally flow from some specific or implied grant of power to the Congress of the United States in the Constitution. Its size can not make it national. The Constitution alone can. Believing as I do that its objects can find shelter under no grant of power to Congress I can not support the bill; but believe it should be relegated to the seven great States whose progressive people have developed and presented this plan and who alone will benefit from it. Read the objects of the bill as set forth in the first few lines:

Be it enacted, etc., That for the purpose of controlling the floods, improving navigation, and regulating the flow of the lower Colorado River, providing for storage and delivery of the waters thereof for reclamation of public lands and other beneficial uses within the United States, and for the generation of electrical energy as a means of making the project herein authorized a self-supporting and financially solvent undertaking, the Secretary of the Interior * * * is hereby authorized to construct, operate, and maintain a dam—

And so forth.

Here are six proposed objects: (1) Controlling the floods; (2) improving navigation; (3) regulating the flow of the lower Colorado River; (4) providing for storage and delivery of the waters thereof for reclamation of public lands; (5) and other beneficial uses within the United States; (6) the generation of electrical energy as a means of making the project herein authorized a self-supporting and financially solvent undertaking.

Let us examine each of these proposed objects and see if they are included in any grant of power to Congress in the Constitution, or whether any one of them may be regarded as an implied power bona fide appropriate to the end—that is, to an object granted in an express power.

First. For the purpose of controlling the floods: This means, of course, the floods in the Colorado River. The only power in the Constitution from which the control of floods would naturally come is the power to regulate commerce, and it would seem properly to rest there because the Supreme Court has recognized from its earliest decisions that the power to regulate commerce includes the right to improve navigation; for the regulation and improvement of navigation have been declared to be naturally and properly parts of the power to regulate commerce. So that the control of floods in the Colorado River, if sought for the purpose of regulating or improving navigation, is a natural and proper implication of power growing out of the commerce power. But Congress has no power to control floods except where such floods may impede or destroy navigation.

Now, the second object, "improving navigation of the Colorado River," and the third object for "regulating the flow of the lower Colorado River"—for navigation purposes—would show these first three objects of the bill to rest safely under the commerce clause of the Constitution if there was nothing else in the bill to contradict the foregoing propositions.

These objects of the bill, as stated in the above three propositions, are found to have no right to claim to be constitutional under the commerce power of the Constitution. The Colorado River compact made between the seven States—California, Nevada, Arizona, Colorado, Utah, New Mexico, and Wyoming—ratified between these States on the 24th day of November, 1922, is made a part of this bill. Article IV of that compact contains the following:

(a) Inasmuch as the Colorado River has ceased to be navigable for commerce and the reservation of its waters for navigation would seriously limit the development of its basin, the use of its waters for purposes of navigation shall be subservient to the uses of such waters for domestic, agricultural, and power purposes. If the Congress shall not consent to this paragraph, the other provisions of this compact shall nevertheless remain binding.

(b) Subject to the provisions of this compact, waters of the Colorado River system may be impounded and used for the generation of electrical power, but such impounding and use shall be subservient to the use and consumption of such water for agricultural and domestic purposes and shall not interfere with or prevent use for such dominant purposes.

It is seen by this article that "the Colorado River has ceased to be navigable for commerce"; and therefore the proponents of the bill in these words, having thus admitted that the river is not navigable, can not invoke the protecting power of the commerce clause, under which the regulation and improvement of navigation would be permitted; and they are estopped, under the well-known equitable principle, by this statement from claiming the commerce clause as their ground for invoking the power of Congress in this matter.

In the recent great struggle in this House for the control of the floods in the Mississippi River the sole ground relied upon by the advocates of the bill was the power of the Federal Government under the commerce clause to regulate, improve, and maintain navigation. Not a dollar of money was carried in that bill except for such purpose. No money was carried to reinstate those brave but unfortunate people for their losses by the flood, for the bill was alone intended to restore and keep open the navigation not only of the Mississippi River but of those great tributaries that were also navigable. Nor can the fact that such work by Congress in keeping open and improving navigation may serve to save individual landowners from the effect of the overflow militate against the right of Congress to exercise such power, for improvement of navigation is the end, while the latter is an incident of the end or object of the power. So that the first three objects above set forth can not claim the sheltering arms of the commerce power, for that power, which by implication carries the controlling of floods and regulating the flow of the Colorado River for navigation purposes, is swept away by the clear and final statement in the same bill that "the Colorado River has ceased to be navigable for commerce."

Under these circumstances the claim of jurisdiction of Congress to pass this bill is, in legal parlance, a fraud upon the Constitution, and before the courts it would share the fate of the child-labor tax law, where it was held that Congress could not use the taxing power by indirection to accomplish another object (regulation of child labor) which was denied to Congress.

Fourth. Providing "for storage and delivery of the waters thereof for reclamation of public lands": Congress has power under Article IV, section 3, of the Constitution—

to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States.

Congress has power under this provision to build a dam for power purposes or to do anything that is needful for the protection and improvement of such lands. It therefore has the power to build a dam to create power to reclaim such lands; but has it the power to build a dam and create an enterprise costing $125,000,000 (far more than these lands could ever be worth) when it is shown that a dam costing $15,000,000 would accomplish the purpose desired? If a $15,000,000 dam will accomplish the desired end, surely a $125,000,000 dam for the same purpose, and no other, would be held unconstitutional as exceeding the powers of Congress to lay taxes and appropriate money. It may be argued that for the accomplishment of other objects of the bill this dam should be built. My analysis of these objects is to show that of the six set forth in this bill

No. 4 is the only one that can claim to have constitutional sanction to justify it. It may be that it would require $125,000,000 outlay to accomplish all the objects in the bill, but my position is that no object stated in the bill has a constitutional standing or the backing of any power in the Constitution except this one, No. 4.

Fifth. And "other beneficial uses within the United States": No gentleman has attempted to show in this discussion under what power of the Constitution beneficial uses within the United States can claim to rest. What sort of beneficial uses? Personal? Public? Private? State? Or national? A veritable Brunswick stew composed of indefinite and unknown ingredients! A Christmas tree of Uncle Sam's for his children, loaded with candied toys of "beneficial uses"! Judge Marshall has well said that any man, in asking at the hands of Congress for relief, must show under what power of the Constitution that relief is asked for. If he can show no such power, his bill must fail.

Sixth. "For the generation of electrical energy as a means of making the project herein authorized a self-supporting and financially solvent undertaking": We have admitted that as to the reclamation of public lands an incidental power permits the creation of electrical power by the United States Government for that purpose. The use of such power is a means to the end; and, as Judge Marshall well says—

> Let the end be legitimate, let it be within the scope of the Constitution (as the public lands are) and all means which are appropriate, which are clearly adapted to that end, which are not prohibited, but consistent with the letter and spirit of the Constitution, are constitutional.

Now, test No. 6 by Judge Marshall's definition. What is the end aimed at by No. 6? For Judge Marshall says—

> the end must be legitimate and within the scope of the Constitution.

The end here is to make a "self-supporting and financially solvent undertaking." What is this undertaking? It is that described in the above six objects as set out in this bill, not one of which except that for reclaiming public lands is "legitimate or within the scope of the Constitution." While a dam for reclaiming these public lands could be built for $15,000,000, the size of the dam and its cost at $125,000,000, instead of $15,000,000, shows its object. As a matter of fact, the building of this great dam for the generation of electrical energy is the main object of this bill. The other objects are but dim satellites around this brilliant star. If the Government of the United States can boldly claim the power as in this bill to build throughout its domain great electrical powers for unconstitutional objects, or for the purpose of making money, or for any other purpose, the Government is indeed a different one from that which its real friends have regarded it. The creation of this power plant for power purposes is the primary purpose and object of this bill, as indicated by Secretaries Work, Weeks, and Wallace, and this has been claimed by some of the advocates of this bill on the floor of the House.

Another view, however, must be suggested here as to these proposed objects growing out of article 4 of the Colorado River compact, which is a part of this bill and which reads:

> (a) Inasmuch as * * * the reservation of its waters (Colorado River) for navigation would seriously limit the development of its basin, the use of its waters for purposes of navigation shall be subservient to the uses of such waters for domestic, agricultural, and power purposes.

This shows that after declaring that the Colorado River has ceased to be navigable, even the little quantity of water left in it shall not have the first call, as to its consumption for navigation, until domestic, agricultural, and power purposes have been exhausted. Domestic and agricultural purposes were not among the objects heretofore considered. Under this view, we are compelled to make another allocation of objects for this bill, namely: First, domestic; second, agricultural; third, power purposes, to which navigation shall be subservient; and then (b) article 4, the generation of electrical power is made subservient to agricultural and domestic purposes, and they are proclaimed the dominant purposes under the Colorado River compact. Therefore, which of these two enumerated lists of objects or purposes of the bill is correct—the six objects which I have heretofore discussed or these last two as found in (b), article 4, of the Colorado River compact? To one looking for constitutional authority for the bill it makes no difference which are regarded as the real objects of the bill, for both are unconstitutional; for if we take "agricultural" and "domestic" objects, as set forth in article 4 of the compact above, as the real objects of the bill, and reject the six hereinbefore considered, where do we find constitutional warrant for the Government of the United States to build a dam for "agricultural" purposes (except so far as it may affect the Government's own property), or for "domestic purposes"? We will search in vain the Constitution to find warrant to legislate for agriculture.

Not only is the word "agriculture" not found in the Constitution of the United States, but on the 18th of August, 1787, the Federal convention having voted upon, and ratified on the 6th of August, that part of the Pinckney plan which embraced the powers of Congress as they now practically exist in the Constitution, had presented to it 20 additional propositions to be added to those already adopted. Among them was one affecting agriculture. Of the 20, a number of them were finally incorporated into the Constitution, but "agriculture" was brought to their special attention in the following resolution which was offered for the consideration of the committee: "To establish public institutions, rewards, and immunities for the promotion of agriculture," and so forth; but this was never heard of afterwards. It was thus specially brought to their attention and rejected; and "domestic purposes" are emphatically reserved to the States by the tenth amendment. So that if as stated in article 4 (b) of the Colorado River compact "agricultural" and "domestic" purposes are declared to be the dominant purposes of this compact, which is a part of this bill, neither one of those purposes can claim the protecting care of any express or implied power of Congress, for these objects of the bill are not, by the Constitution, specifically or impliedly included in any grant to Congress. This enterprise is indeed a great one; but it should be sent back to the States whose people have projected it, and should be built and operated by the seven States whose genius conceived it and whose money should pay for it.

INDEBTEDNESS OF THE UNITED STATES TO THE STATE OF NORTH CAROLINA

Mr. ABERNETHY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the indebtedness of the Government to the State of North Carolina.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. ABERNETHY. Mr. Speaker, it is a duty and a privilege to submit some brief remarks in behalf of the pending bill for the relief of the State of North Carolina (S. 3097).

The bill provides that the Government of the United States shall pay to the State of North Carolina the balance due said State, amounting to the sum of $118,035.69. The bill represents an effort to settle two claims due by the United States to North Carolina and one claim due by North Carolina to the United States, and the amount named in the bill represents the net balance due the State. There can be no controversy as to either of the mutual claims involved, but it may be well to summarize them briefly.

I will first consider the two claims due by the United States.

The first claim arises out of advances made by the State of North Carolina to the Federal Government in aid of the prosecution of the War of 1812. Substantially all of the States at that time comprising the Union made similar advances but differing as to amounts. Final settlements have been made with every State so making advances except the States of North Carolina, New York, and Connecticut. Part of the amount due North Carolina has heretofore been paid and similar partial payments were made to the other States until final settlement was completed, and, as stated, only three States have outstanding balances due them. This class of claims has been thoroughly considered in the past both by House and Senate committees, and by the Treasury Department. Many years ago Congress made settlement with the State of Maryland and directed that the interest be calculated in a certain way which has come to be known as the Maryland rule. It is substantially the same method of calculating partial payments and interest as taught in the schools. The Comptroller General has calculated the amount due the State of North Carolina and found the same to be $167,339.88, as of February 29, 1928. This amount is justly due the State.

The other claim against the United States arises out of the seizure of cotton belonging to the State of North Carolina in 1865 and 1866. This particular claim has been considered by committees of Congress and by the Treasury Department and has always been approved as correct and just. The most complete report on this special claim was submitted to the House by Mr. Bright from the Committee on Claims to the Forty-fourth Congress. It was a wrongful taking by one sovereign of the property of another sovereign and converting the same to its own use, and it is now proposed that the United States shall effect a just settlement. The Comptroller General finds that there is due upon this claim for cotton seized the sum of $96,835.81.

It will be found that the total of these two sums owed by the United States to North Carolina amount to $264,175.69.

Reference will now be made to the claim of the United States against the State of North Carolina.

This claim arises out of certain bonds issued by the State and held by the Federal Government. These bonds originally were held in the Indian trust fund and later became the property of the United States under the provisions of an act of Congress of 1894. The State proposes to pay the principal of these bonds, together with all unpaid interest coupons. As a matter of information it may be stated that these bonds were issued by the State prior to the Civil War. Payments of interest were suspended during the Civil War and at the end of that war the State made an effort to adjust all its outstanding indebtedness and by act of the legislature of the State in 1876 an offer of settlement of these particular bonds was made on the basis of 40 per cent of the principal. All of the outstanding bonds of this series were adjusted on that basis except these bonds held by the Government. It will be noted that the State offers in this settlement to pay the entire principal of the bonds, with interest. The State is so desirous of adjusting these mutual claims that it is willing to pay the face value of these bonds with interest. These bonds with interest amount to the sum of $146,140, and a calculation will show that after deducting this amount from the total of the two claims due by the United States to the State, it leaves a balance due the State as of February 29, 1928, in the sum of $118,035.69, which is the amount provided for in the pending bill.

All of the above facts appear in the hearing which was held before the Judiciary Committee of this body on April 6, 1928, in which report is also included various other items of fact and law, all tending to demonstrate the justness and correctness of this claim. I am advised that the payment of the balance due the State of North Carolina, and represented in the pending bill, covers all mutual claims between the State and the United States. Certainly this is a consummation to be wished by each government.

In conclusion I might make a suggestion fortifying the merits of this bill. Two sovereigns are indebted each to the other. The justness of these mutual items of indebtedness is recognized. Every reason, both of duty and comity, should move each sovereign to effect a friendly and satisfactory adjustment. The Treasury Department, through its accredited official, the Comptroller General, has audited and vouched for the correctness of the respective items of indebtedness. Each sovereign is and should be jealous of its credit and should desire to maintain the most amicable relations in its financial dealings.

This bill has passed the scrutiny of the Senate Committee on Claims and has passed the Senate. A full hearing and consideration has been given by the Judiciary Committee of the House, which has also favorably reported the bill. Every precaution has been taken to insure the correctness of the mutual adjustment of these claims. I hope the bill will have the approval of the House.

RURAL POST ROADS

The SPEAKER. The Chair lays before the House a resolution of the Senate accompanying a veto message from the President, which the Clerk will report.

Mr. PARKS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. PARKS. I would like to know if, under the Constitution, we may vote on these vetoes en gross without having to take one at a time?

The Clerk read as follows:

IN THE SENATE OF THE UNITED STATES,
May 3 (calendar day of May 24), 1928.

The President of the United States having returned to the Senate, in which it originated, the bill (S. 3674) entitled "An act to amend the act entitled 'An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,' approved July 11, 1916, as amended and supplemented, and for other purposes," with his objections thereto, the Senate proceeded, in pursuance to the Constitution, to reconsider the same; and

Resolved, That the bill do pass, two-thirds of the Senate agreeing to pass the same.

The Clerk read the message of the President.

(For President's message, see proceedings of the Senate.)

The SPEAKER. The objections of the President will be spread at large upon the Journal and the bill and the message printed as a public document. The question is, Shall the House, on reconsideration, agree to pass the bill, the objections of the President to the contrary notwithstanding?

Mr. COLTON. Mr. Speaker and Members of the House, I feel so deeply that this veto is based upon a misunderstanding of the facts and circumstances surrounding this legislation that I am going to ask your indulgence for just a few minutes while I explain its provisions. The veto is based mainly upon two propositions. First, that there is already an appropriation to take care of the forest roads. Out of the $7,500,000 that is being carried in the general road authorization bill there is used annually nearly $3,000,000 for fire protection and for the development of the forests, so we do not have nearly all of the amount appropriated for the forest roads. At the present rate of road building with forest funds for main roads in the forests it will take the Federal Government 45 years to complete these roads through Arizona; 95 years in California; 90 years in Colorado; 24 years in Idaho; 33 years in Montana; 55 years in Nevada; 30 years in New Mexico; 30 years in Oregon; 28 years in Utah; 8 years in Washington; and 31 years in Wyoming. So that even the appropriations for main roads through the forests are woefully deficient. We are therefore from 8 to 90 years behind the regular Federal-aid building program in our forests and on our Indian lands. This bill is only for the purpose of speeding up the building program on these public lands during the next three years. The lands are owned exclusively by the United States and in the main these roads will be used as connecting links in the Federal road system.

Mr. ABERNETHY and Mr. CRAMTON rose.

Mr. COLTON. I will yield first to the gentleman from Michigan.

Mr. CRAMTON. As I understand the situation the appropriation for forest roads to which the gentleman has referred is available only in national forests. There is no fund available for construction of roads across Indian reservations and public lands and, in many cases, vast areas are in such reservations exclusively owned by the United States, exempt from taxation, and the only way that roads can be built to connect up important highways through these Federal-owned reservations is through the passage of such a bill as is now before us.

Mr. COLTON. Absolutely; and I may say in addition to what the gentleman has said, there are many individual bills that have been introduced that are pending before the Committee on Roads dealing with many situations which can not be remedied unless the Federal Government does help. This is a general bill to take care of these situations.

And now, just a word on the second point. The President refers in his veto to the fact that the States have the gasoline tax upon which to rely.

Mr. ABERNETHY. Will the gentleman yield?

Mr. COLTON. In just a moment.

The fact of the matter is that only from 23 to 57 per cent of the money which the States are putting on the roads now is derived from this tax. We are putting on our roads more money from other sources than we raise by the gasoline tax. Moreover, under the act of June 11, 1916, the States are compelled to do all the maintenance work and therefore we have no fund whatever to take up many of these meritorious propositions in many of the States.

Gentlemen, just one other thought. Our public lands furnish the greatest example of absentee landlordism in the world. In Nevada, for instance, the Government owns 87½ per cent of the land. In my State it owns about 74 per cent of the land, and in some of the States 50 per cent; and we have not the means by which we can speed up this program.

I now yield to the gentleman from North Carolina.

Mr. ABERNETHY. I simply wanted to know whether this is to connect up through highways?

Mr. COLTON. That is largely the purpose of building the roads—we are asking for this money to connect existing Federal-aid systems. We need this extra help and need it badly. I am sure the President has been somewhere badly advised. There are men, particularly in the Bureau of the Budget, whose western horizon is bounded by the Mississippi River. It would do them a world of good to see some of the West. It can not be seen from a Pullman car. Roads are needed to protect our forests. Often connecting links which at the present rate will not be built for years will, when built, be the means of protecting great forests. We have no means now to build across many of the Indian reservations. Moreover, there are needed connecting links on the public domain where the population is so sparse and the taxable property so small, it will be years before main roads can be built.

Roads through unappropriated public lands and Indian lands are just as essential for the traveling public as those through the forests and parks, and the States should not be expected to bear this responsibility. It is a Federal responsibility. It is not State property.

The Budget proposes in this veto that these States do this work because their resources derived from the gasoline tax enables them to contribute toward these roads. Outside of

California, which has resources far more extensive than any of the other public-land States, this statement is not borne out by the facts, as the following table for 1927 shows:

State	Gas receipts	Total State expenditures for roads	Per cent gas receipts of total expenditures
Arizona	$1,388,830	$2,900,000	47
Colorado	3,139,594	5,464,915	57
Idaho	1,571,749	4,248,213	36
Montana	1,436,398	1,358,775	----------
Nevada	471,624	1,981,328	23
New Mexico	1,415,690	5,088,902	27
Oregon	3,643,191	10,273,440	35
Utah	1,461,261	3,748,099	38
Washington	3,821,438	7,699,127	49
Wyoming	756,049	2,982,529	25

Montana had a deferred road program last year, or this State would be in a like position.

Here we see that the gasoline income met the State program in varying degrees of 23 to 57 per cent. How can they be expected to assume this added burden of building through Government and Indian lands when this source of income pays but one-fourth to one-half their present obligations?

It should be remembered that the Federal Government is not spending one cent on the maintenance of Federal-aid roads, and that makes the expenditures on the part of the States for this purpose constantly increase.

It was said at one time, "Millions for defense, but not one cent for tribute." Uncle Sam says, "Millions for construction, but not one cent for maintenance." The Federal Government has not been overburdened in the work of building interstate roads, and this bill, passed without opposition in both Houses of the Congress, is a righteous claim.

Mr. Speaker, unless there are others who desire to speak, I move the previous question.

The previous question was ordered.

The question was taken; and there were—yeas 161, nays 182, not voting 87, as follows:

[Roll No. 89]

So (two-thirds not having voted in favor thereof) the objections of the President were sustained, and the bill failed to pass.

The following pairs were announced:

Mr. Spearing and Mr. O'Connell (for) with Mr. Buchanan (against).
Mr. Corning and Mr. Peavey (for) with Mr. Connolly of Pennsylvania (against).
Mr. Clancy and Mr. Quayle (for) with Mr. Purnell (against).
Mr. Dickstein and Mr. Bloom (for) with Mr. W. T. Fitzgerald (against).
Mr. Carley and Mr. Sullivan (for) with Mr. Golder (against).
Mr. Moore of New Jersey and Mrs. Norton of New Jersey (for) with Mr. Wyant (against).
Mr. Weller and Mr. Oliver of New York (for) with Mr. Reid of Illinois (against).

Additional general pairs:

Mr. Begg with Mr. Oldfield
Mr. Butler with Mr. Garrett of Tennessee.
Mr. Gates with Mr. Doyle.
Mr. Beck of Pennsylvania with Mr. Howard of Oklahoma.
Mr. Zihlman with Mr. Wingo.
Mr. Eaton with Mr. McClintic.
Mr. Anthony with Mr. Garner of Texas.
Mr. Welch of Pennsylvania with Mr. Williams of Texas.
Mr. Hughes with Mr. Igoe.
Mr. Kendall with Mr. Casey.
Mr. Robsion of Kentucky with Mr. Garrett of Texas.
Mr. Nelson of Wisconsin with Mr. Black of Texas.
Mr. Estep with Mr. Greenwood.
Mr. William E. Hull with Mr. Connally of Texas.
Mr. Wurzbach with Mr. Deal.
Mr. England with Mr. Hammer.
Mr. Beck of Wisconsin with Mr. De Rouen.
Mr. Temple with Mr. Hudspeth.
Mr. Boise with Mr. Bulwinkle.
Mr. Vincent of Michigan with Mr. Johnson of Oklahoma.
Mr. Strother with Mr. McSweeney.
Mr. Bowman with Mr. Blanton.
Mr. Doutrich with Mr. Connery.
Mr. White of Kansas with Mr. Fisher.
Mr. James with Mr. Drane.
Mr. Menges with Mr. Hare.
Mr. Snell with Mr. Bankhead.
Mr. Palmer with Mr. Jones.
Mr. Kerr with Mr. Sabath.
Mr. Kunz with Mr. Sears of Florida.

Mr. WYANT. Mr. Speaker, I want to vote "no."

The SPEAKER pro tempore (Mr. ALDRICH). Was the gentleman in the room and listening when his name should have been called?

Mr. WYANT. I was not.

The SPEAKER pro tempore. The gentleman does not qualify.

The result of the vote was announced as above recorded.

The President's message was referred to the Committee on Roads.

AMENDING SALARY RATES IN THE COMPENSATION SCHEDULE OF THE ACT OF MARCH 4, 1923

Mr. LEHLBACH. Mr. Speaker, I call up the conference report on the bill (H. R. 6518) to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, and I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER pro tempore. The gentleman from New Jersey calls up the conference report on the bill H. R. 6518 and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6518) to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 5, 6, 7, 8, 9, 14, 15, 16, 17, 24, 25, 26, 27, 28, 29, 30, 31, 35, 36, and 37.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,400 and $2,500"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,000 and $3,100"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,600 and $3,700"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,040 and $2,100"; and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,400 and $2,500"; and the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,700 and $2,800"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,000 and $3,100"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,400 and $2,500"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,700 and $2,800"; and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,000 and $3,100"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,300 and $3,400"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,600 and $3,700"; and the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,900 and $4,000"; and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,400 and $2,500"; and the Senate agree to the same.

Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$2,700 and $2,800"; and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the matter proposed insert "$3,000 and $3,100"; and the Senate agree to the same.

JOHN J. BLAINE,
KENNETH MCKELLAR,
WALTER F. GEORGE,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6518) to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, submit the following written statement explaining the effect of the action agreed on by the conference committee and submitted in the accompanying conference report:

On amendments numbered 4, 5, 6, 7, 8, 9, 14, 15, 16, 17, 24, 25, 26, 27, 28, 29, 30, 31, 35, 36, 37:

Eliminate an additional salary rate in the respective grades added by the Senate to the salary rates for such grades carried in the House bill.

On amendments numbered 1, 2, 3, 10, 11, 12, 13, 18, 19, 20, 21, 22, 23, 32, 33, 34:

Eliminate the last of two salary rates added by the Senate to the salary rates for various grades carried in the House bill and retain the first of such additional rates.

FREDERICK R. LEHLBACH,
ERNEST W. GIBSON,
JOE J. MANLOVE,
EMANUEL CELLER,
Managers on the part of the House.

Mr. LEHLBACH. Mr. Speaker, I yield three minutes to the gentleman from New York [Mr. CELLER].

Mr. CELLER. Mr. Speaker and gentlemen, I shall not take the three minutes. I wanted an opportunity to explain my position in signing the conference report, together with the Senate managers and the two colleagues of the House. I did so reluctantly because the bill does not go far enough, but feeling that the legislation might be wrecked unless the majority signed the report on the part of the House I signed it in the interest of getting half a loaf.

You will note, for example, that realizing the strictest kind of economy we have refused to give even the charwomen in the Government employ an increase of 10 cents an hour, and only gave them 5 cents an hour. The total increase would have been negligible, yet those who have the ear of the White House said "nay." That is the kind of parsimony that seems to animate the sponsors of this bill. However, in justice to the vast army of civil employees who will get some increase, I signed the report, but I give notice that never again will I consent to sign a conference report unless absolute justice and equality is meted out to all employees.

Mr. LEHLBACH. Mr. Speaker, I yield five minutes to the gentleman from Virginia [Mr. WOODRUM].

Mr. WOODRUM. Mr. Speaker and gentlemen of the House, the Senate very materially improved the Welch bill. If you will recall under the terms of the Welch bill as passed by the House, at the top of each grade, under the new grades provided in the Welch bill, the maximum salary rates were identical with the old grades under existing law. Therefore, while there could be an increase of wages in the minimum it could not be moved up to the top, so the increases of salary could not go all the way through the grades. To remedy that the Senate added additional salary steps so there could be the same number of salary steps in the grades in the new bill as in existing law and therefore ample increase all along the line. To that extent it insured the increase in salary of all the employees. But it developed that there was a difference of two or three millions in cost, and they went to conference. We were told because they were afraid that the President would veto it, because of these two or three million dollars in cost, the Senate amendments, or part of them, were eliminated.

Now, this House has shown a disposition to deal liberally with the employees of the Government. A few days ago in the matter of salary increase for the postal employees for night work which embodied a difference of several million dollars in the pay roll the House did not hesitate to pass the bill over the President's veto.

It is very well, gentlemen of the House, for the country and the employees to know that when this bill is passed, it is not because the House would not have passed it with the Senate amendments if it had been given an opportunity to do so.

Now, what happened here? In the House bill we gave the charwomen—the poor old decrepit women, gray haired many of them, who get up at 6 o'clock in the morning, before daylight, when you are sleeping peacefully in bed in the wintertime, go out and get down on their knees and scrub the floors. The House gave them an increase of 5 cents an hour and the Senate, out of the liberality of their hearts, increased that to 10 cents an hour. The conferees, the watchdogs of the Treasury, could not stand for such an extravagant waste of public funds, and the conferees would not agree to give the poor old charwomen their 10 cents an hour. They struck 5 cents an hour off it. They work only three hours a day, and it meant only 15 cents a day each to these poor old creatures, and yet they struck it off; but I take the liberty of reminding you that those gentlemen in the salary grades who are getting an increase of $1,500 a year did not have any lopped off their salaries by the conferees. You do not suppose for a moment that the great President of the United States would have vetoed the salary bill because it increased the wages of the charwomen 10 cents an hour, nor do I.

My great objection to the whole proceeding is this: In the five years I have been in the House I think we have had 12 or 15 bills in the House to increase the salaries of different groups of Federal employees. We go ahead and act on them without information or without any idea of what the salary grades are in the other branches.

The SPEAKER. The time of the gentleman from Virginia has expired.

Mr. LEHLBACH. Mr. Speaker, I yield two minutes more to the gentleman.

Mr. JOHNSON of Washington. Is it not a fact that there is to be undertaken this summer a nation-wide classification, using the Welch bill as a basis, and is it not agreed that certain classifications in that bill are too low, but are proposed to be corrected as a result of this survey?

Mr. WOODRUM. It is so stated; but, take my word for it, you pass this Welch bill and you will not hear anything more of these salaries. This will be the end of it. This Government ought to start a comprehensive survey of its whole pay roll. This provides for only 135,000 out of the 550,000 employees. We ought to have a comprehensive survey of the whole system, and where we should increase salaries we ought to increase them, and where the salaries are large enough we ought to let them stay there. We ought to approach the situation in a businesslike, orderly fashion. You have stenographers in the Veterans' Bureau getting one rate of wages and you have them across the street in the Department of Justice getting an entirely different wage scale, and all the time we do not know what relation that wage scale bears to the wage scale in private industry. My plea is to have a comprehensive survey of the whole Federal pay roll, and then we will know how to deal with the salary question in an orderly and intelligent fashion.

Mr. LEHLBACH. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. SCHAFER. Mr. Speaker, a parliamentary inquiry. Do we understand that the vote was unanimous in favor of the conference report?

Mr. WOODRUM. No; there was one vote against it.

Mr. SCHAFER. I did not hear the gentleman vote against it.

Mr. WOODRUM. I did. The gentleman's hearing is bad.

VETERANS' LEGISLATION

Mr. JOHNSON of South Dakota. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 2372) to amend section 201, subdivision (1), of the World War veterans' act, 1924, as amended.

The SPEAKER. The gentleman from South Dakota asks unanimous consent for the present consideration of the Senate bill, of which the Clerk will report the title.

The Clerk read the title of the bill.

Mr. SNELL. Mr. Speaker, may we be told what the bill is?

Mr. JOHNSON of South Dakota. We amended the Senate bill by striking out everything after the enacting clause and inserting word for word the bill, H. R. 13039, which passed the House without a dissenting vote about a month ago.

Mr. SNELL. What does this do?

Mr. JOHNSON of South Dakota. It is a general legislative bill, including all amendments to the veterans' act of 1924 which have been reported from the committee and passed by the House at this session of Congress, such as extending the time for the filing of compensation claims and the presentation of evidence, raising the allowance for the insane from $20 to $30 a month, providing for a little further education for minors who are dependent on the Veterans' Bureau, extending the time for insurance conversion, and some administrative changes.

Mr. SNELL. Do I understand that it is purely an administrative bill?

Mr. JOHNSON of South Dakota. No; not entirely. It is the same bill that I discussed for an hour on the floor of the House about a month ago.

Mr. SNELL. How much money does it involve?

Mr. JOHNSON of South Dakota. About $5,500,000.

Mr. RAMSEYER. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of South Dakota. Yes.

Mr. RAMSEYER. Is this a Senate bill?

Mr. JOHNSON of South Dakota. Yes. I have offered as the House amendment the bill that passed the House 30 days ago. We struck out all after the enacting clause of the Senate bill and inserted the provisions of the bill that the House passed a month ago.

Mr. RAMSEYER. You substitute the bill as it passed the House?

Mr. JOHNSON of South Dakota. Yes; word for word. Now it goes to conference.

Mr. GARNER of Texas. May I ask what the conferees will do?

Mr. JOHNSON of South Dakota. That, of course, is a matter to be decided upon by them.

Mr. RAMSEYER. What does the Senate bill do?

Mr. JOHNSON of South Dakota. It provides for a change in the act with reference to the burial expenses of war veterans.

Mr. BROWNING. The Senate bill is just one section out of the bill that we passed heretofore.

Mr. JOHNSON of South Dakota. Exactly.

Mr. JOHNSON of Texas. Is this the bill that extends the time in which applications can be filed for insurance by the veterans who have been in the service?

Mr. JOHNSON of South Dakota. No; not the Senate bill. That bill is included in the committee amendments.

Mr. COCHRAN of Missouri. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of South Dakota. Yes.

Mr. COCHRAN of Missouri. This is due to the fact that the Senate Committee on Finance has been so engaged on the tax bill that they have never been able to reach this bill?

Mr. JOHNSON of South Dakota. Yes. That is the reason why I am urging the passage of this bill. It will expedite the passage of the legislation.

The SPEAKER. The Chair will state that the amendments to the Senate bill are in exactly the same language as the bill that unanimously passed the House. Without objection, the bill will be printed in the RECORD.

There was no objection.

The bill is as follows:

An act (S. 2372) to amend section 201, subdivision (1), of the World War veterans' act, 1924, as amended

Be it enacted, etc., That section 201, subdivision (1), of the World War veterans' act, 1924, as amended (sec. 472, title 38, U. S. C.), is hereby amended to read as follows:

"(1) If death occur or shall have occurred subsequent to April 6, 1917, and before discharge or resignation from the service, the United States Veterans' Bureau shall pay for burial and funeral expenses and the return of body to his home a sum not to exceed $100, as may be fixed by regulation. Where a veteran of any war, including those women who served as Army nurses under contracts between April 21, 1898, and February 2, 1901, who was not dishonorably discharged, dies after discharge or resignation from the service, the director, in his discretion and with due regard to the circumstances of each case, shall pay for burial and funeral expenses and the transportation of the body (including preparation of the body) to the place of burial, a sum not exceeding $107 to cover such items and to be paid to such person or persons as may be fixed by regulations: *Provided,* That when such person dies while receiving from the bureau compensation or vocational training the above benefits shall be payable in all cases: *Provided further,* That where such person, while receiving from the bureau medical, surgical, or hospital treatment, or vocational training, dies away from home and at the place to which he was ordered by the bureau, or while traveling under orders of the bureau, the above benefits shall be payable in all cases, and in addition thereto the actual and necessary cost of the transportation of the body of the person (including preparation of the body) to the place of burial, within the continental limits of the United States, its Territories, or possessions, and including also, in the discretion of the director, the actual and necessary cost of transportation of an attendant: *Provided further,* That no accrued pension, compensation, or insurance due at the time of death shall be deducted from the sum allowed: *Provided further,* That the director may, in his discretion, make contracts for burial and funeral services within the limits of the amounts allowed herein without regard to the laws prescribing advertisement for proposals for supplies and services for the United States Veterans' Bureau: *Provided further,* That section 5, title 41, of the United States Code, shall not be applied to contracts for burial and funeral expenses heretofore entered into by the director so as to deny payment for services rendered thereunder, and all suspensions of payment heretofore made in connection with such contracts are hereby removed, and any and all payments which are now or may hereafter become due on such contracts are hereby expressly authorized: *And provided further,* That no deduction shall be made from the sum allowed because of any contribution toward the burial which shall be made by any State, county, or municipality, but the aggregate of the sum allowed plus such contribution or contributions shall not exceed the actual cost of the burial."

SEC. 2. That section 19 of the World War veterans' act, 1924, as amended (sec. 445, title 38, of the United States Code), be amended by adding the following:

"No suit shall be allowed under this section unless the same shall have been brought within six years after the right accrued for which the claim is made, or within one year from the date of the approval of this amendatory act, whichever is the later date: *Provided,* That for the purposes of this section it shall be deemed that the right accrued on the happening of the contingency on which the claim is founded: *Provided further,* That this limitation is suspended for the period elapsing between the filing in the bureau of the claim sued upon and the denial of said claim by the director. Infants, insane persons, or persons under other legal disability, or persons rated as incompetent or insane by the bureau shall have three years in which to bring suit after the removal of their disabilities. If suit is seasonably begun and fails for defect in process, or for other reasons not affecting the merits, a new action, if one lies, may be brought within a year though the period of limitations has elapsed. Judgments heretofore rendered against the person or persons claiming under the contract of war-risk insurance on the ground that the claim was barred by the statute of limitations shall not be a bar to the institution of another suit on the same claim. No State or other statute of limitations shall be applicable to suits filed under this section. This section shall apply to all suits now pending against the United States under the provisions of this section."

SEC. 3. That section 21, subdivision (2), of the World War veterans' act, 1924, as amended (sec. 450, title 38, of the United States Code), be hereby amended to read as follows:

"(2) Whenever it appears that any guardian, curator, conservator, or other person is not, in the opinion of the director, properly executing the duties of his trust or has collected or is attempting to collect fees, commissions, or allowances that are inequitable or are in excess of those allowed by law for the duties performed or expenses incurred, or has failed to make such payments as may be necessary for the benefit of the ward or the dependents of the ward, then and in that event the director is hereby empowered by his duly authorized attorney to appear in the court which has appointed such fiduciary and make proper presentation of such matters to the court: *Provided,* That the director, in his discretion, may suspend payments to any such guardian, curator, conservator, or other person who shall neglect or refuse, after reasonable notice, to render an account to the director from time to time showing the application of such payments for the benefit of such minor or incompetent beneficiary.

"Authority is hereby granted for the payment of any court or other expenses incident to any investigation or court proceeding for the appointment of any guardian, curator, conservator, or other person legally vested with the care of the claimant or his estate or the removal of such fiduciary and appointment of another, and of expenses in connection with the administration of such estates by such fiduciaries, when such payment is authorized by the director."

SEC. 4. That section 28 of the World War veterans' act, as amended (sec. 453, title 38, of the U. S. C.), is hereby amended to read as follows:

"SEC. 28. There shall be no recovery of payments from any person, who, in the judgment of the director, is without fault on his part, and where, in the judgment of the director, such recovery would defeat the purpose of benefits otherwise authorized or would be against equity and good conscience. No disbursing officer shall be held liable for any amount paid by him to any person where the recovery of such amount is waived under this section.

"When under the provisions of this section the recovery of a payment made from the United States Government life-insurance fund is waived, the United States Government life-insurance fund shall be reimbursed for the amount involved from the current appropriation for military and naval insurance."

SEC. 5. That a new section be added to Title I of the World War veterans' act, 1924, as amended (title 38, U. S. C.), to be known as section 34 and to read as follows:

"SEC. 34. The director is hereby authorized to contract for the services of translators without regard to the provisions of the act of August 5, 1882 (secs. 39, 45, 46, 50, title 5, U. S. C.), and the classification act of 1923 (secs. 43, 45, 46, title 5, U. S. C.). This section shall be deemed to be in effect as of June 7, 1924."

SEC. 6. That a new section be added to Title I of the World War veterans' act, 1924, as amended (title 38, U. S. C.), to be known as section 35 and to read as follows:

"SEC. 35. The director is hereby authorized to purchase transcripts of the record, including all evidence, of trial of litigated cases. This section shall be deemed to be in effect as of June 7, 1924."

SEC. 7. That section 201, subdivision (3), of the World War veterans' act, 1924, as amended (sec. 472, title 38, U. S. C.), be hereby amended to read as follows:

"(3) The payment of compensation to or for a child shall continue until such child reaches the age of 18 years or marries, or if such child be permanently incapable of self-support by reason of mental or physical defect, then during such incapacity: *Provided,* That the payment of compensation shall be further continued after the age of 18 years and until completion of education or training, to any child who is or may hereafter be pursuing a course of instruction at a school, college, academy, seminary, technical institute, or university, particularly designated by him and approved by the director, which shall have agreed to report to the director the termination of attendance of such child, and if any such institution of learning fails to make such report promptly the approval shall be withdrawn: *And provided further,* That no compensation shall be paid to or for any child who reaches the age of 21 years."

SEC. 8. That the first paragraph of section 202, subdivision (7), of the World War veterans' act, 1924, as amended (sec. 480, title 38, U. S. C.), be hereby amended to read as follows:

"(7) Where any disabled person having neither wife, child, nor dependent parent shall, after July 1, 1924, have been maintained by the Government of the United States for a period or periods amounting to six months in an institution or institutions, and shall be deemed by the director to be insane, the compensation for such person shall thereafter be $30 per month so long as he shall thereafter be maintained by the bureau in an institution; and such compensation may, in the discretion of the director, be paid to the chief officer of said institution to be used for the benefit of such person: *Provided, however,* That if such person shall recover his reason and shall be discharged from such institution as competent, such additional sum shall be paid him as would equal the total sum by which his compensation has been reduced through the provisions of this subdivision."

SEC. 9. That section 202, subdivision 12, of the World War veterans' act, 1924, as amended (sec. 486, title 38, U. S. C.), be hereby amended to read as follows:

"(12) Where the disabled person is a patient in a hospital, or where for any other reason the disabled person and his wife are not living together, or where the children are not in the custody of the disabled person, the amount of the compensation may be apportioned as may be prescribed by regulations."

SEC. 10. That section 206 of the World War veterans' act, 1924, as amended (sec. 495, title 38, U. S. C.), is hereby repealed.

SEC. 11. That section 209 of the World War veterans' act, as amended (sec. 498, title 38, U. S. C.), is hereby repealed.

SEC. 12. That section 212 of the World War veterans' act, 1924, as amended (sec. 422, title 38, U. S. C.), be amended by adding thereto the following proviso:

"*Provided further,* That where the widow, child, or children, of a deceased veteran are entitled to compensation by virtue of an accrued right under the war risk insurance act, as amended, the rates of com-

pensation shall be the same as those provided by section 201 of this act."

SEC. 13. That section 300 of the World War veterans' act, 1924, as amended (sec. 511, title 38, U. S. C.), be hereby amended to read as follows:

"SEC. 300. In order to give to every commissioned officer and enlisted man and to every member of the Army Nurse Corps (female) and of the Navy Nurse Corps (female) when employed in active service under the War Department or Navy Department protection for themselves and their dependents, the United States, upon application to the bureau and without medical examination, shall grant United States Government life insurance (converted insurance) against the death or total permanent disability of any such person in any multiple of $500, and not less than $1,000 or more than $10,000 upon the payment of the premiums as hereinafter provided. Such insurance must be applied for within 120 days after enlistment or after entrance into or employment in the active service and before discharge or resignation: *Provided,* That any member of the reserve forces whose application was accepted at a time when he was in attendance at a military or naval training camp or station, and from whom premiums were collected, and who becomes or has become totally and permanently disabled, or dies or has died, shall be deemed to have made valid application therefor. This proviso shall not authorize the granting of more than $10,000 insurance to any one person: *Provided further,* That each officer and enlisted man of the Coast Guard who is serving on active duty at the time of the passage of this amendatory act, or who subsequent thereto enters the Coast Guard Service, shall be granted insurance in accordance with the terms of this section upon application within 120 days of the passage of this amendatory act, or date of enlistment or entry into the Coast Guard, whichever is the later date, and before retirement, discharge, or resignation.

"Yearly renewable term insurance shall be payable only to a spouse, child, grandchild, parent, brother, sister, uncle, aunt, nephew, niece, brother-in-law, or sister-in-law, or to any or all of them, and also during total and permanent disability to the injured person.

"Where the beneficiary for yearly renewable term insurance at the time of designation by the insured is within the permitted class of beneficiaries and is the designated beneficiary at the time of the maturity of the insurance because of the death of the insured, such beneficiary shall be deemed to be within the permitted class even though the status of such beneficiary shall have been changed.

"The United States shall bear the expenses of administration and the excess mortality and disability cost resulting from the hazards of war. The premium rate shall be the net rate based upon the American Experience Table of Mortality and interest at 3½ per cent per annum. This section, as amended, shall be deemed to be in effect as of June 7, 1924."

SEC. 14. That section 301 of the World War veterans' act, 1924, as amended (sec. 512, title 38, U. S. C.), be hereby amended to read as follows:

"SEC. 301. Except as provided in the second paragraph of this section, not later than July 2, 1927, all term yearly renewable insurance held by persons who were in the military service after April 6, 1917, shall be converted, without medical examination, into such form or forms of insurance as may be prescribed by regulations and as the insured may request. Regulations shall provide for the right to convert into ordinary life, 20-payment life, endowment maturing at age 62, five-year level premium term, and into other usual forms of insurance, and for reconversion of any such policies to a higher premium rate or, upon proof of good health satisfactory to the director, to a lower premium rate, in accordance with regulations to be issued by the director, and shall prescribe the time and method of payment of the premiums thereon, but payments of premiums in advance shall not be required for periods of more than one month each, and may be deducted from the pay or deposit of the insured or be otherwise made at his election: *Provided,* That no reconversion shall be made to the five-year level premium form of policy.

"All yearly renewable term insurance shall cease on July 2, 1927, except when death or total permanent disability shall have occurred before July 2, 1927: *Provided, however,* That the director may by regulation extend the time for the continuing of yearly renewable term insurance and the conversion thereof in any case where on July 2, 1927, conversion of such yearly renewable term insurance is impracticable or impossible due to the mental condition or disappearance of the insured.

"In case where an insured whose yearly renewable term insurance has matured by reason of total permanent disability is found and declared to be no longer permanently and totally disabled, and where the insured is required under regulations to renew payment of premiums on said term insurance, and where this contingency is extended beyond the period during which said yearly renewable term insurance otherwise must be converted, there shall be given such insured an additional period of two years from the date on which he is required to renew payment of premiums in which to convert said term insurance as hereinbefore provided: *Provided,* That where the time for conversion has been extended under the second paragraph of this section because of the mental condition or disappearance of the insured, there shall be allowed to the insured an additional period of two years from the date on which he recovers from his mental disability or reappears in which to convert.

"The insurance except as provided herein shall be payable in 240 equal monthly installments: *Provided,* That when the amount of an individual monthly payment is less than $5, such amount may in the discretion of the director be allowed to accumulate without interest and be disbursed annually. Provisions for maturity at certain ages, for continuous installments during the life of the insured or beneficiaries, or both, for cash, loan, paid up and extended values, dividends from gains and savings, and such other provisions for the protection and advantage of and for alternative benefits to the insured and the beneficiaries as may be found to be reasonable and practicable, may be provided for in the contract of insurance, or from time to time by regulations. All calculations shall be based upon the American Experience Table of Mortality and interest at 3½ per cent per annum, except that no deduction shall be made for continuous installments during the life of the insured in case his total and permanent disability continues more than 240 months. Subject to regulations, the insured shall at all times have the right to change the beneficiary or beneficiaries without the consent of such beneficiary or beneficiaries, but only within the classes herein provided.

"If no beneficiary be designated by the insured as beneficiary for converted insurance granted under the provisions of Article IV of the war risk insurance act, or Title III of this act, either in his lifetime or by his last will and testament, or if the designated beneficiary does not survive the insured, then there shall be paid to the estate of the insured the present value of the remaining unpaid monthly installments; or if the designated beneficiary survives the insured and dies before receiving all of the installments of converted insurance payable and applicable, then there shall be paid to the estate of such beneficiary the present value of the remaining unpaid monthly installments: *Provided,* That no payments shall be made to any estate which under the laws of the residence of the insured or the beneficiary, as the case may be, would escheat, but same shall escheat to the United States and be credited to the United States Government life insurance fund.

"The bureau may make provision in the contract for converted insurance for optional settlements, to be selected by the insured, whereby such insurance may be made payable either in one sum or in installments for 36 months or more. The bureau may also include in said contract a provision authorizing the beneficiary to elect to receive payment of the insurance in installments for 36 months or more, but only if the insured has not exercised the right of election as hereinbefore provided; and even though the insured may have exercised his right of election the said contract may authorize the beneficiary to elect to receive such insurance in installments spread over a greater period of time than that selected by the insured. This section, as amended, shall be deemed to be in effect as of June 7, 1924."

SEC. 15. That a new section be added to the World War veterans' act, 1924, as amended (title 38, U. S. C.), to be known as section 310 and to read as follows:

"SEC. 310. Notwithstanding the provisions of sections 300 and 301 of the World War veterans' act, 1924, as amended (secs. 511 and 512, title 38, U. S. C.), the United States, upon application to the bureau, shall grant United States Government life (converted) insurance against death or permanent total disability in any multiple of $500 and not less than $1,000 or more than $10,000 to any person who has heretofore applied or been eligible to apply for yearly renewable term insurance or United States Government life (converted) insurance: *Provided,* That such person is in good health and furnishes evidence satisfactory to the director to this effect: *Provided further,* That no person may carry more than $10,000 of United States Government life insurance at one time."

SEC. 16. That a new section be added to the World War veterans' act, 1924, as amended (title 38, U. S. C.), to be known as section 311 and to read as follows:

"SEC. 311. Wherever an insured under a yearly renewable term insurance contract or a United States Government life (converted) insurance policy is totally disabled for a period of 12 consecutive months he shall be entitled to receive total permanent disability benefits under his contract as though he were totally and permanently disabled, such payments to be effective as of the date such total disability began and to be made monthly in accordance with the terms of the contract during the continuance of such total disability. During the period of payments under this section premiums on such insurance shall be waived: *Provided, however,* That no retroactive payments shall be made under this section except where there is a period of total disability followed by permanent total disability, in which event payments shall be made effective not more than one year prior to the passage of this amendatory act: *Provided further,* That no application, conversion, or reinstatement shall be invalidated by reason of the provisions of this section. Provision shall be made by regulation for the reexamination of an insured under this section from time to time as the director may deem necessary, and in the event it is found that an insured is no

longer totally disabled payment of benefits shall cease and the provisions of the yearly renewable term insurance contract or the United States Government life-insurance policy, with reference to recovery from permanent total disability, shall apply: *Provided*, That the benefits of this section shall not prejudice any other cause of permanent total disability."

The SPEAKER. The question is on agreeing to the House amendments.

The amendments were agreed to.

SECOND DEFICIENCY BILL, 1928

Mr. WOOD. Mr. Speaker, I present a conference report on the second deficiency bill (H. R. 13873), making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes, and ask unanimous consent that the same be acted upon immediately.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read as follows:

A bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes.

The SPEAKER. The gentleman from Indiana asks unanimous consent for the present consideration of the conference report. Is there objection?

Mr. GARNER of Texas. May I ask the gentleman whether he has consulted the gentleman from Tennessee [Mr. BYRNS], the ranking Member of the subcommittee in charge of that bill?

Mr. WOOD. Yes; I have consulted with the gentleman from Tennessee. We are in entire agreement with the Senate. I ask unanimous consent, Mr. Speaker, that the report be read instead of the statement.

The SPEAKER. The gentleman from Indiana asks unanimous consent that the report be read instead of the statement. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the conference report.

The conference report was read.

The conference report and accompanying statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 22, 23, 30, 36, 51, 52, 62, 68, 69, 72, 85, 86, 88, 93, and 122.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 24, 26, 28, 29, 31, 32, 33, 34, 35, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 53, 54, 55, 56, 57, 59, 60, 61, 63, 64, 65, 66, 67, 71, 73, 74, 75, 76, 77, 78, 79, 80, 81, 83, 84, 87, 90, 91, 92, 94, 95, 96, 97, 98, 99, 100, 101, 102, 104, 105, 106, 107, 108, 109, 110, 111, 112, 114, 116, 117, 119, 120, 121, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, and 137, and agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment, insert "$12,000"; and the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment as follows: At the end of the matter inserted by said amendment insert the following as a new paragraph:

"The sum of $60,000 of the foregoing sums under Employees' Compensation Commission, applicable to the enforcement of the act entitled 'An act to provide compensation for disability or death resulting from injury to employees in certain employments in the District of Columbia, and for other purposes,' approved May 17, 1928, shall be chargeable to the District of Columbia and paid in like manner as other appropriations of the District of Columbia are paid."

And the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"GENERAL ACCOUNTING OFFICE

"To enable the General Accounting Office to report to Congress the amount of the funds of the several Indian tribes, the investment thereof, the rate of interest thereon, and such additional information pertinent to the funds of such tribes as may be essential, including the employment in the District of Columbia and elsewhere of the necessary personal services without regard to civil service laws and regulations, fiscal years 1928 and 1929, $20,000."

And the Senate agree to the same.

Amendment numbered 58: That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"AIRCRAFT IN COMMERCE

"Aircraft in commerce: For an additional amount covering the same objects and purposes as specified under this head in the act making appropriations for the Department of Commerce for the fiscal year 1928, $72,500, to remain available until June 30, 1929, of which amount not to exceed $35,000 may be expended for personal services in the District of Columbia.

"Air navigation facilities: For an additional amount covering the same objects and purposes as specified under this head in the act making appropriations for the Department of Commerce for the fiscal year 1928, $1,000,000, to remain available until June 30, 1929, of which amount not to exceed $15,360 may be expended for personal services in the District of Columbia."

And the Senate agree to the same.

Amendment No. 70: That the House recede from its disagreement to the amendment of the Senate No. 70, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "and/or"; and the Senate agree to the same.

Amendment No. 82: That the House recede from its disagreement to the amendment of the Senate No. 82, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert: "$35,000"; and the Senate agree to the same.

Amendment No. 89: That the House recede from its disagreement to the amendment of the Senate No. 89, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following:

"INCREASE OF THE NAVY

"Construction and machinery: Toward the preparation of plans and estimates of cost of hulls and outfits of vessels and machinery of vessels authorized in the "Act making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes," approved August 29, 1916, fiscal year 1929, $200,000, to remain available until expended."

And the Senate agree to the same.

Amendment numbered 103: That the House recede from its disagreement to the amendment of the Senate numbered 103, and agree to the same with an amendment as follows: In lieu of the sum proposed insert: "$7,000,000"; and the Senate agree to the same.

Amendment numbered 113: That the House recede from its disagreement to the amendment of the Senate numbered 113, and agree to the same with an amendment as follows: In lines 5 and 6 of the matter inserted by said amendment strike out "(H. R. 11134, Seventieth Congress)"; and the Senate agree to the same.

Amendment numbered 115: That the House recede from its disagreement to the amendment of the Senate numbered 115, and agree to the same with an amendment as follows: In lines 4 and 5 of the matter inserted by said amendment strike out the words "fiscal year 1928" and insert in lieu thereof "fiscal years 1928 and 1929"; and the Senate agree to the same.

Amendment numbered 118: That the House recede from its disagreement to the amendment of the Senate numbered 118, and agree to the same with an amendment as follows: After the sum "$193,500" insert the following: "to be subject to the terms and conditions as set forth in such act"; and the Senate agree to the same.

Amendment numbered 123: That the House recede from its disagreement to the amendment of the Senate numbered 123,

and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$10,000"; and the Senate agree to the same.

WILL R. WOOD,
LOUIS C. CRAMTON,
JOSEPH W. BYRNS,
Managers on the part of the House.

F. E. WARREN,
CHARLES CURTIS,
LEE S. OVERMAN,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conference committee and embodied in the accompanying conference report, as to each of such amendments, namely:

On amendments Nos. 1 to 20, inclusive: Appropriates for the salaries and expenses of the Senate in the manner and in the amount specifically provided for in each of the Senate amendments.

On amendment No. 21: Appropriates $12,000 for the Biographical Directory of Congress instead of $20,000 as proposed by the Senate.

On amendments Nos. 22 and 23: Provides $633.29 as proposed by the House instead of $1,440.37 as proposed by the Senate for the payment of certain outstanding bills under the office of the Architect of the Capitol, and strikes out the appropriation of $500 inserted by the Senate for the payment of extra compensation to an employee of the Architect's Office.

On amendment No. 24: Makes available as proposed by the Senate the sum of $1,092.33 for the payment of actuarial services under the Bureau of Efficiency.

On amendment No. 25: Relating to the Employees' Compensation Commission: Appropriates $80,010, as proposed by the Senate, modified so as to require that such portion of that sum as may be due to the administration of the act of May 17, 1928, relating to compensation and injuries of employees of the District of Columbia shall be payable from the joint funds of the United States and the District of Columbia.

On amendment No. 26: Inserts the language proposed by the Senate relative to stenographic reporting services rendered the Federal Radio Commission during the fiscal years 1927 and 1928.

On amendment No. 27: Appropriates $20,000 instead of $45,000, as proposed by the Senate, to enable the General Accounting Office to make a report to the Congress on the funds of the several Indian tribes.

On amendment No. 28: Appropriates $200,000, as proposed by the Senate, for the George Rogers Clark Sesquicentennial Commission.

On amendment No. 29: Reappropriates certain unexpended balances, as proposed by the Senate, for the use of the George Washington Bicentennial Commission.

On amendment No. 30: Strikes out the appropriation of $75,000, inserted by the Senate, for the Mount Rushmore National Memorial Commission.

On amendment No. 31: Appropriates $75,000, as proposed by the Senate, for field investigations to be made by the Personnel Classification Board.

On amendment No. 32: Appropriates $68,000, as proposed by the Senate, for the Office of Public Buildings and Public Parks, and provides for maintenance and operation of Federal buildings.

On amendment No. 33: Inserts the contract authorization of $150,000,000, to enable the Shipping Board to carry out the loan provisions of sections 301 and 302 of the merchant marine act of 1928.

On amendment No. 34: Appropriates $7,000,000, as proposed by the Senate, for additional hospital facilities for the United States Veterans' Bureau.

On amendments Nos. 35 to 48, inclusive: Relating to the District of Columbia: Appropriates $15,000 as proposed by the Senate for office equipment and other expenses of the assessor's office; appropriates $45,000 as proposed by the House instead of $100,000 as proposed by the Senate for the athletic field at Western High School; appropriates as proposed by the Senate for payment to the Children's Hospital, Providence Hospital, Garfield Hospital, Georgetown University Hospital, and the Washington Home for Incurables, the amounts stated as due for the fiscal years 1926 and 1927 for the care of indigent patients; appropriates $800 as proposed by the Senate for the Temporary Home for Former Soldiers and Sailors; appropriates $20,000 as proposed by the Senate for completing the construction of two bathing pools; and appropriates $516.66 for the payment of a judgment certified to Congress after the bill had passed the House.

On amendments Nos. 49 to 56, inclusive: Relating to the Department of Agriculture: Appropriates $980,000 as proposed by the Senate for agricultural-extension work under the provisions of the act of May 22, 1928; strikes out the appropriation of $35,000 inserted by the Senate for the control of the European larch canker; appropriates $30,000 as proposed by the Senate for renewal of the water system at the agricultural station at Fort Keogh, Mont.; strikes out the appropriation of $35,000 for a horticultural station for the Southern Great Plains area; appropriates $2,500,000 as proposed by the Senate for the Mount Vernon memorial highway; appropriates $7,500 as proposed by the Senate for administration of the act to fix standards for hampers and baskets; makes available not to exceed $50,000 for carrying into effect the provisions of the act of May 17, 1928, relative to investigations in connection with wool standards, etc.; and appropriates $5,000,000, as proposed by the Senate, for carrying out the joint resolution to provide for the eradication of the pink bollworm.

On amendments Nos. 57 to 64, inclusive: Relating to the Department of Commerce: Appropriates $140,000 as proposed by the Senate for the enforcement of wireless communication laws; appropriates $72,500 instead of $197,500 as proposed by the Senate for expenses in connection with aircraft in commerce modified so as to eliminate the provision for the purchase of not to exceed 11 airplanes; appropriates $1,000,000 as proposed by the Senate for the construction and maintenance of air navigation facilities; appropriates $10,520 and $47,955 for the fiscal years 1928 and 1929, respectively, for the pay of commissioned officers of the Coast and Geodetic Survey; appropriates $25,000 as proposed by the Senate for investigations in connection with the loss of fish in irrigation ditches, etc.; strikes out the language proposed by the Senate increasing from $5,000 to $9,000 the amount which may be expended for the purchase of land for a fish hatchery in Oklahoma; and appropriates $25,000 as proposed by the Senate for mineral mining investigations in connection with manganese ore.

On amendments Nos. 65 to 82 inclusive: Relating to the Department of the Interior: Appropriates $2,500 as proposed by the Senate for lands and improvements at the Indian colony, Winnemucca, Nev.; appropriates $50,000 as proposed by the Senate for the survey and classification of lands on the Shoshone and Wind River Reservation in Wyoming; appropriates $15,000 as proposed by the Senate for the construction of a fence along the east boundary of the Papago Indian Reservation in Arizona; restores to the bill the language stricken out by the Senate fixing a limit of cost of $1,200,000 on the purchase of lands for the Navajo Indians; strikes out the language inserted by the Senate requiring lands purchased for the Navajo Tribe in Arizona to be subject to the payment of State or county taxes; appropriates $1,200 for maintenance of the Hogback irrigation project in New Mexico; strikes out the limitation inserted by the Senate prohibiting the expenditure from the $100,000 for the Middle Rio Grande conservancy district until such time as construction work is begun on and in behalf of Indian lands; appropriates $26,000 as proposed by the Senate for repairs and improvements at the Haskell Indian School, Kansas; appropriates $50,000 out of tribal funds for a hospital and physician's quarters on the Menominee Reservation, Wis.; appropriates $35,000 for a bridge and a road on the Hoopa Valley Reservation, Calif.; appropriates $8,000 for a road on the Zuni Reservation, N. Mex.; appropriates $2,500 for a tablet or marker at Medicine Lodge, Kans., under the act of May 27, 1928; makes available $1,000 from tribal funds for the maintenance of the Puyallup Indian Cemetery, Tacoma, Wash.; appropriates $70,000 as proposed by the Senate for the payment of claims for flood damages to the owners of certain lands at Hatch and Santa Teresa, N. Mex.; and provides $35,000 instead of $65,000 as proposed by the Senate for a topographic survey of the boundaries of the proposed Shenandoah National Park.

On amendments Nos. 83 and 84, relating to the Department of Justice: Appropriates $40,300 for salaries in the office of the Attorney General and $4,700 for contingent and miscellaneous expenses as proposed by the Senate.

On amendment No. 85: Strikes out the appropriation of $20,000 proposed by the Senate for the United States Employment Service.

Amendments Nos. 86 to 89, inclusive, relating to the Navy Department: Strikes out the authority inserted by the Senate for the use of $20,000 in connection with the research and investigation of safety devices and appliances for submarines; strikes out the appropriation of $5,000 proposed by the Senate for an investigation relative to the establishment of a central eastern ammunition depot; and inserts the appropriation of $200,000 proposed by the Senate for "Increase of the Navy," modified so as to limit the use of such appropriation to the preparation of plans and estimates of costs.

On amendment No. 90: Appropriates $7,500,000 as proposed by the Senate for foreign-mail contracts under the provisions of the merchant marine act of 1928.

On amendments Nos. 91 to 98, inclusive, relating to the Department of State: Appropriates $77 for the payment of a damage claim settled by the Secretary of State under the provisions of law; appropriates $200 for the refund of passport fees as authorized by law; strikes out the appropriation of $31,870 proposed by the Senate for traveling expenses of diplomatic, consular, and Foreign Service officers in connection with leaves of absence; appropriates $100,000 as proposed by the Senate for the International Exposition at Seville, Spain; appropriates $17,395.59 as proposed by the Senate for payment on account of damages sustained by the French ship *Madeleine;* appropriates $4,000 as proposed by the Senate for the American International Institute for the protection of Childhood; appropriates $5,000, as proposed by the Senate, for the contribution of the United States toward the Twenty-third International Congress of Americanists; and appropriates $9,819.93 for the relief of certain officers of the Foreign Service as authorized by law.

On amendments Nos. 99 to 104, inclusive: Relating to the Treasury Department; appropriates $842.07 additional as proposed by the Senate for the settlement of claims for damages determined and certified to Congress in accordance with existing law; appropriates $210,000 as proposed by the Senate for the preparation of preliminary plans and drawings for buildings in the general group projected for the triangle area in Washington; fixes a limit of cost of the extension of the public building at Salt Lake City, Utah, at $1,115,000, instead of $910,000; appropriates $7,000,000, instead of $5,000,000 as proposed by the House and $9,750,000 as proposed by the Senate, for the acquisition of property in the triangle area in Washington, and appropriates $40,000 as proposed by the Senate for paving International Street, Nogales, Ariz.

On amendments Nos. 105 to 123, inclusive, relating to the War Department: Appropriates $160,000 as proposed by the Senate for expenses of the Judge Advocate General's Office in connection with administration of the settlement of war claims, act of 1928; appropriates $14.50 additional for payment of damage claims; appropriates $375,000 as proposed by the Senate for construction at Fort Benjamin Harrison, Ind.; appropriates $300,000 as proposed by the Senate for construction at Walter Reed General Hospital; appropriates $50,000 and $1,750, respectively, for the completion of a hospital and the acquisition of additional land at Selfridge Field, Mich.; appropriates $34,700 as proposed by the Senate for the purchase of additional land in Hawaii for military purposes; authorizes the use of $29,200 additional from existing funds for the employment of personal services in the office of the Chief of Engineers for use in connection with flood control and river and harbor work; appropriates $24,215 as proposed by the Senate for the Zachary Taylor National Cemetery; appropriates $193,500 as proposed by the Senate for the paving of La Fayette Road, Ga.; appropriates $117,000 as proposed by the Senate for the improvement of the Ringgold Road, Ga., as proposed by the Senate; appropriates $14,000,000 and $1,000,000, respectively, as proposed by the Senate for carrying out the provisions of the flood control act; strikes out the appropriation of $6,500 proposed by the Senate for the preparation of plans and estimates for the improvement of the birthplace of George Washington at Wakefield, Va.; appropriates $10,000 instead of $25,000 as proposed by the Senate for a revision and codification of the laws of the Canal Zone.

On amendments Nos. 124 to 128, inclusive: Appropriates for the payment of judgments of United States courts certified to Congress after the bill had passed the House.

On amendments Nos. 129 to 134, inclusive: Appropriates for the payment of judgments of the Court of Claims certified to Congress after the bill had passed the House.

On amendment No. 135: Appropriates $108,982.03 for the payment of audited claims allowed by the General Accounting Office and certified to Congress after the bill had passed the House.

On amendments Nos. 136 and 137: Corrects section numbers in the bill to adjust to Senate amendments previously adopted.

WILL R. WOOD,
LOUIS C. CRAMTON,
JOSEPH W. BYRNS,
Managers on the part of the House.

Mr. WHITE of Maine. Mr. Speaker, will the gentleman from Indiana yield for a question?

Mr. WOOD. I yield.

Mr. WHITE of Maine. There were two amendments in the Senate bill designed to meet the needs of the merchant marine bill of 1928. Have those amendments been agreed to?

Mr. WOOD. They have.

Mr. NEWTON. There was some discussion over there about putting on an amendment providing for another survey for a canal on the Nicaragua route. As I understand, that went out in the Senate. Is that correct?

Mr. WOOD. It went out on a point of order, as I remember.

Mr. NEWTON. It is not in the conference report at all?

Mr. WOOD. No.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

RENEWAL OF BONDS OF GOVERNMENT EMPLOYEES

Mr. GRAHAM. Mr. Speaker, I ask unanimous consent to proceed for three minutes out of order.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to proceed for three minutes out of order. Is there objection?

Mr. CHINDBLOM. The gentleman from Pennsylvania had better make it two minutes. We have only five minutes left under the order.

The SPEAKER. Is there objection?

There was no objection.

Mr. GRAHAM. I will try to make my statement in two minutes.

Mr. Speaker, I wish to call the attention of the House to a matter which to the Committee on the Judiciary seems to require immediate action. A letter was sent by the Secretary of the Treasury to the Speaker of the House and referred to the gentleman from New York [Mr. SNELL], and he introduced the bill that had been previously drawn by the Treasury Department to cover a condition which is now confronting that department.

The act of 1895 requires the renewal of all bonds every four years. The time for renewal is coming about again on July 1. The language of the act of 1895 is mandatory, using the word "shall." The new bill makes it "may" instead of "shall."

At that time nearly all bonds were individual bonds. To-day over 95 per cent of the bonds are corporate bonds, and judging from the corporate reports made by the sureties, they being under the control of the Treasury, there is not the same necessity for this renewal as formerly existed in regard to them. This act simply provides that the Treasury Department shall be relieved from the obligatory clause of the act of 1895, and that it be left to the Treasury Department to attend to the renewals under the word "may" instead of "shall."

Mr. GARNER of Texas. Mr. Speaker, we have gotten along under this law, as I understand it, from the year 1895 down to the present time. How is it that this emergency comes about? It is claimed by the gentleman from Pennsylvania [Mr. GRAHAM] that it is now desired to leave it to the discretion of the Secretary of the Treasury as to whether a new bond is required or not. I think it requires a little more consideration than the mere statement of the gentleman from Pennsylvania, and I shall object. I think this matter is entitled to a little more consideration than the mere statement of the gentleman from Pennsylvania, and if it is to come up under unanimous consent I am going to object.

Mr. GRAHAM. Well, that ends it. The bill will not be passed, then; that is all.

Mr. GARNER of Texas. I can not understand how it is so very important at this late date when we have gone along for some 30 years.

Mr. GRAHAM. It is because the conditions have changed from what they were then.

Mr. GARNER of Texas. The condition changed five years ago the same as it has changed now. It is no different.

HOUR OF MEETING

Mr. TILSON. Mr. Speaker, I ask unanimous consent that when the House adjourns to-night, it adjourn to meet to-morrow at 11 o'clock.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that when the House adjourns to-night it adjourn to meet to-morrow at 11 o'clock. Is there objection?

Mr. UNDERHILL. Mr. Speaker, that does not interfere with the recess?

Mr. TILSON. Not at all.

The SPEAKER. Is there objection?

There was no objection.

Mr. TILSON. Mr. Speaker, I am going to move in a minute that we take a recess until 8 o'clock in accordance with the previous order of the House.

The SPEAKER. Under the order the gentleman must make that motion at 6 o'clock.

VETERANS' BUREAU HOSPITAL FOR KENTUCKY

Mr. THATCHER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. THATCHER. Mr. Speaker, I am very much gratified at the action of Congress in passing H. R. 12821, entitled "A bill to authorize an appropriation to provide additional hospital, domiciliary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes." I am equally gratified because of the President's action in approving the measure.

The bill authorizes the appropriation of the sum of $15,000,000, to become immediately available and to remain available until expended, for the purpose of constructing new hospitals and further hospital and other facilities—to quote the language of section 1—

to care for the increasing load of mentally afflicted World War veterans and to enable the United States Veterans' Bureau to care for its beneficiaries in Veterans' Bureau hospitals rather than in contract temporary facilities and other institutions.

In brief, the bill authorizes the indicated sum for the purpose of constructing new Veterans' Bureau hospitals and additions to existing Veterans' Bureau hospitals to care for neuropsychiatric—that is to say, nervous and mental—cases and to care also for World War veterans' cases now being cared for under contract in hospitals of the country which are not Veterans' Bureau institutions.

ENDS SEVERAL YEARS OF EFFORT

The enactment of this legislation ends the efforts which have been waged for several years by its proponents. At the last session a similar bill, carrying a total authorization of $11,000,000, passed the House, but failed of passage in the Senate because of the filibuster there on other matters at the session's close.

The urgent need for the adoption of this hospital construction program is clearly shown in the hearings had on the subject in the two sessions of the Sixty-ninth Congress and in this, the first session of the Seventieth Congress. Because of my first-hand knowledge of the need for such a hospital in Kentucky, I have made every effort to secure the legislative authorization therefor. While this bill simply authorizes the appropriation of $15,000,000 for the purposes already named, the report of the committee—the House Committee on World War Veterans' Legislation—sets forth the various new hospitals and additional hospital facilities considered by the committee in arriving at the total figure of $15,000,000 carried in the bill, and the proposed new hospital for Kentucky is specifically named in the report, and the Director of the Veterans' Bureau will be governed accordingly. Permit me to quote from that report the following:

NEUROPSYCHIATRIC HOSPITAL FOR KENTUCKY

This authorization bill (H. R. 12821) carries as a part of the total of fifteen millions the sum of $1,000,000 for a neuropsychiatric hospital in Kentucky. Because of my first-hand knowledge of the need for such a hospital in Kentucky, I have made every effort to secure the legislative authorization therefor. While this bill simply authorizes the appropriation of $15,000,000 for the purposes already named, the report of the committee—the House Committee on World War Veterans' Legislation—sets forth the various new hospitals and additional hospital facilities considered by the committee in arriving at the total figure of $15,000,000 carried in the bill, and the proposed new hospital for Kentucky is specifically named in the report, and the Director of the Veterans' Bureau will be governed accordingly. Permit me to quote from that report the following:

Particular attention is also invited to the addition of $1,000,000 for a neuropsychiatric hospital in the Kentucky area. A similar provision was included in the bill reported last year. It was stated then by the chairman of the hospital committee who reported the bill that—

"Representations as to the need of a new neuropsychiatric hospital in the area of which the center would be found to be in Kentucky led the committee last year to recommend appropriation for it in a bill that is now on the calendar, contemplating the erection of a 250-bed hospital. Adding this estimate of $1,000,000 for Kentucky to the bureau's program, together with the 150 additional beds at Oteen, as well as provision for the construction of a nurses' convalescent home in Washington which the committee recommends, and subtracting the savings probable at Atlanta, gives a total estimated cost of very close to $11,000,000, and accordingly your committee recommends the passage of H. R. 17157 authorizing appropriation of that amount."

Evidence was presented at the committee hearings showing an even greater need at this time in the Kentucky area, and your committee therefore included this item in the bill.

PREVIOUS BILLS

The committee's quotation from the committee's report on the omnibus hospital bill of the last session of the Sixty-ninth Congress, already mentioned, referred to the committee's favorable action taken at the first session of the Sixty-ninth Congress on H. R. 10398, a separate bill introduced by me at that session, authorizing the appropriation of $1,125,000 for the construction in Kentucky of a 250-bed neuropsychiatric hospital. On that bill, at my request, hearings were held by the committee, at which I appeared, together with others familiar with the needs involved, with the result that on May 28, 1926, the committee, through one of its members, Representative IRWIN, of Illinois, favorably reported the measure. This report was made near the close of the session and there was no opportunity for the bill to be placed on its passage before the session closed. Then, at the second session of the Sixty-ninth Congress, the $11,000,000 omnibus hospital bill, as I have already stated, passed the House but died in the Senate filibuster.

On that bill, however, ample hearings were held; and as the committee indicated its desire to deal with the entire subject of new hospital construction in a single authorization, or omnibus measure, I asked for and secured at the hands of the committee a new hearing touching the need for the proposed hospital for the Kentucky region, and, at the committee's suggestion, did not press for a separate action on H. R. 10398. The matter was presented in the same manner as in the first session of the Sixty-ninth Congress on H. R. 10398, with the result, as already shown, that the committee approved the item for $1,000,000 for a neuropsychiatric hospital in the Kentucky region, further studies and hearings having convinced the committee that this sum would construct the 250-bed hospital asked for.

Again, on H. R. 12821, at the present session the committee, in the course of its hearings thereon, heard anew and with data brought down to date, the proposal for a neuropsychiatric hospital in Kentucky, and again—and for the third time—approved the proposal and, as already indicated, included in the bill the sum of $1,000,000 therefor.

LEGION INDORSEMENT—ACKNOWLEDGMENT OF APPRECIATION

The Director of the Veterans' Bureau did not include the Kentucky hospital project in his recommendations for new hospitals, but it was indorsed by the American Legion. In fact, the American Legion has long recognized the need for this hospital, and in its national conventions or meetings for the past several years has gone on record as favoring the project.

Touching my efforts in behalf of the Kentucky hospital, I wish to acknowledge with appreciation the effective aid and cooperation of the National and Kentucky Legion organizations, and particularly the effective assistance rendered by legionnaires of both these organizations of the Legion, including Capt. Watson B. Miller, chairman national rehabilitation committee, and John Thomas Taylor, vice president of the legislative committee of the national organization, and the following members of the Kentucky organization: Col. James D. Sory, State service officer of the American Legion, Department of Kentucky; Capt. Allen E. Denton, past commander of the American Legion of Kentucky; and Gen. Ellerbe W. Carter, of Louisville, Ky., who appeared with me in behalf of the project at one or more of the hearings on the Kentucky proposal.

I also desire to express appreciation for the cooperation rendered by Kentucky Senators and Representatives. In addition an acknowledgment of gratitude is due the House committee for its fine action in granting the various hearings on the bills involved and in cooperating to secure the enactment of this legislation, and particularly the committee members—Mrs. ROGERS, Representative from Massachusetts, who filed the favorable committee report on H. R. 12821; Representative GORDON BROWNING, of Tennessee; Mrs. NORTON, Representative from New Jersey; Representative RANKIN, of Mississippi; Representative FITZGERALD, of Ohio; and Representative IRWIN, of Illinois, who, as heretofore stated, filed the favorable committee report in May, 1926, on the first measure introduced in behalf of the Kentucky hospital. Out of the 21 members constituting the committee only 2 joined in an adverse report on the

Kentucky proposal—Representative JOHNSON, of South Dakota, chairman of the committee, and Representative LUCE, of Massachusetts, chairman of the subcommittee conducting the hearings. These gentlemen were evidently largely influenced in their action by the attitude of the Veterans' Bureau in failing to recommend a Kentucky hospital, although the bureau recommended all the other projects covered by H. R. 12821, except the southern New England project, which the majority of the committee also included in the favorable report, and provision therefor was made in the bill. However, no fight was made by these dissenting committee members on the Kentucky or southern New England proposal when the bill came before the House for consideration and passage, and the measure, I am glad to say, passed both Houses without any adverse votes thereon.

ACTION BY DIRECTOR OF VETERANS' BUREAU—APPROPRIATIONS

Since the passage of the bill the Director of the Veterans' Bureau has accepted in good faith the action of Congress in the passage of the bill and has given assurance that the recommendations of the committee as embodied in its report would be by him fully accepted and followed. Accordingly, he has recommended, and there has been appropriated, as I have already pointed out, an adequate appropriation—$7,000,000—for the first year's building program under the bill; and thus the Kentucky hospital project will be taken care of, as will the other projects authorized by this legislation. The director estimated that the indicated sum will be sufficient for the first year's purposes, and during the second ensuing fiscal year he will ask for the additional appropriation needed under the authorization for the completion of the building program.

INDORSEMENTS OF BILL

It is to be noted that H. R. 12821 has been indorsed not only by the American Legion, but also by the disabled American veterans, the Veterans of Foreign Wars, and the Spanish War veterans.

The Director of the Veterans' Bureau will now make or have made a survey of the entire field, and with the aid of the Federal Board of Hospitalization, of which he is chairman, he will make recommendations as to sites for these various projects, including, of course, that for the Kentucky region, and thereupon, when these recommendations are approved by the President, it is expected that sites will be acquired and the hospital construction authorized by the bill will be started.

In this general connection we may rest assured that General Hines, the director, will exercise every care to the end that the best interests of the needs of the ex-service men may be adequately met. He is charged with grave responsibilities in the discharge of his duties, and I am sure that he desires to receive the fullest measure of aid and cooperation of Congress in the performance of those duties, and on this aid and cooperation, I am sure, he may fully count.

DIFFICULTIES INVOLVED

The effort to secure the legislation authorizing the new hospital for the Kentucky region was made difficult by the fact that the Director of the Veterans' Bureau did not see his way clear to recommend it. The contention of the proponents of the measure was that the records of the Veterans' Bureau at Washington did not truly reflect the actual conditions in Kentucky as to the number of neuropsychiatric cases, service connected, requiring hospitalization. At present Kentucky is woefully deficient in hospital facilities of this character. Only the veterans' bureau at Chillicothe and the soldiers' home at Marion, in northern Indiana, are available for Kentucky neuropsychiatric cases, and they are always filled. The result has been and is that Kentucky ex-service men needing neuropsychiatric hospitalization have found it practically impossible to secure hospitalization, and have long ceased to make application therefor. Hence the Veterans' Bureau records fail to give the true picture involved, and this failure rendered the problem of securing favorable action on the Kentucky hospital project difficult. All these facts were convincingly brought out at the committee hearings.

The testimony introduced at these hearings was that in Kentucky alone there were hundreds of service-connected neuropsychiatric cases needing hospitalization that were altogether unable to secure it because of the absolute lack of hospital facilities therefor. The suggestion of the director had been that the addition of 130 beds at Chillicothe—and provided for in H. R. 12821—might meet the Kentucky situation; but these additional beds will doubtless be absorbed in Ohio alone. Meanwhile the whole neuropsychiatric load is constantly increasing, and the peak load will not be reached for several years to come. This is true not only of Kentucky but of the entire country.

GENERAL HOSPITAL PROGRAM INVOLVED

In this connection it may be of interest to state the fact that at the close of February, 1928, the United States Veterans' Bureau was operating 50 hospitals and using a part of the facilities of 48 other Government hospitals and 168 civilian hospitals. The total patient load on that date was about 27,143, divided into three general classes, as follows: Tuberculosis, 7,301; general medical and surgical, 6,985; and neuropsychiatric, 12,857.

Under the authorization of the omnibus bill which has just become a law, in addition to a new hospital for Kentucky and a new hospital for southern New England, new hospital facilities will be provided at Bedford, Mass., neuropsychiatric, 130 beds; Oteen, N. C., tuberculosis, 200 beds; North Chicago, Ill., neuropsychiatric, 300 beds; St. Cloud, Minn., neuropsychiatric, 100 beds; American Lake, Wash., neuropsychiatric, 100 beds; Philadelphia, Pa., neuropsychiatric, 800 beds; Atlanta, Ga., general, 200 beds; Chillicothe, Ohio, neuropsychiatric, 130 beds; Maywood, Ill., neuropsychiatric, 250 beds, tuberculosis, 180 beds; Walla Walla, Wash., tuberculosis, 100 beds; North Little Rock, Ark., neuropsychiatric, 130 beds; Tuskegee, Ala., neuropsychiatric, 100 beds; Kansas City, Mo., general, 300 beds; Excelsior Springs, Mo., neuropsychiatric, 300 beds; Walter Reed Hospital, neuropsychiatric, 100 beds; and a special fund of $500,000—

to revamp existing facilities to meet changes in load, such as at Outwood, Ky., and at Fort Lyons, Colo., if needed.

GREAT SOUTHERN AREA WITHOUT NEUROPSYCHIATRIC FACILITIES

Another reason—and a very strong one—for the construction and maintenance of a neuropsychiatric hospital in the Kentucky region is the fact that at present the great area, bounded by a line extending from Perryville, Md., through Chillicothe, Ohio, Marion, Ind., to Chicago, Ill.; thence to Little Rock, Ark.; thence to Gulfport, Miss.; thence to Augusta, Ga., and including therein Kentucky, Tennessee, and several other of our most important States and sections, is without any neuropsychiatric hospital facilities whatsoever. The greatest need for these facilities appears to be in Kentucky, and the forthcoming hospital will therefore be located in the Kentucky region at such place as the director, with the approval of the President, may select. This is in accordance with the provisions of the bill. Kentucky will thus be directly served, and the other sections of the indicated area will also have the benefit of the hospital facilities thus to be provided.

If this new hospital—to be of not less than 250-bed capacity—should prove insufficient, then, under the authority of the bill and as indicated in the report, a revamping of the Veterans' Bureau tuberculosis hospital at Outwood, Dawson Springs, Ky., may be made, whereby an increase of neuropsychiatric facilities may be provided. However, it is not believed that the policy of mingling these two classes of patients is desirable and this feature should only be utilized as a last resort, and after the other facilities authorized by this legislation shall prove inadequate.

Mr. Speaker, I am very glad to repeat that the director, General Hines, has accepted the action of Congress in the matter of the proposed new hospital for Kentucky in the utmost good faith, and he has given assurance that in his action under the authorization bill he will treat it just as he will treat the other projects included in the bill which made up his hospital building program as recommended by him to Congress, and which was by Congress approved by its inclusion in the committee report and in the lump-sum authorization carried in the bill.

A PERSONAL NOTE

Because of my identification with the Kentucky project from the outset and my efforts therefor, I trust that it may not be inappropriate to quote the following excerpts from letters recently received by me, one from Mrs. ROGERS, Representative from Massachusetts, who filed for the House committee favorable report on H. R. 12821, and the other from Representative IRWIN, of Illinois, who in May, 1926, filed for the committee favorable report on the original Kentucky hospital bill, which I had the honor to introduce. For these very kind expressions I am deeply grateful and I should like to include within them all those who have aided in bringing about the enactment of this legislation.

The following is from the letter from Mrs. ROGERS:

I must not fail to extend to you my heartiest congratulations on your splendidly effective fight for the proposed new neuropsychiatric hospital in Kentucky. I am in the best of position to know of your work in regard to this matter, for I have been a member of the House Committee on World War Veterans' Legislation since its creation, and during the recent session of Congress I had the honor to prepare and file for the committee the favorable report on H. R. 12821, the bill authorizing a $15,000,000 Veterans' Bureau hospital construction program, in which there is included $1,000,000 for the indicated hospital for Kentucky.

* * * * * * *

Your persistent and effective work in the indicated behalf is entitled to the highest praise. Not only did you thus urge and labor for the new Kentucky hospital, but you have also urged and labored in behalf of the entire program for nation-wide hospital construction. Your successful efforts in behalf of the Kentucky project are especially notable because that project did not have the backing or approval of the Veterans' Bureau officials, while practically all the other projects thus authorized had received it. However, your presentation of the need for a new hospital for the Kentucky region convinced the committee of the need and determined the committee's action in the matter. The Veterans' Bureau has accepted in the utmost good faith the judgment of our committee and of Congress touching all the projects authorized. General Hines, the Director of the Veterans' Bureau, promptly recommended the appropriation of $7,000,000 for the first year's work under this construction program, which includes the Kentucky hospital, and Congress at once made the appropriation.

Knowing the character and extent of your efforts in behalf of this hospital construction program, as a member of the House committee, I desire to thank you therefor; and I feel that our veterans of the World War generally and those of the Kentucky region especially owe you a great debt of gratitude for the splendid and effective service you have thus rendered in their behalf.

The following is from the letter of Congressman IRWIN:

I wish to congratulate you on your success in having passed the bill appropriating $1,000,000 for the erection of a neuropsychiatric hospital in the State of Kentucky for the use of veterans of the World War.

I was very much interested in the passage of this bill, as you will recall that I was chairman of the subcommittee on hospitals in the Sixty-ninth Congress. At that time the bill was reported favorably by the full committee on recommendation of the subcommittee.

I wish to say, further, that the disabled World War veterans of Kentucky are fortunate in securing this hospital, and they certainly owe you a debt of gratitude for the splendid fight you made before the subcommittee and also on the floor of the House, which resulted in the passage of the bill.

Also, in this connection it might be noted that Maj. John Thomas Taylor, vice chairman of the national legislative committee of the American Legion, to whom reference has already been made, in a recent letter to a prominent legionnaire of Kentucky, responsive to inquiry concerning my record in Congress touching American Legion legislative matters, was kind enough to state:

I am very happy to be able to say to you that he [Representative THATCHER] has not only been with us at all times so far as voting was concerned, but has personally devoted a great deal of time and attention to defending phases of legislation of interest to World War veterans. I think we can say without question that it was through his untiring efforts that the 250-bed hospital is being provided for Kentucky. For several years he worked to this end in Congress with the Legion, and finally succeeded in the present session of Congress.

I consider him a very sincere friend of the veterans.

CONCLUSION

Of course, the hospitalization of the saviors and defenders of the Republic needing or requiring such care is a matter of paramount importance. No duty of the Republic is of a more sacred character. The American people demand and expect that all needed legislation and required appropriations shall be promptly made for this purpose. The growing load of nervous and mental cases in the ranks of our World War veterans is an added evidence of the frightfulness of war; and the tender heart of a mighty nation is consecrated to the proud task of doing everything possible to alleviate the afflictions sustained by the flower of the country's youth during the greatest conflict of history.

EDITORIALS ON RETIREMENT FROM CONGRESS

Mr. SINNOTT. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing some editorials on my retirement from Congress.

The SPEAKER. Without objection it is so ordered.

There was no objection.

Mr. SINNOTT. I am deeply appreciative to the press of my State for these very generous editorial comments. I hope I have merited a small part of the kind things they say.

I doubt if my friends in the House will recognize me in my editorial dress.

If I have accomplished anything in Congress, it is due to the loyal support I have always received from the press of my district and State.

The editorials referred to are as follows:

[From The Dalles Chronicle]

NICK SINNOTT

Oregon will be losing one of the most able Representatives it has ever had in Congress when NICHOLAS J. SINNOTT resigns, as it is anticipated that he will, to accept a justiceship in the United States Court of Claims at Washington, D. C.

"NICK," as everyone in The Dalles knows him, is deserving of the political reward President Coolidge has proffered. For 15 years he has represented eastern Oregon in Congress, and during this time he has worked his way to the highest rankings the Republican Party can give in the way of committee chairmanships.

This prominence at Washington has been a big advantage to this district and to Oregon, when problems have arisen at the Capital that have required expert political maneuvering. SINNOTT was in a position to demand and receive favors from his colleagues that meant much when the final votes were tabulated.

Just as an example, when Oregon and California cherry growers were threatened with ruinous competition from Europe in the marketing of cherries imported in brine for maraschino purposes, it was SINNOTT who took the leading part in having the duty raised again. It was SINNOTT who had the old duty retained while the Government sent agents into the field to investigate cherry-production costs, and it was largely due to SINNOTT'S efforts that the Tariff Commission finally recommended a 50 per cent duty increase, which was carried out by the President.

This is merely an isolated example, out of hundreds that might be used to illustrate the splendid service NICK SINNOTT has given his constituents. That residents of eastern Oregon realize his worth is attested by the regularity with which they have sent him back every two years despite really warm opposition at times. This year so certain were potential candidates that they would not have a chance against SINNOTT, that not a one of them thought it worth while to file for the nomination.

It is a signal honor for The Dalles that one of its citizens, already distinguished, should be elevated still further by appointment to one of the high judicial positions of the Government.

For NICK is a native son of The Dalles. He was born here December 6, 1870, when his father, N. B. Sinnott, was operating the now historic Umatilla House, then regarded as one of the finest hostelries in the State.

He was graduated from the old Wasco Independent Academy in one of the last graduating classes put out by that school, and then went East to Notre Dame, where he completed his education. At Notre Dame SINNOTT was one of the greatest all-around athletes the school had ever produced.

Following his graduation SINNOTT returned to The Dalles and engaged in the practice of law, being associated with the late Judge A. S. Bennett. In 1913, when the new second congressional district was formed in eastern Oregon, SINNOTT was elected for the first time to the National House of Representatives, a position which he has since filled to the complete satisfaction of his constituents.

For NICK SINNOTT'S sake the Chronicle is sincerely glad that his abilities have received further national recognition. He is amply qualified to handle the judicial duties his new position will involve, and he will be relieved from the always uncertain status of a politician, dependent on the whims of the voters.

The loss to Oregon and the Northwest will be great, however, for no matter how able is the man who succeeds N. J. SINNOTT at Washington, he will suffer by comparison in the years it takes to gain party favor and national prestige.

[From the Portland Oregonian]

LOSING A VALUED SERVANT

There are not many Oregonians by whom the news that the President has nominated Representative SINNOTT, of the second Oregon district, for a seat on the Court of Claims bench will not be read with mingled emotions of gratification and regret. It is pleasing, on the one hand, to know that a distinguished and deserving native son has been so signally honored and on the other it is not a matter for self-congratulation that the State is to be deprived of his further service in Congress.

Mr. SINNOTT is now serving his eighth consecutive term, and though nominally the Representative for the second district he has on every occasion given heed to the interests of all Oregon. His conception of the duties of a Congressman was broad and statesmanlike. An experience of some 15 years in the National Legislature, united with a natural talent for public affairs, had peculiarly qualified him for the discharge of his duties. As chairman of the Committee on the Public Lands and as a member of the Committee on Irrigation and Reclamation, he frequently gave evidence of his grasp of the problems they implied, and placed not only his district but the entire West in his debt.

It is an unavoidable misfortune that a district which had loyally adhered to the rule of giving recognition to merit should at length lose that which is a manifest advantage. It is not, however, a reason for withholding a deserved encomium.

[From the Portland Journal]

HIS PROMOTION

The citizens of the second congressional district of Oregon will find it extremely difficult to replace Congressman SINNOTT, who has been

appointed to the Claims Court by the President. The voters of that district will find it no easy task to send another man to Washington who has the ability, the energy, the honesty, and the high purpose of Mr. SINNOTT.

He has represented his district for years. In that time he has risen to high place in Washington. He has an excellent record of accomplishment for his district and State. He was always to be found in support of those measures which were good for the State and Nation.

Mr. SINNOTT earned a promotion, but it will require a man of very high purpose and unusual ability to fill the place left vacant in the Oregon delegation at Washington.

[From the Portland Telegram]

N. J. SINNOTT

Appointment of N. J. SINNOTT as justice of the United States Court of Claims is a deserved recognition of faithful public service. For 15 years Mr. SINNOTT has represented in Congress not only the second district but all of Oregon.

His position as chairman of the Committee on the Public Lands and as a member of the Committee on Irrigation and Reclamation has given him a favorable opportunity to serve a State vitally concerned in these questions.

Our congratulations go rather to Mr. SINNOTT than to Oregon, which in this instance accepts the honor gained through its distinguished son with something of reluctance and regret.

[From the Klamath Falls Herald]

OUR LOSS

When we record the appointment of Congressman N. J. SINNOTT to the Court of Claims we very properly feel that it is our loss. While we all rejoice with NICK in his promotion, for the position is for life, we do hold a deep regret that he is to leave the second Oregon district, which he has served so long and so well in Congress.

We have had with NICK SINNOTT in Congress dignified and effective representation, for Mr. SINNOTT has steadily gained in standing until his committee appointments show conclusively that he is one of the leaders in the lower House.

His resignation will open the second district congressional contest to a number of eligibles, and we look for an interesting campaign among the boys who would wear the SINNOTT toga.

[From the La Grande Observer]

It is entirely too customary when a man in public life dies or retires or otherwise vacates a job to express regret that his services are lost. In the case of NICK SINNOTT, Representative in Congress from this district, the appointment to the Court of Claims is, however, a matter of deep regret for all of Oregon. Mr. SINNOTT has won wide approval. It can be sincerely said that his service has been extremely fruitful. He has worked for the interests of his State and the entire West with fine vision and notable intelligence. He was highly respected at Washington, conducted himself in a way that was always creditable to this State and this district. This appointment is a step upward well earned, and the people of the State will wish him well while they deeply regret the necessity for a change.

[From the Pendleton East Oregonian]

NOT SO GOOD

The President has offered Congressman SINNOTT a lifetime appointment on the Court of Claims at a salary of $12,500 a year, and the eastern Oregon Congressman can not be blamed for accepting it. It is known that he desired a judicial position, and he is to be congratulated upon achieving that ambition.

It is not good news for Oregon, however, and the loss of Mr. SINNOTT may hamper the progress of the Umatilla rapids project through Congress. He was largely responsible for securing the Federal survey of the project and he is one of the authors of the measure calling for its construction. As a member of the Irrigation Committee, and as Member of the House steering committee, he was in a position to do effective work. Incidentally he has been doing such work and he is now engaged in preparing a favorable report by the House committee.

Along with the story of Mr. SINNOTT'S appointment to the Court of Claims, comes another Washington report saying that ADDISON SMITH, Idaho Cogressman and present chairman of the House Committee on Irrigation and Reclamation, will presumably be promoted to chairmanship of the Committee on Public Lands, a post now held by Mr. SINNOTT, and that Congressman LEATHERWOOD, of Utah, will then become chairman of the House Committee on Irrigation and Reclamation. LEATHERWOOD is classed as opposed to the Boulder Canyon project, and most of those opposing that project, though not all of them, also oppose the Oregon project. If we secure a House chairman who does not favor Government-power projects it will not help the cause. The Senate committee chairman, Senator PHIPPS, of Colorado, is an anti, though that fact did not prevent a favorable report by the Senate committee.

* * * When the important Federal water power act was passed by Congress during the Wilson administration Mr. SINNOTT had a part in writing that measure, and what he did was conducive to the public good, but was not agreeable to the power interests. It may therefore be surmised that those people will be pleased with Mr. SINNOTT'S promotion.

If we are to have Federal power development on the Columbia River, we need a good man to succeed NICK SINNOTT, and it will be well to look closely into the ability, character, and sincerity of the men who seek this position. May the good Lord help us.

[From the Enterprise Chieftain]

NICK SINNOTT MADE UNITED STATES JUDGE

With mingled feelings of pleasure and regret residents of the valley learned last night that Representative N. J. SINNOTT had been appointed by President Coolidge to be a judge on the United States Court of Claims. This is a life appointment and the position is one of high responsibility and honor. It will mean that the eastern Oregon district will lose a Representative who has served eight terms, or 16 years, and has so won the confidence of the people that usually he has had no opposition at the polls.

The choice of a successor to Mr. SINNOTT is a matter of much concern to the district and interest to the many aspirants to his seat. It is not known whether he will resign at once. If he does, a successor will have to be named at once, or the State will be without one Representative in the remaining weeks of the present Congress.

Mr. SINNOTT has filed for nomination for reelection, but his present term includes the short term of Congress which opens next December. His successor presumably must be chosen before that.

In every county of the eastern Oregon district are men who aspire to the office and there will be keen competition for it. If the field were open for the primary, a dozen candidates would have their names on the ballot.

[From the Albany Democrat]

Oregon will lose a faithful, loyal, and energetic champion when Congressman NICK SINNOTT, of the second district, completes his term of office and climbs onto the Court of Claims bench. SINNOTT has been at Washington for many years and he has attained a position of influence which his successor can attain only by long service and intrinsic merit.

[From the Baker Herald]

SINNOTT'S GAIN EASTERN OREGON'S LOSS

Representative SINNOTT'S host of friends in eastern Oregon are pleased to see him receive an appointment to the Federal bench from President Coolidge, for it is a deserved recognition of a loyal public servant. Nor can one blame Mr. SINNOTT for aspiring to a well-paid Federal judgeship for life, with no campaigns to go through and none of the unpleasantness of congressional politics. Eastern Oregon has lost an excellent Congressman, though it has been honored by having one of its citizens elevated to so high a place in the National Government.

[From the Hood River News]

SINNOTT APPOINTED TO CLAIMS COURT

With the appointment by President Coolidge of Congressman SINNOTT to be justice of the Federal Court of Claims the Representative of this district will assume a post that will pay him $12,500 a year for life. The entire mid-Columbia will congratulate NICK SINNOTT on his good fortune and the President on his good judgment. But at the same time there will be many regrets that so capable a Congressman as NICK SINNOTT has proved to be will no longer look after the interests at Washington of eastern Oregon.

There is every indication that the nomination of a successor to Representative SINNOTT will require the writing into the ballots of the name of one or more candidates, for nobody has filed to contest Mr. SINNOTT'S post as Congressman.

Mr. SINNOTT, as befits a man of his caliber, has held and still holds many important posts in various congressional committees, and has been chairman of the Public Lands Committee for the past nine years. It is conceded that during his term of office he has been more active than any other Member of Congress.

The appointment was urged by Senator MCNARY, and it is significant that, while the President has vetoed the McNary-Haugen bill, he has maintained good relations with the Oregon Senator.

[From the Baker Democrat]

AN APPOINTMENT FOR LIFE

While congratulating him on his good fortune in receiving the appointment at the hands of the President as a member of the United States Court of Claims, it is to be regretted on the part of the people of eastern Oregon that Congressman SINNOTT should be taken from the position he has so ably filled since 1913 and in which there was no likelihood of his being unseated.

The appointment of Congressman SINNOTT will leave the second district open for the voters to select his successor, and, no doubt, there well be many aspirants for the place.

Congressman SINNOTT throughout his long service was a faithful and able Representative of the people of Oregon, and at the National Capital he ranked among the most brilliant of lawmakers and a man of sturdy honor and integrity.

[From the Astoria Budget]

OREGON LOSES

In the retirement of NICK SINNOTT from Congress, through his appointment to the bench of the United States Court of Claims, Oregon is losing one of the most valuable servants she has ever had at Washington.

As Representative of the eastern Oregon district for the past 16 years, he has proved a most efficient worker for the interests of that district, and his efforts have not been confined to the service of his own particular section. He has been active and effective in behalf of the whole State. As chairman of the Public Lands Committee he had a post of much importance to Oregon, and his retirement is a heavy loss.

While no one will begrudge him the good fortune which has befallen him and which he deserves, there will be general regret that his State must be deprived of the service of such an able and experienced Congressman.

[From the Oregon City Enterprise]

AN ABLE MAN

Appointment by the President of Congressman SINNOTT, of Oregon, to a place on the Federal Court of Claims is fitting recognition of a man who has served his State faithfully and capably for a long period. Mr. SINNOTT'S oratorical ability won for him recognition in his own State, where he was a successful lawyer, and his knowledge of the important affairs of his own district brought him the ultimate chairmanship of the House Committee on the Public Lands. Until very recently he was the only Oregon Representative at the National Capital to head a committee. His grasp of irrigation and land problems is unusual, his explanations in committee tended to clarify the subjects that he discussed, and his presentations on the floor were admirable. While we congratulate Mr. SINNOTT upon attaining an ambition, we regret that the second district will lose an able and useful Congressman.

The retirement of Congressman SINNOTT will leave only one Oregon veteran in the House of Representatives. When Clifton McArthur was a Member of Congress, this State had an exceptionally strong triumvirate. SINNOTT and HAWLEY remained to carry the prestige of the delegation, and now the first district Member is left alone with two inexperienced colleagues, one from Multnomah and the other to be chosen as Mr. SINNOTT'S successor east of the Cascades. There are, in eastern and central Oregon, a number of good men who could possibly qualify, but whoever is selected will not be able to reach the high mark of service set by SINNOTT until after several sessions at Washington. Green Congressmen, as a general rule, do not impress that unwieldy body of legislators and obtain little recognition at the start. Important committee assignments are eagerly sought, as most of the work of the House is done within committees before measures reach the floor. Otherwise very little legislative business would be accomplished.

Oregon has not made the mistake of swapping horses but has retained in the first and second districts its veterans who long ago weathered the storm that runs along with the period of absorption. During the Ku-Klux Klan fever, bitter and well-organized attacked were made upon Mr. SINNOTT, but he was too well intrenched in public favor and held his place by general acknowledgment of sheer merit. He pursued the even tenor of his way, giving fair treatment to friends and foes alike and obtaining the approval of a decisive majority of his constituents who were sold on his familiarity with the problems of his district and the issues affecting the entire group of Western States. Religious intolerance drove many a qualified statesman to an early political grave, but NICK SINNOTT'S position was impregnable.

[From the Bend Bulletin]

A SPLENDID RECORD

The announcement received last week of the appointment of N. J. SINNOTT removing him from the seat in Congress which has been his for so many years has produced, as its first effect, a free-for-all entry of candidates and an attendant guessing contest as to who will be his successor. It is a tribute to the general regard in which Mr. SINNOTT is held, as a man and a legislator, to note that until the appointment was made known none of these candidacies had a place in the political program of eastern Oregon.

But while interest now centers to a large extent on the question of who will be the next Congressman from the second district, this is tempered to a considerable extent by a feeling of real loss. Mr. SINNOTT'S friends—and their name is legion—will congratulate him on his deserved promotion, but at the same time they will realize that the district has lost greatly by the change. As time goes by the extent of this loss will become more and more apparent.

It is unnecessary to comment on Mr. SINNOTT'S ability. It might be pertinent, however, to mention that his effective ability has been increased from year to year as he became a veteran among the Nation's lawmakers and as he labored conscientiously and unceasingly to represent the people of eastern Oregon.

Congressman SINNOTT has been a champion of irrigation. His work in behalf of the Deschutes project is well known, and much of the progress made in the movement for reclamation in central Oregon should be credited to him. His leadership and knowledge was recognized when he was made chairman of the Public Lands Committee, and his position in his party was given splendid acknowledgment when he was made chairman of the steering committee.

It will require a man of unusual ability adequately to replace Congressman SINNOTT, and it will take years of experience at Washington before his successor will have acquired the standing and influence in both Houses, so greatly to the benefit of Oregon, which Congressman SINNOTT has earned.

[From the Lakeview Examiner]

Oregon's loss in the appointment of NICK SINNOTT to the claims bench is the Nation's gain. Let us therefore rejoice with NICK and be grateful for the years of faithful service he has given us.

[From the Hood River News]

OUR LOSS IS GREAT

NICK SINNOTT has come to the end of his years of stewardship for the people of eastern Oregon and will shortly take up his new duties in the Court of Claims. While everyone in the Columbia River region will regret that he will no longer be the guardian of the interests of eastern Oregon in Congress, all will be glad to learn that his new post will lessen his burden of work and at the same time will enhance his financial status. For it is no secret that NICK SINNOTT is a poor man financially, though rich in the esteem in which he is held by people of the Columbia River region. There are few men in public life who, if called upon to give an accounting of their stewardship, could make a better showing than Mr. SINNOTT, and his constituents will wish him every success in his new line of endeavor.

[From the La Grande News]

Congressman SINNOTT'S appointment to the Federal Court of Claims has injected some real pep into the coming election campaign. So long as NICK was in the field there seemed to be no inspiration for congressionally inclined statesmen to respond to their country's call and enter the lists against him, but now that he has been promoted there are many who expose a desire to go to Washington and take up the burden of government. NICK made a good Congressman and his appointment to a life position on the Federal bench is a just and fitting reward for service well rendered.

[From the Hood River Glacier]

N. J. SINNOTT

The friends and constituents of Hon. N. J. SINNOTT in Hood River County are pleased to learn of his advancement to the Federal Court of Claims. They know that he will make a capable member of that court. But the folk of eastern Oregon are exceedingly sorry to give up Mr. SINNOTT as their Representative in Congress.

Mr. SINNOTT has represented the eastern Oregon congressional district—which, by the way, is the largest in area in the United States—for 16 years. No district has had better representation. Mr. SINNOTT has not participated in any grandstanding or sensational outbursts, but he has been at work constantly for his constituency and for the Government at large. He has attracted nation-wide attention because of his application to the task and the sane way in which he has gone about the problems that confront Congressmen. Mr. SINNOTT has been on the job all of the time while in Washington. We learn that none of his fellow-Representatives get to their offices earlier than he. And when he is back in his home country he spends most of the time traveling over the district studying the problems of the citizens.

NICK SINNOTT, because of his native ability and his diligence in gaining an understanding of the great volume of problems that are presented to a national legislator, has arisen to a front rank in Congress. He has been recognized as a leader, one who was outstanding, and his committee appointments meant much to his State.

If we can secure the election of a man who can take up the work he will lay down at the National Capital, we will be fortunate, indeed.

[From the Madras Pioneer]

N. J. SINNOTT RESIGNS

The resignation of NICHOLAS J. SINNOTT as United States Representative from the second congressional district, has been received by his

friends, countless in number, with both regret and pleasure—regret at the loss of one whose ability and keen knowledge of affairs has made him a real power as champion for this remote section in the legislative halls of the Nation, and pleasure that this very ability, which has made Mr. SINNOTT one to be reckoned with among his peers, has been given recognition in the high position to which he has been recently raised.

The political situation created by the resignation of the veteran lawmaker on the very eve of the primary election forces an interesting and complicated political situation. There are several political aspirants willing to serve in the capacity of United States Representative from the second district of Oregon. That any one of these men, however capable, can fill this position as did Mr. SINNOTT, is impossible. Whoever is the successor of the Representative from eastern Oregon must acquire years of experience and as well posssess a rare character and inborn power to hope to fill in any wise the vacancy created.

Congressman SINNOTT has been a sturdy champion for reclamation of our arid lands and has always backed up the cause of irrigation for this section. The choice of the man to succeed to the position of United States Representative should be carefully made.

[From the Ontario Argus]

"WE ARE GLAD FOR NICK"

No part of eastern Oregon appreciates to a greater degree than does Malheur County the work of N. J. SINNOTT during his long tenure as Representative from the second district. Here in this county is to be built the greatest monument to his service and that of Senator CHARLES L. MCNARY.

That it was the persistent and effective advocacy of irrigation in this section which these two men carried on which brought to a realization the dreams of the people of this section is beyond dispute.

There was one way in which that appreciation could have found tangible expression. That was in voting to return them to office. For Mr. SINNOTT that method has been taken from us with his elevation to the Court of Claims. But there remains another way, that of rejoicing with him that his worth has found a wider recognition; that his ambition has been realized. It would be selfish not to accord him our wholehearted congratulations and to wish for him long years of usefulness in his new sphere. While there have been many expressions of regret at the passing of Mr. SINNOTT from the legislative halls, these very expressions are a tribute to him, and the full measure of friendship he enjoys in this section has been shown by the oft-repeated statement, "but I am glad for NICK," accompanying the regret at his loss to the district. That is just how the Argus feels about it. "We are glad for NICK.'

[From the Woodburn Independent]

NICK SINNOTT has made a good Congressman. His political enemies can say so now, as he will not again be a candidate, having been appointed judge of the United States Court of Claims. About a hundred Republicans would like to succeed him as a Member of the House.

[From the Dufur Despatch]

N. J. SINNOTT RECEIVES APPOINTMENT TO UNITED STATES JUDGESHIP

Republicans and Democrats of Dufur look alike with mingled pride and regret on the appointment of Hon. N. J. SINNOTT to a lifetime job as justice of the United States Court of Claims. Practically unopposed in his district for the last decade, Mr. SINNOTT has served the State of Oregon in a manner that eliminated partisan lines and met with unquestionable approval, as evidenced by the support accorded him at the polls term after term. He had risen to be a power in the National Capital, and while his constituents share with him the honor and good fortune which goes with his recent appointment, they can not help but feel a personal loss as he relinquishes his place to some unproven and as yet unchosen successor.

With NICK SINNOTT a candidate for Congressman from the second district, balloting for this particular office was a mere formality. His support was equally strong from Republicans and Democrats. But with Mr. SINNOTT out of the running a vastly different situation exists. At least half a dozen Republican favorite sons aspire to the vacancy, and the Democrats have no intentions to let the office go without a contest.

Unfortunately—for the embryo candidates—announcement of Mr. SINNOTT'S appointment came before the date of the primaries, thereby necessitating the writing in of contesting candidates instead of selection by the congressional committee. It has been said that Mr. SINNOTT was asked to withhold his withdrawal from the filings until after the primaries in order to avoid the Republicans the embarrassment of a primary contest, but to his credit he refused to do so. * * *

[From the Blue Mountain Eagle]

There should have been a referendum invoked against Congressman SINNOTT when he resigned and accepted a high judicial place in Washington as a reward of merit from President Coolidge. NICK SINNOTT should have been sentenced to life in Congress for the simple reason that everyone in his vast district knew him, liked him, respected him, and worked him. Private business never lets that kind of a man go, for they double his salary or let him make his own terms. Too bad public affairs can not be handled in some similar way. NICK knew his district, his people, their desires and their needs, and he knew Washington and Congress, and they knew him and recognized him as one of the leaders of the House. And in the common phrase of the street, "How did he get that way." He got that way by hard work, honest dealing, good solid judgment, and a sympathetic feeling and consideration for all. The people of Grant County know that they lost a real friend in Congress when President Coolidge took him away from us and elevated him to the Court of Claims.

[From the Hillsboro Independent]

No greater compliment could have been paid ex-Congressman SINNOTT of the second district than the multitude of candidates to succeed him who have appeared since his resignation, not one of whom but would have faced certain defeat by opposing him.

[From the Hood River News]

If somebody had only known that NICK SINNOTT was going to the Court of Claims there would have been a snap at the primaries. But opposition to NICK has reached the vanishing point.

[From the Arlington Bulletin]

NICK SINNOTT'S PROMOTION

NICK SINNOTT, who has intelligently and faithfully represented this State in Congress for a number of years, recently was offered a lifetime appointment by the President on the Court of Claims at a salary of $12,500, and the eastern Oregon Congressman can not be blamed for accepting it. We say this not for the reason that NICK need not have any fear of losing the job that he now holds, for he will be a Member of Congress from this State just so long as he desires to have his name placed on the ballot, but it is generally known that he has desired a judicial position, and now that he has a chance to achieve that ambition he is to be congratulated.

Taking into consideration the welfare of eastern Oregon it is not good news. Mr. SINNOTT has accomplished a good deal for the district he represents, and in our opinion it will be hard to find a man to take his place who will be able to duplicate his achievements. NICK was always on the job, and no matter what happened you could depend on him to go to the bat and fight to the last ditch for those things which he believed would help and promote the progress of eastern Oregon. Sometimes the things Congressman SINNOTT was asked to give his attention to seemed of no great importance, and if the relief prayed for was granted would only benefit some individual who was justly entitled to the things that he requested, but all looked alike to NICK and his difficulty was given the same consideration and personal attention as if it had been a matter in which a number of voters had been concerned. Let it be truthfully said of him that he never sacrificed his duty for personal gain.

Yes; the State of Oregon will sustain a great loss in the retirement of NICK, but all of his constituents are glad to know that he has a chance to realize an ambition he has fostered for years.

[From the Nyssa Journal]

GOOD AND BAD

The President has offered Congressman SINNOTT a lifetime appointment on the Court of Claims at a salary of $12,500 a year, and the eastern Oregon Congressman can not be blamed for accepting it. It is known that he desired a judicial position and he is to be congratulated upon achieving that ambition.

It is not good news for Oregon, however. As a member of the Irrigation Committee and as a member of the House steering committee, he has been in a position to do effective work and has accomplished a great deal for Oregon.

The people of Malheur County give him a large share of the credit for finally securing development of the great Vale and Owyhee projects that are now under construction to bring development and wealth to a vast area in our vicinity.

It will be a hard task for Oregon to find a man with the ability, character, and sincerity of NICK SINNOTT.

[From the Klamath News]

"JUDGE" SINNOTT

NICK SINNOTT has been appointed to a judgeship on the Court of Claims by President Coolidge.

We congratulate Congressman SINNOTT on this signal honor which has been bestowed upon him, and in the same breath we express deep regret that he will be compelled to vacate the seat in Congress he has so long and ably held.

For many years NICK SINNOTT has represented the great eastern Oregon district in Congress—the second district. He has been an

able Congressman, a splendid worker, and a staunch friend of the West. His chairmanship of the Public Lands Committee shows how highly he was thought of in Washington, and at home NICK SINNOTT is much beloved.

Now, that he has gone on the bench leaving his old congressional post it is interesting to recall NICK'S first campaign in this district. He was running against Congressman Ellis for the Republican nomination. In those days transportation was slow and when NICK muddled through much of the interior country he had plenty of time to think things over. He was young and the man he opposed was well entrenched. When he got down to Klamath Falls he was much disheartened, for he could not see how he could win. In those days Klamath was isolated and few candidates for State and district offices got into this section. Congressman Ellis was unknown here and in Lake County, so NICK came in to shake hands with the boys. To his surprise the Klamath County Republicans held a big dinner for him and sent him on his way with a determination to win. He has often said that the dinner given him is what put the fight back into him and caused him to work harder and finally win the primary nomination. Since that visit he has been a loyal friend of Klamath and Lake Counties.

[From the Weston Leader]

NICK SINNOTT

When Congress adjourns at the end of this week Representative N. J. SINNOTT will resign in order to assume his new position as judge of the United States Court of Claims. It is inadequate to say that Oregon—and especially the second district—will have lost a very able, willing, intelligent, faithful, conscientious, and industrious servant. These are mere words and do scant justice to NICK'S real worth to the Commonwealth and the Nation during his 15 years of service in Congress and 9 years as chairman of the Public Lands Committee. But it is the only tribute we know how to pay, and NICK will know that it is sincere. Moreover, he not only ranks high in the qualities that make for true statesmanship but is a kindly, urbane, and accomodating man. Hundreds of his individual constituents are in a position to testify as to the trouble he has taken in their behalf when some matter requiring attention came up at Washington. He could never have been beaten by Democrat or Republican. Only death, voluntary retirement, or the important appointment he has deservedly received from President Coolidge could have kept NICK SINNOTT out of Congress. And now he will wear the ermine worthily. We congratulate him, but not without regret that he is lost to Oregon from the halls of the solons.

[From the Baker Herald]

It didn't take the Senate long to ratify the nomination of NICK SINNOTT as Federal judge. The speed with which confirmation was secured is a nice tribute to the esteem in which the Oregon man is held by his colleagues at Washington.

[From the Bend Bulletin]

No one has yet said anything, we think, about a man who is probably as much concerned as anyone else in the elevation of NICK SINNOTT from the House of Representatives to a judicial position in Washington. This man is Ned Baldwin, NICK'S secretary for years. Ned first went to Washington as secretary to Congressman Ellis in 1907, and except, as we remember, for only one short interval he has as secretary to the Congressman from this district been giving to the people of the district a real and important service.

The results achieved by a Congressman in Washington are not altogether his own. Intelligent and efficient aid on the part of a faithful secretary goes far toward the sum total of results achieved. Ned Baldwin has been that kind of secretary for NICK SINNOTT. If the district loses his services along with NICK'S, it will be very unfortunate.

SENATE BILLS AND JOINT RESOLUTION REFERRED

Bills and a joint resolution of the following titles were taken from the Speaker's table and, under the rule, referred to the appropriate committees, as follows:

S. 1547. An act for the relief of Johns-Manville Corporation; to the Committee on Claims.

S. 1794. An act establishing additional land offices in the States of Montana, Oregon, South Dakota, Idaho, New Mexico, Colorado, and Nevada; to the Committee on Public Lands.

S. 1831. An act to authorize the President to class as secret certain material, apparatus, or equipment for military and naval use, and for other purposes; to the Committee on Military Affairs.

S. 1958. An act for the relief of William J. Cocke; to the Committee on Claims.

S. 2360. An act to amend section 1 of the act of Congress of March 3, 1921 (41 Stats. L. 1249), entitled "An act to amend section 3 of the act of Congress of June 28, 1906," entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes"; to the Committee on Indian Affairs.

S. 2462. An act for the relief of John F. Walker; to the Committee on Military Affairs.

S. 2505. An act granting increase of pensions under the general law to soldiers and sailors of the Regular Army and Navy and their dependents, for disability incurred in service in line of duty, and authorizing that the records of the War and Navy Departments be accepted as to incurrence of a disability in service in line of duty; to the Committee on Pensions.

S. 2989. An act for the relief of John B. Moss; to the Committee on Claims.

S. 3136. An act creating the Roswell land district, establishing a land office at Roswell, N. Mex., and for other purposes; to the Committee on Public Lands.

S. 3258. An act to amend section 300 of the World War veterans' act, 1924, as amended; to the Committee on World War Veterans' Legislation.

S. 3484. An act for the conservation of rainfall in the United States; to the Committee on Agriculture.

S. 3569. An act to equalize the pay of certain classes of officers of the Regular Army; to the Committee on Military Affairs.

S. 3637. An act to provide Federal cooperation with the States in devising means to protect valuable shore lands from damaging erosions, and for other purposes; to the Committee on Rivers and Harbors.

S. 3736. An act for the relief of soldiers who were discharged from the Army during the World War because of misrepresentation of age; to the Committee on Military Affairs.

S. 4222. An act to authorize the creation of Indian trust estates, and for other purposes; to the Committee on Indian Affairs.

S. 4385. An act to establish the Teton National Park in the State of South Dakota, and for other purposes; to the Committee on Public Lands.

S. J. Res. 80. Joint resolution authorizing an appropriation for bank protection for the control of floods and the prevention of erosion of the Missouri River at and near the town of Niobrara, in the State of Nebraska; to the Committee on Flood Control.

S. J. Res. 91. Joint resolution authorizing an appropriation for bank protection for the control of floods and the prevention of erosion of the Missouri River at or near the town of Yankton in the State of South Dakota; to the Committee on Flood Control.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 11134. An act to authorize appropriations for construction at military posts, and for other purposes; and

H. R. 12381. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

The Speaker announced his signature to enrolled bills of the Senate of the following titles:

S. 1822. An act to authorize the Secretary of War to transfer or loan aeronautical equipment to museums and educational institutions;

S. 2535. An act granting to the State of New Mexico certain lands for reimbursement of the counties of Grant, Luna, Hidalgo, and Santa Fe for interest paid on railroad-aid bonds, and for the payment of the principal of railroad-aid bonds issued by the town of Silver City, and to reimburse said town for interest paid on said bonds, and for other purposes;

S. 3593. An act to authorize the leasing or sale of lands reserved for agency, schools, and other purposes on the Fort Peck Indian Reservation, Montana;

S. 3620. An act granting certain land to the congregation of St. Joseph's Roman Catholic Church in the parish of East Baton Rouge, La.;

S. 3808. An act to authorize the construction of a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammany Parish, La.;

S. 4450. An act authorizing the Ripley Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ripley, Ohio;

S. 4456. An act granting the consent of Congress to the boards of county commissioners of the counties of Escambia and Santa Rosa, in the State of Florida, to construct, maintain, and operate a free bridge across Santa Rosa Sound in the State of Florida;

S. 4457. An act authorizing the Northwest Florida Corporation, its successors and assigns, to construct, maintain, and operate a bridge across Perdido Bay at or near Innerarity Point, in Escambia County, Fla., to the mainland of Baldwin County, Ala.;

S. 4474. An act authorizing the South Carolina and the Georgia State Highway Departments to construct, maintain, and operate a toll bridge across the Savannah River at or near Burtons Ferry, near Sylvania, Ga.; and

S. 4504. An act granting the consent of Congress to the State of Arkansas, through its State highway department, to construct, maintain, and operate a toll bridge across White River at or near Augusta, Ark.

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States, for his approval, bills and joint resolutions of the House of the following titles:

H. R. 1406. An act granting six months' pay to Lucy B. Knox;

H. R. 1616. An act for the relief of Carl C. Back;

H. R. 1931. An act for the relief of Daniel Mangan;

H. R. 1951. An act granting six months' pay to Frank A. Grab;

H. R. 2272. An act for the relief of William Morin;

H. R. 2472. An act for the relief of Emile Genireux;

H. R. 2477. An act for the relief of Joseph S. Carroll;

H. R. 2494. An act granting six months' pay to Vincentia V. Irwin;

H. R. 2657. An act for the relief of Thomas Huggins;

H. R. 3971. An act for the relief of the owners of the schooner *William Melbourne;*

H. R. 4652. An act for the relief of Charlie R. Pate;

H. R. 4926. An act for the relief of the Pocahontas Fuel Co. (Inc.);

H. R. 4954. An act for the relief of Thomas Purdell;

H. R. 5897. An act for the relief of Mary McCormick.

H. R. 5910. An act for the relief of Ralph Ole Wright and Varina Belle Wright;

H. R. 6049. An act to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective departments;

H. R. 6908. An act for the relief of Michael Ilitz;

H. R. 11978. An act granting six months' pay to Alexander Gingras, father of Louis W. Gingras, deceased private, United States Marine Corps, in active service;

H. R. 13481. An act granting the consent of Congress to the Alabama State Bridge Corporation to construct, maintain, and operate bridges across the Tennessee, Tombigbee, Warrior, Alabama, and Coosa Rivers, within the State of Alabama;

H. R. 7268. An act for the relief of John Hervey;

H. R. 7708. An act for the relief of John M. Brown;

H. R. 8742. An act to authorize the Secretary of War to convey to the city of Baton Rouge, La., a portion of the Baton Rouge National Cemetery for use as a public street;

H. R. 9380. An act for the relief of Frank E. Shults;

H. R. 10649. An act providing for the transfer of a portion of the military reservation known as Camp Sherman, Ohio, to the Department of Justice;

H. R. 10702. An act for the relief of Elbert L. Cox;

H. R. 11471. An act extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas;

H. R. 11917. An act granting the consent of Congress to the county of Cook, State of Illinois, to widen, maintain, and operate the existing bridge across the Little Calumet River in Cook County, State of Illinois;

H. R. 11950. An act to legalize a pier and wharf in Deer Island thoroughfare on the northerly side at the southeast end of Buckmaster Neck at the town of Stonington, Me.;

H. R. 11980. An act granting the consent of Congress to the Fisher Lumber Corporation to construct, maintain, and operate a railroad bridge across the Tensas River in Louisiana;

H. R. 12038. An act to authorize the acquisition of certain patented land adjoining the Yosemite National Park boundary by exchange, and for other purposes;

H. R. 12031. An act to extend the times for commencing and completing the construction of a bridge across the Rio Grande River at or near a point 2 miles south of the town of Tornillo, Tex.;

H. R. 12063. An act for the relief of the widow of Surg. Mervin W. Glover, United States Public Health Service, deceased;

H. R. 12100. An act to amend the act entitled "An act granting the consent of Congress to the Gateway Bridge Co. for the construction of a bridge across the Rio Grande between Brownsville, Tex., and Matamoros, Mexico," approved February 26, 1926;

H. R. 12235. An act authorizing B. F. Peek, G. A. Shallberg, and C. I. Josephson, of Moline, Ill.; J. W. Bettendorf, A. J. Russell, and J. L. Hecht, of Bettendorf and Davenport, Iowa, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Tenth Street in Bettendorf, State of Iowa;

H. R. 12571. An act granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a toll bridge across the Cumberland River at or near Iuka, Ky.;

H. R. 12623. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Sabine River at or near Starks, La.;

H. R. 12624. An act to amend section 17 of the act of June 10, 1922, entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended;

H. R. 12694. An act authorizing the Secretary of the Navy to provide an escort for the bodies of deceased officers, enlisted men, and nurses;

H. R. 12706. An act for the relief of the town of Springdale, Utah;

H. R. 12806. An act authorizing J. H. Harvell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across New River at or near McCreery, Raleigh County, W. Va.;

H. R. 12894. An act to extend the times for commencing and completing the construction of an overhead viaduct across the Mahoning River at or near Niles, Ohio;

H. R. 12913. An act to extend the times for commencing and completing the construction of a bridge across the Allegheny River at or near the borough of Eldred, McKean County, Pa.;

H. R. 12953. An act to authorize the Board of Managers of the National Home for Disabled Volunteer Soldiers to accept title to the State camp for veterans at Bath, N. Y.;

H. R. 13141. An act authorizing T. S. Hassell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Clifton, Wayne County, Tenn.;

H. R. 13143. An act to adjust the compensation of certain employees in the Customs Service.

H. R. 13380. An act authorizing D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Helena, Ark.

H. J. Res. 47. A resolution for the relief of Mary M. Tilghman, former widow of Sergt. Frederick Coleman, deceased, United States Marine Corps.

H. J. Res. 77. A resolution concerning lands and property devised to the Government of the United States of America by Wesley Jordan, deceased, late of the township of Richland, county of Fairfield, and State of Ohio;

H. J. Res. 292. A resolution authorizing the President to invite the States of the Union and foreign countries to participate in the International Petroleum Exposition at Tulsa, Okla., to begin October 20, 1928;

H. R. 11134. An act to authorize appropriations for construction at military posts, and for other purposes; and

H. R. 12381. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

RECESS

Mr. TILSON. Mr. Speaker, I move that the House take a recess until 8 o'clock to-night, in accordance with the previous order of the House.

The motion was agreed to; accordingly (at 5 o'clock and 59 minutes p. m.) the House stood in recess until 8 o'clock p. m.

EVENING SESSION

The recess having expired, the House met at 8 o'clock p. m.

PRIVATE CALENDAR

The SPEAKER pro tempore (Mr. SNELL). The Clerk will call the bills on the Private Calendar, beginning at the double star.

NEAR EAST RELIEF (INC.)

Mr. FISH. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman from New York rise?

Mr. FISH. Mr. Speaker, I rise to ask unanimous consent to turn back to the bill (S. 1287), Calendar No. 322, an act for the relief of the Near East Relief (Inc.), which was objected to before by three objectors. Two of them have withdrawn their objections, one of them is here, and I think we may reach an understanding immediately, if there is no objection to returning to the bill on the part of the House.

Mr. HOWARD of Nebraska. Mr. Speaker, reserving the right to object, I have been here quite a number of years and this is the first bill against which I have ever filed any objection. I think I have killed this bill six or seven times. Mr. Speaker, I will not object to the bill if I can get the gentleman from New York to make a positive statement to me in the name of the officers of this corporation, namely, that they will never go out among the charitable people of the United States and collect any more funds for this corporation.

Mr. FISH. Mr. Speaker, I have asked the head of the organization, and he has informed me they propose to wind up all the affairs of the Near East Relief (Inc.), and not to solicit any more charity. This is the statement made to me. I am not a member of the organization. I have no constituents interested in it. I am here because I think this old debt ought to be settled during this Congress. It has been pending here a great many years. All I can say to the gentleman is that this is the statement made to me—that they are winding up all their affairs, and they are not going to solicit any money.

Mr. HOWARD of Nebraska. And after to-night there will be no more Near East drives in the United States?

Mr. FISH. That is what I understand.

Mr. HOWARD of Nebraska. Upon the statement of the gentleman from New York, Mr. Speaker, I will not object, but I want it to be distinctly understood that I am taking the gentleman's word for it as coming directly from the officers of this corporation.

Mr TILSON. Have the other two gentlemen withdrawn their objections?

Mr. FISH. They have withdrawn their objections.

Mr. CLARKE. Mr. Speaker, reserving the right to object, I would like a little further explanation of the proposition than the gentleman has given.

Mr. FISH. I did not want to take too much of the time of the House.

Mr. CLARKE. I wanted to see how well the gentleman is posted on the proposition.

Mr. FISH. My colleague from New York probably knows as much about this matter as I do. The bill involves some $360,000 which the Near East took in the way of clothes and shoes to use in an emergency in the Near East to aid the Christian people getting out of there when they were being driven all over Asia Minor by the Turks.

Mr. CLARKE. Under my reservation of objection, Mr. Speaker, I want to interject this statement, if I may. The reason I appear on the scene is this. I have a case where Armenian citizens of the city of Binghampton had a boy and girl taken under the Near East and one of them admitted into an institution and the other one was disguised under another name. We have had the greatest difficulty in the world in getting the case reopened because of the inaccuracy of the records. We have had to appeal to the Secretary of State and the Assistant Secretary of State, who have been extremely kind about the matter; but here is a rank injustice to a father and mother who are being denied the right of having their own children simply because of the inaccurate records of the Near East. I think if we are going along on this proposition, the Near East at least ought to show a willingness to cooperate in correcting their records.

Mr. FISH. I will be glad to cooperate with the gentleman in having that done.

Mr. CLARKE. I withdraw my objection, Mr. Speaker.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York.

There was no objection.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to cancel and abandon the claim in the sum of $632,669 with interest for United States property sold in 1919 to the Near East Relief (Inc.), for use in relieving and supplying the pressing needs of the peoples of the countries involved in the late war.

With the following committee amendment:

On line 8, after the word "war" insert a colon and the following proviso: "*Provided*, That the Near East Relief (Inc.) shall first cancel all claims of whatever kind and description the said Near East Relief (Inc.) now holds against the United States Government."

The committee amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

Mr. WARREN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. WARREN. Under the agreement we are beginning to-night at the double star and I would like to know if one objection is sufficient between the double star and the single star.

The SPEAKER pro tempore. We are proceeding by unanimous consent, and one objection is good against any of them.

Mr. WARREN. I just wished to have that understood. Heretofore it has taken three objections.

Mr. TILSON. It is by a special agreement when it takes three objections, and there is no such agreement at this time.

The SPEAKER pro tempore. If the Chair may be allowed to make a suggestion, we have a good many bills on the calendar, but if the House remains good natured and there are not too many reserving the right to object I think perhaps we can conclude the calling of the calendar before the evening is over.

JOHN GOLOMBIEWSKI

The next business on the Private Calendar was the bill (H. R. 7079) for the relief of John Golombiewski.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized to pay, out of any money in the Treasury not otherwise appropriated, the sum of $2,000 to John Golombiewski, to compensate him for expenses incurred in the election contest, John W. Rainey against John Golombiewski, Sixty-seventh Congress.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

WIDOW OF ALBERT F. SMITH

The next business on the Private Calendar was the bill (H. R. 9213) granting a relief to the widow of Albert F. Smith.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. ROWBOTTOM. I object.

GEORGE PETTIT

The next business on the Private Calendar was the bill (H. R. 9827) for the relief of George Pettit.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, George Pettit, who was a member of Company C, Fourth Regiment United States Infantry, Civil War, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of that organization on the 30th day of June, 1864: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

JAMES SCOTT

The next business on the Private Calendar was the bill (H. R. 11216) for the relief of James Scott.

The Clerk read the title to the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, James Scott, who was a member of Company G, Twelfth Regiment United States Infantry, and Company G, Ninth Invalid Corps, shall

hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of that organization on the 10th day of July, 1864: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended.

A motion to reconsider was laid on the table.

LUCIUS K. OSTERHOUT

The next business on the Private Calendar was the bill (H. R. 9995) a bill for the relief of Lucius K. Osterhout.

The Clerk read the title to the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the pension laws and laws conferring rights and privileges upon honorably discharged soldiers, their widows and dependent relatives, Lucius K. Osterhout, who served in Company A, First Regiment Michigan Volunteer Cavalry, shall be held and considered to have been honorably discharged from the military service of the United States as a member of said organization: *Provided*, That no back pay, pension, bounty, or other emolument shall accrue prior to the passage of this act.

With the following committee amendment:

Line 9, after the word "organization," insert the words "on June 24, 1865."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

MICHAEL MARLEY

The next business on the Private Calendar was the bill (H. R. 5223) for the relief of Michael Marley.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights and privileges upon honorably discharged soldiers, the widows and dependent relatives, Michael Marley, late of Company D, Fifth Regiment United States Infantry, war with Spain, shall be held and considered to have been honorably discharged from the military service of the United States as a member of the above organization on the 13th day of November, 1902: *Provided*, That no pay, pension, bounty, or other emoluments shall accrue prior to the passage of this act.

With the following committee amendment:

Line 10, after the colon, strike out all of the proviso down to and including line 12 and insert in lieu thereof the following: "*Provided*, That no pension, back pay, bounty, or allowance shall be held to have accrued prior to the passage of this act."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

WILLIE G. CHAPMAN

The next business on the Private Calendar was the bill (H. R. 9721) for the relief of Willie G. Chapman.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. WARREN. I object.

P. L. ANDREWS CORPORATION

The next business on the Private Calendar was the bill (S. 2644) to carry out the findings of the Court of Claims in the case of P. L. Andrews Corporation.

Mr. ROWBOTTOM. Mr. Speaker, I ask unanimous consent that this bill go over until later in the evening.

The SPEAKER pro tempore. Is there objection?

There was no objection.

KIRBY HOON

The next business on the Private Calendar was the bill (H. R. 11508) for the relief of Kirby Hoon.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Postmaster General be, and he is hereby, authorized and directed to credit the account of Kirby Hoon, postmaster at Helena, Mont., in the sum of $218.40, on account of a shortage of stamped envelopes.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

FRANK TOPPING AND OTHERS

The next business on the Private Calendar was the bill (S. 19) for the relief of Frank Topping and others.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, as follows, to wit: To Frank Topping, the sum of $372; to J. A. Garrett, the sum of $127.90; to Charles H. Lemon, the sum of $1,006.50; to Elmer B. Irvan, the sum of $121; to G. C. Rothwell, the sum of $1,240; to E. L. Brown, the sum of $492.60; to Robert White, the sum of $228; to Charles L. Shirar, the sum of $332.50; to A. E. Welsh, the sum of $421.80; said sum representing losses and damages sustained by above-named individuals as a result of the flood gates in Haskell Institute's drainage ditch not being closed during the high water in the Wakarusa River during the years 1921 and 1922.

Mr. WARREN. Mr. Speaker, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. WARREN: Insert a semicolon at the end of section 1 on page 2, and add the following: *Provided*, That the amount herein authorized shall constitute full settlement of said claims against the Government.

The amendment was agreed to and the bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

STEAM TUG "W. S. HOLBROOK"

The next business on the Private Calendar was the bill (S. 2516) for the relief of the owners and/or receiver of the American steam tug *W. S. Holbrook*.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the claim of the owners of the American steam tug *W. S. Holbrook*, and/or the receiver of said property, against the United States of America for damages alleged to have been caused by collision between said vessel and the United States Navy steam tug *Pentucket* on or about the 1st day of November, 1917, at the navy yard, Brooklyn, N. Y., may be sued for by the said owners and/or receiver in the District Court of the United States for the Eastern District of New York sitting as a court of admiralty and acting under the rules governing such court; and said court shall have jurisdiction to hear and determine such suit and to enter a judgment or decree for the amount of such damages and costs, if any, as shall be found to be due against the United States in favor of the owners of the said American steam tug *W. S. Holbrook* and/or receiver aforesaid, or against the owners of said American steam tug *W. S. Holbrook* and/or receiver of said vessel in favor of the United States, upon the same principles and same measures of liability as in like cases in admiralty between private parties, and with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of the passage of this act.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

COAST TRANSIT DIVISION BARGE "NO. 4"

The next business on the Private Calendar was the bill (S. 2586) for the relief of the owner of the Coast Transit Division barge *No. 4*.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the claim of the owner of the Coast Transit Division barge *No. 4* against the United States of America for damages and loss alleged to have been caused by collision between said barge and the U. S. S. *Bali* on or about the 17th day of April, 1919, near Pennsylvania Railroad Pier F, Jersey City, N. J., may be sued for by the said owner in the District Court of the United States for the Southern District of New York, sitting as a court of admiralty, and acting under the rules governing such court; and the said court shall have jurisdiction to hear and determine such suit and to enter a judgment or decree for the amount of such damages and costs, if any, as shall be found to be due against the United States in favor of the owner of the said Coast Transit Division barge *No. 4* or against the owner of the said Coast Transit Division barge *No. 4* in favor of the United States, upon the same principles and same measures of liability as in like cases in admiralty between private parties, and with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of the passage of this act.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

MICHAEL J. BAUMAN

The next business on the Private Calendar was the bill (H. R. 2817) for the relief of Michael J. Bauman.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $3,935.99 to Michael J. Bauman for extra work and material furnished in connection with contracts for repairs and alterations in U. S. S. *Sturgeon Bay* at Buffalo, N. Y.

With the following committee amendment:

Line 5, after the word "appropriated" insert "and in full settlement against the Government."

The committee amendment was agreed to and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ROSS F. COLLINS

The next business on the Private Calendar was the bill (H. R. 3221) for the relief of Ross F. Collins.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That the President of the United States is hereby authorized to appoint, by and with the advice and consent of the Senate, Ross F. Collins, now a lieutenant, United States Naval Reserve, a lieutenant commander, United States Naval Reserve, to rank next after Julian L. Woodruff, United States Naval Reserve, and to make an extra number in that grade.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

GEORGE JOSEPH BOYDELL

The next business of the Private Calendar was the bill (H. R. 5948) for the relief of George Joseph Boydell.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged sailors, George Joseph Boydell, who served as an enlisted man in the United States Navy, shall hereafter be held and considered to have been discharged honorably from the naval service of the United States as an enlisted man in the United States Navy.

With the following committee amendment:

Page 1, line 9, after the word "Navy" insert: *"Provided*, That no back pay, allowances, or emoluments of any kind shall accrue because of the passage of this act."

The amendment was agreed to and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

P. L. ANDREWS CORPORATION

Mr. ROWBOTTOM. Mr. Speaker, I ask unanimous consent to return to Calendar No. 403.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the title of the bill as follows:

An act (S. 2644) to carry out the findings of the Court of Claims in the case of the P. L. Andrews Corporation.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $9,672.39 to the P. L. Andrews Corporation, being the damage and loss incurred and suffered by said corporation in complying with United States Navy commandeer order No. N–3255, dated June 18, 1918, as found by the Court of Claims and reported in Senate Document No. 38, Seventieth Congress, first session.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

COMMANDER CHESTER G. MAYO

The next business on the Private Calendar was the bill (H. R. 12764) for the relief of Commander Chester G. Mayo.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the General Accounting Office is hereby authorized and directed to allow the sum of $115 in settlement of the accounts of Commander Chester G. Mayo, Supply Corps, United States Navy, this sum being the amount paid by the said Commander Mayo on account of floral wreaths purchased in connection with the funerals of the late Congressmen Lemuel P. Padgett, Daniel J. Riordan, and James R. Mann, and disallowed by the General Accounting Office.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

JOHN M. REBER

The next business on the Private Calendar was the bill (H. R. 12844) to amend the naval record of John M. Reber.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon persons honorably discharged from the Navy of the United States, John M. Reber, second lieutenant in the United States Marine Corps in the Civil War, shall be held to be honorably discharged as second lieutenant of such corps on June 20, 1863.

SEC. 2. This act shall not be held to make available any rights, privileges, or benefits in respect to any pension, pay, or bounty, or other emolument for any period prior to the enactment of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

BOARD OF MANAGERS, NATIONAL HOME, DISABLED VOLUNTEER SOLDIERS

The next business on the Private Calendar was the resolution (H. J. Res. 129) for the appointment of a member of the Board

of Managers of the National Home for Disabled Volunteer Soldiers.

The title of the resolution was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. WARREN. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

Mr. HOLADAY. Mr. Speaker, will the gentleman withhold his objection for a moment?

Mr. WARREN. I do.

Mr. HOLADAY. Mr. Speaker, Major Bott is an American Legion man. He takes the place of Colonel Catherwood, of Illinois, a man now quite old. Colonel Catherwood does not care for a reappointment.

Major Bott has the indorsement of the American Legion and the Disabled Veterans and the unanimous support and indorsement of all the down-State Illinois members, irrespective of political affiliations.

Mr. WARREN. I do not think these vacancies or appointments should be made by piecemeal. I notice on the calendar under two stars that the gentleman from Maine [Mr. BEEDY] introduced a similar bill, which I did not object to, but to which the gentlemen on that side did object. I see that bill is still on the calendar. I do not think we ought to go about filling these vacancies piecemeal as in this case. The report cites the fact that this man was indorsed by 14 members of the Illinois delegation.

Mr. HOLADAY. Yes; irrespective of party.

Mr. WARREN. I assure the gentleman that party has nothing to do with it.

Mr. HOLADAY. This is the first member that the American Legion has on the board.

Mr. SCHAFER. Mr. Speaker, will the gentleman yield?

Mr. HOLADAY. Yes.

Mr. SCHAFER. Is it not a fact that each of the national homes has a member on the Board of Managers, and the policy has been to have a member from each home?

Mr. HOLADAY. Yes.

Mr. SCHAFER. And that is why the Illinois delegation indorsed the appointment?

Mr. HOLADAY. I think that is the fact. Danville, Ill., has a soldiers' home.

Mr. WARREN. I do not think we ought to go about it this way, but I shall not object to the bill. I hope the gentleman will move to go back to the bill introduced by the gentleman from Maine [Mr. BEEDY]. I shall not object to that.

Mr. HOLADAY. I do not object to that.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Joint resolution (H. J. Res. 129) for the appointment of a member of the board of managers of the National Home for Disabled Volunteer Soldiers

Resolved, etc., That Frank F. Bott, of Illinois, be, and is hereby, appointed a member of the Board of Managers of the National Home for Disabled Volunteer Soldiers of the United States to succeed James S. Catherwood, of Illinois, whose term of office expired February 25, 1925.

The resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

The motion to reconsider the last vote was laid on the table.

JOHN W. BATES

The next business on the Private Calendar was the bill (H. R. 8986) for the relief of John W. Bates.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, John W. Bates, who was a private in Company A, First Battalion Sixteenth Regiment Kentucky Volunteer Cavalry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of said company and battalion on the 8th of June, 1864: *Provided*, That no bounty, pay, or allowances shall be held as accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

ED BURLESON

The next business on the Private Calendar was the bill (H. R. 9071) for the relief of Ed Burleson.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers and their dependents, Ed Burleson, who was a member of Company L, Three hundred and twenty-first Regiment United States Infantry, from May 25, 1918, to October 15, 1918, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of that organization on the 15th day of October, 1918.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

ROY L. MARSTON

Mr. SCHAFER. I ask unanimous consent to return to Calendar No. 338.

Mr. JOHNSON of South Dakota. Is that the bill the gentleman from North Carolina referred to?

Mr. SCHAFER. Yes.

Mr. JOHNSON of South Dakota. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

ROBERT Y. GARRISON

The next business on the Private Calendar was the bill (H. R. 9751) for the relief of Robert Y. Garrison.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, benefits, and privileges upon honorably discharged soldiers, Robert Y. Garrison, who was a second lieutenant in Company D, Three hundred and twentieth Infantry, Eightieth Division, France, during the World War, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a second lieutenant of said company and division: *Provided*, That no back pay, pension, bounty, or other emolument shall accrue prior to the passage of this act.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

TRACY LEE PHILLIPS

The next business on the Private Calendar was the bill (H. R. 9453) for the relief of Tracy Lee Phillips.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill.

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the pension laws or of any laws conferring rights, privileges, or benefits upon honorably discharged soldiers and sailors, Tracy Lee Phillips shall hereafter be held and considered to have been honorably discharged from the naval service of the United States during the World War: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

W. H. ANTHONY, JR.

The next business on the Private Calendar was the bill (H. R. 10751) authorizing the Secretary of the Navy to make a readjustment of pay to Gunner W. H. Anthony, jr., United States Navy (retired).

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. McCLINTIC. Mr. Speaker, I desire to call the Chair's attention to the fact that a similar bill, S. 3427, has been passed by the Senate.

The SPEAKER pro tempore. Without objection the Senate bill will be substituted for the House bill.

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That the Secretary of the Navy is hereby authorized to examine into the service performed by Gunner W. H. Anthony, jr., United States Navy (retired), and to pay him such amount as would be due him on January 14, 1920, for any active service performed while on the retired list.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

A similar House bill was laid on the table.

ROY L. MARSTON

Mr. BEEDY. Mr. Speaker, I ask unanimous consent to return to Calendar No. 338, House Joint Resolution 193, for the appointment of Roy L. Marston, of Maine, as a member of the Board of Managers of the National Home for Disabled Volunteer Soldiers.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maine?

There was no objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

There was no objection.

The Clerk read the resolution, as follows:

Resolved, etc., That Roy L. Marston, of Maine, be, and is hereby, appointed a member of the Board of Managers of the National Home for Disabled Volunteer Soldiers of the United States to succeed himself.

The resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the resolution was passed was laid on the table.

MATTIE HOLCOMB

The next business on the Private Calendar was the bill (S. 1434) for the relief of Mattie Holcomb.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That Mattie Halcomb, mother of Henry Grady Halcomb, late ship's cook, second class, United States Navy, is hereby allowed an amount equal to six months' pay at the rate said Henry Grady Halcomb was receiving at the date of his death: *Provided*, That the said Mattie Halcomb establishes to the satisfaction of the Secretary of the Navy the fact that she was actually dependent upon her son, the late Henry Grady Halcomb, at the time of his death.

SEC. 2. That the payment of the amount of money allowed and authorized to be paid to the said Mattie Halcomb is authorized to be made from the appropriation "Pay, subsistence, and transportation of naval personnel."

With the following committee amendments:

Page 1, line 3, strike out "Halcomb" and insert "Holcomb."

Page 1, line 4, strike out "Halcomb" and insert "Holcomb, alias Henry Grady Halcomb."

Page 1, line 7, strike out "Halcomb" and insert "Holcomb."

Page 1, line 8, strike out "Halcomb" and insert "Holcomb."

Page 1, line 10, strike out the word "actually."

Page 1, line 11, strike out "Halcomb" and insert "Holcomb."

Page 2, line 2, strike out "Halcomb" and insert "Holcomb."

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

WILLIAM E. THACKREY

The next business on the Private Calendar was the bill (S. 2306) for the relief of William E. Thackrey.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That $1,688 be appropriated for repayment to William E. Thackrey of moneys deposited by him in the Treasury of the United States to satisfy disallowances to his accounts as superintendent and special disbursing agent of the Indian school at Mohave City, Ariz., because of additional compensation paid, in violation of section 1765, Revised Statutes, to Indian policemen for the collection of school pupils: *Provided*, That of this sum $1,148 shall be repaid from appropriations made for Indian school transportation for the fiscal years 1926 and 1927, and $540 from similar appropriations for the fiscal years 1924 and 1925, said latter sum being hereby reappropriated for that purpose.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

LEAH FRANK

The next business on the Private Calendar was House Joint Resolution 76, for the relief of Leah Frank, Creek Indian, new born, roll No. 294.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

There was no objection.

The Clerk read the resolution as follows:

Resolved, etc., That there is authorized to be appropriated the sum of $5,000, out of the unpaid Creek equalization funds in full satisfaction of her rights to an allotment of Creek tribal lands.

With the following committee amendment: Page 1, in line 4, strike out "$5,000" and insert "$860," and after the word "the" strike out the words "unpaid Creek equalization funds," and insert "tribal funds of the Creek Nation."

In line 6, after the word "lands" insert a colon and add the following proviso: "*Provided*, That from the said amount there shall be deducted any equalization payment that may have heretofore been made to Leah Frank."

The committee amendment was agreed to.

The resolution was ordered to be engrossed and read a third time, was read the third time and passed.

A motion to reconsider the vote by which the resolution was passed was laid on the table.

LESTER L. LAMPERT

The next business on the Private Calendar was the bill (H. R. 1390) for the relief of Maj. Lester L. Lampert.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Maj. Lester L. Lampert, United States Army, the sum of $438.75, as reimbursement of personal effects owned by him and lost in the storm at Texas City, Tex., during the hurricane of August 15 and 16, 1915, while serving as second lieutenant with Company B, One hundred and twenty-seventh Infantry.

With the following committee amendment:

In line 6, strike out the sign and figures "$438.75" and insert in lieu thereof the sign and figures "$314.94."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

WILLIAM F. GOODE

The next business on the Private Calendar was the bill (H. R. 3537) for the relief of William F. Goode.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to William F. Goode, former second lieutenant, Eight hundred and ninth Regiment Pioneer Infantry, the sum of $208 as reimbursement for medical and hospital expenses incurred by him while in military service.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

RAY ERNEST SMITH

The next business on the Private Calendar was the bill (H. R. 9509) for the relief of Ray Ernest Smith.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Ray Ernest Smith, of the county of Rutland and the State of Vermont, the sum of $160, in full compensation for the loss of a horse in the military service at Fort Ethan Allen, Vt., during the World War.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

T. D. RANDALL & CO.

The next business on the Private Calendar was the bill (H. R. 9546) for the relief of T. D. Randall & Co.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That T. D. Randall & Co. are hereby authorized to bring suit against the United States under purchase orders Nos. 1904 and 1914 to 1919, both inclusive, for furnishing hay to the Army during the late war, to recover whatever losses or damages they may have suffered by reason of car shortage or other war conditions. Jurisdiction is hereby conferred upon the Court of Claims of the United States to hear, consider, and determine such action and to enter decree or judgment against the United States for the amount of any loss or damages as may be found to have been suffered by the said T. D. Randall & Co. under the said purchase orders, if any: *Provided*, That such action shall be brought and commenced within four months from the date that this act becomes effective.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

TALBIRD & JENKINS

The next business on the Private Calendar was the bill (H. R. 10913) to compensate Talbird & Jenkins for balance due on contracts with Navy Department dated March 20 and October 9, 1919.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary be, and he is hereby, authorized and directed to pay Thomas Talbird and Heyward Jenkins, attorneys, doing business under the firm name of Talbird & Jenkins, Beaufort, S. C., out of any money in the Treasury of the United States not otherwise appropriated, the sum of $1,000 in full payment for the balance due on account of professional services rendered by the said Talbird & Jenkins under contracts with the Navy Department dated March 20, 1919, and October 9, 1919.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed

A motion to reconsider was laid on the table.

DR. ANDREW J. BAKER

The next business on the Private Calendar was the bill (H. R. 11385) for the relief of Dr. Andrew J. Baker.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the United States Compensation Commission be, and it is hereby, directed to extend to Dr. Andrew J. Baker, disabled in the line of his employment as physician at the Pacific Branch of the National Home for Disabled Volunteer Soldiers at Sawtelle, Calif., the benefit of the act of September 7, 1916 (39 Stat. L. 742), as amended, without regard to the time of the filing of his claim for such benefits.

With the following committee amendments:

Page 1, line 4, strike out the words "extend to" and insert in lieu thereof the words "hear and determine the claim of"; page 1, line 5, after the word "Baker," insert the words "who claims to have been."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

LULU CHAPLIN

The next business on the Private Calendar was the bill (S. 374) for the relief of Lulu Chaplin.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That there is hereby appropriated, and the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the United States Treasury not otherwise appropriated, the sum of $7,500 to Lulu Chaplin, in full for all claims she may have against the Government on account of the death of William S. Chaplin, deceased, son of said Lulu Chaplin, who was wrongfully shot and killed by a soldier of the United States Army, on the 19th day of January, 1920, in Richland County, S. C., the said soldier of the United States Army being then and there engaged in the performance of his official duties, and the said William S. Chaplin not being then and there resisting the enforcement of any law, nor engaged in the perpetration of any unlawful act, nor violating any rules or regulations or orders or discipline of any military authority, he being a civilian and in the peaceful pursuit of his personal affairs when killed.

With the following committee amendment:

Page 1, line 6, strike out "$7,500" and insert in lieu thereof "$5,000."

Mr. DOMINICK. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman from South Carolina rise?

Mr. DOMINICK. Mr. Speaker, I rise to move that the committee amendment be laid upon the table.

The SPEAKER pro tempore. The question is on the committee amendment.

Mr. UNDERHILL. Mr. Speaker, I did not get the request of the gentleman from South Carolina.

The SPEAKER pro tempore. The gentleman objected to the committee amendment and wants a vote on it.

Mr. O'CONNOR of New York. Mr. Speaker, I make the point of order that the motion of the gentleman is improper.

The SPEAKER pro tempore. The question is on the committee amendment.

Mr. STRONG of Kansas. If that is done we will have to object to consideration of the bill.

The SPEAKER pro tempore. The objection period has gone by.

Mr. DOMINICK. Mr. Speaker, I withdraw the request.

The SPEAKER pro tempore. The question is on the committee amendment.

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

MARTHA HENSON

The next business on the Private Calendar was the bill (S. 1637) for the relief of Martha Henson.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Treasurer of the United States be, and he is hereby, authorized to pay to Martha Henson, of Baltimore City, Md., out of any money not otherwise appropriated, the sum of $2,500 as compensation for injuries received by her on November 25, 1918, when a street car of the United Railways & Electric Co., of Baltimore, Md., on which the said Martha Henson was a passenger, was struck at or near the corner of Patterson Park Avenue and Fleet Streets, Baltimore, Md., by a motor vehicle belonging to and owned by the United States and operated by a soldier of the United States Army.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ORLA W. ROBINSON

The next business on the Private Calendar was the bill (H. R. 7324) for the relief of Orla W. Robinson.

The Clerk read the title to the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers Orla W. Robinson, who was a member of Company L, Third Regiment United States Artillery, which later became the Thirty-third Company, Coast Artillery, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a corporal of that organization on the 9th day of May, 1901: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended.

A motion to reconsider was laid on the table.

ALEXANDER C. DOYLE

The next business on the Private Calendar was the bill (H. R. 10034) for the relief of Capt. Alexander C. Doyle.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized and directed to adjust and settle the claim of Capt. Alexander C. Doyle, Quartermaster Corps, United States Army, in the sum of $1,655 on account of stoppage of pay as the result of alleged neglect of duty while stationed at Schofield Barracks, Territory of Hawaii, during the year 1922, of which charge he was declared not guilty by court-martial decision, and to certify same to Congress for an appropriation.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ROBERT W. MILLER

The next business on the Private Calendar was the bill (H. R. 8751) for the relief of Robert W. Miller.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. CARTER. Mr. Speaker, I ask unanimous consent to substitute (S. 2519), an identical bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized to summon Robert W. Miller, late first lieutenant of Cavalry of the Regular Army of the United States, before a retiring board for the purpose of a hearing of his case and to inquire into and determine all the facts touching on the nature of his disabilities and his separation from the service, and to find and report the disabilities which in its judgment have produced his disability, if any, and whether such disability, if it exists, is an incident of service; that upon the findings of such a board the President is further authorized, in his discretion, to nominate and appoint, by and with the advice and consent of the Senate, the said Robert W. Miller a first lieutenant of Cavalry and either to place him immediately thereafter upon the retired list of the Army, with the same privileges and retired pay as are now or may hereafter be provided by law or regulation for the officers of the Regular Army, or to retain him on the active list of the Army in his original place immediately following Bryan L. Davis, Field Artillery, on the promoton list: *Provided*, That the said Robert W. Miller shall not be entitled to any back pay or allowances by the passage of this act.

The bill was ordered to be read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

BASIL N. HENRY

The next business on the Private Calendar was the bill (H. R. 6127) for the relief of Basil N. Henry.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged members of the military and naval forces of the United States and their dependents, Basil N. Henry, late of Company A, Three hundred and forty-eighth Machine Gun Battalion, American Expeditionary Forces, World War, shall hereafter be held and considered to have been honorably discharged on the 17th day of February, 1919: *Provided*, That no pension, pay, or allowances shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

PAUL JELNA

The next business on the Private Calendar was the bill (H. R. 3462) for the relief of Paul Jelna.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the committee amendment to the bill, as follows:

Strike out all after the enacting clause and insert:

"That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, their widows or dependent relatives, Paul Jelna, who was a private of Company A, Twenty-ninth Regiment United States Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of that organization on November 30, 1902: *Provided*, That no back pay, pension, or other emolument shall accrue prior to the passage of this act."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

LEWIS W. CRAIN

The next business on the Private Calendar was the bill (H. R. 6549) for the relief of Lewis W. Crain.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the pension laws, Lewis W. Crain, late of Company L, Second Regiment Kentucky Volunteer Cavalry, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a member of said organization on the 12th day of February, 1865.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

FRANK D. PECK

The next business on the Private Calendar was the bill (H. R. 9412) for the relief of Frank D. Peck.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. KNUTSON. Mr. Speaker, all of these private bills from the Military Affairs Committee involve pensions, and I am going to insist on explanations of every one from now on.

Mr. SCHAFER. Mr. Speaker, reserving the right to object, the committee report fully explains the bill.

Mr. KNUTSON. But I want an explanation from the author of the bill.

Mr. MAPES. Mr. Speaker, the soldier in this case served four enlistments, and during one enlistment he was absent without leave for 24 hours, was court-martialed, and dishonorably discharged. He afterwards reenlisted three different times, and, as the report of the committee shows, he was found to be honest and faithful and his character excellent in each enlistment. Col. Frederick R. Day states in a letter to him, "When you were convicted of desertion, if the facts had been laid before the court, it would have been a simple absent without leave."

The officer who made the charge against him was at the time his lieutenant, and is now Col. Russell C. Langdon. Colonel Langdon, as set forth in the report of the committee, says that he was absent from his post only 24 hours, and because of his creditable record before his alleged desertion and during his three enlistments afterwards he recommends that steps be taken to remove the charge of desertion against Peck.

Mr. KNUTSON. Has he had any service in any war?

Mr. MAPES. I do not know whether he was in the World War or not.

Mr. KNUTSON. The gentleman's explanation is satisfactory.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the pension laws Frank D. Peck shall be hereafter held and considered to have been honorably discharged from the military service of the United States as a private of Company M, Third Regiment United States Infantry, on November 22, 1900: *Provided,* That no back pension, back pay, or back allowance shall accrue by virtue of the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.

EDWARD KNIGHT

The next business on the Private Calendar was the bill (H. R. 11754) for the relief of Edward Knight.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Edward Knight, who was a member of Company E, Ninth Infantry, United States Army, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of that organization on the 14th day of February, 1908: *Provided,* That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.

MORRIS FOX CHERRY

The next business on the Private Calendar was the bill (H. R. 12538) for the benefit of Morris Fox Cherry.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Morris Fox Cherry, who was a member of Battery A, One hundred and thirty-second Field Artillery, Thirty-sixth Division, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of that organization on the 16th day of April, 1918.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.

CAPT. JOSEPH W. LOEF

The next business on the Private Calendar was the bill (S. 1594) for the relief of Capt. Joseph W. Loef.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That, in order to rectify an error of the War Department in the computation of commissioned service, the President be, and hereby is, authorized to commission Capt. Joseph W. Loef, Field Artillery, as an additional number as of July 1, 1920, with the pay and allowance of a captain from that date, the total number of captains not to be increased by the change in the date of this commission, and that Capt. Joseph W. Loef be placed in his proper place on both the promotion and relative rank lists according to the date of his commission as captain.

The bill was ordered to be read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.

W. S. ALBRIGHT

The next business on the Private Calendar was House Joint Resolution 168, for the appointment of W. S. Albright, of Kansas, as a member of the Board of Managers of the National Home for Disabled Volunteer Soldiers.
The Clerk read the title of the joint resolution.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the joint resolution, as follows:

House Joint Resolution 168

Resolved, etc., That W. S. Albright, of Kansas, be, and he is hereby, appointed a member of the Board of Managers of the National Home for Disabled Volunteer Soldiers of the United States, to succeed W. S. Albright, whose term expires January 6, 1929.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.

FRANK L. MERRIFIELD

The next business on the Private Calendar was the bill (H. R. 4215) for the relief of Frank L. Merrifield.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the pension laws, Frank L. Merrifield shall hereafter be held and considered to have been honorably discharged from the military service of the United States in Group B, repair unit No. 306, Motor Transport Corps, on the 4th day of September, 1921: *Provided,* That no bounty, back pay, pension, or allowance shall be held to have accrued priod to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.

MARTHA ANDREW VIRGINIA JOHNSON

The next business on the Private Calendar was the bill (H. R. 4380) for the relief of Martha Andrew Virginia Johnson.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That the Quartermaster General of the Army shall cause to be paid to Martha Andrew Virginia Johnson, mother of Albert L. Johnson, late of Medical Department, United States Army, who died of septicemia at the station hospital, Fort Benning, Ga., April 8, 1925, an amount equal to six months' pay at the rate the said Albert L. Johnson was receiving at the date of his death. Said amount will be paid from funds appropriated for pay of the Army.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.

JAMES J. DOWER

The next business on the Private Calendar was the bill (H. R. 8598) for the relief of James J. Dower.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers and their dependents, James J. Dower, who was a member of Battery C, Second United States Artillery, Fourteenth Company Coast Artillery, Ninety-sixth Company Coast Artillery, Twentieth Company Coast Artillery Corps, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of that organization on the 17th day of August, 1907: *Provided,* That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.

ALBERT I. RILEY

The next business on the Private Calendar was the bill (H. R. 12012) for the relief of Albert I. Riley.
The title of the bill was read.
The SPEAKER pro tempore. Is there objection to the present consideration of the bill?
There was no objection.
The SPEAKER pro tempore. The Clerk will report the bill.
The Clerk read as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Albert I. Riley, who was a member of Company K, Thirty-seventh Regiment Illinois Volunteer Infantry, shall hereafter be held and considered to have been discharged honorably from the military service

of the United States as a private of that organization on the 12th day of April, 1866: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

RELIEF OF CONTRACTORS AND SUBCONTRACTORS ON PUBLIC BUILDINGS

The next business on the Private Calendar was the bill (H. R. 12952) to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by the act of March 6, 1920.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. KNUTSON. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

MORRIS DIETRICH

The next business on the Private Calendar was the bill (H. R. 2427) for the relief of Morris Dietrich.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Morris Dietrich, who was permanently disabled while engaged in the employment of the United States Government at Frankfort Arsenal, in the State of Pennsylvania, on or about July 25, 1913, the sum of $1,500.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

C. TISDALL CO. ET AL.

The next business on the Private Calendar was the bill (H. R. 3955) for the relief of C. Tisdall Co., Herbert W. Smith, Newman Bros., Thomas J. Murphy Co., formerly Edward A. Brown Co., and Giles P. Dunn, jr.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to the C. Tisdall Co., of Newport, R. I., the sum of $1,037.65; Herbert W. Smith, of Newport, R. I., the sum of $146.15; Newman Bros., of Bristol, R. I., the sum of $114.25; Thomas J. Murphy Co., formerly Edward A. Brown Co., of Newport, R. I., the sum of $211.85; and Giles P. Dunn, jr., of Block Island, R. I., the sum of $619.54, all of said sums being due said individuals and companies for merchandise furnished crews of certain naval vessels of the United States during the late war.

With a committee amendment as follows:

Page 1, line 10, strike out "$211.85" and insert "$151.85."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

HALLER NUTT

The next business on the Private Calendar was the bill (H. R. 7149) for the relief of the legal representative of the estate of Haller Nutt, deceased.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. ROWBOTTOM. Mr. Speaker, as I understand it, there has been another settlement made on this same claim. I understand the gentleman from Michigan [Mr. HOOPER] wants to make an explanation.

Mr. HOOPER. Yes. I hope the House will bear with me for just a moment. I am not in the habit of speaking here very much, but I am so deeply interested in the justice of this bill, even though there is a desire to hasten over the calendar, that I wish now to say a few words. This report represents the feeling of myself and other members of the Committee on War Claims who have given it very serious attention.

In the first place, a great injustice, extending over many years on the part of the Federal Government, has been done; and in the second place, a good deal worse than that, the lack of action on this claim represents virtual ruin for three or four human lives.

Back in the year 1863 a man by the name of Haller Nutt had two or three large plantations—two in Mississippi and one in Louisiana. He was loyal to the Federal Government. The reason I mention that is that the test of loyalty has always been required in the past on these Civil War claims, and the War Claims Committee always requires convincing proof on that subject. General Grant certified to the loyalty of Haller Nutt, the owner of this plantation.

I doubt if on either side of the aisle a higher authority than that of General Grant could be asked. Union soldiers occupied this plantation. In 1863 General Grant moved over the river to attack Vicksburg in the rear, and quartered his soldiers on this plantation. Through one cause or another this property was burned. It was a large property, and the destruction was great. A part of this money was paid, it is true. But——

Mr. ROWBOTTOM. When that payment was made was it not held to be a settlement in full?

Mr. HOOPER. No. It was not considered as a settlement in full. If the gentleman will consult the findings of the Court of Claims he will find that the settlement did not take into account the loss of the cotton gin and 700 bales of cotton. This family, just like the family of Jarndyce against Jarndyce, in Dickens' Bleak House, have been waiting for years on the verge of starvation; waiting for an act of sheer justice on the part of the Federal Government. They, and their father, have waited in vain for 65 years for restitution for a loss for which they were not responsible in any degree. The door of the War Claims Committee was closed to them for years, until at last we decided this year to consider certain claims arising out of the Civil War.

When we examined this claim it appealed strongly to the entire committee, and as a result we made a minute and laborious study of its facts.

The Court of Claims has ascertained the amount that is due these people. The Senate has allowed their claim in twice the amount that we have granted here, but our committee is a very conservative committee—an extremely conservative one.

Mr. LINTHICUM. Will the gentleman yield?

Mr. HOOPER. Yes.

Mr. LINTHICUM. Does the gentleman think this claim is any more just than the claim of Baltimore City, to which claim the gentleman made an objection?

Mr. HOOPER. I do. I do not think the city of Baltimore has an equitable claim against the Government cognizable by us.

Mr. LINTHICUM. I was just thinking that the case was on all fours with the claim of the city of Baltimore.

Mr. HOOPER. I do not think so. We considered that your claim was paid and that there was accord and satisfaction between the city of Baltimore and the Government, but there has not been any accord and satisfaction between the Government of the United States and these poor descendants of Haller Nutt. I want to be brief and I want to make just one other statement.

Mr. BEEDY. Will the gentleman yield?

Mr. HOOPER. Yes.

Mr. BEEDY. The gentleman will recall that when I had charge of the Private Calendar I thought this was an unjust claim because of the amount involved, but upon subsequent study of the case I convinced myself I was wrong. I want to ask the gentleman if the Court of Claims did not find, as a matter of fact, the actual loss here and the actual amount here demanded, but failed to pay it because at that time, by the wording of the statute under which it operated, it did not have jurisdiction over the items in question?

Mr. HOOPER. The gentleman is absolutely correct. I want to say this in closing: The Senate allowed this claim, and the Senate has allowed it before, as I remember, in the sum of $131,000, or thereabouts. I do not think our committee really should have cut it in half, but we did so on the theory that when we came in here there would be less likelihood of an objection to the bill and there would be less of heartbreak and distress upon the part of these poor people back there in Mississippi by having some sort of rough justice voted to them.

Mr. GREEN. Will the gentleman yield?

Mr. HOOPER. Yes.

Mr. GREEN. Are these descendants mostly in Mississippi?

Mr. HOOPER. Three of them are old ladies who, I have been told and believe, are eating corn bread and molasses as their principal diet. They are living in Mississippi, and their brother, the mere shadow of a man, has haunted the Capitol and the halls of the House Office Building literally for years, until at last we unbarred the gates and let this claim be considered.

Mr. SCHAFER. Will the gentleman yield?

Mr. HOOPER. Yes.

Mr. SCHAFER. This claim, if allowed, will be in final settlement, will it not?

Mr. HOOPER. This claim, if allowed, will be in final settlement.

Mr. SCHAFER. Is any attorney interested in the case to any great extent so that we ought to amend the bill providing a limit on the fee to be paid to him?

Mr. HOOPER. There was an attorney who appeared before the committee at one time, I think.

Mr. SCHAFER. Does not the gentleman think there ought to be an amendment in the bill limiting his fee.

Mr. HOOPER. I am perfectly willing that such an amendment be placed in the bill, if the House see fit to allow it.

Mr. QUIN. Who was the attorney?

Mr. HOOPER. I can not remember the name of the attorney.

Mr. QUIN. I think the gentleman is mistaken. Mr. Nutt is the only one.

Mr. HOOPER. The gentleman is correct. I had another matter in mind. The gentleman himself is a lawyer, I believe.

Mr. QUIN. He is a lawyer, but not a practicing lawyer.

Mr. ROWBOTTOM. Mr. Speaker, I withdraw my objection and ask for the regular order.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. HOOPER. Mr. Speaker, I ask unanimous consent to substitute the Senate bill (S. 1769).

The SPEAKER pro tempore. Without objection, the Clerk will report the Senate bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Sargeant Prentiss Knut, administrator de bonis non cum testamento annexo of the estate of Haller Nutt, deceased, late of Natchez, Miss., out of any money in the Treasury not otherwise appropriated, the sum of $131,328, due the estate of the said Haller Nutt for one mill and 700 bales of cotton taken for use by the United States military authorities, in compliance with the findings of the Court of Claims reported to Congress February 18, 1915.

Mr. HOOPER. Mr. Speaker, I offer an amendment, on line 10, strike out "$131,328" and insert in lieu thereof "$65,664."

The SPEAKER pro tempore. The gentleman from Michigan offers an amendment which the Clerk will report.

The Clerk read as follows:

Amentment offered by Mr. HOOPER: In line 8 of the Senate bill strike out "$131,328" and insert in lieu thereof "$65,664."

The amendment was agreed to.

Mr. STRONG of Kansas. Mr. Speaker, there is a further committee amendment, in line 7, insert the words "in full settlement of any and all claims against the Government of any nature whatsoever on the part of the said estate."

The SPEAKER pro tempore. The gentleman from Kansas offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. STRONG of Kansas: In line 6 of the Senate bill, after the word "Mississippi," insert the words "in full settlement of any and all claims against the Government of any nature whatsoever on the part of said estate."

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

AMENDMENT OF ACT FOR RELIEF OF CONTRACTORS

Mr. RUTHERFORD. Mr. Speaker, I ask unanimous consent to return to Calendar No. 508, the bill H. R. 12952.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the title of the bill, as follows:

A bill to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by act of March 6, 1920.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the act of Congress entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by act of March 6, 1920, be, and the same is hereby, amended so that said act shall include J. H. B. Wilder, of Macon, Ga., the contractor for the United States post-office building erected at Forsyth, Ga.; and as to said J. H. B. Wilder, contractor, claims for reimbursement as provided by said act of August 25, 1919, as amended by act of March 6, 1920, may be filed within three months after the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

EDWARD I. GALLAGHER, ADMINISTRATOR

The next business on the Private Calendar was the bill (H. R. 8463) to carry out the findings of the Court of Claims in the case of Edward I. Gallagher, of New York, administrator of the estate of Charles Gallagher, deceased.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. O'CONNOR of New York. Mr. Speaker, I ask unanimous consent that the bill (S. 456), which is number 664 on the calendar, be substituted in place of this bill.

Mr. KNUTSON. Reserving the right to object, Mr. Speaker, is the amount carried in the Senate bill the same as in the House bill?

Mr. O'CONNOR of New York. It is an identical bill which has been passed by the Senate.

Mr. KNUTSON. Is it the same in amount?

Mr. O'CONNOR of New York. The amount is the same; yes.

Mr. SCHAFER. Is there a provision in the bill that this is in full settlement?

Mr. O'CONNOR of New York. It is in final and full settlement. It was expected to be settled years ago, but now he takes this in full settlement.

Mr. SCHAFER. But that is not in the bill. Generally, these bills that come out of the Claims Committee provide that the appropriation therein is in full settlement of the claim.

Mr. KNUTSON. This is all that he has asked for.

Mr. O'CONNOR of New York. This is all he can think up now, and I doubt if he can ever think up any more.

Mr. SCHAFER. I withdraw my objection.

The SPEAKER pro tempore. Without objection, the Clerk will report the Senate bill.

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Edward I. Gallagher, administrator of the estate of Charles Gallagher, deceased, of New York, the sum of $23,387.03, being the amount found due by the Court of Claims for loss and destruction of his schooner *Nimrod* and cargo, during the Civil War, while he was under military orders, within military lines, and executing military commands, as reported to Congress in Senate Document No. 56, Fifty-eighth Congress, third session, Congressional Report No. 10303, filed in the Senate December 5, 1904.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

CHARLES THOMAS WOOTEN

The next business on the Private Calendar was the bill S. 1955, an act for the relief of Lieut. Charles Thomas Wooten, United States Navy.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States is hereby authorized to settle the claim of Lieut. Charles Thomas Wooten, United States Navy, in the sum of $518.25 for medical, hospital, and other expenses incident to an emergency operation upon the said Lieutenant Wooten on May 23, 1924.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

MARY MARTIN HARRISON

The next business on the Private Calendar was the bill (H. R. 7244) for the relief of Mary Martin Harrison.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mary Martin Harrison, mother of the late Henry Hartwell Harrison, ensign, United States Navy, Aviation Service, the sum of $1,125 on account of the death of her son, who was killed in line of duty, the said sum being the amount of six months' pay at the rate said Ensign Henry Hartwell Harrison was receiving at the date of his death, November 1, 1926, at Pensacola, Fla., when he crashed into the sea with a plane in which he was riding.

With the following committee amendment:

Line 13, strike out the period, insert a colon, and add the following proviso: "*Provided*, That the said Mary Martin Harrison establishes that she was dependent upon her son, Henry Hartwell Harrison, at the time of the latter's death."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

T. P. BYRAM

The next business on the Private Calendar was the bill (H. R. 10508) for the relief of T. P. Byram.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That the General Accounting Office be authorized and directed to pay to T. P. Byram, lieutenant (retired), Supply Corps, United States Navy, the sum of $199.57, pay and allowances due him for active duty performed by him during the period from August 6 to August 26, 1921, inclusive, prior to the approval of his bond by the Secretary of the Navy.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ST. FRANCIS DE SALES CHURCH

The next business on the Private Calendar was the bill (H. R. 12738), to provide for the reinterment of bodies now interred in the grounds of St. Francis de Sales Church in the District of Columbia.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. ZIHLMAN. Mr. Speaker, I ask to substitute the Senate bill.

The SPEAKER pro tempore. Without objection the Clerk will read the Senate bill.

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That Michael J. Curley, Roman Catholic Archbishop of Baltimore, a corporation sole under the laws of the State of Maryland, be, and he is hereby, authorized and empowered, under such regulations as the Commissioners of the District of Columbia may prescribe, to transfer the bodies interred in the grounds of the St. Francis de Sales Church in the District of Columbia, known as parcel 155/1, to some other suitable cemetery, or cemeteries, within the District of Columbia. Further interments in such grounds shall be prohibited from and after the passage of this act; and the proprietors thereof are authorized to use the same for any legal purposes they may deem proper, subject to such proceedings in eminent domain as may have been or shall hereafter be taken.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

J. W. ANDERSON

The next business on the Private Calendar was the bill (S. 1387) for the relief of J. W. Anderson.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. UNDERHILL. I object.

WILLIAM R. BOYCE & SON

The next business on the Private Calendar was the bill (S. 379) for the relief of William R. Boyce & Son.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay, out of any moneys in the Treasury not otherwise appropriated, the sum of $1,208.25 to William R. Boyce & Son for storage earned on certain 75 drums of imported alcohol stored by order of the collector of customs, port of New York, for the account of the United States Government, in bonded warehouse of which they are the proprietors, and subsequently destroyed by order of the United States Treasury Department.

The bill was ordered to be read a third time, was read a third time, and passed.

A motion to reconsider was laid on the table.

J. F. NICHOLS

The next business on the Private Calendar was the bill (S. 764) for the relief of J. F. Nichols.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to J. F. Nichols, out of any money in the Treasury not otherwise appropriated, the sum of $200 for the purpose of refunding to J. F. Nichols the said sum paid in excess as a fine to the clerk of the United States district court at Tulsa, Okla., in the case of the United States *v.* John Nichols, No. 463.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

WILLIAM A. LIGHT

The next business on the Private Calendar was the bill (S. 1691) for the relief of William A. Light.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and in full settlement against the Government, the sum of $1,524.89 to William A. Light, of Valentine, Ariz., as compensation for injuries sustained on September 26, 1916, in the discharge of his official duties as superintendent of the United States Indian-school agency at Mescalero, N. Mex.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

F. L. CAMPBELL

The next business on the Private Calendar was the bill (S. 2227) for the relief of F. L. Campbell.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to F. L. Campbell, clerk of the United States District Court for the District of Kansas, the sum of $500, being the amount erroneously deposited by him to the credit of the Treasurer of the United States and since covered into the Treasury, as proceeds of a forfeited bond, such sum in fact representing a cash bond given by George Orr for his appearance before the district court, and subsequently refunded to the bondsman by said F. L. Campbell under order of the court.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

HATTIE M. M'MAHON

The next business on the Private Calendar was the bill (S. 2697) for the relief of Hattie M. McMahon.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to redeem in favor of Hattie M. McMahon, United States Treasury note, series B-1925, issued June 15, 1922, matured December 15, 1925, serially numbered 57896, for $1,000, with interest at the rate of 4¾ per cent per annum from December 15, 1924, to December 15, 1925, without presentation of the said note

or the coupons representing interest thereon from December 15, 1924, to December 15, 1925, the note having been lost, stolen, or destroyed: *Provided,* That the said note shall not have been previously presented for payment and that no payment shall be made hereunder for any coupons which shall have been previously presented and paid: *Provided further,* That the said Hattie M. McMahon shall first file in the Treasury Department a bond in the penal sum of double the amount of the note and the interest payable thereon, in such form and with such surety or sureties as may be acceptable to the Secretary of the Treasury, to indemnify and save harmless the United States from any loss on account of the lost, stolen, or destroyed Treasury note herein described or the coupons belonging thereto.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

SAWYER MOTOR CO.

The next business on the Private Calendar was the bill (H. R. 9943) for the relief of Sawyer Motor Co.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. ROWBOTTOM. Mr. Speaker, reserving the right to object, I notice that there was only one bid made for this truck. Why were not competitive bids made for the truck?

Mr. WEAVER. Mr. Speaker, this bill should pass. The Forest Service purchased this truck from the Sawyer Motor Co. at Asheville, N. C. They thought they had authority to purchase the truck. The comptroller afterwards decided that they did not have that authority, but they had used the truck for about six months, and this amount of this bill was agreed upon as a settlement for the truck.

Mr. ROWBOTTOM. Mr. Speaker, I withdraw the objection.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Sawyer Motor Co. (Inc.), of Asheville, N. C., the sum of $510, in full payment for the use by the Forest Service of the Department of Agriculture of a motor truck, the property of said company, during the period July 2, 1926, to January 25, 1927.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

RUSSELL & TUCKER

The next bill on the Private Calendar was the bill (S. 620) for the relief of Russell & Tucker and certain other citizens of the States of Texas, Oklahoma, and Kansas.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. UNDERHILL. I object.

BERTINA SAND

The next business of the Private Calendar was the bill (H. R. 7552) for the relief of Bertina Sand.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $5,000 to Bertina Sand, of Minneapolis, Minn., as reimbursement for loss of earning power and for expenses actually incurred by her as the direct result of personal injuries received by her on the 7th day of April, 1927, at Minneapolis, Minn., when she was struck by a Government motor vehicle then and there negligently operated by the Post Office Department of the United States Government, and as full compensation for said injuries, the pain and suffering from the same, and the damages resulting therefrom.

With the following committee amendment:

Line 5, strike out "$5,000" and insert "$4,560.25."

The committee amendment was agreed to.

Mr. IRWIN. Mr. Speaker, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. IRWIN: At the end of the bill insert: "*Provided,* That it shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum which in the aggregate exceeds 5 per cent of the amount of any item appropriated in this bill on account of services rendered or advances made in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not less than $1,000 or more than $2,000."

The amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ST. VINCENT'S ORPHAN ASYLUM

The next business on the Private Calendar was the bill (S. 2511) to change the name of St. Vincent's Orphan Asylum and amend the act entitled "An act to amend an act entitled 'An act to incorporate St. Vincent's Orphan Asylum, in the District of Columbia,' approved February 25, 1831."

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the act of Congress amending the act incorporating St. Vincent's Orphan Asylum, approved on the 22d day of June, 1910, be, and it hereby is, amended as follows:

"The name of said corporation shall be St. Vincent's Home and School.

"SEC. 2. The purpose of said corporation shall be to care for and educate orphan, indigent, and other female children under 18 years of age under such rules and regulations as it may adopt.

"SEC. 3. All property now vested in St. Vincent's Orphan Asylum as incorporated as aforesaid is hereby vested in and confirmed to St. Vincent's Home and School as reincorporated by this act. Said corporation shall have power to acquire, hold, and convey such real estate as it may deem proper for its said purposes and to hold such personal property as it may use, or use the income from, for said purposes, and to take and hold real estate and personal property by grant, devise, or bequest: *Provided,* That any real estate granted or devised to it and not used for its corporate purposes shall be sold and conveyed away within five years after the date of such devise.

"SEC. 4. Cornelius F. Thomas, Michael J. Riordan, Samuel Joseph Henry, Paul E. Johnson, O. H. Perry Johnson, Peter A. Drury, Michael F. Calnan, William P. Normoyle, E. Francis Riggs, Joseph E. Ransdell, B. Francis Saul, James F. Shea, and William H. De Lacy are hereby constituted and confirmed as the said corporation and as trustees to manage the said corporation. When a vacancy occurs in their number they may fill such vacancy, and they may increase or diminish their number from time to time as they may deem expedient. They shall elect a president, a secretary, and a treasurer from their number, adopt a corporate seal, and make all needful by-laws and rules and regulations for the institution to be conducted by said corporation.

"SEC. 5. That the proviso in section 1 of said act of Congress approved on the 22d day of June, 1910, and all parts of said act inconsistent with this act are hereby repealed.

"SEC. 6. The right is reserved to alter, amend, or repeal this act."

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

PETIT JEAN MOUNTAIN

The next business on the Private Calendar was the bill (S. 3338) authorizing the sale of certain lands on Petit Jean Mountain, near Morrilton, Ark., for use by the Young Men's Christian Association of Arkansas.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That upon payment therefor at the rate of $1.25 per acre, the Secretary of the Interior be, and he is hereby, authorized and directed to issue patent for the following-described lands to the State executive committee of the Young Men's Christian Association of Arkansas for use by the said association for a camp: The south half of the northeast quarter, southeast quarter of the northwest quarter and lot 4, section 31, in township 6 north, range 17 west, county of Conway, State of Arkansas, containing 168.97 acres: *Provided,* That there shall be reserved to the United States all oil, coal, or other minerals in the land, and the right to prospect for, mine, and remove the same under such rules and regulations as the Secretary of the Interior shall prescribe.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

TITLE TO CERTAIN LANDS IN FAULKNER COUNTY, ARK.

The next business on the Private Calendar was the bill (S. 3602) to quiet title and possession with respect to certain lands in Faulkner County, Ark.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore (Mr. TILSON). The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That all right, title, and interest of the United States in and to the lands situated in Faulkner County, Ark., described as follows: The south half southwest quarter section 36, township 7 north, range 13 west, fifth principal meridian, Arkansas, according to the official plat thereof dated April, 1819, be, and the same are hereby, granted, released, and relinquished by the United States in fee simple to the respective owner or owners of the equitable title and to their heirs and assigns forever, as freely and completely in every respect whatever as could be done by patents issued therefor according to law.

SEC. 2. Nothing in this act shall in any manner abridge, divest, impair, injure, or prejudice any valid right, title, or interest of any person or persons in or to any portion or part of the lands mentioned in the said first section, the true intent of this act being to relinquish and abandon, grant, give, and concede any and all right, interest, and estate, in law or equity, which the United States is or is supposed to be entitled to in said lands, in favor of all persons, estates, firms, or corporations, who would be the true and lawful owners of the same under the laws of the State of Arkansas, including the laws of prescription, in the absence of the said interest and estate of the United States.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

A similar House bill was laid on the table.

E. M. GILLETT AND J. H. SWENARTON

The next business on the Private Calendar was the bill (H. R. 7330) for the relief of E. M. Gillett and J. H. Swenarton.

The title of the bill was read.

The SPEAKER pro tempore Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the General Accounting Office is hereby authorized and directed to adjust and settle the claim of E. M. Gillett in the sum of $631.82, and the claim of J. H. Swenarton in the sum of $631.82, in connection with the inspection of tea for the Navy during the fiscal year 1926, and to pay the amounts allowed from the appropriation "Provisions, Navy, Bureau of Supplies and Accounts, 1926."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

FRANS JAN WOUTERS, OF ANTWERP, BELGIUM

The next business on the Private Calendar was the bill (H. R. 11260) for the relief of Frans Jan Wouters, of Antwerp, Belgium.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That an appropriation in the sum of $1,648 be, and the same is hereby, authorized to compensate Frans Jan Wouters for the death of his father, Jan Van Wouters, a Belgian national, as a result of being struck by a United States Navy automobile in the city of Antwerp, Belgium, on August 12, 1919.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

COMMANDER ALBERT CUSHING READ

The next business on the Private Calendar was the resolution (H. J. Res. 51) tendering the thanks of Congress to Commander Albert Cushing Read, United States Navy, for his achievement in completing the first trans-Atlantic airplane flight, and providing for his advancement on the list of commanders of the Navy.

The title of the resolution was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read as follows:

Joint resolution (S. J. Res. 51) tendering the thanks of Congress to Commander Albert Cushing Read, United States Navy, for his achievement in completing the first trans-Atlantic airplane flight, and providing for his advancement on the list of commanders of the Navy

Resolved, etc., That the thanks of Congress are hereby tendered to Commander Albert Cushing Read, United States Navy, for his success in accomplishing the first trans-Atlantic airplane flight.

SEC. 2. The President is hereby authorized to advance Commander Albert Cushing Read, United States Navy, 10 numbers on the list of commanders of the Navy, to rank next after Commander Aubrey Wray Fitch. Said Albert Cushing Read shall be an additional number in the grade of commander, and in any grade to which he may hereafter be promoted.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

FRANK MURRAY

The next business on the Private Calendar was the bill (H. R. 3559) for the relief of Frank Murray.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. Without objection, the Clerk will report the committee amendment instead of the original bill.

There was no objection.

The Clerk read as follows:

Committee amendment: Strike out all after the enacting clause and insert the following:

"That the Secretary of the Interior is hereby directed to investigate the removal of Frank Murray, a member of the Bad River Band of Chippewa Indians, and an allottee upon the Bad River Reservation in Wisconsin, from said reservation; and if he shall find that such removal by officers and agents of the Government was illegal, the Attorney General concurring, he shall so certify to the Secretary of the Treasury.

"Upon such certification being made to the Secretary of the Treasury, he is hereby authorized and directed to pay to said Frank Murray the sum of $3,000 to compensate him for injuries to his business and property by reason of such illegal removal."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

TOWN SITE OF ALVA, OKLA.

The next business on the Private Calendar was the bill (H. R. 10550) to provide for the acquisition by Meyer Shield Post, No. 92, American Legion, Alva, Okla., of lot 19, block 41, the original town site of Alva, Okla.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 10550) to provide for the acquisition by Meyer Shield Post, No. 92, American Legion, Alva., Okla., of lot 19, block 41, the original town site of Alva, Okla.

Whereas lot 19, block 41, of Alva, Okla., patented to Company I, First Regiment Oklahoma National Guard, pursuant to the provisions of the act of June 18, 1912 (37 Stat. 136), is not being used for the purpose for which granted: Therefore

Be it enacted, etc., That lot 19, block 41, of the original town site of Alva, Okla., be, and it is hereby, forfeited to the United States, and the United States hereby resumes the title thereto.

SEC. 2. That the Secretary of the Interior be, and he is hereby, authorized and directed to cause a patent to issue to Meyer Shield Post, No. 92, American Legion, Alva, Okla., for the tract of land described as lot No. 19, block No. 41, according to the original plat of such city.

With committee amendments as follows:

Page 2, line 5, after the word "to," insert "Dr. O. E. Templin, V. G. Gardner, and Merritt C. Mason as trustees of." On page 2, line 7, after the word "Oklahoma," insert "and to their successors." After line 9, insert a colon and add the following proviso: "*Provided, however,* That said patent shall be issued upon the express condition that Meyer Shield Post No. 92, American Legion, Alva, Okla., shall erect a post building upon said lot within five years after the approval of this act."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

PORTER BROS. & BIFFLE ET AL.

The next business on the Private Calendar was the bill (H. R. 4083) authorizing Porter Bros. & Biffle and others, to bring suit against the United States of America for loss and damages sustained through erroneous certification by the Bureau of Animal Industry.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. UNDERHILL. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

JOSEPH N. MARIN

The next business on the Private Calendar was the bill (H. R. 9300) for the relief of Joseph N. Marin.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That in the administration of the pension laws Joseph N. Marin, late of the United States ship *Solace,* shall hereafter be held and considered to have been honorably discharged from the naval service of the United States as a third-class apprentice of said ship.

With a committee amendment as follows:

Page 1, line 7, after the word "ship," insert "*Provided,* That no back pay or allowances shall accrue prior to the passage of this act."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

FRED ELIAS HORTON

The next business on the Private Calendar was the bill (H. R. 9597) for the relief of Fred Elias Horton.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to order Fred Elias Horton, formerly commander, United States Naval Reserve Force, to appear before a naval retiring board for the purpose of determining whether or not the disability complained of in his case originated in the line of duty in time of war: *Provided,* That if said naval retiring board finds that the said Fred Elias Horton is now suffering from a disability incurred in the line of duty in time of war which renders him unfit to perform all duties of the grade of commander, United States Naval Reserve Force, in time of war, the President be, and he is hereby, authorized to appoint Fred Elias Horton a commander, United States Naval Reserve Force, and to place him upon the retired list of the Navy with the retired pay and emoluments of that grade: *Provided further,* That no back pay, allowances, or emoluments shall become due because of the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

CLARA PERCY

The next business on the Private Calendar was the bill (H. R. 11045) to confer jurisdiction upon the Court of Claims to hear and determine the claim of Clara Percy.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. UNDERHILL. Mr. Speaker, I object.

SALLIE STAPLEFORD AND OTHERS

The next business on the Private Calendar was the bill (S. 343) for the relief of Sallie Stapleford, Mrs. J. C. Stuckert, Mary E. Hildebrand, Kate Wright, Mary M. Janvier, Harry L. Gray, Frank D. Carrow, Harry V. Buckson, George H. Swain, Claude N. Jester, and Charles H. Jamison.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HICKEY. Mr. Speaker, I object.

Mr. KNUTSON. Is it the gentleman's intention to object to everything from now on?

Mr. HICKEY. Everything that the gentleman from Massachusetts has on the calendar.

Mr. KNUTSON. Every bill from the Committee on Claims?

Mr. HICKEY. Yes.

Mr. UNDERHILL. May I say to the gentleman that I have no personal interest in these claims, not one of them. Senate claims are usually reported by the chairman of the committee.

Mr. HICKEY. I have no particular interest in the claim you objected to. It has passed the Senate unanimously, and is now on this calendar. It passed this House unanimously at the last session of Congress, and I see no reason why the gentleman should object.

Mr. UNDERHILL. It establishes a precedent which Congress never has established. It refers to the Court of Claims a death claim, which has never been done. It is an absolute departure from the rule laid down by this House for the adjudication of these claims. If the House wants to suspend operations on this calendar now I am perfectly willing, but the case is too serious, it is too important, it is too far-reaching, and it is too great a departure from a policy followed by Congress since our Government was established for us to pass to-night by unanimous consent.

Mr. HICKEY. The claim which the gentleman objected to is as meritorious a claim as ever went on this calendar. It simply confers jurisdiction upon the Court of Claims to hear and determine a claim for damages against the United States Government growing out of an accident that occurred in the Panama Canal Zone. It is a valid, meritorious claim, and if this bill becomes law it will simply give to the Court of Claims jurisdiction to hear and determine this claim under the rules of the common law, which are very difficult to meet in a damage suit.

Mr. UNDERHILL. Mr. Speaker, I will simply say in defense of the position I have taken that I will refer to the recollection of the oldest Member or the Member who has had the longest service here if the House has ever referred a death claim to the Court of Claims. It never has been done.

Mr. HICKEY. It was passed by unanimous consent in the last Congress, this same bill. It went over to the Senate but it was lost during the closing days of the session.

Mr. FULMER. If the gentleman will permit, I would like to state that I think it was in the last session that I passed a bill which permitted the Court of Claims to pass upon a claim of my constituent and get judgment for about $40,000, a similar case to this one.

Mr. UNDERHILL. The record will show that the gentleman is mistaken.

Mr. DOWELL. Mr. Speaker, I demand the regular order.

The SPEAKER pro tempore. The regular order is: Is there objection to the consideration of the bill?

Mr. HICKEY. I object.

LLOYD LAFOT

The next business on the Private Calendar was the bill (S. 362) to provide for the advancement on the retired list of the Navy of Lloyd Lafot.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. TILSON). Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That Ensign Lloyd Lafot, United States Navy, retired, shall have the rank and receive the pay and allowances of a lieutenant (junior grade) on the retired list of the United States Navy. Such rank shall take effect on March 5, 1924, but no back pay or allowances shall accrue to said officer by reason of the passage of this act.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

FLORIDA EAST COAST CAR FERRY CO.

The next business on the Private Calendar was the bill (S. 445) for the relief of the Florida East Coast Car Ferry Co.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HICKEY. I object, Mr. Speaker.

ALBERT WOOD

The next business on the Private Calendar was the bill (S. 1217) for the relief of Albert Wood.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any moneys in the Treasury not otherwise appropriated, to Albert Wood, of Vernonia, Columbia County, Oreg., the sum of $750 in full compensation for losses suffered by him through and in connection with the cancellation by the Post Office Department in October, 1915, of a contract held by him for carrying the mails on star route No. 73195, in the State of Oregon, from July 1, 1914, to June 30, 1918.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

OMER D. LEWIS

The next business on the Private Calendar was the bill (S. 1448) for the relief of Omer D. Lewis.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $2,573.25 to Omer D. Lewis for the purpose of reimbursing him for expenses incurred for hospital and doctor's fees paid and serious personal injuries received while aiding Federal officers engaged in suppressing the sale of liquor to Indians, the same to be immediately available.

With the following committee amendment:

Page 1, line 5, strike out "$2,573.25" and insert "$1,573.21."

The committee amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

JAMES M. E. BROWN

The next business on the Private Calendar was the bill (S. 1646) for the relief of James M. E. Brown.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. WARREN. Mr. Speaker, reserving the right to object, we can only size up these bills by what the reports contain.

This bill seeks to compensate an apparently honorable and law-abiding man and his wife for the outrageous and shocking assault made on them five years ago in the District of Columbia by revenue officers. A claim of this kind is certainly very disheartening to those who would like to see the enforcement of prohibition a success.

I ask unanimous consent, Mr. Speaker, that the report, which is short, be printed immediately following the passage of this bill so that the House may see just what they have voted upon.

The SPEAKER pro tempore. The gentleman from North Carolina asks unanimous consent to extend his remarks in the RECORD by inserting the report made in connection with this bill. Is there objection?

There was no objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay James M. E. Brown and Lena Belle Brown, out of any money in the Treasury not otherwise appropriated, the sum of $2,500, in full and final settlement of all claims against the Government for damages resulting from a raid made on December 20, 1923, by internal-revenue agents upon the premises of the said James M. E. Brown and Lena Belle Brown at 1954 Columbia Road NW., Washington, D. C.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

The matter referred to by Mr. WARREN is as follows:

[H. Rept. No. 1411, 70th Cong., 1st sess.]

JAMES M. E. BROWN

Mr. UNDERHILL, from the Committee on Claims, submitted the following report (to accompany S. 1646):

The Committee on Claims, to whom was referred the bill (S. 1646) for the relief of James M. E. Brown, having considered the same, report thereon with a recommendation that it do pass.

[S. Rept. No. 730, 70th Cong., 1st sess.]

The Committee on Claims, to whom was referred the bill (S. 1646) for the relief of James M. E. Brown, having considered the same, report favorably thereon with the recommendation that the bill do pass with the following amendment:

In line 6, strike out the figures "$5,000" and insert in lieu thereof the figures "$2,500."

The bill provides for the payment of $2,500 in full and final settlement of all claims against the Government for damages resulting from a raid on December 20, 1923, by internal-revenue agents upon the premises of James M. E. Brown and Lena Belle Brown at 1954 Columbia Road NW., Washington, D. C.

Under date of February 24, 1927, the Secretary of the Treasury stated that—

"The Treasury will interpose no objection to the passage of this bill, and, moreover, after a careful review of the files and thorough consideration of other circumstances connected with this case, I believe that favorable consideration should be given to the claim."

The facts are fully set forth in the following correspondence from the Treasury Department and in a memorandum submitted to the committee, which are appended hereto and made a part of this report.

TREASURY DEPARTMENT,
Washington, February 24, 1927.

Hon. RICE W. MEANS,
United States Senate.

MY DEAR SENATOR: I am in receipt of your letter of February 22, 1927, transmitting a copy of a bill for the relief of James M. E. Brown and Lena Belle Brown in the sum of $5,000.

The Treasury will interpose no objection to the passage of this bill, and, moreover, after a careful review of the files and thorough consideration of other circumstances connected with this case, I believe that favorable consideration should be given to the claim.

Very truly yours,

A. W. MELLON,
Secretary of the Treasury.

* * * * * * *

TREASURY DEPARTMENT,
Washington, July 3, 1924.

Mrs. J. M. E. BROWN,
1954 Columbia Road, Washington, D. C.

MY DEAR MADAM: I am in receipt of your letter of June 19, with further reference to the raid which was conducted at 1954 Columbia Road on December 20, 1923.

As stated in previous communications addressed to you on this subject, the raid in question was conducted as the result of a search warrant issued upon the advice of one of the assistant United States attorneys for the District of Columbia, to whom the facts indicating the character of business which was being conducted there were presented.

It is regretted that you and your family suffered illness and expense as the result of the occurrence, but under the circumstances there does not seem to be anything the department can do in the matter.

Yours very truly,

GARRARD B. WINSTON,
Acting Secretary of the Treasury.

* * * * * * *

MEMORANDUM IN RE RAID ON PREMISES 1954 COLUMBIA ROAD NW. ON DECEMBER 20, 1923, BY POLICE AND INTERNAL REVENUE AGENTS

Mr. and Mrs. James M. E. Brown reside at the above premises, which is a three story and basement dwelling house. They also, at the time, owned and operated a laundry at No. 1509 Connecticut Avenue NW. They have two children, Edmonds and Carolyn, aged 9 and 7 years, respectively.

In order to help support themselves they rent out the second and third floors as apartments. Doctor Sokolowski, secretary of the Polish Legation, occupied the third floor, and Mr. Hertelendy, secretary of the Hungarian Legation, lived on the second floor. Further, both these gentlemen had been given permission to store any of their effects, including liquor, in the basement.

At 10.30 on the morning of December 20, 1923, a number of police and revenue officers broke into the said premises under authority of a

search warrant issued by the Internal Revenue Bureau. No attempt at peaceable entry was made, but entrance was effected through breaking in the rear basement door.

At the time of breaking into the house the young colored maid, by name Cloan Shawn, was the only person in the house, the children being at school and the parents, Mr. and Mrs. Brown, being at their laundry.

These officers, after breaking down the door to the garage and the outer basement door, entered and broke open other doors in the basement, tore open bureau and dresser drawers, opened sealed mail and letters, responded to at least one telephone call to one of the diplomatic tenants insulting the person calling by insinuating that their "stuff" was all ready, etc. Further, they tracked coal dust and dirt over the whole house, and examined through all closets and furniture in the home throughout the whole building.

The maid was placed under arrest and insulting proposals as well as threats were made to her. The officer who did this especial act of lawless brigandage was a Sergeant McQuade, of the police force.

Permission to telephone either Mr. or Mrs. Brown was denied the said maid, and as it neared the hour of noon when it was her duty to go to the school for the children to conduct them home for their lunch, she told the said officers that she "had to go for the children, as the little boy (Edmonds) had convulsions and she always had to go for them—that they were not allowed on the streets alone." This permission was denied her, and then she began begging and crying, exclaiming that the little boy might have a convulsion at any time; that he might die, especially if he became frightened.

Finally, at 12.45 p. m., the said maid was granted permission to telephone to Mrs. Brown at the laundry, but was allowed to say only, "I can not go for the children. I am busy." After saying that the telephone was taken from her and hung up by one of the officers.

This unusual procedure on the part of the maid badly frightened Mrs. Brown, who immediately made all possible haste to her home. Arriving there, she found the house filled with officers, who placed her under arrest immediately. In the meantime, before entering her home, she had sent her laundry delivery boy after the children.

When the children arrived and saw a great many policemen in charge of their home the little boy went into a convulsion and the little girl was badly frightened and cried most pitiably. Neither Mrs. Brown nor the maid was allowed to give the little girl her luncheon, but a police officer performed that service, being afraid, possibly, that this 7-year-old girl would make away with or otherwise dispose of and secrete the liquor.

About 1.10 p. m. the Polish secretary and a clerk of the Polish Legation came in and stated to the officers that the liquor found in that house belonged to him. An argument ensued; the Polish secretary even went to the extent of telephoning the State Department, but not until one of the internal revenue agents, a Mr. Cox, had called his chief, and were ordered to do so, did the officers leave.

It is submitted that Mr. and Mrs. Brown had an undisputed right to rent rooms or apartments to diplomatic officials or anyone else they may choose, and that these diplomatic officials had, under our laws and regulations, the right to own and store liquors at their homes, which in this instance was the home of Mr. and Mrs. Brown.

It is further submitted that it was the duty of the police and internal revenue officials to investigate before issuing a warrant or before breaking into a private home, and that had they followed out their plain duty in this instance they could not but have learned that Mr. and Mrs. Brown bore a fair and unblemished character throughout the neighborhood, and that diplomats lived in their home as tenants. As officers charged with the duty of enforcing the laws, they can not but have been aware of the immunity granted diplomatic officials in this and all civilized governments of the world, and that no right existed within the scope of their duty and powers to issue this warrant on the one hand or to serve it on the other hand.

Mr. and Mrs. Brown have both suffered severely because of this brutal and stupid act on the part of said officials. They both became ill and finally had to abandon their laundry in which they had invested $10,000. The son became much worse and his convulsions have increased in intensity and frequency. Mr. Brown became ill with pneumonia as a direct result of this act of brigandage, and for weeks lay at death's door. The expenses of this illness were considerable. Mrs. Brown has been under the care of physicians continually, and is to-day almost a nervous wreck.

Added to their physical suffering is the reputation they have had thrust upon them. They are called "bootleggers," even the children and servants of neighbors frequently taunting and speaking of them and their children as "bootleggers."

Mr. and Mrs. Brown feel that this outrage and insult has damaged their health and fair name, as well as that of their children, and that they are entitled to a published apology from both the Internal Revenue Bureau or the Secretary of the Treasury and the Commissioners of the District of Columbia, as well as damages in money from the United States for the wrong and injury done them, their children, and their property.

Respectfully submitted in behalf of Mr. and Mrs. J. M. E. Brown.

JOHN STUART HUNT.

FLORIDA EAST COAST CAR FERRY CO.

Mr. GREEN. Mr. Speaker, I ask unanimous consent to return to Calendar No. 543 (S. 445) for the relief of the Florida East Coast Car Ferry Co.

The SPEAKER pro tempore. The gentleman from Florida asks unanimous consent to return to the bill (S. 445), Calendar No. 543. Is there objection?

There was no objection.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and is hereby, authorized and directed to pay to the Florida East Coast Car Ferry Co., a corporation, out of any money in the Treasury not otherwise appropriated, the sum of $6,971.45 covering entrance and clearance fees and tonnage tax erroneously collected by the customs authorities at Key West, Fla., during the period from September 24, 1922, to May 28, 1924, and in violation of section 2792, Revised Statutes, as amended by the act approved May 28, 1908 (35 Stat. 424), and section 441 of the tariff act of 1922.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

JOHN LEWIS BURNS

The next business on the Private Calendar was the bill (S. 1852) to correct the naval record of John Lewis Burns.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. TILSON). Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Navy be, and he is hereby, authorized and directed to correct the naval record of the late John Lewis Burns, gunner, United States Navy, to show that his death on August 6, 1918, while attached to the U. S. S. *North Carolina,* was incurred in line of duty and was not due to his own misconduct.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

M. LEVIN & SONS

The next business on the Private Calendar was the bill (S. 2438) for the relief of the firm of M. Levin & Sons.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection.

Mr. HICKEY. I object.

CHARLIE M'DONALD

The next business on the Private Calendar was the bill (S. 2788) for the relief of Charlie McDonald.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. HICKEY. I object.

ROBERT C. OSBORNE

The next business on the Private Calendar was the bill (S. 3722) for the relief of Robert C. Osborne.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the United States Treasury not otherwise appropriated, to Robert C. Osborne the sum of $5,000 in full compensation for his services rendered to the United States Government by the arrest in 1918 of Victorio Cabellero, who murdered the postmaster and robbed the United States post office at Tecate, Calif., on March 14, 1914, and for which crimes he was convicted of murder in the first degree and is now serving a life sentence.

With the following committee amendment:

Page 1, line 6, strike out "$5,000" and insert "$2,000."

The committee amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BIRTHPLACE OF ANDREW JACKSON

Mr. STEVENSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on certain rights of South Carolina.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection

Mr. STEVENSON. Mr. Speaker, having obtained leave to extend my remarks on certain rights of South Carolina, I hereby do extend them on the right of South Carolina at least to argue that Andrew Jackson was born in South Carolina, the romantic and free-hand historian, John Trotwood Moore, to the contrary notwithstanding. I am indebted to Mr. A. S. Salley, jr., secretary to the Historical Commission of South Carolina, for the collection and arrangement of the facts herein recited, which certainly demonstrate that Mr. Moore was either woefully ignorant of many facts or exceedingly careless in his statement.

The effusion of Mr. John Trotwood Moore respecting the birthplace of Andrew Jackson, which the gentleman from North Carolina [Mr. HAMMER] had printed in the CONGRESSIONAL RECORD of May 24 contains nothing not heretofore in evidence in the discussion, and shows a decided dependence on the imagination for both facts and explanations thereof.

The explanation of the boundary-line matter given by Mr. Moore is entirely at variance with the records in the case. The dispute resulting in a survey, which he says "was ratified by the general assemblies of both States on November 2, 1815," had nothing to do with that portion of the line which passed through the Waxhaws, and in no way affected the question of the boundary line in its relation to the birthplace of Jackson. In 1772 the boundary line from a point on the Charles Town and Salisbury road 1 mile southeast of its crossing of Waxhaw Creek to the northern extremity of the Cherokee boundary line on Tryon Mountain was agreed upon by commissioners on the part of the two Provinces, was approved of by the general assemblies of the two Provinces, and approved by the Government of Great Britain, and has been the occasion of no dispute between the Carolinas since.

During the Revolution the Cherokee Nation was twice invaded by South Carolina forces, and after the last invasion, in 1783, the Cherokees were entirely driven out of the State and all of their lands confiscated and opened up to settlers. Georgia claimed that portion of their former territory lying between the Toogaloo and Keowee Rivers and south of the thirty-fifth parallel of latitude but by a conventional agreement with South Carolina, in 1787, relinquished that claim. The settlements along the mountain ridge west of the terminus of the line of 1772 were so sparse that it was not until 1808 that the States of North and South Carolina undertook the work of extending the line of 1772 to the Chattooga River, which, above its junction with the Toogaloo, was the boundary between South Carolina and Georgia.

In July, 1808, commissioners on the part of the two States met in Columbia and adjourned from time to time until July 20, 1813, when they met at the terminus of the line of 1772, and, after working on the line "to the western extremity of the State of South Carolina" until September 4, 1813, reached an agreement at McKinney's, on the Toxaway River, and signed it up and reported to the general assemblies of their respective States. On the 21st of December following, the General Assembly of South Carolina ratified the agreement. North Carolina was not satisfied with the line agreed upon and called for further parley. Commissioners on the part of the two States were appointed and met on North Pacolet River September 11, 1815, and worked over the matter until November 2, 1815, when they reached an agreement. South Carolina's General Assembly ratified the agreement December 15, 1815. This line was 24 miles and 189 poles in length. The agreements respecting this piece of line are to be found in the first volume of Statutes at Large of South Carolina, pages 416–421, and will be found to differ from the representations of Mr. Moore in more particulars than have been here pointed out.

Mr. Moore says that—

at the time of his birth, March 15, 1767, there was grave doubt about the line, and when it is remembered that it was admitted on both sides that the line run in 1737, 30 years before Jackson was born, was 11 miles short of reaching the thirty-fifth degree of north latitude, to which the surveyor had been instructed to run, thus producing a triangle with an hypotenuse following 11 miles from the true point of a straight line north and south within the true line as established November 2, 1815, and the false hypotenuse as run in 1737 was an area 5 or 6 miles in extent, in which on one side or the other of the line close to it were located the homes of the five Hutchison women.

That is a labored and confused display of the utmost ignorance of the whole boundary feature of the case. The agreement entered into by commissioners on the part of the two Provinces in 1735 was that the line should—

begin at the sea, 30 miles distance from the west side of the mouth of Cape Fear River—

That—

from thence a line be run on a northwest course to the latitude of 35° N. and from thence due west to the South Seas—

That—

if the said line shall take in any part of the nation of Indians called the Cherokees or Catawbas, then such line shall be set off so as to include said Indians within the government of South Carolina until such line shall again come to the latitude of 35°, and from thence a due west course as before.

In the same year the commissioners ran the line "in a northwestwardly direction" for about two-thirds of the distance to the thirty-fifth parallel. In 1737 a surveyor was employed to continue it in the same direction to the thirty-fifth parallel. He reported that he had completed the work and had erected a stake in a meadow at the terminus of the line. The governors of both Provinces believed that that stake was on the thirty-fifth parallel and governed themselves accordingly. For some years after that point on the boundary had been fixed very few settlers secured grants in that vicinity and most of such grants were issued by the Governor of North Carolina, who, believing that stake to be on the thirty-fifth parallel, guessed that lands which he granted out were situated north of a direct line west from that point. In many instances his guesses were wrong and the lands which he granted were subsequently found to lie south of such a line.

He also granted out thousands of acres of land lying between that supposed location of the thirty-fifth parallel and the parallel itself.

In the autumn of 1763 a conventional agreement was arranged at Augusta, Ga., between the several governors of the four southern Provinces, and John Stuart, His Majesty's superintendant of Indian affairs for the southern Provinces of North America, and the several nations of Indians of the said Provinces, and under the terms of that agreement the Catawba Indians were allotted a reservation 15 miles square extending to both sides of the Catawba River below the junction of its two forks. This tract was surveyed out early in 1764 by Samuel Wyly. The proceedings at Augusta have been published and Wyly's survey is in the office of the Historical Commission of South Carolina.

By 1764 settlers had begun to take up lands in the upper parts of the present counties of Marlboro, Chesterfield, Lancaster, and Chester, in South Carolina, and it became desirable to have the line established westward from the terminus of the line of 1737 along the supposed thirty-fifth parallel. The two Provinces agreed upon surveyors and the line was taken up at the stake of 1737 and run due west 64 miles. When the surveyors reached the Charles Town-Salisbury public road it was discovered that the line just run did not coincide with the thirty-fifth parallel but was over 11 miles south thereof. It was then late in the spring and the surveyors objected to running a new line in summer and reported the matter to the Governor of South Carolina, who passed the matter on to the Board of Trade in London.

In April, 1771, the Board of Trade petitioned the Crown for permission to instruct the Governors of North and South Carolina to appoint commissioners to continue the line along the Charles Town-Salisbury road to where it entered the Catawba Nation; thence along the southern, eastern, and northern boundaries of said reservation to the intersection of the northern line with the Catawba; thence up the center of the river to the confluence of the two branches thereof; thence due west to the Cherokee boundary line, and to make such line and the line run in 1764 the final boundary line. His Majesty approved of the suggestion, and in May, 1771, issued orders to the governors of the two Provinces to appoint commissioners to carry the proposal into effect. The governor of each of the Provinces appointed two commissioners and two surveyors, and the survey was taken up at the confluence of the two forks of the Catawba River in latitude 35 degrees 8 minutes north, and was run due west on that parallel until it reached the Cherokee line on Tryon Mountain, a distance of 65 miles. As the public road from the western terminus of the line of 1764 to the point where the road crossed the southern boundary line of the Catawba Reservation was the only part of the boundary thus established which did not require staking and blazing, the commissioners merely defined that road as the line.

The survey was approved in England. By that arrangement the strip of land lying within the line of 1764, the thirty-fifth parallel, the Charles Town-Salisbury road and a part of the Catawba boundary and the extension of the line of 1737 was traded to North Carolina for a like strip lying within the thirty-fifth parallel, the Catawba River, the line of 1772, and the Cherokee line. It embraced a small corner of the present county of Mecklenburg, a near parallelogram of the present county of Union, a parallelogram of the present county of Anson, and a triangle of the present county of Richmond, in North Carolina. The latter triangle is the only one involved in the error of the surveyor in 1737, and the only hy-

potenuse involved is that which is made by the northwest line, which the said surveyor should have carried on to the thirty-fifth parallel. In that little strip, about 64 miles long and over 11 wide, lay the land once owned by George McKemey, whereon Mr. Moore says Jackson was born. McKemey had bought it from Repentence Townsend, whose deed thereof was dated January 13, 1766. It had been granted to John McCane January 13, 1761, by the Governor of North Carolina under the belief that it lay north of the thirty-fifth parallel. As a matter of fact it became North Carolina territory only after the trade in 1772, which was five years after the birth of Jackson. McCane had sold it to Townsend April 10, 1761. The grant is recorded in Raleigh, the deeds in Charlotte.

But Jackson said in 1824:

I was born in South Carolina, as I have been told, at the plantation whereon James Crawford lived, about 1 mile from the Carolina road crossing of the Waxhaw Creek; left that State in 1784; was born on the 15th of March in the year 1767.

He showed the accuracy of the experienced lawyer in making his statement. He likewise showed accurate knowledge of location. James Crawford did not own the place at the time of Jackson's birth, as shown by the following certificate attached to a plat of the "plantation," which is recorded in Raleigh:

Surveyed for James Crawford 110 acres of land in Mecklenburg County, on the north side of the Waxhaw Creek,, joining Archibald Crocket's land, including the improvement he now lives on; beginning at a hickory joining Robert Crawford's land, and runs north 20° W., 130 pole, to a white oak said Crocket's corner; thence north 45° W., 30 pole, to a hickory, Linn corner; thence with his line south 67° W., 154 pole, to a black oak joining McCulloch's land; thence south 67° E., 85 pole, to a white oak; thence south 35° E., 126 pole, to a black oak by a branch; thence to the beginning. September 12, 1768.

PETER JOHNSTON.

It will be observed that although this was a year and a half after the birth of Jackson, Crawford and the public officials of North Carolina believed this tract of land to be in North Carolina, and they did not learn that it was in South Carolina until 1772, when the public road from the western terminus of the line of 1764 to the Catawba line was agreed upon as the boundary line.

This tract lay on the west side of the road and south of the thirty-fifth parallel, and therefore was never legally in North Carolina. On November 22, 1784, Thomas Crawford conveyed this tract of land to William Wren, reciting that it was—

a tract of land originally granted to Joseph Crawford, joining Archibald Crocket's land, including an improvement.

This tract had been, with other lands, conveyed to Thomas Crawford June 1, 1774, by—

James Crawford and Jennet, his wife, for and in consideration of the sum of 2 shillings sterling to him in hand, paid by said Thomas Crawford, his son, at and before the sealing—

And so forth. The deed from James Crawford to his son, Thomas, and that from Thomas to Wren, were both executed after the land trade of 1772, and so were recorded in South Carolina. Adjoining this tract to the south was a larger tract of 551 acres which the Governor of North Carolina had granted to Andrew Pickens, April 13, 1752, under the impression that it was north of the thirty-fifth parallel and in North Carolina. By his will, made November 4, 1756, Pickens bequeathed it to his sons Andrew and Joseph, who, by deed dated March 4, 1763, conveyed the same to Robert and Joseph Crawford, reciting that they were—

in the county of Mecklenburg and Province of North Carolina—

And that—

Robert and Joseph Craford—

Were also—

in the county and Province aforesaid.

The grant and will are on record at Raleigh, the deed at Charlotte. By some agreement between Robert and Joseph Crawford not yet revealed by the records Robert acquired the interests of Joseph upon his death, shortly after this purchase, and in 1775 Robert, having found that his plantation was in South Carolina and had never been in North Carolina, took out a grant for it in South Carolina, and upon the resurvey it was found to contain 620 acres. The little tract of 110 acres adjoining, which Joseph had evidently contemplated taking out a grant for, was evidently passed on by Robert to his brother James, who had been living on it, and he secured the grant heretofore recited. These records not only show that Mr. Moore's investigations among the hills and dales and traditions of the Waxhaws were worthless, but that the witnesses who stated that they had heard old people say that Jackson was born at the McKemey house in North Carolina and that later his mother moved across the line to the Crawford house in South Carolina were putting words into the mouths of those old people that they had never uttered. Not one of those old people had the faintest idea but that both houses were in North Carolina. As a matter of fact, both houses were in South Carolina at the time of Jackson's birth and McKemey's was thrown into North Carolina by the trade of 1772.

If these hearsay witnesses as to what the old people said had heard aright what was said on the subject, they would not have made so many errors that do not harmonize with numerous available records. The boundary-line muddle would have confused them beyond their abilities to invent explanations if they had ever known the slightest thing about that. No confusion about the boundary line has brought about a difference of opinion about Jackson's birthplace. That was brought about because after his great victory at New Orleans in 1815 tongues began to wag as to the spot where he was born. All of the members of his family who were alive at the time of his birth were dead in 1815, and there were very few people alive who had lived in the Waxhaws in 1767. Among those the belief existed on common repute that Jackson was born in South Carolina on the Crawford place. Among these was Gen. William Richardson Davie, who was nine years older than Jackson, and who had been raised up in the Waxhaws, where his uncle, Rev. William Richardson, for whom he was named, was the minister of the Waxhaws "meeting." He was living in North Carolina and had been governor of that State.

Some one evidently advanced the claim in 1815 that Jackson was born in North Carolina—place not specified—and a former resident of the Waxhaws appealed to General Davie to sustain his claim that Jackson was born in South Carolina, and General Davie assured him that Jackson was born in South Carolina, and General Davie's statement was published in the City Gazette and Commercial Daily Advertiser of Charleston for March 27, 1815.

In 1820 James Thonaldson, of Philadelphia, presented a bust of Jackson to the legislative library of South Carolina, and a committee, composed of one member of the senate and two members of the house, was appointed to draft suitable resolutions of thanks therefor. One member of the committee was R. M. Crocket, of the Waxhaws, where his family had resided since before the birth of Jackson. In the resolutions the committee felicitated the general assembly upon the fact that there were so many causes of gratification to South Carolinians in the life of Jackson, especially that—

he, whose nativity has been the cause of rivalry for contending States, is acknowledged as our own.

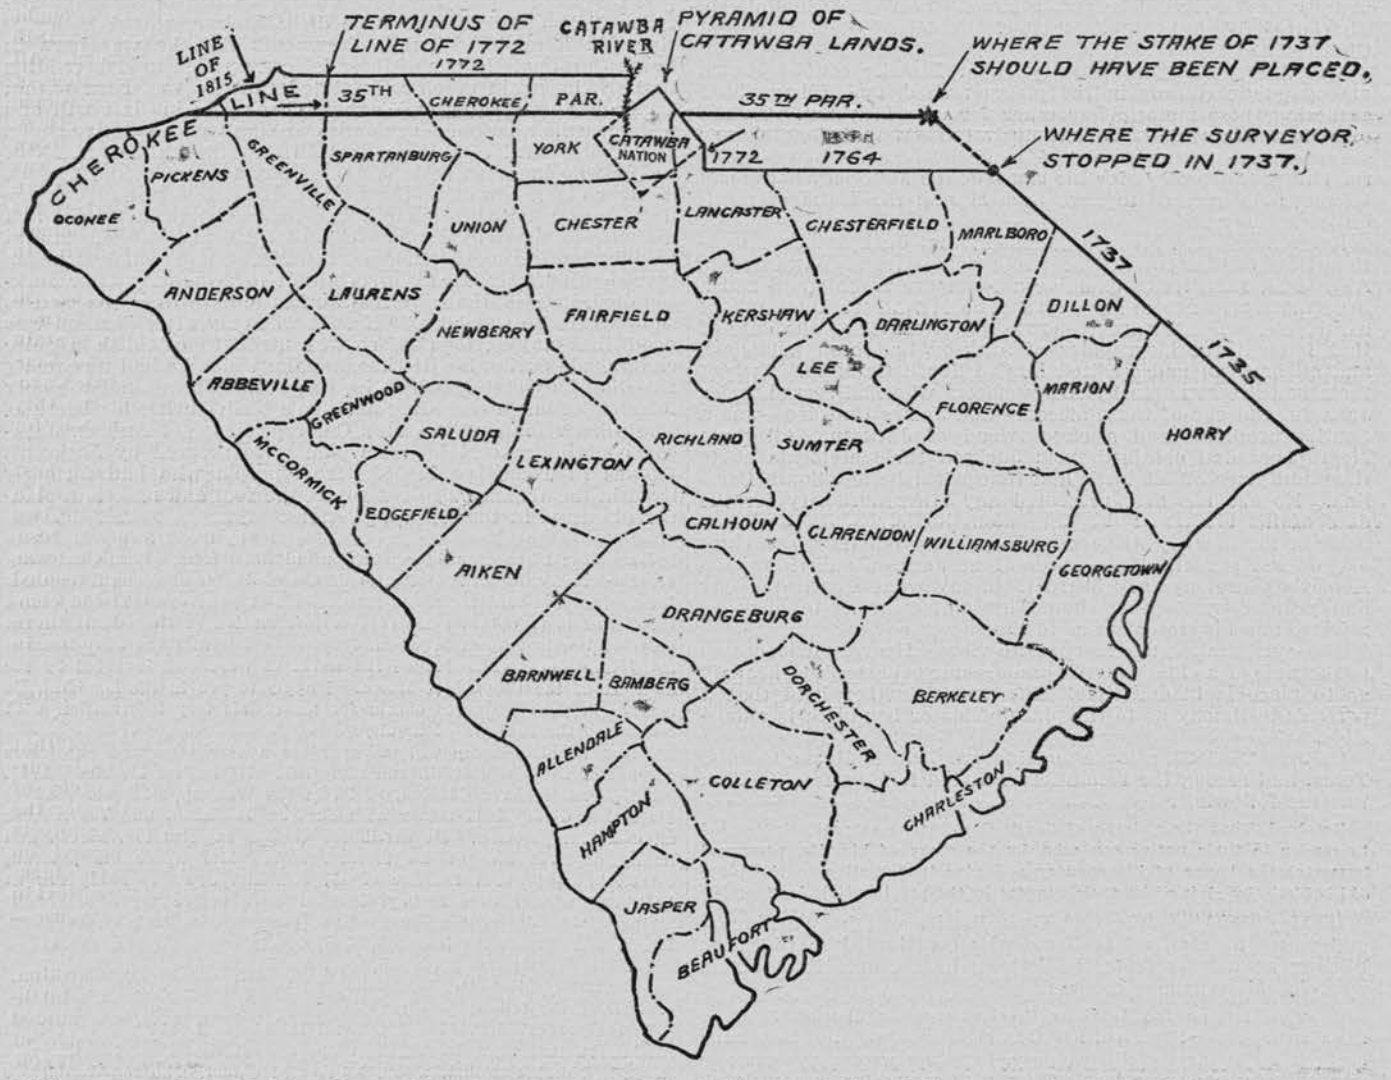
In 1820 John Boykin, a surveyor, who was a native of that section of South Carolina and had spent much of his life surveying the lands of that section, made a thorough survey of Lancaster district under contract with the State and under the supervision of Robert Mills, one of the most famous architects and engineers of the United States. Mills had served on Jackson's staff at New Orleans and, having had it from Jackson's own lips that he was born in South Carolina, had Boykin to locate the exact spot, which was the James Crawford house—

about 1 mile from the Carolina road crossing of the Waxhaw Creek.

The map was published in Mills's Atlas of South Carolina, which is a standard work, and the location of Jackson's birthplace thereon was done officially by a person who was guided by his surveyor's instruments and his scientific knowledge of the country about, and who knew what the substantial people of the Waxhaws settlement had had to say about the matter for the preceding five years. Mills submitted the map to Jackson and he stated in writing to Mills that the location was correct, all of which showed it is not true that Boykin—

arbitrarily placed a cross at a certain place on a supposed road and called it Gen. Andrew Jackson's birthplace—

as Mr. Moore states. He placed it on a map which has always been found singularly correct by surveyors, and which Jackson so pronounced, and exactly marked the house on the James Crawford plantation, which the official records of North and South Carolina have fully and accurately located, and on a road which had been established by legislative act, and had been in existence for some years before Jackson's birth, and was the post route from Charles Town to Salisbury. This road was there when the line of 1764 was run, and is given on Mouzon's map, published in 1775. Mouzon had made a survey and map of the Province of South Carolina under contract with the general assembly.



The Crawford lands lay to the west of that road, and the road was the eastern boundary of the greater part of them. Moreover, there was a conventional agreement between North

An inspection of Jackson's reply, which has already been published in the CONGRESSIONAL RECORD and has been recently published in the third volume of Doctor Bassett's Correspondence of Andrew Jackson, will show that it was much more than a polite answer to a gentleman's letter, as Mr. Moore would have his readers believe. He wrote that he felt "a lively interest in your prosperity and that of your family." He wrote affectionately of "my native State," and regretted that he had not been able to revisit—

the friends of my juvenile days who may still be living—

and expressed pleasure at hearing from Witherspoon, because his wife was a—

descendant of a distant relation by marriage, for whom I had a sincere regard, being raised together.

Witherspoon, of Lancaster, whose wife was a granddaughter of Robert Crawford, and who was cognizant of the family tradition that her kinsman had been born on the Crawford place, wrote to Jackson and specifically asked for a statement as to his birthplace.

That letter and several others in existence prove the falsity of Mr. Moore's statements that—

Jackson cared little about his birthplace and never mentioned it until 1824, when he became a candidate for President, and in politeness answered the letter of Joseph [sic] H. Witherspoon as to where he was born—

And that the—

question of his birthplace was never a happy theme to Jackson.

In December, 1815, the General Assembly of South Carolina, during its first session after the Battle of New Orleans, adopted resolutions of appreciation of Jackson's services. These resolutions were forwarded to Jackson by Governor Williams, and in his reply, dated at "Headquarters, Division of the South, Nashville, February 9, 1816," Jackson wrote:

The approbation of his country is certainly the richest reward for the exertions, toils, and privations of a soldier and a patriot. This approbation, so kindly expressed by the unanimous voice of the representation of that State which gave me birth, and to which you, as the chief magistrate, are pleased to add yours, heightens my gratification on the present occasion toward a grateful country.

In 1819 a biography of Jackson by S. Putnam Waldo was published, and therein the statement was made that Jackson was born in South Carolina. Seeing that statement, Thomas Watson, of Baltimore, wrote to Jackson and asked him if that statement was true. Jackson's reply bears the postmark of Nashville, and is dated at the Hermitage, March 4, 1820, and is as follows:

Your letter of the 12th February has been received, in answer to which I do myself the pleasure to inform you that I was born (as stated by the author of the work you have mentioned) in the State of South Carolina on the 15th of March, 1767.

That letter was published in the New York Times of November 4, 1927, and on November 7 the Times said editorially:

Old Hickory stated that in South Carolina he was born, and unless some modern can be found who knows more about it than the general did, a South Carolinian he definitely is.

Of course, Mr. Moore is the modern who knows more about it than the general did. He went to a picnic gathering in the Waxhams and met—

a large delegation composed of citizens of both States—

Who knew nothing about any phase of the matter, and from—

personal investigation and first-hand information—

Out there in the highways and byways learned it all. He spent—

portions of two days and nights in that vicinity.

How many official records did he examine out there? How many hours' work did he put in among the records in Raleigh, Charlotte, Wadesboro, Lancaster, Camden, Columbia, and Charleston?

Material substantiating every claim I make can be shown among public records in the places named, and I have been gathering those materials together for over 25 years. On the other hand, those materials conclusively show that almost every statement alleged to have been made by hearsay witnesses in the hands of attorneys for the cause of the McKemey house can be shown by records to have been beyond the realm of possibility.

Reverting to Mr. Moore's statement that Jackson never mentioned his birthplace until he wrote that letter to Witherspoon, August 11, 1824, let us examine a few more records and add a little more evidence to show how little Mr. Moore knows about a subject he affects expert knowledge of. Prior to the date of that letter three biographies of Jackson had been published, and all of them had credited him to South Carolina. Two of them had been written by Army officers who had served under Jackson, and one of those officers—Col. James Gadsden—was a South Carolinian and a close friend of Jackson. All three biographers had obtained from Jackson the statements as to time and place of his birth and time when he left South Carolina. No one has ever presented any other authority for the date of his birth and the date when he left South Carolina. None of the hearsay witnesses who alleged that they heard two old women say they were present at Jackson's birth in McKemey's house say they heard them say what month and day and year it was. Why should his statement as to place be rejected and his statement as to time accepted?

The courts take just the opposite view. Hearsay evidence as to the time of a child's birth is admissible evidence, but hearsay as to place is inadmissible. The courts further hold that a person's testimony as to the place of his or her birth is admissible.

On July 28, 1823, a large meeting was held in Roane County, Tenn., and among the resolutions adopted in behalf of Jackson was the following:

Resolved, That the citizens of South Carolina be respectfully invited to render to their native son who, by the glory of his life, preserved immortal the honor of his country and give immortality to the place of his birth, by giving him their support in the presidential election.

In May, 1824, a citizen of York district was in Washington and wrote to a friend at home who contributed to the York Pioneer an extract from the letter which concerned Jackson, wherein this language occurs:

He was born on the Waxhaw Creek, Lancaster district, S. C., 4 miles up from the river, and left that place in 1784. He made many inquiries respecting the citizens there, but there were only three persons out of the number inquired for with whom I was acquainted, viz, Mrs. Massey, Mr. Foster, and Mr. White.

Those are familiar names in the contemporaneous records of the Waxhaws.

We have all of these references by Jackson, his friends, his biographers, and the public officials to Jackson's birth in South Carolina, all made prior to the letter to Witherspoon, but we can find no publicly made claim prior to the date of that letter that he was born in North Carolina.

We find several instances where public refutations of such a claim were made, but no specific claim that would have called for explanation or denial by Jackson or surviving elders. The Charleston Courier of November 10, 1824, republished the following communication on the subject from the Columbia Telescope, which, so far as the writer has been able to discover, is the earliest presentation of the claim for the McKemey house:

MESSRS. EDITORS: There has been much uncertainty in regard to General Jackson's birthplace; some asserting that he was born in North Carolina, others—amongst whom is his biographer, Reid—that he was born in South Carolina, and others that he is a native of Ireland. I am glad that I have it in my power to settle this question. General Jackson was a posthumous child. After the death of his father, his mother, who was poor, went to reside with her brother-in-law, a Mr. McAmey, who lived on the right-hand side of the road leading from Lancaster to Charlotte, which at that place is the boundary between the two States. General Jackson was born at the house of Mr. McAmey, and therefore in the State of North Carolina. When he was about 6 weeks old his mother removed with him to the house of Mr. James Crawford, another brother-in-law, on the South Carolina side of the road. K.

Here was a man who contended that there was "much uncertainty," despite Jackson's positive statement, as to the place, and who professed the ability to settle the question, but proceeded to "settle" it merely by making a statement uncorroborated by any person who was present at his birth or by any contemporaneous records. That is the germ from which has grown the positive proof that Mr. Moore alleges he has discovered. Between 1824 and 1845, when he died, Jackson stated 15 or 20 times in letters and public documents that he was born in South Carolina. In one of these letters, written to Robert Mills in 1827, he again specifically stated that he was born within 1 mile of the crossing of Waxhaw Creek. In his last will and testament he asserted that South Carolina was his native State. It was not until after he was dead that the hallucinations of people who knew so little of the family history of the persons discussed as not to know the spelling of McKemey's name or his first name bobbed up again. The tombstone to McKemey and his wife in the Waxhaw churchyard furnished one substantial exhibit for anyone capable of intelligent and comprehensible investigation. Mr. Moore asserts that it "was only after Jackson died, in 1845, that any real authentic data were collected to show where he was born." No. It was only after Jackson was dead that any serious effort was made to establish a false claim made during his lifetime, a claim which he had repeatedly repudiated by stating where he was born. It was not the only false claim made regarding Jackson's birth during his lifetime. The third volume of Bassett's Correspondence of Andrew Jackson contains several letters which were secured by Jackson's friends in Tennessee in 1828 from people who had formerly lived in the Waxhaws to controvert the foul and malicious slander discussed in the following letters:

CINCINNATI, *July 7, 1828.*

DEAR SIR: I know you by reputation only, and from a recent notoriety attached to me, as an investigator of the character of General Jackson, I may presume that my name may have met your eye. The object of this letter is to obtain some further information of that distinguished individual with respect to whom I begin to believe there have been as many impostures palmed upon the world as were ever invented by the disciples of the Prophet of Mecca. I apply to you in the hope that it may be in your power to obtain for me satisfactory information with respect to the subjects of inquiry.

Eaton in his biographical eulogy gives a very lame and suspicious account of the hero's origin and early life. He locates his birth, 1767, some 40 miles above Camden, S. C., in the Waxhaw settlement, where his father died. This father he makes an Irishman, and the mother an exemplary woman. He attributes various exploits to Andrew, and finally deprives him of his mother, makes him waste his paternal estate, and, at about the age of 17, sets him down to study law at Salisbury with Spruce McCay, Esq. I have before me a statement giving a very different account of the parentage of Jackson, of which I wish to ascertain the truth.

William Rogers, an aged and, as I am informed, a respectable man, a resident of this State, has made and submitted a written statement comprising the following facts:

In the year 1759 or 1760 a General Daubbs or Dobbs was sent from England with a detachment of troops and stationed on the Catawba River in North Carolina, where he erected a fort, who remained some time. This detachment was accompanied by two women of the camp—Fanny Jenings and Isabel Moore—who, when the troops removed, remained in the neighborhood, where they lived and died. After the departure of the troops Fanny had a mulatto child, a boy, which she sold to Moses Purviance. Subsequently she had a second child, a boy also, who was reputed to be the son of a mulatto quadroon slave to James Grenaway, of Burke County. At the September term 1767, at the court of Burke County, the child being a pauper, unprovided for, was taken from the mother, named Andrew Jackson by the court, and bound to a lawyer named Avery or Emory, who was afterwards a colonel, and who was then a resident of Pleasant Garden in Burke County, and in order to have the child baptized a Doctor Bushall became his godfather. He was named Jack's son by the court because his supposed father was named Jack. In support of the account Rogers refers to the names of Gen. C. McDowell, Arch Sloan, George Lackey, and David Smith. He states further that Fanny Jenings, the mother, was at times a spinster in his father's house; that Jackson went to school to a John Mongomery. That when a boy he knew him personally; that he has seen him since at Jonesborough in Tennessee sitting as a judge, and was recognized as an acquaintance of his juvenile years by Jackson.

Perhaps you may think at first sight that it is entirely immaterial who were Jackson's parents and what the condition of his birth. This would be so had the truth always been told about it. But so much of imposition has been attempted and so much affected with respect to this man that I deem it important to detect and expose it wherever it can be done. Besides this, if the account here given of his origin be the true one, it is important it should be known, not only to do away with the pretense of his suffering and service in the Revolutionary War but also to explain the coarse brutality of his nature, which might very naturally be expected from such parentage and nurture.

If for any reasons you decline making the inquiries here suggested, I will thank you to inform me of it, and I would be glad could you suggest me a channel through which they can be made.

I send this under cover to Mr. Watkins, not having your address, with a request that he will address it to you.

Respectfully yours,

C. HAMMOND.

CINCINNATI, *July 7, 1828.*

DEAR SIR: The inclosed letter, addressed to Mr. Gaston, will explain itself. I wish you to peruse it, and if you know of any facilities for obtaining the information sought lend your assistance. Please put it in an envelope and address it to Mr. Gaston.

We retain our spirits here on the subject of the great contest. The canvass in Kentucky is very active and our friends full of confidence. Barry made a speech on Friday opposite to us, but with very little effect. It was but a vapid reiteration of the old lies so often refuted.

There are some apprehensions for Indiana. There is a want of concert, and have been some bad movements in that State. Tart and not Smith should have declined. Moore ought to have opposed Ray for governor. There is not a Jackson candidate in the field.

Yours sincerely,

C. HAMMOND.

T. WATKINS, Esq.
(On reverse side:)
Private. Tobias Watkins, Esq., Fourth Auditor, Washington City.
C. W. HAMMOND.
Received and answered July 14, 1828.

That is a fair illustration of how history can be made by the vagaries of the ignorant, the depraved, and the vicious. There was not the same viciousness in the attempt to prove Jackson a son of North Carolina as that to prove him the son of a "nigger," but there was equally as much ignorance and stupidity in it. Every side light turned upon the claim by its promoters reveals their ignorance of the history of the Waxhaws, of the political subdivisions affecting that section, of the conditions under which settlers secured lands, of the time and manner in which the settlers came in, of the personnel of the settlement, and of the family history of the chief characters in this episode in our history.

To illustrate: Mr. Moore, speaking of Jackson's father's land on Twelve Mile Creek, says—

he was only able to pay $70 on this land, not enough to take it out of the entry office.

If he found any such record in North Carolina he has found something unique. The usual procedure for a new settler to procure lands was to petition His Majesty's Council for North Carolina for an allotment in compliance with the bounty land law of that Province. If entitled to the land, the council would direct the surveyor general to have it surveyed out to him. A plat and grant, with a certificate similar to that quoted in James Crawford's case, was issued and the settler became the owner of the land. The charge therefor, if any, was but a shilling or so for the recording official. The consideration of $70 in 1765, when pounds, shillings, and pence, either in sterling or currency of the Province, was the common money of the Province, would have been most remarkable.

General Walkup whose work on this subject is regarded by Mr. Moore and others as most convincing states that he was unable to find any record in either the courthouse at Charlotte or that at Wadesboro—seat of Anson County—that the elder Jackson ever owned any land, and opined that he was a squatter. In view of what the writer hereof has found in the courthouse in Charlotte, he can not regard the investigations of either Mr. Moore or General Walkup as worthy of much respect. There is recorded in deed book 20, pages 21–22, in the office of register of deeds, an indenture "made the 17th day of December," 1770, between Thomas Ewing and Sarah, his wife, of Berkeley County—

and Province of South Carolina, of the one part, and Hugh Robert and Andrew Jackson, of the county of Mecklenburg and Province of North Carolina, of the other part, witnesseth that the said Thomas Yewing and Sarah, his wife, for and in consideration of the sum of 14 pounds current money of North Carolina, to them in hand paid by the said Hugh Robert and Andrew Jackson, the receipt whereof the said Thomas Yewing, and Sarah, his wife, doth hereby acknowledge and themselves fully satisfied, contented, and paid, and for other good causes and consideration of them thereunto moving, he, the said Thomas Yewing, hath granted, bargained * * * unto the said Robert Hugh and Andrew Jackson a tract of land containing 200 acres, being in the county and Province aforesaid, on the waters of Twelve Mile Creek, on Leggits Branch, beginning at a white oak, south side of the creek, by a small branch, and runs thence north 106° 180 poles to a red oak by a small branch, thence north 80 west 180 poles to a red oak, thence south 10 west 180 poles to a red oak, thence to the beginning, by virtue of a patent bearing date the 21st day of September, 1766.

That deed is indexed under Andrew Jackson. It was—

proved in open court by the oath of James Crafford, a subscribing witness, at the April assizes—

in 1775, and the court ordered that it be registered as shown by the minutes of the court for Friday, April—after third Tuesday—1775, page 46. General Jackson sold this tract of land many years later, when a citizen of Tennessee.

Mr. Moore states that Jackson's mother was one of six Hutchinson sisters—

who had married, the most of them in north Ireland, and emigrated to America; and all settled in the Waxhaw settlement * * *. As stated, all of these built cabin homes within 4 or 5 miles of each other at the farthest, nearly all on lands touching Waxhaw Creek, except one, Andrew Jackson, sr., the last to come from north Ireland with his wife, Elizabeth Hutchinson, and their two little boys, Hugh and Robert.

Mr. Moore is evidently unaware of the fact that the records of North and South Carolina sustains him only as to the places of residence of James Crawford and George McKemey. By those records we are able to show every tract of land granted out in that settlement prior to Jackson's birth, and who owned them at that time. These records eliminate James Crow and John and Samuel Lessley—their own spelling—as landholders within 2 or 3 miles of McKemey in 1767. The Council of South Carolina considered a petition from James Crow for a warrant of survey for 350 acres of land in the Waxhaw settlement August 4, 1767, after Jackson's birth, it will be observed. The survey was certified December 7, 1768, and a grant thereto issued November 27, 1770. This tract lay on Muddy Run, and was not "within 4 or 5 miles" of McKemey and Crawford. Had it been, the grant would have been made by North Carolina.

The Council of South Carolina issued a precept October 7, 1766, to William Glascock to lay out for "John Lesslie," 150 acres—

on Molly Moor's branch of Camp Creek, in the Waxhaws settlement.

The survey was certified October 16, 1766, ordered continued February 3, 1768, and granted October 22, 1768. That was more than 5 miles from James Crawford's, and his place was over 2 miles nearer thereto than McKemey's place. No record has yet been found in either of the Carolinas to show Samuel Lessley as a landowner in that section prior to the Revolution. John served in the militia of South Carolina during the Revolution, and his signature to his receipts for pay is John Lessley, and he dates an order "Waxhaws, January 20."

If Samuel Lessley lived in the Waxhaws prior to the Revolution he owned no land. If he lived there during the Revolution his place of residence was evidently on the North Carolina side of the line. There is no record of pay issued to him as is the case with John Lessley and all other landholders in the South Carolina section of the Waxhaws.

Mr. Moore says it—

was finally decided among the sisters that their sister, Jane Crawford, being childless and a semi-invalid, that Betty and her two little boys should be taken there.

It has already been shown that James and Jennet Crawford deeded their first tract of 110 acres, with the improvement thereon—the house in which Jackson was born, as he himself stated—to their son Thomas in 1774. By deed dated March 1, 1780—

James Crawford, sr., of St. Marks Parish, Craven County—

Conveyed to—

James Crawford, jr., his son, of the parish, county, and State aforesaid—

one hundred and fifty acres from a tract of 300 acres which he had bought of James Gamble December 12, 1772. This is recited in a deed from the younger James and Christiana, his wife, October 14, 1796, which is on record at Lancaster in book B, 329–330. The will of "James Crafford of the Waxhaws, S. C.," made September 25, 1776, is on record in the probate court in Charleston. He mentions sons George,

James, and Alexander, and daughters Margaret, Mary, Jean, and Martha. He also mentions sons John Martin, Isaac Smith, William Henderson, and Thomas Patton, who were doubtless sons-in-law. The daughter Margaret was unmarried. Alexander states in his application for pension in 1832 that he was born in Pennsylvania September 28, 1750. Mr. Moore says that Robert and James Crawford—

moved to America 16 years before Andrew Jackson and Betty had come.

Will he now bring forward a few more tradition-bearing witnesses to dispute Alexander? He further says that Robert and James—

were men of the first importance and standing, leaders in militia service and affairs of the county of Lancaster, S. C., where their plantations lay just 2 miles, or a little more, over the line, according to the survey of 1815.

It has already been shown that when Jackson was born Robert Crawford owned 620 acres in what was supposed to be North Carolina territory and had an equity in 110 acres more that his deceased brother Joseph had planned to have granted to himself; that James was living on this latter tract and later secured a grant for it from North Carolina.

Lancaster County, S. C., did not come into existence until 1785. There was no organized militia in that section then, and not until after 1772. Robert became a major of militia during the Revolution. There were no political subdivisions of any kind in South Carolina in 1767, save the parishes in the low country. There had been four land subdivisions called counties that had been handed down from the provincial nobility arrangement of the erstwhile lords proprietors, which were still used only to describe the location of land. They had no political significance after the passage of the church act in 1706. The eastern part of the province was unofficially still called Craven County to aid in locating lands. To allow the people living east of the Congaree and Broad Rivers to vote in elections for members of the commons house of assembly that section was considered as an unofficial annex to St. Mark's Parish, although the northern boundary of that parish, as established by law, was about 100 miles south of the Waxhaws, and to vote the Waxhaws settlers had to go to the parish church about that distance away.

James Crawford, through grants and purchases, acquired five or six hundred acres of land on both sides of the line between the Carolinas prior to his death, but at the time of Jackson's birth he did not own a foot thereof. Nor is Mr. Moore correct in saying the Crawford plantations—

lay just 2 miles, or a little more, over the line.

As heretofore shown, when Jackson was born the thirty-fifth parallel of latitude was the official boundary line, and that was about 9 miles north of James Crawford's place. When by the arrangement of 1772 the public road through the Waxhaws was made the line, the Crawford lands were right on the boundary line, and when the line from the western terminus of the line of 1764 to the southeastern corner of the Catawba lands was agreed upon in 1808, the Crawford lands were not over a half mile from the line at the most western turn of the road.

Almost every statement of General Walkup's hearsay witnesses can be shown by official records to be contrary to fact. Mr. Moore has merely elaborated upon the Walkup gatherings, and almost every statement he has made has served to mire him deeper into the bog of error.

The writer has no hope that those people who can not be convinced against their wills will ever accept the only admissible evidence ever offered in this discussion, but that evidence, sustained by hundreds of official records relating to the setting of Jackson's birthplace, has been sufficient to convince almost every writer on Andrew Jackson in the last 25 years. Cyrus Townsend Brady, A. S. Colyar, John Spencer Bassett, Thomas E. Watson, Frederick Austin Ogg are all biographers of Jackson who say the evidence favors South Carolina. The New International Encyclopedia (1918) contains a revised sketch of Jackson by Prof. William P. Trent, of Columbia University, and Dr. Newton D. Mereness, in which they say that the evidence favors South Carolina. The latest edition of the Encyclopedia Americana (1919) contains a revised sketch of Jackson by Prof. Marcus W. Jernegan, of the University of Chicago, in which he says the preponderance of evidence is in favor of South Carolina. Judge Samuel M. Wilson, of Lexington, Ky., who delivered the centenhial oration at New Orleans, January 8, 1915, took the same view. In a letter to Representative STEVENSON, dated March 30, 1922, the late Judge H. G. Connor, one of the greatest judges North Carolina has produced, wrote:

MY DEAR MR. STEVENSON: A few days ago in running over the CONGRESSIONAL RECORD to see what our Representatives are doing for us I became interested in your demonstration that Andrew Jackson was born in South Carolina, and read it with interest. I have no doubt that you are correct.

Are they all wrong and Gerald Johnson and John Trotwood Moore alone right? If so, then the Cathey evidence, by which it is in the same manner proven that Abraham Lincoln was born in North Carolina, is correct and the marker on his birthplace in the Occonolufta country is not misplaced. Who believes that?

EDNA E. SNABLY

The next business on the Private Calendar was the bill (H. R. 8859) for the relief of Edna E. Snably.

The Clerk read the title to the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Postmaster General is authorized and directed to credit the account of Edna E. Snably, postmaster at Hollsopple, Pa., in the sum of $1,000, being an amount charged in the postal account due to the cashing of war savings stamps in year 1924, which were found by the Treasury Department to be counterfeit and charged back to the postmaster's account; for which amount the postmaster was in no way responsible, the loss having occurred without fault or negligence on her part.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

F. R. BARTHOLD

The next business on the Private Calendar was the bill (H. R. 9659) for the relief of F. R. Barthold.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and in full settlement against the Government, the sum of $3,016.91 to F. R. Barthold, as compensation for the total destruction of a building and other property during a fire accidentally set by a Government employee while in the discharge of his official duties.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

RELIEF OF CERTAIN MEMBERS OF THE FOREST SERVICE

The next business on the Private Calendar was the bill (H. R. 12711) for the relief of certain members of a trail crew employed by the Forest Service.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. HICKEY. I object.

MAJ. CHARLES F. EDDY

The next business on the Private Calendar was the bill (H. R. 12871) for the relief of Maj. Charles F. Eddy.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. HICKEY. Mr. Speaker, I object.

PIERCE DALE JACKSON

The next business on the Private Calendar was the bill (H. R. 12867) granting an honorable discharge to Pierce Dale Jackson.

The SPEAKER pro tempore. Is there objection?

Mr. UNDERHILL. Mr. Speaker, reserving the right to object, the bill that has just been passed over under objection is for a war officer who served with great distinction in the World War.

Mr. KNUTSON. Mr. Speaker, I demand the regular order.

Mr. UNDERHILL. He was to be married, and I think is now on his wedding trip.

Mr. KNUTSON. Mr. Speaker, I demand the regular order.

Mr. CLARKE. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. CLARKE. I would like to know whether it would be according to parliamentary procedure to call the attention of gentlemen to the Scriptural adage, "Possess thy soul in patience"?

The SPEAKER pro tempore. That is not a parliamentary inquiry. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers Pierce Dale Jackson, who was a member of the One hundred and forty-

first Ambulance Company, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of that organization on the 21st day of March, 1918: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

MAJ. WALTER REED AND OTHERS

The next business on the Private Calendar was the bill (H. R. 13060) to recognize the high public service rendered by Maj. Walter Reed and those associated with him in the discovery of the cause and means of transmission of yellow fever.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. KNUTSON. Mr. Speaker, I reserve the right to object.

Mr. MAPES. Mr. Speaker, I reserve the right to object.

Mr. KNUTSON. I note that this bill carries a pension of $3,000 a year to sundry widows and survivors of widows. This bill carries a pension of $3,000 a year, does it not, for Mrs. Walter Reed and for Mrs. Carroll and Mrs. Lazear? Why should we differentiate between the widows of the men who participated in the experiments to determine the cause of yellow fever and the widows of men who lost their lives on the field of action?

Mr. WAINWRIGHT. Mr. Speaker, will the House indulge me for just a moment? This bill is a bill of some little consequence, and I am sure that every Member of the House would sympathize with the purpose of the bill, which is to give tardy recognition to those heroic men who subjected themselves at the risk of their lives in the experiment at Habana in 1900 to determine the cause of yellow fever.

Mr. GREEN. Mr. Speaker, this bill is meritorious——

Mr. KNUTSON. Mr. Speaker, I have not yielded to the gentleman from Florida. I yielded to the gentleman from New York.

Mr. WAINWRIGHT. Mr. Speaker, I trust the membership of the House will consider this bill and treat it seriously, because it is a serious proposition. We all know the result of that experiment—its great benefit to humanity. It showed the way to remove the scourge of yellow fever and made possible the building of the Panama Canal. All there is to the proposition is this:

There were 21 people who took part in that experiment. Five of them were the officers who organized it, Maj. Walter Reed and the other officers composing the board. The others were those who subjected themselves to be bitten by mosquitoes that had already bitten people suffering from yellow fever, and others who had come in contact with the polluted clothing of yellow-fever patients. I have discussed this bill with the gentleman from Minnesota [Mr. KNUTSON], the chairman of the Committee on Pensions, and the only question is the amount of the pension. Three of the widows of the officers are receiving pensions of $125 a month.

Mr. KNUTSON. Is the gentleman from New York aware of the fact that the Pension Committee considered all of these individual claims about three or four years ago, and that we granted them a pension of $125 a month? Here you have the case of Mrs. General McAndrews, whose husband was Chief of Staff in France. She is getting only $125 a month. This bill seeks to grant these widows $3,000 a year. I don't want to object, because I think the gentleman from New York and I can fix this matter up.

Mr. DOWELL. Mr. Speaker, if these gentlemen are intending to fix this up, I think we had better proceed with the other business.

The SPEAKER pro tempore. Is there objection?

Mr. DOWELL. Mr. Speaker, I demand the regular order.

The SPEAKER pro tempore. The regular order is, Is there objection?

Mr. MAPES. Mr. Speaker, I reserve the right to object.

Mr. WAINWRIGHT. Mr. Speaker, the only question is as to the amount of the pensions.

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent that the bill be passed over temporarily without prejudice.

The SPEAKER pro tempore. The gentleman from Minnesota asks unanimous consent that the bill be passed over temporarily without prejudice. Is there objection?

Mr. WAINWRIGHT. With the understanding that we come back to it.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the next bill.

NEW ORLEANS QUARTERMASTER INTERMEDIATE DEPOT UNIT NO. 2

The next business on the Private Calendar was the resolution (H. J. Res. 258) authorizing the Secretary of War to lease to the New Orleans Association of Commerce, New Orleans Quartermaster Intermediate Depot Unit No. 2.

The title of the resolution was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. O'CONNOR of Louisiana. Mr. Speaker, I move to substitute a similar Senate resolution.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the Senate resolution.

Mr. O'CONNOR of Louisiana. It is Senate Joint Resolution 120.

The Clerk read as follows:

Resolved, etc., That the Secretary of War is authorized to lease for a period of three years, to run from September 16, 1927, without consideration or on such terms or conditions as he deems it advisable, to the New Orleans Association of Commerce (a nonprofit corporation organized under the laws of Louisiana), its successors and assigns, the New Orleans Quartermaster Intermediate Depot Unit No. 2 for general exhibition purposes in respect of fabricated and raw products of the United States and similar products of foreign countries; but if such corporation, its successors or assigns, shall cease to use and occupy the depot for such purposes the lease shall become null and void: *Provided*, That the United States may void the lease any time within the lease period by giving 30 days' notice to lessees.

SEC. 2. That the New Orleans Association of Commerce, under regulations prescribed by the Secretary of War, may, without expense to the United States, make such alterations in respect to such depot as may be necessary for the purposes for which the building is leased and in so far as may be compatible with the public interest.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

The similar House resolution was laid on the table.

MAJ. WALTER REED AND OTHERS

Mr. WAINWRIGHT. Mr. Speaker, I ask unanimous consent that we may return to Calendar No. 557, to the bill H. R. 13060.

The SPEAKER pro tempore. Is there objection to the return?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

H. R. 13060

A bill to recognize the high public service rendered by Maj. Walter Reed and those associated with him in the discovery of the cause and means of transmission of yellow fever

Be it enacted, etc., That in special recognition of the high public service rendered and disabilities contracted in the interest of humanity and science as voluntary subjects for the experimentations during the yellow-fever investigations in Cuba, the Secretary of War be, and he is hereby, authorized and directed to publish annually in the Army Register a roll of honor on which shall be carried the following names: Walter Reed, James Carroll, Jesse W. Lazear, Aristides Agramonte, John H. Andrus, John R. Bullard, A. W. Covington, William H. Deans, Wallace Forbes, Levi E. Folk, P. Hamann, James F. Hanberry, Warren G. Jernegan, John R. Kissinger, John J. Moran, William Olson, Charles G. Sonntag, Clyde L. West, R. P. Cooke, Thomas H. England, James Hildebrand, and Edward Weatherwalks, and to define in appropriate language the part which each of these persons played in the experimentations during the yellow-fever investigations in Cuba; and there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such amounts annually as may be necessary in order to pay to the following-named persons during the remainder of their natural lives the sum of $250 per month, and such amount shall be in lieu of any and all pensions authorized by law for the following-named persons:

Mrs. Walter Reed; Mrs. James Carroll; Mrs. Jesse W. Lazear; Dr. Aristides Agramonte; Pvt. John H. Andrus, Hospital Corps; Mr. John R. Bullard; Pvt. A. W. Covington, Twenty-third Battery, Coast Artillery Corps; Pvt. William H. Deans, Troop B, Seventh Cavalry; Pvt. Wallace Forbes, Hospital Corps; Pvt. Levi E. Folk, Hospital Corps; Pvt. P. Hamann, Twenty-third Battery, Coast Artillery Corps; Pvt. James F. Hanberry, Hospital Corps; Mrs. Warren G. Jernegan; Pvt. John R. Kissinger; Mr. John J. Moran; Pvt. William Olson, Hospital Corps; Pvt. Charles G. Sonntag, Hospital Corps; Pvt. Clyde L. West, Hospital Corps; Dr. R. P. Cooke; Pvt. Thomas H. England, Hospital Corps; Pvt. James Hildebrand, Hospital Corps; and Pvt. Edward Weatherwalks, Hospital Corps.

Mr. MAPES. Mr. Speaker, has consent been given to the consideration of the bill?

The SPEAKER pro tempore. No. Is there objection to the present consideration of the bill?

Mr. SCHAFER. Mr. Speaker, reserving the right to object, I think the House is entitled to know what the bill is before objection is made.

Mr. MAPES. One of the gentlemen named in the bill, Pvt. William H. Deans, of Troop B, Seventh Cavalry, lived in my city. He was a plasterer. Since the bill was reported he has died. His mother is living, and I desire to offer an amendment to pay her the monthly allowance instead of the soldier.

Mr. SCHAFER. Mr. Speaker, I will withdraw my reservation.

Mr. MAPES. I am told by the author of the bill that he is willing to accept the amendment.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. McKEOWN. Reserving the right to object, Mr. Speaker, I want to know exactly what these people are to get under this bill. How much are they paid now?

Mr. KNUTSON. They are paid now $125 a month, as fixed by the Pension Committee three years ago.

Mr. McKEOWN. If this bill is passed, what is it proposed to give them?

Mr. KNUTSON. One hundred and fifty dollars per month.

Mr. WAINWRIGHT. There are 21 of these people. Only five of them get any pension at all. The highest pension is $125. This bill will take care of all the other 16 in the group. I have offered an amendment, with the concurrence of the Committee on Pensions, fixing the amount at $150 per month for each of them.

Mr. KNUTSON. Before we proceed any further I want the gentleman from New York to insure us that the Military Committee hereafter will not attempt to encroach upon the jurisdiction of the Pension Committee. I want that understanding.

Mr. WAINWRIGHT. I can only give the gentleman from Minnesota my own impression.

Mr. DOWELL. Regular order, Mr. Speaker.

The SPEAKER pro tempore. Is there objection to the consideration of this bill?

Mr. SNELL. Mr. Speaker, we ought to know exactly what the bill does before we pass it.

Mr. KNUTSON. A number of these people are getting $125 a month for participating in the experiments to determine the cause of yellow fever. Some of them have died, and their widows are receiving $125, including the widow of Walter Reed.

Mr. McKEOWN. Regular order, Mr. Speaker.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. WAINWRIGHT. The pension of certain ones is $125.

Mr. McKEOWN. If the bill is good, nothing will be gained by Members getting impatient.

Mr. WAINWRIGHT. It is a meritorious bill.

Mr. SIMMONS. Mr. Speaker, in view of the fact that there is another session of Congress coming, I think we ought to have this bill understood by somebody, and therefore I object.

The SPEAKER pro tempore. Objection is heard.

Mr. BLACK of New York. Mr. Speaker, a point of order. We have passed the objection stage on this bill. I think it is a shame that Congress should handle the situation in this way.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

PAUL D. CARLISLE

The next business on the Private Calendar was the bill (S. 3201) for the relief of Paul D. Carlisle.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the stoppage placed against the pay of Paul D. Carlisle, a major on the retired list of the United States Army, in the sum of $341.28, by reason of the absence with leave not in a full pay status, be, and the same hereby is, removed, and in case the sum, or any part thereof, has been already deducted from his pay the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the said Paul D. Carlisle the sum of $341.28, or such lesser sum, equal in amount to the sum so deducted.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

WALTER REED

Mr. WAINWRIGHT. Mr. Speaker, I ask unanimous consent to return to Calendar No. 557. I do not think there is any objection to the bill.

The SPEAKER pro tempore. The Chair objects. The Chair has the same right to object as anyone else. The House has wasted considerable time over this bill, and as a Member of the House I object to returning to it again.

WADE ALLEN AND ED JOHNSON

The next business on the Private Calendar was the bill (H. R. 7378), for the relief of Wade Allen and Ed Johnson.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any moneys in the Treasury not otherwise appropriated, the sum of $300 to Wade Allen and Ed Johnson, of Fannin County, Ga., which sum represents the loss sustained by said Wade Allen and Ed Johnson on the bail bond of Homer Nelson, who was afterwards captured and returned to the United States officers by the said Wade Allen and Ed Johnson; the record of said estreatment of bond and the payment of said sum of money on May 26, 1925, are shown in report of the clerk of the United States Court for the Northern District of Georgia.

With the following committee amendments:

Page 1, line 5, insert the words "in full settlement against the Government."

Line 6, strike out "$300" and insert "$204.59."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

LARRY CARDWELL

The next business on the Private Calendar was the bill (H. R. 6263) to provide for the reinstatement of Larry Cardwell in the United States Naval Academy.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Navy is authorized and directed to reinstate Larry Cardwell in the United States Naval Academy, of which he was a midshipman at the time of his discharge on November 19, 1926; the said Larry Cardwell to become a member of the class of 1930 on the date of reinstatement, and to be accorded all rights, privileges, and benefits to which he would have been entitled had he not been so discharged.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

FRANCIS JAMES CLEARY

The next business on the Private Calendar was the bill (H. R. 10274) for the relief of Commander Francis James Cleary, United States Navy.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That hereafter Commander Francis James Cleary, United States Navy, an additional number in grade and designated to perform engineering duty only, shall be regarded as having been promoted to the rank of captain in the United States Navy on the 13th day of January, 1926, as an additional number in grade to perform engineering duty only, with rank as such immediately after Capt. Earl Peck Finney, United States Navy: *Provided*, That nothing herein shall be construed to entitle Commander Francis James Cleary, United States Navy, to any back pay, allowance, or other emoluments in this permanent rank.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ALFRED O. HUESTIS

The next business on the Private Calendar was the bill (H. R. 3443) for the relief of Alfred O. Huestis.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers Alfred O. Huestis, who was a member of Battery I, Sixth United States Artillery, and later transferred to the Hospital Corps, United States Army, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of that organization on the 24th day of October, 1899: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

JOSEPH LEE

The next business on the Private Calendar was the bill (H. R. 4244) for the relief of Joseph Lee.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Joseph Lee, Serial No. 1425235, who was a member of Company , Headquarters Troop, Seventh Army Corps, transferred to Casual Company No. 5246, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of that organization on the 11th day of October, 1919: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ARTHUR A. PADMORE

The next business on the Private Calendar was the bill (H. R. 4626) for the relief of Maj. Arthur A. Padmore.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. SNELL). Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Maj. Arthur A. Padmore, United States Army, retired, out of any money in the Treasury not otherwise appropriated, the sum of $645.33, being the difference in pay and allowance from March 4, 1921, to November 21, 1921, which would have been due and payable to him had it been possible to promote him to the grade to which his seniority entitled him before his retirement by operation of law on November 21, 1921.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

KATHERINA KAUTZ AND FRED G. KAUTZ

The next business on the Private Calendar was the bill (H. R. 11289) for the relief of Katherina Kautz and Fred G. Kautz, heirs of the estate of Christian F. Kautz, deceased.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HICKEY. Mr. Speaker, I object.

ARMSTRONG HUNTER

The next business on the Private Calendar was the bill (H. R. 6112) for the relief of Armstrong Hunter.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the pension laws Armstrong Hunter, late of Companies B and A, Fourteenth Regiment Illinois Volunteer Infantry, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of said companies and regiment: *Provided*, That no pay, bounty, or pension shall be held to have accrued prior to the passage of this act.

With the following committee amendments:

Line 4, strike out "Companies B and" and insert "Company."

In line 6, after the word "discharged," insert "on June 19, 1865."

In line 8, strike out the word "Companies" and insert the word "Company."

In line 9, after the word "*Provided*," strike out the words "that no pay, bounty, or pension shall be held to have accrued prior to the passage of this act," and insert the words "that no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

GEORGE A. COLE

The next business on the Private Calendar was the bill (H. R. 12641), to correct the military record of George A. Cole.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers George A. Cole, who was a member of Troop F, First Regiment United States Cavalry, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a member of that organization: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

THOMAS W. MOORE

The next business on the Private Calendar was the bill (H. R. 13097) for the relief of Thomas W. Moore.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Thomas W. Moore, who was a member of Company K, Sixteenth Regiment United States Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

JOSEPH CUNNINGHAM

The next business on the Private Calendar was the bill (S. 2733) for the relief of Joseph Cunningham.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the pension laws or any laws conferring rights, privileges, or benefits upon persons honorably discharged from the United States Army, Joseph Cunningham shall be held and considered to have been honorably discharged as a private, Company F, Forty-third Ohio Infantry, on April 12, 1865; but no pension, pay, nor bounty shall be held to have accrued prior to the passage of this act.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

GEORGE A. ROBERTSON

The next business on the private calendar was the bill (S. 1541) for the relief of George A. Robertson.

The clerk read the title of the bill.

The SPEAKER pro tempore (Mr. SNELL). Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the provisions of the act approved September 7, 1916, entitled "An act to provide compensation for employees of the United States receiving injuries while in the performance of their duties, and for other purposes," are hereby extended to George A. Robertson for the loss of his right eye while employed by the Department of the Interior in Glacier National Park in the year 1913, and that he be paid such sums as would properly be due him within the provisions of section 4 of the said act of September 7, 1916. The United States Employees' Compensation Commission is hereby authorized and directed to make payments in compliance with the terms of the said act of September 7, 1916, and in accordance with the rules and regulations of said commission. Any money in the United States Treasury not otherwise appropriated is hereby appropriated for the purpose of this act.

With the following committee amendment:

Strike out all after the enacting clause and insert:

"That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and in full settlement against the Government, the sum of $1,250 to George A. Robertson for the loss of his right eye while employed by the Department of the Interior in Glacier National Park, 1913."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

W. H. KAUFMAN

The next business on the Private Calendar was the bill (S. 2061) for the relief of W. H. Kaufman.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HICKEY. Mr. Speaker, I object.

NELLE M'CONNELL

The next business on the Private Calendar was the bill (S. 2764) for the relief of Nelle McConnell.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the United States Employees' Compensation Commission be, and it is hereby, authorized and directed to waive the limitation for filing claim for compensation in the case of Nelle McConnell, widow of Wilbur Ross McConnell, late a scientific assistant in the Bureau of Entomology of the United States Department of Agriculture.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

DOUGLAS B. ESPY

The next business on the Private Calendar was the bill (H. R. 3168) for the relief of Douglas B. Espy.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to reimburse Douglas B. Espy, chief machinist mate United States Navy, the sum of $1,033, out of any money in the Treasury not otherwise appropriated, for the loss of uniforms, clothing, and other personal property belonging to him and his wife, as a result of a fire in the quarters at the naval radio station, Cavite, P. I., on the 15th day of March, 1927.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

HEIRS OF EDGAR C. BRYON

The next business on the Private Calendar was the bill (H. R. 3967) for the relief of the next of kin of Edgar C. Bryon.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $50,000 to the legal representatives of Edgar C. Bryon for his next of kin in full compensation for any claims arising out of the death of such Edgar C. Bryon, who was struck and killed by an automobile truck in the service of the United States Post Office Department on October 2, 1919, in Brooklyn, N. Y., as a result of gross negligence on the part of the driver thereof and through no fault of his own, such driver having since been indicted for manslaughter in the second degree for such negligence.

With the following committee amendments:

Page 1, line 5, after the word "appropriated" insert "and in full settlement against the Government"; and in line 6, strike out "$50,000" and insert in lieu thereof "$5,000."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ANDREW JACKSON SEWARD, JR.

The next business on the Private Calendar was the bill (H. R. 2486) for the relief of Andrew Jackson Seward, jr., deceased.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, sailors, or marines, Andrew Jackson Seward, jr., deceased, who was seaman on the U. S. S. *Nevada* shall hereafter be held and considered to have been honorably discharged from the naval service of the United States as seaman on or about the 19th day of June, 1919: *Provided*, That no back pay or allowances shall accrue prior to the passage of this act.

With the following committee amendment:

Page 1, line 9, after the figures "1919," insert "*Provided*, That no back pay or allowances shall accrue prior to the passage of this act."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

T. GAINES ROBERTS

The next business on the Private Calendar was the bill (H. R. 5019) for the relief of T. G. Roberts.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in recognition of the services of Commander T. G. Roberts, Construction Corps, United States Navy, retired, as superintending constructor for the Navy of 136 naval war vessels in whole or in part, of all kinds and sizes, which is probably the highest record ever made, and of 261 merchant ships converted to war purposes, during a period of about 14 years, principally at the four greatest private shipyards in the United States, and having held the temporary rank of captain for four years and four months during and after the war, the President is hereby authorized and directed to place him upon the retired list with the rank of captain upon the retired list of the Construction Corps of the Navy: *Provided*, That no increase nor back pay or allowances of any kind shall accrue as a result of the passage of this act.

With the following committee amendments:

Page 1, line 7, after the word "sizes" strike out the balance of line 7 and all of lines 8, 9, 10, 11, 12; and on page 2, after the word "authorized" strike out the words "and directed."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

JAMES E. TRUSSELL

The next business on the Private Calendar was the bill (S. 2673) for the relief of James E. Trussell.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. SNELL). Is there objection?

Mr. WARREN. I object.

OLIVER C. SELL

The next business on the Private Calendar was the bill S. 2966, an act for the relief of Oliver C. Sell.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, or benefits upon honorably discharged soldiers, Oliver C. Sell, recruiting officer, and in Company B, First Regiment Ohio Volunteer Infantry, shall hereafter be held and considered to have been enrolled in the military service of the United States on July 24, 1898, instead of August 1, 1898, as shown on the official records of the War Department.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

L. PICKERT FISH CO. (INC.)

The next business on the Private Calendar was the bill (H. R. 10908) for the relief of L. Pickert Fish Co. (Inc.).

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the claim of L. Pickert Fish Co., a corporation created by and existing under the laws of the State of Maine, the legal owner of a wharf and factory thereon, at Provincetown, Mass., which was damaged and practically destroyed on or about November 15, 1926, through collision therewith by the U. S. Coast Guard cutter *Morrill*, for damages caused by said collision may be sued for in the District Court of Massachusetts, and that said court shall have jurisdiction to hear and determine such suit according to the principles of law and rules of practice obtaining in like cases between private parties at common law and to enter a judgment or decree for the amount of such damages and costs, if any, as shall be found to be due against the United States in favor of the said L. Pickert Fish Co. upon the same principles and measures of liability and damage as in like cases between private parties and with the same rights of appeal, and that any final judgment rendered in such suit shall, upon due presentation of an authenticated copy thereof, be paid by the proper accounting officer of the United States out of any appropriation or other funds available therefor, and otherwise there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, a sum sufficient to pay any such judgment as may be rendered: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in said district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within six months of the date of the passage of this act.

SEC. 2. There is authorized to be appropriated such sums as may be necessary to pay the amount of any judgment rendered by the court.

With the following committee amendments:

Page 2, line 9, after the word "appeal," strike out the semicolon and insert a colon; and strike out the language that follows down to the word "Provided" in line 16.

Add a new section to the bill, as follows:

"SEC. 2. There is authorized to be appropriated such sum as may be necessary to pay the amount of any judgment rendered by the court."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ROCKY FORD NATIONAL BANK

The next business on the Private Calendar was the bill (H. R. 12714) for the relief of Rocky Ford National Bank, Rocky Ford, Colo.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to redeem in favor of the Rocky Ford National Bank, of Rocky Ford, Colo., United States registered note No. K-1111428 in the denomination of $100 of the Victory Liberty loan 4¾ per cent convertible gold notes of 1922-23, inscribed "James O. Bartholemew," with interest from December 15, 1922, to May 20, 1923, without presentation of said note, the said note having been lost or destroyed after having been assigned in blank by the registered payee and being the property of the Rocky Ford National Bank; and the Secretary of the Treasury in hereby authorized and directed to also redeem in favor of the Rocky Ford National Bank, Rocky Ford, Colo., United States coupon notes No. F-6055335, G-7693827, and L-12363810, each of the $50 denomination, of the Victory Liberty loan 4¾ per cent convertible gold notes of 1922-23, with interest from June 15, 1922, to December 15, 1922, in the case of the first note above described, and with interest from June 15, 1922, to May 20, 1923, in the case of the last two notes above described, without presentation of said notes, said notes having been lost or destroyed, and being the property of the Rocky Ford National Bank: *Provided*, That the said notes shall not have been previously presented to the Treasury Department under such circumstances as would necessitate their redemption in favor of the person, firm, or corporation presenting them: *And provided further*, That the Rocky Ford National Bank shall first file in the Treasury Department of the United States a bond in the penal sum of double the amount of the principal of the said notes and the unpaid interest which had accrued thereon when the principal became due and payable, in such form and with such surety or sureties as may be acceptable to the Secretary of the Treasury, with condition to indemnify and save harmless the United States from any loss on account of the notes hereinbefore described.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

RICHARD A. CHAVIS

The next business on the Private Calendar was the bill (H. R. 3278) for the relief of Richard A. Chavis.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Richard A. Chavis, who served as a member of Company L, Second South Carolina Volunteer Infantry, shall hereafter be held and considered to have been discharged honorably from said service on the 19th day of April, 1899: *Provided*, That no back pay, pension, bounty, or other emolument shall accrue prior to the passage of this act.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

FRANK W. SIMPSON

The next business on the Private Calendar was the bill (H. R. 4811) to reinstate Frank W. Simpson, formerly lieutenant, Coast Artillery, United States Army, as first lieutenant in the United States Army.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized to reappoint Frank W. Simpson, formerly a lieutenant in the Coast Artillery, United States Army, an officer of the Army, in the grade and in the position on the promotion list provided by the next to last paragraph of section 24a of the national defense act of June 3, 1916, as amended by the act of June 4, 1920: *Provided*, That said Frank W. Simpson shall not by the passage of this act be entitled to any back pay or allowances of any kind: *Provided further*, That nothing contained in the act shall operate to increase the number of officers in the Regular Army now authorized by law.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

MARIA HENSLEY CLAY

The next business on the Private Calendar was the bill (H. R. 10194) for the relief of Maria Hensley Clay.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That Maria Hensley Clay, mother of Charles D. Clay, jr., who served as a first lieutenant in Company B, Third Regiment United States Infantry, and who was killed at Fort Snelling, Minn., November 27, 1922, in the line of duty, shall be considered as the duly designated beneficiary of the late Charles D. Clay, jr., under the act approved May 11, 1908, as amended by the act approved March 3, 1909 (35 Stat. L. 108 and 735).

With the following committee amendments:

Line 7, after the word "beneficiary," insert the words "and dependent."

Line 8, strike out the word "May." Strike out all of line 9 and all of line 10. Insert after the word "approved," in line 8, the following: "December 17, 1919 (41 Stat. L. 367), and the Secretary of War be, and he is hereby, authorized and directed to cause payment of the gratuity of six months' pay to be made to Mrs. Martha Hensley Clay from current appropriation."

Mr. ROWBOTTOM. Mr. Speaker, I move to amend the committee amendment by striking out the word "Martha" and inserting the word "Maria."

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

EFFA COWE

The next business on the Private Calendar was the joint resolution (H. J. Res. 261) for the relief of Effa Cowe, Creek Indian, new born, roll No. 78.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the joint resolution, as follows:

Resolved, etc., That there is authorized to be appropriated the sum of $5,125, out of the unpaid Creek equalization funds, in full satisfaction of her rights to an allotment of Creek tribal lands.

With the following committee amendments:

Line 4, strike out "$5,125" and insert in lieu thereof "$1,101."

Line 4, after "the," strike out "unpaid Creek equalization funds" and insert in lieu the words "tribal funds of the Creek Nation."

The committee amendments were agreed to.

The joint resolution as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

THOMAS G. WRIGHT

The next business on the Private Calendar was the bill (H. R. 3937) for the relief of the heirs of Thomas G. Wright.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the heirs of Thomas G. Wright the sum of $2,800, the same being for the use of property by the United States.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

COBB BLASDELL & CO.

The next business on the Private Calendar was the bill (H. R. 4781) for the relief of the legal representatives of Cobb Blasdell & Co.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the claim of the legal representatives of Cobb Blasdell & Co., for oats purchased by them for the United States Government, in pursuance of written and oral contracts made by them with United States officers, be, and the same is hereby, referred to the Court of Claims of the United States with jurisdiction to hear and determine the same at the fair and reasonable value of the oats purchased as aforesaid, after deducting all proper credits, and report to Congress: *Provided*, That it be shown to the satisfaction of the court that said firm did not give any aid or comfort to the late Civil War, but was throughout the war loyal to the Government of the United States. The statutes of limitations and section 179, Judicial Code, to the contrary notwithstanding.

Mr. HOOPER. Mr. Speaker, I offer the following committee amendment.

The Clerk read as follows:

Committee amendment offered by Mr. HOOPER: In the title insert a comma after the word "Cobb," and in line 3 of the bill insert a comma after the word "Cobb."

The amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

LIEUT. GEORGE H. HAUGE, UNITED STATES ARMY

The next business on the Private Calendar was the bill (H. R. 9210) for the relief of Lieut. George H. Hauge, United States Army.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, directed to pay to Lieut. George H. Hauge the sum of $357.35, which sum, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, said sum to be payment in full for all losses of personal property incurred by him while at Camp Pike, Ark.: *Provided*, That the accounting officer of the Treasury shall require a schedule and affidavit from him, such schedule to be approved by the Secretary of War.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

EUGENIA EDWARDS

The next business on the Private Calendar was the bill (H. R. 9396) to compensate Eugenia Edwards, of Saluda, S. C., for allowances due and unpaid during the World War.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury of the United States not otherwise appropriated, to Eugenia Edwards, of Saluda, S. C., the sum of $164, in full compensation for allowances due her by reason of an allotment made by her son, Joseph Kirksey Edwards, while a soldier in the United States Army during the World War from April 2, 1918, to February 28, 1919, inclusive.

With the following committee amendment:

Line 7, strike out "$164" and insert "$110."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

CAPT. W. B. FINNEY

The next business on the Private Calendar was the bill (H. R. 9516) for the relief of Capt. W. B. Finney.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he hereby is, authorized and directed to pay to Capt. W. B. Finney, of 920 Grand Avenue, Kansas City, Mo., the sum of $479.14, out of any money in the Treasury not otherwise appropriated, to reimburse him for money paid out by him in line of his duties as captain Company A, Seventieth Regiment United States Infantry, Camp Funston, Kans.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

HARRY M. KING

The next business on the Private Calendar was the bill (H. R. 10236) for the relief of Harry M. King.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Without objection, a similar Senate bill, S. 4376, will be substituted for the House bill.

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That the United States Employees' Compensation Commission be, and it is hereby, directed to hear and determine the claim of Harry M. King, who claims to have suffered physical injuries received by him in line of duty while working for the Government at Muscle Shoals, Ala., during the year 1918.

The bill was ordered to be read a third time, was read the third time, and passed.

A similar House bill was laid on the table.

A motion to reconsider the vote by which the bill was passed was laid on the table.

GEORGE B. BOOKER CO.

The next business on the Private Calendar was the bill (S. 342) for the relief of George B. Booker Co.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to George B. Booker Co., of Wilmington, Del., out of any money in the Treasury not otherwise

appropriated, the sum of $102.69, said sum being due George B. Booker Co. for merchandise furnished to the Reedy Island Naval Station mess during the year 1918.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

CAPT. CLARENCE BARNARD

The next business on the Private Calendar was the bill (S. 605) for the relief of Capt. Clarence Barnard.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Capt. Clarence Barnard, Ordnance Department, the sum of $1,374.21, because of losses sustained by him while in the service.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

JOHN W. STOCKETT

The next business on the Private Calendar was the bill (S. 2319) for the relief of John W. Stockett.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. SCHAFER. Mr. Speaker, I understand that amendments are going to be offered to reduce the amount and provide for a limitation of attorneys' fees.

Mr. JENKINS. I have such an amendment.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, directed to pay, out of any money in the Treasury of the United States not otherwise appropriated, to John W. Stockett, draftsman in the War Department, the sum of $142,500 in full compensation for royalty on the use by the United States Army of the Stockett breech mechanism upon guns, which device was duly covered by letters patent issued to the said John W. Stockett by the United States, to wit, Nos. 601176, 601177, 620259, 699256, and 705157.

Mr. JENKINS. Mr. Speaker, I offer the following committee amendment, which I send to the desk.

The Clerk read as follows:

Page 1, line 7, strike out "$142,500" and insert in lieu thereof "$50,000," and add the following at the end of the bill:

"*Provided*, That it shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum which in the aggregate exceeds 10 per cent of the amount of any item appropriated in this bill on account of services rendered or advances made in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not less than $100 or more than $2,000."

The committee amendment was agreed to, and the bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

WILL J. ALLEN

The next business on the Private Calendar was the bill (S. 2473) for the relief of Will J. Allen.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Chief Yeoman Will J. Allen, United States Coast Guard, out of any money in the Treasury not otherwise appropriated, the sum of $80 in settlement of a supplemental claim for differences in pay and allowances due him because of his services in the World War, this sum having been erroneously omitted from the statement submitted to the Court of Claims.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

JOHN L. ALCOCK

The next business on the Private Calendar was the bill (S. 3308) to confer jurisdiction on the Court of Claims to hear and determine the facts in the claim of John L. Alcock.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Court of Claims of the United States be, and hereby is, given jurisdiction to hear and determine the claim of John L. Alcock, of Baltimore, Md., and to award him compensation for losses or damages, if any, which he may have suffered through action by governmental agencies in commandeering, requisitioning, controlling by compulsion or otherwise, allocating or directing the contracting for, or delivery of, spruce and fir lumber which he owned or had sold under firm and binding contracts to others than allied Governments; and to enter decree or judgment against the United States for such compensation, with interest thereon, notwithstanding the fact that there was no taking by the United States of any of said spruce or fir lumber for the direct use of the United States, and notwithstanding the contracts made by claimant with representatives of the Governments allied with the United States, and notwithstanding the fact that the United States, or any officer, agent, or employee acting in its behalf, controlled, allocated, or directed the delivery of said spruce and fir lumber, or directed or required contracts to be made therefor under color of authority, or committed a tort in doing so.

SEC. 2. The Court of Claims in the adjudication of such claim is authorized, in its discretion, to use, in addition to any evidence which may be offered in any suit brought under this act, the pleadings and evidence in the case of John L. Alcock & Co. *v.* United States (61 C. Cls. Repts. 312).

SEC. 3. Such claim may be instituted at any time within four months from the approval of this act, notwithstanding lapse of time or any statute of limitations. Proceedings in any suit brought in the Court of Claims under this act, appeals therefrom, and payment of any judgment therein shall be had as in the case of claims over which such court has jurisdiction under section 145 of the Judicial Code, as amended.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. LINTHICUM. Mr. Speaker, I ask unanimous consent to print a statement of the facts in connection with this bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. LINTHICUM. Mr. Speaker, Mr. John L. Alcock, of Baltimore, Md., has for many years been engaged in the hardwood lumber business in the city of Baltimore, trading under the firm name of John L. Alcock & Co. Prior to the entry of the United States into the World War he had purchased in this country and sold to various parties in Great Britain large quantities of spruce and fir lumber suitable for airplane construction.

On or about February 5, 1918, Mr. Alcock had purchased and resold to purchasers in Great Britain, under valid and binding contracts, 301 cars of spruce and fir lumber, which at that time were loaded on board railroad cars, and either moving toward the coast or had arrived at the ports of Baltimore or Galveston. The bills of lading, insurance certificates, invoices, and drafts covering a substantial number of these cars were at that time deposited with the banking house of Alexander Brown & Sons, of Baltimore, and drafts drawn against them and payment in part received.

The purchasers under the contracts for the entire 301 cars of lumber, so Mr. Alcock claims, had agreed to "arrange ocean space and to pay invoice valuation after deducting all charges when cars" were "loaded in the interior." Under these contracts, Mr. Alcock's duty and responsibility had been finally completed, and there was nothing left for him to do except to collect the balance of the money due.

About February 5, 1918, Maj. F. W. Leadbetter, who was then in charge of the production department of the Signal Corps, and acting for the War Department of the United States and for the common interests of the United States and its allies, requested Mr. Alcock, so Mr. Alcock claims, to submit to him a list of all spruce and fir lumber which he had sold under contracts to British purchasers. This request was complied with by Mr. Alcock in writing, and shortly thereafter Major Leadbetter requested Mr. Alcock to come to Washington for a conference.

During this conference on February 11, 1918, at which Capt. D. Thomson, representing the British, was present a part of the time, Major Leadbetter discussed the situation with respect to the control of spruce and fir lumber, and told Mr. Alcock, so Mr. Alcock claims, that he would have to deliver his spruce and

fir lumber according to his instructions; that he would not be permitted to ship the lumber which he had already sold to British purchasers; and that, unless he followed Major Leadbetter's instructions, this lumber would be commandeered and requisitioned by the United States. Mr. Alcock, so he avers, protested against the proposed action and said that if the lumber were commandeered he would suffer great loss and damage; and he testified in his suit in the Court of Claims that Major Leadbetter assured him that he would be entitled to just compensation, and insisted that he comply with his instructions, and stated that, if he did so, he would be protected, and further that he (Major Leadbetter) had decided, after a conference with foreign representatives, to commandeer the lumber and apportion it between the representatives of the allied Governments, which Major Leadbetter denied.

On October 19, 1923, the Secretary of War made a report on this case to the Attorney General, and, referring to the conference with Major Leadbetter on February 11, 1918, made the following statement:

At the conference referred to, John L. Alcock & Co. were advised that their supply of lumber would be commandeered.

After the conference on February 11, 1918, Lieutenant Lippincott, under the instructions of Major Leadbetter and acting for the United States, took over the absolute control and disposition of the lumber in controversy. From and after the date of the conference, specific instructions were given to Alcock by Lieutenant Lippincott and others over Major Leadbetter's signature for the disposition of every car of lumber.

Immediately following the conference on February 11, 1918, and at the direction of Major Leadbetter, Mr. Alcock negotiated with the English, French, and Italian representatives, and agreements were entered into for the payment to him of the cost of his spruce lumber f. o. b. mill, and an additional 5 per cent for expenses, delivery to be made at the United States port for shipment abroad.

Mr. Alcock was paid by the British, French, and Italian Governments the amount agreed to be paid to cover the cost and expense in connection with the delivery of lumber. He has, however, received no compension whatsoever for the contracts which were canceled or for the loss sustained by him due to the cancellation of these contracts.

The control of the production and distribution of the spruce lumber of the United States was undertaken for the benefit of all of the Allies, including the United States, and it should not avoid responsibility if, as a matter of fact, claimant was deprived of his property or property rights through the action of officers or agents of the United States without receiving just compensation therefor.

Mr. Alcock, in the opinion of this committee, in equity and good conscience, should be given just compensation for losses or damage, if any, which he may have suffered through action by governmental agencies in controlling by compulsion or otherwise, allocating or directing the contracting for or the delivery of spruce and fir lumber which he owned or had sold to others under firm and binding contracts.

As stated in the opinion of the Court of Claims, this case is "decidedly unique," and it will not afford a precedent for action in other cases not based on similar facts.

GEORGE A. DAY

The next business on the Private Calendar was the bill (H. R. 9719) for the relief of George A. Day.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers George A. Day, who was a member of Company H, Twenty-second Regiment Wisconsin Volunteer Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of that organization on the 6th day of October, 1864: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

F. STANLEY MILLICHAMP

The next business on the Private Calendar was the bill (H. R. 11064) for the relief of F. Stanley Millichamp.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Bt it enacted, etc., That the sum of $4,555 is hereby authorized to be paid to F. Stanley Millichamp, of Wapato, Wash., for the burning of his orchard, and the damages resulting therefrom, caused by a fire set by Government employees under the Bureau of Indian Affairs of the Department of the Interior.

With a committee amendment as follows:

Line 3, strike out "$4,555" and insert "$4,042"; and after line 4, insert "in full settlement of all claims against the Government."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

JOSEPH M'ALEER

The next business on the Private Calendar was the bill (H. R. 13476) for the relief of Joseph M. McAleer.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. WARREN. I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

DR. STANLEY R. TEACHOUT

The next business on the Private Calendar was the bill (H. R. 4776) for the relief of Dr. Stanley R. Teachout.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Dr. Stanley R. Teachout, of Nashville, Tenn., out of any money in the Treasury not otherwise appropriated, the sum of $35,000 in full compensation for losses sustained and expenses incurred by him on account of certain repairs and alterations which he made in his buildings at Nashville, Tenn., at the instance of and with the approval of representatives of the United States Veterans' Bureau and for the purpose of renting said premises to the said United States Veterans' Bureau and making same suitable for the occupancy by its original office; and for losses and damages sustained by him on account of the said premises being vacated and the lease canceled by the bureau after an occupancy of nine months.

With a committee amendment as follows:

Page 1, line 6, strike out "$35,000" and insert "$22,602.14."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. BYRNS. Mr. Speaker, there is a missprint on page 2, line 3. I move to strike out the word "original," and insert in lieu thereof the word "regional."

The SPEAKER pro tempore. The question is on agreeing to the amendment offered by the gentleman from Tennessee.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

JOHN F. O'NEIL

The next business on the Private Calendar was the bill (H. R. 5995) for the relief of John F. O'Neil.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HICKEY. I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

LEO SCHEUREN

The next business on the Private Calendar was the bill (H. R. 10125) for the relief of Leo Scheuren.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the

Treasury not otherwise appropriated, and in full settlement against the Government, to Leo Scheuren, of Pottsville, Pa., the sum of $10,000 on account of the death of his wife, Elizabeth Scheuren, who was killed by a United States mail truck on December 23, 1926, at Pottsville, Pa.

With a committee amendment as follows:

Page 1, line 7, strike out "$10,000" and insert "$5,000."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

LORETTA PEPPER

The next business on the Private Calendar was the bill (H. R. 10126) for the relief of Loretta Pepper.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and in full settlement against the Government, to Loretta Pepper, of Ashland, Pa., the sum of $10,000 on account of injuries sustained by her when struck by a United States mail truck at Pottsville, Schuylkill County, Pa., on December 23, 1926.

With a committee amendment as follows:

Line 7, strike out "$10,000" and insert in lieu thereof "$5,000."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

DAVID A. WRIGHT

The next business on the Private Calendar was the bill (H. R. 12638) for the relief of David A. Wright.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

Mr. CHINDBLOM. I ask unanimous consent that the bill as it is recommended to be amended be read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $13,187.50 to David A. Wright, of Chicago, Ill., for money paid by him to the United States as a part of the purchase price of certain machinery which was agreed to be purchased by him from the United States in 1920, but which was not delivered in accordance with the terms of sale, and in order to reimburse and compensate the said David A. Wright for the cost of transportation, unloading, handling, and storage by him in his warehouse in Chicago, Ill., of machinery belonging to the United States.

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

WILLIAM M. SHERMAN

The next business on the Private Calendar was the bill (S. 162) for the relief of William M. Sherman.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, or their dependents, William M. Sherman, who served as a private of Troop A, Eighth Regiment United States Cavalry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of said organization on the 7th day of March, 1901: *Provided*, That no bounty, pension, pay, or other emoluments shall accrue prior to the passage of this act.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

HARRY C. TASKER

The next business on the Private Calendar was the bill (H. R. 11153) for the relief of Harry C. Tasker.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Harry C. Tasker, of Green River, Utah, the sum of $450 for the loss of a horse loaned to the employees of the Geological Survey and not returned.

With the following committee amendment:

Page 1, line 6, strike out "$450" and insert "$100."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

SAMUEL S. MICHAELSON

The next business on the Private Calendar was the bill (H. R. 12021) for the relief of Samuel S. Michaelson.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Postmaster General be, and he is hereby, authorized and directed to credit the account of Samuel S. Michaelson, postmaster at Montevideo, Minn., in the sum of $696.95, due the United States on account of the loss resulting from the closing of the First National Bank of Montevideo, Minn.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

PERMISSION TO MAKE THE UNITED STATES A PARTY DEFENDANT

The next business on the Private Calendar was the bill (H. R. 12809) to permit the United States to be made a party defendant in a certain case.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the consent of the United States be, and it is hereby, given to be named a party in any suit which is now or may hereafter be instituted in the courts of the State of South Carolina by Mrs. Cora W. Godfrey to foreclose the mortgage of W. J. Wood, executed and delivered unto said Mrs. Cora W. Godfrey on January 30, 1920, to secure the note of W. J. Wood in the amount of $2,500 on the following real estate: All that certain lot of land in the city and county of Anderson, State of South Carolina, fronting 120 feet, more or less, on East Benson Street and running back in parallel lines 108 feet, more or less, to lot now owned by Mrs. Holland and Horton and known as 315 East Benson Street, and is bounded on the north by Horton, each by Campbell, south by East Benson Street, and west by A. W. Kay, and being part of the Pinckney Williams property conveyed to A. W. Kay by the heirs of the said Pinckney Williams, deceased, recorded in book AAAA, at page 174, R. M. C., office for Anderson County, S. C., and conveyed unto the said W. J. Wood by the said A. W. Kay by deed dated January 29, 1920, of record in the office of the clerk of court for Anderson County, S. C., in RRRRR, at page 4.

SEC. 2. That in all suits or proceedings that may be instituted under this act in which the United States has been made a party, the process of the court shall be served upon the United States district attorney for the eastern district of South Carolina, whose duty it shall be to appear and defend the interest of the United States in said real estate.

SEC. 3. After the entry of final judgment or decree by the court in any suit or proceeding in which the United States has been made a party under the provisions of this act pursuant to a finding in the court that a lien exists in favor of the United States the effect of any sale which may thereafter be made by writ of execution or otherwise under the terms of the said judgment or decree, shall be the same, as to the discharge from the property sold of liens and encumbrances, and

otherwise howsoever, as shall be provided by the laws of the State of South Carolina in connection with such sales in the courts of that State and the lien of the United States upon such property shall be subject to discharge from said property by such sale in the same manner as may be provided by the laws of the State of South Carolina as to other liens of a similar nature and shall be relegated to the fund provided by such sale, subject only to such other liens and encumbrances as the court may find to be prior in lien thereto.

SEC. 4. That no judgment for costs shall be rendered against the United States in any suit or proceeding which may be instituted under the provisions of this act, nor shall the United States be or become liable for the payment of the costs of any such suit or proceeding or any part thereof.

With the following committee amendments:

Page 2, line 11, strike out the word "deed" at the end of the line.

Page 2, line 18, strike out the word "eastern" and insert the word "western."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

S. DAVIDSON & SONS

The next business on the Private Calendar was the bill (S. 1122) for the relief of S. Davidson & Sons.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to S. Davidson & Sons, of Marvell, Ark., the sum of $341.41, out of any money in the Treasury of the United States not otherwise appropriated, on account of forfeiture of bond in case of Will Jones.

With the following committee amendment:

Page 1, line 5, strike out "$341.41" and insert "$300."

The committee amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

NATIONAL DEFENSE ACT

The next business on the Private Calendar was the bill (H. R. 8341) to amend the national defense act, approved June 3, 1916, as amended.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the act entitled "An act for making further and more effectual provisions for the national defense, and for other purposes," approved June 4, 1920, be further amended as follows:

"That the number of warrant officers now provided in section 4a, as amended, be increased by one to permit the appointment to that grade of Clarence Ulery, now a master sergeant in the Regular Army, who was a noncommissioned officer of the Regular Army in 1916; and who served in France as a first lieutenant during the World War; and who was eligible for appointment to fill an original vacancy as a warrant officer in the Regular Army on or about October 17, 1921, but who was awaiting trial by a general court-martial at that time and the appointment was withheld until the result of the trial was known; and who, after being acquitted of all charges on January 16, 1922, was denied the appointment to the grade of warrant officer in the Regular Army on account of the original vacancy, to which he was eligible, having in the meantime been filled by another candidate, and the War Department had discontinued further appointments to that grade at that time."

With the following committee amendment:

Strike out all after the enacting clause and insert the following:

"That the Secretary of War is hereby authorized to appoint Clarence Ulery, now a master sergeant, Quartermaster Corps, a warrant officer of the Regular Army: *Provided*, That in determining length of service for longevity pay and retirement he shall be credited with and entitled to count the same military service as now authorized for warrant officers appointed under section 4a of the act of June 4, 1920: *Provided further*, That so much of the provision in the act of June 30, 1922, as prohibits the filling of vacancies in the grade of warrant officer, except in the Mine Planter Service and the position of band leader, until the number in such grade is reduced to 600, shall not apply to the appointee under this act."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

B. C. MILLER

The next business on the Private Calendar was the bill (H. R. 11859) for the relief of B. C. Miller.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That B. C. Miller, of Cleveland, Ohio, who was duly appointed a special master by the District Court of the United States for the Northern District of Ohio, on June 17, 1919, in the cases of Meurer Steel Barrel Co. (Inc.) against The Cleveland Steel Barrel Co. No. 464 in equity, and Meurer Steel Barrel Co. (Inc.) against The Ohio Corrugating Co., No. 465 in equity, then pending in said court, be permitted to withdraw the sum of $525, with accrued interest, now on deposit in the Central National Bank of Cleveland, Ohio, in an official savings account, to the credit of the clerk of said court, said sum being the compensation allowed to B. C. Miller as special master in said cases by the court, with the consent of the parties, and paid into court by the parties pursuant to such order of allowance, the acts of Congress of March 4, 1921 (41 Stat. L., p. 413), and June 16, 1921 (42 Stat. L., p. 41), notwithstanding.

With the following committee amendment:

Page 2, line 8, strike out the figures "413" and insert "1413."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

JAMES M. LONG

The next business on the Private Calendar was the bill (H. R. 7236) for the relief of James M. Long.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to James M. Long the sum of $2,500, in full compensation for damages suffered by reason of being unlawfully assaulted and shot, whereby he was seriously and permanently injured and maimed for life by a member or members of a party of law violators when acting as an officer of Hall County and the State of Georgia, and then and there in the legal discharge of his duty as such an officer, in attempting to arrest one Andrew Jackson Hays, who was then and there a deserter of the United States Army.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

SAMUEL F. TAIT

The next business on the Private Calendar was the bill (H. R. 12117) for the relief of Samuel F. Tait.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and in full settlement against the Government, the sum of $8,226 to Samuel F. Tait, of Coolspring Township, Mercer County, Pa., in full compensation for damages sustained by him in the destruction of his barn, farm crops, and farming implements by a fire resulting from a parachute flare dropped by L. W. Bertaud, pilot of a United States transcontinental mail plane, on December 4, 1926.

With the following committee amendment:

Page 1, line 6, strike out "$8,226," and insert "$5,000."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

GILBERT FAUSTINA AND JOHN ALEXANDER

The next business on the Private Calendar was the bill (H. R. 7411) for the relief of Gilbert Faustina and John Alexander.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay to Gilbert Faustina and John Alexander, out of any money in the Treasury not otherwise appropriated, the sum of $500 each as sureties on the $1,000 bail bond of Ike Davis, which bond was forfeited and the said amount covered into the United States Treasury by the clerk of the Federal court for the southern district of Alabama; the said Ike Davis subsequently being apprehended and brought into court through the efforts of the said Gilbert Faustina and John Alexander and convicted of the offense of which he was charged, and that the sum of $1,000 is hereby appropriated to carry out the purposes of this act.

With the following committee amendments:

Page 1, line 6, insert "and in full settlement against the Government."

Page 1, line 10, after the word "Alabama," strike out the remainder of the bill.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

LULA LEWIS

The next business on the Private Calendar was the bill (H. R. 12280) for the relief of Lula Lewis.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., There is hereby appropriated, out of the Treasury of the United States from any funds not otherwise appropriated, the sum of $429.50, to be paid to Lula Lewis (colored), of Cartersville, Ga., for allotments made to her during the World War by her son, Richard Lewis, a soldier of the United States, the checks for which allotments were received by another person without the knowledge of the said Lula Lewis and cashed by such other person, who received the money paid thereon.

SEC. 2. That from the date of each of said allotment checks not received by the said Lula Lewis (colored) interest shall be calculated thereon at the rate of 4 per cent, and the amount of such interest shall be, and the same is hereby, appropriated in addition to the amount stated in section 1, to be paid to said Lula Lewis, allottee.

With the following committee amendments:

Page 1, strike out all of lines 3, 4, and 5, and insert the following: "That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and in full settlement against the Government, the sum of $320 to Lula Lewis (colored), of."

Page 2, strike out section 2.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ROBINSON NEWBOLD

The next business on the Private Calendar was the bill (H. R. 5222) for the relief of Robinson Newbold.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That the Secretary of War is hereby authorized and directed to pay Robinson Newbold the sum of $302.75 for damages sustained caused by the explosion at Morgan, N. J., to his property at Huguenot Park, Staten Island, N. Y.; and the said sum of $302.75 is hereby appropriated from any money in the Treasury of the United States not otherwise appropriated.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

JEANNETTE S. JEWELL

The next business on the Private Calendar was the bill (H. R. 12966) for the relief of Jeannette S. Jewell.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Jeannette S. Jewell, widow of John F. Jewell, late American consul at Birmingham, England, the sum of $7,000, being one year's salary of her deceased husband, who died of illness incurred while in the Consular Service; and there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, a sufficient sum to carry out the purpose of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

FERDINAND YOUNG, ALIAS JAMES WILLIAMS

The next business on the Private Calendar was the bill (H. R. 10093) for the relief of Ferdinand Young, alias James Williams.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers Ferdinand Young, alias James Williams, formerly a private of Company K, New York Volunteer Infantry, and Company D, Eleventh Regiment Maryland Volunteer Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of Company K, New York Volunteer Infantry: *Provided*, That all pay and allowances due him on said date shall be allowed him.

With the following committee amendments:

Page 1, line 6, strike out "New York Volunteer Infantry" and insert "Fourteenth New York State Militia, subsequently the Eighty-fourth New York Volunteer Infantry"; page 1, line 10, after the word "honorably," insert "January 20, 1863"; page 2, line 1, strike out the words "that all pay and allowances due him on said date shall be allowed him" and insert, "That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

CREEK NATION OF INDIANS

The next business on the Private Calendar was the bill (H. R. 12604) authorizing an advancement of certain funds standing to the credit of the Creek Nation in the Treasury of the United States to be paid to one of the attorneys for the Creek Nation, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. Without objection, the Clerk will report the Senate bill (S. 3868).

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any money now standing to the credit of the Creek Nation of Indians in the Treasury of the United States, the sum of not exceeding $18,000 to be, by the Secretary of the Interior, paid out in his discretion to attorneys for the Creek Nation of Indians employed under the authority of the act of Congress approved May 24, 1924 (43 Stat. L. 139), the payments to be made in such sums as may be necessary to reimburse the attorneys for such proper and necessary expenses as may have been incurred or may be incurred in the investigation of records and preparation, institution, and prosecution of suits of the Creek Nation of Indians against the United States under the above-mentioned act of May 24, 1924: *Provided, however*, That the claims of the attorneys shall be filed by said attorneys with the Secretary of the Interior and shall be accompanied by the attorneys' itemized and verified statement of the expenditures for expenses and by proper vouchers, and that the claims so submitted shall be subject to the approval of the Secretary of the Interior: *And provided further*, That any sums allowed and paid under this act to the attorneys shall be reimbursable to the credit of the Creek Nation out of any amount or amounts which may hereafter be

decreed by the Court of Claims to said attorneys for their services and expenses in connection with the Creek tribal claims and suits under the above-mentioned act of May 24, 1924.

Mr. HASTINGS. Mr. Speaker, I ask unanimous consent to correct the title and also to strike out the word "appropriated" in line 1, and to insert the word "expended."

The SPEAKER pro tempore. The gentleman from Oklahoma offers an amendment which the Clerk will report.

The Clerk read as follows:

In line 1, strike out the word "appropriated" and insert in lieu thereof the word "expended."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

The title was amended.

ELOISE CHILDERS

The next business on the Private Calendar was the joint resolution (H. J. Res. 260) for the relief of Eloise Childers, Creek Indian, minor, roll No. 354.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the present consideration of the joint resolution?

There was no objection.

The Clerk read the joint resolution, as follows:

Whereas Eloise Childers, Creek Indian, minor, roll No. 354, having lost the allotment of land which the United States attempted to assign her and having received from the tribal funds no payments for the satisfaction of such rights: Therefore be it

Resolved, etc., That there is authorized to be appropriated the sum of $4,140, out of the unpaid Creek equalization funds, in full satisfaction of her rights to an allotment of Creek tribal lands.

With the following committee amendments:

Page 1, line 4, strike out "$4,140" and insert "$1,213.24"; page 1, line 4, strike out "unpaid Creek equalization funds" and insert "tribal funds of the Creek Nation."

The committee amendments were agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

JEANETTE RELIEF EXPEDITION

The next business on the Private Calendar was the bill (H. R. 13302) granting a pension to the survivors of the Jeanette relief expedition.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. WARREN. Mr. Speaker, reserving the right to object, and of course, I shall not object, because I am very much in favor of the bill, I would like to inquire of the gentleman from California if any of these parties are now on the pension roll.

Mr. KNUTSON. They are not.

Mr. CARTER. No; not a one.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws, the names of the surviving members of the U. S. S. *Rodgers* who participated in the *Jeanette* relief expedition, and pay them a pension at the rate of $30 per month: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

IDA T. GODFREY

The next business on the Private Calendar was the bill (H. R. 4387) for the relief of Ida E. Godfrey.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Ida E. Godfrey, of Cookstown, N. J., the sum of $3,520.04, damages by fire on June 11, 1921, to certain cranberry bogs adjacent to the rifle range at Camp Dix, N. J.

With the following committee amendments:

In line 6, strike out the figures "$3,520.04" and insert in lieu thereof "$750, to Lee C. Davis, of Wrightstown, N. J., the sum of $500, to Thomas Emley, of Cookstown, N. J., the sum of $750."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

LOUIS C. BRINTON

The next business on the Private Calendar was the bill (H. R. 7492) for the relief of Capt. Louis C. Brinton.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to allow credit in the account of the above-named officer of the Army of the United States in the sum herein stated which now stands as disallowance on the books of the General Accounting Office: Capt. Louis C. Brinton (now lieutenant colonel), Coast Artillery, the sum of $1,448.66, being the amount of erroneous payments made by him during the summer of 1916 while acting as finance officer at Brownsville, Tex.

With the following committee amendments:

In line 3, strike out the words "Secretary of the Treasury" and insert in lieu thereof the words "Comptroller General of the United States."

In line 9, strike out the figures "$1,448.66" and insert in lieu thereof the figures "$1,398.66."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

H. W. DICKSON AND MARY L. DICKSON

The next business on the Private Calendar was the bill (H. R. 11239) for the relief of H. W. Dickson and Mary L. Dickson.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $15 monthly to H. W. Dickson, father of Elizabeth Dickson, deceased, late of Quenemo, Kans., and the sum of $15 monthly to Mary L. Dickson, mother of the said Elizabeth Dickson, and in the case of the death of either of said parents, the sum of $20 monthly to the surviving parent, on account of the death of the said Elizabeth Dickson while serving as a nurse in the base hospital at Fort Riley, Kans., during the World War.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

CAPT. ROGER H. YOUNG

The next business on the Private Calendar was the bill (H. R. 11607) for the relief of Capt. Roger H. Young.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Roger H. Young, formerly captain of Infantry, the sum of $727.55, representing the amount refunded by him on account of the loss of the company funds of Company G, Horsed Battalion, Fifth Ammunition Train, which were lost on or about January 24, 1919.

With the following committee amendment:

In line 6, strike out the figures "$727.55" and insert in lieu thereof the figures "$365."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ALONZO DURWARD ALLEN

The next business on the Private Calendar was the bill (H. R. 12793) for the relief of Alonzo Durward Allen.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill as follows:

Be it enacted, etc., That the Director of the United States Veterans' Bureau is authorized and directed to regard such disabilities of Alonzo Durward (or Dermot) Allen, of Mississippi, as resulted from a case of typhoid fever and complications with which he was afflicted on or immediately after September 18, 1917, to have been incurred in or aggravated by the military service of the United States during the year 1917. And the said director shall pay to the said Alonzo Durward Allen all compensation and benefits to which such service-connected disabilities entitle him under the World War veterans' act, as that act is now in force, or may hereafter be in force. Such compensation and benefits shall be paid in the amount and as nearly as possible in the manner that they would have been paid had the original claim of the said Alonzo Durward Allen for compensation, filed with the United States Veterans' Bureau in October of 1925, been granted. Accrued amounts thereof shall be paid and any further payments to be made shall begin within 90 days from the passage of this act.

With the following committee amendments:

In line 8, strike out the word "accrued."

In line 9, strike out "amounts thereof shall be paid and any further"; capitalize the "p" in "Payments."

In line 10, strike out the word "ninety," and insert in lieu thereof the word "thirty."

The committee amendments were agreed to.
The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider was laid on the table.

SCHOONER "ADDISON E. BULLLARD"

The next business on the Private Calendar was the bill (S. 1486) for the relief of the owners of the schooner *Addison E. Bullard.*
The Clerk read the title of the bill.
Mr. STRONG of Kansas. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.
The SPEAKER pro tempore. Is there objection?
There was no objection.

CARL HOLM

The next business on the Private Calendar was the bill (H. R. 10974) for the relief of Carl Holm.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That the Director of the United States Veterans' Bureau be, and he is hereby, authorized and directed to reimburse out of the appropriation for medical and hospital services to Carl Holm, of Livermore, Calif., the sum of $102, plus interest thereon at the rate of 6 per cent per annum from June 12, 1925, to the date of the enactment of this act. Such sum represents the amount of loss sustained by the said Carl Holm as the result of damage to his barley crop caused by the drilling of a well at the United States Veterans' Bureau Hospital, Livermore, Calif., on June 12, 1925.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.

RAYMOND NELSON HICKMAN

The next business on the Private Calendar was the bill (H. R. 8464) for the relief of Raymond Nelson Hickman.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to nominate and, by and with the advice and consent of the Senate, to appoint Raymond Nelson Hickman a lieutenant commander, Supply Corps, United States Navy: *Provided*, That said Raymond Nelson Hickman shall, within 30 days after being commissioned, appear before a naval examining board which shall determine his fitness for the duties of his rank and grade, which shall be the same as if he had remained on active duty continuously from the date of his commission, January 12, 1916: *Provided further*, That said Raymond Nelson Hickman, if found unfit for active service, shall be placed upon the retired list of the Navy with three-quarters pay, in accordance with the Revised Statutes which govern the retirement of officers whose disability is incurred in the line of duty.

With the following committee amendment:

Page 1, line 12, after the figures "1916," strike out the remainder of the bill.

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.

EDWARD J. COSTELLO

The next business on the Private Calendar was the bill (H. R. 1539) for the relief of Edward J. Costello.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Edward J. Costello, who was a member of Company K, Second Regiment Missouri Volunteer Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

With the following committee amendment:

Line 5, strike out "K, Second Regiment Missouri Volunteer" and insert "E, Thirtieth United States."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote by which the bill was passed was laid on the table.
Mr. SCHAFER. Mr. Speaker, I ask unanimous consent to take up out of order Calendar No. 700.
The SPEAKER pro tempore. Is there objection?
Mr. GREEN. Mr. Speaker, reserving the right to object, I also ask to take up out of order Calendar No. 703.
The SPEAKER pro tempore. Is there objection?
Mr. SMITH. I object.

JAMES W. SMITH

The next business on the Private Calendar was the bill (H. R. 12834) to correct the military record of James W. Smith.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, James W. Smith, who was a member of Company D, Second Regiment Tennessee Volunteer Infantry, Spanish-American War, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of that organization on the 13th day of December, 1898: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.
The title was amended to read: "A bill for the relief of James W. Smith."
A motion to reconsider the vote by which the bill was passed was laid on the table.

PHILIP V. SULLIVAN

The next business on the Private Calendar was the bill (H. R. 4264) for the relief of Philip V. Sullivan.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection to the present consideration of the bill?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized to appoint Philip V. Sullivan, former lieutenant, junior grade, United States Navy, in which grade he served honorably during the World War, a lieutenant, junior grade, in the United States Navy, and to retire him and place him on the retired list of the Navy as lieutenant, junior grade, with retired pay of that grade.

With the following committee amendment:

Line 9, after the word "grade" insert a colon and the words:

"*Provided*, That a duly constituted naval retiring board finds that the said Philip V. Sullivan incurred physical disability incident to active service in line of duty: *Provided further*, That no back pay, allowances, or emoluments shall become due as a result of the passage of this act."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ERNEST L. SILVERS

The next business on the Private Calendar was the bill (H. R. 8597) for the relief of Ernest L. Silvers.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, and their dependents, Ernest L. Silvers, who was a member of Company L, Twentieth United States Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of that organization on the 13th day of March, 1900: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

JOSIAH HARDEN

The next business on the Private Calendar was the bill (H. R. 13260) for the relief of Josiah Harden.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Josiah Harden, 2233371, private in the Infantry, unassigned, United States Army, shall hereafter be held and considered to have been discharged honorably from military service of the United States as an unassigned private in the Infantry of the United States Army: *Provided*, That no bounty, pay, or allowance, shall be held as accrued prior to the passage of this act.

With the following committee amendment:

Line 9, strike out "*Provided*, That no bounty, pay, or allowance shall be held as accrued prior to the passage of this act" and insert "on November 21, 1919: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

JAMES M. THOMAS

Mrs. ROGERS. Mr. Speaker, I ask unanimous consent to take up Calendar No. 705, the bill H. R. 1939.

The SPEAKER pro tempore. Is there objection to the request of the lady from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to credit in the accounts of Lieut. James M. Thomas, Supply Corps, United States Navy, the sum of $4,000, being the amount stolen from United States funds by a person or persons unknown and charged against the accounts of the said James M. Thomas, lieutenant, Supply Corps, United States Navy, on the books of the Treasury Department.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

Mr. MONTAGUE. Mr. Speaker, I ask that the same courtesy be extended to the lady from Kentucky [Mrs. LANGLEY], to take up Calendar No. 680.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

Mr. SMITH. I object, Mr. Speaker, to taking up bills out of order.

Mr. MONTAGUE. I want to extend that same courtesy to the lady from Kentucky [Mrs. LANGLEY].

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

HERMAN C. DAVIS

The next business on the Private Calendar was the bill (H. R. 9737) for the relief of Herman C. Davis.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Herman C. Davis of Camp Knox, Hardin County, Ky., the sum of $10,000 in full settlement of all claims against the United States for injuries arising out of a gunshot wound inflicted by a member of the provost guard doing duty at Camp Knox on March 17, 1919.

With a committee amendment, as follows:

Line 5, strike out "$10,000" and insert in lieu thereof "$2,500."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. GREEN. Mr. Speaker, I ask unanimous consent to take up a Senate bill in behalf of a man who is 76 years old.

Mr. HICKEY. I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

ADDISON E. BULLARD

Mr. McDUFFIE. Mr. Speaker, I ask unanimous consent to return to Calendar No. 629, the bill S. 1486.

The SPEAKER pro tempore. The gentleman from Alabama asks unanimous consent to return to Calendar No. 629. Is there objection?

Mr. HICKEY. I object.

The SPEAKER pro tempore. Objection is heard.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock p. m.) the House adjourned, according to the previous order, until to-morrow, Saturday, May 26, 1928, at 11 o'clock a. m.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Saturday, May 26, 1928, as reported to the floor leader by the clerk of the committee:

COMMITTEE ON COINAGE, WEIGHTS, AND MEASURES

(10 a. m.)

Authorizing the President to present in the name of Congress gold medals of appropriate design to Clarence D. Chamberlin and Charles A. Levine (H. R. 14006).

To authorize the Secretary of the Treasury to prepare and strike a medal, with appropriate emblems, devices, and inscriptions thereon, commemorative of the enactment of the act of Congress, approved by the President on May 25, 1926, providing for the establishment, in the State of Kentucky, of the Mammoth Cave National Park (H. R. 13694).

EXECUTIVE COMMUNICATIONS, ETC.

542. Under clause 2 of Rule XXIV, a letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Little River, Del., was taken from the Speaker's table and referred to the Committee on Rivers and Harbors.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS
